

1 **THE WHITE HOUSE ORDERED THE ATTACKS ON WHISTLE-BLOWERS IN THE**
2 **CLEANTECH CRASH**

3 BREAKING NEWS, The notice said: ***“GOOGLE, FACEBOOK AND TWITTER***
4 ***'SHADOW FORCED' HATCHET JOB AGAINST AGAINST COMPETITORS, JOURNALISTS***
5 ***AND WHISTLE-BLOWERS ON REQUEST OF THE WHITE HOUSE”***

6
7 The flurry of headline news articles this week apply specifically to the Plaintiff in this case.

8
9 Barack Obama, Nancy Pelosi and Dianne Feinstein, who: A.) Own Google, Twitter and
10 Facebook stock, B.) Get billions of dollars of unreported cash and search engine manipulation from
11 Google, Twitter and Facebook, C.) Exchange orders for public policy between themselves and
12 Google, Twitter and Facebook in ways which only benefit themselves, and D.) Over 20 other dirty,
13 RICO violating, corrupt, things.. have been found via document leaks and staff whistleblowers to
14 have ordered attacks on American citizens that competed with them! THAT IS A FELONY
15 VIOLATION OF DEMOCRACY!

16
17 The attacks on Plaintiff, and other American Citizens, is now proven to have been order by
18 The White House and Congressional Executives!

19
20 The process is called ‘shadow-forcing’ a media attack and only a head of state has the power
21 and resources to conduct such an attack. The historically massive number of headline news stories
22 this week prove that ANY public official who denies that these character assassination attacks,
23 ordered by The White House, occur, are criminal liars.

24
25 In one notorious attack against Plaintiff, White House Press Staff, including White House
26 Press Director Robert Gibbs and White House staff lead Rahm Emanuel, used intermediate relays to
27 communicate with Nicholas Guido Denton, and his team of media assassins. Denton runs a
28 notorious international tabloid publishing cartel beholdon to Barack Obama and Joe Biden family

1 financiers. Denton has famously used his publishing empire to exclusively attack enemies selected
2 by the White House. The FBI, FINCEN and major international forensic investigators have
3 extensive dossiers on Nick Denton, which the Judge should subpoena in this case.
4

5 Upon publishing an attack story on the Denton media sites, The White House has Google
6 lock the attack story on the top page of all 200+ Google digital properties and assign a “PR8”
7 credibility code to that fake news attack story. Plaintiff’s investigators have bank records and billing
8 of the payola transfers between these parties. Each of the former employees and contractors of the
9 Denton and Google character-assassination-for-hire teams, Fusion GPS attack team’s and White
10 House staff mentioned herein should be required to testify in court before a Jury in this matter. It is
11 now IMPOSSIBLE for White House and California Senators to escape the evidence proving these
12 assertions and harms. We will provide testimony, experts and data, in this trial, which proves the
13 level and intensity of White House attacks on competing interests.
14

15 For decades the Defendants have sworn that organized social media attacks by The Silicon
16 Valley Cratel, ordered by The White House and California political leaders “*couldn’t possibly*
17 *happen*” and that any suggestion of such dirty deeds was “*conspiracy theory*”. Now the FACTS
18 prove that there was no “theory” and that there was, and is, a conspiracy of crooked government
19 officials who have INDISPUTABLY put the unjust gains of their stock market scams into their
20 bank accounts and attacked Plaintiff, using taxpayer resources, for reporting it.
21

22 A small number of the hundreds of thousands of new news reports, just filed by famous
23 reporters, follow:

14 [New Twitter files dump reveals former head of safety Yoel Roth met WEEKLY with FBI -](#)
15 [and agency flagged election-related content for moderation](#)

16
17 Newly released internal documents suggest that Twitter's former head of safety Yoel Roth
18 was meeting weekly with the FBI, and show instances of the FBI flagging tweets related to the 2020
19 election for deletion. Journalist Matt Taibbi shared the claims in a new Twitter thread on Friday
20 night, one week after sharing the first tranche of so-called 'Twitter Files' turned over by the
21 company's new owner Elon Musk. In an undated chat on the messaging app Slack that Taibbi says
22 took place after the Capitol riot on January 6, 2021, Roth is seen joking about a mysterious meeting
23 on his calendar, saying it is 'DEFINITELY not a meeting with the FBI I SWEAR'.

8 [**the GOP candidates who were 'shadow banned' before elections**](#)

9 _The release of the second tranche of Twitter files on Thursday night showed the social
10 media giants 'kept a secret blacklist of topics and accounts' to prevent them from trending.

11 An FBI agent's testimony in a freedom of speech case confirms that the bureau ran an
12 operation during the 2020 election that requested social media companies remove content as
13 disinformation, suggesting the government's requests succeeded about half of the time and were
14 conducted with a "headquarter stamp of approval."

15 Elvis Chan, the FBI assistant special agent in charge of the Cyber Branch in San Francisco,
16 told lawyers for the Missouri and Louisiana attorneys general in a lawsuit over social media
17 censorship that he supervised a "command post" in his home city that helped the nationwide
18 disinformation censorship operation function in fall 2020.

19 He described a sprawling operation that at time enlisted the help of FBI field offices around
20 the country, federal prosecutors, and FBI and Justice Department lawyers before his unit would
21 make the final request to social media to block content deemed by the operation to be
22 disinformation or in violation of each company's term of service.

23
24 "We would receive some responses from the social media companies," he recalled. "I
25 remember in some cases they would relay that they had taken down the posts. In other cases, they
26 would say that this did not violate their terms of service."
27
28

1 Chan's description, released as part of his deposition this week, was the most detailed to date
2 of how extensive the FBI's censorship activities were during the 2020 election, raising immediate
3 flags among incoming House Republican committee chairmen worried the operation may have
4 violated constitutional prohibitions on government infringing free speech.

5
6 You can read his full deposition here:

7 File

8 [elvis-chan-deposition.pdf](#)
9

10 Several lawmakers interviewed Wednesday by Just the News said they were troubled to
11 learn of the scope of the operation and FBI headquarters' significant role in it.

12 "Should be very concerning to everyone who cares about the First Amendment, who cares
13 about civil liberties," Rep. James Comer (R-Ky.), the incoming chairman of the House Oversight
14 Committee, told the "Just the News, No Noise" television show. "This is wrong."
15

16 Comer said the censorship machine described by Chan not only raised civil liberty issues, it
17 also raised concerns the FBI had meddled in the election to the benefit of one political party, an
18 activity he believes should be outlawed as part a revision he is proposing to the Hatch Act.

19 "This should be a violation of the Hatch Act," Comer said. "Apparently, there's a loophole in
20 the Hatch Act that doesn't impact social media. We're going to change that legislation next year."
21

22 Chan's name surfaced earlier this year in reports acknowledging he had regular
23 conversations with social media companies, prompting Missouri Attorney General Eric Schmitt and
24 Louisiana Attorney General Jeff Landry to seek his deposition. The two attorneys general also
25 revealed in court filings they learned Chan and one his of FBI colleagues involved in the operation
26 also [made small dollar donations to Democratic candidates](#) in 2020.
27
28

1 But the release of Chan's deposition Tuesday evening opened a much larger window into
2 just how involved the FBI's censorship efforts were.

3
4 While the agent confirmed he succeeded frequently in getting social posts removed from
5 sites, he said he was not aware of any FBI involvement in the most famous censorship episode of
6 the 2020 election — the blocking of the Hunter Biden laptop story in October 2020.

7 Facebook founder Mark [Zuckerberg has suggested his platform blocked the story as](#)
8 [disinformation at the urging of the FBI.](#)

9
10 Chan said his unit made no such request and that the Hunter Biden issue was never raised in
11 government meetings he attended with officials from Homeland Security's Cybersecurity and
12 Infrastructure Security Agency and the social platforms. Hunter Biden came up only one time when
13 a Facebook executive asked whether the FBI had a probe of the future president's son and agents
14 declined to answer the question, he said.

15 "Hunter Biden was not — in my recollection, Hunter Biden was not referred to in any of the
16 CISA USG-industry meetings," Chan testified.

17
18 "From my recollection, one meeting with Facebook after the regular agenda had been
19 completed, one of the Facebook analysts asked if the FBI had any information they could share
20 about the Hunter Biden investigation," Chan added. "To that I recall [attending FBI official] Ms.
21 Dehmlow saying that the FBI had no comment."

22
23 He later added, "I was confident that I was not a party to any meeting with social media
24 companies where Hunter Biden was discussed outside of the one incident that I told you about."

25 But Chan confirmed in the greatest detail yet that the FBI ran a sprawling operation during
26 the fall 2020 election that daily investigated claims of election disinformation and routinely
27 requested that internet and social media companies block the content.
28

1 Chan acknowledged he himself did a podcast interview where he encouraged Americans to
2 report election disinformation to the FBI or Justice Department and then described how complaints
3 were processed, first with FBI analysts, then escalated to field offices for further investigation, sent
4 to headquarters for approval and then relayed to social media companies when headquarters
5 approved.

6
7 "I believe that all these tips are reviewed by an intake analyst, either an FBI employee or an
8 FBI contractor," he testified. "And then I believe they have certain levels of predication where they
9 would keep sending it higher — higher up the chain."

10 Using a hypothetical example, Chan said if analysts determined a disinformation allegation
11 warranted further investigation they might send a request for investigative help to the FBI's St.
12 Louis office and the U.S. Attorney's office in the city.

13
14 "The investigators in the St. Louis office along with the U.S. Attorney's Office would
15 determine if that is something that should be sent to FBI headquarters," he explained. "And then that
16 would be sent to FBI headquarters and there would be an FBI OGC attorney as well as a DOJ public
17 integrity attorney along with, you know, another FBI official.

18
19 "They would all look at it and say, 'Yes, we believe that this should be sent to FBI San
20 Francisco.' So by the time it's reached us, there's already been what I will characterize as an FBI
21 headquarter stamp of approval."

22 Asked how frequently his unit succeeded in getting posts blocked, Chan testified: "I would
23 not say it was 100 percent success rate. If I had to characterize it, I would say it was like a 50
24 percent success rate. But that's just from my recollection."

25
26 Chan's operation was in addition to a separate censorship operation carried out by a private
27 consortium known as the Election Integrity Partnership that worked closely with CISA and a State
28 Department office. That operation, sanctioned by the federal agencies, targeted more than 20 news

1 organizations, including Just the News, two dozen conservative influencers and 22 million social
2 media posts, the group has admitted.

3
4 New Twitter owner [Elon Musk has begun releasing internal files showing the extensive](#)
5 [efforts his platform engaged in to censor](#) American speech, including the Hunter Biden laptop story.

6 And the growing portrait of government-sanctioned censorship has begun to trouble even
7 some Democrats, like Rep. Ro Khanna and former U.S. Sen Bob Torricelli, who told the John
8 Solomon Reports podcast last week that he is disillusioned that the very institutions America has
9 relied upon for decades to guard free speech have now become its most fervent censors.

10
11 "It's troubling, and I don't know how we get out of it," Torricelli said. "And the odd thing
12 about it is the very institutions which have been the safeguard of American free thought and speech
13 — American universities, think tanks, the media — are the worst offenders.

22

23 "We've entered in this period of American history where the range of permissible thought
24 and speech has so narrowed that if you depart from it at all you are, you're labeled, you are
25 censored, and you are silenced. It's incredibly dangerous. But who would have believed the
26 Founding Fathers would have been astounded that at a point in history, American free thought and
27 speech was challenged. And it didn't come from a foreign adversary. It didn't come from a radical
28 political movement. It came from our own institutions."

1 The United States Government, through the White House, Department of Energy, SSA,
2 HUD and other agencies ordered, coordinated, funded, operated, managed, approved, over-saw,
3 encouraged and tactic-managed these attacks on Plaintiff using Plaintiff's own taxpayer monies;
4 thus Plaintiff must be compensated for the damages to him and the losses, therefrom.

2.5 *Operation methods/techniques.* All of JTRIG's operations are conducted using cyber technology. Staff described a range of methods/techniques that have been used to-date for conducting effects operations. These included:

- Uploading YouTube videos containing "persuasive" communications (to discredit, promote distrust, dissuade, deter, delay or disrupt)
- Setting up Facebook groups, forums, blogs and Twitter accounts that encourage and monitor discussion on a topic (to discredit, promote distrust, dissuade, deter, delay or disrupt)
- Establishing online aliases/personalities who support the communications or messages in YouTube videos, Facebook groups, forums, blogs etc
- Establishing online aliases/personalities who support other aliases
- Sending spoof e-mails and text messages from a fake person or mimicking a real person (to discredit, promote distrust, dissuade, deceive, deter, delay or disrupt)
- Providing spoof online resources such as magazines and books that provide inaccurate information (to disrupt, delay, deceive, discredit, promote distrust, dissuade, deter or denigrate/degrade)
- Providing online access to uncensored material (to disrupt)
- Sending instant messages to specific individuals giving them instructions for accessing uncensored websites
- Setting up spoof trade sites (or sellers) that may take a customer's money and/or send customers degraded or spoof products (to deny, disrupt, degrade/denigrate, delay, deceive, discredit, dissuade or deter)
- Interrupting (i.e., filtering, deleting, creating or modifying) communications between real customers and traders (to deny, disrupt, delay, deceive, dissuade or deter)
- Taking over control of online websites (to deny, disrupt, discredit or delay)
- Denial of telephone and computer service (to deny, delay or disrupt)
- Hosting targets' online communications/websites for collecting SIGINT (to disrupt, delay, deter or deny)
- Contacting host websites asking them to remove material (to deny, disrupt, delay, dissuade or deter)
