The Death of the Internet - The Dawn of the PUBLI-NET: 1.1.14

Hi internet! You destroyed us.

You wiped out Obama's healthcare initiative. You destroyed our Christmas by using **Target** to get all of our credit cards and PIN numbers. [You spied on all of the teenage girls when you hacked their web cameras.](#) You took out **Google, Twitter and Facebook** in one huge swoop of **public indignation**. You wiped out America's image and **trust factor** globally. You dropped American tech companies **in the toilet**. You forced us to watch **Twerking** every place we clicked, and you still didn't buy us breakfast.

What's up with that?

So it looks like many people are building a "**new internet**". New media outlets, new ways to connect, new hardware, new software.. all kinds of stuff.

Please, this time, ...please make it **not be evil**. OK?

GH-LAT

Logical Problem of Evil [Internet Encyclopedia of Philosophy]

The challenged posed by this apparent conflict has come to be known as the problem of evil. This article addresses one form of that problem that is prominent in ...
