The methods, tactics and procedures listed herein are intended to convey totally legal ways to expose, terminate and cause the arrest of any target. Do not cross the legal line when you undertake these actions. Use your best judgment.

This is a wikipedia-style document produced by the internet.

HOW THE PUBLIC IS ENDING POLITICAL CORRUPTION FOREVER

This is about powerful and greedy people abusing the public system in order to [manipulate TRILLIONS of government treasury and stock market dollars](#) into their own pockets. They lie, cheat, bribe, steal, attack, and even kill, in order to grab this money (provided from the pockets of the taxpayers). They create fake "*political issues*" in order to steer massive amounts of government money to "*solutions*" that they just happen to own the companies of. ("[Follow the Money](#)") They collude on cover-ups, cover-stories, pump-and-dumps, fake "*Stimulus Funds*" redirection and other illicit deeds. Famous politicians are a very big part of this crime. They are easy to spot via the tens of millions of dollars, in their personal bank accounts, which only appeared after they took office. They broke and separated America by promoting their fake causes, which divide the public, in order to benefit off of their exclusive stock market scams. In fact, if the, completely computer manipulated, stock market did not exist, political corruption in America would be reduced by 95%.

One part of them is: *The Silicon Valley Tech Cartel*; an anti-trust violating organized-crime operation based on quid-pro-quo. [They manipulated the Dept of Energy](#) to only fund political favorites and to sabotage the competitors of those favorites in an epic violation of anti-trust and anti-racketeering laws.

How YOU can use the public "Corruption Kill Box" to wipe out crooked politicians and their financiers: A Corruption Kill Box Procedure combines federal police investigations created by formal filed criminal referrals and Form 302 overview drafts, public class-action lawsuits, massive news media disclosure blasts, formal regulatory agency complaint filings, individual lawsuits against political and agency executives, documentary film production and distribution, the promotion and organization of Congressional hearings, crowd-sourced social media public forensics and open-source AI financial crimes tracking software. The procedure is an extinction-level event with a 100% success rate against corrupt entities. CKB's only work on the corrupt, so non corrupt parties are safe from it's effects. ANY member of the public can engage in these totally legal anti-corruption actions. Just do it!

The most effective interdiction process for political corruption is now here. It is called "*Citizen Forensics*". It is the process of the crowd-sourced deep investigation of public officials, and their skills, followed by the global public exposure and shaming of their illicit deeds. Federal law enforcement groups will even help you do this because you, and they, both have a common goal: to take down crooks.

Over the last decade, these procedures have been proven to work. This manual guides you through procedures that work totally, magnificently and effectively against evil people and scumbags!

Taking Down Corrupt California Politicians, Dirty Government Agency Executives And Their Tech Oligarch Bosses

KEY TACTICS:

- We identified potential targets
- We developed an investigative theory
- We chose the best investigative techniques
- We examined issues unique to these proactive corruption investigations
- We mitigated special considerations in public corruption investigations

IDENTIFYING POTENTIAL TARGETS:

- We asked law enforcement and government sources, including inspectors general, and contract compliance, Congress members and oversight personnel who they suspect
- We asked citizens; business competitors or political rivals; disgruntled current or former employees; paid informants and cooperating defendants; individuals involved in the illegal activity who are seeking to limit or eliminate their criminal exposure by blowing the whistle on corrupt conduct
- We read print, television, and internet media outlets for tips
- We examined if each specific target may be identified via credible tips. Does source have a motive to lie? Is there corroboration?
- We looked at transactions that were identified or appear suspect without specific targets and used those to identify the entities and individuals involved and make a preliminary assessment of the roles played by these individuals, such as decision makers, knowledgeable actors, unwitting participants, and knowledgeable but uninvolved potential witnesses.

We always follow the money - We determine who profited from the transaction and how - Political corruption cases are always about the money! Use modern AI around-the-clock tracking software on the target and their family members to spot money laundering.

Each corrupt politician and operative made a profit from their corrupt actions and those benefits can always be traced with modern forensic accounting and tracking AI. The recent leaks from CPA, VC, law firm and lobbyist records make it even easier. The hack-and-disclose foreign actor campaigns (ie: Supernova, Spectre, Solarwinds, etc.) have even added to those disclosures.

WE DEVELOPED AN INVESTIGATIVE THEORY:

- Theory gives direction to the investigation, but we stay flexible as new facts are leaked or exposed

- We make an initial assessment of whether the alleged corrupt conduct appears to be criminal, or whether it is civil or administrative in nature
- We then identify the elements needed to prove the crimes
- We then try to anticipate possible factual and legal issues and defenses and build our case to rebut or avoid them
- We then identify corrupt officials in jurisdictional law enforcement and regulatory agencies who may be stopping investigations in order to protect a Senator or tech oligarch that pays them or promises them a career advance

MAIN TYPES OF OUR INVESTIGATIONS:

- Historical cases - based on document analysis and witness interviews
- Proactive/undercover cases - running gamut from one day and one deal to elaborate and long-running multi-transaction and multi-target operations

CHOOSING THE BEST INVESTIGATIVE TECHNIQUES:

- We determined which investigative tools to use depending on a variety of factors, including the nature of the alleged violations, the type of investigation our members are conducting, and the resources we had available
- We used the normal progression from simple to complex, with information from initial steps leading to more advanced steps, such as search warrants and federally assisted wiretaps
- We mix and match our methods as appropriate
- Due to the hybrid public/private/citizen investigative team, an “insurance policy” encrypted file set is pre-distributed to journalists, lawyers and Congressional insiders to protect citizen team members

NOTES ON SOME OF THE INVESTIGATIVE TECHNIQUES WE USE:

- Public Source Information
- Internet and media sources
- Court filings, including criminal histories, divorces and other lawsuits, bankruptcy filings, and administrative proceedings before agencies such as the SEC, FTC, and insurance and banking regulators

- Leaks and hacks
- Choicepoint, Autotrack, property records
- Financial disclosure forms; Campaign contribution records; Lobbyist registrations and disclosures
- Information from Parallel Proceedings
- Corruption cases are often set in backdrop of contract disputes and fraud cases. There may be ongoing civil litigation or administrative proceedings generating valuable information, and you should obtain relevant depositions, pleadings, transcripts and court orders.
- Despite common interests, do not work in tandem or actively use the civil litigant to further your investigation, such as by giving them questions to ask at depositions or having them seek documents for you.
- Mail Covers
- Very useful in identifying target's banks, investment firms, et al
- Trash Pulls - "Dumpster Diving"
- Can be very useful if target has recently become aware that they are under suspicion - panic can cause carelessness in disposing of valuable records
- Grand Jury Subpoenas - Documents
- Used to gather foundational materials. Consider whether the entity being served can be relied on to not disclose the subpoena, or whether the records sought are worth the risk
- Issue as early as possible - document production can be slow, particularly with voluminous requests, older records, and/or smaller producing institutions

Subpoenas - Documents to Obtain:

- Bank, brokerage, and other investment account records
- Credit reports & credit card records
- Loan and mortgage records
- Telephone records
- Corporate records

- Do quick initial review to determine subpoena compliance. Do not assume full compliance since many institutions see subpoena compliance as a nuisance and distraction from their "real" business.
- Documents must reviewed and cataloged for use during the investigation and for discovery and trial evidence purposes.
- Document review is time and labor intensive, but is usually the heart of any meaningful historical corruption case.
- Witness Interviews
- Essential investigative steps which require serious thought, planning, and preparation. When possible, conduct interviews after you have obtained and reviewed the documents related to the witness.
- General rule - your way up the chain of involvement and culpability
- Remember to consider interviewing the current and former confidants

Subpoenas - Testimony:

- General rule - do not use the grand jury as your interviewing forum. Usually far better to get voluntary interviews first.
- Two main situations to use grand jury testimony as an investigative tool
- Witnesses who may have useful information but will not agree to a voluntary interview
- Possible defense witnesses - find out what they will say and lock them into that story.
- Immunity
- A double-edged sword. Gets you needed testimony but can cast doubt since people tend to dislike and distrust immunized witnesses.
- Weigh the costs and benefits carefully. Jurors will understand immunizing lower-level witnesses to build a case against the main targets.
- Attempt to secure testimony through cooperation plea agreements Jurors are more likely to believe a witness who has accepted responsibility for their actions by pleading guilty than one who has received a "free pass."

Evidence - Laboratory Analysis:

- Handwriting and fingerprint analysis can be very useful in cases with key documents and knowledge, intent, and/or participation questions. Fingerprints can often be found on documents even after an extended period of time.
- Before requesting handwriting analysis, speak to your examiner to find out if the questioned documents can be analyzed with any degree of certainty. If there is little chance of success, you may not want to do the analysis, particularly if fact witnesses can identify the handwriting or signature.
- Make the analysis request as early as possible
- Tax Return Disclosure Requests - 26 USC Section 6103
- Very useful since targets often understate income on tax returns and overstate it on loan applications, corporate filings, and financial statements.
- Disclosure requests take a significant showing and a court order, and normally come after the investigation has substantiated some level of wrongdoing.
- After tax information is obtained under a disclosure order, there are important restrictions on their use and handling.
- E-Mail Account Information from Internet Service Providers ("ISP")
- Two main types of information you will want: identification of the account holder; and, the stored content of the e-mails maintained on the system.
- Can be very valuable since people use e-mail freely and do not realize or care that hitting erase or delete does not remove the content from the system.
- Court orders and search warrants are needed to get this information.

Since ISPs frequently delete content from their systems, use preservation letters asking ISPs to save the content while you obtain the necessary court orders and search warrants for disclosure.

- Search Warrants
- One of the most powerful investigative tools in corruption cases. Obtains evidence on a surprise basis, before it can be redacted, destroyed, or withheld even when production is required by a grand jury subpoena.
- Provides an opportunity to identify and interview those present at search site.
- Serve contemporaneous grand jury subpoena for the same documents

Search Warrants On Senators And Tech Oligarchs:

- Timing is Key Issue

- Need to be far enough along in investigation to develop probable cause and to know what you are actually looking for.
- The search exposes the investigation, so it generally should not be done until you have exhausted any covert opportunities.
- But, if you wait too long and your target becomes suspicious or aware of the investigation, valuable evidence may be destroyed or moved.
- Search Warrants - They are Not Cost Free
- First and foremost, must commit to promptly and thoroughly review everything seized. This can be an extremely time and labor intensive. If you are not ready, willing, and able to do this review, don't do the search.
- Second, be aware of the public impact of a search on a high-profile target or location. It may bring attention to your investigation, increase public scrutiny on you and the target, and raise expectations that charges are imminent.
- Third, need to plan to best execute the warrant while limiting disruption of important functions when searching a government office. public building

Search Warrants - Computers and Computerized Data:

- Any business or office search warrant is going to include computers and computerized data, and you must be able to seize and use this information.
- Have computer specialists involved in planning and executing the search so that computers and system data can be copied on the scene. It is not desirable or feasible to take away the computers and deal with it later.
- Before searching, try to determine if review the seized data will require specialized assistance and equipment, and how you will make this information available for discovery and later trial use

Physical Surveillance:

- Surveillance is valuable to corroborate information which has been received, to link targets, and identify people associated with the known targets

- Trackers ("Bumper Beepers")
- A slap-on tracker put on in a public place does not require a court order. An order is required to hard-wire a longer-lasting tracker onto a vehicle.
- Beware that under federal law, you are now required to disclose a tracker warrant to the person whose vehicle was tracked at the conclusion of its use. Delays of this notification are at the discretion of the court.
- Pen Register and Trap and Trace Orders
- Allows real-time capture of the incoming and outgoing phone numbers for a particular phone number, and can also order phone company to provide subscriber information for each captured number.
- Requires a court order which can be based on a showing that the information sought is likely to be relevant to the criminal investigation.
- Consensual Recordings
- Audio or video recordings where one party to the call or meeting (normally an undercover agent or cooperating witness) has agreed to record the conversation. These are authorized without any court order so long as the consenting party is on the line or in the room.
- Consensual recordings are the "bread and butter" of proactive investigations.
- Title III Wiretaps and Recording Devices
- Extremely effective tools to investigate ongoing criminal activity, since they allow recording of phone calls and conversations without the presence or participation of an undercover agent or cooperating witness.
- Requires court order based on probable cause and satisfaction of other requirements, including exhaustion of other investigative options. The internal review process for a federal Title III is very demanding.
- Title III's are labor intensive, requiring real-time monitoring and minimization, and regular progress reports to the authorizing judge

Undercover Operations – put a plant inside the Senator’s office or the Google , Netflix, Tesla, Youtube or Facebook executives personal office or home office staff:

- Development and Planning Stage Is Key

- First step is determining what you are trying to achieve (i.e. proving a completed crime, infiltrating ongoing criminal activity, developing new cases on suspected corrupt officials, identifying criminals).

- Second step is creating and implementing a scenario designed to effectively and efficiently achieve those goals. Scenario must be realistic in light of targets, resources, and objectives
- Undercover Operations - Avoiding the Usual Defenses
- Any undercover scenario needs to squarely present the criminal opportunity to the targets. Do not give the target a lack of knowledge or intent defense.
- Plan to avoid entrapment claims. Don't push too hard, offer too much money, or make it too easy, and offer opportunities for the target to back out.
- Undercover Operations - Time, Labor, and Resource Intensive
- Must be patient - will take time to develop trust and opportunities
- Money will have to be spent for payoffs and to set up an undercover business, create appearances, wine and dine targets, etc
- Manpower will be needed - UCAs, case agents, surveillance, et al
- Undercover Operations - Undercover Agents are Crucial
- Should make every effort to introduce a UCA into the scenario.
- UCA is essentially unimpeachable in contrast to either a cooperating defendant who is attempting to avoid charges or get a sentence reduction, or a paid informant, both of whom may have motives to lie
- Undercover Operations - Lights, Camera, Action!
- With or without UCA, to the extent possible, you should have consensual or Title III recordings of every meeting and call.
- Tapes are unimpeachable and jurors expect them.
- Predication
- A reasonable basis to suspect the target is or has engaged in criminal activity. Much lower than probable cause standard.
- Criminal investigations should not be fishing expeditions or integrity testing operations, and predication helps prevent overreaching
- Predication helps overcome entrapment defense, claims of selective or vindictive prosecution, and Hyde Amendment (attorney's fees) claims
- Handling the Cooperating Witness ("CW")

- Give specific directions to the CW and make sure that the CW is told that no "freelancing" is permitted. Enforce this from the beginning, and do not let the CW seize control, even if he or she appears to be producing results.
- Corroborate the CW as much as possible, even on small points, and make sure all contacts between the CW and the targets are recorded. Jurors tend to disbelieve the uncorroborated, unrecorded word of a paid witness.
- Plan for impact of CW's plea agreement, immunity, or payments on the jury.

Flipping a Corrupt Senator or tech Insider:

- The tactical "Silver Bullet"

- Leaving a flipped insider in place can be an extremely effective tool in an ongoing public corruption case because of the knowledge and access they can bring to the investigation.
- Can be used to strengthen or build cases against existing targets and to identify, predicate, investigate, and prosecute other targets.
- In setting with institutional or high-level corruption, a flipped target in place may be the key to gaining entry to a "closed-shop" of corruption.
- Flipping a Corrupt Insider - Inherent Risks
 - Beware of: being double-crossed by a flipped insider who warns other targets and/or helps them generate exculpatory recordings; inadvertent leaks; the insider committing other crimes or wrongdoing while "on our side."
 - Must also make sure that you keep the insider safe.
- The Flip Attempt
 - Determine the right target to pitch. Normally neither the top nor the bottom target. Assess which target may be most effective as a continuing cooperator
 - Use the element of surprise and make strongest presentation possible.
 - If target wants to cooperate, start by getting a confession.
 - If target wants to consult an attorney, they need to do it on the spot.

SPECIAL CONSIDERATIONS IN THESE PUBLIC CORRUPTION INVESTIGATIONS:

- Impact of charges is enormous on elected officials or high-level appointees. Mere existence of an investigation can destroy a career or a life.
- Proceed carefully - you do not want to be used by someone looking to settle a political score or strike back at a business rival.
- Conduct the investigation and prosecution "by the book." Expect the defense to attack not only the charges, but also the conduct of the investigation.
- Be prepared for heightened public and press scrutiny. Remember that in any big corruption case, the "world is watching."

Who We are Taking Down – The Targets:

- See the related list of publicly known targets who have already been disclosed in the press. Other targets are not identified yet

For example; let's look at a corrupt political "crime family" known as the "*Paypal Mafia*". They are also known as "*The Deep State*", "*The Silicon Valley Cartel*" and other quaint names.

They promote their criminal boys club with mobster-emulating pictures of themselves like this:

They have based their lives and culture around the *Godfather* movies and openly refer to themselves as a “cartel”. They have gotten away with it, so far, because they have more money than most law enforcement agencies have. They have thousands of law firms, lobbyists and dirty tricks operatives who spend all day denying, deferring and delaying the justice that is coming for them.

The *indisputable facts* about them are the assertions that the Silicon Valley oligarchs:

1. Control business and politics like a crime Cartel
2. Are a white male fraternity who attack outsiders in organized manners
3. Come from dynastic families that systematically ran them through Stanford, Harvard and Yale men's clubs
4. Were socially trained and programmed to operate in a closed, tribal, exclusionary manner
5. Operated the "Angelgate" collusion scandal
6. Operated the "Silicon Valley High Tech Employee Collusion" for which they were sued in a famous class-action case
7. Controlled the Obama Administration and the Obama White House and traded most key staff with that Administration
8. Have been sued, indicted and charged in divorce proceedings with an unusually massive amount of sex trafficking matters
9. Use the same 10 law-firms who have been charged with public policy manipulation
10. Control internet news, media and information
11. "Own" certain U.S. Senators by virtue of direct bribe payments and securities/stock payola payments
12. Use a variety of tools like GUST, Private Google Docs sites, covert Facebook pages and similar, to secret conspire and plan collusion and organized monopolistic practices
13. Have their venture capitalists spy on entrepreneurs and copy their technology to be deployed by Google, or Facebook under a new name
14. Are a Mafia-like criminal organization
15. Have *"command and control and exclusive beneficiary positions in ongoing, coordinated, criminal and anti-trust activities involving government and stock market funds..."*.

As a case-in-point relative to how hard it is to arrest these kinds of mobsters: the sex crime victims of Cartel member Jeffrey Epstein reported him to the DOJ a decade ago, yet nothing was done.

Our peers reported this Cartel to federal agencies in 2008, STILL, nothing has been done!

These people run Ponzi schemes with State and Federal funds in "stimulus" after "stimulus"!

They use free government money (your money), stock valuation pump-and-dump and black-lists to make certain that no competitor can ever operate against them in any market. The public has had

enough of them. In addition to filing many formal federal requests for FBI, SEC and FTC investigation, you as a member of the public, can do much more

YOU can fight back and destroy these kinds of dirty oligarchs!

The tech Cartel is evil because they steal any technology they desire; they run a prostitution ring and sexually extort young women and interns in Silicon Valley; they are misogynists, ageists and racists as their history of abuses has proven; their Palo Alto Cartel operates AngelGate-type collusion and stock market insider trading schemes that harm independent business and the public; Their Cartel ran the "no poaching" CEO ring which was class-action sued by DOJ and tech workers; 90% of their divorce court files reveal horrific abuses and sex trafficking; They have an army of lobbyists that pay cash, stock market and revolving door bribes to U.S. Senators; They can even evade FBI & SEC investigations; They hire women to act as 'trophy wives' and 'beards'; they have lobbyists rig the U.S. Patent Office in order to block inventor patent rights because they are using stolen technologies; they have been caught on video and recordings beating, kicking and harming women hundreds of times; They have bought up all of the Tier-One tech law firms and order them to never help those who seek equal tech rights; they collude to abuse your privacy and make databases on the public for political control; they have to cheat to compete because they are only good with spread sheets instead of innovation; They run black-lists, character assassination attacks, collusion and other anti-trust violating acts in violation of RICO laws.

When the bad guys, and their lap-dog politicians, attack you because your products are better than theirs they are proving that they are frat boy scumbags, from Stanford and Yale, that operate in a little pack, like dogs! Their Sandhill Road VC operation should be raided by the FBI!

Indeed, the best thing that could come from the COVID pandemic is that they all are forced into bankruptcy!

When your Senator holds stock market shares in companies that exist to profit on the backs of consumers, then it is impossible for that Senator to ever do anything but be corrupt!

The crooks at Google, Facebook, Tesla, LinkedIn, Netflix, etc., broke felony laws and the basic principles of Democracy.

They bribed your Senators, White House Staff, insider agency staff and operated a Silicon Valley Oligarch sociopath political Cartel.

As Mother Jones top editor says: "***In 18 years of living here, I find zero evidence that the "City Family" is benefiting anybody but its members, developers, old-school socialites, and tech billionaires...***"

— Clara Jeffery (@ClaraJeffery) [February 14, 2020](#)

"I can't even with how insular and incestuous and corrupt SF is. Mayor [@londonbreed](#) acknowledges she had relationship with DPW Nuru two decades ago and that they remained close friends <https://t.co/HEhIlulkyj>"

— Clara Jeffery (@ClaraJeffery) [February 14, 2020](#)

Your public officials set-up, operated and maintained an organized crime scheme for personal profit at the expense of every taxpayer. They went after **Five Trillion** treasury dollars of your tax money for their personal interests via rigged stock market scams, rigged government contracts, exclusionary policy manipulations and other schemes that harmed American taxpayers.

YOU OWE IT TO YOURSELF AND THE NATION TO TAKE THEM DOWN!

You can wipe them out, all by yourself, in 100% legal ways.

You can wipe them out even faster with crowd-sourced forensics and anti-corruption ai software! join the rest of the public in an epic anti-corruption effort!

You will learn to write FBI-quality criminal activities reports and file those reports, by certified mail, with every law enforcement and regulatory agency in every country in the world, including the FBI, OSC, GAO, EU, Interpol, FSB, UN, etc. CC the social media sites with your reports.

You will use basic private investigator websites to track and back-ground every person, organization and company involved in the corruption and trace their RICO law violations. You can provide that data to The U.S. Congress and every agency, with a copy to every social media posting.

You will use open-source, free, collaborative NSA-class global databases that can track all of the locations, hookers, fake fronts, family trusts, bank accounts, stock market accounts, bribes and other goodies, of any corrupt public official, in minutes! You get that free anti-corruption software from GitHub, CodePen, Torrents, Onion Project, The Guardian, ICIJ and all over the web.

YOU will run your own private investigator/citizen sleuth crowd-sourced investigations into the following:

- Every stock market account they or their family owns
- Every Uber or Lyft ride they ever took for any meeting or transport of sex workers
- Every flight manifest they appeared on
- Every bank account they have ever held
- Every lawsuit, divorce record and police record they have ever appeared in
- Every trust fund they or their family holds
- Every shell corporation they, or their family holds
- Every person named in the Epstein Pedo book: <https://www.scribd.com/document/416207833/Jeffrey-Epsteins-Little-Black-Book-Redacted> cross referenced across all of the other databases and then supplied to the FBI and Child Protection Agencies
- Every item in the Swiss Leaks that cross connects to their holdings
- Every item in the Panama Papers Leaks that cross connects to their holdings
- Every item in the WikiLeaks that cross connects to their holdings

- Every item in the Snowden Leaks that cross connects to their holdings
- Every sex trafficking incident that connects to each of them alone, and in groups
- Every financial transaction between any of the parties on the master list and the character assassination and hit job firms of: Google, Univision, Gawker Media, Unimoda, Jalopnik, Gizmodo, Black Cube, Fusion GPS, Media Matters, Think Progress, IN-Q-Tel, K2 Intelligence, WikiStrat, Podesta Group, YouTube, Alphabet, David Drummond, Larry Page, Facebook, Correct The Record, Stratfor, ShareBlue, Sid Blumenthal, David Brock, Eric Schmidt, Sunshine Sachs, Covington and Burling, BuzzFeed, Perkins Coie and Wilson Sonsini or their derivatives with common owners.
- Every item in the Quest Leaks that cross connects to their holdings
- Every tactical deployment, by a campaign financier, of the tactics listed in this manual: <https://www.cia.gov/library/readingroom/docs/CIA-RDP89-01258R000100010002-4.pdf>
- Every sex service that their credit card payments every connect too
- Every real estate transaction that any name or company they, or their family, were involved in, tracks to

..... and hundreds of thousands of other information points about them that prove that they benefit from crimes that they engage in for others who engage in crimes using the America public policy system.

It all goes into shared 100% legal public collaborative databases that work like XKEYSCORE, or MS Access, or Oracle Databases.

The proof of collusion, organized criminal actions and raw covert corruption is indisputable. The actors are all the same people. The beneficiaries are all the same people. The communications between the parties all coordinate the same actions.

Demand their arrests, indictments, exposures and bankruptcies in public ads, letters to the editor, blog posts, bumper stickers, lawsuits, flyers, newsletters, email and every other outreach manner.

Say "*Fuck You*" to the Silicon Valley Oligarch 'Illuminati' scumbags and the crooked Senators and Governor's they bribed.

Show these oligarch crooks what billions of taxpaying voters with collaborative FBI-class forensics investigation software can do to their corrupt tech Cartel!

You can show up at the front door of their home, office, hotel room or vacation cabin and **legally arrest** them with a citizen's arrest execution. More on that later.

HOW TO WRITE UP THE DOSSIER ON EACH CROOK

YOU will hunt down each corrupt politician, oligarch and their operatives

First, send them a note, anonymously, to tell them that you, and the rest of the public, are coming for them.

Include a copy of this manual so that they know what is headed their way. Let them know that none of their New Zealand bolt holes, Cayman and Virgin Island hide-aways, private islands or Ukrainian dachas will protect them and that the public is EVERYWHERE that they are.

If they have nothing to hide, as they say, then they should not care. They should only be afraid of the truth if the truth is as disgusting as everyone says. If they are not buying hookers and rent-boys, laundering money, bribing politicians, manipulating elections, supporting sex cults, abusing interns, violating ant-trust laws and doing the other bad things they are charged with, it should not matter to them.

You undertake the investigative tasks using your personal computer and your free time completing tasks like the following:

1. Dig through their trash and buy their trash bags from the garbage man after they pick them up or pay the local homeless guy to do it for you
2. Locate a beneficiary for a probate proceeding with the name of their family on it
3. Research current and / or historical property holdings of every family member of the crooks
4. Identify mortgage information for each family member of the crooks
5. Identify secured lenders each family member of the crook has used
6. Identify related-party property transactions for money laundering
7. Determine current market value of real property that the crook or family members owns
8. Locate bankruptcy filings for any of their family members or companies
9. Retrieve and analyze bankruptcy records for any of their family members or companies
10. Uncover improper relationships with prostitutes, rent boys, sex cults, BDSM groups, One Taste, Nexium, Inner Circle and other sex abuse operations
11. Locate federal civil lawsuits against them on Pacer.gov
12. Locate federal criminal records against them on Pacer.gov and the 120+ private investigator websites
13. Retrieve and analyze federal civil and criminal records on each of their names

14. Retrieve mug shots from arrest records
15. Provide independent analysis from other investigators
16. Locate state and local criminal arrest records
17. Retrieve and analyze review criminal records
18. Acquire pictures of them entering or leaving restaurants, hotels, offices and other locations and identify who they are with
19. Locate home phone numbers
20. Locate cell phone numbers
21. Identify the owner of related home or cell phone numbers
22. Determine owners of corporations they were involved with
23. Retrieve and analyze corporate records
24. Locate current or former executives
25. Interview current or former executives
26. Find and retrieve judgment and lien filings
27. Research familial history
28. Connect the dots via AI software analysis tools
29. Locate witnesses for a civil or criminal lawsuit
30. Interview witnesses for a civil or criminal lawsuit
31. Find all of their assets hidden under family trusts and facade corporations
32. Find current or historical boat registrations
33. Find current or historical aircraft registrations
34. Search for hidden assets
35. Conduct business intelligence
36. Conduct discreet intelligence gathering
37. Determine connections between parties
38. Locate bank account information
39. Locate current or former employees of a company
40. Interview current or former employees of a company
41. Locate significant inheritances
42. Show you routes of all of the tail numbers of their aircraft
43. Identify a will for an estate they or a family member might own

44. Locate probate records
45. Identify foreign assets
46. Locate regulatory records
47. Identify regulatory actions
48. Identify professional licenses
49. Determine prior disciplinary records for professional licenses
50. Analyze state and federal political contributions
51. Analyze state lobbyist records
52. Analyze federal lobbyist records
53. Identify potential whistle-blowers from their ex employees and contractors
54. Vet expert witnesses
55. Interview industry sources
56. Gather competitive intelligence
57. Identify related party business transactions
58. Retrieve and analyze non-profit financial filings
59. Knock on doors for surveys about them
60. Obtain and analyze Department of Labor Form 5500 Filings
61. Submit FOIA / FOIL requests to government agencies
62. Obtain driving record history (in applicable states)
63. Find current vehicle registrations
64. Find historical vehicle registrations
65. They use Google, Facebook and LinkedIn to spy on you. Get the information that Google, Facebook and LinkedIn sells to Axciom, Equifax and hundreds of other spy databases and run searches on THEM!
66. Determine current market value of motor vehicles
67. Assist with jury selection
68. Background checks on prospective jurors
69. Analyze documents for potential fraud
70. Identify Risks
71. Identifying corporate relationships
72. Find all of their ex lovers and aides on LinkedIn
73. Identify Uniform Commercial Code filings

74. Foreign corporation research
75. Help you manage sensitive situations
76. Overseas litigation research
77. Identify stock ownership
78. Find facts
79. Locate online resume
80. Identify online networking profiles
81. Locate historical video or news footage
82. Conduct historical newspaper research
83. Conduct mobile or stationary surveillance
84. Perform clandestine operations
85. Find undisclosed ties
86. Identify and retrieve U.S. Tax Court cases
87. Locate a missing person
88. Identify and confirm education history
89. Identify and confirm previous employment history
90. Scour the Internet
91. Research presence on social networks or message boards
92. We will tell you what those bastards are up to!
93. Send the IRS information about how Google, Netflix, Alphabet are cheating on their taxes and hiding money in Ireland and the Cayman Islands. Get the IRS to sue the oligarchs in tax court.
94. Enhance the publishing of research articles proving that Silicon Valley tech companies destroy the minds of children with tech addiction and brain manipulation and get parents to sue those companies for harming their children
95. Expose every secret cash conduit that the oligarchs use to bribe politicians
96. Demand new laws in Congress to stop politicians from owning any stock because that is the #1 source of bribes
97. Use lip-reading software to see what they are saying or have an actual deaf-person do it
98. Photograph them with any hotties they are seen with and then face-track the hotties to see if they are hookers or ill-repute escorts
99. Use one of the many free on-line news publishing softwares and make a global online newspaper that constantly exposes their crimes

100. Write every federal agency and demand investigation and prosecution of the perps
101. Assemble the massive number of news reports about their sex scandals and distribute those reports as books, articles, documentaries and news aggregations to prove what a bunch of sick perverts these people are
102. Publish the speaker list from Techonomy, Davos, TED, Burning Man, etc. to show that it is always the same little group of arrogant assholes that self-promote their hype at each of these elitist events
103. Leave notices on the windshield of any of their Tesla's reminding them what douche-bags they are
104. Organize petitions and letter-writing campaigns to have the overtly corrupt ones removed from their jobs
105. Go to their share-holder meetings and hand-out flyers about their corruption
106. Hire Charles Spies (<https://www.dickinson-wright.com/our-people/charles-spies?tab=0>) to sue them
107. Hire Harmeet K. Dhillon (<http://www.dhillonlaw.com>) to sue them
108. Hire COA (<http://www.causeofaction.org>) to sue them
109. Hire law firms from China or Russia to sue them for a very low price
110. Hire Steven S. Biss (<http://www.linkedin.com/in/steven-s-biss-6517037>) to sue them
111. Blog about the corruption of the political targets every day with the day's news each day
112. Read their divorce filings in court records and see who else might help expose their corruption
113. Read their locations over the last 12 months - <https://www.protocol.com/government-buying-location-data>
114. Talk to every neighbor that has filed a complaint about them
115. Hire *Pierce Bainbridge Beck Price & Hecht LLP* to sue them, especially tech media companies
116. Re-read all of the latest "How To Be A Private Investigator" books and brochures
117. Ask Paul Kangas in San Francisco how he investigates the corrupt
118. Go back to <http://www.pacer.gov> and read each of the lawsuits against them to get more clues about them
119. Put a card table and a pop-up booth outside their office and hand out flyers about them
120. Publish every stock market share they, and their family, owns
121. Produce a dossier on every corrupt partner of every Silicon Valley VC firm

122. Know that there are over 3000 additional forensic tools you can use to expose them 100% legally...
123. Read The Big Book  <https://www.amazon.com/Big-Book-Revenge-Serious-Getting/dp/0806521414> and many "How To Be A Private Investigator"-type books.

NEW SOFTWARE REVEALED THAT EXPOSES CROOKS IN PUBLIC OFFICE

- New open-source, and free, public software let's any citizen get any corrupt official arrested. Any voter can use the software from the comfort of their living room. The AI replicates itself (Like A benign digital version of Covid) across the entire web.
- You can download a copy of the software or build-your-own version of it from freely available code at Github, CERN and Linux repositories.
- We have consulted to the SEC and the GAO on this technology.
- After suffering millions of dollars of losses from public official's **Insider Trading** schemes, we decided to do something about that!

Illegal and corrupt Congressional insider trading tends to be something we don't hear about until it's hit the big news networks and newspapers as the SEC goes for the throat of the accused. By then, unfortunately, those committing it have made their gains, usually in the multi-millions of dollars, and the damage has been done to the stock, its company, investors and the American Way. Covert stock market trades are now the #1 form of bribes in California and Washinton, DC.

Quite frankly, the jail time assessed doesn't correct the damage done, and the fines rarely aid the investors, or the voters, in getting their money and their democracy back. Many of those hurt are Average Joe's and Jill's who were just trying to save their retirement nest eggs. Shame is the tool that works best on the corrupt!

These crimes involve an **investment banker spouse** and a Senator or other top official, using information, which was not available to the public, buying and selling a company's stock in an underhanded manner. **In many cases bribes have been paid with Google, Tesla or Facebook stock in a covert manner. It is particularly onerous when a Senators buys Tesla, Google, Facebook or Solyndra stock, and makes laws that only benefits Tesla, Solyndra, etc, while sabotaging their competitor constituents.** Because the dealings involved are pretty much done on the sly, it's been difficult, until now, for the governing body of the SEC to prove illegal insider trading, unless one of the cohorts tattles on the others or their actions become glaringly obvious. In some cases, a sharp mind around the action may take notice and become what's called a whistle-blower.

Previously, writes [Andrew Beattie of Investopedia](#): "... insider trading is often difficult for the SEC to spot. Detecting it involves a lot of conjecture and consideration of probabilities." That was the 'old days', though. Today, the new AI software can bust through these scams like a hot knife through butter!

With this new open-source, free, public spy agency-class software, detecting illegal insider trading is actually less complicated than it sounds.

To the eyes of this new super-powerful AI observer server bot and peer-to-peer databases, it is easy work.

You, the citizen, just type the politician or agency employee name into a field and hit the "**analyze**"

button. A few minutes later you receive a multi-page PDF report similar to an FBI report on the target. You can either research the subject in more detail or send copies of the report to the FBI, GAO, OSC, SEC or other enforcement group.

The software is an automated AI temporal matching system which includes 24/7 analysis of all stock trades involving politicians to its information source, politician finances, communications and policy participators. it uses some of the same software code used by the CERN mega-research center in Switzerland.

The screenshot shows a web application titled "CORRUPTOOGLE BRIBES AND INSIDER TRADES SEARCH ENGINE". At the top, there are tabs for "Search Options" and "My Searches", along with buttons for "Search IDs", "clear", "create new", and "browse". Below this is a table with columns: "ID NUMBER", "ID CLASS", "STATUS", and "ID LEX NUMBER". A sidebar on the left lists "ID TYPE" categories: Badge, Birth Certificate, Driver's License (highlighted), Driver's License (Commercial), FBI Number, Government, Green Card, LEADS Number, Learner's Permit, Legacy RMS Number, Military, NCIC, Other, Passport, Passport - Diplomatic, Passport - Domestic, Passport - Foreign, and School. The main area contains fields for "NAME ON ID", "ID ISSUER", "SECURITY ACCESS", "DATE ISSUED FROM", "DATE ISSUED TO", "DATE EXPIRED FROM", and "DATE EXPIRED TO". There is a checkbox for "Search All ID Types" and a large blue "ANALYZE" button at the bottom right.

The technology Core Evaluation Points:

- Analyst estimates - these come from what an analyst estimates that a company's quarterly or annual earnings will be. They are important because they help approximate the fair value of an entity, which basically establishes its price on the stock exchange.
- Share volume - this reflects the quantity of shares that can be traded over a certain period of time. There are buyers and there are sellers, and the transactions that take place between them contribute to total volume.

One Way The AI Detects Congressional Insider Trades

Metricized signs of illegal insider trading occur when trades occur that break out of the historical pattern of share volume traded compared to beneficiary participation's of those connected to company and political entity. Another clue of the illegal insider trading is when a lot of trading goes on right before earnings announcements. That tends to be a sign that someone already knows what the announcement is going to indicate, and it's an obvious violation. One module of the new software hunts these trends around-the-clock in an unmanned manner like a detective who never needs to sleep.

The software red alerts are issued when trades are linked closer to the actual earnings and politicians bills instead of what the predicted earnings were. In a corruption case, it's clear the trades - especially

made by politicians close to the company - stemmed from information that was not readily available to the general public.

In other words, at the time an insider makes a trade, the trade has a stronger relationship to earnings guidance rather than to earnings results achieved.

Part Of The Insider Trading Detection AI Uses 'Dynamic Time Warping (DTW)'

In econometrics, which is a concept frequently used by quantitative analysts to evaluate stock market prices, dynamic time warping (DTW) is an algorithm that can be used for measuring similarity between two data sequences by calculating an optimal match between the two. This sequence "matching" method is often used in time series classification to properly "line things up."

The method, coupled with AI machine learning ensemble methods, can provide a clear path between the trades made by insiders and public data used to make the trades.

This is a product of artificial intelligence that has been expanded by Indexer, Splunk, Palantir and other firms fast becoming experts in products that can be used to advance the art of manipulating political and social trends in business and markets by using social media, financial data and news stories. The new software process has taken that sort of approach to the next level and targeted every member of Congress, their staff, family and friends. The first emphasis is on California and Washington, DC public figures.

In a hypothetical example, a group of executives failed to trade by industry standards by leveraging material non-public information and policy manipulation. Although consensus estimates called for higher commodity prices at the end of 2015, it appears key executives traded for their personal accounts as a result of the forecast provided by a specialist system within the firm that was adept at predicting prices alongside lobbyist manipulations. Flash-boy trading is now dirtier and powered by Google-class server systems.

In the hypothetical scenario the software aggregates executive trades in 2014 and 2015 and finds a strong link between buys and sells of executive stock options, which line up with material non-public estimates of commodity prices that were provided by the specialist system.

For example, in a "Exec Sell and Exec Buys" graph, a green line represents sells, while a black line represents buys. In the corresponding period, one finds a red line represents unrevised prices provided by the specialist system, and green line represents consensus estimates.

During Q1-2014, there was \$28M in purchases of executive stock options, while in Q2-2014, there was \$25M in sales of executive stock options. The specialist system called for Q3-2014 commodity prices to make a precipitous decline going into the end of 2014. Remember, under this scenario, no revisions were made to the specialist systems' price forecast. In this example, executives were afforded a significant advantage using price predictions from the specialist system.

In a final bullet chart, there was a dynamic time warping distance between trades and consensus estimates of 7.23, but this distance is only 2.19 when comparing specialist system estimates and executive trades. Please note, the closer the distance score is to zero, the more similar the trades are to the estimates they are measured against.

We have applied this process to companies well-known for influence buying like, Google, Tesla and Facebook

It's obvious that the tech executives involved did not follow industry standards in their actions and make public the "insider" information they had access to prior to the trades they made. The lobbyists they hired promoted this rigged trend and paid off Senators with perks. These are the kind of violations the SEC and other governing bodies can look to in attempting to protect the trading public and the integrity of financial marketplaces. Artificial intelligence tools are a major factor in assisting the tracking of insider trading.

"Every facet of our everyday lives has been impacted, infiltrated and greatly influenced by artificial intelligence technologies," says Vernon A. McKinley, a multi-jurisdictional attorney, based in Atlanta. "In fact, the U.S. government and its multiple agencies have developed specialized intelligence units to detect, track, analyze and prosecute those unscrupulous individuals seeking to profit from the use of such tools, specifically in the financial industry, and to protect the integrity and strength of the U.S. economy and its investors." Now these tools are being turned against the corrupt!

The public can now detect trading anomalies in financial situations using this artificial intelligence software on their desktop computers. No public official will ever be able to do these kinds of corruptions, again, without getting caught.

This approach has already had an impact on how political insiders trade on Wall Street and in financial markets around the world.

This technology can end this corruption forever!

A module of the software uses data from The Center for Responsive Politics, ICIJ Panama Leaks records, Swiss Leaks records and FEC files to reveal covert routes. Famous politicians own part of Tesla Motors, Facebook, Google, Netflix, YouTube and other companies they helped get government money for. All of their competing constituents have suffered for it or been put out of business by exclusive deals that only Tesla Motors, Facebook, Google, Netflix and YouTube got. That is a crime and charges have been filed with federal law enforcement.

A large volume of forensic research proves that Silicon Valley Cartel tech firms receive benefits from politicians and politicians, at the same time, benefit from these firms.

This evidence on the exchange of benefits between politicians and firms proves an agreement between the politicians and the companies. This agreement, however, cannot be in the form of a written contract as writing direct fee-for-service contracts between a politician and a firm is considered bribery (Krozner and Stratmann 1998; 2000). In addition, either party to this agreement might renege on its promise and the other party cannot resort to the courts.

Procon.org, for example, reports: "Less than two months after ascending to the United States Senate, and before becoming President, one Senator bought more than \$50,000 worth of stock in two speculative companies whose major investors included some of his biggest political donors. One of the companies was a biotech concern that was starting to develop a drug to treat avian flu. In March 2005, two weeks after buying thousands of dollars of its shares, this Senator took the lead in a legislative push for more federal spending to battle the disease. The most recent financial disclosure form this Senator . . . shows that he bought more than \$50,000 in stock in a satellite communications business whose principal backers . . . had raised more than \$150,000 for his political committees." See more examples from the Citizens for Responsibility and Ethics in Washington (CREW) report (2009.)

The literature and eye-witness experience proves that politically-connected Silicon Valley tech firms monthly obtain economic favors, such as securing favorable legislation, special tax exemptions, having

preferential access to finance, receiving government contracts, or help in dealing with regulatory agencies. The evidence proves that Google's support, for example, can help in winning elections. For example, firms can vary the number of people they employ, coordinate the opening and closing of plants, and increase their lending activity in election years in order to help incumbent politicians get re-elected. (See Roberts 1990; Snyder 1990; Langbein and Lotwis 1990; Durden, Shorgen, and Silberman 1991; Stratmann 1991, 1995, and 1998; Fisman 2001; Johnson and Mitton 2003; Ansolabehere, Snyder, and Ueda 2004; Sapienza 2004, Dinç 2005; Khwaja and Mian 2005; Bertrand, Kramarz, Schoar, and Thesmar 2006; Faccio 2006; Faccio, Masulis, and McConnell 2006; Jayachandran 2006; Leuz and Oberholzer-Gee 2006; Claessens, Feijen, Laeven 2008; Desai and Olofsgard 2008; Ramanna 2008; Goldman, Rocholl, and So 2008, 2009; Cole 2009; Cooper, Gulen, and Ovtchinnikov 2009; Correia 2009; Ramanna and Roychowdhury 2010; Benmelech and Moskowitz 2010.)

The software can see that the share ownership of politicians serves as a mechanism to quid-pro-quo their relationships with big tech firms, is as follows: The ownership of politicians plays multiple distinct (but not necessarily independent) roles; one that relies upon the amount of ownership and one that does not. First, as investors in firms, politicians tie their own interests to those of the firm. Thus, harming (benefiting) the firm means harming (benefiting) the politician and vice versa. By owning a firm's stock, politicians commit their personal wealth to the firm and reduce a firm's uncertainty with regard to their actions toward the firm. This will, in turn, enhance the firm's incentive to support the politician-owner during both current and future elections in order to prolong the incumbency period for as long as possible. Firms have their lobbyists push to be able to know the amount of ownership likely to be material to politicians. This knowledge, in turn, enables them to judge whether the politician's interest is aligned with the firm's interest and optimize quid-pro-quo.

The Political Action Committee (PAC) contribution of firms (which is a direct measure of benefits flowing from firms to politicians) is a significant determinant of ownership allocations by members of Congress. The ownership of Congress members in firms that contribute to their election campaigns is roughly 32.8% higher than their ownership in noncontributing firms even after accounting for factors that are associated with both ownership and contribution (such as familiarity, proximity and investor recognition).

The committee assignments of politicians is a proxy for whether their relations with firms are enforced (Kroznor and Stratmann 1998). Silicon Valley tech firms like Facebook, Tesla and Google obtain private benefits out of their mutual relations with politicians. When the strength of the association between ownership and contributions at the firm level increases, the provision of government contracts to those firms increases.

Members of Congress, candidates for federal office, senior congressional staff, nominees for executive branch positions, Cabinet members, the President and Vice President, and Supreme Court justices are required by the Ethics in Government Act of 1978 to file annual reports disclosing their income, assets, liabilities, and other relevant details about their personal finances.

Personal financial disclosure forms are filed annually by May 15 and cover the preceding calendar year. The Center for Responsive Politics (CRP) collected the 2004–2007 reports for Congress members from the Senate Office of Public Records and the Office of the Clerk of the House. The Center then scanned the reports as digital images, classified the politicians' investments into categories including stocks, bonds, and mutual funds, and built a database accessible via a web query.

Using CRP's data, you can use the software to collect the shares in S&P 500 firms held by members of Congress between 2004 and 2007, for example. You can collect the stock ownership data for every firm

that joined the S&P 500 Index any time between January 2004 and April 2009; regardless of when it joined the index, and the software can obtain all the available stock ownership data for that firm between 2004 and 2007. Likewise, if a firm dropped out of the index at any time during 2004–2008, the software, nevertheless, will retain the firm in a sample for the target period. As such, the sample would include stocks in hundreds of unique firms owned by politicians between 2004 and 2007, for example.

Politicians are required to report only those stocks whose value exceeds \$1,000 at the end of the calendar year or that produce more than \$200 in income. They are CURRENTLY not required to report the exact value of the holding, but instead must simply check a box corresponding to the value range into which the asset falls. The CRP then undertakes additional research to determine the exact values of these stocks. When the Center makes these determinations, it reports them instead of the ranges and I use these values in my study. When only the range is available, you should use its midpoint as the holding's value. You would, thus have data on the stock holdings of hundreds politicians for that time period.

Using the software, you can search for all Political Action Committees (PACs) associated with tech firms. It then collects data on each contribution these PACs made to candidates (both the winners and losers) running for the Senate and House elections. Tricky corrupt Silicon Valley firms establish several PACs, each in a different location, and each of these PACs can contribute to the same candidate. In such cases, the software would total, for each candidate, every contribution he or she received from PACs affiliated with the same firm. To parallel the investment data sample period, for example, the software collects every contribution made from the 2003–2004 cycle up to and including the 2007–2008 cycle. Many Silicon Valley tech firms use deeply covert Fusion GPS, Perkins Coie, BlackCube, Psyops-type service to make very hidden additional payola payments to California politicians.

For sources, for example, the software collects government contract data from Eagle Eye Publishers, Inc., one of the leading commercial providers of Federal procurement and grant business intelligence and <http://www.usaspending.org>. Eagle Eye collects its contract data from Federal Procurement Data System–Next Generation (FPDS-NG), the contract data collection and dissemination system administered by the U.S. General Services Administration (GSA). FPDS-NG provides data on procurement contracts awarded by the U.S. Government. When these contracts are awarded to company subsidiaries, Eagle Eye searches for the names of their parent companies and assigns each subsidiary to its appropriate parent. The software collects both the number and aggregate value of government contracts that were awarded to sample firms between 2004 and 2007 in this example time-frame..

The software reveals, for example, that one Representative is a ten-term member of Congress and a senior member of the House Financial Services Committee. They arranged a meeting between the Department of Treasury and One United Bank, a company with close financial ties to themselves, involving both investments and contributions.

“In September 2008, the Representative asked then-Secretary of the Treasury Henry Paulson to hold a meeting for their friends in banks that had suffered from Fannie Mae and Freddie Mac losses.

The Treasury Department complied and held a session with approximately a dozen senior banking regulators, representatives from those banks, and their trade association. Officials of One United Bank have close ties to the Representative and attended the meeting along with the Representative's chief of

staff. Kevin Cohee, chief executive officer of One United, used the meeting as an opportunity to ask for bailout funds.

. . . Former White House officials stated they were surprised when One United Officials asked for bailout funds. . . . In December 2008, the Representative intervened again, asking Treasury to host another meeting to ensure their banks received part of the \$700 billion allocated under the Troubled Asset Relief Program. . . . Within two weeks, on December 19, 2008, One United secured \$12.1million in bailout funds. . . . This was not the first time the Representative used their position to advance the interests of the bank. the Representative's spouse became a shareholder in One United in 2001, when it was known as the Boston Bank of Commerce. In 2002, Boston Bank of Commerce tried to purchase Family Savings, a friend of the Representative in Los Angeles. Instead, Family Savings turned to a bank in Illinois. The Representative tried to block the merger by contacting regulators at the FDIC. The Representative publicly stated they did not want a major bank to acquire a bank that the Representative was friends with.

When the Representative's efforts with the FDIC proved fruitless, the Representative began a public pressure campaign with other community leaders. Ultimately, when Family Savings changed direction and allowed Boston Bank of Commerce to submit a winning bid, the Representative received credit for the merger. The combined banks were renamed One United. . . . In March 2004, the Representative acquired One United stock worth between \$250,001 and \$500,000, and the Representative's spouse purchased two sets of stock, each worth between \$250,001 and \$500,000. In September 2004, the Representative sold their stock in One United and their husband sold a portion of his. That same year, the husband joined the bank's board. . . . One United Chief Executive Kevin Cohee and President Teri Williams Cohee have donated a total of \$8,000 to the Representative's campaign committee. . . . On October 27, 2009, less than two months before One United received a \$12 million bailout, the bank received a cease-and-desist order from the FDIC and bank regulatory officials in Massachusetts for poor lending practices and excessive executive compensation . . . the bank provided excessive perks to its executives, including paying for Mr. Cohee's use of a \$6.4 million mansion . . ." (Ref: CREW report 2009, pp. 123–125)

Thanks to Crony quid-pro-quo revelations by an earlier version of the software, you can also see that Fisker Automotive, Inc.'s \$529 Million U.S. Taxpayer Loan Approval by the Department of Energy was dirty. Fisker Automotive's Chief Operating Officer Bernhard Koehler pleaded with the Department of Energy in a panicked Saturday midnight hour email to receive a \$529 million loan as the company was 2 weeks from Chapter 7 liquidation, that it was laying off most of its employees, that no private sector investors would fund the company without DOE guarantees, and that Fisker was unable to raise any further equity funding from independent private-sector investors given the company's financial condition. These statements were made to a Loan Officer at the DOE . No private sector Loan underwriting (approval) committee would ever grant a low interest loan to a desperate buyer that had just confessed it was in a state of insolvency and was about to layoff most of its staff. Yet within a few weeks the DOE would approve a \$529 Million Credit Facility to Fisker. Despite the DOE Loan Officer official's sworn testimony at April 24th's House Oversight Committee that the DOE used "same private sector underwriting standards when approving Fisker and other approved Taxpayer Funded Loans" - likely perjury based in documents.

In a 'U.S. GOVERNMENT CONFIDENTIAL EMAIL': FISKER AUTOMOTIVE: August 2009: Co-Founder Bernhard Koehler emails U.S. Dept. of Energy Loan Officer in Sat. midnight Panic admitting VC Firms all declined to invest, and company is out of cash. Weeks later the U.S. Department of Energy approves \$529M U.S. Taxpayer Funded Loans to FISKER. NO PRIVATE SECTOR Lender would

every authorize a Loan for even \$5 Million let alone \$529 Million after receiving this email stating private sector investors had examined the company and declined equity investments, that they might loan money as more secure Debt, and the Chief Operating Officer of the company further stating that the borrower is totally insolvent. (Weeks after this email the U.S. Federal Government Dept. of Energy Loan Committee Approves Fisker Automotive as a credit-worthy borrow for \$529 Million in U.S. Taxpayer Funded Loans). Fisker got the cash because President Obama said to "give it to them" in order to please his campaign financiers.

The same thing happened with Tesla Motors. Elon Musk and Tesla Motors were broke when DOE gave them the money.

PrivCo CEO Sam Hamadeh stated in an official statement: *"The documents obtained by PrivCo paint a picture of how an insolvent, unproven automaker received \$192 million in taxpayer funding. The Department of Energy made a loan that no rational lender would have made. This loan was the equivalent of staying execution on a company that was terminally ill to begin with."* Tesla and Fisker could not have been taxpayer funded unless bribes and criminal quid-pro-quo was underway by President Obama and the U.S. Senator insider traders.

Since its ruling in Buckley v. Valeo, the U.S. Supreme Court has expressed concern regarding corruption or the appearance of corruption stemming from political quid pro quo arrangements and the deleterious consequences it may have on citizens' democratic behavior. However, no standard has been set as to what constitutes "the appearance of corruption," as the Court was and continues to be vague in its definition. As a result, campaign finance cases after Buckley have relied on public opinion polls as evidence of perceptions of corruption, and these polls indicate that the public generally perceives high levels of corruption in government. The present study investigates the actual impact that perceptions of corruption have on individuals' levels of political participation. Adapting the standard socioeconomic status model developed most fully by Verba and Nie (1972), an extended beta-binomial regression estimated using maximum likelihood is performed, utilizing unique data from the 2009 University of Texas' Money and Politics survey. The results of this study indicate that individuals who perceive higher levels of quid pro quo corruption participate more in politics, on average, than those who perceive lower levels of corruption.

Quid pro quo is not a difficult concept to understand. Too bad the media doesn't endeavor to investigate and explain it. Your politicians don't work for you, they work for their own insider trading stock market holdings for themselves!

SOURCE CODE RESOURCES FOR YOU TO FORK OR MODIFY AS ANTI-CORRUPTION TOOLS:

-**Spoke**: Spoke is a peer-to-peer texting platform for collaborative investigation with several forks under active development.

-**Pollaris**, **A polling location lookup tool modified to track bad guys**. You can integrate this with your website and other tools. An API is provided.

-**Caucus App**: A way to quickly calculate citizen and pro member evidence sets and report results from each investigator.

-**Switchboard (FE and BE)**: This software takes new potential volunteers, or "hot leads," from your online channels and assigns them to state or section-based based volunteer leads for personal follow up calls offering ways to get involved with the investigations. This is also a great tool for investigation team recruitment.

-**Automated organizing email**: Your teams can work together to scale email outreach to the widest

possible audience and bypass any cover-up.

-**Redhook**: Investigations run on data, and redhook is a tool that makes data happen. As a system, Redhook ingests web hook data and delivers it to Redshift/Civis in near real time.

-**I90**: This tool makes a long file name or hard to remember legal evidence document into a short, easy-to-remember, link.

- opendata.cern.ch: The CERN Database Open Source

- <https://github.com>: One of the collaborative development nets

- <https://citizensleuths.com>: An example of over 1000 public forensic groups working on crowd-sourced crime-fighting

You are building a forensic anti-corruption version of XKEYSCORE and submitting your results reports to law enforcement and news outlets. Simply look in torrents and code databases like GITHUB, and similar sites, for forensic database and mass collaboration code and you will have a working module up in no time at all if you are a Tier 2 coder, or better.

Amateur Web Sleuths are Solving Cold Cases, You can Too! Read How

The Skeleton Crew: How Amateur Sleuths Are Solving America's Coldest Cases, by Deborah Halber, describes how amateur web sleuths are helping with cold cases.

HOW TO USE 'THE STREISAND EFFECT' TO SHUT DOWN BAD GUYS

- How a private-property dispute birthed a web phenomenon.

In 2003, a [picture](#) of Barbra Streisand's beachfront home hit the web as part of a public collection of images displaying coastal erosion. In response, in February 2003, Streisand sued the photographer for \$50 million for invasion of privacy, claiming violation of a state law aimed at the telephoto lenses of paparazzi.

Ironically, the media [attention](#) surrounding the lawsuit made the photo of her house go viral (at least in 2003 terms). In the month before the lawsuit, the picture had been downloaded only six times, including twice by her lawyers—whereas the image was downloaded more than 420,000 times during the month following the lawsuit. This paradoxical result—where an attempt to silence, suppress, or stop something backfires—was dubbed the *Streisand effect*.

Let's take a closer look at the Streisand effect.

Examples of the Streisand Effect

Here are three different times the Streisand effect was apparently reified by real-world examples.

In 2012, a Scottish schoolgirl named Martha Payne started blogging about her school lunches and included pictures of the meals, which, as could be expected by anyone who has ever been to school, were unappetizing.

Soon, celebrity chef and food activist Jamie Oliver tweeted out his support, and the blog garnered three million hits in two months. Consequently, local government authorities banned Payne from taking photos of the lunches because (they claimed) cafeteria workers were worried about getting fired. Even though the authorities quickly reversed this decision, for them it was too late, and the British national media and the Internet ran with the story.

In 2013, BuzzFeed ran a [list](#) titled “The 33 Fiercest Moments From Beyoncé’s Halftime Show.” Although the intention of the list was likely laudatory, some of the still photos were considered “unflattering.”

Consequently, Queen Bey’s publicist contacted BuzzFeed to request that the unflattering photos, which were cited, be switched out. BuzzFeed responded with a follow-up [piece](#) titled “The ‘Unflattering’ Photos Beyoncé’s Publicist Doesn’t Want You To See,” which included an email from the publicist and the cited shots.

Subsequently, the Internet did its thing, and a meme was born. Countless “unflattering” shots of Beyoncé as a zombie, powerlifter, anime cartoon, and so forth popped up.

In 2014, cab drivers from across Europe went on strike to decry the lack of regulation of the ride-hailing app Uber. Without cabbies on the roads, riders turned to Uber, with downloads of the app increasing more than eight times in London alone.

Deconstructing the Streisand effect

In an [article](#) published in the *International Journal of Education*, Sue Curry Jansen and Brian Martin explained how the Streisand effect is a consequence of failed censorship attempts. These outrage-[management](#) processes include cover-up, defamation of the target, reframing events, false justice, and intimidation or rewards.

The authors also argued that censorship is a process that requires active maintenance to conceal the actions of powerful people. Furthermore, they wrote that a clearer understanding of outrage-management processes “stimulates awareness of tactics for challenging censorship by exposing its existence, validating the censored information, explaining the importance of free expression, not relying on official channels for solutions but instead mobilizing wider awareness and support, and resisting intimidation and rewards.”

By the way, you may be wondering how Babs's court case turned out. The chanteuse not only brought viral attention to her bluff-top estate by bringing the suit in the first place but the suit was dismissed in December 2003.

Google, YouTube and Facebook have commercialized "The Streisand Effect" by deploying computerized processes to steer the public towards, or away from, one product, candidate or point-of-view using manually programmed directions.

Former motor racing boss Max Mosley is suing Google for continuing to display photographs he says breach his privacy. But does pressing for information to be kept private, or suppressed, often have the opposite effect?

At first sight not much unites Beyonce and Max Mosley. But they, and several other celebrities and organisations, have become victims of the "Streisand effect".

In 2005, Mike Masnick, founder of the Techdirt website, [coined the term](#). Two years earlier singer Barbra Streisand unsuccessfully sued photographer Kenneth Adelman, who was documenting the coastline of California, for including her cliff-top home in Malibu. The resulting publicity helped drive 420,000 visits in a month to the site where the photo was published. According to documents filed in court, images of Streisand's house had been downloaded only six times before the legal action.

It's not always a fight over privacy. In February last year the BuzzFeed website published a [selection of singer Beyonce's "fiercest moments"](#) - mocking her facial expressions while performing at the

Superbowl. Her publicist reportedly contacted it to ask that seven of the most "unflattering" photos be removed. BuzzFeed refused and republished exactly this selection with the headline: "[The 'Unflattering' Photos Beyonce's Publicist Doesn't Want You To See](#)". The exposure of the unflattering photos was magnified.

A few months later it was reported that lawyers for Pippa Middleton, sister of the Duchess of Cambridge, [had asked for the removal of a parody Twitter feed](#), which offered ridiculously obvious lifestyle advice in her name, such as "Avoid getting lost by consulting with a map" and "A party isn't much fun without people attending". Its following increased.

In 2008 the Church of Scientology reportedly tried to get a [video featuring film star Tom Cruise talking about his faith](#), designed for viewing by its followers only, removed from websites after it was leaked. The publicity meant it became shared more widely.

In 2012, Argyll and Bute Council banned nine-year-old Martha Payne from taking pictures of her school meals and posting them, along with dismissive ratings out of 10, on a blog. Her family complained and this was overturned, amid much publicity. To date the blog has had [more than 10 million hits](#) and Martha has raised more than £130,000 for charity.

You don't need to be famous to suffer from the Streisand effect. Spaniard Mario Costeja Gonzalez fought a long legal battle for the right to be forgotten. He complained that a search of his name in Google brought up newspaper articles from 16 years ago about a sale of property to recover money he owed. He enjoyed a [landmark victory](#) to establish the right to be forgotten. But it is unlikely he will ever be forgotten. As of this moment, his name conjures up hundreds of thousands of Google search results.

The Streisand effect history

- Term first used in 2005 by Mike Masnick, founder of the website Techdirt
- Denotes increased publicity as a result of attempts to remove embarrassing online content
- Followed a failed attempt in 2003 by singer Barbra Streisand to sue a photographer who posted a picture of her seaside home on a website

But Max Mosley is arguably the greatest example. He is suing Google for continuing to display in search results images of him with prostitutes at a sex party, citing alleged breaches of the Data Protection Act and misuse of private information. Every time he makes a legal move in his crusade over privacy, there's a danger it becomes more likely people will seek out the very images he is complaining about.

The 74-year-old former president of Formula One's governing body FIA wants Google to block pictures first published in the now-defunct tabloid News of the World, which he successfully sued in 2008. "As the gateway to the internet Google makes enormous profits and has great influence, so I have not taken this action lightly," he has said in a statement. His lawyers add that the company should not be allowed "to act as an arbiter of what is lawful and what is not". Google says it has been working with Mosley "to address his concerns".

But is there a risk that Mosley will cause himself more embarrassment by bringing a fairly old, and perhaps half-forgotten, news story back to people's attention? A survey of Twitter shows some users are posting the pictures that he is keen to remove.

"Anyone trying to get something banned is always going to be of more interest than something that people don't seem bothered by," says Jenny Afia, head of talent at the law firm Schillings. "It's a spark for curiosity."

In previous generations there's no doubt it was more straightforward to attempt to suppress information or images. The ease of sharing now almost means that nothing can really be suppressed.

You could argue that the internet makes attempts to guard your privacy risky on a scale proportional to the likelihood of your privacy being meaningfully breached in the first place. If there was a danger that lots of people would circulate a private photo of you doing something embarrassing, it's very likely that trying to suppress it will have the opposite effect. If there was little danger that the photo would have been circulated, an attempt at suppression might not trigger the Streisand effect.

There are endless mischief-makers who would dedicate themselves to propagating information that someone wanted hidden, just for the very fact of the attempt to hide it.

Mosley is a wealthy man used to publicity. Yet suing could mean a stressful, drawn-out court case, covered in detail by the media.

"It's a horrible dilemma for people who are faced with horrible or untrue stories," says Afia. "That's where Max Mosley is very brave to keep fighting. Many people decide to let it go."

For the likes of Mosley and Costeja Gonzalez, the principle surely supersedes the actual effect of legal action. They effectively end up fighting for the right of others to more easily safeguard their privacy. Even at the de facto cost of their own.

And there's a clear difference between those fighting for a right to privacy and those, like Beyonce's representatives, who are merely trying to manage a reputation or public image. There the Streisand effect is potent. If your reaction to mockery is to try and squash it, there will be lots more mockery.

Google's and Facebook's servers are built and programmed to manipulate the The Streisand Effect for commercial goals. Should Congress allow that?

WHEN THE SILICON VALLEY FRAT CARTEL TRIED TO BURY OUTSIDERS, THEY DISCOVERED THAT THEY WERE SEEDS

By Andrew Cosgrove

When you bury a seed, it blooms, and blooms and blooms and millions like it fill the fields...

As American streets are flooded with protests so large that they have changed the course of history, eyes are now turned towards the exclusionary, misogynist, money-laundering, bribery-based, hooker-trafficking frat boys that run Silicon Valley.

In the latter half of the 19th century, before the advent of income tax, there existed a class of millionaires in this country who used many unscrupulous means to gain immense wealth, separating themselves from the working class of the country by previously unheard-of multiples.

The Vanderbilts, the Astors, the Carnegies, the Mellons, the Rockefellers and numerous other “industrialists” (today, we would call them globalists) were able to amass great fortunes and live like royalty, with much of their power enabled through the workings of the politicians they influenced via graft.

In their day and age, they were known as “robber barons,” after the wealthy lords of aristocratic Germany, where landowners charged commoners an illegal tax for passing over their land.

Historian Hal Bridges wrote that the robber barons were “business leaders in the United States from about 1865 to 1900... a set of avaricious rascals who habitually cheated and robbed investors and consumers, corrupted government, fought ruthlessly among themselves, and in general carried on predatory activities comparable to those of the robber barons of medieval Europe.”

Many students of history argue that America’s robber barons were only tamed by the introduction of antitrust laws such as the Sherman Act and the Clayton Act of 1890 and 1914, respectively, as well as the introduction of income tax in 1913 and the stock market crash of 1929. Until that time, the power of these business titans was left mostly unchecked.

Many politicians — especially in large cities like New York — were bought off by their riches and voted for (or even created) laws that would favor and broaden these men’s empires. Regulations, agreements, waivers and amendments were passed that allowed many of these wealth-hoarders to assemble legal monopolies that would almost certainly be outlawed today.

In fact, if one took the wealth of some of these men (like the Rockefellers) and adjusted it for inflation into today's dollars, their riches would surpass those of even Bill Gates or Jeff Bezos.

But it's these latter figures who now belong to today's equivalent class of men that can be considered the "robber barons" of our own era — the billionaires of high-tech Silicon Valley.

When the Internet boom first occurred in the 1990s, Silicon Valley was quick to tell Congress that Internet sales should not be subject to taxes and that the Internet should not be regulated, lest this burgeoning marketplace be trampled to death before it could fully blossom.

But that was then. In the interim, fortunes have been made, and a very small number of players (Amazon, Google, eBay, Facebook, Craigslist, Netflix, Airbnb, Uber) have dominated specific product niches and made certain savvy players such as the aforementioned Bezos and Gates — along with Mark Zuckerberg, Eduardo Saverin, Larry Page, Sergey Brin, Eric Schmidt, Pierre Omidyar, Craig Newmark, Brian Chesky, Steve Ballmer and Larry Ellison, among others — insanely rich.

In fact, these people's extreme wealth, along with the relatively unregulated and untaxed industry that gave them that wealth, has convinced many of them that they have the innate right to tinker with markets and monopolies without undue fear of being legislated against or taxed as other industry leaders have been.

In many cases — Bezos, Zuckerberg and Gates being some of the most notorious examples — they've been falling all over themselves to enter still further niches — automated cars, robotics and drones, for example — in order to dominate those markets also by using their tremendous fortunes to either acquire the leading players in these industries or to drive them out of business through ruthless competition.

Along the way, the enormous power their market monopolies have given them in terms of the data they've been able to compile and the information they've been able to acquire on ordinary American citizens has enriched them even further — some would say dangerously so.

In many ways, these men (there are virtually zero women among their number) are the proper inheritors of the "robber baron" title today; they've become so wealthy, most often through unique,

once-in-a-lifetime opportunities of timing and markets, that the rest of us can't ever hope to come anywhere near their gargantuan fortunes.

Their companies have a permanent presence in Washington, D.C. and rank among the very top retainers of lobbying firms. Left unencumbered, these "masters of the universe" could have a very real potential of ruling over the lives of nearly everyone on the planet in some way for the rest of our lifetimes.

Even now, rumors have been floated that tech billionaires Mark Zuckerberg and Mark Cuban might want to run for president in 2020 or 2024. Nearly all of these men are large contributors to the Democratic Party and have met with Democratic politicians, including Barack Obama, Hillary Clinton, Bill Clinton, Nancy Pelosi and Kamala Harris both one-on-one and in groups.

High among their concerns are that immigrants keep flowing across the country's borders in order to keep their biggest costs — intelligent labor — low. Quick to outsource to foreign countries and even quicker to leave profits offshore to evade taxes, these billionaires are extremely adept at using the law and corrupt politicians to their advantage.

For most of them, the concerns of the common man (the users of their properties) rank far beneath whatever it is that will further expand and perpetuate their empires. The gap between their ilk and that of the working class has multiplied in the last two decades, at the expense of America's middle class.

Like the robber barons of old, these men are addicted to money, and they can never have enough of it to satisfy their own egos. To them, the laws of the United States are just a tool to access more wealth, and whatever political levers and switches they need to throw in order to get their way are simply a means toward an ultimate end.

After more than 20 years in many cases, it's now long past time to put the regulatory brakes on these people's ventures and business power grabs before we turn into a society ruled by technology and a few men behind thin, oversized flat-panel displays. Companies that have too much power and too much wealth concentrated in too few hands may need to be broken up just as the railroad concerns, oil cartels and steel companies of the original robber baron days were by Washington. [Trent Lapinski says:](#) *"Silicon Valley is run like a cartel, and they are essentially modern day robber barons...."*

"...I've actually been working on a similar article myself called "Is Silicon Valley A Cartel?" but I haven't had a chance to finish writing it yet. Perhaps I need to revisit it and publish.

Most of the major tech companies are now using technology to segregate the masses, and social engineer the entire planet much like Hitler and the Nazis attempted previous to WW2, except now the technology exists to do this on a massive scale.

To understand Silicon Valley today, you have to look back to the past and understand how we got here. When Silicon Valley was first founded as a tech hub in the late 1940-50's it was under the intention of developing computer technology for military industrial purposes. The intention was always to further America's technological superiority over the rest of the world.

Many people do not realize that Google and Facebook were both initially funded with both VC and defense contractor money, and many of the tech companies like Amazon have contracts with the CIA and Deep State. Modern day Silicon Valley is the surveillance arm of the Deep State, and has always been an arm of the military industrial complex.

Meanwhile, social media has purposely been engineered to put people in echo chambers, and control the masses. Even Medium is guilty of this, I have nearly 13k followers, yet every time I publish I barely reach 10% of my following. Twitter and Facebook are even worse.

To make matters worse, it gets even more complicated politically. What a lot of people do not know or realize is that after the 2008 market crash Obama was financed by Silicon Valley to get him into office. Once he was in office he struck a deal with the Federal Reserve to bail the economy out and printed a bunch of money which was handed to the Silicon Valley VC firms and tech companies to rebuild the economy.

What those VC firms did with the money was inflate the current tech bubble with printed money by driving up housing costs, pricing out locals and Millennial's outside the tech industry, and pretty much destroying the local economy in the Bay Area. While the Bay Area was arguably screwed anyway with the market crash, and the tech industry does provide many jobs, they ultimately didn't give those jobs to the locals and brought in indoctrinated college grads to displace much of the local population and pay them just enough to survive but not enough to buy property.

They then invested in companies that either launder money to increase their power, collect everyone's data, spy on their users, or distract and divide them with propaganda. They also invested heavily in machine learning and A.I. so that they can automate most jobs in the future, and we are now at a point where A.I. is advanced enough to censor the Internet (which Google/YouTube, and Facebook are already doing). This is enabling these companies to become complete and total monopolies, and push political ideologies on the masses with no basis in logic, reason, or reality.

Meanwhile, the billionaires, investors, and CEOs of these companies are so far disconnected from the struggles of every day Americans they actually believe what they're doing is for the greater benefit of humanity. Many of them fancy themselves as superior to the rest of the country, and world, and all their political nonsense is mostly hypocritical virtue signaling rooted in identity politics. The very same identity politics the Nazis used so successfully to divide and conquer the masses during WW2 but with a hypocritical modern day left leaning political spin.

With all that said, what Silicon Valley billionaires are doing is wrong, and hypocritical. However, please don't blame the people, even the tech bros, because even they're all just brainwashed and trying to survive just like everyone else and most don't even realize they're slaves to a system that does not have their long-term interests in mind.

Source: Born and raised in the Bay Area..."

[Bill Snyder](#) of globally published InfoWorld Magazine says: " Silicon Valley: Land of the 21st-century robber barons... **Apple, Amazon.com, eBay, Facebook, Google, and the other technorati believe someone else should pay taxes, hire Americans, or support the society they sell to.** When it comes to paying taxes, Apple doesn't "think different." Like every other global corporation, it does its best to pay as little as is legally permissible. The difference, though, is that Apple does it better than most and tries to convince the people who are stuck with the bills that this is a perfectly normal state of affairs.

In just three years, Apple's tax avoidance ("evasion" is such a tacky word) efforts shifted at least \$74 billion from the reach of the Internal Revenue Service, according to an [explosive report by a Senate subcommittee](#).

I'm no Apple hater; it makes great products I'm happy to use, and it employs tens of thousands of people directly and in its supply chain. But the more I think about its role in public life, the angrier I get. Apple, in its own way, is un-American. Sadly, it has plenty of company in Silicon Valley.

The new aristocracy lives in Silicon Valley, says Snyder. The princelings of technocracy aren't bad people, but their wealth insulates them from the shared experiences that create community. They are a class apart -- maybe even a nation apart. They're the 21st-century successors to the rail and banking tycoons that ruled in the late 19th and early 20th century: the robber barons.

Consider this anecdote told by George Packer in his thoughtful piece in [the May 27 issue of the New Yorker](#): When state budget cuts threatened the quality of their local school, parents in Woodside, Calif. -- one of the wealthiest enclaves in Silicon Valley -- stepped up their fund-raising efforts. The Woodside School Foundation now brings in about \$2 million a year for a school with fewer than 500 children. In a fund-raising auction, one parent bid \$20,000 for a tour of the Japanese gardens of Oracle CEO Larry Ellison, while others paid twice that much for seats at a Mad Men Supper Club dinner for 16 guests.

I'm sure that many of those people would be appalled and upset by the terrible conditions of the underfunded schools in nearby East Palo Alto, and they might even make donations to help out. But I doubt many of them connect the very obvious dots: When big companies and wealthy individuals fail to pay taxes, legally or not, the community suffers.

What makes this so galling in my mind is the hypocritical and egotistical belief in Silicon Valley itself that it is the most enlightened patch of real estate on the planet.

Silicon Valley won't pay fair share, then decries poor public results. As [Alec MacGillis of the New Republic points out](#), it's a bit rich for Apple to argue -- as Steve Jobs did for years, and Tim Cook does now -- that the company needs more visas and green cards for foreign engineers because there aren't enough qualified Americans to fill tech jobs ([patently false](#), by the way), while Apple does its damndest to keep its contribution toward federal education aid as paltry as possible.

Comments Packer:

This is an example so blatant I couldn't have dreamt it up, of the self-deception that exists alongside the hard work, idealism, and engineering brilliance of Silicon Valley. It's the kind of blind spot to which young, self-confident, super-successful industries are especially prone.

One of the subsidiaries set up by Apple in Ireland has paid no corporate income tax to any nation for the past five years, although it reported \$30 billion in net income from 2009 to 2012. Another subsidiary has paid a tax rate to Ireland of 0.1 percent or less in 2009, 2010, and 2011, far below the normal Irish corporate income tax rate of 12 percent, according to the Senate subcommittee's report.

Valley of the dolts

Silicon Valley's power brokers want you to think they're different. But they're just average robber barons.

[Emmett Rensin](#) In February 2012, after Facebook announced what was in time to become the largest IPO in the history of internet firms, *The Economist* put a parody of Mark Zuckerberg's profile page on its cover. Next to an insipid, beaming profile picture of the young CEO, there was a status update: "VENI VIDI VICI!!! Am I richer than Bill yet? lol." They were not the first magazine to draw the comparison. In October 2010, *Vanity Fair* beat them to it, declaring Zuckerberg the No. 1 most influential person in the United States and calling him "our new Caesar."

Zuckerberg, of course, had not conquered Gaul. He had not scattered the German armies nor subjugated Britain, nor crossed the Rubicon and become first consul. He had not visited death and terror upon a continent, nor brought an end to an old republic, setting off a chain of intrigues that would birth the mightiest empire in the history of the world. No. Mark Zuckerberg had made a shit ton of money.

By April of this year, Facebook stock was worth more than \$116 a share, up from its initial offering of \$38. The social network had made its early investors even richer than they had ever anticipated. That same month, *The Economist* put Zuckerberg on its cover for the second time but now without detectable irony. His face appeared on a marble statue of Augustus, seated in cape and laurel crown beside a tiny globe. "IMPERIAL AMBITIONS" roared the headline. Mark's outstretched arm gave the imperial thumbs-up. He liked it.

The press enjoys excitedly praising tech titans by comparing them to fantastical and mythical figures. Zuckerberg is Caesar. Elon Musk, [a wizard](#). Peter Thiel, who believes that he lives in the moral universe of Lord of the Rings, is [a vampire](#). I do not know if these men believe that they have the supernatural powers the media claims. Maybe they do. I do know that they do not mind the perception, or at least have done nothing to combat it, even among those critics who believe that they're cartoon villains.

The press enjoys excitedly praising tech titans by comparing them to fantastical and mythical figures.

This might not be so bad if the phenomenon were limited to daft profiles by fawning magazine writers. But this Hegelian fan fiction is nowhere more potent than from the mouths of the Disruptors themselves. Mark Zuckerberg [speaks](#) in the voice of God. Shane Smith, by his own account, is the [Stalin](#) of *Vice*. Silicon Valley investor Carl Icahn was called "[evil Captain Kirk](#)" by fellow billionaire Marc Andreessen, before he was himself dubbed [Dr. Evil](#) by Rod Dreher, who has evidently not absorbed a cultural reference since 1999. When Elon Musk worries that Larry Page is hurtling toward AI without a sufficient appreciation of the risks, he calls it "[summoning the demon](#)." Seamless CEO Jonathan Zabusky, a typical case, says his food delivery application for depressed millennials is "disrupting the paradigm" by showing people that "the era of the paper menu" is over. AirBnB's mission statement laments "the mechanization and Industrial Revolution of the last century," which "displaced" "feelings of trust and belonging"; their mission is to turn the world back into the "village" of simpler eras by encouraging longstanding residents of gentrifying areas to [rent out](#) their homes to monied travelers. Some firms are more modest: HubSpot, a marketing and sales platform, is merely on a mission to make the whole world "more inbound," which is to say, more reliant on their blogging tips for small businesses.

Even President Obama speaks of Silicon Valley as if it were an industry for madcap geniuses alone, a land of such earth-changing potential that it's somewhere he [might find himself](#) once he's left the Oval Office. When he chides citizens of the Valley, he chides them like a Dr. Frankenstein warning his monster about hubris: "Sometime we get, I think, in the scientific community, the tech community, the entrepreneurial community, the sense that we just have to blow up the system or create this parallel society," he [told](#) the Frontiers Conference last October. The president believes that sense is wrong, of course, but where did he get the idea that tech CEOs were capable of these feats in the first place?

Let us state the obvious: None of these men are Roman Emperors, and they haven't got the wherewithal to "blow up" anything but a stock market bubble. They are not Lex Luthors or Gandalfs or Stalins. Their products do not bring about revolutions. They are simply robber barons, JP Morgans and Andrew Mellons in mediocre T-shirts. I have no doubt that many are preternaturally intelligent, hardworking people, and it is a shame that they have dedicated these talents to the mundane accumulation of capital. But there is nothing remarkable about these men. The Pirates of Silicon Valley do not have imperial ambitions. They have financial ones.

The vast majority of Silicon Valley startups, the sort that project lofty missions and managed improbably lucrative IPOs despite never having graced the cover of *The Economist* or the frontal cortex of the president, work precisely like any other kind of mundane sales operation in search of a product: Underpaid cold-callers receive low wages and less job security in exchange for a foosball table and the burden of growing a company as quickly as possible so that it can reach a liquidation event. Owners and investors get rich. Managers stay comfortable. The employees get hosed. None of this is particularly original. At least the real robber barons built the railroads.

Emily Chang, of Bloomberg, points out that sex trafficking and black-lists run Silicon Valley.

Like all slim ranks of oligarchy, the Silicon Valley billionaires hate and fear nothing more than ordinary people. This manifests itself in mundane ways, in their open, [cartoonish class spite](#) (why, they ask, must Innovators in San Francisco be burdened by the existence of homeless riff-raff?); it is revealed in their most contemplative moments too. Peter Thiel has said that when the history of the 21st century is written, René Girard will be remembered as one of its greatest intellectuals. Girard is best known for the contention that all human desire is mimetic, that not only aesthetic taste but even hunger and lust are modeled on the desires of others. Perhaps this is why Thiel does not believe that capitalism and democracy [are compatible](#). We know which side he's chosen. So long as he and his fellows can continue to exploit that same mimetic tendency to persuade people that they are superhuman and essential to their flourishing, his side will continue to win.

The sins of the prestige firms are no less mundane. While each at least can claim a real and viable product, their evil is nothing so spectacular as the demonic. As *The New York Times*, *Guardian*, and others have reported, even the well-compensated white-collar workers of companies like [Amazon](#) and Facebook face notoriously brutal labor conditions. For the warehouse workers and contract laborers required to keep those companies running, matters are [even worse](#). "When you're in shipping and they double or triple their workforce over the winter holidays, you're working at times in below zero temps INSIDE the warehouse," one Amazon warehouse worker [wrote](#) to *Gawker*'s Hamilton Nolan in 2013. Efforts to unionize employees have been met with duplicity beyond ordinary managerial resistance. *Quartz* reported in February on sinister attempts to [thwart organization](#) at Uber. Not content to resist their own employees' efforts to unionize, Uber has also worked to undermine other labor guilds, including [illegal operations](#) in cities that have led to the destruction of local taxi businesses.

Like all slim ranks of oligarchy, the Silicon Valley billionaires hate and fear nothing more than ordinary people.

AirBnb, despite its Keatsian mission, has mainly succeeded in [ravaging the housing market](#) for low-income families. Seamless hasn't disrupted the "paper menu world" half so much as it has [disrupted tipping standards](#) and wage prospects for its delivery workers.

The racist hiring practices of Silicon Valley prestige firms are an open secret, with only [5 percent](#) of technical roles held by black or Latino workers. ("We are not where we want to be," their diversity reports intone with all the sincerity of a Soviet bureaucrat adjusting potato projections down again). Their collusion with federal spy agencies, assisting in surveillance efforts and voluntarily turning over FISA-court-approved user data in exchange for cash, was a secret, until [it wasn't](#). Peter Thiel did not use magic to destroy Gawker; [he used money](#).

In 2010, the Department of Justice exposed what it called an ["overarching conspiracy"](#) to suppress wages among companies like Apple, Google, Intel, Adobe, Intuit, eBay, and Pixar. The Silicon Valley supermen were aware as far back as 2005 that what they were doing was illegal. "[Google's Eric] Schmidt instructed his Senior VP for Business Operation Shona Brown to keep the pact secret and only share information 'verbally, since I don't want to create a paper trail over which we can be sued later?'" [reported](#) Mark Ames. "At times," he said of the Disruptor's behavior, "it reads like something lifted straight out of the robber baron era that produced those [anti-trust] laws. Today's inequality crisis is America's worst on record since statistics were first recorded a hundred years ago — the only comparison would be to the era of railroad tycoons in the late 19th century." Although Amazon CEO Jeff Bezos takes only \$81,000 in salary every year — barely more than the average Facebook intern! — he has managed to accrue a net worth in excess of \$65 billion. Perhaps he really is a wizard.

The cultivation of power requires the projection of power in excess of its reality. When Julius Caesar — the real one — made up his mind to annihilate the German tribes who had once again invaded Gaul, he ordered his engineers to build a bridge over the Rhine as wide as a two-lane highway, big enough for 10 soldiers to march across side by side. He wanted the Germani "to experience fear... when they realized that the army of the Roman people was both capable of crossing the Rhine and brave enough to venture it." It worked. When the bridge was finished, the Roman army marched across it as if on parade in the streets of Rome. They went slow with their horns blasting and their flags aloft, led by cavalry draped in ceremonial colors. They found no army on the other side. Terrified of the Roman engineering feat, the Germani had fled in terror, and for 18 days they cowered in the forest while Caesar pillaged every defenseless village he could find. When he was done he marched back to Gaul and ordered the bridge torn down.

If your enemies can convince you that they are an unprecedented species of madman, you will convince yourself that you need unprecedented weapons to fight back or that you may be better off just hiding in the forest. But you are not.

The rigged contracts and wage suppression, the racism and surveillance collusion (soon to be playing [voluntary footsie](#) with Donald Trump's NSA, with [further chicanery](#) to follow), all these sins of Silicon Valley have come about and been overcome before in the short history of American capitalism. They require only the same weapons as before. Organization and agitation. Strikes and labor laws. The ordinary practice of radical politics. Some of these efforts have [begun already](#), with militant organizing and unionization drives beginning to organize Silicon Valley laborers against their exploiters. But these movements require national and popular support, support that cannot begin until the pretense and terror of world-conquering wizards is abandoned and the truth is laid bare: These are only rich assholes, the

same as they ever were. All that superman bullshit is just the cheap propaganda of the powerful, propaganda so thoroughly saturated in the American mind that its own inventors might believe it.

This fall, Silicon Valley Shakespeare (“Innovate • Illuminate • Inspire”) staged *Julius Caesar* for the first time in the company’s 16-year history. The [press release](#) promised that audiences would have a chance to “see this classic political thriller set in a modern world, showing the power and problem of the mob mentality, and how far people will go to rule a nation.”

This summary is instructive. To the entertainers of the Valley, *Julius Caesar* is a play about “mob mentality,” the dangers of unruly herds who upset the proper order of the world. This is an assessment that might surprise anyone who has read Shakespeare’s history and noticed that with the exception of a soothsayer and a single servant, every character in it is an aristocrat. But more than that, it is remarkable because as any high school student can tell you, *Julius Caesar* is not a play about the dangers of the mob; it is a play about the dangers of ambition and power. It is about hubris. You do not see the crowds that Brutus and Antony address because the crowds do not matter. They only exist to cheer the rivals as they sort out the pretense of the coming war. The fault that was not in their stars but in themselves has been corrected. They are underlings no more.

Julius Caesar is about a man believed to be a God, a man who cultivated divinity so well that he believed it himself. It is about a man who believed it until the mid-March afternoon when he discovered to his great surprise that even Caesar can be overthrown with old and ordinary weapons.

Per The United States Congress, The FBI and the FTC: The High-Tech Antitrust Black-Listing Litigation is a [United States Department of Justice](#) (DOJ) [antitrust](#) action and a civil [class action](#) against several [Silicon Valley](#) companies for secret collusion agreements which targeted high-tech employees. This case was one of the most famous federal lawsuits in Silicon Valley. [Scam fronts for Silicon Valley oligarchs are being exposed daily.](#)

The [tech Cartel is evil](#) because: they steal any technology they desire; they run a [prostitution ring](#) and [sexually extort young women and interns](#) in Silicon Valley; they are 'rape culture' [take-what-they-want misogynists](#), ageists and [racists](#) as their history of abuses has proven; their Palo Alto Cartel operates [AngelGate-type](#) collusion and [stock market insider trading schemes that harm independent business and the public](#); their Cartel ran the "no poaching" CEO ring which was class-action sued by DOJ and tech workers; 90% of their divorce court files [reveal horrific abuses](#) and [sex trafficking](#); They have an [army of lobbyists](#) that pay cash, stock market and [revolving door bribes](#) to U.S. Senators; They can even evade FBI & SEC investigations; They hire women to act as '[trophy wives](#)' and '[beards](#)'; they have [lobbyists rig the U.S. Patent Office](#) in order to block inventor patent rights because they are using stolen technologies; they have been caught on video and recordings beating, [kicking and harming women hundreds of times](#); They have bought up all of the Tier-One tech law firms and order them to [black-list](#), and never help, those who seek equal tech rights; they collude to abuse your privacy and make databases on the public for political control; they have to cheat to compete because they are only good with spread sheets instead of innovation; They run black-lists, character assassination attacks, collusion and other anti-trust violating acts in violation of RICO laws.

Silicon Valley has become the largest assemblage of **douche-bags** and **yuppie frat boy criminals** in human history. **Theranos** is not the exception, it is the standard. **Tesla, Google, Theranos, Wework, Facebook** are lies backed by famous political insiders to protect [their insider trading](#) and covered-up by fake news operators. They are also fronts to fund political campaigns via the ill-gotten profits from their endeavors.

When the bad guys, and their lap-dog politicians, attack you because your products are better than theirs they are proving that they are [frat boy scumbags](#), from Stanford and Yale, that operate in a little pack, like dogs! Their Sandhill Road operation should be raided by the FBI! The best thing that could come from the COVID pandemic is that they all are forced into bankruptcy!

When your [Senator holds stock market shares](#) in companies that exist to [profit on the backs of consumers](#), via corruption, then it is impossible for that Senator to ever do anything but be corrupt! We have reported this in writing to winklerm@sec.gov, sanfrancisco@sec.gov and 30+ other federal officers but have yet to see our whistle-blower rewards...or any action! Do you wonder how big politician insider stock trading is? Take a look at how many **TRILLIONS** of dollars pass through the stock markets annually and then look at the reported, **AND UNREPORTED**, securities holdings of famous U.S. Senators and government agency staff. That is what Seth Rich and the people in the "*In Memory Of*" section, below, were disclosing. [These are massive crimes!](#)

The crooks at Google, Facebook, Tesla, LinkedIn, Netflix, etc., broke felony laws and the [basic principles of Democracy](#).

[Google faces \\$5 billion lawsuit in U.S. for tracking 'private' internet use. Google WILL pay for their crimes or be killed off as a business because of their corruption!](#)

They bribed your Senators, White House Staff, insider agency staff and operated a Silicon Valley Oligarch sociopath political Cartel.

What kinds of people were some of these high tech oligarchs? Read their divorce Court Records about their Jeffrey **Epstein**, [NXIVM](#) sex trafficking; Andy Rubin and Goguen [sex slaves](#); tax evasions; money laundering; intern abuses; misogyny; racism; political insider-trading stock market bribes to U.S. Senators; a '[Silicon Valley Tech Mafia](#)' and other horrors.

What would you do if you found out that Eric Schmidt, Larry Page, Elon Musk, Sergey Brin, John Doerr and other dynastic elitist insider Stanford frat boys were running a mob-like Cartel? Over 60,000 engineers in Silicon Valley took the problem to Federal Court!

Ask Christopher Wray, John F. Bennett, Craig D. Fair and the other senior officials at the FBI, DOJ, SEC, FTC and other major federal investigation agencies: ***Organized crime in Silicon Valley is getting a harder look these days!***

The defendants, in the first case, included [Adobe](#), [Apple Inc.](#), [Google](#), [Intel](#), [Intuit](#), [Pixar](#), [Lucasfilm](#) and [eBay](#), all high-technology companies with a principal place of business in the San Francisco–Silicon Valley area of California where they collude together to harm competitors. ***It is a well documented fact that Facebook, Google, Netflix, LinkedIn, etc. use sophisticated psychological testing on each applicant in order to filter out all but the most radical devotees of the founders ideologies. These companies then maintain an echo-chamber resonance, throughout the company, to reinforce their ideological message, much like Scientology does. In these companies one must praise Elon Musk and Mark Zuckerberg and hate those who the founders target. The founders target their competitors, in violation of anti-trust laws.***

The first civil class action was filed by five plaintiffs, *one of whom has died* in a curious incident; it accused the tech companies of collusion between 2005 and 2009. In [Abolish Silicon Valley: How to liberate technology from capitalism](#) we see another of thousands of insiders expose the fact that Silicon Valley is a pile of filth.

Additional cases are planned for filing. Formal complaints have been filed with The SEC, The DOJ, The GAO, The FBI, The FTC and The U.S. Congress. Active investigations into ['Angelgate' and related collusion and anti-trust matters](#) are known to be under-way by federal, news outlet and private investigators as of 2020. U.S. Senators, and other politicians, who covertly own stock in these Silicon Valley companies, have been delaying enforcement against these corrupt companies. Consumer rights groups have pledged to take down each and every politician who owns these corrupt stocks and protects these corrupt companies!

Our alliance of investigators and agency staff have FBI-level investigated: Steven Chu, Larry Page, David Drummond, Lachlan Seward, Andy Rubin, Jeffrey Epstein, Elon Musk, Nicholas Guido Denton, Harvey Weinstein, Eric Schmidt and the rest of the RICO-violating "Club" and had them fired or removed from their positions. They will remain under public surveillance for the rest of their lives and their case files will be added to monthly via submissions to federal agencies and news entities.

What would an insane tech oligarch (Like Schmidt, Musk, Reid, Brin, Westly, Page, Khosla, etc.) do for trillions of dollars of criminal gain?

When you run the following query on the stock market volume for a single day, ie: *"Select sum(Close*volume*0.001), count(*) from myTable where date = '9/27/2017'."*..you get the following result: 7300 stocks were traded, Total Money flow: \$271,072,334,824. This is how much was traded on that day.

The total world derivatives market has been estimated at about \$791 trillion face or nominal value, 11 times the size of the entire world economy.

The World Bank publishes global data on stocks traded by \$ value [here](#). ie:

- 2016 - \$77.5 trillion for the year.

Most exchanges publish this stat. [Here](#) is the data for NASDAQ

- Feb 6, 2018 - \$192 billion for the day.

And the Indian stock market volume data (in Indian Rupees) is [here](#).

- BSE + NSE cash market, Feb 2018 - About Rs 40,000 crore daily. That's about \$6 billion per day.

Average estimates put daily stock movement between 5 to ten trillion dollars per day. You can buy lot's of Weinstein/Epstein-like private islands, private jets, sex parties, U.S. Senators and crony government contracts with that kind of money. Once an oligarch starts buying sex with underage girls, they don't stop. [In fact, there is nothing that a corrupt tech oligarch and their owned Senator won't do to keep their little pig trough filled up.](#)

The average murder/robbery in the United States is undertaken for an average amount under \$100.00

Thus, an Eric Schmidt, Elon Musk, Steve Westly, David Drummond, Vinod Khosla, Reid Hoffman, Steve Jurvetson, Andy Rubin, Larry Page or similar oligarch, who is sociologically addicted to money and power, is [most certainly capable of ordering and operating election manipulations](#), Presidential bribes, murders and engaging in other crimes to protect those greed-based assets. They have the full resources to do so, have federal records proving that they hire lobbyists and operatives who do these things for them and have a documented history of engaging in extremist actions.

ANOTHER REASON TO TAKE DOWN THE OLIGARCHS

The Silicon Valley Cartel Hires Gawker, Gizmodo, Jalopnik, Black Cube, Fusion GPS, etc. to run "hit-jobs" on those who report their crimes!

The Hit Job

How much do you have to pay Google, Alphabet, YouTube and Black Cube to dedicate a portion of their servers to push a character assassination set of links, against a competitor, to all five billion people on Earth with internet access? How much did Obama, Clinton, Bloomberg spend using those exact same systems to attack their political enemies?

We know. We have their financial records, invoices and receipts and so does the FBI and the NSA.

How much do you have to pay to get them to lock those attack links on one of the first 4 lines of EVERY search result, in the same position in the search results, for over a decade (which proves that their search results are not "organic", they are manually manipulated by Google and YouTube)? How much did Obama, Clinton, Bloomberg spend using those exact same systems to attack their political enemies?

We know. We have their financial records, invoices and receipts and so does the FBI and the NSA.

How much does it cost to make a Disney-like animated movie about a whistle-blower? How much does the production and software and person-hour billings cost? How much does it cost to distribute that movie world-wide and lock it in the top line of all search results?

We know. We have their financial records, invoices and receipts and so does the FBI and the NSA.

How much does it cost to hire a warehouse full of Russian, Nigerian and Chinese click-farm operators who use Palantir and Google software to instantly be alerted of any mention of a person's name on the internet and to then go slam that person in the comment sections with endless troll remarks? Elon Musk uses these same people to hype his narcissistic need for attention. Obama, Clinton, Bloomberg and other politicians hire these same people to attack their political adversaries. How much does it cost to have anonymous trolls in foreign countries kill a person's brand globally?

We know. We have their financial records, invoices and receipts and a huge number of lawsuits, court records, federal investigation and investigative journalism reports have exposed those records and details. The FBI, NSA, SEC, FTC and Congressional investigators can also confirm these numbers!

So it turns out that it costs: **\$35,422,152.00 to have a person and their business killed!**

That is how much they spent on their attack on the Plaintiff! The people at the top of the heap who organized the attacks were David Plouffe, Jay Carney, David Axelrod, Denis McDonough, Steve Rattner, Robert Gibbs, Rahm Emanuel and their associates and they did it from **The West Wing and The Oval Office in The White House.**

Many of the political attacks were edited by [Nick Denton](#) and his seedy tabloid empire Gawker/Gizmodo. Investigations have revealed that the White House and California Senators hired IN-Q-Tel; Gawker Media; Jalopnik; Gizmodo Media; K2 Intelligence; WikiStrat; Podesta Group; Fusion GPS; Google; YouTube; Alphabet; Facebook; Twitter; Think Progress; Media Matters); Black Cube; Correct The Record; Orbis Business Intelligence, Undercover Global Ltd; Stratfor; Jigsaw; ShareBlue/Acronym; Cambridge Analytica; Sid Blumenthal; David Brock; Plouffe Consulting; PR Firm Sunshine Sachs; Covington and Burling; BuzzFeed; Perkins Coie; Advance Democracy Inc.; The Democracy Integrity Project; Popily, Inc; Bean, LLC.; Edward Austin; Istok Associates; [Silicon Valley Community Foundation](#); Yonder and Wilson Sonsini to run hit-jobs, character assassinations, dirty tricks and economic reprisal attacks on any applicants who reported the crimes. Each of those companies are now under federal and civil investigation. These companies sell "kill services" that use CIA and KGB-style tactics to harm witnesses and whistle-blowers.

Media Matters for America founder David Brock is a hired media assassin who reaped illegal profits through the transfer of millions from a nonprofit he founded to a for-profit entity under his control, according to an IRS complaint filed by a watchdog group. The [complaint](#) details how Brock's nonprofit group American Bridge Foundation (AB Foundation) transferred \$2.7 million in tax-exempt assets to True Blue Media, a for-profit company owned by Brock that is the parent company of ShareBlue, a for-profit media company now known as [The American Independent](#). The transfers violated IRS rules that prohibit nonprofit organizations from using their tax-exempt resources to pay personal or private expenses of any key figures connected to the nonprofit, the complaint stated. AB Foundation's transfers to True Blue Media were disclosed in the nonprofit's Form 990s filed to the IRS in [2017](#) and [2018](#). *"Brock is a well-known hit man who took money to target our group in reprisal for whistle-blowing...."* Said Team 7 staff.

The money was conduited and assisted for pass-through by political financiers Eric Schmidt, Larry Page, Sergey Brin, Elon Musk, John Doerr, Vinod Khosla, Steve Westly, Steve Spinner and their [Silicon Valley oligarch Cartel](#) black-listing operation.

It was a felony. It violated RICO, Anti-Trust and Constitutional laws.

So they spent over thirty five million dollars attacking the Plaintiff and shutting down a competitor that was targeted to make over six billion dollars in profits. The attackers then made the six billion dollars in profits for themselves, at the expense of the Plaintiff.

So how much do you think they owe the Plaintiff per previous court awards for such crimes against a member of the public?

You can use their EXACT SAME attack methods, that they used on members of the public, AGAINST THEM. If it was illegal for them do to it, they would have been arrested.

Thus, it must be legal for you to do it to them!

FORCING THE MEDIA TO HELP YOU

“Mass Media” is owned and controlled by a handful of men who own and control it exclusively to manipulate public opinion. They do not own all of the print, radio, TV and web media for fun. They own it because their sociopath need for power makes them think they can steer stupid people into adopting their ideology and voting for candidates who have promised them quid pro quo kick-backs and payola. Here are some examples of news that got sneaked through their filter bubbles and exposed part of the Silicon Valley Cartel.

Google, Facebook and news websites hire college kids to run their news efforts. These children are naive, self-centered people who are easily influenced by herd mentality and who only have a portion of their brains developed. They are the reason people under a certain age are not allowed to have sex, drink or drive cars. They should never be allowed near mass communications systems but they work cheap so the media bosses hire them.

We made this news get out by using the tactics in this manual for force action and to punish those who tried to cover this up:

<https://money.cnn.com/2014/08/11/technology/silicon-valley-poaching-case/index.html>

A **lawsuit** by **Silicon Valley** workers claims Steve Jobs was a ringleader in a conspiracy not to poach employees. If **Silicon Valley's** biggest companies want an embarrassing employee **lawsuit** to go ...

The perpetrators operate a **massive and abusive national sex cult**. [The perverts](#) in the SandHill Road Venture Capital offices, located between Highway 280 down to Santa Cruz Avenue on Sand Hill Road in Menlo Park, California, are the main perpetrators of this global cartel. Their executives at Google, Facebook, Netflix, LinkedIn, Twitter, and their related holdings, comprise the rest. The Harvey Weinstein and [Ed Buck](#) sex scandals are well known. These men's [sex cult actions](#) have been widely covered in the news individually in the [Joe Lonsdale rape case](#), [The Kleiner Perkins Ellen Pao sex abuse lawsuit](#), The [Eric Schmidt sex penthouse stories](#), [The Jeffrey Epstein case](#), The [Google Forrest Hayes hooker murder case](#), The [Andy Rubin sex slave case](#), The [Sergy Brin 3-way sex romp scandal](#), The [British Hydrant investigation](#), The [Elon Musk Steve Jurvetson billionaire sex parties scandals](#), The [NXIVM sexual slave cases](#), The [Michael Goguen anal sex slave trial](#), [The Tom Perkins Hooker Parties and thousands of other cases and federal divorce court filings](#). This [group of people](#) have proven themselves, over and over, to be [sociopath control freaks](#) not fit for participation in public commerce, public policy or media control. [The Four Seasons Hotel](#) and [Rosewood Hotels](#) in [Silicon Valley](#) are

estimated to engage in over \$30,000.00 of high-end escort sex trafficking per day, a portion of it managed by [Eastern Bloc Mafia operators](#). At least 10 Ukrainian escorts fly in and out of SFO and SJO airports every week for these Cartel members. Google boss David Drummond engaged in horrible philandering sexual violations of his wife yet Google covers up every story about it on the web. [Google's Eric Schmidt is under massive investigation](#). You hear about the female victims of this sex cult but you rarely hear about the young male victims. One of their vast numbers of prostitutes is quoted as saying that the girls and boys are paid "*not just for sex but for the oligarch's endless need to feel that they can control anyone for any reason...*". Multiple attorney general's controlled by their cartel, ie: [Eric Schneiderman](#) and [Eliot Spitzer](#) , are involved in these sex rings. *These are the main influencers of a national political party and they are all involved in horrific sex perversions and abuses!*

The AngelGate Conspiracy (<https://venturecapitalcorruption.weebly.com/the-angelgate-conspiracy.html>); The Job Collusion Case (https://en.wikipedia.org/wiki/High-Tech_Employee_Antitrust_Litigation) and hundreds of other cases, prove that the perpetrators regularly [meet](#), [conspire](#), [collude](#) and racketeer, in [full view](#) of law enforcement, without ever getting arrested by the FBI because they bribe public officials in order to avoid prosecution.

Public officials and Silicon Valley oligarchs exchanged felony bribes and manipulated government actions in order to benefit themselves and harm us. these are the facts including the lists of bribes, attacks and covert financing routes!

Famous members of congress lie, cheat, steal and manipulate public records in order to protect their trillions of dollars of Google, Facebook, Netflix, Tesla and Amazon insider stock market payola.

Now the public is working together, around the globe, to end this corruption forever by exposing every single one of the corrupt and all of their dirty secrets!

[Department of Energy staff \(ie: Chu\), White House staff \(ie: Emanuel\), CIA staff \(ie: Woolsey\) owned the rare earth \(ie: lithium, indium\) mining scam stock \(ie: Goldman Sachs transfers\) market securities from foreign countries \(ie: Afghanistan, Congo\) which only benefited themselves, Elon Musk and his Silicon Valley cartel.](#)

Demand the immediate divestiture of all stock market holdings of all politicians and their family members because that is how most bribes are now paid! The FBI needs to arrest these goons!

<https://www.justice.gov/opa/pr/justice-department-requires-six-high-tech-companies-stop-entering-anticompetitive-employee>

The complaint arose out of a larger investigation by the Antitrust Division into employment practices by **high tech** firms. The division continues to investigate other similar **no** solicitation agreements.

Adobe Systems Inc. is a Delaware corporation with its principal place of business in San Jose, Calif., and 2009 revenues of nearly \$3 billion.

"No cold call" agreements

Cold calling is one of the main methods used by companies in the high-technology sector to recruit employees with advanced and specialised skills, such as software and hardware engineers, programmers, animators, digital artists, Web developers and other technical professionals.[1] Cold calling involves communicating directly in any manner with another firm's employee who has not otherwise applied for a job opening. Cold calling may be done in person, by phone, letter, or email.[2] According to the legal brief filed by a plaintiff in one of the class-action cases, cold calling is an effective method of recruiting for the high-technology sector because "employees of other [high-technology] companies are often unresponsive to other recruiting strategies... [and] current satisfied employees tend to be more qualified, harder working, and more stable than those who are actively looking for employment." [3]

Amy Lambert, Google's associate general counsel, noted in a blog post shortly after the DOJ's actions, that Google's definition of cold calling does not necessarily eliminate recruiting by letter or email, but only the process of calling on the telephone. By implication, recruiting through LinkedIn incurs recruiting by "InMail" - LinkedIn's own mail contact system: "In order to maintain a good working relationship with these companies, in 2005 we decided not to "cold call" employees at a few of our partner companies. Our policy only impacted cold calling, and we continued to recruit from these companies through LinkedIn, job fairs, employee referrals, or when candidates approached Google directly. In fact, we hired hundreds of employees from the companies involved during this time period."

The challenged "no cold call" agreements are alleged bilateral agreements between high technology companies not to cold call each other's employees. The DOJ alleges that senior executives at each company negotiated to have their employees added to 'no call' lists maintained by human resources personnel or in company hiring manuals. The alleged agreements were not limited by geography, job function, product group, or time period. The alleged bilateral agreements were between: (1) Apple and Google, (2) Apple and Adobe, (3) Apple and Pixar, (4) Google and Intel, (5) Google and Intuit,[4] and (6) Lucasfilm and Pixar.[5]

The civil class action further alleges that agreements also existed to (1) "provide notification when making an offer to another [company]'s employee (without the knowledge or consent of the employee)" and (2) "agreements that, when offering a position to another company's employee, neither company would counteroffer above the initial offer." [3]

Department of Justice antitrust action

The [United States Department of Justice Antitrust Division](#) filed a complaint in the [US District Court for the District of Columbia](#) alleging violations of Section 1 of the [Sherman Act](#). In *US v. Adobe Systems Inc., et al.*, the Department of Justice alleged that Adobe, Apple, Google, Intel, Intuit, and Pixar had violated Section 1 of the Sherman Act by entering into a series of bilateral "No Cold Call" Agreements to prevent the recruitment of their employees (a similar but separate suit was filed against Lucasfilm on December 21, 2010[6]). The DOJ alleged in their Complaint that the companies had

reached "facially anticompetitive" agreements that "eliminated a significant form of competition...to the detriment of the affected employees who were likely deprived of competitively important information and access to better job opportunities." The DOJ also alleged that the agreements "were not ancillary to any legitimate collaboration," "were much broader than reasonably necessary for the formation or implementation of any collaborative effort," and "disrupted the normal price-setting mechanisms that apply in the labor setting."^[4] The same day it filed the suit, the DOJ and the defendants proposed a settlement.^[7]

A final judgment enforcing the settlement was entered by the court on March 17, 2011.^[8] Although the DOJ Complaint only challenged the alleged "no cold call" agreements, in the settlement, the companies agreed to a more broad prohibition against "attempting to enter into, entering into, maintaining or enforcing any agreement with any other person to in any way refrain from, requesting that any person in any way refrain from, or pressuring any person in any way to refrain from soliciting, cold calling, recruiting, or otherwise competing for employees of the other person", for a period of five years; the court can grant an extension.^[8] The settlement agreement does not provide any compensation for company employees affected by the alleged agreements.^[9] Lucasfilm entered into a similar settlement agreement in December 2010.^[5]

Civil class action

In re: High-Tech Employee Antitrust Litigation ([U.S. District Court, Northern District of California](#) 11-cv-2509 ^[10]) is a [class-action](#) lawsuit on behalf of over 64,000 employees of [Adobe](#), [Apple Inc.](#), [Google](#), [Intuit](#), [Pixar](#) and [Lucasfilm](#) (the last two are subsidiaries of [Disney](#)) against their employer alleging that their wages were repressed due to alleged agreements between their employers not to hire employees from their competitors.^{[11][12]} The case was filed on May 4, 2011 by a former software engineer at Lucasfilm and alleges violations of California's antitrust statute, Business and Professions Code sections 16720 et seq. (the "Cartwright Act"); Business and Professions Code section 16600; and California's unfair competition law, Business and Professions Code sections 17200, et seq. Focusing on the network of connections around former Apple CEO [Steve Jobs](#), the Complaint alleges "an interconnected web of express agreements, each with the active involvement and participation of a company under the control of Steve Jobs...and/or a company that shared at least one member of [Apple's](#)

[board of directors](#)." The alleged intent of this conspiracy was "to reduce employee compensation and mobility through eliminating competition for skilled labor."[\[13\]](#)

On October 24, 2013 the [United States District Court for the Northern District of California](#) granted class certification for all employees of Defendant companies from January 1, 2005 through January 1, 2010.[\[9\]](#)

As of October 31, 2013, Intuit, Pixar and Lucasfilm have reached a tentative settlement agreement. Pixar and Lucasfilm agreed to pay \$9 million in damages, and Intuit agreed to pay \$11 million in damages.[\[9\]](#) In May 2014, Judge [Lucy Koh](#) approved the \$20 million settlement between Lucasfilm, Pixar, and Intuit and their employees. Class members in this settlement, which involved fewer than 8% of the 65,000 employees affected, will receive around \$3,840 each.[\[14\]](#)

The trial of the class action for the remaining Defendant companies was scheduled to begin on May 27, 2014. The plaintiffs intended to ask the jury for \$3 billion in compensation, a number which could in turn have tripled to \$9 billion under antitrust law.[\[15\]](#) However, in late April 2014, the four remaining defendants, [Apple Inc](#), [Google](#), [Intel](#) and [Adobe Systems](#), agreed to settle out of court. Any settlement must be approved by Judge [Lucy Koh](#).[\[16\]\[17\]](#)

On May 23, 2014, Apple, Google, Intel, Adobe agreed to settle for \$324.5 million. Lawyers sought 25% in attorneys' fees, plus expenses of as much as \$1.2 million, according to the filing. Additional award payments of \$80,000 would be sought for each named plaintiff who served as a class representative.[\[18\]](#) Payouts will average a few thousand dollars based on the salary of the employee at the time of the complaint.

In June 2014, Judge Lucy Koh expressed concern that the settlement may not be a good one for the plaintiffs. Michael Devine, one of the plaintiffs, said the settlement is unjust. In a letter he wrote to the judge he said the settlement represents only one-tenth of the \$3 billion in compensation the 64,000 workers could have made if the defendants had not colluded.[\[19\]](#)

On August 8, 2014, Judge Koh rejected the settlement as insufficient on the basis of the evidence and exposure. Rejecting a settlement is unusual in such cases. This left the defendants with a choice between raising their settlement offer or facing a trial.[\[20\]](#)

On September 8, 2014, Judge Koh set April 9, 2015 as the actual trial date for the remaining defendants, with a pre-trial conference scheduled for December 19, 2014. Also, as of early September 2014, the defendants had re-entered mediation to determine whether a new settlement could be reached.[\[21\]](#)

A final approval hearing was held on July 9, 2015.[\[22\]](#) On Wednesday September 2, 2015, Judge Lucy H. Koh signed an order granting Motion for Final Approval of Class Action Settlement. The settlement website stated that Adobe, Apple, Google, and Intel has reached a settlement of \$415 million and other companies settled for \$20 million.

According to the settlement website, Gilardi & Co., LLC distributed the settlement to class members the week of December 21, 2015.

The Tectopus: How Silicon Valley's most celebrated CEOs conspired to drive down 100,000 tech engineers' wages

[By Mark Ames](#)

In early 2005, as demand for Silicon Valley engineers began [booming](#), Apple's Steve Jobs sealed a secret and illegal pact with Google's Eric Schmidt to artificially push their workers wages lower by agreeing not to recruit each other's employees, sharing wage scale information, and punishing violators. On February 27, 2005, Bill Campbell, a member of Apple's board of directors and [senior advisor](#) to Google, emailed Jobs to confirm that Eric Schmidt "got directly involved and firmly stopped all efforts to recruit anyone from Apple."

Later that year, Schmidt instructed his Sr VP for Business Operation Shona Brown to keep the pact a secret and only share information "verbally, since I don't want to create a paper trail over which we can be sued later?"

These secret conversations and agreements between some of the biggest names in Silicon Valley were first exposed in a Department of Justice antitrust [investigation](#) launched by the Obama Administration in 2010. That DOJ suit became the basis of a [class action lawsuit](#) filed on behalf of over 100,000 tech employees whose wages were artificially lowered — an [estimated \\$9 billion](#) effectively stolen by the high-flying companies from their workers to pad company earnings — in the second half of the 2000s. Last week, the 9th Circuit Court of Appeals denied attempts by Apple, Google, Intel, and Adobe to have the lawsuit tossed, and gave final approval for the class action suit to go forward. A jury trial date has been set for May 27 in San Jose, before US District Court judge Lucy Koh, who presided over the Samsung-Apple patent suit.

In a related but separate investigation and ongoing suit, eBay and its former CEO Meg Whitman, now CEO of HP, are being sued by both the [federal government](#) and the [state of California](#) for arranging a similar, secret wage-theft agreement with Intuit (and possibly Google as well) during the same period.

The secret wage-theft agreements between Apple, Google, Intel, Adobe, Intuit, and Pixar (now owned by Disney) are described in court papers obtained by PandoDaily as "an overarching conspiracy" in violation of the Sherman Antitrust Act and the Clayton Antitrust Act, and at times it reads like something lifted straight out of the robber baron era that produced those laws. Today's inequality crisis is America's [worst on record](#) since statistics were first recorded a hundred years ago — the only comparison would be to the era of the railroad tycoons in the late 19th century.

Shortly after sealing the pact with Google, Jobs strong-armed Adobe into joining after he complained to CEO Bruce Chizen that Adobe was recruiting Apple's employees. Chizen sheepishly responded that he thought only a small class of employees were off-limits:

I thought we agreed not to recruit any senior level employees.... I would propose we keep it that way. Open to discuss. It would be good to agree.

Jobs responded by threatening war:

OK, I'll tell our recruiters they are free to approach any Adobe employee who is not a Sr. Director or VP. Am I understanding your position correctly?

Adobe's Chizen immediately backed down:

I'd rather agree NOT to actively solicit any employee from either company.....If you are in agreement, I will let my folks know.

The next day, Chizen let his folks — Adobe's VP of Human Resources — know that "we are not to solicit ANY Apple employees, and visa versa." Chizen was worried that if he didn't agree, Jobs would make Adobe pay:

if I tell Steve [Jobs] it's open season (other than senior managers), he will deliberately poach Adobe just to prove a point. Knowing Steve, he will go after some of our top Mac talent...and he will do it in a way in which they will be enticed to come (extraordinary packages and Steve wooing).

Indeed Jobs even threatened war against Google early 2005 before their "gentlemen's agreement," telling Sergey Brin to back off recruiting Apple's Safari team:

if you [Brin] hire a single one of these people that means war.

Brin immediately advised Google's Executive Management Team to halt all recruiting of Apple employees until an agreement was discussed.

In the geopolitics of [Silicon Valley tech power](#), Adobe was no match for a corporate superpower like Apple. Inequality of the sort we're experiencing today affects everyone in ways we haven't even thought of — whether it's Jobs bullying slightly lesser executives into joining an illegal wage-theft pact, or the tens of thousands of workers whose wages were artificially lowered, transferred into higher corporate earnings, and [higher compensations](#) for those already richest and most powerful to begin with.

Over the next two years, as the tech industry entered another frothing bubble, the secret wage-theft pact which began with Apple, Google and Pixar expanded to include Intuit and Intel. The secret agreements were based on relationships, and those relationships were forged in Silicon Valley's [incestuous boards](#)

[of directors](#), which in the past has been recognized mostly as a problem for shareholders and corporate governance advocates, rather than for the tens of thousands of employees whose wages and lives are viscerally affected by their clubby backroom deals. Intel CEO Paul Otellini [joined](#) Google's board of directors in 2004, a part-time gig that netted Otellini [\\$23 million in 2007](#), with tens of millions more in Google stock options still in his name — which worked out to \$464,000 per Google board event if you only counted the stock options Otellini cashed out — dwarfing what Otellini made off his Intel stock options, despite spending most of his career with the company.

Meanwhile, Eric Schmidt served on Apple's board of directors until 2009, when a [DoJ antitrust investigation](#) pushed him to resign. Intuit's chairman at the time, Bill Campbell, also served on Apple's board of directors, and as official advisor — ["consigliere"](#) — to Google chief Eric Schmidt, until he [resigned](#) from Google in 2010. Campbell, a celebrated figure ("a quasi-religious force for good in Silicon Valley") played a key behind-the-scenes role connecting the various CEOs into the wage-theft pact. Steve Jobs, who took regular Sunday walks with Campbell near their Palo Alto homes, valued Campbell for his ability "to get A and B work out of people," gushing that the conduit at the center of the \$9 billion wage theft suit, ["loves people, and he loves growing people."](#)

Indeed. Eric Schmidt has been, if anything, even more profuse in his praise of Campbell. Schmidt credits Campbell for structuring Google when Schmidt was brought on board in 2001:

His contribution to Google — it is literally not possible to overstate. He essentially architected the organizational structure.

Court documents show it was Campbell who first brought together Jobs and Schmidt to form the core of the Silicon Valley wage-theft pact. And Campbell's name appears as the early conduit bringing Intel into the pact with Google:

Bill Campbell (Chairman of Intuit Board of Directors, Co-Lead Director of Apple, and advisor to Google) was also involved in the Google-Intel agreement, as reflected in an email exchange from 2006 in which Bill Campbell agreed with Jonathan Rosenberg (Google Advisor to the Office of CEO and former Senior Vice President of Product Management) that Google should call [Intel CEO] Paul Otellini before making an offer to an Intel employee, regardless of whether the Intel employee first approached Google.

Eric Schmidt has A psychotic need to control governments and society. Eric Schmidt does not think twice about hiring assassins, media hit-job operators, Black Cube and Fusion GPS hatchet job providers and bribe-positive lobbyists

In July 2016, Raymond Thomas, a four-star general and head of the U.S. Special Operations Command, hosted a guest: Eric Schmidt, the chairman of Google.

General Thomas, who served within the 1991 gulf war and deployed many times to Afghanistan, spent the higher half of a day showing Mr. Schmidt around Special Operations Command's headquarters in Tampa, Fla. They scrutinized prototypes for a robotic exoskeleton suit and joined operational briefings, which Mr. Schmidt needed to study extra about as a result of he had recently begun advising the military on technology.

After the go-to, as they rode in a Chevy Suburban towards an airport, the conversation turned to a form of artificial intelligence.

“You absolutely suck at machine learning,” Mr. Schmidt informed General Thomas, the officer recalled. “If I got under your tent for a day, I could solve most of your problems.” General Thomas said he was so offended that he needed to throw Mr. Schmidt out of the car, however refrained.

Four years later, Mr. Schmidt, 65, has channeled his blunt assessment of the military’s tech failings into a private campaign to revamp America’s defense forces with extra engineers, extra software program and extra A.I. In the method, the tech billionaire, who [left Google last year](#), has reinvented himself because of the prime liaison between Silicon Valley and the national security community.

Mr. Schmidt now sits on two government advisory boards aimed toward bounce beginning technological innovation in the Defense Department. His confidants embrace former Secretary of State Henry Kissinger and ex-Deputy Defense Secretary Robert Work. And by means of his personal enterprise capital agency and a \$13 billion fortune, Mr. Schmidt has invested millions of {dollars} into more than half a dozen defense start-ups.

In an interview, Mr. Schmidt — by turns thoughtful, pedagogical and hubristic — stated he had embarked on an effort to modernize the U.S. military because it was “stuck in software in the 1980s.”

He portrayed himself as a successful technologist who didn’t consider in retirement and [who owed a debt to the country](#) for his wealth — and who now had time and perception to resolve one of America’s hardest issues. The purpose, he stated, “should be to have as many software companies to supply software of many, many different kinds: military, H.R. systems, email systems, things which involve military intelligence, weapons systems and what have you.”

Mr. Schmidt is urgent ahead with a Silicon Valley worldview the place advances in software program and A.I. are the keys to determining nearly any situation. While that philosophy has led to [social networks that spread disinformation](#) and different unintended penalties, Mr. Schmidt stated he was convinced that making use of new and comparatively untested technology to complex conditions — together with lethal ones — would make service members extra environment friendly and bolster the United States in its competition with China.

His techno-solutionism is difficult by his ties to Google. Though Mr. Schmidt left the corporate’s board final June and has no official working function, he holds \$5.3 billion in shares of Google’s parent, Alphabet. He also stays on the payroll as an adviser, incomes a \$1 million annual wage, with two assistants stationed at Google’s Silicon Valley headquarters.

That has led to allegations that Mr. Schmidt is placing Google’s financial pursuits forward of different concerns in his protection work. Late final yr, a federal court ordered a congressional advisory committee he leads to flip over data that would make clear whether or not Mr. Schmidt had advocated his business interests whereas heading the group.

Mr. Schmidt stated he had adopted guidelines to keep away from conflicts. “Everybody is rule-bound at the Pentagon, and we are too,” he stated.

Google and the Defense Department declined to touch upon Mr. Schmidt’s work.

Even without these issues, shifting the military’s path isn’t any easy process. While Mr. Schmidt has helped generate reports and recommendations about know-how for the Pentagon, [few have been adopted](#).

“I’m sure he’ll be frustrated,” stated Representative Mac Thornberry, a Republican of Texas who nominated Mr. Schmidt in 2018 to an advisory committee on A.I. “Unlike the private sector, you can’t just snap your fingers and make it happen.”

Mr. Schmidt acknowledged that progress was sluggish. “I am bizarrely told by my military friends that they have moved incredibly fast, showing you the difference of time frames between the world I live in and the world they live in,” he stated.

But he stated he had little intention of backing down. “The way to understand the military is that the soldiers spend a great deal of time looking at screens. And human vision is not as good as computer vision,” he stated. “It’s insane that you have people going to service academies, and we spend an enormous amount of training, training these people, and we put them in essentially monotonous work.”

Mr. Schmidt’s first brush with the military got here in 1976, whereas he was in graduate college on the University of California, Berkeley. There, he centered on research on distributed computing, funded by cash from Darpa, an analysis arm of the Defense Department.

The work catapulted Mr. Schmidt into his technology profession. After finishing his graduate studies in pc science, he labored at various tech firms for more than twenty years, together with the networking software maker Novell. In 2001, Google appointed him chief govt.

The search engine firm was then in its infancy. Its 20-something founders, Larry Page and Sergey Brin, were contemporary out of a Stanford University doctorate program and had little business expertise. Mr. Schmidt was hired to assist information them, offering “adult supervision,” which he did — after which some.

Mr. Schmidt [took Google public in 2004](#) and built it right into a behemoth, diversifying into smartphones, cloud computing and [self-driving cars](#). The success turned him right into an enterprise movie star. In 2009, he served as a tech adviser to the Obama administration.

In 2011, with Google price almost \$400 billion, the corporate introduced Mr. Page was able to resume the C.E.O. reins. Mr. Schmidt turned govt chairman.

In that function, Mr. Schmidt took on new tasks, many of which introduced him to Washington. In 2012, he participated in categorized briefings on cybersecurity with Pentagon officers as half of the Enduring Security Framework program. In 2015, he attended a seminar on the banks of the Potomac River, hosted by then-Defense Secretary Ash Carter, on the use of know-how inside the government.

“It was all interesting to me,” Mr. Schmidt stated. “I didn’t really know much about it.”

He additionally traveled to North Korea, Afghanistan and Libya whereas writing a guide about know-how and diplomacy, and dabbled in politics, lending technical assist to Hillary Clinton within the run-up to her 2016 presidential marketing campaign.

His enterprise capital fund, Innovation Endeavors, was lively too. It invested in start-ups like Planet Labs, which operates satellites and sells the imagery to protection and intelligence companies, and Team8, a cybersecurity firm based by former Israeli intelligence members.

At the 2016 World Economic Forum in Davos, Switzerland, Mr. Carter requested Mr. Schmidt to fulfill. He had a proposal: Could Mr. Schmidt lead the Defense Innovation Board, a civilian advisory group tasked with bringing new technology to the Pentagon?

“We were in one of these dumpy hotels, and there he is with his small entourage walking in, and he basically said to me, ‘This is what I want to do. You’d be the perfect person to be chairman,’” Mr. Schmidt said.

Mr. Schmidt said he turned down the function as a result of he was busy and had no military background. But Mr. Carter argued that Mr. Schmidt’s tech experience was wanted, because the U.S. military — which had as soon as been a middle of innovation — was falling behind companies like Google and Facebook in software and A.I.

Mr. Schmidt finally agreed. (Mr. Carter didn’t reply to requests for remark.)

As head of the Defense Innovation Board, Mr. Schmidt started touring navy bases, plane carriers and plutonium strongholds. The journeys, which took Mr. Schmidt to about 100 bases in locations like Fayetteville, N.C., and Osan, South Korea, have been a definite break from his well-heeled life in Silicon Valley.

“You want to see these things,” Mr. Schmidt stated. “I received the nuclear missile tour. Things which are exhausting. I received a tour of [Cheyenne Mountain](#) so I might perceive what their actuality was.”

One of the primary journeys was to Tampa to go to General Thomas, who is named Tony, the place Mr. Schmidt saw maps and reside video feeds displayed on huge screens. “Eric’s observation was that a huge part of what the military does is it sits and watches,” stated Josh Marcuse, the then executive director of the Defense Innovation Board who was on the journey.

The visits made tangible what Mr. Carter had told Mr. Schmidt about how the military was lagging in technology. Mr. Schmidt quickly made ideas to vary that.

Some of his concepts have been impractical. Eric Rosenbach, then the chief of workers to Mr. Carter, recalled Mr. Schmidt as soon as telling him that the Pentagon can be higher off if it employed nobody however engineers for a year.

Others have been helpful. At an Air Force facility in Qatar in 2016, Mr. Schmidt visited officers who scheduled flight paths for the tankers that refueled planes. They used a white board and dry-erase markers to set the schedule, taking eight hours to finish the duty.

Mr. Schmidt stated he recalled considering, “Really? This is how you run the air war?” Afterward, he and others on the Defense Department labored with the tech company Pivotal to ship software to the officers.

On one other journey to a navy base in South Korea in 2017, an intelligence analyst complained to Mr. Schmidt that the software program he used to evaluate surveillance movies from North Korea was clunky.

“Let me guess,” Mr. Schmidt said, according to a Defense Department aide who traveled with him. “You don’t have the flexibility to change that.”

In December 2017, Mr. Schmidt stepped down as Google’s chairman however remained on the board. He said he was seeking a brand new chapter.

“If I stayed as chairman, then next year would have been the same as the previous year, and I wanted a change of emphasis,” said Mr. Schmidt. “As chairman of Google, what I did is I ran around and gave speeches, and went to Brussels and all the things that Google still does today. It’s much better to work on these new things for me.”

Google declined to comment on Mr. Schmidt's departure as chairman.

By then, Mr. Schmidt's ties to Google had induced issues in his protection work. In 2016, Roma Laster, a Defense Department worker, filed a complaint on the company elevating considerations about Mr. Schmidt and conflicts of curiosity, Mr. Marcuse stated.

In the complaint, [earlier reported by ProPublica](#), Ms. Laster, who labored with the Defense Innovation Board, said Mr. Schmidt had requested a service member what cloud computing providers their unit used and whether or not they had thought-about options. She stated Mr. Schmidt confronted a battle of interest as a result of he worked for Google, which additionally gives cloud services.

Mr. Marcuse, who now works at Google, said Mr. Schmidt was "scrupulous and diligent" in avoiding conflicts. Mr. Schmidt said he adopted the principles forbidding conflicts of interest. Ms. Laster didn't reply to requests for remark.

Mr. Schmidt quickly received caught up in one other situation between Google and the military. Google had signed a contract in 2017 to assist the Pentagon to construct methods to automatically analyze drone footage to identify particular objects like buildings, vehicles, and people.

Mr. Schmidt was a proponent of the hassle, known as Project Maven. He stated he inspired the Pentagon to pursue it and testified in Congress in regards to the undertaking's deserves, however was not concerned within the company's selection of Google.

But the [effort blew up](#) in 2018 when [Google employees protested](#) and stated they didn't need their work to result in deadly strikes. More than 3,000 staff signed a letter to Mr. Pichai, saying the contract would undermine the general public's belief within the firm.

It was a black eye for Mr. Schmidt. Military officers, who stated Project Maven was not getting used for deadly missions, condemned Google for abandoning the contract. Google staff additionally criticized Mr. Schmidt's ties to the Pentagon.

"He has very different goals and values than the engineers at his company," stated Jack Poulson, a Google worker who protested Mr. Schmidt's military work and who has since left the company.

Mr. Schmidt said he sidestepped discussions about Project Maven as a result of of conflict-of-interest guidelines, however wished he might have weighed in. "I would have certainly had an opinion," he stated.

Last April, Mr. Schmidt [announced](#) he deliberate to go away Google's board. He had helped create an A.I. middle backed by the Pentagon in 2018 and had additionally turn into co-chair of the National Security Commission on Artificial Intelligence, a brand new group advising Congress on developing A.I. for defense.

A month after leaving Google, Mr. Schmidt invested in Rebellion Defense, a software program start-up based by former Defense Department staff that analyzes video gathered through drone. His enterprise agency later put more cash into the company, and Mr. Schmidt joined its board.

The funding led to extra bother. The Electronic Privacy Information Center, a nonprofit privateness and civil liberties group, sued the A.I. commission last September for failing to show over data. EPIC said the group was stacked with industry executives like Mr. Schmidt and others from Microsoft, Amazon and Oracle, who could potentially sway the government in favor of their companies' interests.

Mr. Schmidt was underneath scrutiny as a result of of Rebellion Defense and the way he might push the government to make use of the start-up's services, EPIC said.

"We don't have any public disclosure about what information Eric has provided to the commission about his business interests," said John Davisson, a legal professional at EPIC.

In December, a district court dominated the A.I. fee should disclose the data requested by EPIC. The fee has launched a whole lot of pages of paperwork, most of which don't contain Mr. Schmidt or his companies. EPIC stated extra data are set to be launched.

Chris Lynch, the chief executive of Rebellion Defense, said Mr. Schmidt suggested the company solely on hiring and growth. Mr. Schmidt said he didn't advocate for the Defense Department to purchase technology from the start-up.

He has continued plowing forward. In November, he unveiled a \$1 billion dedication by means of Schmidt Futures, the philanthropic agency that he runs along with his spouse, Wendy, to fund education for those who want to work in public service.

[Former Lover Exposes **Eric Schmidt** - American Intelligence ...](#)

 <https://aim4truth.org/2019/07/02/former-lover-exposes-eric-schmidt/>

The following is a transcript of an interview with a Google/Facebook/DARPA insider that was conducted with a member of the Anonymous Patriots, a citizen journalist group aligned with the American Intelligence Media. The person interviewed wishes to remain anonymous and for purposes of the interview will be called Jane Doe. This conversation took place on...

Getting Google on board with the wage-theft pact was the key for Apple from the start — [articles](#) in the tech press in 2005 pointed at Google's recruitment drive and incentives were the key reason why tech wages soared that year, at the highest rate in well over a decade.

Campbell helped bring in Google, Intel, and, in 2006, Campbell saw to it that Intuit — the company he [chaired](#) — also joined the pact.

From the peaks of Silicon Valley, Campbell's interpersonal skills were [magical](#) and awe-inspiring, a crucial factor in creating so much unimaginable wealth for their companies and themselves. Jobs [said](#) of Campbell:

There is something deeply human about him.

And Schmidt [swooned](#):

He is my closest confidant...because he is the definition of trust.

Things — and people — look very different when you're down in the Valley. In the nearly 100-page court opinion issued last October by Judge Koh granting class status to the lawsuit, Campbell comes off as anything but mystical and "deeply human." He comes off as a scheming consigliere carrying out some of the drearier tasks that the oligarchs he served were constitutionally not so capable of arranging without him.

But the realities of inequality and capitalism invariably lead to mysticism of this sort, a natural human response to the dreary realities of concentrating so much wealth and power in the hands of a dozen interlocking board members at the expense of 100,000 employees, and so many other negative knock-off effects on the politics and culture of the world they dominate.

One of the more telling elements to this lawsuit is the role played by "Star Wars" creator George Lucas, who emerges as the Obi-Wan Kenobi of the wage-theft scheme. It's almost too perfectly symbolic that Lucas — the symbiosis of Baby Boomer New Age mysticism, Left Coast power, political infantilism, and dreary 19th century labor exploitation — should be responsible for dreaming up the wage theft scheme back in the mid-1980s, when Lucas sold the computer animation division of Lucasfilm, Pixar, to Steve Jobs.

As Pixar went independent in 1986, Lucas explained his philosophy about how competition for computer engineers violated his sense of normalcy — and profit margins. According to court documents:

George Lucas believed that companies should not compete against each other for employees, because '[i]t's not normal industrial competitive situation.' As George Lucas explained, 'I always — the rule we had, or the rule that I put down for everybody,' was that 'we cannot get into a bidding war with other companies because we don't have the margins for that sort of thing.'

Translated, Lucas' wage-reduction agreement meant that Lucasfilm and Pixar agreed to a) never cold call each other's employees; b) notify each other if making an offer to an employee of the other company, even if that employee applied for the job on his or her own without being recruited; c) any offer made would be "final" so as to avoid a costly bidding war that would drive up not just the employee's salary, but also drive up the pay scale of every other employee in the firm.

Jobs held to this agreement, and used it as the basis two decades later to suppress employee costs just as fierce competition was driving up tech engineers' wages.

The companies argued that the non-recruitment agreements had nothing to do with driving down wages. But the court ruled that there was "extensive documentary evidence" that the pacts were designed specifically to push down wages, and that they succeeded in doing so. The evidence includes software tools used by the companies to keep tabs on pay scales to ensure that within job "families" or titles, pay remained equitable within a margin of variation, and that as competition and recruitment boiled over in 2005, emails between executives and human resources departments complained about

the pressure on wages caused by recruiters cold calling their employees, and bidding wars for key engineers.

Google, like the others, used a "salary algorithm" to ensure salaries remained within a tight band across like jobs. Although tech companies like to claim that talent and hard work are rewarded, in private, Google's "People Ops" department kept overall compensation essentially equitable by making sure that lower-paid employees who performed well got higher salary increases than higher-paid employees who also performed well.

As Intel's director of Compensation and Benefits bluntly summed up the Silicon Valley culture's official cant versus its actual practices,

While we pay lip service to meritocracy, we really believe more in treating everyone the same within broad bands.

The companies in the pact shared their salary data with each other in order to coordinate and keep down wages — something unimaginable had the firms not agreed to not compete for each other's employees. And they fired their own recruiters on just a phone call from a pact member CEO.

In 2007, when Jobs learned that Google tried recruiting one of Apple's employees, he forwarded the message to Eric Schmidt with a personal comment attached: "I would be very pleased if your recruiting department would stop doing this."

Within an hour, Google made a "public example" by "terminating" the recruiter in such a manner as to "(hopefully) prevent future occurrences."

Likewise, when Intel CEO Paul Otellini heard that Google was recruiting their tech staff, he sent a message to Eric Schmidt: "Eric, can you pls help here???"

The next day, Schmidt wrote back to Otellini: "If we find that a recruiter called into Intel, we will terminate the recruiter."

One of the reasons why non-recruitment works so well in artificially lowering workers' wages is that it deprives employees of information about the job market, particularly one as competitive and overheating as Silicon Valley's in the mid-2000s. As the companies' own internal documents and statements showed, they generally considered cold-calling recruitment of "passive" talent — workers not necessarily looking for a job until enticed by a recruiter — to be the most important means of hiring the best employees.

Just before joining the wage-theft pact with Apple, Google's human resources executives are quoted sounding the alarm that they needed to "dramatically increase the engineering hiring rate" and that would require "drain[ing] competitors to accomplish this rate of hiring." One CEO who noticed Google's hiring spree was eBay CEO Meg Whitman, who in early 2005 called Eric Schmidt to complain, "Google is the talk of the Valley because [you] are driving up salaries across the board." Around this time, eBay entered an illegal wage-theft non-solicitation scheme of its own with Bill Campbell's Intuit, which is still being tried in ongoing federal and California state suits.

Google placed the highest premium on "passive" talent that they cold-called because "passively sourced candidates offer[ed] the highest yield," according to court documents. The reason is like the old Groucho Marx joke about not wanting to belong to a club that would let you join it — workers actively seeking a new employer were assumed to have something wrong with them; workers who

weren't looking were assumed to be the kind of good happy talented workers that company poachers would want on their team.

For all of the high-minded talk of post-industrial technotopia and Silicon Valley as worker's paradise, what we see here in stark ugly detail is how the same old world scams and rules are still operative.

One key tech voice responded: "When I was a young scientist working on the fledgling creation that came to be known as the internet, the ethos that defined the culture we were building was characterized by words such as ethical, open, trusted, free, shared. None of us knew where our research would lead, but these words and principles were our beacon.

We did not anticipate that the dark side of the internet would emerge with such ferocity. Or that we would feel an urgent need to fix it.

How did we get from there to here?

While studying for my doctorate at MIT in the early 1960s, I recognized the need to create a mathematical theory of networks that would allow disparate computers to communicate. Later that decade, the Advanced Research Projects Agency — a research funding arm of the Department of Defense created in response to Sputnik — determined they needed a network based on my theory so that their computer research centers could share work remotely.

My UCLA computer lab was selected to be the first node of this network. Fifty years ago — on Oct. 29, 1969 — a simple “Lo” became [the first internet message](#), from UCLA to Stanford Research Institute. We had typed the first two letters of “login” when the network crashed.

This quiet little moment of transmission over that two-computer communication network is regarded as the founding moment of the internet.

During [its first 25 years](#), the internet grew dramatically and organically with the user community seeming to follow the same positive principles the scientists did. We scientists sought neither patents nor private ownership of this networking technology. We were nerds in our element, busily answering the challenge to create new technology that would benefit the world.

Around 1994, the internet began to change quickly as dot-coms came online, the network channels escalated to gigabit speeds and the World Wide Web became a common household presence. That same year, Amazon was founded and Netscape, the first commercial web browser, was released.

And on April 12, 1994, a “small” moment with enormous meaning occurred: The transmission of the first widely circulated spam email message, a brazen advertisement. The collective response of our science community was “How dare they?” Our miraculous creation, a “research” network capable of boundless computing magnificence had been hijacked to sell ... detergent?

By 1995, the internet had 50 million users worldwide. The commercial world had recognized something we had not foreseen: The internet could be used as a powerful shopping machine, a gossip chamber, an entertainment channel and a social club. The internet had suddenly become a money-making machine.

With the profit motive taking over the internet, the very nature of innovation changed. Averting risk dominated the direction of technical progress. We no longer pursued “moonshots.” Instead advancement came via baby steps — “design me a 5% faster Bluetooth connection” as opposed to “build me an internet.” An online community that had once been convivial transformed into one of competition, antagonism and extremism.

And then as the millennium ended, our revolution took a more disturbing turn that we continue to grapple with today.

By suddenly providing the power for anyone to immediately reach millions of people inexpensively and anonymously, we had inadvertently also created the perfect formula for the “dark” side to spread like a virus all over the world. Today more than 50% of email is spam, but far more troubling issues have emerged — including denial of service attacks that can immobilize critical financial institutions and malicious botnets that can cripple essential infrastructure sectors.

Other dangerous players, such as nation-states, started coming onto the scene around 2010, when [Stuxnet malware](#) appeared. Organized crime recognized the internet could be used for international money laundering, and extremists found the internet to be a convenient megaphone for their radical views. Artificial intelligence, machine learning, facial recognition, biometrics and other advanced technologies could be used by governments to weaken democratic institutions.

The balkanization of the internet is now conceivable as firewalls spring up around national networks.

We could try to push the internet back toward its ethical roots. However, it would be a complex challenge requiring a joint effort by interested parties — which means pretty much everyone.

We should pressure government officials and entities to more zealously monitor and adjudicate such internet abuses as cyberattacks, data breaches and piracy. Governments also should provide a forum to bring interested parties together to problem-solve.

Citizen-users need to hold websites more accountable. When was the last time a website asked what privacy policy you would like applied to you? My guess is never. You should be able to clearly articulate your preferred privacy policy and reject websites that don’t meet your standards. This means websites should provide a privacy policy customized to you, something they should be able to do since they already customize the ads you see. Websites should also be required to take responsibility for any violations and abuses of privacy that result from their services.

Scientists need to create more advanced methods of encryption to protect individual privacy by preventing perpetrators from using stolen databases. We are working on technologies that would hide the origin and destination of data moving around the network, thereby diminishing the value of captured network traffic. Blockchain, the technology that underpins bitcoin and other digital currencies, also offers the promise of irrefutable, indisputable data ledgers.

If we work together to make these changes happen, it might be possible to return to the internet I knew.

So what is the “Bottom-Line” here?: *Eric Schmidt, Larry Page, Steve Jobs, Elon Musk, Steve Westly, Vinod Khosla, Larry Page and their bro’s are sociopath mobsters that must be taken down. If the government does not have the balls to arrest them, then you, the public, need to do take them down!*

How the Internet lost its soul when mad men took it over

Janet Abbate, The Washington Post

This week, we celebrate what many consider the 50th birthday of the Internet. The underpinnings of the World Wide Web originated in an American communications network built for national defense and the pursuit of knowledge: ARPANET. Funded by the Defense Department's Advanced Research Projects Agency, the network was designed so that scientists could share computer hardware, software and data.

It worked. In the ensuing decades, the ARPANET, and after the 1980s, the National Science Foundation Network (NSFNET), did indeed allow scientists to collaboratively build knowledge around networked tools and information. But expanding access to the Internet, combined with looser government regulations, ultimately produced a situation no one foresaw or intended. On today's Internet, conspiracy theories run rampant, identities can be faked and our real-life elections are vulnerable to manipulation. A network designed for spreading truth became a profit-driven industry, a public sphere that threatens to undermine the public good.

The original ARPANET was designed for a relatively small community of people united by a technical challenge. At the time, computers from different manufacturers ran incompatible software, and long-distance data communications links were costly and unreliable. Networks connected only a few identical computers within a small region.

But ARPANET had an audacious proposal: It would span the continental United States to connect 15 research sites encompassing a diverse array of computers.

"Almost every conceivable item of computer hardware and software will be in the network," project leader Larry Roberts pointed out. "This is the greatest challenge of the system, as well as its greatest ultimate value." As a leading funder of computer science research, ARPA was able to mobilize a talented group of faculty and graduate students to design, build and debug the network, sending the first message on Oct. 29, 1969.

Like many academic environments, the ARPANET community was open and informal, and security was lax; in the early 1970s, students were rumored to have used the network to conduct transcontinental drug deals alongside their official research. But the relatively closed world of networked computing was opened up with the introduction of personal computers in the 1970s. The Defense Department soon found "unauthorized penetrations" of the ARPANET by hackers, complaining that "the availability of inexpensive computers and modems have made the network fair game for countless computer hobbyists."

By 1983, security concerns were so acute that Defense split off military users into their own network, ceding the rest of the ARPANET to academic researchers. In 1990, the ARPANET was absorbed into a new network built by the National Science Foundation that consisted of several regional networks connected by a high-speed backbone. As a nationwide civilian network, NSFNET rapidly increased the size and visibility of the Internet.

Politicians and businesses wanted to capitalize on the potential of a national network to connect citizens and consumers. In the early 1980s, the general public, though not yet allowed on the Internet, had begun using commercial dial-up services such as CompuServe and AOL to access servers offering chat rooms, games and email. In 1986, Congress, prompted by Sen. Al Gore, began debating whether the nation needed an "information superhighway" to connect K-12 schools and libraries for all citizens. Congress included funding for a National Research and Education Network (NREN) in its High-Performance Computing Act of 1991.

Had this plan come to fruition, the Internet would have remained under federal control until the late 1990s, potentially allowing time to upgrade security or create regulations to protect users. But before the NREN could get underway, the industry contractors providing the NSFNET infrastructure rushed ahead with plans to offer commercial network services, ultimately causing Congress to abandon the NREN.

The result was the de facto privatization of the Internet. The nonprofit organizations that had operated the NSFNET's backbone and regional networks reinvented themselves as the first commercial Internet service providers, serving both the NSF and private customers. The NSF now had the option to outsource its networking needs to these commercial providers, which it did as it retired the old NSFNET in 1995. While this removed an administrative burden from the NSF, the hasty transition left little time to consider the policy implications. So a commercialized network developed without public oversight of the Internet's operation.

Privatization opened the floodgates for new services: social media, gaming, e-commerce, and millions of personal websites and blogs. Industry advocates insisted that the Internet should not be regulated, lest innovation be stifled. Regulatory models that had been developed for common carriers, publishers and broadcasters did not fit a new medium that combined aspects of all these media and whose services and business models were in constant flux. Online businesses were free to experiment with ways to

make money, eventually landing on the advertising-based business model that led to escalating surveillance and collection of user data to better target ads.

None of this has prevented scientists - the Internet's original users - from continuing to build reliable knowledge based on networked data and computational tools. The scientific community has time-tested processes to validate and protect the information it shares. But the general public is in a more precarious position. Anyone can be a publisher online, and the obvious clues to legitimacy that came with print and broadcast media - the investment in reporting and fact-checking, obligations to paying customers, an identifiable organization that could be held liable for false content - can be absent or faked online. The same type of user profiling that stimulates business also enables bad actors to target inflammatory social issues and widen political divides. We have inadvertently created a culture where misinformation can be spread without accountability.

Long-term trends of increasingly open access and diminishing government oversight have fueled the Internet's growth and unleashed the creativity of millions. They have also left a vacuum where the public interest should be. Can we work together to build a better Internet for the next 50 years?"

[31 and Feb. 18.](#)" She did claim that she has "no involvement in her husband's financial decisions" to avoid criticism. Do you really think that she has no idea about multi-million dollar deals that her husband is involved in?

LAWS YOU NEED TO FORCE YOUR POLITICAL REPRESENTATIVES TO MAKE

These are the steps that the public must demand to strengthen public integrity by eliminating corrupt financial conflicts in Congress.

Congress must be ordered to eliminate both the appearance and the potential for financial conflicts of interest. Americans must be confident that actions taken by public officials are intended to serve the public, and not those officials. These actions counter-act the actions taken by Obama Administration staff and Department of Energy officials in illicit coordination with U.S. Senators. In other words, we experienced all of the damages from each of the abuse-of-power issues listed below. These are the actions needed to resolve those issues:

- Ban individual stock ownership by Members of Congress, Cabinet Secretaries, senior congressional staff, federal judges, White House staff and other senior agency officials while in office. Prohibit all government officials from holding or trading stock where its value might be influenced by their agency, department, or actions.
- Apply conflict of interest laws to the President and Vice President through the Presidential Conflicts of Interest Act, which would require the President and the Vice President to place conflicted assets, including businesses, into a blind trust to be sold off
- Require senior Department of Energy government officials, employees, contractors and White House staff to divest from privately-owned assets that could present conflicts, including large companies like Tesla, Google, Facebook, Sony, Netflix, etc., and commercial real estate.
- Make it a felony to not respond to a filing by a citizen within 48 hours. Former White House and Energy Department staff use 'stone-walling' to intentionally delay responses for a decade, or more.
- Apply ethics rules to all government employees, including unpaid White House staff and advisors.
- Require most executive branch employees to recuse from all issues that might financially benefit themselves or a previous employer or client from the preceding 4 years
- Create conflict-free investment opportunities for federal officials with new investment accounts managed by the Federal Retirement Thrift Investment Board and conflict-free mutual funds.
- Close and lock the Revolving Door between industry and government and stop tech companies from buying influence in the government or profiting off of the public service of any official.
- Lifetime ban on lobbying by Presidents, Vice Presidents, Members of Congress, federal judges, and Cabinet Secretaries; and, multi-year bans on all other federal employees from lobbying their former office, department, House of Congress, or agency after they leave government service until the end of the Administration, but at least for 2 years (and at least 6 years for corporate lobbyists)
- Limit the ability of companies to buy influence through former government officials

- Require income disclosures from former senior officials 4 years after federal employment.
- Prohibit companies from immediately hiring or paying any senior government official from an agency, department, or Congressional office recently lobbied by that company
- Prohibit the world's largest companies, banks, and monopolies (measured by annual revenue or market capitalization) from hiring or paying any former senior government official for 4 years after they leave government service.
- Limit the ability of companies to buy influence through current government employees
- Prohibit current lobbyists from taking government jobs for 2 years after lobbying; 6 years for corporate lobbyists. Public, written waivers where such hiring is in the national interest are allowed for non-corporate lobbyists only.
- Prohibit corporate outlaws like Google, Tesla, Facebook, LinkedIn, Netflix, Sony, etc., from working in government by banning the hiring of top corporate leaders whose companies were caught breaking federal law in the last 6 years
- Prohibit contractor corruption by blocking federal contractor and licensee employees from working at the agency awarding the contract or license for 4 years
- Ban "Golden Parachutes" that provide corporate bonuses to executives for federal service.
- Publicly expose all influence-peddling in Washington.
- Strengthen and expand the federal definition of a "lobbyist" to include all individuals paid to influence government.
- Create a new "corporate lobbyist" definition to identify individuals paid to influence government on behalf of for-profit entities and their front-groups.
- Radically expand disclosure of lobbyist activities and influence campaigns by requiring all lobbyists to disclose any specific bills, policies, and government actions they attempt to influence; any meetings with public officials; and any documents they provide to those officials
- End Influence-Peddling by Foreign Actors such as that which occurred in the ENER1, Severstal, Solyndra and related scandals
- Combat foreign influence in Washington by banning all foreign lobbying.
- End foreign lobbying by Americans by banning American lobbyists from accepting money from foreign governments, foreign individuals, and foreign companies to influence United States public policy.
- Prohibit current lobbyists from taking government jobs for 2 years after lobbying; 6 years for

corporate lobbyists. Public, written waivers where such hiring is in the national interest are allowed for non-corporate lobbyists only.

- End Legalized Lobbyist Bribery and stop lobbyists from trading money for government favors.
- Ban direct political donations from lobbyists to candidates or Members of Congress.
- End lobbyist contingency fees that allow lobbyists to be paid for a guaranteed policy outcome.
- End lobbyist gifts to the executive and legislative branch officials they lobby
- Strengthen Congressional independence from lobbyists and end Washington's dependence on lobbyists for "expertise" and information.
- Make congressional service sustainable by transitioning Congressional staff to competitive salaries that track other federal employees
- Reinstate the nonpartisan Congressional Office of Technology Assessment to provide critical scientific and technological support to Members of Congress.
- Level the playing field between corporate lobbyists and government by taxing excessive lobbying beginning at \$500,000 in annual lobbying expenditures, and use the proceeds to help finance Congressional mandated rule-making, fund the National Public Advocate, and finance Congressional support agencies
- De-politicize the rulemaking process and increase transparency of industry efforts to influence federal agencies.
- Require individuals and corporations to disclose funding or editorial conflicts of interest in research submitted to agencies that is not publicly available in peer-reviewed publications.
- Prevent McKinsey-type sham research from undermining the public interest by requiring that studies that present conflicts of interest to undergo independent peer review to be considered in the rule-making process
- Require agencies to justify withdrawn public interest rules via public, written explanations.
- Close loopholes exploited by powerful corporations like Google, Facebook, Tesla, Netflix, Sony, etc., to block public interest actions.
- Eliminate loopholes that allow corporations, like Tesla and Google, to tilt the rules in their favor and against the public interest.
- Restrict negotiated rule-making to stop industry from delaying or dominating the rule-making process by ending the practice of inviting industry to negotiate rules they have to follow.
- Restrict inter-agency review as a tool for corporate abuse by banning informal review, establishing a maximum 45-day review period, and blocking closed-door industry lobbying at the White House's Office of Information and Regulatory Affairs

- Limit abusive injunctions from rogue judges, like Jackson, et al, by ensuring that only Appeals Courts, not individual District Court judges , can temporarily block agencies from implementing final rules.
- Prevent hostile agencies from sham delays of implementation and enforcement by using the presence of litigation to postpone the implementation of final rules.
- Empower the public to police agencies for corporate capture.
- Increase the ability of the public to make sure their interests are considered when agencies act
- Create a new Office of the Public Advocate empowered to assist the public in meaningfully engaging in the rule-making process across the federal government
- Encourage enforcement by allowing private lawsuits from members of the public to hold agencies accountable for failing to complete rules or enforce the law, and to hold corporations accountable for breaking the rules
- Inoculate government agencies against corporate capture such as Google undertook against the White House
- Provide agencies with the tools and resources to implement strong rules that reflect the will of Congress and protect the public.
- Boost agency resources to level the playing field between corporate lobbyists and federal agencies by using the proceeds of the tax on excessive lobbying and the anti-corruption penalty fees to help finance Congress-mandated rule-making and facilitate decisions by agencies that are buried in an avalanche of lobbyist activity
- Reform judicial review to prevent corporations from gaming the courts by requiring courts to presumptively defer to agency interpretations of laws and prohibiting courts from considering sham McKinsey studies and research excluded by agencies from the rule-making process
- Reverse the Congressional Review Act provision banning related rules that prevent agencies from implementing the will of Congress based on Congress' prior disapproval of a different, narrow rule on a similar topic
- Improve judicial integrity and defend access to justice for all Americans.
- Strengthen Judicial Ethics Requirements.
- Enhance the integrity of the judicial branch by strengthening rules that prevent conflicts of interest.
- Ban individual stock ownership by federal judges.
- Expand rules prohibiting judges from accepting gifts or payments to attend private seminars from private individuals and corporations

- Require ethical behavior by the Supreme Court by directing the Court to follow the Code of Conduct that binds all other federal judges
- Boost the transparency of Federal Courts
- Enhance public insight into the judicial process by increasing information about the process and reducing barriers to accessing information.
- Increase disclosure of non-judicial activity by federal judges by requiring the Judicial Conference to publicly post judges' financial reports, recusal decisions, and speeches.
- Enhance public access to court activity by mandating that federal appellate courts live-stream, on the web, audio of their proceedings, making case information easily-accessible to the public free of charge, and requiring federal courts to share case assignment data in bulk.
- Eliminate barriers that restrict access to justice to all but the wealthiest individuals and companies.
- Reduce barriers that prevent individuals from having their case heard in court by restoring pleading standards that make it easier for individuals and businesses that have been harmed to make their case before a judge.
- Encourage diversity on the Federal Bench
- Strengthen the integrity of the judicial branch by increasing the focus on personal and professional diversity of the federal bench.
- Create a single, new, and independent agency dedicated to enforcing federal ethics and anti-corruption laws
- Support stronger ethics and public integrity laws with stronger enforcement.
- Establish the new, independent U.S. Office of Public Integrity, which will strengthen federal ethics enforcement with new investigative and disciplinary powers
- Investigate potential violations by any individual or entity, including individuals and companies with new subpoena authority
- Enforce the nation's ethics laws by ordering corrective action, levying civil and administrative penalties, and referring egregious violations to the Justice Department for criminal arrest and enforcement.
- Receive and investigate ethics complaints from members of the public.
- Absorb the U.S. Office of Government Ethics as a new Government Ethics Division tasked with providing confidential advice to federal employees seeking ethics guidance.
- Consolidate anti-corruption and public integrity oversight over federal officials, including oversight of all agency Inspectors General, all ethics matters for White House staff and agency heads, and all

waivers and recusals by senior government officials.

- Remain independent and protected from partisan politics through a single Director operating under strict selection, appointment, and removal criteria.
- Provide easy online access to key government ethics and transparency documents, including financial disclosures; lobbyist registrations; lobbyist disclosures of meetings and materials; and all ethics records, recusals, and waivers.
- Maintain a new government-wide Office of the Public Advocate, which would advocate for the public interest in executive branch rule-making.
- Enforce federal open records and FOIA requirements by maintaining the central FOIA website and working with the National Archives to require agencies to comply with FOIA.
- Strengthen legislative branch enforcement.
- Expand an independent and empowered ethics office insulated from congressional politics.
- Expand and empower the U.S. Office of Congressional Ethics, which will enforce the nation's ethics laws in the Congress and the entire Legislative Branch, including the U.S. Senate.
- Conduct investigations of potential violations of ethics laws and rules by Members of Congress and staff with new subpoena power
- Refer criminal and civil violations to the Justice Department, the Office of Public Integrity, or other relevant state or federal law enforcement.
- Recommend disciplinary and corrective action to the House and Senate Ethics Committees.
- Boost transparency in government and fix Federal Open Records laws, public official and candidate tax disclosure.
- Disclose basic tax return information for candidates for federal elected office and current elected officials.
- Require the IRS to release tax returns for Presidential and Vice-Presidential candidates from the previous 8 years and during each year in federal elected office.
- Require the IRS to release tax returns for Congressional candidates from the previous 2 years and during each year in federal elected office.
- Require the IRS to release tax returns and other financial information of businesses owned by senior federal officials and candidates for federal office
- Require the IRS to release tax filings for nonprofit organizations run by candidates for federal office
- Disclose the Cash behind Washington Advocacy and Lobbying.

- Prevent special interests from using secret donations from corporations and billionaires to influence public policy without disclosure
- Require nonprofit organizations to list donors who bankrolled the production of any specific rule-making comment, congressional testimony, or lobbying material, and to reveal whether the donors reviewed or edited the document.
- Require individuals and corporations to disclose funding or editorial conflicts of interest in research submitted to agencies that is not publicly available in peer-reviewed publications.
- Prevent sham research, like that from DNC shell McKinsey Consulting, from undermining the public interest by requiring that studies that present conflicts of interest to independent peer review to be considered in the rule-making process.
- Improve the Freedom of Information Act (FOIA)
- Close the loopholes in our open records laws that allow federal officials to hide tech industry and Silicon Valley oligarch industry influence
- Codify the default presumption of disclosure and affirmatively disclose records of public interest, including meeting agendas; government contracts; salaries; staff diversity; and reports to Congress.
- Require all agencies to use a central FOIA website that is searchable and has downloadable open records databases with all open FOIA requests and all records disclosed through FOIA.
- Strengthen FOIA enforcement by limiting FOIA exemptions and loopholes, and by giving the National Archives the authority to overrule agency FOIA decisions and to compel disclosure.
- Extend FOIA to private-sector federal contractors, including private federal prisons and immigration detention centers, and require large federal contractors to disclose political spending
- Make Congress more transparent by ending the corporate lobbyists leg up in the legislative process. The public deserves to know what Congress is up to and how lobbyists influence legislation.
- Require all congressional committees to immediately post online more information, including hearings and markup schedules, bill or amendments text, testimonies, documents entered into the hearing record, hearing transcripts, written witness answers, and hearing audio and video recordings.
- Require Members of Congress to post a link to their searchable voting record on their official websites
- Require lobbyists to disclose when they lobby a specific congressional office; specific topics of visit; the official action being requested; and all documents provided to the office during the visit.

Do these seem like common-sense rules that should have already been in place? ***They are!***

These anti-corruption rules have been blocked by your own elected officials because they work for themselves and not you!

You need to PUNISH any public official who does not put these changes into effect!

HOW TO CONDUCT A CITIZENS ARREST OF A CORRUPT CROOK INCLUDING OLIGARCHS

First of all, before you conduct a citizens arrest, look up the address of your regional FBI office and walk in and inform them that you plan to make the arrest. Show them that you have all of the paperwork in order and see if they have any reason to talk you out of doing it or to partner with your effort.

A **citizen's arrest** is an [arrest](#) made by a [private citizen](#), that is, a person who is not acting as a [sworn law-enforcement official](#).^[1] In [common law](#) jurisdictions, the practice dates back to medieval [England](#) and the [English common law](#), in which [sheriffs](#) encouraged ordinary [citizens](#) to help apprehend [law breakers](#).^[2] Anyone who makes a citizen's arrest can find themselves facing possible [lawsuits](#) or [criminal charges](#) – such as charges of [false imprisonment](#), unlawful restraint, [kidnapping](#), or wrongful arrest – if the wrong person is apprehended or a suspect's [civil rights](#) are violated.^[4] This is especially true when [police forces](#) are attempting to determine who an [aggressor](#) is. Private citizens do not enjoy the same immunity from civil liability when making arrests on other private citizens as do police officers.

The level of responsibility that a person performing a citizen's arrest may bear depends on the jurisdiction. For instance, in [France](#) and [Germany](#), a person stopping a criminal from committing a crime, including crimes against belongings, is not [criminally responsible](#) as long as the means employed are in proportion to the threat. Note, however, that in both countries, this results from a different legal norm, "aid to others in immediate danger", which is concerned with prevention, not [prosecution](#), of crimes.

In the [United States](#) a private person may [arrest](#) another without a [warrant](#), for a crime occurring in their presence. However, the crimes for which this is permitted may vary by state.^[78]

Common law

Most states have codified the common law rule that a warrantless arrest may be made by a private person for a felony, misdemeanor or "breach of peace".^[79] "Breach of peace" covers a multitude of violations in which the Supreme Court has even included a misdemeanor seatbelt violation punishable only by a fine. The term historically included theft, "[nightwalking](#)", prostitution, and playing card and dice games.^[80] Texas courts have defined and interpreted the term "breach of the peace" to mean an act that disturbs or threatens to disturb the tranquility enjoyed by the citizens.^{[81][82]}

State statutes

Consider, for an example of this codification, California Penal Code section 837:

837. A private person may arrest another:

1. For a public offense committed or attempted in his/her presence.
2. When the person arrested has committed a felony, although not in his/her presence.
3. When a felony has been in fact committed, and he or she has reasonable cause for believing the person arrested to have committed it.

"Public offense" is read similarly as breach of peace in this case and includes felonies, misdemeanors and infractions.[83][84] Note that there is generally no provision for an investigative detention by a private person under the law. With certain exceptions (see below) an arrest must be made. "Holding them until the police get there", is simply a form of arrest. The officer is accepting the arrest and processing the prisoner on behalf of the private person.[85]

In the case of felonies, a private person may make an arrest for a felony occurring outside their presence but the rule is that a felony must have, in fact, been committed. For example, consider a suspect that has been seen on surveillance video vandalizing a building to the extent that the arrestor believes it rises to a felony due to the damage. If they find the suspect and make the arrest but it later turns out that it was misdemeanor damage, the arrestor is liable for [false arrest](#) because a felony had not, in fact, been committed.[[citation needed](#)]

Because most states have codified their arrest laws, there are many variations. For example, in Pennsylvania, the courts have been clear that a non-law enforcement officer cannot make an arrest for a "summary offense".[86] In North Carolina, there is no de jure "citizens' arrest". Although it is essentially the same, North Carolina law refers to it as a "detention".[87]

Other states seem to allow only arrests in cases of felonies but court decisions have ruled more broadly. For example, in Virginia, the statute appears to only permit warrantless arrests by officers listed in the Code.[88] However Virginia courts have upheld warrantless arrests by non-law enforcement personnel for breach of the peace misdemeanors.[89] Other non-police persons are granted arrest authority by statute, in the case of those who are state certified armed security officers: "A registered armed security officer of a private security services business while at a location which the business is contracted to protect shall have the power to effect an arrest for an offense occurring (i) in his presence on such premises or (ii) in the presence of a merchant, agent, or employee of the merchant the private security business has contracted to protect" and "For the purposes of § 19.2-74, a registered armed security officer of a private security services business shall be considered an arresting officer."

Use of force

In general, a private person is justified in using non-deadly force upon another if they reasonably believe that: (1) such other person is committing a felony, or a misdemeanor amounting to a breach of the peace; and (2) the force used is necessary to prevent further commission of the offense and to apprehend the offender. The force must be reasonable under the circumstances to restrain the individual arrested. This includes the nature of the offense and the amount of force required to overcome resistance.[90][91] In at least one state, a civilian may use reasonable force, including deadly force if reasonable, to prevent an escape from a lawful citizen's arrest.[92][93]

Shopkeeper's (merchant's) privilege

In some states of the United States, the courts recognize a common law [shopkeeper's privilege](#), under which a shopkeeper is allowed to detain a suspected [shoplifter](#) on store property for a reasonable period of time, so long as the shopkeeper has cause to believe that the person detained in fact committed, or attempted to commit, theft of store property. The purpose of this detention is to recover the property and make an arrest if the merchant desires.[\[94\]](#)

Differing liability from police

Private persons are occasionally granted immunity from civil or criminal liability, like the police are, when arresting others.[\[95\]](#) While the powers to arrest are similar, police are entitled to mistake of fact in most cases, while civilians can be held to a stricter liability depending on the individual state. Police can also detain anyone upon reasonable suspicion.[\[96\]](#) However, ordinary citizens cannot claim "qualified immunity" to attempt to defend against a civil complaint for false arrest.[\[97\]](#)

To be clear, In the United States, a private person can stop or “arrest” an individual engaged in a serious crime. You can also use reasonable force to hold them until law enforcement arrives on the scene.[\[1\]](#) This is known as a “citizen's arrest.” The rules on when and how an individual may conduct a “citizen's arrest” varies from state to state. It's important to understand the laws in your region, especially since you can be prosecuted for improperly conducting a citizen's arrest. Decide if you should make a citizen's arrest, make the arrest, and avoid prosecution.

FIRST- PREPARE YOUR ARREST DOCUMENT TO HAND TO THE SUSPECT. You must write up the private citizen equivalent of an “arrest warrant” to give to the person you are arresting. This needs to be a substantial, 200+ page write up of the forensic proof you have uncovered, proving that the person has committed the crimes.

Witness the corruption crime taking place via your FBI-quality investigations. It's not a good idea to make a citizen's arrest unless you've actually seen proof the crime happening. When the police arrive, you will have to provide "probable cause" for making the arrest. This means you'll have to show that you had a reasonable belief that the person you arrested committed a crime.[\[2\]](#) Your document of your investigation proof is crucial to this end.

- For example, if you see a person use a knife to stab another person, you've seen a crime and can detain the perpetrator.

Determine whether the crime is a felony. In most states, it's legal to make a citizen's arrest when you see or have reasonable cause to believe that a person committed a felony, even if the felony was not committed in your presence.[\[3\]](#) Citizen's arrests are not usually legal when the crime committed is only a misdemeanor.[\[4\]](#) Since the definition of a felony varies slightly from state to state, it's a good idea to read up on your state's individual laws. [\[5\]](#) :

-

Find out the law in your location. In some other states, you must always see the offense take place regardless of whether the offense is a felony or misdemeanor breach of the peace. In these states the citizen's arrest statute does not allow a citizen's arrest based upon "probable cause". [\[6\]](#) [\[7\]](#)

Decide if the crime was a "breach of peace." In some cases, you may make a citizen's arrest for misdemeanors if the misdemeanor can also be considered a breach of peace.[\[8\]](#) Misdemeanors that are considered breaches of peace in some states include public brawling or public intoxication.[\[9\]](#)

- If you arrest someone for committing a crime that falls into this category, you must have seen the crime firsthand.

Decide if you can safely make a citizen's arrest. Be sure you can physically restrain the person you want to arrest before you try to. Misunderstanding your physical capabilities may put you or others in harm's way. If you make a citizen's arrest, the situation could easily escalate beyond your control.

- Remember to think hard before making a citizen's arrest, especially if the perpetrator is armed.

Be prepared to accept the consequences. Be sure you fully understand the circumstances in which you can make a citizen's arrest. You may want to research the rules specific to your state. If so, contact a lawyer through your State Bar Association or local law enforcement office.

- If it turns out you didn't have grounds to make the arrest, you could be sued for false imprisonment, assault and battery and other torts.[\[10\]](#) You may also face criminal charges. Don't make a citizen's arrest unless you're willing to face these risks.

Tell the person you're making a citizen's arrest. There are no specific words you must say, but you must make it completely clear that you are making a citizen's arrest. The person you're arresting must fully understand what's happening. Explain to the potential criminal *why* you are making a citizen's arrest. If you cannot provide him or her with this information, then you shouldn't be making the arrest.

- In some states you must communicate to the individual the specific criminal offense for which the individual is being arrested for.
- Leave it to the police to read the person his or her rights. For now, you only need to say that you're making an arrest.
- Most people say something like: ***“Eric Schmidt, you are under arrest for violation of felony corruption laws and we are remanding you to the FBI. Do not resist or we will be forced to use reasonable means to detain you. Here is the arrest document. Please stand there until transporting officers arrive.”***

Detain the person using reasonable force. You can only use the amount of force required to detain the person until the police arrive. Using a greater amount of force exposes you to legal trouble. Be careful not to harm the perpetrator unless it's absolutely necessary.[\[11\]](#)

Call and deliver the suspect to law enforcement. Call law enforcement right after the person is

detained. Some statutes in states like California and Minnesota require that a person take the arrested individual before a judge or peace officer “without unnecessary delay.”[\[12\]](#)

- But, if you try to transport a suspect on your own and you conducted an improper citizen's arrest, you may be subjected to a lawsuit for false imprisonment.
- Your intent is usually to remand the subject to the FBI. In other words: hand him over to the FBI. You should assume that the local police or sheriff will arrive on-scene before the FBI do. Have the phone number for the local FBI on you.

Ask someone to stay with you. If you can't deliver the suspect or your state doesn't need you to, ask a third party to stay with you. Wait for law enforcement to arrive. If possible, avoid watching the person you've arrested alone. Having a third party help you detain the person is best for everyone's safety.

- The third party may be helpful in making sure the encounter doesn't get violent and might be able to serve as a witness.

Explain in full detail what you uncovered via verbal notes and another copy of the arrest document that you must have with you. When law enforcement arrives, explain what you saw in full detail. Law enforcement will probably ask you to give a statement. Make sure to include everything that you saw. Explain your actions during the criminal act and the citizen's arrest. Be clear about any force you had to use to arrest the suspect.

- Depending on your state, transporting an individual away from the scene of the crime may constitute kidnapping or criminal confinement, regardless of whether you have lawful grounds for citizen's arrest.

Don't make an arrest if you didn't see proof of the crime in your investigations. While you may think you have all the evidence you need to believe someone has committed a crime, your understanding of the events may be wrong. Don't make a citizen's arrest if you overhear someone talking about robbing a bank. If you're wrong, you may be at fault. Call the police instead.[\[13\]](#) Always remember, an improper citizen's arrest can result in prosecution for crimes like kidnapping.[\[14\]](#)

- For example, just because you see a crowd of people chasing a suspect or a victim asking for help, doesn't necessarily mean you have grounds to arrest someone.

Don't arrest someone you believe is about to commit a crime. The crime must have already happened in order for you to legally make an arrest. Don't arrest someone if the crime hasn't yet been committed. Call the police instead.[\[15\]](#)

Don't use excessive force. Even the police are not allowed to use excessive force when taking a suspect into custody, so you, as a private citizen, should be especially careful about this. Otherwise, you may be charged with battery, even if the suspect you apprehend is guilty of a crime. The use of deadly force is usually not allowed unless the perpetrator is attacking you or someone else.[\[16\]](#)

- Don't use a weapon against the perpetrator when you can use your own strength.[\[17\]](#) For example, you can tackle someone to the ground rather than hitting him or her. For example, Eric Schmidt is kind of a pussy and he will whine like a bitch even if he just breaks a fingernail. **Don't use a choke-hold to the state of a black-out or he could die and cause you massive amounts of extra paperwork.**

Don't make a citizen's arrest if the FBI tells you not to after you meet with them.[\[18\]](#) As a private citizen, it's not your job to make arrests. If it is at all possible, you should always leave policing to those who have a legal authority to do so--the police. Otherwise, your actions might put you, the alleged perpetrator and the general public, at risk.

- Your actions may also be viewed as vigilantism, which is not legally protected action if you step beyond the authority explicitly granted to citizens by the law.
- If a crooked U.S. Senator or a corrupt White House executive has pressured the FBI to not arrest an Elon Musk or a Larry Page or A Mark Zuckerberg because they pay bribes then it is your duty to arrest the crook.

Keep the detained suspect safe. Once you have detained someone, you are responsible for what happens to the person while he or she is under your control. Make sure they are not in the road, where they could be hit by a car, and make sure they are protected from onlookers who might try to attack them.

Yes, you can arrest a police officer but only if you see them commit a crime. Most officers that are arrested are arrested for police brutality. If the police officer then resists, arrests you, or tries to detain you, let them know that they are breaking the law, and say this loud and clearly. If you are arrested do not resist, if you do not resist you have the chance to press a law suit against the officer, which will result in the police office being charged for: the original crime, resisting arrest, using excessive force and illegal detainment.

[Be confident.](#) Showing the suspect that you don't know what you're doing will make them more likely to leave the scene of the crime.

- When dealing with potential criminals, it's better to be on the side of caution and leave the crime control to trained professionals.
- Be as observant as possible. Even if you aren't able to keep the suspect at the scene, you can act as witness and identify the suspect later.
- Be Calm, Careful, Aware, Professional, Respectful & Thorough.
- Safety is the priority. Ask other bystanders to help if you feel the suspect will try to harm someone.
- Have, at least, two people filming the entire arrest for your records.

- The arresting document you give to the suspect, at the time of the arrest, should intimately detail their crime and be ready to stand as evidence in federal court. The good arresting document has, at least, 200 pages of forensic details and has been reviewed by your lawyer.

THE EXAMPLE CASE

CRIMINAL COMPLAINT - DEMAND FOR DAMAGES - DEMAND FOR AN END TO THE COVER-UP

- A PUBLIC REPORT ON THE ROOTS OF MODERN CORRUPTION IN AMERICA -

=====

Note: We filed criminal complaints about these crimes, and about our damages, with every applicable city, state and federal law enforcement and regulatory office, every inspector general and every jurisdictional politician. We now find out that many of them were profiteering in these crimes and owned the stock of the criminals involved. So now, any party who does not help us, who runs cover-ups, who attacks us in reprisal for reporting their crimes and who engages in these crimes is being investigated (using FBI-quality resources), [doxed](#), prosecuted, fired and addressed using the furthest legal means of the courts, the media and crowd-sourced forensics! We have FBI-quality forensic proof of everything on this page. If you have forensic FBI-quality proof that something on here is not true, show us (We can meet you, with the FBI staff, at the conference room at 450 Golden Gate Ave on the 13th Floor in San Francisco and go over the **HARD FACTS**) and we will remove any information proven to be in error. This is a report to the FBI, FTC, Congress and the American Public to demand an end to this **COVER-UP!** - Revision #69

=====

WHO:

Defendants are a [RICO law](#) and [anti-trust law violating Cartel](#) including White House executives, The Department of Energy, Corrupt Senators [who got tech stocks as bribe payments](#) and their Silicon Valley oligarch financiers.

WHAT:

Defendants defrauded the victims out of millions of dollars via their crony-corruption, insider-trading, stock market scams and then ordered attacks on the victims when the victims told the FBI, Congress and FTC about the crimes. Defendants refuse to allow a jury trial, they have blockaded legal rights, they run reprisal attacks using government agencies and taxpayer resources and refuse to pay earned benefits and compensation in vendetta for getting their corruption exposed.

WHEN:

From 2005 up to today.

WHERE:

In California, Washington DC and across the nation

DEMAND:

Victims demand Government-provided legal counsel, a jury trial and compensation for damages, expenses, back-salaries and monies owed. To be paid by the Defendants.

=====

OVERVIEW 1:

This is about powerful and greedy people abusing the public system in order *to manipulate TRILLIONS of government treasury and stock market dollars* into their own pockets. They lie, cheat, bribe, steal, attack, and even kill, in order to grab this money (provided from the pockets of the taxpayers). They create fake "*political issues*" in order to steer massive amounts of government money to "*solutions*" that they just happen to own the companies of. ("Follow the Money") They collude on cover-ups, cover-stories, pump-and-dumps, fake "*Stimulus Funds*" redirection and other illicit deeds. Famous politicians are a very big part of this crime. They are easy to spot via the tens of millions of dollars, in their personal bank accounts, which only appeared after they took office. They broke and separated America by promoting their fake causes, which divide the public, in order to benefit off of their exclusive stock market scams. In fact, if the, completely computer manipulated, stock market did not exist, political corruption in America would be reduced by 95%.

One part of them is: *The Silicon Valley Tech Cartel*; an anti-trust violating organized-crime operation based on quid-pro-quo. *They manipulated the Dept of Energy* to only fund political favorites and to sabotage the competitors of those favorites in an epic violation of anti-trust and anti-racketeering laws.

READ THE BOOK:

<http://american-corruption.com/public/HOW THEY KILLED THE ELECTRIC CAR.pdf>

OR AT: <http://how-they-killed-the-electric-car.com>

Dept of Energy staff own the stock of Tesla and Solyndra - they work, in total conflict-of-interest, as slush-fund bankers for crony insiders! Steven Chu and his agency cronies defrauded all of the non-crony applicants out of their life savings and now they are getting doxed, investigated and sued forever

as punishment for their corruption! the crooked senators behind this got tens of millions of dollars of dirty profits from it while their constituents got defrauded!

We are seeking compensation from the perpetrators of these financial crimes and attacks that harmed us. Victims have already gotten over 150 of them fired from their government jobs and directly sued some of them for corruption! The longer this goes unresolved: the more lawsuits and political [embarrassments](#) these crooks can count on!

Says one victim group: " If you add up all the money the Department of Energy has spent on our FOIA's, lawsuits and federal investigations since 2008 you can see that the Department of Energy has now spent more money fighting with us than the amount they would have spent simply settling with us and paying our damages. You can see in the last lawsuit we got free White House and Congressional lawyers. Lawyers love to beat up DOE for corruption for free. All those lawyers are now looking for something to do. We can keep doing this for another hundred years and embarrass every politician and their financiers forever. The Department of Energy could do the federal budget, the tax-paying public, the Court system, Justice and themselves a HUGE favor by simply paying us our damages and being done with it. We have been blockaded from getting our legal rights, from getting fair legal representation and from getting a jury trial because they know, in a fair un-rigged jury trial, we will win and they will be shamed and forced to pay up!"

A large part of the crimes involved trillions of dollars of payola involving rare earth mining schemes for minerals for cell phone and electric car components:

WITNESS STATEMENT 1:

"... this is about corruption that we experienced. it involves trillions of dollars of government monies! famous politicians partnered with [corrupt crony-capitalist Silicon Valley bully tech oligarchs](#) to do these felony dark-money crimes! if you hate injustice, [collusion](#), [monopolistic bullies](#) and bribes then you will love this case! it is widely documented that famous politicians including Dianne Feinstein, Barack Obama, John Podesta, Nancy Pelosi and many others hire media assassins and attack operatives to [covertly destroy](#) those they do not like or those who compete with their stock market ownership. we caught the people they hired to attack us! note that in the last 2 stimulus bills, [tens of billions of dollars, in California, disappeared](#) in fraud matters connected to politicians. the facts presented here are from [police and court records](#), congressional investigations and eye-witness reports..."

WITNESS STATEMENT 2:

"...State sponsored hacking teams from Russia, China and Iran, (Ie: Solarwinds, Supernova, Spectre, and hundreds of other hacks) along with thousands of bored teenagers have stolen all of the CIA, NSA and Fire Eye hacking tools and [hacked 20 years of the bad guys emails, files, text messages and voicemails and sent them to the press, public-interest groups and the enemies of these oligarchs](#). Corruption has no place to hide now. All of the [dirty secrets](#) of their [crimes](#), bribes and quid-pro-quo are on the table and no oligarch or crooked politician will ever be safe again! On top of the hacks and leaks, we have supported new open-source artificial-intelligence based software which operates autonomously (around-the-clock) tracking the covert cash of every politician, their family, and their tech oligarch bosses. When you follow the money with these bot programs the proof of the bribes and payola is crystal clear! These crooks all use the same group o: 1.) dirty law firms like Wilson Sonsini, Perkins Coie, etc.; 2.) corrupt CPA's like Deloitte, etc., 3.) Goldman Sachs investment bankers, 4.) bribery-based lobbyists and Media Matters/ David Plouffe-like attack operatives. [See how we are taking these crooks down AT THIS LINK](#). For example, hired attackers: Nicholas Guido Denton, Ian Fette, Gabby Darbyshire, John Herman, Adrian Covert, John Cook and Patrick George have been placed under permanent surveillance by our private investigators and federal agents for the rest of their lives, along with their families. Any crimes, tax evasions, drug deals, [sex trafficking](#), money-laundering, political manipulations, stock market holdings, revolving-door job bribes, exchange of

bribes and payola with Google and Youtube (we have the bank records) for search rigging, INTERPOL investigated cross-border transfers between the US and Eastern Europe or other additional illicit deeds they engage in, will be uncovered and reported...forever!..."

=====

COUNTER-MEASURES BEING TAKEN AGAINST THE PERPETRATORS:

How YOU can use the public "Corruption Kill Box" to wipe out crooked politicians and their financiers: A Corruption Kill Box Procedure combines federal police investigations created by formal filed criminal referrals and Form 302 overview drafts, public class-action lawsuits, massive news media disclosure blasts, formal regulatory agency complaint filings, individual lawsuits against political and agency executives, documentary film production and distribution, the promotion and organization of Congressional hearings, crowd-sourced social media public forensics and open-source AI financial crimes tracking software. The procedure is an extinction-level event with a 100% success rate against corrupt entities. CKB's only work on the corrupt, so non corrupt parties are safe from its effects. ANY member of the public can engage in these totally legal anti-corruption actions. Just do it! - <http://www.the-truth-about-the-dept-of-energy.com>

=====

WITNESS STATEMENT 3:

*"...how corrupt are our political representatives? "we have not been able to find a single one of our political representatives who was not working for, paid by, sleeping with and/or profiteering off of the stocks and mutual funds of our competitors that attacked us! two of our senators were even caught financing some of the attacks!... For example, in California, they have been trying to figure out how tens of billions of dollars for Covid Loans, and also for housing projects, has gone missing. A series of recent audits has found that the much of the money was stolen and hidden by a system of duplicitous, on-purpose mismanagement designed to hide the thefts by saying that 'California politicians are too disorganized to manage anything'. In reality, the embezzlement of the federal funds are **carefully** organized by State officials (who live in multiple MANSIONS and have parties at fancy restaurants constantly) who are expert at theft and cover-ups..."*

=====

VICTIM REPORT #142:

An Actual Example Of A State-Sponsored Vendetta Attack:

In the case of one victim of this corruption, let's call him "Applicant A", the dirty deeds of public officials are illuminated in all of their darkest forms. He saw, first-hand, how modern politics turns public servants into criminal mobsters. Here is what was in his FBI report:

In college, "Applicant A" was a criminology student on the multi-campus "Core Curriculum" which was offered through Stanford, SFSU and Berkeley campuses. He lived in San Francisco, with a woman who was the best friend of Kathryn Feinstein, daughter of the future mayor of San Francisco. The woman's mother, in fact, worked for Dianne Feinstein. Kathryn Feinstein often stayed at "Applicant A"'s home and partied there in the hot tub in the back yard and in the downstairs living room. There she told tales and gossip about the deep inside scoop on San Francisco politics. This led to "Applicant A"'s recording and production of an award-winning investigative film series about the characters in San Francisco politics.

Mayor George Moscone was then assassinated one day while "Applicant A" was on his way to City Hall for a meeting at the Mayor's office. This assassination made Diane Feinstein the Mayor of San Francisco and, later, a U.S. Senator.

As further proof of the connection, Mayor Feinstein issued a large published City Hall proclamation to "Applicant A" for his work on a major project for the City of San Francisco, a tribute to George Moscone, viewed by millions of citizens and also had "Applicant A" produce many socialite events at City Hall for, and with, the Mayor's friend Charlotte Maillard.

"Applicant A" knew hundreds of top political officials, dated top officials from the White House or Congress and was constantly being solicited to run for office.

"Applicant A" was one of two producer's creating a major event for The City but a rift developed between "Applicant A" and another group. The opposing group (Comprised of competitors to "Applicant A") were being accused of embezzling civic funds. That other group was headed by two personal friends of Diane Feinstein's. The failures of the opposition group became national news as it was also backed by David Rockefeller's money man, who also financed Diane Feinstein.

At this time "Applicant A", had numerous law enforcement and intelligence credentials, commendations and certifications and was approached to assist with a sting operation involving some of those officials. The sting operation required that "Applicant A" run for a major office in San Francisco because only a major candidate could have access to the proper people, information and proximity needed for such an operation. Department of Justice, FBI, California Fair Political Practices Commission and other entities had an interest in these task force-type efforts. The combined efforts resulted in one famous City Hall official being arrested for running an underage prostitution ring for San Francisco public officials, co-managed by a SFPD official, and another candidate for mayor, associated with the old school North Beach mob, being run out of politics and having his young daughter removed by the police to protect her from attempted abuse. Both of the indicted officials had close relationships with Diane Feinstein.

"Applicant A" ran the opening ceremonies of one of David Rockefeller's big projects in San Francisco which Rockefeller, Feinstein and James Bronkema were key players in. James Bronkema, The head of the City business council, had his mistress intermediate a potential "peace treaty" between "Applicant A" and his Cartel. He later sought to invite "Applicant A" into the Bay Area political Cartel he ran and disclosed the insider scheme to "Applicant A", hoping to entice him. Bay Area VC Tom Perkins also made "Applicant A" this offer and confirmed the existence, operation and scope of this Cartel which included famous politicians.

Subsequently, the Feinstein family became the investors, government financial agent, contractors, HR providers, staffing liaison, and friends for Elon Musk and managed the State and Federal gifts of billions of dollars of tax payer funds to Musk, which the Feinstein family profited from.

At the same time, "Applicant A" was operating a U.S. Government funded electric vehicle manufacturing company and an energy production company that competed with Elon Musk's companies. "Applicant A" contacted the Fremont, California NUMMI plant which Elon Musk had publicly stated he "had no use for NUMMI". "Applicant A" had been in negotiations and had arranged the first request to re-task NUMMI. A major Washington DC consulting group and CBS News 60 Minutes Producer: Bob Simon, then had communications with Diane Feinstein's Chief of Staff who threatened "Applicant A" against having anything to do with the NUMMI plant. Subsequently Elon Musk announced he had stepped back in and was taking over the NUMMI plant in a surprise announcement MC'd, in person by Diane Feinstein, whose family was managing the leasing, hiring and contracting for the NUMMI and next door Solyndra buildings.

It turned out that a large rare earth minerals mining scam was underway to manipulate TRILLIONS of dollars of corrupt mining profits and federal tax dollars and that "Applicant A"'s federally funded technology obsoleted that plan.

Just after Russia evacuated Afghanistan, a particular set of Russian geological survey reports called:

“The Afghan Metals Treasure Maps” were found by CIA researchers in Kabul. They were said to show where many trillions of dollars worth of copper, lithium, indium and other “rare earth” technology minerals were hidden in the Afghan plains.

That lithium and indium could power Elon Musk’s cars and Solyndra, Fisker’s, Abound’s Cleantech (if only a certain group of Silicon Valley billionaires had a way to monopolize that...hmmmm?) But; were those “Treasure Maps” a trick or a treat?

To this day, controversy exists across the intelligence communities, of many nations, about whether, or not, those maps were a scam created to “trick the American’s” or the actual locations of trillions of dollars of mining deals that were “antibody's for the taking”. The papers that the CIA geologists pulled out of that archival library in Kabul, Afghanistan still read to be a bit too convenient for what happened next. Decades later, after an invasion or two, and vast expenditures of cash, political capitol and lives, very little of the promised golden mining treasure has materialized. What has materialized is epic corruption, political payola, campaign secrets, [deaths](#) and controversy.

Goldman Sachs, McKinsey Consulting and Deloitte helped a few rogue CIA buddies distribute a huge number of white papers and press releases which used the buzz words: “Trillions of dollars of lithium in Afghanistan” and “Afghanistan is the Saudi Arabia of Lithium”. Why would those particular companies put so much effort into hyping a pile of dirt on the other side of the planet? Because their investors (John Doerr, Elon Musk, Eric Schmidt, Larry Page, Steve Westly, etc.) had a quid pro quo deal with some members of The White House.

"Applicant A" had received a Congressional commendation, federal funding under contract to The Department of Energy and famous seminal patent awards for his work in the electric vehicle technologies; now used in the Honda, Toyota and Hyundai cars.

Subsequently, the FBI discovered (confirmed via a declassified congressional report) that Daniel Jones, a former intelligence committee staffer for Sen. Dianne Feinstein, hired Fusion GPS and Christopher Steele to push the Russian story and used Fusion GPS, and other services to put hit-jobs on people for Feinstein. Additionally, the FBI discovered that high level Chinese spies worked for Feinstein, including driving her around and that her husband's partner: Mart Bailey, was in China setting up deals that the CIA was concerned about. Fusion GPS, Media Matters, Gawker Media, Gizmodo Media Google and Youtube were subsequently found to have been hired by “a famous politician” to operate over \$30M of character assassination reprisal media defamation attacks against "Applicant A" to punish him for helping law enforcement in these cases. It is well known that Feinstein, Pelosi, Harris, Reid and other Senators commonly use intelligence agency resources and

“dirty tricks” to attack citizens they are mad at.

"Applicant A" and his co-workers were cooperating with agency investigations at this time. In order to discourage, threaten and intimidate “Applicant A”, he and his peers were attacked with the aforementioned \$30M state-sponsored reprisal attack which included the following attack tactics:

- 1.) **Defrauding Applicants via fake government requests to invest in rigged government contracts;**
- 2.) **Placing moles and spying inside Applicant’s companies;**
- 3.) **Blockading legal counsel for plaintiffs;**
- 4.) **Character assassination and sophisticated contracted defamation media attacks;**
- 5.) **Offshore factory processed social media attacks;**
- 6.) **Government benefits from SSA, HUD, etc, blockades and manipulations;**
- 7.) **Jobs and venture capital funding blacklisting;**
- 8.) **FOIA obfuscation for official government FOIA filings;**
- 9.) **Arbitrary government deadline manipulation for SSA, DOE, HUD and other applications;**
- 10.) **Creation of endless fake hurdles in agency applications (ie: DOE) to protect rigged "winners";**
- 11.) **Toxic workplace poisonings like the Salisbury, Nalvany, Litvinenko poisonings;**
- 12.) **Workplace sabotage and obstruction of Applicant’s companies;**
- 13.) **Media defamation attacks via gawker, Gizmodo, Jalopnik, Google, Youtube, etc.;**
- 14.) **Commercial employment database "lois lerner-ing" and red-flagging;**
- 15.) **Murders of peers (ie: Rajeev Motwani, Seth Rich, Gary D. Conley and 120+ others);**
- 16.) **Revenue blockades and internet income re-direction;**

- 17.) **Troll farm attack teams hired from Chinese attack farms;**
 - 18.) **Fusion GPS, Media Matters, David Plouffe attack contracts issued targeting whistle-blowers;**
 - 19.) **Manual search engine lock-in attacks on Google, YouTube, LinkedIn;**
 - 20.) **U.S. patent office manipulation to blockade revenue;**
 - 21.) **Honey-traps sent out targeting the whistle-blowers;**
 - 22.) **Fake news tabloid empires created just for defamation attacks;**
 - 23.) **Housing access and financing blockades created to reprisal harass whistle-blowers;**
 - 24.) **Ongoing hacking of plaintiffs devices;**
 - 25.) **Tech industry black-list coordination within the National Venture Capital Association;**
 - 26.) **HUD and USDA mortgage rights blockades;**
 - 27.) **DNS and IP routing manipulation to prevent victims from selling anything online;**
 - 28.) **Digital attacks designed to put horrific fake news about target in front of 7.5 billion people...**
- and more spy agency type "dirty tricks" that cost the victims their lives, life savings, income and other disabling losses...**

The Department Of Energy (DOE) acts under White House orders to only give money to White House political financiers and sabotage the competitors of those political insiders. DOE says they don't do what David Axelrod, Rahm Emanuel, or the latest Oval Office lackey, tells them to do, but by now everyone knows that assertion is a complete and total lie!

Some of the people that laid siege to Congress at the start of 2021 believed they were "doing the right thing", others thought they were insane. Department of Energy staff are just as 'insane' in that they are hired to lie, cheat and manipulate funding in order to help their political favorites and harm the competitors to those 'favorites' who they perceive as political 'enemies'. Department of Energy staff are as devoted to cronyism as an ISIS attacker is to sawing off someone's head with his knife. Neither of them perceive themselves as "crazy zealots", both groups think they are 'doing the right thing', but those on the outside can see the truth.

When an Applicant for government funding receives a letter simply stating that their loan application

under the Advanced Technology Vehicles Manufacturing (ATVM), LGP, Battery funds, etc. or other Program, has been rejected it is because the Applicant did not bribe the right people. Bright Automotive famously published a national letter about how the Dept of Energy had lied to them. XP sued the Dept of Energy for corruption and won. Congress has held ongoing hearings about the corruption and payola at the Department of Energy.

No logical reasons are ever given in the DOE letters and only after several attempts at phoning the Department of Energy office can you ever get the so-called “reasons” orally. You may never receive the reasons in writing. Over a hundred Applicants like Bright, Zap, Brammo, EcoMotors, XP Vehicles, Elio, Lordstown and others have been lied to, led down the garden path, stone-walled, delayed and sabotaged in order to protect political insiders Tesla, Solyndra, Abound, Brightsource and other White House financiers.

One could understand a rejection if the reasons given were applicable to an Applicants actual loan application. However, in each case, they were not. Many reasons did not even reflect what was included in the Applicants submissions if the Applicant was a competitor to Elon Musk. Department of Energy staff simply made up data that was not even submitted in order to help Tesla and harm Bright Automotive, for example. In many cases a rejected electric car Applicant was told that their car “did not use enough gasoline” or that their windmill project used “too much sun”... or similar nonsense.

All of Steven Chu’s Department of Energy staff were friends of, investors in, or associates of Elon Musk’s Cartel. They stayed on, many of them even still in place in 2021, waiting for Jennifer Granholm to get in and start the old Chu regime back up to hand out cash to the insiders from the Silicon Valley Mafia. In each case, after several attempts at receiving more clarification from the Dept of Energy and ATVM offices, no one from DOE has been in further contact with any outsider Applicant . For years, each Applicant is still requesting additional information about their loan applications and more applicable reasons for rejections.

Most of the competitors to Elon Musk, had cars that could go further than a Tesla, cost up to 80% less than a Tesla, used no gasoline, were easier to repair and build than a Tesla, saved your life better than a Tesla in a crash, didn’t blow up like a Tesla, did not get hacked as easy as a Tesla, were faster on torque-factors than a Tesla, were not about to go bankrupt like Elon Musk was at the time, did not require an extension cord to trip over like Tesla does, did not rely on foreign labor like Tesla did, did not have the horrific debt ratio that Tesla had, did not cause genocide and rape around the globe in corrupt lithium and cobalt child labor camps like Elon Musk did and, generally had every advantage over Tesla except: 1.) the Elon Musk partnership that Musk had with Dianne Feinstein’s family and the 2.) conduit of cash between Musk and political candidates.

Most of the other Applicant's had thousands of customers lined up who wanted to buy their unique and very “green” cars. The public were eager to buy their products but those products were better and more competitive than Elon Musk’s. If you line up every Applicants merits in a spreadsheet, the “DOE

winners” would lose. The metrics were ignored or rigged in order to favor Tesla and Solyndra and harm outsiders who competed with them.

One of the rejection reasons that DOE gave an Applicant was that their car “did not use E85 gasoline”. It was an ELECTRIC CAR which uses NO gasoline which one would think that an Obama Administration had as a goal our country should want to attain. Crony insiders Tesla Motors and Fisker also used no gasoline and they were handed the DOE funds with almost no scrutiny. At no point was E85 gasoline ever mentioned, discussed, commented on or requested by DOE. In fact the topic was particularly avoided by DOE staff.

Another reason an Applicant (XP Vehicles) was given was that that “they were not planning on making millions of cars.” Any intelligent auto industry expert knows you have to ramp up production from a few thousand cars in order to get to a few million cars. The Department of Energy was not offering enough money to start making millions of cars right out of the gate. No car company EVER FUNDED by the Dept of Energy, to this day, has ever been capable of making millions of cars from the get go. In fact, XP, who proposed 50,000 vehicles, turned out to be EXACTLY correct based on industry history. Dept of Energy reviewers turned out to be EXACTLY wrong on their comments...or they were making things up to protect Musk. The rejection point was that Applicants were not planning to make enough cars. This was a false statement by DOE. The company would like to build and sell more cars than any other car company. They were fully willing to produce millions of vehicles if provided with the appropriate funding as they quantified millions of fleet buyers for its vehicles. No DOE entity ever asked them to adjust, discuss or amend their numbers. They were more than willing to adjust those numbers if anyone had even bothered to ask. One must start out with small steps and were planned to ramp up to a massive number over time. To suggest that one do otherwise would demonstrate questionable judgment by DOE reviewers. The validity of this comment was based on either lies or manipulated interpretations by DOE staff designed to harm Applicant ratings over Musk.

Applicant XP, whose business plan was based on selling vehicles to the government was told they were rejected by DOE because they were “... not planning to sell cars to the government”. That determination was 100% false. It was a bald faced lie by Department of Energy staff. It was clearly stated in XP’s application that the core sales plan of the company is based on government fleet sales. The Dept of Defense wanted a particular light-weight version of the XP car for air-dropped rescues. One cannot help but wonder if DOE even read the applications or just rubber-stamped all non-crony applications as “rejected”.

In another example of a failure to read the applications, The Dept of Energy asserted that factory cost estimates were too low because “the metal body fabrication systems” were not calculated high enough. The Applicant did not use much metal fabrication in its bodies, which Dept of Energy staff would have known if they had even read the first page of the application.

Banks and every other business lender takes a few weeks to decide on business funding. The Dept of

Energy stonewalled Applicants for YEARS and received numerous write-ups from the GAO as one of the most screwed up organizations in Washington DC.

DOE reviewers never even talked to the founders, inventor, engineers, project leads or primary contractors from non crony Applicants. Outsider Applicants were even told, over and over again, that everything in their application was good and that no additional information was needed. This is despite the fact that the reasons given for outsider rejections did not reflect the technology being used and therefore the ATVM reviewers did not understand our concept and product. Tesla Motors received over 100 hours of staff meetings and attention to guide them through the DOE. Non-crony Applicant"s got zero help.

It was discovered that McKinsey Consulting was hired to write all of the global white-papers designed to promote the Cleantech investors stock market holdings. They were also hired to staff the Department of Energy entirely with Elon Musk's and Solyndra's friends. They were also the lobbying consultants to Google, Facebook and the Silicon Valley Cartel.

After nearly a year of waiting, accompanied by written, verbal and in-person DOE proclamations that "everything was fine", "everything is on-track", "you appear to meet every criteria", etc. and after staff expended the majority of their personal funds based on these positive assertions, the applications were suddenly and mysteriously rejected. Why was staff at DOE during the course of the year, positive about the outcome and never asked for additional information? It was because they all knew, from December 2008 forward, that only those friends on a secret insiders list were ever going to be approved. Every other "Applicant A" was being defrauded and used as a smoke screen to make it look like things were "in process". Applicant"s were promised, assured and relied on "things are looking good" statements from Dept of Energy staff who were lying. Dept of Energy staff knew from December of 2008 that the money was hard-wired for Tesla and a couple of others.

At the start of the DOE application process DOE's Lachlan Seward, Matt Rogers, Steven Chu, Kathy Zoi, Carol Battershal, and ALL of the senior DOE staff told each Applicant that the review would "be very interactive"... but there was no interaction for non-crony outsiders while Elon Musk and Solyndra folks, who applied later, were reviewed earlier, had hundreds of hours of in-person hand-holding interaction with DOE and had already been awarded their funds. No outsiders got any of this help or "interaction".

Rejection comments supplied by Chris Foster of DOE seemed to be unrelated to the business of each rejected company and had no foundation in fact. It was as if Dept of Energy staff would make anything up to keep competitors against Silicon Valley political campaign financiers from getting to market.

Rejected Applicants provided \$100 million+ of asset collateral opportunity for only a \$40M loan. To repeat, non-crony "Applicant A"s provided over TWICE the collateral of the value of the loan. How is this not as secure of a structure as any of the other Applicants. Elon Musk did not have any collateral

like this!

Tesla was in such bad trouble that they had to borrow money from the Middle East and Detroit in order to temporarily cook their books so that DOE could release their cash. In reality, Tesla is a book-cooking stock market valuation manipulation operation and not a car company, as such.

The Department of Energy determined that three of the Applicant's were "most likely" to obsolete and put Elon Musk's company out of business because they beat the competitive metrics factors for price, range, safety, cost-to-produce...literally, THEY BEAT MUSK ON EVERYTHING! Department of Energy staff are beholden to Elon Musk and HIS political financiers so they could not let any competitors into the market. The Department of Energy is the gate-keeper of who gets to exist in the American auto industry according to Elon Musk's own marketing director: Daryl Sirry. No American bank or VC will finance a car company without DOE insider say-so. The Department of Energy blockades funding for those who directly might compete with Elon Musk because they get paid by Elon Musk and his financiers with stock, jobs, perks, political appointments, etc.

DOE top staff told Applicants that if they paid \$50,000.00 then they could get a full review. One Applicant got investors to fund the \$50K fee. The investors agreed if a DOE staffer would tell them once on the phone or email that that was the case. The (lying bastard) DOE staffer (Foster) refused to come to the phone or reply to any fedex or email until an hour after the deadline to wire the fee, even though he was recorded in his office, hiding from the calls. The staffer then sent an email saying "you missed the deadline to pay the fee, you are rejected", even though he had organized the missing of the fee by refusing any communication that he promised, in writing, to have with the investors who were to pay the fee. Elon Musk did not have to pay the fee until much later after Tesla got caught not paying the fee.

The state is wielding extraordinary power these days — power to close businesses, to directly impact people's livelihoods and even lives — and so it owes it to the public to disclose how and why it makes those decisions that appear to only benefits campaign financiers and insiders. Hiding the identities and processes of the Department of Energy reviewers is a criminal act.

This secrecy is exactly the wrong approach here and will only breed further mistrust, confusion and contempt for the crucial role of government in bringing alternative energy vehicles to market.

Dept of Energy reviewers told non-crony Applicants that "electric motors and batteries were considered" by the DOE reviewers to be "too futuristic of a technology and not developed for commercial use even though they have been in use in over 40 industries for over 20 years, including by NASA. By the way, Tesla, Nissan and Fisker used the same exact electric motors. What was the rationale for this DOE argument aside from cronyism? In the case of XP, every part of the XP car was to be purchased from existing commercial sources with multiple points of supply, so it is not possible to see how a reviewer might think the vehicle had any significant technical acquisition hurdles. Over 100

major supplier companies, that have been building parts for the auto, aerospace and industry for decades) were to deliver the component parts for XP Vehicles. The U.S. Congress said that the primary purpose of this loan program was to develop advanced technology and further reduce U.S. dependence on gasoline. The non crony car "Applicant A"s used no gasoline and got over 125 miles per battery charge. How is the DOE claim that electric cars are not compliant not in direct conflict with the precepts of the Section 136 law?

DOE staff would constantly “Lois Lerner” (or lose) non-crony Applicants paperwork. A DOE staffer named Brent even revealed that Lachlan Seward had ordered some documents shredded for cover-up purposes. Congressional investigations have documented hundreds of such corruption actions at DOE.

So... we thought: “How could the U.S. Government engage in such insane criminal bull shit?”

So, we legally acquired the public Office Of Personnel Management records, social media postings, LinkedIn records, FOIA revelations, voting and contribution records of every Department of Energy contractor and employee who had even the most remote contact with the funding process, from 2008 forward...and LOOKIE, LOOKIE! We have not been able to find a single one of them who was not financially involved with the handful of people who got they Dept of Energy funds. They were the most insider-trading, conflict-of-interest based, sleeping-with-the-recipient bunch of crooks and liars you could ever find. Why is the Dept of Energy allowed to hire only their friends and insider trading associates? Why is every office at DOE not required to have a 50/50 staff mix? The deciders and lobbyists are connected by [sexual culture and greed](#) and defrauded each of the non-crony people who they induced to apply. The Department of Energy knew from Dec. 1, 2008 that nobody was ever going to get Dept of Energy funding except the previously hard-wired crony insiders. Each "Applicant A" who was not an insider lost millions of dollars and years of their lives because of the lies of the U.S. Department of Energy. The Department of Energy has never apologized or paid their bills for the damages!

"Applicant A", at this time, discovered that he had been exposed to toxic materials, possibly intentionally as “political poisoning” (ie: The Salisbury Poisonings and the Alexander Litvinenko poisoning), as a reprisal tactic, from his work with the Department of Energy and Kaiser laboratories. "Applicant A" filed for his benefit rights,, which he had full credits for, but political officials from Senate offices ordered those funds frozen and used intelligence agency dirty tricks to manipulate and alter government records. The “Solarwinds”, “Supernova”, “Spectre” and hundreds of other hacks show that the very servers that "Applicant A"’s records were on were, in fact, penetrated.

Agency staffers manipulated Applicant’s filed benefits applications with SSA, HUD and other agencies, in order to cut off their funds in reprisal for assistance in corruption investigations.

Congressional officials then assisted some of the whistle-blowers and their peers with a first-ever federal anti-corruption lawsuit. This case set many new legal precedents. The victims team won the

lawsuit proving that government agencies “infected by corruption” had manipulated, blockaded and stone-walled the Applicant's government funding.

These citizens instigated Congressional corruption investigations and hearings against the most senior members of the State and Federal government. These actions resulted in the termination of very famous public officials and their crony criminal embezzlement scams and almost resulted in the President being forced to leave office, mid-term, based on revelations of a massive crony kick-back scheme which began to be exposed after the FBI raid of Solyndra. The director of the FBI was fired for assisting in cover-ups related to this matter.

It was revealed that White House executives ordered government agencies to harm members of the public and to reprisal with-hold public resources from the public. This was a violation of tort, RICO and anti-trust laws.

The victims fought back.

They used 100% legal tools to interdict the corruption.

First, with a unique new kind of pioneering federal lawsuit, victims established — FOR THE FIRST TIME IN LEGAL HISTORY — that political cronyism is a valid basis for a claim of arbitrary-and-capricious agency action under the Administrative Procedure Act. See: Federal Case One, (D.D.C. 2015).

Second, they prevailed in the United States Court of Appeals for the District of Columbia Circuit on their appeal of the district court's ruling that an agency may escape judicial review of its action by requesting a voluntary remand but refusing to reconsider its initial denial of an application. See: Case Federal Two, (D.C. Cir. 2017). The Washington DC Circuit agreed with the victims that an agency may only seek a remand if it promises to reconsider its initial decision. It is because of that victory that the government, under court order is now re-doing the victims applications and GAO, FBI, IG's and Congressional oversight offices are watching to assure effective ethics and transparency.

Third, these cases placed, on permanent public record, one of the most detailed documentation sets, ever assembled, about how modern political "Dark Money" conduits operate. The legal team hired ex-FBI, CIA and SEC experts to track down covert bank accounts, revolving door bribes, insider stock trades and other payola between the victim's competitors and public officials. This documentation now prevents the use of those kinds of criminal efforts, in the future, by exposing their tactics to the public.

Fourth, the victim's team engaged in the interdiction and termination of corrupt agency executives, contractors and their financiers. This included some of the most well-known names in Washington, DC, at the time. Many of them were, and are still being, investigated and surveilled by the FBI, GAO, SEC and Congress.

Fifth, and most important, the effort put every corrupt political scheme on notice that they WILL be found out and interdicted!

The bottom line? The victims group WON on every single aspect of their public-interest goals but still have yet to be recompensed for their damages!

Now the "bad guys" have less options to engage in the corruption of our Democracy!

Not only did the Department of Energy engage in reprisal attacks. SSA staff and officials from the SSA have been shown to have run political reprisals on "Applicant A". History has shown that some Bay Area SSA staff since 2007 have gone on to work for politicians in dispute with "Applicant A" or for ANTIFA-like political activism groups that advocate attacks. SSA has been forced to remove at least four officials from their SSA jobs and more are under investigation. Dianne Feinstein, Nancy Pelosi, Kamala Harris, Harry Reid and other Senators have the staff and power to manipulate any SSA, HUD, CMA, DOE and other agency decisions, files, results and benefits against any citizen they are pissed of at. All of those Senators own the stock market assets of all of the competitors to "Applicant A" and have the owners of those competing companies over to parties and home dinners on a regular basis.

Nearly a thousand public officials including White House, FBI (and other agency most senior officials) have been removed from their jobs for using the government for revenge, reprisal, retaliation actions against those they competed with. The published facts, Congressional reports, Inspector General investigations and testimony prove that government officials attack citizens on a regular basis.

In the event of "Applicant A"'s [death](#) an "insurance policy" of devastating encrypted files has been pre-distributed to certain reporter and legal groups.

=====

WITNESS STATEMENT #4:

*" ...the 2008 and 2020 "stimulus funds" are quid pro quo scams to pay off political insiders. We reported these crimes (with FBI-class evidence) to every law enforcement agency in writing (FBI, DOJ, SEC, IG, FTC, OSC, FEC, etc.). apparently, citizens are ignored if the crimes involve politicians and their billionaires. the cover-ups are off-the-charts!these mobsters (**Google, Tesla, Facebook, LinkedIn, Netflix, In-q-tel, Kleiner Perkins, Greylock**, etc; acting in a coordinated, collusion-based, operation) are paying billions of dollars of political bribes (...via cash, real estate, sex trafficking, pacs, search engine rigging, crony jobs, biased censoring, campaign funds, stock market manipulations, ukrainian money laundering, etc.) to delay justice and blockade our, and your, rights! There can be no question about the fact that Google, Facebook, Netflix, Tesla and the Silicon Valley*

Cartel control the Obama and Biden White House. For example: Elon Musk ordered the politicians who are his bitches to sabotage his competitors. He gave those political insiders: cash, stock in his cartel, revolving-door jobs, campaign funding, sex workers, off-shore money laundering, and other quid pro quo. Eric Schmidt, Larry Page, Mark Zuckerberg, and the rest of the tech mob, all worked together on these crimes. The hacks and leaks of their documents prove it. Government agency bosses are covering up these crimes to protect their jobs and their corrupt stock market holdings. Musk and Goldman Sachs have gotten over FIFTEEN BILLION DOLLARS of free taxpayer cash and monopolized exclusives to pay for Musk's drugs, sex parties and mansions. This is one of the largest violations of anti-trust laws in history. The politicians and agencies that are supposed to stop him are getting money from him. Musk exists entirely from quid pro quo bribes! Musk's banks, including Deutsche Bank, have had to pay more than \$100 million to settle charges related to violating anti-bribery laws and engaging in money laundering. While the Musk-controlled media bloviate on the god-like image of Musk, he and his buddies are just crooks and mobsters. It is now almost impossible for the public to reach any media source that is not controlled by the Silicon Valley Cartel via synchronized talking points. Politicians who say that their only motivation is to "save" the helpless billionaire Elon Musk and his unicorns: 1.) sabotage any companies who are not making Tesla's, 2.) have sex with Tesla lobbyists and bankers, 3.) own the stock in Tesla Motors, 4.) are venture capital partners in Kleiner Perkins (ie: Gore) and Greylock capital insiders, 5.) trade revolving door jobs with the Elon Musk cartel, 6.) gave Musk over \$15B of free taxpayer money, 7.) get campaign financing from Musk, 8.) order government agencies to freeze funding for Musk's competitors, 9.) and engage in a vast number of other corruption and anti-trust crimes.

Politicians talk a big game about coming down on the Silicon Valley Cartel but they never really seem to move on their threats or declarations because they are receiving bribes FROM the Silicon Valley Cartel. The bribes come from covert money drops via covert political manipulation groups including: **The Sixteen Thirty Fund, Tides Advocacy, Emerson Collective, American Bridge, Think Progress, New America Foundation, Future Forward, Priorities USA Action, Arabella Advisors, New Venture Fund, Windward Fund, Hopewell Fund, Democracy Alliance, MoveOn.org, People's Action Power** and nearly a thousand other groups who claim to be doing goodie-two-shoes smiley happy deeds but who use spy-tactic dirty tricks to manipulate stock markets. These kinds of dark money groups prey on naive citizens, using emotional trigger pitches to rig government money into the pockets of their bosses. **If they can control the White House and most Senators, then they can steer trillions of dollars of government money into their own pockets!**

It has been proven that Google does indeed pick and choose what search results come up at the top of every search in order to help Google's friends and harm Google's enemies. Google, Facebook, Netflix and Tesla covertly spend billions of dollars influencing Congress.

The monopoly of the Silicon Valley Cartel is distinct and different from somebody like the New York Times, for example, or any major media platform that does not have legal immunity because they are

publishers. All other publishers do pick and choose what news stories they publish, what letters to the editor's are printed, what kind of op-eds are put on their platform, and they make those decisions knowing they are legally liable. Google bribed the 230 law into existence as an exclusive law just for Google to get away with crimes.

Via agreements to collude, the Silicon Valley Cartel platforms are acting as publishers as they are making editorial decisions while maintaining a legal immunity under section 230 which allows them to attack others without consequences. Google has parties and members of congress will go and pick up their checks. Facebook will have a big reception and Congress members go and say "hey, where's my check?"". That is outright bribery! READ THIS LINK: How Silicon Valley, in a Show of Monopolistic Force, Destroys Competitors.pdf The reason no one is acting on big tech is that the companies are inviting our elected members of congress into their very deep pockets. This is a massive abuse of power on several levels and if our elected officials can't resist the temptation of extra money in their pockets, then they need to be removed by recall elections, lawsuits and doxing...."

=====

WITNESS STATEMENT #5:

"...they stole our lives - now we are taking their entire cartel down...without breaking a single law! Hundreds of public officials, at famous government agencies, and dozens of sociopath billionaires are profiteering in these crimes. they are blocking our requests for justice. they are running felony cover-ups to protect their sinister dark money scams. the public is sick and tired of their criminal corruption. attached to this site you will find millions of pages of evidence from federal investigators and top reporters proving each assertion herein. (ie: HTTP://WWW.THE-TRUTH-ABOUT-THE-DEPT-OF-ENERGY.COM)

These felony crimes affect every citizen in the nation. The public must demand new laws to make bribery via stock market securities and 'revolving doors' have a mandatory and severe prison sentence with no more loop-holes for politicians! these tech oligarchs and dirty senators need to be arrested by the fbi and by citizen arrest! none of these scum-bags should ever be allowed to be "white house advisors" again! 98% of the politicians, and their family members, that own stock, use it as payment for bribes, payola and corruption. how can you trust any politician whose family makes most of their money off of stocks they are making the laws for? forbid any politicians from owning stock! Each voter should sue each politician that engages in corruption! That will solve the problem!..."

=====

DEMANDS:

OUR PERSONAL DEMAND TO THE PRESIDENT, THE ATTORNEY GENERAL, THE FBI DIRECTOR, THE INSPECTOR GENERAL AND CONGRESS:

"...WE DEMAND PAYMENT FROM THE U.S. GOVERNMENT AND THE STATE OF CALIFORNIA FOR OUR DAMAGES, FEES, BACK-PAY AND STATE-CAUSED LOSSES FROM THIS POLITICAL CORRUPTION AND THE RELATED COVER-UPS AND PROVEN HIT-JOBS THAT GOVERNMENT OFFICIALS OPERATED. POLITICIANS DEFRAUDED US OUT OF OUR LIFE SAVINGS THROUGH THEIR ORGANIZED CRIME SCAMS USING GOVERNMENT RESOURCES.

Financial investigator Jim Mintz, GAO and FBI forensic analysts and hundreds of others have proven that Senators and White House bosses gave their friends Eric Schmidt, Larry Page, Mark Zuckerberg, [Elon Musk](#) and their other political financiers over \$45 BILLION dollars of free taxpayer-funded cash. The politicians owned profits in those oligarch's companies and put over \$200M of dirty profits in their covert family bank accounts. Those politicians (ie; Feinstein, Harris, Reid, Pelosi, etc.) cut off our funds, benefits and human rights, and ran media attacks on us (we are the competitors of those oligarchs), to protect their corrupt profiteering scams. Their companies had crappier products, that killed or abused more Americans, that cost more, that avoided giving Americans jobs, that had racist and sex abusing cultures and that relied on payola and quid-pro-quo...they got the money because they paid bribes and for no other reason... " Schmidt, Page, Zuckerberg, Musk, etc. [each spend](#) over \$500M per election to [manipulate elections!](#) How much does the average citizen get to spend to steer election results? How much do you spend to rig elections? [Is it right, or fair,](#) that a crooked billionaire gets to buy elections with covert money while you, the public, languishes?

Every politician who was supposed to be helping us was an owner of our competitors, [having sex](#) with our competitors, running a Dark Money payola scam with our competitors and attacking us using taxpayer money. Their leaked emails and financial records prove it!

The victims were specifically and illegally excluded from participation in funding, benefits, jobs and income by major political figures, including U.S. Senators and White House executives who they knew, and those politician's corrupt Silicon Valley oligarch financiers. The tech Cartel and politicians attacked the victims because they would not cooperate with the crooked: [sex trafficking](#), tax evasion, off-shore

money laundering, political bribery quid-pro-quo, revolving door payola scams, foreign nation-sponsored domestic manipulations, stock market rigging, internet censorship and search engine manipulation and other crimes. They attacked the victims because they reported the crimes to federal police. They attacked the victims because their products obsoleted the products the Senators owned the stock of (ie: [Tesla](#), Google, Facebook, Netflix are covertly owned by California politicians). They attacked the victims using taxpayer-funded state resources. That is a felony violation of the law. The ongoing cover-up of these crimes and attacks is also a felony violation of the law. The victims their are owed damages compensation, witness fees and back-pay. Multiple Inspector General hearings, Congressional hearings and undercover videos have proven, beyond a doubt, that public officials order reprisal hit-jobs on citizens funding, SSA benefits, housing, permits, government applications and other things in order to harm them as political revenge for speaking out!

Federal investigators have proven (via records-tracking, financial data, surveillance, insider tips, leaks, etc.) that White House executives, government agency executives (SSA, LSC, DOE, USPTO, etc.) and California political bosses, including California U.S. Senators, owned interests in the victims competitors worth many billions of dollars. Any citizen can confirm these assertions via public records and the evidence in this report. The FBI has been arresting major political figures in this organized crime ring in San Francisco City Hall. Those government officials ordered, financed and executed whistle-blower reprisals and anti-trust violating attacks on the victims using state-sponsored, taxpayer-funded resources. Using government resources, they engaged in the illegal reprisal attacks on the victims. Those harms are listed in detail in the claim section of the filed Victim Demand entitled: “The Specific Attacks And Harms Undertaken Against Plaintiffs”.

Corrupt government officials manipulated SSA, HHS, DOE, USPTO, DOJ, and other agency, payments, funds, benefits and rights in order to harm and economically damage the victims. They produced and financed a massive media defamation campaign using their Paypal Mafia-based “Silicon Valley Cartel”. This ‘Cartel’: 1.) finances the political campaigns of the Senators and the other politicians that own stock in their Silicon Valley dirty tech companies, 2.) is the competitor of the victims, 3.) shared staff with the named politicians, 4.) is the nearly exclusive beneficiary of policy actions by those politicians, and 5.) has a massive number of conflict-of-interest relationships with each of the charged politicians. The victims reported the attackers crimes to the FBI, DOJ, IG and other officials and got attacked for reporting the crimes, for busting up the organized crime effort and for running companies whose product technologies obsoleted those of the tech Cartel. The victims are claiming their rights to their damages and fee compensation, but those same public figures have blocked them from an equitable jury trial to address the matter. The government has provided the attacker/political campaign financiers/competitors of the victims with tens of billions of dollars of free government cash yet the victims have gotten nothing but grief from the public officials who are supposed to help them because a criminal cover-up is in process. The politicians who got those “bad guys” that free taxpayer-provided money, own the stock of those criminal’s companies, are best friends with those oligarchs and are politically financed by those corrupt players. This organized crime cartel operates the most audacious and corrupt scheme in American political history.

No public official should hire, and seek to replicate, the entire crony corruption payola staff from the Obama Administration. Nobody who owns stock in, or has revolving door payola from, Silicon Valley tech weasels should EVER be allowed to work in our government. Those officials only made policy that put cash in their stock market accounts and were extremely corrupt; at the expense of every member of the public!

In addition to the above, agency bosses changed federal criteria from "first-to-apply/first-come-first-served" to "who-are-friends-are" in order to let their friends in line for funding ahead of everyone that applied first.

In order to manipulate the stock market and create a monopoly, Google/YouTube hyped Google insider Elon Musk and hid all of his competitors. Google/YouTube also accepted payments in order to run attack videos and character assassinations on his competitors, some of which were paid for by politicians who owned Google/Tesla stock. Those politicians got Musk and Larry Page government cash hand-outs! Google/Youtube manually manipulates servers to help friends and destroy competitors.

=====

NOTICE TO THE UNITED STATES CONGRESS:

JENNIFER GRANHOLM: FIX THE CORRUPT CRONY CAPITALISM QUID-PRO-QUO PAYOLA AT THE U.S. DEPARTMENT OF ENERGY. DON'T BE PART OF IT AGAIN!

Part of the staff at the U.S. Department of Energy are political fan-girl zealots who will lie, stone-wall, cheat, shred, manipulate and defraud in order to exploit their political cause and advance their careers. They will do anything to help their "girlfriends": Elon Musk, Eric Schmidt, Mark Zuckerberg, George Soros and their brethren. They will do anything they can to harm the competitors of those insiders. Nothing that happens at the D.O.E. is not based in bribery and payola!

EVERY new Department of Energy staff has said: "We won't do those bad things the last guys did"; but they have each been found to have lied! Jennifer must be ordered to pay the damages of the past victims and eliminate all of the programs that have been proven to have been corrupt.

Even if you spend years providing data for a Dept of Energy funding application, even though you get approved, at the last minute the White House will covertly whisper orders to cancel your funding

because you compete with a financier of The President.

The lying sycophant scumbags at the Department of Energy are covering up these crimes because they own stock in, and get contracts and revolving door jobs from, [Elon Musk](#), Google, et al. The Department of Energy is a deep, dark, smug abyss of crony payola, kick-backs, market monopolization, bribes and insider corruption beholden to the tech cartel. Google, Facebook and Silicon Valley are a private government that is more powerful than the U.S. Government. They use the U.S. Government as their bitch! These people put mobster-like 'hit-jobs' on the victims and operated state-sponsored attacks against them because they reported the crimes to law enforcement.

Don't be a SUCKER and fall for the lies that the Department of Energy dishes up. The Advanced Technology Vehicle Manufacturing and loan programs are insider controlled, quid pro quo, payola scams to pay off friends and campaign financiers. **NO NON-POLITUCAL INSIDER HAS EVER GOTTEN MONEY FROM THE DEPT OF ENERGY!** No Secretary of Energy in the last 20 years was not a political lackey. No non-insider has ever gotten the DOE funds. Every outsider who competed with an insider was sabotaged, stone-walled, lied to and shut down by the DOE stooges.

If you don't believe that Silicon Valley is operated by an organized crime cartel of sociopath frat boys that are protected by famous Senators and public officials, who own their stock and get their campaign cash, then here is absolute proof of the crimes and the cover-ups that go all the way to the White House. We conducted an exhaustive, decades-long, investigation deep into the roots of modern political corruption and here is how it works and how to destroy it!

Have you noticed that all of the "stimulus" money always goes to the politicians friends and benefits their stock market accounts but almost none of the cash goes to the voting citizens? That is the kind of BS we are stopping here!

These tech kleptocrats have tried to hide all their dirty cash all over the world but distinct, AI computer-tracked patterns have emerged that have caught them! The moves and tricks they like to use each contain the seeds of their own destruction. We have been catching them at every stage and those patterns reveal how California politicians and dirty Google/Facebook/Tesla crooks hide their dirty money.

In all these corruption cases, these corrupt people took the same steps to conceal their assets. They each took the money in secret ways. The main ways are 1.) via Dark Money stealth political funds; 2.) bribes paid via insider trading (notice that most of these crooks marry an investment banker to run their dirty schemes) and 3.) getting government contracts, loans and grants for their friends that they get kick-backs from. They then had their dirty law firms and CPA's shove the money into their standardized covert financial structure to hide it. They use family members to run the operation. Their dirty family members and lawyer/CPA teams cover up their tracks. They then have intermediaries spend the money to get them islands, yachts, mansions, hookers, Tesla's, etc.

They use Switzerland, The Ukraine, The Cayman Islands, Mexico, China, Cyprus, Russia and New Zealand as money laundering centers. They create a tsunami of offshore shell companies on islands and crazy places that few could find on a map. It is all a sham.

They keep moving the money around and buying sham real estate. These Senators and tech oligarchs will just lie and lie and lie because no major law enforcement agency ever has the will to arrest them. If public officials won't do their jobs then the public must do it for them!

Bribery - Wikipedia

<https://en.wikipedia.org/wiki/Bribery>

Bribery is defined by Black's Law Dictionary as the offering, giving, receiving, or soliciting of any item of value to influence the actions of an official, or other person, in charge of a public or legal duty. With regard to governmental operations, essentially, bribery is "Corrupt solicitation, acceptance, or transfer of value in exchange for official action."

=====

GOVERNMENT OFFICIALS ARE BLOCKADING VICTIMS RIGHTS TO A TRIAL AND TO LEGAL COUNSEL:

"Government staff and contractors have told us: "just sue us". This was their response to trying to resolve this issue.

That response, by government officials, is a felony violation of Constitutional law, human rights law, State and Federal public policy directives, the expectations of the national citizenry and the principles of Democracy.

The government response is, thus legally "non-responsive" and a threat to every voter and citizen.

Our previously filed demand, attached hereto as a PDF document under the title: "VICTIM DEMAND Jan 12 2020.pdf" proves that no care or attention was paid to Plaintiffs previously filed complaint by your office except to operate a cover-up campaign. Any cover-up campaign of this felony organized crime matter subjects each, and every, government employee and contractor involved in said cover-up to felony arrest and prosecution.

You have blocked Plaintiffs from getting a lawyer or getting any legal help. That is a felony violation of

the law and an abhorrent violation of U.S. and State Constitutional and human rights.

The current tactics being used to prevent Plaintiffs from their legal rights include:

A. Plaintiffs have been “black-listed”. Even though the law in California (Cal. Lab. Code § § 1050 to 1053) says that an entity can't prevent or attempt to prevent former workers from getting work or representation through misrepresentation, knowingly permitting or failing to take reasonable steps to prevent blacklisting, or make a statement about why an employee was discharged or left employment, implying something other than what is explicitly said, or providing information that was not requested: It is done every day in Silicon Valley. The "Silicon Valley No Poaching Black-List" class-action lawsuit was about this issue. Federal FAR Section 9.104-1 (d), and related laws, apply. Blacklisting is a key part of the IC Vendetta Cycle attacks. The victims also suffered damage to their rights under the Age Discrimination in Employment Act (ADEA) (29 USC Sec. 621, et seq.); the Americans with Disabilities Act (42 USC Sec. 12181, et seq.); the Civil Rights Acts - (42 USC Sec. 2000, et seq.); the Davis-Bacon Act (40 USC Sec. 276a, et seq.); the Employee Retirement Income Security Act (ERISA) (29 USC Sec. 1001, et seq.); the Equal Pay Act (29 USC Sec. 206[d]) and other violations.

B. Each and every law firm capable of handling Plaintiffs case has been contracted, paid and/or influenced so that they are “conflicted out” from representing Plaintiffs. Law firm Mofo was threatened if they helped Plaintiffs. Lawyer Amy Anderson was threatened and lost her license for attempting to help Plaintiffs. Every lawyer or law firm who attempts to help Plaintiffs is hired by Defendants, or their agents and threatened or compromised in order to prevent them from helping Plaintiffs because this case affects trillions of dollars of energy industry profits, the White House, billionaire oligarchs and multi millionaire corrupt Senators. In fact, this issue lies at the root of this entire corruption case. Sociopath over-moneyed Silicon Valley oligarchs have hire Morrison Foerster, Wilson Sonsini, Perkins Coie, Covington Burling and every other major law firm and lobbyist and told them to “kill everyone and destroy everything that I don’t like...”. These law firms (controlled by Mark Zuckerberg, Elon Musk, Larry Page, Eric Schmidt, Steve Westly, Vinod Khosla, Laurene Powell Jobs, Nancy Pelosi, etc. All of whom have nearly a trillion dollars of funds at their disposal) have carte blanche and unlimited payments to run coups, character assassination campaigns, money laundering and other crimes for the oligarchs. They have the staffing to do these things and zero incentive to not do crimes. These law firms are the dirty deeds teams for the mobster-like suspects and there is no law enforcement body with the will nor resources to stop them. It is a violation of the U.S. Constitution to tell Plaintiffs to “go get a law firm” when EVERY possible, equitable, law firm works for, and is massively compensated by, the criminals that need to be sued. Both the politicians AND the tech oligarchs charged with these crimes have hired the very law firms that government agencies have told Plaintiffs to go out and hire.

C. There is a precedent that was set in the US Supreme Court case: Gideon v. Wainwright, (1963) that clarifies that you have a right to a lawyer even if you don't have money for one. The Sixth Amendment, as applied to the states through the Fourteenth Amendment Due Process Clause gives one their Due Process rights. One needs to kill someone, though, to most easily get your free lawyer, since the court-

appointed lawyer is rarely ever appointed, on citizens behalf, in a case like this. Even if a defendant is represented by an attorney of his or her choosing, he or she may be entitled to relief on appeal if the attorney did not provide adequate representation. A defendant must demonstrate that the attorney's performance "fell below an objective standard of reasonableness" and that this was prejudicial to the case. See: Strickland v. Washington (<https://supreme.justia.com/cases/federal/us/466/668/case.html>) , 466 U.S. 668, 688-92 (1984). A few "free lawyers", that victims had tried, turned out to be working for the opposition side.

D. The federal organization: <https://www.lsc.gov> is required to help but has refused because it's administrators were friends with, and appointed by, the public officials charged with corruption in this case.

E. Plaintiffs have personally asked the Attorney General, The Director of the FBI and the U.S. Attorney's office for representation but they have been told not to respond because the case is politically embarrassing to major public officials and their corrupt Silicon Valley financiers.

F. The government agencies who have told Plaintiffs that Plaintiffs should "hire a law firm and sue them", in order to resolve this matter, are the same government agencies that have cut-off, or blockaded Plaintiffs income sources in order to prevent Plaintiffs from being able to afford to hire a law firm to sue them.

G. A federal agency provided Plaintiffs with a list of "free lawyers". Upon FBI-level investigation of every "free lawyer" on the list, (via their financial contributions, voting records, leaked emails, social media postings, event attendance, public records, social connections lists online and other surveillance data) they all worked for, or with the opposition interests and could not have possibly provided unbiased services. In fact, multiple lawyers have contacted Plaintiffs who turned out to be working for the opposition. They were sent in to delay, or redirect, Plaintiffs in order to keep the cases from being filed or properly prosecuted in order to protect the suspects. This is a common infiltration procedure widely documented in CIA, British secret service, Russian FSB and Snowden leaks documents on IC dirty tricks tactics.

The government is, at the same time, telling us to sue the government, yet blockading us from getting a lawyer per our Constitutional rights.

Agency staff were ordered to harm Applicants by manipulating their benefits in order to deny, delay, obfuscate and reduce their income as reprisal for their assistance to law enforcement in a political corruption and money laundering matter. Agency staff, ranging from the lowest level staff and up to the director headquarters offices, participated in this reprisal-vendetta-revenge action to harm Applicants.

Applicant's peers have filed DOJ and FBI criminal referrals, launched federal investigations and the assertions have been proven in numerous IG, FBI, Congressional and major news media investigations. Agency offices have failed to provide responsive FOIA requested data, hearing investigation data and fair responses because some of their staff are STILL operating a criminal cover-up which has now been update-reported to the FBI, Congress, the IG, the AG and investigative reporters.

Other federal agencies have complied, verified and provided the requested deliverables. SSA and DOE have pointed the searchlight of suspicion on themselves, laser-like, by their overt failure to comply, unlike every other agency. Ironically, the political financing of their executives and their personal relationships "happens" to be with the exact same Silicon Valley oligarchs under felony criminal investigations. The stock market brokerage records, family trust accounts, PAC trace-routing, Interpol records and SEC investigation records proves it!

Unfortunately for the crooked agency staff, some Applicants have the authority, law enforcement credentials and training to arrest any person at their home or office and remand them to the FBI, DOJ or Sheriff. For example: Every "unsigned" SSA email is tracked to the individual author by their IP address, device IMEI, web camera, building key card, door camera, parking lot use chart, building camera, vehicle tracking circuits, text dba records, keyboard UI/UX patterns, motherboard ID #, DNS routing, stingray read-outs and a vast number of other metrics. Applicant investigation peers know the exact person that wrote every SSA email or document or file request. There is no such thing as an anonymous SSA email. Transparency is the Applicants middle name. The FBI and CIA people that SSA and DOE insiders think are their "buddies" may actually be the APPLICANTS buddies!

You will either give the Applicant his money and damages compensation, or suffer the consequences of the rapid acceleration of one of the largest investigations in modern history, supported by millions of voters with a shared peer-to-peer forensics social media network, the FBI and Congress. With the push of a single button, our latest info can be in the inbox of every blogger and independent investigative journalist in the world, in minutes.

History has proven that non-corrupt portions of federal agencies and public service law and community action firms have executed on their willingness to expend millions of dollars of resources to fight this injustice. Every individual involved in this at SSA and DOE are on a forensic database. No person at SSA or DOE who uses our government as a garage sale for corruption favors or a kill mill for political reprisals will avoid the 100% legally executed consequences. They will be targeted and prosecuted even more profoundly than the Applicants were targeted with IC-type hit jobs.

This felony criminal investigation case, is documented on thousands of websites and in dozens of federal court case records in which Applicant won the case or was vindicated in the case and in thousands of news websites.

Applicants researchers and investigators disagree with any decision by any agency which causes a

delay in response which puts the applicants in jeopardy for their life and safety.

Testifying, and/or reporting about this crime has resulted in the death, potentially by [murder](#), of the following individuals who reported to the authorities about this crime matter:

Rajeev Motwani; Gary D. Conley; Seth Rich; Philip Haney; David Bird; Doug Bourn; Misti Epstein; Joshua Brown; Kenneth Bellando; Moritz Erhardt; Imran Aliev; Kate Matrosova; David Drye; Vincent Foster; Kathy Ferguson; Duane Garrett; Eric S. Fox; Judi Gibbs; Berta Caceres; Suzanne Coleman; L.J. Davis; John Hillyer; Stanley Huggins; Sandy Hume; Shawn Lucas; Gary Johnson; John Jones; John F. Kennedy, Jr.; Stephen Ivens; Mary 'Caity' Mahoney; Eric Butera; Danny Casolara; John Ashe; Tony Moser; Larry Nichols; Joseph Rago; Ron Brown; Bob Simon; Don Adams; Peter Smith; Victor Thorn; Lori Klausutis; Gareth Williams; Daphne Caruana Galizia; James D Johnston; Dave Goldberg; Loretta Fuddy; Paul Wilcher; Gary Webb; Beranton J. Whisenant Jr; Stanley Meyer; Jon Parnell Walker; Tyler Drumheller; Barnaby Jack; Dominic Di-Natale; Barbara Wise; Ilya Zhitomirskiy; Jeff Joe Black; Robin Copeland; John Wheeler; Ashley Turton; Michael Hastings; Antonin Scalia; David Koschman; David Werner; Alex Okrent; Kam Kuwata; Larry Frankel; And hundreds more connected to this case who suddenly, and strangely, turned up dead in this case and, ironically, their deaths all benefit the suspects in this case. Applicants are also whistle-blowers who have been previously attacked in reprisal and who have been threatened with continued harm and [death](#).

Any delay, obfuscation, cover-up, FOIA refusal or other obscuring tactic by each and every member of an agency employee or contracting entity will be prosecuted on a person-by-person basis. Each employee or official who causes, by their action, further harm to the Applicants will be sued personally, have their assets garnished and will have a formal criminal referral authored and submitted to the FBI, DOJ, FTC, Congress and the news media. Applicants have sued the highest level personnel in the government for corruption, launched FBI and Congressional investigations against them and had them removed from their jobs and placed under permanent surveillance. The court and news records prove this fact. Do not imagine that any reprisal action by a public agency staffer will go unnoticed or unpunished by federal law enforcement, public forensics and major independent news media investigations.

The suggestion, by certain agency bosses, that one should "just file an IG report" is like telling someone to file a complaint against Hitler at the suggestion box at Nazi SS headquarters. You won't make it through the night! IG reports seem to accomplish nothing more than painting a target on your own back. Court records and news headlines prove that almost every citizen who reported similar political corruption through "official channels" was targeted with hit-jobs and economic blockades....ask Snowden!

Pay the Plaintiffs their damages compensation, whistle-blower fees, back-fees and offset monies NOW! Millions of citizens, around the globe, have all of the same evidence you now have and each day of delay only hurts YOUR agencies position in the eyes of the world and in the eyes of the voting population of the nation!"

=====

THE SILICON VALLEY TECH CARTEL IS A RACKETEERING CRIME MOB:

We are fighting the battle to save the internet and now you are part of it!

(ie: <http://silicon-valley-mobsters.com>)

(Please share this with your peers and friends and post it on your social media)

What would you do if you found out that your politicians (ie: Dianne Feinstein, Nancy Pelosi, Harry Reid, Kamala Harris) had put over one hundred million dollars in their covert family bank accounts which they got from sabotaging your business, because it competed with them, and from blockading your money because their tech oligarch insiders told them to? Our forensic investigators can 'swear, warrant and certify' that the politicians did the asserted crimes and corruption.

Like a social Terminex(c) pest control service, we are eliminating every single tech asshole in Silicon Valley (like the roaches that they are) using 100% legal, law enforcement approved, resources.

You are probably asking: "How Did Palo Alto, California Became Populated Entirely By Assholes"?

Why is the Tesla THE OFFICIAL CAR OF TONE-DEAF ARROGANT PRICK ASSHOLES!?

A glut of recent feature films (ie: [The feature film: Assholes: A Theory](#)) have excoriated the likes of Sand Hill Road and University Avenue scumbags...but pointing them out is not enough. They must be exterminated. You can verify the following facts, yourself, via court records, police records, FBI reports, FOIA and Congressional records.

As U.S. Marshal Raylan Givens (Timothy Olyphant) famously opined on the TV show "Justified",

“You run into an asshole in the morning, you run into an asshole at lunch. You run into assholes all day”; America on the precipice of the fallout of a monumental presidential election, it seems that assholes are not only everywhere you turn—in newspapers, on cable TV, at political rallies and protests, and all over social media—but that they, and their behavior, has been normalized because they own the media. Silicon Valley has a tsunami of "assholery" underway. This reality is covered in the philosophy of professor Aaron James' non-fiction book and new documentary aimed at both 1.) precisely defining the term “asshole,” and 2.) investigating how those who fit that bill have increasingly come to dominate key spheres of modern public life.

Stanford University graduates are inspired by the likes of corrupt Elon Musk and corrupt Italian Prime Minister Silvio Berlusconi—the forerunner of the media-manipulating populist-criminal-strongman trend that's recently swept through Western nations—or passages discussing Facebook, Twitter and Google's prioritization of profit over their responsibility to safeguard democracy from hate speech and disinformation. Stanford and Yale have proven to be the key training grounds for beginner assholes. Eric Schmidt, Larry Page, Elon Musk, Jack Dorsey, Reid Hoffman, John Doerr, Vinod Khosla and Mark Zuckerberg are the embodiment of this problem. They flout all of the rules and standards of common decency. They have made it appear acceptable, and in fact rewarding, to act in the worst possible manner as a means of achieving one's selfish ends. Their Silicon Valley is the pit of American assholery. You can spot an asshole, easily, when they are driving the official car of assholes: A Tesla, but what about the ones that are more under-cover?

Most people that have been tech raped by a Palo Alto Sandhill Road scumbag feel the same way as Mr. Sun, who says: " Silicon Valley Oligarchs must be punished. Without breaking a single law and WITH the help of the largest law enforcement and investigative resources on the planet, my task force has killed off every single motherfucker that has come after me with their anti-trust violating schemes, including some of the largest entities in the world! My peers and I use lawsuits, federal investigations, news reports, whistle-blowers, new public regulations, anti-trust filings, tens of millions of crowd-sourced voters and unique AI-based forensics. Our private investigators have found my every person and organization on the globe that hates the oligarchs. We gathered them together and aimed them all at the tech assholes! My rule is that Anyone who attacks me stays on the shit list for the rest of their lives plus the next 100+ years of internet time. When you Zuckerbergs, Larry Page's, Elon Musk's, John Doerr's, Reid Hoffman's, etc., come for me, prepare to suffer. Every stock you buy is a notice to my team to bankrupt the company that you invested in. Even if I am dead, your punishment will be carried out by a legacy team of public volunteers. It may happen to you tomorrow or it may be a slow-drip over the next 15 years. Never stop looking over your shoulder. If you decided to cheat against our businesses rather than fairly compete against us, then start carving your tombstone. If you hired media attackers, expect 100 times what you did to us to come back at you and your family forever! We are fine with "forgive-and-forget", except when it comes to criminal bullies: They are terminated!

He has pledged millions of dollars, from his family trust, to the effort. His AI database lists every investor, VC and executive in Silicon Valley, their family data and their "asshole ranking". Most of the

people attacked and ripped off by the tech oligarchs feel the same way. None of the victims have the monopolized control of the big tech law firms like the tech oligarchs do. None of the victims can afford to have an army of crooked law firms (ie: Mofo, Covington & Burling, Perkins Coie, Wilson Sonsini, etc.) working around the clock to enable financial crimes, corruption and Democracy abuses.

To grasp the argument that these people are assholes, one need only listen to the Silicon Valley Assholes's basic description. As many state, "The asshole is the guy who allows himself special advantages in Bay Area cooperative life out of an entrenched sense of entitlement that immunizes him against the complaints of other people." In other words, he's the individual—generally male, although as John Cleese candidly admits, his mother probably was one too—who thinks the general rules don't apply to them because they're somehow smarter, better, or more special than their fellow citizens. James' example is a surfer who violates the right-of-way customs in the ocean. Yet the type is universal, whether in line at the grocery store, on the road in traffic, or at work. They're the arrogant creeps convinced they're fundamentally superior, and thus free to conduct themselves in whatever way they see fit. That IS the essence of scumbag megalomaniacs: Eric Schmidt, Larry Page, Elon Musk, Jack Dorsey, Reid Hoffman, John Doerr, Vinod Khosla and Mark Zuckerberg!!!

The way "they see fit", of course, is often hateful, perverse and idiotic. The Assholes thrive in a bubble of trophy wives, rent boys and superficial TED conferences. In the midst of ongoing protests and debate over America's own domestic culture, which has long had a tradition of closing ranks and demonizing critics, every Silicon Valley employee ordeal sounds eerily familiar among every worker at Google and Facebook.

Such attitudes, according to the Silicon Valley Assholes are created by Stanford University Fraternities which are breeding grounds for horrid group-think mindsets about women and sex. The tech financial sector encourages greed, ruthlessness, and vulgarity as the best way to get ahead. Google executives champion initiation-ritual abuse in service of its own greater good. You can see the movies: Animal House, The Wolf of Wall Street and Full Metal Jacket to see the underscore of the notion that these milieus are all rife with a similar brand of assholery in which arrogance and entitlement justify all manner of despicable ideas and deeds. Every major rape fraternity in the USA eventually sent those abusive boys to run Sandhill Road venture capital companies and Google or Facebook departments.

Every executive at Google knows that they are doing crimes, lying to Congress and the public and operating the biggest scam in history. That is why they will come up with any lie, re-interpretation of the facts or denial to hide the truth!

Any Presidential Administration that puts sociopath, Epstein-like Eric Schmidt, Larry Page or ANY Google executive IN their Administration is either proving their tone-deaf lack of awareness of the facts or that their President is such a bitch to Google's campaign cash that they could not possibly be trusted by any world leader or any citizen. (See: <https://therevolvingdoorproject.org/letter-to-oppose-eric-schmidt/>) (<https://nymag.com/intelligencer/2013/07/eric-schmidt-penthouse-new-york-photos->

[apartment.html](#))

The Silicon Valley Assholes Process proves that real Silicon Valley VC and tech assholes probably don't know they are one; central to this condition is the certainty that all bad behavior is actually OK.

This is detectable in the media posts of workers from Greylock, Kleiner, Andressen and other tech asshole firms. Many of the tech interns freely admit that they only pay attention to other social media users if there's a personal benefit to connecting with them. That type of me-first worldview is crucial to Palo Alto Sandhill Road's conception of twisted reality. Asshole-rich Silicon Valley America (where "exceptionalism" is ingrained from an early age) lives in contrast to asshole-light Canada (where folks tend to be more agreeable and accommodating)(Justin, though, is a novel kind of asshole).

The most compelling—and enraging—realities concerns Silicon Valley, where Mark Zuckerberg and like-minded CEOs have bred a culture of trampling on competitors, laws, historical norms, and the bedrock tenets of democracy in pursuit of additional eyeballs, clicks, and revenue streams. In a place where young men team up in a desperate quest to develop the innovative next big thing that'll turn them into tech moguls ("bro-gramming"), nothing matters but the self-centered end goal. And though Facebook, Twitter, Google, Kleiner Perkins, Greylock and their ilk could alter this landscape by simply cracking down on the horridness that permeates their platforms, they choose not to because of the negative financial consequences and their lust for hookers, private jets and cocaine.

To travel through Silicon Valley is to take a gravely depressing survey of a 21st century in thrall—in several crucial arenas—to humanity's worst impulses.

So what is being done about this crisis of society?

We have hired the best investigators who used to work with the FBI, CIA, FTC, DOJ, SEC, GAO, IG and Interpol.

We have also been teaching every voter in the world how to be a top notch criminal investigator and how to use digital forensic AI tools to "follow-the-money" and bust these crooks. Imagine the entire resources of Palantir, XKEYSCORE, Splunk, Axiom, Fusion GPS and Taleo aimed at people like Zuckerberg, Hoffman, Musk and Schmidt. They will never survive it!

Every single asshole in Silicon Valley can expect to have accurate, highly professional, criminal charges and referrals filed against them with every federal law enforcement and regulatory agency. Those reports are being BCC'd to the news media and the public.

When you see reports like these, you can clearly see that: Every Tech CEO And Investor In Silicon Valley Is A Predatory, Parasitic, [Sex Trafficking](#), [Misogynist](#), Money Laundering, Politician Bribing, Exclusionary, Black-Listing Criminal:

The big lesson Silicon Valley can learn from the Theranos ...

□ <https://fortune.com/2018/03/15/elizabeth-holmes-theranos-fraud-secrecy/>

Theranos CEO Elizabeth Holmes and former president Ramesh "Sunny" Balwani were charged with an "elaborate, years-long fraud."

A viral thread has busted the MYTH about "Famous Billionaires Starting Out "Poor". Jonas Grinevičius and Justinas Keturka have revealed that we all love stories about scrappy underdogs who overcome the odds and make it big through relentless hard work, unwavering grit, and sheer force of will. However, the stories about how some of the richest and most powerful people made their millions (and billions) are too romanticized and gloss over some very important details. That's the point that Aidan Smith made in a viral Twitter thread where he explained how Jeff Bezos and others had a huge leg-up when it came to helping lay the foundations of their business empires. Namely—having families with lots of money. Google used taxpayer funds to start its monopoly per <https://medium.com/insurge-intelligence/how-the-cia-made-google-e836451a959e> and <https://qz.com/1145669/googles-true-origin-partly-lies-in-cia-and-nsa-research-grants-for-mass-surveillance/> Not only does Google not pay tens of billions of dollars of its taxes to sponsor firemen and teachers but Google used public resources

to start its company! Billions of dollars of citizen funds were used by Google to create it's evil empire. Google gets away with this crap because it bribes major U.S. politicians from California!

Aidan told Bored Panda that the US isn't the only country where a lot of people believe myths about businessmen while the truth is a Google search away. "It's far from a U.S.-exclusive phenomenon, but in America, it's easier for most people to imagine becoming a billionaire themselves than it is to imagine an economic order in which a handful of people own half the world's wealth. Social mobility from working-class to middle-class is increasingly out of reach and the illusion that one can conceivably amass a net worth of over a billion dollars is a comforting fantasy for many people."

The indisputable facts are the assertions that the Silicon Valley oligarchs:

1. Control business and politics like a crime Cartel
2. Are a white male fraternity who attack outsiders in organized manners
3. Come from dynastic families that systematically ran them through Stanford, Harvard and Yale sociopath-in-training men's clubs
4. Were socially trained and programmed to operate in a closed, tribal, exclusionary manner
5. Operated the "Angelgate" collusion scandal and most every other financial crime in America.
6. Operated the "Silicon Valley High Tech Employee Collusion" for which they were sued in a famous class-action case
7. Controlled the White House and traded most of the key staff with the Administration.
8. Have been sued, indicted and charged in divorce proceedings with an unusually massive amount of sex trafficking matters
9. Use the same 10 law-firms who have been charged with public policy manipulation
10. Control internet news, media and information
11. "Own" certain U.S. Senators by virtue of direct bribe payments and securities/stock payola payments
12. Use a variety of tools like GUST, Private Google Docs sites, covert Facebook pages and similar, to secret conspire and plan collusion and organized monopolistic practices

13. Have their venture capitalists spy on entrepreneurs and copy their technology to be deployed by Google, or Facebook under a new name

14. Are a Mafia-like criminal organization.

Who are some of the biggest, elitist, self-aggrandizing, entitled, tone-deaf assholes in Silicon Valley?

The Tech Crunch Silicon Valley database-of-assholes provides that answer. They include: David Krane, Brian Bendett, Brendan Bulik-Sullivan, Terri Burns, Blake Byers, Tim Draper, Steve Jurvetson, Elon Musk, Steve Westly, Steve Spinner, Tyson Clark, Frederique Dame, Tom Perkins, Scott Davis, Reid Hoffman, Eric Schmidt, Larry Page, Jared Cohen, David Drummond, Karim Faris, Tom Hulme, Joe Kraus, John Lyman, Vinod Khosla, Laura Melahn, Dave Munichiello, Erik Nordlander, Anthony Philippakis, Sridhar Ramaswamy, David Reshef, Ben Robbins, Issi Rozen, David Schenkein, Vidu Shanmugarajah, M.G. Siegler, Graham Spencer, Bethany Tsui, Jessica Verrilli, Andy Wheeler, Krishna Yeshwant, Asheem Chandna, Jerry Chen, Mike Duboe, Sarah Guo, Christine Kim, Josh McFarland, Saam Motamedi, Sridhar Ramaswamy, Corinne Riley, Jason Risch, Seth Rosenberg, David Sze, David Thacker, David Wadhvani, Manuel Bernal, Allie DalGLISH, Don Sullivan, Yasmin Green, Kent Walker, Matt Rogers, Steven Chu, David Plouffe, Sergy Brin, Andy Rubin, Ian Fette, Travis Kalanick, Elizabeth Holmes, Dustin Moskovitz, Laurene Powell Jobs, Andy Bechtolsheim, Brian Goncher, Cheryl Sandberg, Gilman Louie, Ira Ehrenpreis, Tim Cook, James Breyer, Joe Lonsdale, Keith Rabois, Marc Andreessen, George Soros, Mario Rosatti, Martin LaGod, Michael Moritz, Viktor Vekselberg, Larry Summers, Pierre Omidyar, Tom Steyer, RoseAnn Rotando, Larry Birenbaum, Judy Estrin, Steven Goldby, Terry Kramer, Helen Raiser, John Scully, Sandi Thompson, Ann Wojcicki and their ilk...

You can see that most of them have the same facial deformities that make them all look like yuppie frat or sorority clones with Moonie/Scientology dead eyes and fake smiles that broadcast their blind zealotry and sports bar fakery to the world. Every email, phone call, text, condo, office and brothel that these people use should be bugged by the FBI. These scammers built an insider-trading bubble of TED conferences and tech parties in which they mutually promote their Elizabeth Holmesian fantasies of holier-than-thou idiocracy. Emily Chang's book: "Brotopia" covers these scum-bags in great length.

The Silicon Valley cartel propagandizes climate issues because they own all the companies that will get government cash for climate issues. Are climate issues a bigger deal than: CANCER, [SEX TRAFFICKING](#), POOR EDUCATION SYSTEMS, POLICE BRUTALITY, RACISM, HOUSING PRICES, PANDEMICS, MEDICAL COVERAGES, WARS, DRUG TRAFFICKING, CARTELS, STD'S, MONOPOLIES, POLITICAL BRIBERY, THE SPACE RACE, TOXIC FOODS, SEX ABUSE AT WORK, AND THOUSANDS OF OTHER ISSUES...?????. The Silicon Valley Cartel says "It Is", but that is only because they own all of the companies that will get free government cash to "fix" climate issues. They do not care one tiny bit about the climate. They care about CASH!

As a Hoover Fellow puts it: "...Elite arrogant asshole dynasties send their kids to Stanford University.

Stanford puts the kids in asshole frat houses to train them to get away with rape and run monopolies. When they graduate they either go up the hill to Sandhill Road and start a venture capital clone operation or they get their frat friends on Sandhill Road to racketeer-fund their start-up or political campaign using money scammed from your parents pension funds. They only work with their frat buddies and insiders in a tribal 'old boys club' manner. They steal all the technology and markets they want because they control all of the tech lawyers and politicians via bribes and revolving doors. Most of the money in Stanford University bank accounts is from Foreign and Hollywood oligarchs delivered as bribes meant to get their snot-nosed brats into Stanford. Stanford bosses keep all of this covered-up and covertly fund political campaigns to grease the wheels of political corruption. They then sexually extort some Stanford interns in Rosewood Hotel rooms, get the most 'trophy wife' ones pregnant, and start the cycle all over again. Alas, Stanford is the training ground for abuse, corruption and 'Bro-Crime'..."

Everyone asks: " How Does Elon Musk Maintain His Corrupt Empire Of Lies Without Getting Shut Down By The Government?"

Elon Musk has spent more money creating fake fame for his narcissist personality disorder than any other person in history! Musk is obsessed with buying troll farm outputs, Chinese click-bait processing service orders, fake Facebook likes, fake Twitter follows, Reddit self-glory lie-blogger services and PR hype media articles about himself. Musk can't stand to go a single day without trying to make people think he is a god-like deity when he is just a scamming tech mobster!

Elon Musk runs a RICO-violating, stock market-manipulating, anti-trust-violating organized crime cartel! He is the high tech Godfather of financial crime and he is many times more "untouchable" than Al Capone! Public officials should be embarrassed to death that Musk waltzes around with such impunity. Musk maintains his immunity with BRIBES to Congress, bribes to the DOT, bribes to the NHTSA, and other political agencies. He acts as a conduit to pass free government cash he scams from politicians through his organization and back out, covertly, to those same politicians like Harris, Pelosi, Feinstein, et al.

HOW THE SILICON VALLEY SCAMS WORK:

Elon Musk, and the Silicon Valley Cartel, have over 1000 people at Goldman Sachs that are dedicated to keeping this corrupt empire operating on smoke and mirrors in order to hype up the stock via dirty tricks such as these:

** The Silicon Valley Stock Scam Called: "Pools"

Agreements, often written, among a group of traders to delegate authority to a single manager to trade in a specific stock for a specific period of time and then to share in the resulting profits or losses."[\[5\]](#) In Australia section 1041B prohibits pooling. (

https://en.wikipedia.org/wiki/Market_manipulation#cite_note-5)

** The Silicon Valley Stock Scam Called: "Churning"

When a trader places both buy and sell orders at about the same price. The increase in activity is intended to attract additional investors, and increase the price.

** The Silicon Valley Stock Scam Called: "Stock bashing"

This scheme is usually orchestrated by savvy online message board posters (a.k.a. "Bashers") who make up false and/or misleading information about the target company in an attempt to get shares for a cheaper price. This activity, in most cases, is conducted by posting libelous posts on multiple public forums. The perpetrators sometimes work directly for unscrupulous Investor Relations firms who have convertible notes that convert for more shares the lower the bid or ask price is; thus the lower these Bashers can drive a stock price down by trying to convince shareholders they have bought a worthless security, the more shares the Investor Relations firm receives as compensation. Immediately after the stock conversion is complete and shares are issued to the Investor Relations firm, consultant, attorney or similar party, the basher/s then become friends of the company and move quickly to ensure they profit on a classic Pump & Dump scheme to liquidate their ill-gotten shares. (see P&D)

** The Silicon Valley Stock Scam Called: "Pump and dump"

A [pump and dump](#) scheme is generally part of a more complex grand plan of market manipulation on the targeted security. The Perpetrators (Usually stock promoters) convince company affiliates and large position non-affiliates to release shares into a free trading status as "Payment" for services for promoting the security. Instead of putting out legitimate information about a company the promoter sends out bogus e-mails (the "Pump") to millions of unsophisticated investors (Sometimes called "Retail Investors") in an attempt to drive the price of the stock and volume to higher points. After they accomplish both, the promoter sells their shares (the "Dump") and the stock price falls, taking all the duped investors' money with it.

** The Silicon Valley Stock Scam Called: "Runs"

When a group of traders create activity or rumours in order to drive the price of a security up. An example is the [Guinness share-trading fraud](#) of the 1980s. In the US, this activity is usually referred to as painting the tape.[6] Runs may also occur when trader(s) are attempting to drive the price of a certain share down, although this is rare. (see Stock Bashing) (https://en.wikipedia.org/wiki/Guinness_share-trading_fraud)

** The Silicon Valley Stock Scam Called: "Ramping (the market)"

Actions designed to artificially raise the market price of listed securities and give the impression of voluminous trading in order to make a quick profit.[7] (https://en.wikipedia.org/wiki/Market_manipulation#cite_note-7)

** The Silicon Valley Stock Scam Called: "Wash trade"

In a [wash trade](#) the manipulator sells and repurchases the same or substantially the same security for the purpose of generating activity and increasing the price.

** The Silicon Valley Stock Scam Called: "Bear raid"

In a [bear raid](#) there is an attempt to push the price of a stock down by heavy selling or [short selling](#). [8] (https://en.wikipedia.org/wiki/Market_manipulation#cite_note-8)

** The Silicon Valley Stock Scam Called: "Lure and Squeeze"

This works with a company that is very [distressed on paper](#), with impossibly high debt, consistently high annual losses but very few assets, making it look as if bankruptcy must be imminent. The stock price gradually falls as people new to the stock short it on the basis of the poor outlook for the company, until the number of shorted shares greatly exceeds the total number of shares that are not held by those aware of the lure and squeeze scheme (call them "people in the know"). In the meantime, people in the know increasingly purchase the stock as it drops to lower and lower prices. When the short interest has reached a maximum, the company announces it has made a deal with its creditors to settle its loans in exchange for shares of stock (or some similar kind of arrangement that leverages the stock price to benefit the company), knowing that those who have short positions will be squeezed as the price of the stock sky-rockets. Near its peak price, people in the know start to sell, and the price gradually falls back down again for the cycle to repeat.

** The Silicon Valley Stock Scam Called: "Quote stuffing"

[Quote stuffing](#) is made possible by high-frequency trading programs that can execute market actions with incredible speed. However, high-frequency trading in and of itself is not illegal. The tactic involves using specialized, high-bandwidth hardware to quickly enter and withdraw large quantities of orders in an attempt to flood the market, thereby gaining an advantage over slower market participants. [9] (https://en.wikipedia.org/wiki/Market_manipulation#cite_note-9)

** The Silicon Valley Stock Scam Called: "Cross-Product Manipulation"

A type of manipulation possible when financial instruments are settled based on [benchmarks](#) set by the trading of physical commodities, for example in United States Natural Gas Markets. The manipulator takes a large [long \(short\) financial position](#) that will benefit from the benchmark settling at a higher

(lower) price, then trades in the physical commodity markets at such a large volume as to influence the benchmark price in the direction that will benefit their financial position.

**** The Silicon Valley Stock Scam Called: "Spoofing (finance)"**

[Spoofing](#) is a disruptive algorithmic trading entity employed by traders to outpace other market participants and to manipulate commodity markets. Spoofers feign interest in trading futures, stocks and other products in financial markets creating an illusion of exchange pessimism in the futures market when many offers are being cancelled or withdrawn, or false optimism or demand when many offers are being placed in bad faith. Spoofers bid or offer with intent to cancel before the orders are filled. The flurry of activity around the buy or sell orders is intended to attract other [high-frequency traders](#) (HFT) to induce a particular market reaction such as manipulating the market price of a security. Spoofing can be a factor in the rise and fall of the price of shares and can be very profitable to the spoofer who can time buying and selling based on this manipulation.

**** The Silicon Valley Stock Scam Called: "Price-Fixing"**

A very simple type of fraud where the principles who publish a price or indicator conspire to set it falsely and benefit their own interests. [The Libor scandal](#) for example, involved bankers setting the [Libor](#) rate to benefit their trader's portfolios or to make certain entities appear more creditworthy than they were.

**** The Silicon Valley Stock Scam Called: "High Closing (finance)"**

High closing is an attempt to manipulate the price of a security at the end of trading day to ensure that it closes higher than it should. This is usually achieved by putting in manipulative trades close to closing.

**** The Silicon Valley Stock Scam Called: "Cornering the market"**

In [cornering the market](#) the manipulators buy sufficiently large amount of a commodity so they can control the price creating in effect a [monopoly](#). For example, the brothers [Nelson Bunker Hunt](#) and [William Herbert Hunt](#) attempted to corner the world [silver](#) markets in the late 1970s and early 1980s, at one stage holding the rights to more than half of the world's deliverable silver.[10] (https://en.wikipedia.org/wiki/Market_manipulation#cite_note-TEXAS-10) During the Hunts' accumulation of the precious metal, silver prices rose from \$11 an ounce in September 1979 to nearly \$50 an ounce in January 1980.[11] (https://en.wikipedia.org/wiki/Market_manipulation#cite_note-NYT-11) Silver prices ultimately collapsed to below \$11 an ounce two months later,[11] much of the fall occurring on a single day now known as [Silver Thursday](#), due to changes made to exchange rules regarding the purchase of commodities on margin.[12] (https://en.wikipedia.org/wiki/Market_manipulation#cite_note-TimeBubble-12)

** The Silicon Valley Stock Scam Called: "The Political Campaign Conduit Double Blind"

In this scam, government money is given to a Tesla, Solyndra, etc. who then money launder the cash through executive-held 501 c3 and c4 charities; and company assets and then provide DARK MONEY cash and services to political campaigns like Obama and Clinton election funds. In the case of Tesla, Google (an investor and boyfriend of Musk) supplied billions of dollars of web search rigging. Stock ownership in the companies and deals is traded for campaign funds. David Brock is a master of this kind of Dark Money money-laundering for political campaigns using PACS and pass-through spoofing.

Tesla and Solyndra investors have used ALL of the above tactics and more. Goldman Sachs and JP Morgan have thousands of staff who PROVIDE these stock market manipulation tricks to people like Elon Musk, Larry Page, Eric Schmidt, et al. These kinds of financial crimes and corruption account for the manipulation of over ONE TRILLION DOLLARS of ill-gotten profits annually!

They all run a constant shell game and ponzi scheme using shell corporations, fake family trusts, hookers, facade real estate, dirty CPA's, dirty corporate law firms, David Plouffe and James Halderman-type dirty operatives, lobbyists who are just bribery bag men, crooked CIA and FBI insiders and other criminal tools.

THE PUBLIC CAN NOW HUNT THESE CORRUPT PIGS DOWN LIKE DOGS:

Given the massive stimulus packages that are in force today and expected to be implemented going forward, regulators need to set clear guidelines for how and when such privileged information can be disclosed, and impose rigorous trading restrictions for investors with access to private information. Failure to do so always gives unfair advantage to some and damages the level playing field in financial markets.

To avoid providing such unfair advantage to selected executives, the SEC and the Department of Justice need to develop new procedures to incorporate potential illegal transactions derived from information about government intervention through diverse channels. Plaintiffs advocate for a more transparent and consistent protocol on information disclosure regarding government's loan programs to prevent similar events from recurring. For example, the government could channel the release of news about COVID-19-related stimulus interventions through a common platform to prevent leakage from diverse sources and reduce information asymmetry among investors.

The corrupt DFC loan to Kodak is the first of its kind under the Defense Production Act but not the first ever because DOE already created the pump-and-dump scheme for tech oligarchs. Nobody should be surprised by Kodak trying a proven corruption scam. Since we are in unprecedented times, government agencies and regulators need to make changes to adapt to the current situation and fulfill their mission to ensure a level playing field for investors even during this difficult period. Regulation never happens

in these scams because most California Senators and their families profit from these crimes and corruption.

In addition to Musk's insidious army of corruption douche-bag enablers at Goldman Sachs, there are also:

- An army of worker-bee financial scam artist operatives at corrupt Welles Fargo and Deutsche Bank. There are about 120 people in that set of insider operatives
- Jared Birchall, the head of Elon Musk's family office Excession LLC is a front man and bag man for the outside layer of Musk's public-facing scams
- Deloitte Consulting has 17 financial advisors dedicated to ponzi scheming the appearance of liquidity in the Musk Empire
- Law firm Wilson Sonsini has 42 lawyers and admins dedicated to delaying, deferring and holding off law-suits and anti-trust filings against Musk.
- McKinsey Consulting has 120 staff dedicated to authoring and distributing bullshit hype 'white papers' to Congress that sell budget ideas to the government that exclusively benefit Elon Musk. McKinsey is also in charge of getting people appointed or hired by the government who will provide payola and quid pro quo back to the Musk empire.
- Corrupt law firm Covington and Burling has 27 people dedicated to influencing and changing laws and public policy that will exclusively protect Musk. They put Eric Holder, Steven Chu and other top officials into the Obama Administration based on promises by those officials to protect and fund Musk.
- James Howard is one of over 56 private investigators that Musk has hired to dig up dirt on people that Musk does not like and to run attacks on them.
- In-Q-Tel is a rogue off-shoot of the CIA. Musk has hired a large number of In-Q-Tel staff to engage in CIA-class dirty tricks against competitors and former employees who expose Musk's lies.
- Gawker Media, AKA Gizmodo Media are a tabloid character-assassination-for-hire operation which Musk contracts and owns interest in. They are mission-ed to to destroy the lives of others, in cooperation with Google's servers. Payments for attack services, between all of the parties, have been uncovered.
- Google is an investor in Musk's operations and the bosses of Google are bro-mance boyfriends of Musk. Google controls most perceptions on the internet using psychological manipulation tactics taught to them by their investor: In-Q-Tel. In-Q-Tel also works for and with Musk. Larry Page, of

Google, and Musk got an apartment together and plan political schemes together.

- Elon Musk, or his associates have hired every high tech law firm that could go after him in order to conflict-out and law firms that might get hired to go after him. His top corrupt manipulator partners-in-legal crime include: Quinn Emanuel Urquhart & Sullivan, Fenwick & West, Connolly & Williams, Perkins Coie, Steven Farina, Raol Campos and hundreds of others. In fact, a competitor of Musk's was seeking a law firm to sue Musk and was told by Law firm Wilson Sonsini: "You can't sue Elon Musk because he and his Sandhill road Cartel control every high tech law firm in America..." In some cases, Musk has sent some of his lawyers to smaller business entities that want to sue Musk. Musk's lawyers pretend to be lawyers who are "offering to help" the opposition company but they are really there to covertly sabotage their legal efforts in order to protect Musk.

[Tesla](#) and CEO Elon Musk are facing dozens of lawsuits and investigations, according to public filings.

The costs of defense and settlements burden the car maker financially at a time when Tesla is already [cutting headcount](#), [closing stores](#) and [delaying loan repayments](#).

Among Tesla's most recent legal woes, the Securities and Exchange Commission has filed a motion to hold Musk in contempt of court. The financial regulators argue that Musk violated the agreement [they finalized with him and Tesla in October 2018](#) requiring the CEO to submit his tweets for review by the company's in-house counsel if they contained material business information and could potentially affect the company's stock price.

Musk is represented in this matter by John C. Hueston, formerly the lead prosecutor for the federal trial of Enron's Jeffrey Skilling.

Beyond the contempt case, here are some of the other cases and investigations Tesla and Musk are facing that could most impact the company.

- [NHTSA and NTSB](#) regularly investigate crashes involving Tesla vehicles and the use of "Autopilot" features. These agencies initiated new investigations in March 2019, after another Tesla-involved incident proved fatal for a Model 3 driver who collided with a semi-trailer in [Delray Beach, Florida](#).
- According to a [Department of Justice](#) statement, a former Tesla employee named Salil Parulekar was indicted in November 2018 for allegedly embezzling \$9.3 million from Tesla by diverting payments from one supplier to another. The potential case, which hasn't moved past the indictment, could reveal more about troubles with Tesla's supply chain.

- Two former Tesla security employees, [Karl Hansen](#) and Sean Gouthro, filed whistleblower complaints via the law firm Meissner Associates to the SEC. They claim, among other things, that Tesla [spied on workers](#), and covered up theft and narcotics trafficking at its battery plant in Sparks, Nevada.
- A former employee, [Marcus Vaughn](#), is pursuing a class-action lawsuit against Tesla in California alleging that the company ignored black employees' reports of rampant racism. Tesla is trying to compel arbitration, and the plaintiff's lawyers say they are fighting Tesla's motions.
- The National Labor Relations Board filed a [complaint in August 2018](#) accusing Musk of violating labor laws with a tweet on May 20 that employees wouldn't have stock options if they formed a union.
- Tesla-owned SolarCity has been the subject of multiple SEC investigations dating back to 2012, according to [Probes Reporter](#), a firm that publishes FOIA research for investors. (As of May 2108, SolarCity was still under at least one SEC investigation, said Probes Reporter CEO John P. Gavin.)
- Musk is being [sued by spelunker Verne Unsworth](#), whom Musk claimed without evidence was a pedophile and child rapist. Musk lobbed those dramatic accusations at Unsworth after the cave diver questioned the Musk's attempts to aid in the rescue of a Thai boys' soccer team. Unsworth was part of the successful rescue effort and was critical of Musk's approach.
- In a Delaware Chancery Court, shareholders are suing Tesla alleging that the company's [acquisition of SolarCity in 2016](#) was improperly handled by the board, benefitted six out of seven of Tesla's then-board members, and was ultimately a detriment to the company and its minority shareholders.

Analysis by legal research firm Plainsite found at least [38 securities actions](#) filed against Tesla or Elon Musk (or both) since 2010, the year the company went public. Plainsite – which founder Aaron Greenspan describes as a “legal transparency initiative” – scans public records across the US legal system to document the volume and types of litigation effecting major U.S. corporations. (Greenspan personally holds puts in Tesla today.)

By way of comparison, Greenspan says he found only 1 securities lawsuit against [Ford Motor Company](#) filed since 2016, and only 4 since 1996, although this does not include all Ford subsidiaries.

Along with the securities litigation, Plainsite also found 43 workers' rights cases, 14 deposit theft cases, and 20 vendor and government non-payment cases filed against Tesla since it went public in 2010. Of the 20 non-payment cases, 6 were from tax agencies in different states, Greenspan said.

Tesla also faces dozens of lawsuits around specific car-related issues, including allegations that Bluetooth doesn't work, that Autopilot has caused Tesla cars to swerve into the wrong lanes and more. Most car-specific lawsuits against Tesla focus on [the Model X](#). But Greenspan expects Model 3-related lawsuits to grow as the company sells more of these electric sedans. Even with all of these lawsuits, Musk has the taxpayer provided cash to buy off any judge, any court, any politician and any influence dynamic.

- Steve Davis runs operations to manipulate actual intent for Musk's The Boring Company.
- The pretend CFO's in Musk's cartel including Zachary Kirkhorn, Vaibhav Taneja, Deepak Ahuja, Eric Branderiz, etc., are fully aware of the lies and financial crimes that Musk's shell game is based. They need to be in prison too.
- Above and beyond the army of over 3000 corruption implementation employees and contractors, Musk #1 protection scheme is lobbyists and political intermediaries who pay bribes and produce quid pro quo and revolving door payola. Podesta Group, Roberti Global, David Plouffe, Jeff Burton, and over 150 other groups and individuals transfer the cash, PAC omerta funds, jobs, real estate, [sex](#) and other goodies to politicians. Senator Dianne Feinstein's go from working for Feinstein to working for Musk like a political conveyor belt. Bribes hidden via family trust funds and elaborate shell game corporations and off-shore snake holes are the bread-and-butter of the Musk existence.

These facts are known, they are documented in FBI, SEC, FTC, FEC and Congressional records. It is pathetic that Musk can operate and that he is not sitting in a federal prison cell! Elon Musk is a scammer, mobster, liar, pervert, drug abusing, narcissist, Senator-bribing sociopath! Musk can run and try to hide in Texas but there is now no place he can hide!

NOTICE: To the editors allowing idiot child "reporters" to support Elon Musk's BS:

We file complaints against each one of your writers who has accepted compensation in order to use your publication to promote falsehoods, lies and contrived public relations tripe for Elon Musk's narcissist self-aggrandizement campaign designed to cover-up his crimes, scams and corruptions. Your writers have full knowledge of the proven facts in investigative documents such as:

[How The Sociopath Venture Capitalists of Silicon Valley Prop Up Elon Musk And His Failed Tesla Motors.pdf](#)

[How Does Elon Musk Maintain His Corrupt Empire Of Lies Without Getting Shut Down By The Government?.pdf](#)

[TESLA MOTORS UPDATE #3.pdf](#)

[MUSK REPORTER.pdf](#)

<http://www.the-elon-musk-problem.com>

[THE SICK CORRUPT EMPIRE OF ELON MUSK - THE MOVIE](#)

[THE BOOK OF TESLA EDIT ODT V.2.7.pdf](#)

[THE DIRTY DEEDS OF SILICON VALLEY.pdf](#)

and hundreds of thousands of previous news reports, FBI and SEC reports. These facts are easily found online by anyone of, at least, grade-school intelligence level. (ie: <http://american-corruption.com/public> or Reddit or Voat..or pretty much anywhere...). If your reporters ignore these facts then your publication will suffer revenue loss, stock market hits, devaluation, reports of your [sex abuses](#) and other sadness!

We file formal complaints against each one of these skills with industry associations, your investors and on public forums.

Your writers who selectively author fake-news hype instead of investigative journalism will be exposed and punished. Your publication's market value and credibility will be greatly diminished by this information manipulation. (ie, You WILL LOSE YOUR MONEY!) Such fake news articles should be removed and accurate counter-point should be published. Without the proper correction, it is impossible to see how your publication could not follow Gawker, San Diego Magazine, The Outline, and the rest into the spiral of bankruptcy and termination.

Thank you for your kind attention to this matter.

=====

THE CRONY CAPITALISM THAT POWERS THE U.S. DEPT OF ENERGY

White House Staff including Rahm Emanuel, Bill Daley, Jay Carney, David Plouffe, Robert Gibbs, Steve Rattner, David Axelrod, John Podesta, et al; and The Secretary of Energy Steven Chu and the Chief Counsel for the United States Department of Energy Daniel Cohen and Bill Cooper were, (from 2007 forward), either financed by, friends, with, sleeping with, dating the staff of, holding stock market assets in, promised a revolving door job or government service contracts from, partying with, personal friends with, photographed at private events with, exchanging emails with, business associates of or directed by; our business adversaries, or the Senators and Department of Energy politicians that those business adversaries pay campaign finances to, or supply political digital search manipulation services to. Criminal U.S. Senators coordinated and profited in these schemes. Their own family members have now supplied evidence against them. Elon Musk and his frat boys display their self-aggrandizing vanity in sociopath glory because nobody tells them "no". Now we are calling them out!

From 2007 forward, The White House and The Department Of Energy were controlled by the Silicon Valley tech oligarchs for monopolistic profiteering! That is a violation of the law, the Constitution and the American Way. The named person's we have presented to the FBI, DOJ, SEC and other agencies, engaged in crimes to personally profit in the stock market and political venues. At the same time they operated the command and control of millions of dollars of defamation, character assassination and black-list attacks against us for reporting their crimes. These perpetrators are now being exposed, arrested, indicted and drained of their ill-gotten profits. We are owed our damages compensation and we will not rest until we get it! Every member of the public is invited to help crowd-source the termination of these corrupt crooks.

We worked for, with, in and around the White House and The Department of Energy. We were at the homes of the most famous people in government and their Silicon Valley financiers. We have cooperated with top law enforcement and Congressional investigators. Additional whistle-blowers have provided our effort with even more evidence. Ourselves, and investigating agencies, have absolute proof of the crimes, corruption and illicit activities and the ongoing cover-ups.

=====

STATE SPONSORED REVENGE AND REPRISAL PROGRAMS ARE OPERATED BY PUBLIC OFFICIALS

Agency staff were ordered to harm Applicants by manipulating their benefits in order to deny, delay,

obfuscate and reduce their income as reprisal for their assistance to law enforcement in a political corruption and money laundering matter. Agency staff, ranging from the lowest level staff at the San Francisco, San Mateo, Los Angeles and Marin offices, and up to the director headquarters offices, participated in this reprisal-vendetta-revenge action to harm Applicants. Applicant's peers have filed DOJ and FBI criminal referrals, launched federal investigations and the assertions have been proven in numerous IG, FBI, Congressional and major news media investigations. Agency offices have failed to provide responsive FOIA requested data, hearing investigation data and fair responses because some of their staff are STILL operating a criminal cover-up which has now been update-reported to the FBI, Congress, the IG, the AG and investigative reporters.

Other federal agencies have complied, verified and provided the requested deliverables. SSA and DOE have pointed the searchlight of suspicion on themselves, laser-like, by their overt failure to comply, unlike every other agency. Ironically, the political financing of their executives and their personal relationships "happens" to be with the exact same Silicon Valley oligarchs under felony criminal investigations. The stock market brokerage records, family trust accounts, PAC trace-routing, Interpol records and SEC investigation records proves it!

Unfortunately for the crooked agency staff, some Applicants have the authority, law enforcement credentials and training to arrest any person at their home or office and remand them to the FBI, DOJ or Sheriff. SSA and DOE staff should not longer screw around! For example: Every "unsigned" SSA email is tracked to the individual author by their IP address, device IMEI, web camera, building key card, door camera, parking lot use chart, building camera, vehicle tracking circuits, text dba records, keyboard UI/UX patterns, motherboard ID #, DNS routing, stingray read-outs and a vast number of other metrics. Applicant investigation peers know the exact person that wrote every SSA email or document or file request. There is no such thing as an anonymous SSA email. Transparency is the Applicants middle name. The FBI and CIA people that SSA and DOE insiders think are their "buddies" may actually be the APPLICANTS buddies!

You will either give the Applicant his money and damages compensation, from his 2007 benefits filings, forward, or suffer the consequences of the rapid acceleration of one of the largest investigations in modern history, supported by millions of voters with a shared peer-to-peer forensics social media network, the FBI and Congress. With the push of a single button, our latest info can be in the inbox of every blogger and independent investigative journalist in the world, in minutes.

History has proven that non-corrupt portions of federal agencies and public service law and community action firms have executed on their willingness to expend millions of dollars of resources to fight this injustice. Every individual involved in this at SSA and DOE are on a forensic database. No person at SSA or DOE who uses our government as a garage sale for corruption favors or a kill mill for political reprisals will avoid the 100% legally executed consequences. They will be targeted and prosecuted even more profoundly than the Applicants waere targeted with IC-type hit jobs.

This felony criminal investigation case, is documented on thousands of websites and in dozens of federal court case records in which Applicant won the case or was vindicated in the case and in thousands of news websites. Applicants researchers and investigators disagree with any decision by any agency which causes a delay in response which puts the applicants in jeopardy for their life and safety. Testifying, and/or reporting about this crime has resulted in the [death](#), potentially by [murder](#), of the following individuals who reported to the authorities about this crime matter: Rajeev Motwani; Gary D. Conley; Seth Rich; Philip Haney; David Bird; Doug Bourn; Misti Epstein; Joshua Brown; Kenneth Bellando; Moritz Erhardt; Imran Aliev; Kate Matrosova; David Drye; Vincent Foster; Kathy Ferguson; Duane Garrett; Eric S. Fox; Judi Gibbs; Berta Caceres; Suzanne Coleman; L.J. Davis; John Hillyer; Stanley Huggins; Sandy Hume; Shawn Lucas; Gary Johnson; John Jones; John F. Kennedy, Jr.; Stephen Ivens; Mary 'Caity' Mahoney; Eric Butera; Danny Casolara; John Ashe; Tony Moser; Larry Nichols; Joseph Rago; Ron Brown; Bob Simon; Don Adams; Peter Smith; Victor Thorn; Lori Klausutis; Gareth Williams; Daphne Caruana Galizia; James D Johnston; Dave Goldberg; Loretta Fuddy; Paul Wilcher; Gary Webb; Beranton J. Whisenant Jr; Stanley Meyer; Jon Parnell Walker; Tyler Drumheller; Barnaby Jack; Dominic Di-Natale; Barbara Wise; Ilya Zhitomirskiy; Jeff Joe Black; Robin Copeland; John Wheeler; Ashley Turton; Michael Hastings; Antonin Scalia; David Koschman; David Werner; Alex Okrent; Kam Kuwata; Larry Frankel; And hundreds more connected to this case who suddenly, and strangely, turned up dead in this case and, ironically, their [deaths](#) all benefit the suspects in this case. Applicants are also whistle-blowers who have been previously attacked in reprisal and who have been threatened with continued harm and death.

Because this case involves a huge number of [deaths](#), spies, trillions of dollars of energy industry funds, hit-jobs and epic political dirty tricks contracts there is a warning in effect to every suspect on "the list". "If any other principle whistle-blower in this case is killed, within 24 hours of their death, every person on "the list" will experience the worst possible outcome!"

Any delay, obfuscation, cover-up, FOIA refusal or other obscuring tactic by each and every member of an agency employee or contracting entity will be prosecuted on a person-by-person basis. Each employee or official who causes, by their action, further harm to the Applicants will be sued personally, have their assets garnished and will have a formal criminal referral authored and submitted to the FBI, DOJ, FTC, Congress and the news media. Applicants have sued the highest level personnel in the government for corruption, launched FBI and Congressional investigations against them and had them removed from their jobs and placed under permanent surveillance. The court and news records prove this fact. Do not imagine that any reprisal action by a public agency staffer will go unnoticed or unpunished by federal law enforcement, public forensics and major independent news media investigations.

Pay the Applicants their damages compensation, whistle-blower fees, back-fees and offset monies NOW!

The solipsistic self-aggrandizing corrupt pigs in San Francisco's City Hall and Pacific Heights are being hunted down (100% legally) and eviscerated by the FBI, public task forces like ours, the news media, private citizens and the biggest email leaks in history. Hundreds of people will be taken down. The few arrests you have read about in the media are only the beginning. We are all starting at the bottom of the cesspool and working our way up, all the way through Elon Musk, Eric Schmidt, Larry Page, et al, and up to the White House. They will not escape, even in death. Roger Boas, Jeffrey Epstein, et al, may not still be lurking around but the truth about them will live on FOREVER!

=====

THE KEY PERPETRATORS:

The Organized Crime Bosses And Their Assassin Operatives That Are Being Terminated.

These are the people known as "The Deep State", "The Silicon Valley Cartel", "The Tech Mafia", et al:

“To date, every single one of the targets that attacked us: 1.) have been sued; 2.) investigated by the government and our private investigators; 3.) had case files opened on them by the IRS, DOJ, GAO, FBI, FEC, SEC, FTC and others; 4.) placed under surveillance; 5.) had whistle-blowers and ex-staff expose them; 6.) been tracked across every social media post that has ever been made about them; 7.) had all of their illicit campaign funding and covert PAC cash exposed; 8.) had all of their family trust and shell corporation hiding places tracked and exposed by AI forensic software that works around-the-clock and 9.) placed on law enforcement watch-lists. Even the “untouchables” like Musk, Tesla, Google, Facebook, et al, now have nut-crunching law-suits filed against them, with more coming. There is no place to hide! You tried to kill us and we killed you back you criminal scum-bags!”

The following Parties participated in the scam, thought they were “untouchable” and found out that the arm of the law is very long, the hatred of the public for corruption is profound and that hundreds of public service groups have identified, tracked and assisted in their termination. This is the current list of the primary political mobster-scammers in this corruption who are all connected by financial, email and forensic FBI, SEC, FTC and CIA-class evidence. It is well known that every significant hacking and surveillance tool from the CIA, NSA, Fire-Eye and the FSB has been leaked on to the internet. Every teenage hacker is now exposing the last 20 years of these crooks crimes. They are all under deep investigation, surveillance and targeted for 100% legal termination using all the info found freely on the web and whistle-blower tips:

The Mob Bosses That Colluded, Organized and Planned These Srock Market Schemes Together:

- **Google/Alphabet/YouTube** – Hiding under the guise of "Alphabet"; Charged with manipulation by multiple nations and national organizations; charged with crimes; charged with privacy harvesting frauds against the public; raided for tax fraud; loss of public trust; charged with campaign rigging by TV shows, presidential candidates, federal investigators and news media; under investigation for stock market pumping;
- **Steven Chu** – Secretary of Energy (Sent packing/fired/forced to resign. Sued for corruption, publicly shamed by news media and Congress. Under ongoing investigation and surveillance)
- **The NVCA, AKA National Venture Capital Association**, is the lobbyist and Cartel organizer behind much of the misdeeds of this group, they bribe politicians, organize anti-patent campaigns and promote a RICO-violating anti-trust law violating set of tactics to protect their members and to harm competitors, most of the women and blacks that have worked at the NVCA have said they experienced abuse. The NVCA has set-up a tactical program to put a global funding blockade on any group, CEO or inventor who competes with their existing companies.

- **SpaceX** and their Star Link Web satellites are a domestic spying operation. They send all of the data that goes over their links to privacy abusers, data harvesters, and political spying operations. Friends don't let friends use Star Link. Any 14 year old hacker can hack into Star Links web streams. Star Link is a danger to global privacy on an epic scale.
- **Lachlan Seward** – Manager to Steven Chu (Sent packing/fired/forced to resign. Sued for corruption. publicly shamed by news media and Congress. Under ongoing investigation and surveillance))
- **Rahm Emanuel** – White House strong-arm (Sent packing/fired/forced to resign and his Chicago finance head was indicted for Corruption)(Under ongoing investigation and surveillance)
- **Robert Gibbs** – White House press secretary (Sent packing/fired/forced to resign)(Under ongoing investigation and surveillance))(accused of political bribery and kickbacks; tax evasion, and more...)
- **David Axelrod** – White House strategist (Sent packing/fired/forced to resign)(Under ongoing investigation and surveillance))(accused of political bribery and kickbacks; tax evasion, and more...)
- **Barack Obama** – White House leader (Under investigation. Universally disdained in the press. shunned by his own party)
- **Larry Summers** – White House finance head (Fired)(Under ongoing investigation and surveillance))(accused of political bribery and kickbacks; tax evasion, and more...)
- **Bill Daley** – White House strong-arm (Sent packing/fired/forced to resign)(Under ongoing investigation and surveillance))
- **Steve Rattner**- White House Car Deals Director working in the West Wing and then with In-Q-Tel (Fired- Indicted in NY State for SEC Fraud/Corruption)(Under ongoing investigation and surveillance))
- **Eric Holder** – Attorney General- DOJ. Eric Holder was nominated and appointed by the very individuals who ran the scam, created the marching orders, got the insider cash and ordered the hit jobs on their competitors. He ran the cover-up and halted any investigations into the crimes in order to protect his corrupt backers and business partners. He has been financially connected to every person, group and business who is charged with organizing and operating the scam. (Forced to resign) (Charged with staff & VC Protections and blockade of FBI and Special Prosecutor deployments in order to run the cover-up)(Under ongoing investigation and surveillance)
- **Larry Page** – Owner- Google (Under ongoing investigation and surveillance)(accused of political bribery and kickbacks; tax evasion, and more...)

- **Eric Schmidt** – Owner- Google (Under ongoing investigation and surveillance)(accused of political bribery and kickbacks; tax evasion, and more, a national coalition is actively exposing his sexual perversions, sex penthouses, etc...)
- **John Doerr** – Owner – Kleiner Perkins. “Godfather” – Silicon Valley Cartel (Under ongoing investigation and surveillance))(accused of political bribery and kickbacks; tax evasion, and more...)(All of his personal assets, investments and portfolio holdings are under investigation and targeted for extinction)

 - **Gabrielle Darbyshire** - Nicholas Guido Denton’s character assassin
- Investigations have also revealed that the White House and California Senators hired the character assassination and defamation attack services: *Cardinal & Pine; Pacronym, Acronym; The Americano; Investing in US; Shadow Inc; Courier Newsroom; IN-Q-Tel; Gawker Media; Jalopnik; Gizmodo Media; K2 Intelligence; WikiStrat; Podesta Group; Fusion GPS; Google; YouTube; Alphabet; Facebook; Twitter; Think Progress; Media Matters); Black Cube; Correct The Record; Orbis Business Intelligence, Undercover Global Ltd; Stratfor; Jigsaw; ShareBlue/Acronym; Versa LLC; American Ledger; Supermajority News; New Venture Fund; Sixteen Thirty Fund; Cambridge Analytica; Sid Blumenthal; States Newsroom; Hopewell Fund; Open Society.; David Brock; AmpliFire News; American Bridge; Plouffe Consulting; Pantsuit Nation; MotiveAI; American Bridge 21st Century Foundation; Priorities USA; PR Firm Sunshine Sachs; The American Independent Foundation; Covington and Burling; Buzzfeed; The American Independent; Perkins Coie; Secondary Infektion; Wilson Sonsini* and thousands more to run hit-jobs, character assassinations, dirty tricks and economic reprisal attacks on any applicants who reported the crimes. Each of those companies are now under federal and civil investigation. Most of these businesses offer the service of manipulating elections and news coverage in order to steer stock market profits into the pockets of billionaire clients at the expense of the taxpayer and Democracy. They hide their transactions via money-laundering. All of these services, when focused on individual citizens, are lethal.

Please report your complaints about Tesla, Google, Match.com, OK Cupid, Netflix, Facebook, Kleiner Perkins, Sony Pictures (and the other tech cartel members) for the active investigations and federal lawsuits now in progress. By filing a complaint and telling your story, you can help identify trends and patterns of questionable business practices that will contribute to law enforcement and consumer protection efforts. You can be certain that these particular cases will get driven hard and pushed before Congress. The more reports we can get filed on these bad guys, the bigger the cases we can get processed. File your complaint at <http://www.ftc.gov/complaint>

Are you wondering [why you don't see any of the true facts on the "mainstream" internet or "news" sites](#). The tech Taliban of the internet have colluded to become an information and ideological control empire. If they can make you think, act and vote like they want then they can put their candidates in office who will give them trillions of dollars of government contracts. It has already worked. They all: sleep with each other; go to each other's parties; hire the same lobbyists, lawyers, Goldman Sachs fund managers; marry and date only people from the same frat houses and sororities; have the same homosexual agenda; finance the same PAC's; hide their money in the same off-shore bolt holes; instruct their HR departments to only hire young, naive, easily brainwashed, radical dyed-hair hippie-types; have bank accounts that have received CIA or In-Q-Tel cash; control the National Venture Capital Association so that nobody who competes with them can get funded; practice exclusionary culture, ie: while screaming about women's rights and BLM they never hire women or blacks; buy off the U.S. Patent Office to keep from having to pay for stealing most of their technology; own the servers and control equipment that operates 90% of the internet; etc. The Tech Taliban are: Netflix, Google,

Alphabet, Youtube, LinkedIn, Amazon, AWS, CNN, Facebook, Tesla, SpaceX, Survey Monkey, etc.

[They do what they do to get profits from politicians they put in office.](#)

=====

TAKING THEM DOWN:

The greatest success in shutting down their efforts has come from two tactics:

1.) Forcing government agencies to sue them with RICO and Anti-trust lawsuits and by gathering groups of people to sue them with Class Action lawsuits. Lawyers will do Class Actions at no cost to you if you get enough people together.

2.) Using a CKB Procedure on each one. How the "Corruption Kill Box" (CKB) works: A CKB Procedure combines federal police investigations created by formal filed criminal referrals (which any member of the public can submit) and Form 302 overview drafts, public class-action lawsuits, massive news media disclosure blasts, formal regulatory agency complaint filings, individual lawsuits against political and agency executives, documentary film production and distribution, [crash the crooks stocks](#), the promotion and organization of Congressional hearings, crowd-sourced social media public forensics and open-source AI financial crimes tracking software. The procedure is an extinction-level event with a 100% success rate against corrupt entities. CKB's only work on the corrupt, so non corrupt parties are safe from it's effects.

ANY member of the public can engage in these totally legal anti-corruption actions. Don't sit around and complain about these criminals. They own parts of the government.

YOU have to do something!

Just do it!

<http://how-they-killed-the-electric-car.com>

(Pass this along to others who might partner up and take action)

Every public figure we file a complaint with that does nothing or that runs a cover-up is listed on a document and in a dossier that they will have to answer for later!

DAILY UPDATES TO THESE CASE DOCUMENTS ARE PROVIDED BY PUBLIC TASK FORCE MEMBERS FROM AROUND THE WORLD
