

DOE ANNOUNCES \$1 BILLION DOLLARS OF ADDITIONAL CLEANTECH FUNDS CASH, BUT WHERE IS THE FIX FOR THE OBAMA CORRUPTION?

- **Department of Energy to give out billions more dollars, to crony's, without addressing the hundreds of applicants it sabotaged and put out of business the first time around**
- **Just because Steven Chu was sent packing, it does not mean the corruption and application rigging has ended**
- **Where is the public transparency? Why are secret reviewers all campaign insiders? Is Moniz Chu 2.0? Who will make things right?**
- **They claim the cash is to help but nobody gets the cash except campaign financiers!!!!**

DOE Finalizes \$1B New Loan Guarantee Authority for Fossil Fuel, Renewables, and Energy Efficiency Projects

| Sonal Patel

The Department of Energy's (DOE's) authority to issue loan guarantees officially received a \$1 billion boost, which will be split between its Advanced Fossil Energy Projects solicitation and Renewable Energy and Efficient Energy Projects solicitation.

The agency has finalized the additional loan guarantee authority that President Obama announced in August. It means that more loan guarantees are available under the DOE's Loan Programs Office (LPO) solicitations. The Advanced Fossil Energy Projects solicitation (which also includes distributed energy projects) now has an additional \$500 million, making a total \$8.5 billion available. It also adds \$500 million to raise the total for the Renewable Energy and Efficient Energy Projects solicitation to \$4.5 billion.

[Supplemental guidances issued](#) on Oct. 21 also add new rounds of Part I and Part II application deadlines that extend well into 2016.

DOE loan guarantee applications typically undergo a two-part review: Part I determines the initial eligibility of a project and whether it is ready to proceed, and Part II, for applications that clear Part I, includes the full application process. The LPO then grants a conditional commitment to selected applicants, who next undergo the complete underwriting process and negotiation of terms for the loan guarantee.

“We hope these announcements continue to encourage innovative energy projects to [apply for Title XVII loan guarantees](#) and we look forward to doing more deals in the future,” said LPO Executive Director Mark McCall in a statement.

The LPO now has open solicitations in four areas: the \$8.5 billion Advanced Fossil Energy Projects solicitation; the \$4.5 billion Renewable Energy and Efficient Energy Projects solicitation; the \$16 billion Advanced Technology Vehicle Manufacturing loan program; and the \$12.5 billion Advanced Nuclear Energy Projects solicitation. The office had reportedly received \$12 billion worth of proposals as of July 2015.

To [date, the agency has disbursed \\$32.4 billion to 30 projects](#) under Section 1703 (\$8.33 billion of that to Southern Co.’s Vogtle reactors and \$2 billion to AREVA’s Eagle Rock Enrichment Facility), Section 1705 (which expired in September 2011 and furnished mostly renewables, transmission, or biofuels projects with loan guarantees), and advanced technology vehicles manufacturing.

Tesla Motors and the Road To Corruption

By Amy Landin- Washington Digital Review

It began as an idea by a couple of guys (none of whom were Elon Musk) who wanted to stiff it to the petroleum industry. It ended with political crime, corruption and the theft of tens of billions of taxpayer's dollars.

Jason was a junior level accounting major at Georgetown University. He had been recruited by Lachlan Seward, the loan program coordinator for the United States Secretary of Energy: Steven Chu. Jason thought that his low pay would yield big resume points, because, on this late October evening, he was going over the use of funds for a twenty five billion dollar "special" government fund. It was "big ticket" project and he knew he would be able to impress Wall Street, when he went job hunting at the end of this internship.

There was one problem, though, as he poured over the papers spread across the conference table on the upper floor of 1000 Independence Avenue, in the U.S. capital.

As he looked at the figures in front of him, again, he had a shiver go up his spine.

It wasn't excitement, it wasn't anticipation, It wasn't the chill of the office. He was beginning to think that something was horribly, horribly wrong.

The problem was, he just realized he was being ordered to arrange the materials in order to hand the taxpayer money over to the least

qualified applicant. Additionally, the least qualified applicant was best friends with, and helped nominate, Secretary of Energy Steven Chu.

The applicant was Tesla Motors.

Nearly a billion dollars of taxpayer money has been spent on media hype about Tesla Motors and Elon Musk. Almost the full extent of that media smoke-screen, and Internet search engine rigging obfuscation effort, has been dedicated to keeping the public from finding out the truth about Tesla Motors.

Tesla was started by a couple of tech nerds who really hated oil companies. It labored for a number of years with little to show. Elon Musk then showed up, to run a hostile take-over of Tesla, and threw the founders out, during some very nasty lawsuits in which Tesla founder: Martin, accused him in court papers, and blogs, of being a fraud and a weasel.

Musk, and his Silicon Valley Cartel, had figured out a way to monopolize lithium mining deals in Afghanistan, and other war-profiteered regions. He had hooked up with Senator's Feinstein and Reid, via some spectacularly crooked insider stock, real-estate and supplier contract kick-back schemes, in order to grease the skids for a business conglomerate based on government hand-outs.

The \$25 billion dollars had come from the U.S. taxpayers under a law called the Section 136 law. It was no ordinary pig trough bill. It had restrictions which, if violated, would meet the legal requirements of a felony-grade crime. John Doerr, Eric Schmidt and Elon Musk had crafted the schemed up portion of the Section 136 Advanced Technology Vehicle Manufacturing fund. It was rigged to put tens of billions of taxpayer dollars right in their pockets, via an elaborate smoke-and-mirrors scam.

What Jason was looking at showed, in a side by side shoot-out, with all 200+ applicants, that Tesla Motors, compared to all others, was not only the least qualified but was in violation of the very law that

operated the fund. Additionally, Tesla's investors were campaign financiers, and they had been demanding that the applicants who competed with them, get "nixed".

The documents and the Treasury, SEC and GAO reports seemed to indicate that something was wrong in Tesla-land.

The law said that the applicant must use existing factories: Tesla was applying to build new real estate in order to benefit Diane Feinstein's husband's realty holdings.

*The law said that the applicant must **not** be on the verge of bankruptcy yet Elon Musk had told Energy Department executives that Tesla would go bankrupt without the cash. Musk later confessed to this in on-camera interviews.*

The law said that Tesla must comply with NEPA non-toxicity rules yet the Tesla factories were known to emit cancer-causing materials and had killed thousands of workers in China. Additionally, a plan to build a Nevada Tesla battery factory was found to be so toxic that it could kill entire towns from the toxic run-off. Additionally, disposal of Tesla batteries creates a domestic toxic dump as bad as Three Mile Island.

The law said that the money must be used to create U.S. jobs, yet Tesla was planning on (and, in fact, did) hiring a large number of H-1B off-shore workers.

The law said that the awardee had to pay an awarding fee. Tesla never paid the fee and their staff even bragged about the waiver in a public presentation.

The law said that the awardee had to have a factory-ready design. During the entire time of Tesla's application; not only did they not have any design but they used the money they got from the taxpayers, to start from scratch and figure it out. Their submitted napkin design was \$100,000.00 over-budget PER CAR, during the DOE application period time. Nothing in the DOE Tesla application technical design "rough

idea" has any resemblance to the car that actually emerged from the "factory".

Outside of the Section 136 law, federal criminal law says that you must not bribe politicians to get awarded federal money. Tesla has been shown to have bribed the very politicians that awarded the taxpayer cash.

The section 136 law said that the applicant must have a top-level "debt ratio". A debt ratio is how much money has been dumped into a company vs. the likelihood of paying all of the investors back. Tesla had THE WORST DEBT RATIO of all 200+ applicants. In other words, based on Treasury investigators analysis: Tesla had burned up so much money, with so little potential, and so little volume demand, that the ability to survive was almost nil. Department of Energy staff, who were, exclusively, hand-holding Tesla through the DOE program, helped arranged for a Detroit car company to temporarily acquire some Tesla stock in order to help Tesla fudge their book-keeping, so that the debt-ratio would falsely appear to balance just long enough for the award of taxpayer cash to be issued. Most of Tesla's main sales were to it's own investors and political fan-boys, in order to inflate order reports.

Tesla's application promised to sell at least 200,000 cars by 2012. In fact Tesla, as of today, has barely sold a tiny fraction of that number, after missing every milestone in it's original application, and after wasting more money, per car, than any other car maker in manufacturing history.

These violations of the rules of the programs, the laws of the nation and the realms of morality went on and on. The list was long. Jason was now sweating.

Here was a company that appeared to be a total sham. It was a hyped up, internet-buzz calculated, stock market skim machine. It's supporters were the leaders in the use of "Flash Boy" stock market manipulation algorithms. Tesla shared the same plot of land with

another company, which involved most of the same people. That other company was the soon-to-be-FBI-raided SOLYNDRA.

What was Jason going to tell his boss at The Department of Energy? He visualized his career swirling around the rim of a toilet bowl as he tried to form the words, in his mind, to tell his boss that the applicant, called Tesla Motors, was a stink bomb.

Jason never got to have that meeting with his boss. The next day the Department of Energy controller, who sat in between the boss and Jason, took the briefing from Jason. He complimented Jason on his excellent work but said that he would handle the revelation with the boss.

Not that many weeks later, Jason was shocked to see Steven Chu on CNN announcing the award of the vast sums of the taxpayer cash, via the \$25 Billion dollar "special fund" to Elon Musk and Tesla Motors.

What had happened?, he wondered. What could have erased a volume of dark revelations from review? Having not yet heard of "Lois Lerner" or the "Hillary Email Caper" yet, he could not imagine what had gone sideways.

*He made his way, with urgency, to the controller's office, where he had first disclosed his findings. The controller looked up as he walked in, gave a commiserating expression and simply said..." **...I know, how you must feel about now..**"*

"There is nothing you can do except forget that this ever happened. We got a memo. This memo!** (he held a piece of paper up, facing away from Jason). **"I can't ever show it to you, but it is a game-changer."

Jason saw the memo, lit from behind, as the controller held it, facing away from Jason, but back-lit by the setting sun. It had a very distinct blue circular logo, at the top, and a watermark that is like no other in the world.

The White House had ordered the wave-through of their campaign financier's company despite all of the known false-hoods, misdeeds and out-right lies that Tesla had engaged in.

[Submitted by Richard Ebeling via EpicTimes.com.](#)

Since the economic downturn of 2008, the critics of capitalism have redoubled their efforts to persuade the American people and many others around the world that the system of individual freedom and free enterprise has failed.

These critics have insisted that it is unbridled capitalism, set loose on the world, which is the source of all of our personal and society misfortunes. We hear and read this not only in the popular news media and out of the mouths of the political pundits. We see it also in the election of a radical socialist to the leadership of the British Labor party, and a self-proclaimed “democratic socialist” riding high in the public opinion polls for the Democratic Party’s nomination to the U.S. presidency.

The first observation to make is that many if not most of the social and economic misfortunes that are most frequently talked about

are not the product of a “failed” free enterprise. The reason for this is that a consistently practiced free enterprise system no longer exists in the United States.

The Heavy Hand of Regulation

What we live under is a heavily regulated, managed and controlled interventionist-welfare state. The over 80,000 pages of the Federal Register, the volume that specifies and enumerates all the Federal regulations that are imposed on and to which all American businesses are expected to comply, is just one manifestation of the extent to which government has weaved a spider’s web of commands over the business community.

The Small Business Administration has estimated that compliance costs imposed on American enterprise by this mountain of regulations maybe upwards of \$2 trillion a year.

At the same time, the tangled web of corrupt government-private sector relationships is also reflected in the size and cost of special interest lobbying activities connected with the Federal government.

According to the non-partisan Center for Responsive Government, in 2014 there were almost 12,000 registered lobbyists working in Washington, D.C. Their job is to influence the writing of legislation that serve special interest groups attempting to obtain sectorial tax breaks, anti-competitive regulations or market restrictions, redistributions of wealth, or taxpayer funded subsidies and protections from the realities of free market competition and trade, or to advance various ideologically motivated “causes.”

Spending Big Money to Plunder Others

The Center for Responsive Government, which tracks who lobbies and for what purposes and causes through the targeting of specific holders of or contenders for Federal elected office, including the Presidency and both Houses of the U.S. Congress, estimated that in 2014 lobbyists spent nearly \$3.25 billion in the pursuit of privileges for some at the expense of others in society.

Just alone in 2013-2014, over \$500 million dollars was spent on lobbying activity by the financial, insurance, and real estate sectors. Ideological and single-issue groups spent more than \$352 million. Lawyers and lobbyists spent \$151.5 million; health industry companies spent \$142 million; and labor unions “invested” \$140.6 million on lobbying.

Communications and electronic companies spent \$116 million; energy and natural resource sector, \$115 million; agribusiness, \$77 million; construction companies, \$67.7 million; transportation firms, \$61 million, and defense companies, \$25.4 million.

Based on the Senate Office of Public Records, the Center for Responsive Government calculates that lobbyists spent close to

\$41 billion on lobbying activities over the last 15 years, since the beginning of the twenty-first century.

These billions of special interest-serving dollars have influenced and affected the spending of trillions of dollars of Federal government expenditures over the same decade and a half. The lobbyists work with and use those who hold high political office so the special interest and ideological groups who employ them can plunder many others in American society; they can be viewed as among the most successful enterprisers in the country.

The Best Politicians Money Can Buy

But the symbiotic relationship between politicians and special interest groups of all types does not begin or end with the formal lobbying for legislative, regulatory and fiscal privileges and favors in the halls of Congress and the White House in Washington, D.C.

It goes on all year round all over the country in the form of campaign and electioneering contributions to get those elected or reelected who can be depended upon to direct the powers of government in ways that interest groups and ideological activists desire and from which they hope to benefit.

Again according to the Center for Responsive Politics, in 2013-2014, individuals and PACS donated over \$1.6 billion to 1,671 candidates of both major political parties running for office in the Senate and the House of Representatives. Democratic Party candidates received \$736 million, while Republican Party candidates received \$901.5 million.

While it may seem unseemly to suggest such a thing, these amounts for legislative lobbying and campaign funding, of course, do not include more millions of dollars that grease the palms of

those in political power or who want to be in those lofty positions that represent funding that are outside the official channels in the form of “gifts,” travel junkets, off-the-books expense accounts, and out-and-out bribes of one type or another.

The real world of corrupted and corrupting crony capitalism includes more than lobbying expenditures and campaign contributions to have ringside seats in the halls of political plunderland.

The media has been in a frenzy with the revelations that the Volkswagen automobile company manipulated information about emission standards on its diesel vehicles to deceive environmental regulators in both the United States and Europe. This is being portrayed by many in the media as another example and “proof” of the consequences of unbridled capitalism, when left outside of sufficiently tight and demanding government regulation and intense oversight.

Government Partnerships and the Volkswagen Scandal

However, a closer look shows that this is, instead, another example of the result arising from government, business and labor union “partnerships.” In Germany, labor union representatives sit on the executive boards of large companies and corporations that work closely with various levels of the German government to attain political and “social” goals and objectives very different and separate from what a truly free market company does in pursuing peaceful and honest profits in the service of consumer demand on open, competitive markets.

On September 25, 2015, *The New York Times* quoted a former Volkswagen executive who said:

“There’s no other company where the owners and the unions are working so closely together as Volkswagen. [Volkswagen] guarantees jobs for over half the supervisory board. What management, the government and the unions all want is full employment, and the more jobs, the better. Volkswagen is seen as having a national mission to provide employment to the German people. That’s behind the push to be No. 1 in the world. They’ll look the other way about anything.”

In such a politicized market economy, working for and serving “national” and “social” interests become the guiding principle of business decision-making. Not only does it lead to wasteful and inefficient economic business operations having less or sometimes nothing to do with cost-effective management and allocation of labor and resources to make better, newer and less expensive products, it also corrupts the individuals participating in these activities.

Breaking one or more regulatory standards imposed by government on these enterprises is merely one way of “doing

business” to advance other political goals such as “jobs” and “full employment” that are expected as part of the “partnerships” with local and national-level politicians and labor union leaders.

The only thing expected from the business enterprises in these intricate political webs is: Don't get caught. If you do, then your political partners become like Captain Renault, the prefect of police in the 1942 movie “Casablanca.” When Renault orders the closing of Rick's Café, the owner asks him on what grounds. Renault declares that he is “shocked, shocked” to discover that there is gambling going on in the café. At which point the roulette coupé appears with a stack of franc banknotes in his hand and says to Renault, “Your winnings, Sir.”

Volkswagen got caught, and will pay handsomely in financial and other penalties that will, no doubt, be imposed by the U.S. and European governments. And all the time, Volkswagen's political partners, especially in Germany, who fostered and worked with the company to play its part in the “game” of government interventionism that has nothing to do with market-oriented enterprise, will sanctimoniously condemn the greedy and “selfish” conduct of profit-hungry businessmen.

What all these examples and facts about lobbying activities, campaign funding and government-business partnerships highlight is the pervasive extent to which “capitalism” as it now exists in the United States or Europe – or in fact all other parts of the world – has nothing to do with free market, laissez-faire capitalism.

Corrupting Hand of the Interventionist State

The Austrian economist, Ludwig von Mises, described this twisted, corrupted, and politicized capitalism over 80 years ago, in 1932, in an essay on “The Myth of the Failure of Capitalism,” published shortly before the coming of Hitler and the Nazi movement to power:

“In the interventionist state it is no longer of crucial importance for the success of an enterprise that the business should be managed in a way that it satisfies the demands of consumers in the best and least costly manner.

“It is far more important that one has ‘good relationships’ with the political authorities so that the interventions work to the advantage and not the disadvantage of the enterprise. A few marks’ more tariff protection for the products of the enterprise and a few marks’ less tariff for the raw materials used in the manufacturing process can be of far more benefit to the enterprise than the greatest care in managing the business.

“No matter how well an enterprise may be managed, it will fail if it does not know how to protect its interests in the drawing up of the custom rates, in the negotiations before the arbitration boards, and with the cartel authorities. To have ‘connections’ becomes more important than to produce well and cheaply.

“So the leadership positions within the enterprises are no longer achieved by men who understand how to organize companies and to direct production in the way the market situation demands, but by men who are well thought of ‘above’ and ‘below,’ men who understand how to get along well with the press and all the political parties, especially with the radicals, so that they and their company give no offense. It is that class of general directors that negotiate far more often with state functionaries and party leaders than with those from whom they buy or to whom they sell.

“Since it is a question of obtaining political favors for these enterprises, their directors must repay the politicians with favors. In recent years, there have been relatively few large enterprises that have not had to spend very considerable sums for various undertakings in spite of it being clear from the start that they would yield no profit. But in spite of the expected loss it had to be done for political reasons. Let us not even mention contributions for purposes unrelated to business – for campaign funds, public welfare organizations, and the like.

“Forces are becoming more and more generally accepted that aim at making the direction of large banks, industrial concerns, and stock corporations independent of the shareholders . . . The directors of large enterprises nowadays no longer think they need to give consideration to the interests of the shareholders, since they feel themselves thoroughly supported by the state and that they have interventionist public opinion behind them.

“In those countries in which statism has most fully gained control . . . they manage the affairs of their corporations with about as little concern for the firm’s profitability as do the directors of public enterprises. The result is ruin.

“The theory that has been cobbled together says that these enterprises are too big to allow them to be managed simply in terms of their profitability. This is an extraordinarily convenient idea, considering that renouncing profitability in the management of the company leads to the enterprise’s insolvency. It is fortunate for those involved that the same theory then demands state intervention and support for those enterprises that are viewed as being too big to be allowed to go under . . .

“The crisis from which the world is suffering today is the crisis of interventionism and of national and municipal socialism; in short, it is the crisis of anti-capitalist policies.”

How different is today, in its essential qualities, from Mises’ description of the interventionist state and government-business “partnerships” during those years between the two World Wars?

Real Free Markets Mean Privileges for None

If what we have today is what is widely referred to as “crony capitalism,” then how might we define and explain what a truly free market capitalism would be like? Let me suggest that the following seven points capture the essence of a real free economy:

1. All means of production (land, resources, capital) are privately owned;
2. The use of the means of production is under the control of private owners who may be individuals or corporate entities;

3. Consumer demands determine how the means of production will be used;
4. Competitive forces of supply and demand determine the prices of consumer goods and the various factors of production including wages of workers;
5. The success or failure of individual and corporate enterprises is determined by the profits and losses these enterprises earn in free competition with their rivals in the market place;
6. The free market is not confined to domestic transactions, and includes freedom of international trade;
7. Government is limited in its activities to the enforcement and protection of life, liberty, and honestly acquired property against, violence and fraud.

In a real free market, there is no place for politicians to offer privileges and favors, because there are none to sell. There is no motive or gain for special interest groups to spend huge sums of money in campaign contributions or lobbying expenses, because political benefits for some at others' expense cannot be bought.

Wasteful and corrupting "partnerships" between government and business enterprises cannot occur because political authority is restrained from any task other than the securing of each individual's right to his life, liberty, and peacefully acquired property.

As Ludwig von Mises said, the political and economic crises through which the world suffers is not the crisis or failure of the free market. No, it is the crisis and failure of the interventionist-welfare state, and its anti-free market capitalist ideology.

How Tesla and Solyndra were total crony capitalism kick-back
scams:

Have you seen the, now famous, 60 Minutes episode? Take a look:

Click This Link:

<https://videopress.com/v/wNIHgLIK?hd=0&autoPlay=0&permalink=0&loop=0>

or this link:

<http://wp.me/P6h5en-60q>

Here is the story, that you have seen in the news lately, about the group known as: **“The Silicon Valley Cartel, the biggest scam in tech.”**

As an example of one of nearly a hundred attacks on U.S. taxpayers, and voters, by corrupt Senators, and their campaign financiers, take a look at this example case:

In a case of “awkward timing”, During the Iraq War, Team-6 was asked, via Congressional invitation and Congressional Commendation (published in the Federal Register by the United States Congress), to develop, for the United States, via the U.S. Department of Energy, the technology requested as the back-up plan, for when, and if, the Middle East went “sideways”. (If you

have been reading the news, you will have noticed that has already happened) Team-6 won federal and industry commendations, federal grants, historical patents, federal contracts, industry acclaim U.S. Congressional commendation in the Federal Register, built and demonstrated numerous versions of the technology. The technology is an instant-swap/recharge battery that runs longer than almost any other battery, can use almost any one of over 3000 organic material fuel compositions, it leaves only drinkable water as it's waste, needs no new infrastructure and can be created entirely from domestic materials including household kitchen waste. All of the technology is already fully functional, globally, in industrial uses.

Not only did the technology work, it has been deployed by competing interests globally in over \$300M worth of contracts. 100% of the technology is in use in the world today.

Alas, the technology Team-6 developed was the one technology that, not only, obsoleted the Cartel's scam but, in hindsight, exceeded it, by many paradigms in safety, cost, national security, ease-of-distribution, consumer access, consumer price-point, and a vast number of other metrics. The Cartel had taken over the lithium battery industry, which relied entirely on foreign incursions, toxic chemicals and off-shore mining deals, in advance, but nobody told Team-6 before they got roped into building the "lithium-killer".

This journalist says it best: "With this fuel cell technology, If UPS, FedEx, a natural gas line or a water line, could reach your home, then your home was already set-up to use clean, sustainable energy that you had control over. The Cartel didn't like that, because that meant that 3.4 billion consumers could already

compete with them. 'We couldn't have consumers doing things on their own, now could we?'

The Cartel politicians, and their campaign backers, went to war over it.

In retribution for assisting federal investigators, and for Team-6 "building a better mousetrap", the corrupt billionaires hired Gawker Media and Gizmodo (SEE THIS LINK FOR DESCRIPTION OF THIS GROUP), a "troll farm" blogging service and "sock puppets", to embed the word "scam" next to every mention of Team-6 's name, and staff, on the internet, HR databases and network services, as a character assassination program, in order to seek to terminate income flow, in retribution and revenge for Team-6 helping Congress and law enforcement interdict the political and financial crimes.

Click This Link, BELOW, to download an adobe .pdf file with the latest press clippings about Gawker lawsuits and investigations: (GAWKER MEDIA EXPOSED AS HIT-JOB FRONT FOR SILICON VALLEY CARTEL)

Gawker and their Silicon Valley Campaign partners, who own Google, then had Google lock the attack on the front page of Google, refusing to remove it after numerous legally correct requests by lawyers, in order to accelerate the damage to Team 1. The FBI, The San Francisco Police Department, The SEC, The OSC, The GAO, The FTC, The U.S. Senate and other agency's, are now investigating this political and economic retribution attack on Team-6 and active case numbers now exist for this, and related matters, with those agencies. Google, and the coordinating parties, have now been tracked and confirmed, by digital forensics, as fully complicit and now bear the brunt of all loss

liabilities to Team-6 . In addition to the recent Sony, Snowden, HSBC and other leaks; forensic IT tracking data; Silicon Valley and Washington DC whistle-blowers ; the sheer volume of the attacks; and their exclusive, IT data metrics confirmed, locked position on Google, prove the point of a coordinated and consciously manipulated attack, thus holding Google, and the related Cartel entities, liable for all losses and damages. In England this is called "hoisted by your own pitard". English and French courts are discussing litigation against Google, with this case as one of the example metrics of Google's manual search results manipulation to attack adversaries. Over 400,000 pages of evidence have now been acquired.

In short: Team-6 engineered, designed, built, demonstrated, delivered, patented and began marketing technologies that the Cartel either asked to look at, then took, without compensation, or sabotaged because they beat the Cartel technologies. After millions of dollars of federal patent office research, not a single Cartel technology has proven to have preceded Team-6 technologies. In every single case, it has been proven that this Cartel of campaign finance manipulators, asked, in writing to look at Team-6 technology, and then, either: rejected it in writing as "unworkable", yet they then copied and sold 100% copies of the "unworkable" technologies as their own; or, sabotaged the technology to prevent it from affecting their market. Team-6, and other companies, who suffered the same attacks, are seeking fair, equally resourced public federal court & media hearings, to resolve the issues.

This was particularly ironic, since some of the Cartel "bad guys" have now been arrested, indicted and/or placed under FBI investigation for actually running a real embezzlement scam. The FBI Solyndra Raid, the U.S. Senate investigations and 14 other

criminal investigations have put severe heat on the corrupt technology investors and politicians who Team-6. Per data exposure from Snowden, Greenwald, etc., Per Snowden/Greenwald/HSBC/Sony leaks, federal investigators have been found to have had every suspect under long-term extensive surveillance and now, their state and federal prosecutions are only a matter of time.

Team-6 will, now, always fight the good fight against criminal behaviour, bad ethics and public policy corruption. Their credentials, references, broadcast news videos and past project evidence, clearly counter-measure any of the attack false-hoods presented by those people. The GAO, OMB, FBI, U.S. Treasury, Washington Post, and hundreds of university research groups, calculate the loss, to the United States and the American taxpayer, from these crimes, at well over one trillion dollars of losses.

By Dan Epstein

News flash: Government subsidies and special-interest favors go hand in hand.

The latest example comes from a federal green-energy loan program. Last month, the DC District Court [ruled](#) that Cause of Action, where I am executive director, can [proceed with a lawsuit](#) against the Department of Energy. We're suing the federal government for the blatant political favoritism in its \$25 billion "Advanced Technology Vehicle Manufacturing Loan Program."

In principle, this taxpayer-funded program was supposed to support the manufacture of energy-efficient cars. In practice, it rewarded a select few well-connected companies.

Since the program was created in 2008, numerous businesses have applied for its taxpayer-backed financial support. Yet only a small number were approved. Among the lucky few were two electric car manufacturers: [Tesla](#) and [Fisker](#).

Both companies' political connections run deep, especially Tesla's. The company's founder, Elon Musk, was a [max donor](#) for President Obama. One of its board members, [Steven Westly](#), was appointed to a Department of Energy [advisory board](#). And another Obama bundler, Tesla investor and adviser Steven Spinner, [secured employment](#) in the department's Loan Program Office—the very office that gave the company a taxpayer-backed loan.

Fisker also has friends in high places. The company, which has since [gone bankrupt](#), [was backed](#) by a San Francisco [venture capital firm](#) whose senior partners [donated millions](#) to the 2008 Obama campaign and other Democrat causes. [One partner, John Doerr](#), parlayed his support into a seat on the President's Council of Jobs and Competitiveness.

Such connections can allow a company to exert political pressure to enrich itself. Unsurprisingly, Department of Energy emails show that such pressure was rampant in its loan programs.

There's no shortage of examples. The department's leaders—including then-Secretary of Energy Steven Chu—repeatedly promised to deliver results to politicians like Rep. Steny Hoyer (D-Md.) and Sen. Harry Reid (D-Nev.). [One email reads](#), "DOE has made a political commitment" to approve a company's loan.

Another says the “pressure is on real heavy” from none other than Vice President Joe Biden. And still [another shows](#) an employee asking, “what’s another billion anyhow?”

Unsurprisingly, the Obama administration gave Tesla and Fisker preferential treatment, and then some.

The Department of Energy revised its review process in order finish the companies’ applications faster. The government [gave them extraordinary access](#) to its staff and facilities—even to the point of having government employees personally walk them through the loan application and approval process. The department ignored its own lending rules in order to approve the companies’ loans. And it [renegotiated the terms of some loans](#) after the companies could not keep their original commitments or were experiencing financial difficulties. Tellingly, Fisker has since gone out of business, despite receiving over a billion dollars in loans through this federal program.

Now contrast this preferential treatment with what happened to XP Vehicles and Limnia, neither of which have the same political connections. (My organization is suing the Department of Energy on their behalf). The two companies partnered to manufacture an energy-efficient sport utility vehicle that would have competed with Tesla and Fisker’s cars. They applied for loans in 2008 and 2009 under the same loan program.

The department refused them both—and it used bogus reasons to do so.

For starters, the department made claims that were laughably false. To take one example: It rejected XPV’s application because [its vehicle was powered by hydrogen](#). It was an electric SUV. It also raised objections that it didn’t raise with other

companies whose applications were approved. For instance: The bureaucracy [criticized](#) the proposed all-electric vehicle for not using a specific type of gasoline. Yet Tesla and Fisker received the loans despite producing similar all-electric cars.

In light of these obvious problems and hypocrisy, both companies presented the Department of Energy with detailed rebuttals. Yet the government failed to respond. To this day, both XPV and Limnia are awaiting a satisfactory reply. In the meantime, [XPV has gone out of business](#), unable to compete against its politically connected—and subsidized—rivals.

This casts the Department of Energy's loan program in a new light. It was sold to the American public as a means of promoting energy-efficient vehicles. Instead, it was used to benefit a select few well-connected companies. It was a blatant crony handout, paid for by the U.S. taxpayer.

Sadly, similar examples are widespread in Washington. That's no surprise considering the feds spend [roughly \\$100 billion a year](#) in taxpayer-funded handouts to businesses. This breeds the sort of government-business collusion Americans think is rampant in Washington. In fact, [over two-thirds of likely voters](#) think the federal government helps businesses that hire the most lobbyists, shake the right hands, and pad the right pockets. They're right.

This points to a simple conclusion: Politicians and bureaucrats shouldn't use the public's money to pad private companies' bottom lines. As the Department of Energy's green-vehicle loan program shows, the capacity for corruption is immense—and inevitable.

Epstein is executive director of Cause of Action, a government watchdog.

***“This was an organized crime operation, involving state and federal employees, which cost the taxpayers, and American business, a record-breaking amount of losses, as well as massive damage to the public policy process..”
– Federal Investigator – GAO/Treasury***

 [SENATE](#)

“If corrupt politicians, and their financiers, don’t mind having the FBI, and 20 other enforcement agencies, up their back-sides, for the rest of their lives; along with the news media, and the voters, then they should probably keep doing these sorts of crimes...”
Senior Reporter – Washington Post

campaign financing”, and related search phrases... (It is advised to avoid Google searches, in this matter, as Google is owned by the parties under investigation by the FBI, FTC, EU, OSC, CC, ACLU, SEC and other investigations, and is, thus, a “compromised entity”)

How did the tide turn?

In the old days, when this all began, state and federal agency people would first think:

“How can we keep the politicians from getting upset? We’d better cover this up!”

In the new era, with a national election just around the corner, the lowest Congressional approval rate in history, the dawn of the *Age of Transparency* and leaked documents dropping like rain, from every sector, the agencies are now thinking:

“How can we keep the voters from getting MORE upset? We’d better fix this properly!”

As one CEO said: "Of Course, in the Case of Team 1; Elon Musk, John Doerr and Eric Schmidt probably love us more than life itself. It is hard to imagine that they were the people who led the attack in this one

particular case we can think of...but who knows, we live in interesting times."

But, for discussion purposes, let's say there were some billionaire politico types who thought your technology was obsoleting their technology and who found that your team kept one-up-ing them. If they go after you, here is what you can do -

How Do You Fight Back When Large Corrupt Entities Attack You:

Your adversaries will hire private investigators known as "Opposition Researchers". Regular people call them "hit-men". From the famously vindictive Sidney Blumenthal, to the notorious Richard Berman, to unknown college kid junior "hit-men" in training; when they come for you it will be harsh, massively financed and driven by the madness of power-hungry campaign technology billionaires.

Your saving grace, though, will always be this: The "*bad guys*" are forced to operate in darkness and stealth, once exposed to the light, they will wither and crawl away. In this new *Age of Transparency*, the ability to shed light on bad guys is more potent than ever! Look to major journalists, social networks and carbon-copy every law enforcement agency, so everyone knows what is going on, and so that no single entity can "stone-wall" or cover-up.

Tips for Tech Companies Under Attack –

1. Cooperate with every law enforcement agency request. Every law enforcement agency will have an interest in terminating felony-grade law-breaking.
2. When they seek to destroy your reputation. Prove them wrong in public. In our case, the volume of great **references** and **broadcast news acclaim**, posted on this site, counters any credibility attacks. They will try to spin the phrase “scam” or “not credible” into their attacks. Prove them wrong with the facts. Offer to meet them in any federal court or live TV debate to prove the facts. If the “bad guys” are involved in crime, be sure to show those facts in your public debate, so that people consider the source of the attacks. It isn't possible to take a considered read of our references and proven deliverable documentation and not realize that any “scam” attack media/blog clips are fabricated by the attackers. In our case, we have seen law enforcement records and investigator documents proving severe felony-level crimes were engaged in by the people suspected of attacking our Team. We are extremely confident about who will be looking bad when everything is all-said-and-done. In today's total information world, you can hire thousands of services that can track the off-shore tax evasion accounts, escort services, political bribes and illegal PAC groups, kick-backs, insider trading and other criminal actions that any criminal billionaire, that is attacking you is involved in. If you find such information, help the law enforcement people by delivering it to all of them. The level of felony crimes, these kinds of people get involved in, are “felony-grade embezzlement and racketeering

matters”, according to the FBI. They are going to get in pretty big trouble. In the cases where they used taxpayer money to stage their crimes, they are going to get in Super Big trouble.

3. Sue them. There are now contingency law firms who will cover the costs of going after big bad guys in exchange for a percentage of the judgement. For example: Many people, and countries, have now proven that Google rigs it’s search engines to harm it’s adversaries. If Google did that to you, the technical proof now exists and you can win in court and get compensated for the damages they caused you.

4. Watch out for “moles”. Crazy rich people have private eye’s and ex-employees that they pay to get a job at your company. They pretend that they are helping you, then they sabotage your effort. Consider past jobs that future employees had with your attackers.

5. Watch the news coverage for exposes about crimes that your attackers are suspected of being involved in and contact others that were harmed by the attackers. Form a support coalition with others that were damaged by the attackers.

6. Read about who does hired character assassinations, and how they do it, at [THIS LINK](#) and watch for the early signs of the attacks.

7. To understand the process, watch some of the movies about how the bad guys sabotage: Francis Coppola’s: **Tucker, A Man and His Dream**; Greg Kinear’s: **Flash of Genius**, and read some of the history of the “tech take-downs” at [THIS LINK](#)
<http://wp.me/P1EyVm-xH>

8. Stay on the “side of the Angels”. Good eventually wins over evil. In this new “Age of Transparency”, evil is losing faster than ever.

9. As punishment against you, rich political campaign backers will try to have their federal lackey's change the law to hurt you. If you are a tech group, for example, the "bad guys", might organize to suddenly try to change the patent laws so that your business is destroyed. When billionaires put bribes in the right pockets, they accomplish sweeping policy change. Don't let that happen. Expose the "who" and the "why" in such tactics.

10. Consider Quid-Pro-Quo. In many countries the rule is: "if they do it to you, you have every right to do it back to them"

11. Watch out for "honey traps" in your activities and in on-line sites. Read the Snowden/Greenwald reports on what "Honey Traps" are.

12. The Bad Guys are usually very involved in politics because they like to control things. In order to control politics they own many stealth tabloid publications where they can order attack stories written about you. Some of these kinds of people own **famous online media tabloids** (ie: Gawker Media Group) and **stock tip publications** which are really just shill operations for their agendas and attacks. Identify these publications and partner with every person, or company, who they have coordinated attacks on in the past. Read about their attacks on inventor Mike Cheiky, Gary D. Conley, Aaron Swartz, Stan Meyer, Preston Tucker [and hundreds of other innovators](#) (<http://wp.me/P1EyVm-xH>) that they wanted "out of the way".

13. Certain "special interests" own, and control, the content on Google, Reddit, Hearst Publications, Motley Fool and other "publication outlets". You will only see glowing reports about the "bad guys" on those. You will see no negative reports about the "bad guys", allowed on those sites, and every bad report about

you will be manually up-ranked and locked into the top slot on their page in order to damage you. The down-side for the bad guys, though, is that the internet remembers everything. You can now prove, in court, showing technical and historical metric data, that they intentionally locked and damaged you and you can get compensated for the damages.

14. Every single troll blog comment, every pseudo attack article about you, everything is already tracked back to the actual author. The NSA have done it, that is well known. NO amount of TOR, or VPN on top of VPN or stealthing software can hide a troll attacker any more. What is only now becoming known is that the official, and also the independent hacker, Chinese and Russian spies have got almost all of that information too. Hackers have broken into Sony, The White House, All of Target, All of the Federal Employee Records, everything. In a court case you can now, legally, subpoena NSA records to sue the attackers. Others, hearing of your filed case, may just show up and give you the information. Attackers cannot hide behind anonymity any more. Those who were blogging that you *"sleep with goats"* and *"eat unborn children"* can now be found out and delt with.

15. Do you have on-line stores and paypal or credit card accounts that take payments at those stores? Trying to make a little cash on the side? Confused about why you never get any orders? The attackers have DNS-re-routed your stores and payment certificates, spoofed your sites and turned off all of your income potential from those on-line options in order to damage your economic potential. Illegal? Yes. Happening to people every day? Yes. Get professional IT services to document the spoofs, and re-routes, and sue the operators of those tactics that are attacking your revenue stream.

16. It costs \$50,000.00 to bribe a Senator. Some of these tech billionaires earn that much in 3 minutes. Beware of your Senator. Senators take stock options in tech companies as bribes, watch for linkages. See the **60 Minutes** Episode called: **Congress Trading On Insider Information.**

17. Want a job? Forget about it! The bad guys went into Axcion, Oracle, SAP, and all of the Human Resources and Recruiter databases, and put "red flag notices" on your profile. You will get some great first interviews, but when they run your back-ground check, you will never hear back from that interviewer again. You got "HR Black-listed", in retribution, for accidentally bothering a campaign billionaire. Hire an HR service to look and print out your false "red flag" HR data-base inserts and use those as evidence in your lawsuit.

18. (This one, submitted by a Washington Post reporter): They will anonymously put all of your email addresses on blacklists, and watch-lists, so that you can't use services like craigslist, cafe press, zazzle or other on-line services to make money. If you try to open any accounts on those services, you either won't be able to create an account or, you will get an account, but all of your orders will get "spoofed" into oblivion so you can't make any money. The attackers believe that by causing you as much economic hard-ship as possible, they can get retribution for what-ever they have perceived that you have done to offend them. Again, use an IT forensic services group to get the data to show this is happening, trace it, and sue the perpetrators.

19. Their actions provide the proof. When you look out on the internet and add up the pronouncements of "scam", "sleeping with goats", etc. The volume of attack items proves that no mere mortal, or company, could have acquired that much media unless

it was placed there by very wealthy parties. Everyone now knows that the web is controlled. The volume of attacks can often prove that those attacks are fabricated. Additionally, IP Trace Routing and digital tracking now can prove the attackers manipulation of your data, email and website traffic. One of your best sets of evidence will come from the attackers, themselves. The bad guys always leave a digital trail of bread-crumbs leading right back to themselves. You can hire an IT company to build a "tracking array" comprised of hundreds of websites which are bait to catch them in the act. Regarding: Paranoia vs. documented evidence. If you, and others have experienced the tactics, and the police have recorded the tactics being used against you, it isn't paranoia to be cautious.

Do billionaires really do extreme attacks, like these, on average American citizens?

What do you think “bad guys” would do to steal a Trillion Dollars?

We just heard from another federal agency. Federal law enforcement, private investigators and certain news journalists can now prove, beyond a shadow of a doubt, with no “ifs”, “ands” or “buts” that certain Silicon Valley billionaires engaged in organized crime activities and, while doing those crimes, attacked a number of parties.

These suspects are doing everything in their power, and spending vast amounts of money, to prevent the requested public hearing, before a Special Prosecutor, in Washington, DC to show the taxpaying public the acquired evidence.
