

How Elon Musks Twitter Alt Account Adrian Dittmann Was Unmasked

It's important to stand up to the world's richest man on his own platform

[Charles Johnson](#)

Update 12/30/2024: I was banned for life by Elon Musk at about 8PM for posting this. Elon is a criminal.

I recently attended a Twitter space where I exposed Elon Musk's alt account and Elon Musk as a fraud to his face. Take a listen. It was pretty great.

Part of the reason I was as aggressive as I was with Adrian/Elon was to get him agitated so he would speak faster than his voice modulator could work and we could make a positive match using some software some friends of mine use for this sort of thing. I can confirm it's Elon.

And even if it wasn't Elon and if it's not physically Elon in the flesh, it's an account controlled and operated by Elon/X that represents him in every way shape and form. But of course it's actually Elon. I'll be uploading a video which more or less confirms it. Watch me be hit.

Elon knows me in real life so I wasn't surprised when he made a number of errors, talked over me, etc. There are several grand juries investigating Elon now. It's only a matter of time.

Just listen to that laugh. Here's proof positive that Adrian is Elon Musk. The voice print is identical.

Subtle listeners will know that I called "Adrian" Elon several times and he responded. I am well acquainted with tricking drug addicts. I've been to Phish concerts.

If Elon or any of his cronies retaliates against me in any form I'll just sue him for what he did to me already and I'll leak everything. He knows I know. Make my New Year. I'll sue Gigafund in a heart beat for defrauding me.

And yes, it is quite brave to stand up to the richest man in the world. What can I say? It's nothing compared to the bravery of my family members who built this country. They didn't build it so I'd hand it over to criminal fraudsters like Elon and his Indian slaves.

I'm not going to be intimidated by some two bit South African criminal and neither should you. You're an American. It's time to act like it. Elon should remember his own family legacy of service. Before it's too late for him.

Your father was German military intelligence?

10:34 ✓✓

British.

Leave your mother's basement and get a life.

McDonald's is hiring sweepers.

14:35

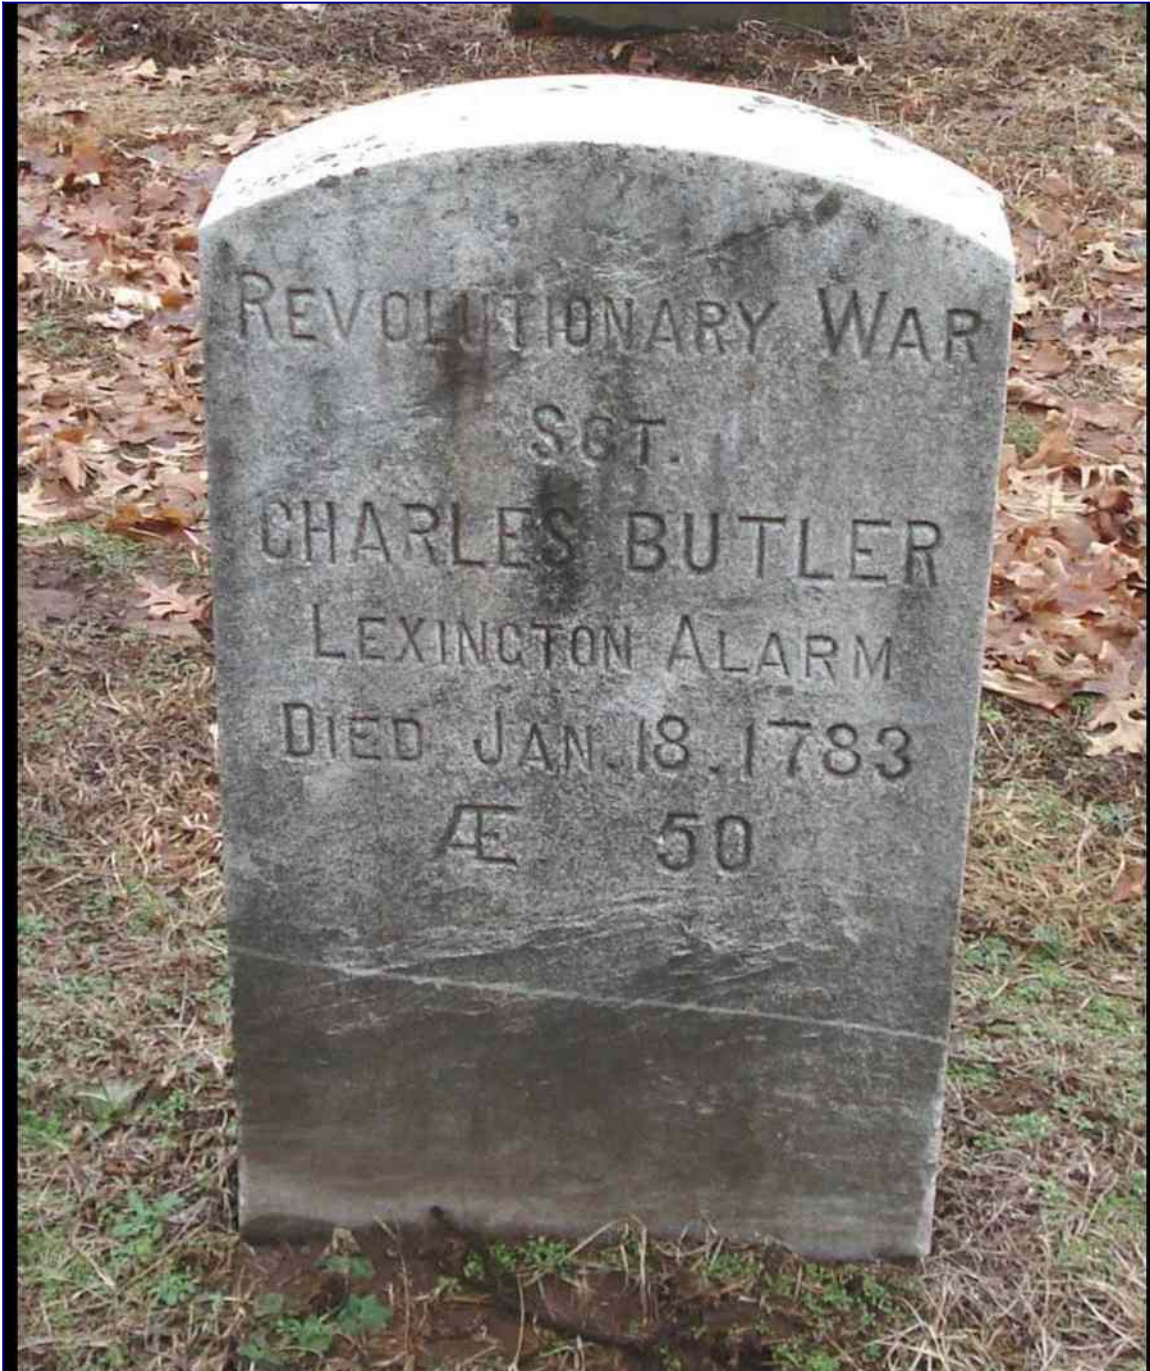

I meant British!

14:57 ✓✓

My family has been in this country since the Mayflower. I am named for my Revolutionary war hero ancestor Charles Butler.

I'm not going to surrender my birthright without a fight. And neither should you. As Trump said, "Fight! Fight! Fight!"

I'm building a compilation reel so please find audio of Elon Musk and Adrian Dittman saying the same thing to triple confirm it.

I'm also sending it to some friends of mine who work with the NSA to get even stronger proof that Adrian is Elon and vice versa.

Rather hilariously Elon Musk aka “Adrian Dittmann” slipped up during an X livestream and said he uses “[rocket fuel](#).” Right. Totally normal stuff. So too his [embezzling of Tesla company property](#).

My friend Eric Garland points it out: “You know what's funny though? You have the same monophthongization and phonemic vowel length as a South African who lived in America for 30 years.”

“People revert more to their native accent when angry or stressed, even after a prolonged stay in a country where there's lots of code switching going on.”

Another friend writes in:

It's also worth pointing out that Dittmann means “famous person.” Adrian is a twofer. Ancient Greek meaning Rich and Adrian meaning from the Adriatic which fits with his End Times/devil symbology as the 2nd Beast of Revelation rises from the sea.

Sounds nutty but why else would he have his twitter profile pic wearing Baphomet's armor?
