Not only can anyone hack a Tesla and make it go insane and drive into kids, old ladies and animals but it can also be made to drive over cliffs. Tesla's have driven over cliffs and into meridians and killed numerous people. Elon Mus covers this fact up with the help of Nancy Pelosi and Dianne Feinstein who hold interests in Tesla.

Tesla responded to a vehicle accident which led to two deaths and three injuries in Chaozhou, South China's Guangdong Province on Sunday, saying that the accident video matches the background data, and that local police are seeking to restore the accident through identification from a third-party agency.

The accident occurred when a Tesla driver surnamed Zhan was parking a Model-Y, which suddenly lost control and travelled at high speed for two kilometers, hitting two motorcycles and two bicycles and resulting two deaths and three injuries, domestic news outlet Jimu News reported on Sunday, adding that the driver's family is still awaiting identification results for the vehicle.
