

FOOD SYSTEM INDICATORS

1. Community socioeconomic and demographic characteristics:

✍ Who are the people in Marin?

Marin County's residents come from a variety of backgrounds; from the rich farming history of West Marin, to the descendants World War II shipyard workers from Sausalito and Marin City. Other communities have pockets of diverse ethnic backgrounds, such as San Rafael's Canal District and its strong Latin American and Asian population. All of these people have common needs and one of them is food. More importantly, the need to have food helps them identify with their culture, community, and country.

✍ What are their demographic characteristics? (See Donna's comments below)

✍ What is their economic status?

In 2000 Marin County was reported to have the highest median household income for all counties in the U.S. at \$71,306. There are also pockets of poverty that prevail in Marin (see Donna's notes).

✍ What is their educational attainment? (See Donna's comments below)

2. Health and nutrition status

✍ How many people in Marin are overweight or obese? (Donna)

In 2010 approximately 41.9 % of adults in Marin were considered overweight or obese.

✍ How many people in Marin have Type II Diabetes?

✍ How many low income children on Medi-Cal are overweight or obese?

✍ How many servings of fruits and vegetables do people in Marin eat?

3. Community food resources

✍ Are Federal food assistance programs available to help people purchase food?

- There are a number of federal food assistance programs available, namely in the form of WIC, Cal Fresh, and federal school lunch and nutrition programs.

✍ Are people in the community participating in food assistance programs?

- People in the community are participating, but there is still a large percentage of people either not being reached or are not actively enrolled in the programs. For example, 4,913 residents are enrolled in food stamp benefits, however there are an estimated 15,691 residents that qualify for food stamps. This means there are a number of people who are not accessing food stamps for reasons unknown.

✍ What resources are available in the community for purchasing food?

- Resources such as food stamps and WIC vouchers are available to community members to purchase food.

- ✦ Are emergency resources available in the event that residents do not have enough money to purchase food through normal channels?
 - The San Francisco Food Bank and its food pantries are available to Marin residents in the event of food emergency.
- ✦ What groups and organization are involved in food advocacy?
 - Some of the groups and organizations involved in food advocacy are: The Canal Alliance, The Canal Welcome Center, Agriculture Institute of Marin, Marin Organic, Marin Open Garden's Project, Garden of Eatin', Sustainable Fairax, MarinLink, Healthy Marin Partnership, Novato Livewell Network, Marin County Health and Human Services, Ritter House, Salvation Army, Novato Senior Center.

4. Household food security

- ✦ Is household food insecurity a problem that is directly or personally experienced for a significant number of people in the community?
 - (Answer will be best answered by interviews or through surveys). However, we may infer that based on the available statistics, such as the number of people enrolled/and eligible for food stamps, there may be direct and personal experiences for a significant number of people in regards to food insecurity.

5. Food resource accessibility

- ✦ Are food resources located near low-income neighborhoods?
 - (Map of resources needed here). We know that low-income neighborhoods, such as the Canal District has an abundance of food resources. We cannot say the same for Marin City, and Novato, however.
- ✦ Is public and/or private transportation available between the resources and low income neighborhoods?
 - The Public transportation system in Marin is adequate during weekdays. However, during weekends and holidays the schedules are limited, thus making it difficult for those who have to work long hours during the week and they are the sole food provider of the household, i.e., they cannot depend upon others to get food on a regular basis. This may impact single parent households the most. For example, in 2009, of all households in Marin an estimated 11.5% were single parent households.
- ✦ What barriers influence people's use of community food resources?
 - Traditionally, time (job/family responsibilities), transportation (lack of personal vehicle/public transportation), and geographical location (living in a food desert) have made it difficult to acquire food for communities in need. In Marin, we may see that personal income needed to go to other resources, such as rent, child care, etc. as being barriers as the standard of living in the county is much higher than the rest of CA and the rest of the U.S.
- ✦ Does Marin have the infrastructure necessary to deliver Federal food assistance benefits effectively?
 - Marin lacks community kitchens and storage units that would enable the storage of perishable items.

6. Food resource availability and affordability

- ✍ Is a variety of food available in retail stores?
 - A variety of food is available in retail stores. However, it is not easily determined if all of these stores have the capacity to accept food stamps (Cal Fresh).
- ✍ Are the available foods affordable to low income households?
 - This is the question that is left unanswered regarding Cal Fresh availability.
- ✍ Do retail stores and farmers markets accept EBT cards for the Food Stamp program, WIC vouchers, and Senior vouchers?
 - Not enough data at this moment.
- ✍ Can the Thrifty Food Plan (TFP) market basket be purchased from these retailers at or below the TFP cost threshold set by USDA?
 - This is unknown

7. Community food production, processing, & distribution resources

- ✍ Does the community have food production, value-added processing, or food distribution resources?
 - There are not any community based food production, value-added processing, nor food distribution resources other than the food banks and a couple gleaning operations.
- ✍ Do low-income households have the opportunity to participate in community gardens or other food production activities?
 - There are some community gardens, however there are still a lack of gardens available to low-income communities and residents living in high density housing. Of the communities that are being assessed in this project, there are only five community gardens with limited capacity: Marin City has one garden, and the Canal District has roughly 4 established residential gardens. All of these gardens have limited reach and there is a need for expansion.
- ✍ Are there any school-based gardening programs?
 - Marin has about 60 school based garden programs. These gardens are available to a number of low-income students as well.
- ✍ Are locally produced foods sold through local food retailers and restaurants?
 - Locally produced foods are available through local retailers and restaurants. However, there is not nearly enough being produced to be competitive with the industrial food that is widely available in most stores and restaurants.
- ✍ Does the local school district purchase foods from local producers?
 - The local school districts as a whole do not traditionally purchase from local producers. There may be some exceptions to the rule, and there are groups that are trying to change this. For example, The Novato Unified School District is sourcing some gleaned items from local farms to add to their menu.
- ✍ Are locally produced foods used by other institutional food service outlets, such as colleges, prisons, and hospitals?
 - Some locally produced items, such as dairy, are going to be more accessible for institutions to implement into their menu. Beyond dairy, I'm not aware of any contracted relationship between an institution and local producers.

8. Food and farming policies

- ✍ Do city/county elected officials advocate for local government action to promote environments that support healthy eating and food equity?
 - The County-wide plan (2008) calls for increased promotion to support locally grown products to be available. Currently there is nothing being done to meet this goal at the government level.
- ✍ What is the level of community coalition activism focused on advocating for community and school policy changes with local officials to address food equity, particularly in low income neighborhoods?
 - Recently there was a community garden summit that addressed many questions regarding land use policy that may increase the development of community gardens and perhaps the introduction of urban farming. This summit was attended by local officials that supported the ideas, and are looking at ways to encourage policy change at the local level.
- ✍ Do county and city general plans promote environments that support healthy eating and food equity?
 - Yes. The 2008 General Plan for Marin County is very supportive of promoting healthy environments, primarily that involve food production and accessibility.

Community Demographic and Socio-economic Characteristics

Table 1.A.1. Demographic Profile of Marin County (2000, 2009 est. & 2010 census):
Population

Demographic Characteristics	2010 Census Data Table	2000 Number/%	2009 est.** Number/%	2010 Data not available at time of production

*Total population does not add up because people added more than one race for their profile.

**All 2009 estimates are taken from Census data (June 2011).

Narrative and Data Chart 1.A.2. Demographic Profile of Marin County: Population; Age; Race/Ethnicity (2009 Census)

POPULATION: In 2009, Marin County had a total population of 251,000-125,000 (50 percent) females and 125,000 (50 percent) males. The median age was 44.3 years. Twenty percent of the population was under 18 years and 16 percent was 65 years and older.

The Age Distribution of People in Marin County, California in 2009

Source: American Community Survey, 2009

RACE/ETHNICITY: For people reporting one race alone, 79 percent was White; 3 percent was Black or African American; less than 0.5 percent was American Indian and Alaska Native; 6 percent was Asian; less than 0.5 percent was Native Hawaiian and Other Pacific Islander, and 8 percent was some other race. 4 percent reported 2 or more races. 15 percent of the people in Marin County was Hispanic. 74 percent of the people in Marin County was White Non-Hispanic. People of Hispanic origin may be of any race.

Households w/1 or more people <18 years		29,130 (28.9%)	29,190 (28.8%)	
Households w/1 or more people ≥65 years		23,614 (23.4%)	27,457 (27.1%)	
Non family households		39,971 (39.7%)	40,052 (39.6%)	
Householder living alone		30,041 (29.8%)	32,340 (31.9%)	
≥ 65 years living alone		9,613 (9.5%)	11,713 (11.5%)	

Narrative and Data Chart 1.A.4. Demographic Profile of Marin County (2009 census estimate): Household Structure

HOUSEHOLDS AND FAMILIES: In 2009 there were 101,000 households in Marin County. The average household size was 2.4 people.

Families made up 61 percent of the households in Marin County. This figure includes both married-couple families (50 percent) and other families (11 percent). Nonfamily households made up 39 percent of all households in Marin County. Most of the nonfamily households were people living alone, but some were composed of people living in households in which no one was related to the householder.

Source: American Community Survey, 2009

THE SELF-SUFFICIENCY STANDARD IN MARIN

The Self-Sufficiency Standard measures the actual cost of living in Marin in 2008, accounting for different family sizes, ages of children, and local variations in costs.

* Note: The Self-Sufficiency Standard includes the net effect of the addition of the Child Care and Child Tax Credits and the subtraction of taxes.

Table 1.C.4. Self Sufficiency in Marin (United Way; Insight Center for Community Economic Development)

# Households below standard	% below standard	Below standard with 1 or more workers
15,983	23.1 %	89.4 %
% Latino residents in Marin below standard		58.6
% African American residents in Marin below standard		45.0
% Asian & Pacific Islander residents in Marin below standard		29.0
% White residents in Marin below standard		17.5

HEALTH AND NUTRITION STATUS

Table 2.A. Health Status Indicators

Health Status Indicators (CHIS 2005-07)	Marin	County Rank (1= best)	California
% Overweight or Obese Adults (2007)	41.9 %	2	57.1 %
% of Children Overweight for Age (2007)	4.3 %	2	11.2 %
# of Adults with Type II Diabetes (2005)	6,000	N/A	1,516,000
% of Adults with Type II Diabetes (2005)	3.2 %	N/A	17.4%

Table 2.B. Health Behavior Indicators

Health Behavior Indicators (CHIS 2005-07)	< 300% FPL in Marin	>300% FPL in Marin	Marin
Children over 2 years who eat 5 or more servings of fruit and vegetables daily (2007)	20.9 %	35.9%	32.4 %
Adults over 18 years who eat 5 or more servings of fruit and vegetables daily (2005)	50.7 %	54.7 %	53.8 %
Adults and children who ate no fast food in past week (2007)	64 %	71.4 %	69.5 %

Table 2.C.1. Pediatric Nutrition Surveillance System Indicators

PedNSS Indicators (2008)*	Marin: All race/ethnic groups	Marin: Hispanic	California: All race/ethnic groups
Low income children 2 – 5 years of age who are overweight or obese	30.6 %	34.4 %	33.3 %
Low income children 5 – 20 years of age who are overweight or obese	42.2 %	45.2 %	41.1 %

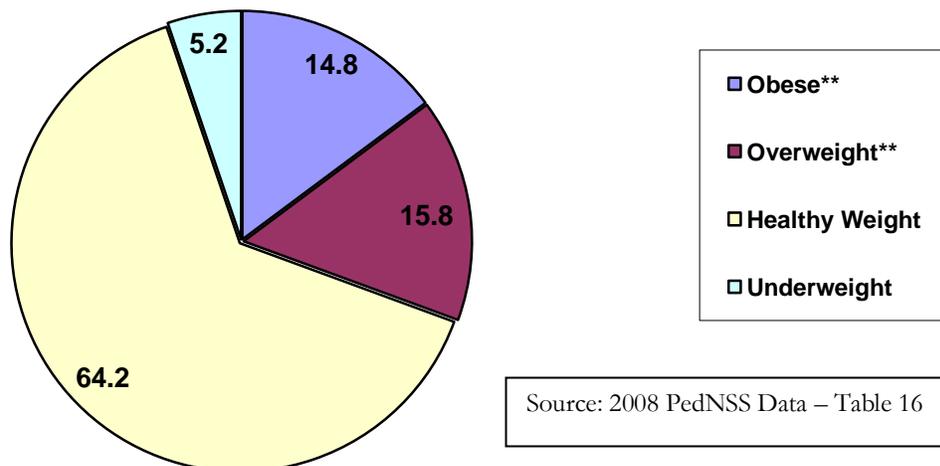

Narrative 2.C.2. Pediatric Nutrition Surveillance System

***The Pediatric Nutrition Surveillance System (PedNSS)** is an annual public health surveillance system that describes the nutritional status of low-income U.S. children who attend federally-funded maternal and child health and nutrition programs, including WIC and Child Health and Disability Prevention (CHDP) primary care providers.

Marin PedNSS summary: Childhood overweight/obesity begins early in life and the prevalence rate increases with age. Almost 1 in 3 children (30.6%) are overweight/obese by age 5. By 11 years of age, almost 1 in 2 children (47.1%) are overweight/obese. **Health disparities:** *Obesity prevalence at all ages is highest among Hispanic children.*

Narrative 3.C. Availability of Authorized Food Stamp Retailers (CX3)

Neighborhood level surveys of food retail outlets are beyond the scope of the MCFSA at this time. For MCFSA purposes, we have chosen to highlight California Communities of Excellence (CX3) as a best practice model for engaging communities in the assessment of the food environment in their neighborhoods. Following is an overview of CX3-including Marin's effort, a link to CX3 tools, and a series of CX3 scorecards for a range of community food access indicators.

In 2006, Marin Health and Human Services Nutrition Wellness Program adopted and began local implementation of a statewide community planning framework called CX3-or Communities of Excellence in Nutrition, Physical Activity, and Obesity Prevention. CX3 was created by California Department of Public Health in collaboration with the Prevention Institute and numerous state and national healthy food stakeholders to provide a standardized set of outcomes, indicators, tools, and methodologies to assess the nutrition and physical activity environments in low income California communities.

To date, the Marin CX3 effort has resulted in 3 neighborhood level surveys conducted in the Davidson and Canal neighborhoods of San Rafael and Marin City looking at access to supermarkets, farmer's markets, and fast food; the resulting data has been used to generate community maps, utilizing GIS mapping. Currently, Nutrition Wellness Program and Canal stakeholders are assessing the Canal neighborhood retail environment using the CX3 store survey tools, educating and organizing community members and leaders, as well as engaging food retail owners around best practices for promoting healthy food. Ongoing support for this effort will be critical to understanding the food landscape and improving access to healthy, fresh food in low income communities in Marin into the future. For more information about CX3, visit:

<http://www.cdph.ca.gov/programs/cpns/Pages/CX3OverviewIndCommunicationMat.aspx>
