[Elon Musk](#) was 'creeped out and furious' after his father had a child with his own stepdaughter who was 40 years younger than him, the biography of the [Tesla](#) founder reveals.

Any chance of Musk repairing his relationship with Errol disappeared when he learned that Jana Bezuidenhout had given birth to baby boy Elliot Rush in 2016, [claims Walter Isaacson](#) in his book 'Elon Musk'.

Jana was 30 at the time but when she was 15 Musk was already concerned that his father was becoming 'uncomfortably attentive' to her.

The book portrays Errol as a manipulative and abusive husband and father who once 'lunged' at Musk's mother Maye - because another man made a pass at her.

On the night of their honeymoon in Southern [France](#), Errol enraged Maye by buying copies of Playboy magazine and reading them on the bed, Isaacson claims.

Musk's upbringing at the hands of his father - he moved in with him aged 10 for seven years, a decision he later regretted - had an oversized influence on his life.

Growing up in South Africa, Musk claims that his father guilt tripped him into leaving his brother Kimbal and sister Tosca to keep him company.

Musk calls his father a 'volatile fabulist' who had a Jekyll and Hyde personality.

As Musk puts it, 'It was mental torture. He sure knew how to make anything terrible.'

After Musk was left in hospital after a beating by some children at his school, Errol sided with the kid who pummeled Musk's face.

Errol supposedly said, 'That boy had just lost his father to suicide and Elon called him stupid. How could I possibly blame that child?'

After getting home from hospital Musk had to stand for an hour while his father screamed at him he was an 'idiot' and 'worthless.'

Errol, a colorful engineer who claimed to have had a stake in an emerald mine, had a relationship with Musk's mother that was 'filled with drama.'

He repeatedly proposed but she 'didn't trust him' and then found out he was cheating on her. When she found out she cried for a week and didn't eat, causing her to lose 10 pounds in weight, Isaacson claims.

Errol 'promised he would change his ways' and she agreed to get married but the night of their wedding Maye, a model, got a shock.

They had flown to Southern France for their honeymoon where Errol 'bought copies of Playboy, which was banned in South Africa, and lay on the small hotel bed looking at them, much to Maye's annoyance.'

Back in Pretoria, their fights turned 'bitter' and she thought about leaving but she was already pregnant.

Maye says, 'It was clear marrying him had been a mistake but now it was impossible to undo.'

Musk was born on June 28, 1971 and his parents considered calling him 'Nice' after the French town where he was conceived, meaning his name would have been 'Nice Musk'.

Errol and Maye split after an ugly incident at an Oktoberfest party when another guy whistled at Maye and called her sexy.

After Elon Musk and first wife Justine (pictured right) lost their son Nevada Alexander in 2002 he tried to mend his relationship with his father

Errol was 'furious' but instead of attacking the man, he 'lunged' at Maye and was 'about to hit her' when a friend restrained him, Isaacson claims.

Maye later said 'over time he had gotten crazier' and that Errol 'would hit me when the kids were around'. Maye alleges that five-year-old Musk would hit his father on the backs of his knees to try to stop him.

In the book Errol says this is 'absolute rubbish' and that he adored Maye and 'never laid a hand on a woman in my life.'

However he continued to be verbally abusive to Maye, calling her 'boring, stupid and ugly.'

Errol later admitted to have screwed up his marriage and said, 'I had a very pretty wife but there were always prettier, younger girls.'

Musk left South Africa in 1989 aged 17 by which point his father had become 'possessed by fantasies and conspiracies', the book claims.

[Kimbal](#), who was also living with Errol, found that he had a 'split personality' and would go from charming to screaming 'evil comments' for hours.

As Musk moved to Canada and then the U.S., Errol met Heidi Bezuidenhout and married her, later having two children.

In 2002 after the death of Musk's newborn baby Nevada, his firstborn son, there was a chance for him to heal his rift with Errol.

Musk bought a house in Malibu for Errol and his new family to live in, but the arrangement soon turned sour.

Isaacson writes, 'Elon was getting concerned that Errol, who was 56, was becoming uncomfortably attentive to one of his stepdaughters, Jana, who was then 15.'

'Elon became furious at his father for what he perceived to be inappropriate behavior and he developed a deep sympathy for Errol's stepchildren.'

Musk bought Errol a yacht and moored it 45 minutes away and said Errol could live there and only see his family on weekends.

But Errol rejected it and eventually went back to South Africa, followed soon after by his wife and stepchildren.

Musk did not see his father in person from 2002 to 2016, but then planned a trip to South Africa. By then, he was divorced and having heart problems.

After a dinner with his father, Musk cut the trip short and decided to return home.

Relations between Errol, Musk and Kimbal were slowly thawing until they found out about the child with Jana.

Kimbal says in the book, 'I was actually slowly making amends with my father, but then he had a child with Jana and I said: 'You're done, you're out. I never want to speak to you again.' And I haven't spoken to him since'.

Errol claimed at the time they were 'lonely, lost people' and that 'one thing led to another - you can call it God's plan or nature's plan'.

Soon after, Musk told Rolling Stone that his father was 'evil,' adding, 'Almost every evil thing you could possibly think of, he has done.'

On Father's Day in 2022, Errol told Musk via email he had had a second child with Jana.

Errol, who by this point had seven children, wrote, 'The only thing we are on Earth for is to reproduce. If I could have another child I would. I can't see any reason not to.'

In the email, Errol went on a rant and called Joe Biden a 'freak, criminal and pedophile President,' and in South Africa, with no whites around the 'blacks will go back to the trees.'

He added that Russian President Vladimir Putin was the 'only world leader talking' and included a graphic of a stadium scoreboard which read: 'TRUMP WON - F*** Joe Biden.'

The parallels between Musk and his father were not hard to miss, not least when it comes to reproducing.

Musk now [has 10 children](#) by three different women and, according to his first wife Justine, shares some of the moods which his father is prone to.

Justine, who is mother to five of Musk's children, says in the book, 'If your father is always calling you a moron and idiot, maybe the only response is to turn off anything inside that would have opened up an emotional dimension he didn't have the tools to deal with.'

Does Elon Musk have too much power? Ukraine Starlink episode sparks concern

The tech mogul's refusal to let Kyiv use SpaceX's satellite communications to launch a surprise attack on Russia draws scrutiny in Washington.

Elon Musk — the Tesla co-founder and SpaceX chief technology officer; owner, chairman and CTO of X, the company formerly known as Twitter, and world's richest person — has long been a powerful figure on the global stage.

But revelations in a newly published biography of the outspoken entrepreneur suggest that Musk may have amassed too much power, especially when it comes to Russia's war in Ukraine.

Satellite communications

According to Walter Isaacson's book, "[Elon Musk](#)," the mercurial tech mogul refused to allow Ukraine to use SpaceX's Starlink satellite communications to launch a surprise drone submarine attack on Russian forces in Crimea last September. Musk refused over concerns that Russia would launch a nuclear attack in response, telling Isaacson that he was trying to avoid a "mini-Pearl Harbor."

"He believed it was reckless for Ukraine to launch an attack on Crimea, which Russia had annexed in 2014," Isaacson wrote. "He had just spoken to the Russian ambassador to the United States [who] had explicitly told him that a Ukrainian attack on Crimea would lead to a nuclear response."

So Musk "decided not to enable Starlink coverage of the Crimean coast," Isaacson continued. "When the Ukrainian military learned that Starlink would not allow a successful attack, Musk got frantic calls and texts asking him to turn the coverage on."

Mykhailo Fedorov, Ukraine's deputy prime minister, begged Musk to reconsider. "We made the sea drones ourselves, they can destroy any cruiser or submarine," he texted using an encrypted app. "I did not share this information with anyone. I just want you — the person who is changing the world through technology — to know this."

According to Isaacson, Musk was soon on the phone with Jake Sullivan, President Biden's national security adviser, Gen. Mark Milley, chairman of the Joint Chiefs of Staff, and other high-ranking administration officials to address their concerns about his decision.

"Whether intended or not, he had become a power broker U.S. officials couldn't ignore," CNN noted this week.

"There was an emergency request from government authorities to activate Starlink all the way to Sevastopol. The obvious intent being to sink most of the Russian fleet at anchor," Musk [explained in a post on X last week](#). "If I had agreed to their request, then SpaceX would be explicitly complicit in a major act of war and conflict escalation."

The decision drew praise from Russian President Vladimir Putin, who called Musk "an outstanding person" at an economic forum in eastern Russia earlier this week.

"He is undoubtedly an outstanding person," Putin said, [according to a Reuters translation of his remarks](#). "This must be recognized, and I think it is recognized all over the world."

Senate launches probe

The episode has drawn the attention of Congress, which has launched an investigation into Musk's actions in Ukraine.

[Bloomberg reported](#) that the Senate Armed Services committee is looking into national security issues raised by Musk's decision not to extend the private Starlink satellite network to aid a Ukrainian attack on Russian warships.

Read more on Yahoo News: [Musk's denial of Ukraine's Starlink request prompts Senate probe](#), via [Bloomberg](#)

Sen. Jack Reed, D-R.I., the committee's chairman, said in a statement Thursday that the reports on the use of Starlink exposed "serious national-security liability issues" given the "outsized role Mr. Musk and his company have taken."

"Neither Elon Musk, nor any private citizen, can have the last word when it comes to U.S. national security," Reed added.

Musk to meet with Netanyahu

The tech billionaire's influence on world affairs does not appear to be waning.

Israeli Prime Minister Benjamin Netanyahu will meet Musk during a trip to the United States next week, Netanyahu's office said Thursday.

Their meeting, which is scheduled for Monday, will reportedly include discussions about artificial intelligence.

Read more on Yahoo News: [Israel's Netanyahu is to meet Elon Musk. Their sit-down comes as X faces antisemitism controversy](#), via AP

"It comes at a time when Musk is facing accusations of tolerating antisemitic messages on his social media platform X," [the Associated Press noted](#). "The Anti-Defamation League, a prominent Jewish civil-rights organization, has accused Musk of allowing antisemitism and hate speech to spread on X. Its director, Jonathan Greenblatt, said Musk had 'amplified' the messages of neo-Nazis and white supremacists who want to ban the league by engaging with them recently on X."
