More Hacked Documents Released: SHOCKERS!!! CLEANTECH HACK HIGHLIGHTS

Nearly 10,000 pages of extremely sensitive hacked documents have been released on-line. They tell a tale of an incredible crime. This reporter, via common internet searches, has been able to confirm almost all of the information in this example document.

Apologies: that we keep sending out similar docs but the incremental discovered changes contain such fascinating tid-bits that you will probably appreciate it

As we plow through the material, which is all in one big folder, new revelations emerge. We will print the best updates as they are found. Many other reporting groups are working on these. We may not have found the juiciest things. Keep longer around on-line:

Dianne Feinstein

-
-

Her daughter, Kathryn used to tell stories, in social groups, about her mom that were not flattering. At one point, she and her Mom were on the outs. San Francisco Bay Guardian and SF Weekly newspaper staff were Kathryn's same age, traveled in the same circles, and were privy to some of these conversations. This put an early watch on Feinstein.

When the other mayor was conveniently killed in his office, Feinstein was in the, strangely, perfect spot to take over as Mayor without an election.

Feinstein got a man named John Molinari, a character known to have ties to the old North Beach mob in San Francisco, placed as head of the Golden Gate Bridge District and her campaign financier, James Bronkema, known in the local media as "David Rockefeller's bag man on the West Coast" for his constant bribes for real estate permits, placed as co-head. While they ran the Golden Gate Bridge district, and its anniversary party, into what network news broadcasts' called a "morass of corruption, cronyism and failure". Feinstein prepared her Senate plans. She had set Molinari up to take over for her as her Mayor, with her administrator: Roger Boas as the back-up plan candidate.

Both of her candidates not only lost, but Roger Boas went to federal prison for corruption, racketeering and prostitution scandals and John Molinari was removed from politics and placed under federal surveillance. His daughter filed a police report against him for abuse and she had to be removed from his home and taken to a secure children's center, on California Street in San Francisco, for protection. Molinari was also found to have lied about his place of residence during his campaign. Boas was charged with involvement in an under-age prostitution ring for San Francisco elites. The British "Hydrant" investigations, into a global political elite pedophile ring, have now tracked back to Senator Dennis Hastert, campaign backer Epstein, Graham, Nick Denton (Who interacted with the British suspects in BOTH the British "Hydrant" and British "Tabloid Phone Hacking" investigations), and other members of Congress. A recent Chinese hack of ALL federal employee background checks, has put the sexual interests of all of Congress at risk.

When the Toyota NUMMI plant was going to go out of business, Feinstein's Chief of Staff contacted anyone who tried to use the building and warned them to "back off" and/or threatened other California competitors with "political problems" if they got in the way.

Feinstein sabotaged any efforts to use NUMMI, or to make competing energy systems to Tesla, or to compete with Tesla in any way because her family had already made campaign finance deals with the NUMMI, Tesla Motors and Solyndra people and she owned the construction company (Penini), employment service (via her relative Herb Newman), leasing company (CBRE) and adjacent railroad property rights contracts for Tesla and Solyndra. Over 40 California technology companies were damaged by Feinstein's sabotage.

Feinstein and her family funds, trusts and PACS made billions on the Cleantech deals. She has also been charged with rigging postal property deals, railroad deals, U.C. Regents appointments and hundreds of other political actions for her VC Husband: campaign financier and White House "advisor": Richard Blum. Solyndra was raided by the FBI, when the first major signs of corruption were exposed by investigators, but Feinstein buddy: Attorney General Eric Holder, never allowed the full Solyndra investigation to be released, because it was soon discovered to lead right back to top White House staff, including Gibbs, Plouffe, Emanuel, Axelrod and others. The records of the entire Solyndra investigation will cost famous people their careers, names and historical positions.

Elon Musk

-
-
-

Elon Musk was a campaign financier for Feinstein. Elon Musk was partnered with John Doerr to control the Lithium Ion Battery industry based around the Afghan Lithium ion mining contracts and control of the electric car market. Recent news stories have revealed that his business is based on White House taxpayer hand-outs, as kick-backs, for acting as conduit for John Doerr's campaign finance deals.

Elon Musk hated fuel cells, ultra-capacitors, gasoline, diesel and anything that competed with Lithium ion, which he, Steven Chu, Feinstein and John Doerr had invested in. They all participated in sabotage campaigns against all of those other fuels using fronts like "EV WORLD", "PLUG-IN AMERICA" and other shill groups they controlled. Lithium ion technology turned out to blow up for no apparent reason; needs to come from countries that need to be invaded; gives off vapors that cause cancer, brain damage and kidney damage; loses it's life span and has over a hundred other problems with it. It has set senior citizens, children, Apple stores, homes and offices on fire and crashed multiple airplanes, killing the passengers. When you smell smoke in your passenger airplane, it is usually a lithium ion cell phone battery "going thermal" and releasing fumes. Greed over-came proper scientific oversight in deploying lithium ion in the way that Musk did. When Musk went to Russia, he met mobster businessmen who pitched him a mining deal for Afghan lithium fields. In fact, investigators now know, that Steven Chu, strangely, gave U.S. Taxpayer DOE cash to Russian controlled Ener1, Severstal and other companies when the Section 136 law said the money was only to be used to help American businesses in need. The Musk/Russian-mob connection seems to have been hot, then soured, when his lithium mining and rocket engine deals fell apart, the killing of which was facilitated by GOP operatives.

When Musk took Tesla away from its founder: Martin Eberhard, in a hostile take-over, (Musk never "founded" Tesla) he had to build the car in a very expensive way. He and Doerr ordered their friend: Steven Chu, to sabotage every applicant, for DOE money, which tried to make affordable cars. An affordable alternative energy car would kill off Tesla almost over-night. History has now proven that the metrics that Tesla used were disastrous, in that they have now spent more money, to sell less cars, than any company in history, while making an electric car that should have been easy to build. Tesla missed every single milestone, dramatically, that it proposed in its original DOE application documents, yet Steven Chu ordered the Doe to

look the other way in order to protect the White House deal.

Historical facts have now proven that every applicant for DOE advanced vehicle money was sabotaged and rejected, particularly if their car was affordable and accessible to the American public. Tesla couldn't survive an affordable electric competitor, at the time. Tesla investors bought most of the first Tesla's in order to inflate sales numbers. Musk was caught sending potential customers an email asking them to put a deposit in so he could claim the deposits were completed "sales" in order to inflate SEC filing sales numbers.

A Congressional investigation proved that Tesla had lied to get its loan and that Secretary of Energy Steven Chu had assisted in the scam at the same time that others had applied with a superior set of application metrics. Tesla's "debt ratio" was the worst of any applicant, they had no final design, their car did not work, they were 2000% over budget, they were using the funds to buy buildings for Richard Blum even though the application said don't do that, Treasury said that had bad credit and every other applicant beat their metrics. Yet they still got the cash, along with hand-held walk-throughs in the process from Steven Chu. It was a lie that Tesla could have survived without the loan. Musk was caught on camera saying that Tesla was "on the verge of bankruptcy" when they applied to DOE, a violation of the federal Section 136 law.

Google worked with Musk to delete any negative mentions about Musk, or his projects off the internet, 80% of which Google controlled, and "top-page-lock" any attack articles that Gawker was ordered to generate on Musk's competitors so that no outside IT service could get those attack articles removed from the top position. Even when lawyers wrote to Google to demand removal of the character assassination lock-in's on the top of Google's search pages, they were told: "Get a subpoena and then we might think about it."

Musk has been proven to have lied, mismanaged and engaged in a commodity trading scheme with Goldman Sachs. Goldman Sachs has already been hauled before Congress once, to start the investigation of this commodity monopolization scheme.

Attack services firm: In-Q-Tel provided staff to Musk and In-Q-Tel staff now help run his Space X company, which was given most of NASA as a gift for campaign funding.

Musk was forced to give his patents away for free because they were not only found to have no value, but to also accidentally disclose, within the very text of the patents themselves, the fact that Musk's batteries could be lethal and destructive in spontaneous explosions, according to the Tesla engineers who wrote the patent, three of whom suddenly, and strangely, died in the same airplane crash.

A large number of employees, customers, partners, wives and investors have sued Musk for fraud. Clinical psychologists have openly analyzed Musk, in the media, as a sociopath. Musk has bought hundreds of magazine articles and TV shows about himself due his narcissistic nature.

Musk is now working on a railroad project called the "Hyperloop", with Dianne Feinstein's railroad- kingpin husband's company, in order to seek to acquire more federal cash. All three of Musk's companies would not exist without nearly \$10 Billion dollars of federal kick-back cash and "favors" Musk has received. The State of California has given him nearly 80 million tax dollars via the Controller: Lockyer and other State Officials. California Attorney General Kamala Harris refuses to investigate due to campaign connections.

Surrounded by private jets, fashion "models", and other corrupt billionaires, and with the protection of the United States Secretary of Energy, The U.S. Attorney General, The California State Attorney General and the President (All of whom have now been Sunshine disclosure-proven to have been placed in office by Doerr's "Silicon Valley Cartel"), Musk and Doerr believed themselves to be "untouchable" (Just like Al Capone) and able to get away with anything, without consequences. All of the above data appears in many journals outside of the U.S. but it is never allowed to appear on Cartel owned: Reddit, Google, Hearst Publications, Facebook or other Cartel controlled U.S. media (Doerr/Schmidt/Musk Cartel groups now control almost 75% of U.S. digital media)

-

John Doerr

-

-

John Doerr had financed Feinstein and the Obama campaign. His group owned interest in Solyndra, next door to Tesla (and on the same land), and the Afghan mining contracts for indium, and other minerals, which Solyndra was to exploit as another Sachs commodity trading scam with Russian "business-men". Solyndra was raided by the FBI when the tip of the scam started to reveal itself. Solyndra's chemicals also made its products explode into flames, on user's roofs, during use, just like Tesla's cars.

John Doerr controlled a large part of what the media now calls: "**The Silicon Valley Cartel**". He ordered competing applicants black-listed, by the Cartel, and placed on his, now famous, "No Poach List", to keep them from getting jobs, if they were 1.) Not in his frat house boys club 2.) Had original government verified patents on technologies Doerr stole, and made billions of dollars on, without paying for 3.) Had, unknowingly, complained about a small part of Cartel corruption. Investigations into the Doerr-managed "No Poaching Scam" and, In-Q-Tel founded, National Venture Capital Association (NVCA) "AngelGate" valuation-rigging continue. The Vlog: "The Corbett Report", has released extremely incriminating details about In-Q-Tel.

John Doerr hates fuel cells, gasoline, diesel, and natural gas because they a) beat his lithium ion holdings in most metrics. John Doerr helped start Eric Schmidt's company Google.

John Doerr's company, Kleiner Perkins was sued for misogyny and sex abuse by Ellen Pao, who began to open the door of revelations on Doerr. His partner Ray Lane was charged with massive tax evasion. His friend, and New America Foundation staffer, White House Car Czar Steven Rattner was indicted for Securities fraud in New York. His other friend, Raj Gupta of McKinsey Consulting, (the firm who wrote all of the documents for Kleiner Perkins to lobby Washington with), sits in federal prison for corruption. His other partner Tom Perkins, who his company is named after, made insane statements in the public media about how "poor people don't appreciate that billionaires are smarter than them" and the poor are all "Nazi's" for saying bad things about billionaires. His other partner: Vinohd Khosla was exposed in a 60 Minutes episode as one of the major scammers in the Cleantech mess. Khosla is now being attacked, by most of California, for putting a gate on one of the States favorite beaches because *he said so*. Khosla's Indian partner in the car project, a Mr. Tata suddenly "fell" off the roof of a high building when he was about to go public. The list goes on. Mr. Doerr keeps some interesting company.

Attack Services firm: In-Q-Tel provided staff to John Doerr's projects and co-funded Google with his company. In-Q-Tel's Silicon Valley office is only a few hundred feet from one of John Doerr's offices and only 60 feet from one of John Doerr's company's doors. In-Q-Tel is famous for having been caught with FIVE TONS of Cocaine of their airplanes, one of which was listed in FAA records as "Cocaine One". Kleiner Perkins, working with Goldman Sachs, use a stock market manipulation technology called the "Flash Boy Computer Array", which artificially pumps up the stock market value of Doerr stocks, such as Tesla and Solyndra. At the moment of "Peak Pump", Doerr and Sachs "skim" cash off the top. Doerr and Sachs also "skimmed" incoming cash off of the federal cash from the Department of Energy, up-front, off-the-top, as "services fees". Once they get their cash, they abandon the company to bankruptcy. Under Steven Chu, more government funded companies suddenly failed, in the shortest, closest, time-frame, than ever in American history. John Doerr and Goldman Sachs were involved in every single one of those deals. For the third part of the scam, when the vast numbers of DOE funded companies mysteriously, and suddenly, went bankrupt, Doerr and Sachs claimed **profits** from the tax losses by exploiting the losses on their tax forms. U.S. Treasury investigators referred to this as "*unjust rewards at the expense of taxpayers*". Department of Energy senior staff, very clearly, participated in this organized crime operation. The White House has ordered the protection of Schmidt, Musk and Doerr because an investigation, any deeper, will lead directly back to The White House.

-

Eric Schmidt

-

-

Federal records now show Cartel member Eric Schmidt spent just as much time dictating White House policy as his partner: John Doerr. Eric Schmidt controlled The New America Foundation and In-Q-Tel which acted as political lobby groups and "campaign "hit-squads". While In-Q-Tel constantly claimed to be part of the CIA, The CIA disavowed any formal relationship with In-Q-Tel. In-Q-Tel has been shown to have taken an active approach in sabotaging, defrauding, and character assassinating Competing Cleantech contenders. In-Q-Tel helped John Doerr fund Google for Eric Schmidt. Like Musk's companies, Google would not exist without monopolization support and cash contracts from the White House.

Eric Schmidt has Google rig its search engine (ie: manually change the Google servers to alter search results) in order to character assassinate political and business foes of himself, or Musk. Eric Schmidt has spent more time in the White House than any current member of Congress.

The Cable TV industry has sued the White House for bowing to Eric Schmidt's demands to favor Google in all "net neutrality" rulings so that Google servers can still control election perception trends. The Cable industry has already started exposing Schmidt's bizarre sexual, business, marital and political practices. Google receives millions of dollars of wire transfers, per month, for relaying user information to political intelligence "user profile analysis centers" including In-Q-Tel. The death of Google technology creator: Rajeev Motwani, has always been surrounded by controversy. The recent "death-by-hooker" of Google search engine-rigging executive Forrest Hayes, is equally bizarre.

-

Nick Denton

-

-

Nick Denton was asked by John Doerr and Elon Musk to print attack articles, in his Gawker tabloid empire, which Eric Schmidt could then stick to the top page of Google while replicating those attack articles across thousands of servers in order to up-rank the attacks to their maximum potential. This tactic famously made a politician called Santorum come up on every Google search as "butt froth", while Schmidt and Denton laughed behind their hand that: "It's just something in the computer. We have no control over it. It's just a big computer, how could we control that?" The EU investigations have proven that lie to have been quite bold. Santorum's staff assisted in creating the EU investigation of Google and are hard at work reviving the FTC Monopoly investigation of Google.

Nick Denton had a close relationship with White House Press Secretary Robert Gibbs. In campaign issues, if the media tactic was too dirty for a White House release, Gibbs would have his agents: Berman and Blumenfeld, get Denton to push the story out, ie: Santorum "Butt Froth", Palin Book lawsuit, Romney tax record hack, etc. In an even more bizarre situation, Big Time Wrestler: Hulk Hogan, now holds the keys to Gawker's future in his hands, in a defamation lawsuit which Nick Denton has confessed "may End the Gawker Empire".

-

Gary. D. Conley

-

-

Gary Conley ran Solyndra/Musk competitor Solfocus and Musk/Doerr competitor H2Go. He was constantly sabotaged by John Doerr. Not long after he whistle-blew on John Doerr, and Elon Musk, he was found out back of Beale Air Force Base, in Northern California, with a bullet in his head. His family, friends and associates said he was not despondent and had no health issues. The Beale security tapes have become "unavailable."
