

**IEA Agreement on the Production  
and Utilization of Hydrogen**

**Task 12:  
Metal Hydrides and Carbon  
for Hydrogen Storage**

**Final Task Report**

**Edited by**

**Gary Sandrock  
Operating Agent  
for the  
U.S. Department of Energy**

**SunaTech, Inc.  
113 Kraft Place  
Ringwood, NJ 07456 USA**

<b>Preface to Project Publications List and Reports</b>	<b>1</b>
<b>List of Publications and Presentations</b>	<b>2</b>
<b>Project Reports</b>	<b>14</b>
<i>Project 1</i>	<b>14</b>
<b>Destabilized Magnesium Nickel Hydride</b> Helen Blomqvist, Ewa Rönnebro and Dag Noréus	
<i>Project 2</i>	<b>17</b>
<b>Improved Properties of Mg<sub>2</sub>NiH<sub>4</sub></b> S. E. Guthrie and G. J. Thomas	
<i>Project 3</i>	<b>20</b>
<b>Studies of CeMnAl and its Hydride</b> A. Züttel, P. Spatz, K. Gross, D. Chartouni, Ch. Nützenadel and L. Schlapbach	
<i>Project 4</i>	<b>23</b>
<b>Laves Phase CaAl<sub>2-b</sub>X<sub>b</sub> Alloys with Substitutional and Interstitial Elements X</b> H. Tanaka, H. Takeshita, N. Kuriyama, T. Sakai, I. Uehara, D. Noréus, A. Züttel, L. Schlapbach and S. Suda	
<i>Project 5</i>	<b>28</b>
<b>The Structures of Hydride Phases in the Ti<sub>3</sub>Al/H System</b> A. J. Maeland, B. Hauback, H. Fjellvåg, and M. Sørby	
<i>Project 6</i>	<b>34</b>
<b>Structural Investigation of Intermediates and End Products in the     Synthesis of Ti-doped Alkali Metal-Aluminum Hydrides</b> E. Rönnebro, D. Noréus, K. Kadir, A. Reiser and B. Bogdanovic'	
<i>Project 7</i>	<b>36</b>
<b>The IEA/DOE/SNL On-Line Hydride Databases</b> G. Sandrock and G. Thomas	

<i>Project 8</i>	<b>39</b>
<b>Mechanical Destabilization of Light Metal Hydrides</b>	
A. Zaluska, L. Zaluski and J.O. Ström-Olsen	
<i>Project 9</i>	<b>45</b>
<b>Ball Milling under Reactive Atmosphere</b>	
E. Akiba, H. Enoki and P. Tessier	
<i>Project 10</i>	<b>48</b>
<b>Catalytically Dehydrogenating Sodium Aluminum Hydride</b>	
C. M. Jensen, R. Zidan, S. Takara, S.E. Guthrie and G.J. Thomas	
<i>Project 11</i>	<b>53</b>
<b>High Pressure Synthesis of New Hydrogen Storage Materials</b>	
K. Yvon	
<i>Project 12</i>	<b>57</b>
<b>Ball Milling Effects during Fluorination of the Eutectic Alloy Mg-Mg<sub>2</sub>Ni</b>	
S. Suda, Y.-M. Sun, B.-H. Liu, Y. Zhou, S. Morimitsu, K. Arai, N. Tsukamoto, M. Uchida Y. Candra and Z.-P. Li	
<i>Project 13</i>	<b>64</b>
<b>Ca-based Ternary Alloys</b>	
H. Tanaka, Y. Sakamoto, H. Takeshita, I. Uehara, N. Kuriyama, L. Schlapbach and D. Noréus	
<i>Project 14</i>	<b>69</b>
<b>Catalytically Enhanced Sodium Aluminum Hydride</b>	
C. M. Jensen, S. Takara, K. J. Gross, S. E. Guthrie, G. Thomas and G. Sandrock	
<i>Project 15</i>	<b>75</b>
<b>Metal Hydride Safety Testing</b>	
F. Lynch	
<i>Project 16</i>	<b>78</b>
<b>Synthesis and Crystal Structural Analysis of New Ternary Hydrides Based on Hydride-Fluoride Similarity</b>	
E. Akiba, H. Enoki, Q.-A. Zhang and F. Gingl	
<i>Project C-1</i>	<b>80</b>
<b>Optimization of Single-Wall Nanotube Synthesis for H<sub>2</sub> Storage</b>	
A.C. Dillon, T. Gennett, J. L. Alleman, K.M. Jones, P.A. Parilla and M.J. Heben	
<i>Project C-2</i>	<b>85</b>
<b>Investigation of Hydrogen Storage in Fullerene Hydrides</b>	
R.O. Loutfy and E.M. Wexler	
<i>Project C-3</i>	<b>92</b>
<b>Assessment of Hydrogen Storage on Different Carbons</b>	
R. Chahine and P. Bénard	
<i>Project C-4</i>	<b>96</b>
<b>Hydrogen-Carbon Studies</b>	
Andreas Züttel and Louis Schlapbach
