

The 'Tude

You have seen the attitude face (the 'Tude) from women with hot faces and no fat: That look!

Only the ones that are 32 years old and up have it. It is the eye-rolling, I've-heard-this-a-million-times-before face.

They had sex every other night from age 16 to 32 with all of the hot looking guys but every one of those guys took off on them. Hmmmmm. Why?

Because hotness creates superficiality. In both the guys and the gals. Average looking people don't live lives like this? Billions of dollars are spent each year by women to carve themselves up surgically to look even more superficial and make themselves get even more objectified. Have you ever met a super-siliconed fat-lip injected gal who was not kind of a bitch. not much, right?

What is it? Masochism? Why do they buy into that plastic Kardashianism?
