

How Much Does A Modern Date Cost According To Tindr Users?

Men pay for dates. Women rarely pay.

Tindr and Match.com users have been discussing this on Reddit and Huffington Post. Let's look at the final averaged results.

If the woman has idealized (modified) abs, surgically dramatic facial structure or enhanced breasts, the costs are:

First Meeting Coffee Date:

Gas - \$4.00

Bridge toll - \$6.00

Parking \$15.00

Food & Drink Products: \$18.00

Your Time: XX

Total: \$43.00

Each of First 3 dinner dates:

Gas - \$8.00

Bridge toll - \$6.00

Parking \$28.00

Food & Drink Products: \$150.00

Your Time: XX

Per Dinner: \$192.00

Average Number of Dinners Before Sex Consent (DBSC) = 3

3 dinners x \$192.00 = \$576.00

Minimum Cost of 1 Hr. sex session with B-class Craigslist or Match.com escort = \$500.00

If the woman is “normal” or average looking, deduct 30% from those costs.

So, there you have the modern economics of social interaction. What are your thoughts?
