**Technical Consultant and web developer, Dylan Curran posted a long tweet thread documenting just how much information Google and Facebook store about people.**

Be prepared because this is gonna freak you out.

Facebook and Google have come under heavy criticism recently after privacy concerns were raised over the way they store and sell user data to advertisers.

Christopher Wylie, a Cambridge Analytica whistleblower told a committee of British MP's Tuesday Facebook has the ability to spy on you in your own home or place of work.

Facebook denies they spy on users with their app in order to deploy customized advertisements.

In a tweet thread, Dylan Curran takes you on a journey in 34 stunning tweets showcasing just how much Google knows about you. From your every move, to search history, to gender, health, relationship status, Google and Facebook are documenting pretty much everything you do day in and day out.

In one of Dylan Curran's last few tweets in the thread he even suggests he 'may be on an FBI watch list so if he dies in the next few months it wasn't an accident, it was a set-up.'

Curran also says Google and Facebook having all of this information can be used for nefarious reasons and violates multiple human rights.

Creepy.

Follow Dylan's tweet thread down the rabbit hole...

1. <https://t.co/1z255Zt1zf> Google stores your location (if you have it turned on) every time you turn on your phone, and you can see a timeline from the first day you started using Google on your phone

— Dylan Curran (@iamdylancurran) **March 24, 2018**

2. This is every place I have been in the last twelve months in Ireland, going in so far as the time of day I was in the location and how long it took me to get to that location from my previous one [pic.twitter.com/I1kB1vwntT](https://pic.twitter.com/I1kB1vwntT)

— Dylan Curran (@iamdylancurran) **March 24, 2018**

3. <https://t.co/qFCgY6QLN5> Google stores search history across all your devices on a separate database, so even if you delete your search history and phone history, Google STILL stores everything until you go in and delete everything, and you have to do this on all devices

— Dylan Curran (@iamdylancurran) **March 24, 2018**

4. <https://t.co/QRfgwkNj80> Google creates an advertisement profile based on your information, including your location, gender, age, hobbies, career, interests, relationship

*status, possible weight (need to lose 10lbs in one day?) and income*

— Dylan Curran (@iamdylancurran) **March 24, 2018**

5. *Google stores information on every app and extension you use, how often you use them, where you use them, and who you use them to interact with (who do you talk to on facebook, what countries are you speaking with, what time you go to sleep at)* <https://t.co/RJeRIXhtdq>

— Dylan Curran (@iamdylancurran) **March 24, 2018**

6. <https://t.co/5B6qxUvrjz> *Google stores ALL of your YouTube history, so they know whether you're going to be a parent soon, if you're a conservative, if you're a progressive, if you're Jewish, Christian, or Muslim, if you're feeling depressed or suicidal, if you're anorexic...*

— Dylan Curran (@iamdylancurran) **March 24, 2018**

7. *Google offers an option to download all of the data it stores about you, I've requested to download it and the file is 5.5GB BIG, which is roughly 3 MILLION Word documents* <https://t.co/3Na4FwjNXk>

— Dylan Curran (@iamdylancurran) **March 24, 2018**

— Dylan Curran (@iamdylancurran) **March 24, 2018**

10. *Facebook offers a similar option to download all your information, mine was roughly 600mb, which is roughly 400,000 Word documents*

— Dylan Curran (@iamdylancurran) **March 24, 2018**

11. *This includes every message you've ever sent or been sent, every file you've ever sent or been sent, all the contacts in your phone, and all the audio messages you've ever sent or been sent* [pic.twitter.com/H8ng7bcyod](https://pic.twitter.com/H8ng7bcyod)

12. Facebook also stores what it think you might be interested in based off the things you've liked and what you and your friends talk about (I apparently like the topic 'Girl') [pic.twitter.com/fqKiNlfATO](https://pic.twitter.com/fqKiNlfATO)

— Dylan Curran (@iamdylancurran) **March 24, 2018**

13. Somewhat pointlessly, they also store all the stickers you've ever sent on Facebook (I have no idea why they do this, it's just a joke at this stage) [pic.twitter.com/4F5sExbynf](https://pic.twitter.com/4F5sExbynf)

— Dylan Curran (@iamdylancurran) **March 24, 2018**

— Dylan Curran (@iamdylancurran) **March 24, 2018**

19. This is one of the craziest things about the modern age, we would never let the government or a corporation put cameras/microphones in our homes or location trackers on us, but we just went ahead and did it ourselves because fuck it I want to watch cute dog videos

— Dylan Curran (@iamdylancurran) **March 24, 2018**

36. I'm hoping to start making podcasts/videos to raise awareness, and touch on some more interesting topics like webcam hacking, major account vulnerabilities, and the threat of future tech. Since I can't dedicate myself full-time, I'd love if anyone who can help gets in touch.

— Dylan Curran (@iamdylancurran) **March 28, 2018**

37. I would really appreciate it if you could help me out, <https://t.co/T5bw953Tkj>, I will keep doing what I'm doing and help as many people as I can irregardless of what

*happens. But if I can dedicate myself to this full-time, we can definitely progress with change.*
