

Get Eric Schmidt in front of Congress and ask him what the “Dark Angel Protocol” is! Rigging Elections?

Edgy alternative internet news media are reporting that Google staff, who have turned whistleblowers, are revealing that Google’s investors came up with a way to control elections, by manipulating hundreds of millions of users experiences, and actually deployed this Psy-Ops control technology in 2007. Google’s own marketing material convinces advertisers they can do this for your Toothpaste or Toyota buying decisions, so why not for your President?

Their secret name for this set of public perception control tools is known, in deep Google circles, as “The Dark Angel Protocol”. The “Dark Angel” is presumed to refer to Barack Obama.

Could Google, Facebook and Twitter Vc’s get together, manipulate user experiences and trend perceptions, and trick the public into thinking one way vs. another way? Psy-ops in elections is not new, but a program on such a massive and insidious scale, if true, would be epic.

Could this be true, or just a wild ass Robert Ludlum offshoot story? Too crazy ...or Crazy-like-a-fox?

Whistleblowers say Google will try it on Eric Cantor’s primary today.

Send in your links. Let’s discuss...

Susan N. - DenverP
