

Convinced that GOOGLE is firmly in bed with the Deep State? (whatever)

by [SChalice](#)

I consider myself really good at using Google to search but today was unable to find basic, non-conspiracy links when trying to research 9/11. After typing in my queries a number of different ways and getting bogus results, I switched to DDG with the same entries and got immediate results on top.

FUCK THAT!

Of course they are. Why was Eric Schmidt in North Korea?

It isn't just Google. Bill Gates is building those satellites that will be able to track every human on earth. They'll be able to call up your movements every moment of the day and it will all be available to governments and corporations. When they say corporations, they mean trans national globalist corporations, not your incorporated company that will be crushed by the globalist corporations unless they get a percentage off of you.

They may have started in bed with the government, but they are the government. That's the real power struggle going on. They told Obama what to do and he did it. That's what why Hillary *had* to win. They own Trudeau, May, Macron, Merkel and every leftist government on earth.

They fund the social activist movement, and every program has the ultimate goal of displacing white men. White men are what they're scared of most on this earth.

We have no choice but to lop their fucking heads.

I don't see the benefit of GOOG trying to cover up what happened during the Bush administration.

Is Google censoring the war on Iraq, along with everything else?

You mean the Transnational Corporations might have something to hide about Bush being told to go bomb a country that didn't have undisclosed weapons of mass destruction?

9/11 covered up massive financial crimes and led to more crimes with the wars without goals. Who got all that money? I don't know exactly, but I bet the same folks were early investors in google. InQtel is beyond shady.

Because the right left fight is a distraction. They hate each other until they don't and what they do agree upon is more scary than what they don't.

If you're not familiar with it, have a look at In-Q-Tel. That is basically the venture capital arm of the CIA. No prizes for guessing which search engine they were investing in in the late '90s

Talk about rigging the system. There is no way a startup with CIA backing gets beaten by another.

Did you just wake up from cryogenic slumber? Everyone else is well over a decade and a half ahead of you on that one.

Yeah, in case you didn't get the memo, Bing search is what Google search used to be. I hate Microsoft with a passion, but

it's simply not reasonable to use Google search anymore.

if you were trying to find news articles about supporters being attacked at Trump rallies in 2016, you would've known something was off back then

Just to add a data point, the council bluffs data center is almost within walking distance of offutt airforce base. The data center is made to take any abuse possible, it is absolutely insane.

1912 jewish bankers hired woodrow wilson as their puppet to run for US president, he won. His goal was to create a coup over the USA, federal reserve act 1913, he succeeded. This gave them absolute control over the money and banking. With this immense newfound wealth they purchased the media, weapons of mass conformity. <https://www.youtube.com/watch?v=qA-gbpt7Ts8>

If they could buy wilson, you think they couldn't buy every president since? trumps first wife was jewish, all his kids are jews who are married to jews. Their goal is to exterminate whites, rule Earth with a global communism and reduce global population to 500 million.

They bought google and youtube, too.
