Tech Giants Google and Facebook are currently purging conservative content from Facebook and YouTube — They are hiding conservative stories on Google — They are shadow-banning conservative news on all social media.

In February Facebook **launched a new algorithm** to ensure that conservative news would not spread on the social media platform. The algorithm change caused President Donald Trump's engagement on Facebook posts to **plummet a whopping 45%**.

In contrast, Senators **Elizabeth Warren** (D-MA) and **Bernie Sanders** (I-VT) do not appear to have suffered a comparable decline in Facebook engagement.

Top conservative Facebook pages with daily traffic in the millions have seen 75% to 95% drop in traffic.

Young Cons, Western Journalism, SarahPalin.com, **Independent Journal Review**, Right Wing News, and *several others* have seen dramatic loss in traffic.

The Gateway Pundit does not rely on Facebook for our traffic numbers. Still, we saw a significant drop in Facebook traffic last month.

This is criminal behavior.

Meanwhile, liberal sites are doing fine.

Google also deleted several top Conservative channels this week.

Conservative YouTube channels were deleted in a Google purge this week.

Google later said they “accidentally” deleted conservative channels.

Today **Reddit The Donald** posted this letter to GOP lawmakers.

Either you stand with conservatives against Tech Giant censorship today — or you will stand alone at midterms.

During the election conservatives fled the corrupt mainstream media and went online to get their news from trusted websites.

Today far left tech giants want conservative sites eliminated.

The left is even targeting the advertising and income of conservative websites.

It's time to regulate Google and Facebook!

Where the hell is the GOP?
