KEY POLITICAL CORRUPTION CASE OVERVIEW

Take a look at the Big Tech and political connections in the following data.

All of these corruption issues are connected to the same exact bunch of bad guys. They know each other, party together, conspire together, coordinate the use of their companies to rig elections and monopolies, self-promote each other at TED Talks and tech shows, use the same ‘click-farms’ to rig web trends, share sex trafficking resources, organize stock market manipulations together, use the same crooked law firms and

dirty CPA's to money-launder, and run a mafia-like cartel that is protected by the public officials that they bribe.

All of the issues discussed in this document were created by this one group of corrupt politicians and big tech oligarchs! All of these issues affect you personally!

Congress won't shut them down because congress gets *paid bribes* by these crooks. You must vote them out of office, sue them, expose them in the media, and boycott their stock holdings and fight back to restore your democracy!

Sourced from - <http://www.pogo.org> - <http://www.sunlightfoundation.com> - <http://followthemoney.org> - <http://www.icij.org> - <https://www.transparency.org> - FBI, FTC, GAO, FEC files - Court records - Document leaks - U.S. Congress hearings and forensic investigation files.

YOUR POLITICIANS ARE TAKING STOCK MARKET INSIDER TRADING BRIBES AND HERE IS HOW YOU CAN CATCH THEM AND STOP THEM!

Have you noticed that none of the current decisions in politics help you? The current Washington DC and Sacramento policy decisions only help the politicians with their insider stock market profits!

Corrupt political-dynasty families conspire to give government funds, contracts, tax waivers, buildings, stock market profits and other insider perks to themselves and their friends. They also conspire to blockade, harm, sabotage and black-list those who compete with them and their friends.

These corrupt politicians are never prosecuted for their crimes, and can laugh in the face of those who point out their crimes, because they control the prosecution system. Their Quid Pro Quo criminal corruption is the single largest cause of the taxpayer hatred of Congress.

Are you sick of the dirty corporations, Silicon Valley Oligarchs and YOUR OWN Senators engaging in these crimes using YOUR tax dollars?

- Trillions of Dollars of Influence Peddling Between Famous Politicians and Secret Corporate and Family Accounts...
- Money Laundering...
- Sex Trafficking, Hookers And 'Executive Sex Clubs'...
- Killing Teens by Hiding Teen Suicides and Mental Health Issues Caused By T-Mobile Social Media
- Family Alcoholism...
- Political Bribery Using PACS and Dark Money Cash Relays...
- Stock Market Manipulations for Their Own Insider Trading...
- Infidelities and Spousal Abuse As Shown In Their Court Records...
- Organized Media Censorship By Silicon Valley...
- Misogyny and Sex Extortion of Workers...
- Fake Tax Exempt 'Charities' That Exist Only For Political Money Laundering...
- Forcing "ISSUES" On Us That They Covertly Own the Companies of...

- Dynastic Family Manipulations of Public Policy...
- Buying Stocks in Dept. Of Energy Funded Projects That Are Then Pumped-And-Dumped For Unjust Wind-Fall Profits...
- Election Rigging Using Google, Facebook, YouTube and Their Media Cartel...
- Search Engine Bias And Shadow Banning Of Competitors And Reporters...
- Big Tech Monopolies Information Manipulation...
- Recession Causing Market Anti-Trust Law Violations...
- Corporate Hiring Racism...
- Brotopia Frat Boy Rape Culture in Their Companies and Offices...
- Secret Offshore Shell Corporations to Hide Money...
- Venture Capital Funding Black-Lists...
- Collusion between Sand Hill Road, Palo Alto VC's On Finance Black-Lists, Valuation Prices and Monopolies...
- Patent Thefts and Attacks on Small Inventors...
- Political Payola Using Stealth Real Estate, Fine Art and Jewelry Holdings...
- Graft Via Bribes With Event Tickets, Dinners, Tax Waivers, and Vacations, Pretend Speaking Contracts, etc....
- Corrupt Lobbyists Who Hire Fusion GPS, Gawker, Black Cube, Google and Other 'media kill services'...
- Their Use of Our Democracy as Their Play-Thing...

All of these assertions have been proven in court records, federal investigations, Congressional charges, 60 Minutes segments, news documentaries, document and email leaks, and thousands of other sources.

The facts are undeniable and can be proven, clearly, in live televised Congressional hearings!

You have probably heard of “The Offshore Leaks”, “The Panama Papers”, “The Pandora Papers”, “The Swiss Leaks”, “The Sony Pictures Hack”, “The Luanda Leaks”, “The Bahamas Leaks”, “The Paradise Papers”, etc.; What you might not know is that EVERY bank and international CPA firm has been hacked. Different spy agencies from different nations, seeking to embarrass each other, have a leaking war going on.

The public has only seen 10% of what the international journalists (Like ProPublica, ICIJ, Transparency International, The Guardian, etc.) have in their hands.

End political corruption in America by making any stock ownership by senators and political insiders illegal

YOU CAN WIPE THEM OUT USING 100% LEGAL PUBLIC FORENSICS!

In all of recorded history, there has never been so much taxpayer cash given to so few people, where each, and every, one of the recipients was a friend of the politician giving away the taxpayer cash and everyone who got the cash immediately skimmed "unjust profits" and shut down the business.

This is a detailed examination of the political corruption that is destroying society. Your public officials are profiting from, and preventing the interdiction of, the bribes, cronyism, stock market insider trading payola, contract quid-pro-quo and revolving door jobs scams that are destroying Democracy.

Big Tech billionaires control your government; not you. It is time to fix that by suing them, firing them, exposing them in the media and news documentaries, bankrupting their stock holdings, voting them out of office and ACTUALLY enforcing the bribery laws!

You can see additional, verified, proof of this systemic Big Tech/Washington DC corruption at:

Regarding Facebook, the issues, that the public and the news media have complained about include: ***producing child suicides, racism, misogyny, child mental health threats, domestic spying, data harvesting, sex trafficking, election manipulation, tax evasion, Fusion GPS/Media Matters/ Black Cube hit jobs on competitors, censorship, contrived market monopolization, intellectual property theft, political bribery and many other social crimes! An unusually large number of their staff have been arrested for, or charged with, sex crimes, including under-age trafficking. This entity is one of the largest operators of bribes to public officials. Some of those bribes include billions of dollars of, non-FEC reported, search engine rigging for the political campaigns of the very politicians who are supposed to regulate them.***

"...Regarding Facebook-Meta known as: "FM": Their staff have been arrested for, or charged with, sex crimes, including under-age trafficking. Their bribes include billions of dollars of, non-FEC reported, search engine rigging for the political campaigns of the very politicians who are supposed to regulate them. See Shoshana Zuboff's, The Age of Surveillance Capitalism:

<https://www.contagious.com/news-&-views/shoshana-zuboff-on-the-age-of-surveillance-capitalism>

FM is part of a criminal RICO Big Tech Cartel. FM is an illicit monopoly that violates anti-trust laws. FM attacks smaller competitors who cannot defend themselves. FM uses public officials to blockade competitors. FM uses Stazi-like mind & ideology manipulation tricks to get you to agree with Mark Zuckerbergs

ideologies. FM steals patents & technology from others & refuses to pay for it. Sandberg pretends to be the goddess of women's rights yet she is screwing the CEO of Activision, the biggest female sexual abusing company in America. FM's stock is owned by almost all of the California politicians & their families. FM's runs tens of millions of dollars of defamation attacks against competitors.

FM hides all negative news coverage of Larry Page & Elon Musk. FM receives millions of dollars of payments from government spy agencies. FM promotes illegal immigration. FM runs VC funding back-lists against start-ups that are competitive. FM bribes politicians. FM is a criminal RICO-violating monopoly. FM pays bribes to politicians in FM stock. FM has a "no poaching" Silicon Valley jobs blacklist. FM bosses sexually abuse women & young boys. FM bosses control the NVCA financing cartel. FM's VR is based on spying on the public with VR sensors & cameras. FM controls national elections for anti-competitive purposes. David Plouffe & the Zuckerberg's were recorded in meetings planning a take-over of the United States Government. FM bribes some politicians with revolving door jobs. FM runs DDoS attacks on competitors by massively crawling their sites. FM has paid covert bribes, PAC funds, real estate & search rigging payola to almost every California Senator.

FM has paid bribes, through its lobby fronts, to halt FBI, SEC, and FEC & FTC investigations of FM crimes. Nancy Pelosi & Dianne Feinstein have promised to "protect" FM because their families profit off FM stocks. FM VC's & bosses have spent \$30M+ rigging the U.S. Patent Office to protect FM & harm FM competitors. FM bribed its lawyer into position on the board of the U.S. Patent office. FM rarely likes, or hires, black employees. FM hired most of the Washington, DC K Street lobby firms & told them to "do whatever they could" to control public policy for Zuckerberg. FM serves you custom manipulated content by automatically creating a covert digital dossier on you reflecting the content consumption preferences they have spied on about you. They continually evolve their dossier on you in order to steer you towards their ideology & their political party. At FM "data mining", "machine learning" & "AI" means computerized propaganda processing for certain political entities.

Their spy dossier on you uses abstract content-specific features of the consumed content, such as categories, topic models, & entities, which they automatically extract using natural language processing by comparing every word you use to a giant computer library of what those words might mean about your psychology. Their assessment of what your words might mean is based on what rich, white male, \$200K/year, DNC-promoting programmers think they might mean..."

FACEBOOK operates exactly like a Mexican drug cartel run by 'El Zucko' pushing addictive media and messaging to kids and vulnerable citizens in order to control global politics. Zuckerberg's "Tech Cartel" owns the U.S. Congress with billions of dollars of bribes and lobbyists. We have warned Congress and the agencies about these issues, in writing, since 2002 but lobbyists seem to speak louder than justice! The facts prove that Facebook is one of the largest abusers of children in the world. FACEBOOK-META makes over one billion dollars, per day, for each day that they delay Congress from acting!

If Osama Bin Laden and Adolph Hitler jointly owned Google and Facebook and Congress repeatedly called them in for hearings and at the end of each hearing they said "We made some mistakes but we will do better", would you ever believe them? Would you wonder how Congress could go for decades without stopping them? If you found Nazi gold bars and underage Afghan slaves in the closets of the Senators, would that better explain why Congress does nothing about Facebook and Google?

For more about Facebook - Meta's crimes against society,

MUSK'S SPACEX Corruption

SpaceX is another Elon Musk ego trip vanity project. His rockets blow up. His staff sues him for sexual and racial abuse. His only income from SpaceX is for launching spy satellites that spy on citizens. His 'STARLINK' media service is just a propaganda controlled privacy harvesting system. His satellites clog up the sky for astronomers, pollute the weather, screw up other communications, are war tools, fall out of the sky and are unregulated.

Musk and his SpaceX people have no idea what they are doing according to every major NASA employee. Their satellites are easily hacked and every major foreign nation has those satellites targeted to be shot down as soon as war breaks out. Musk's scam story about "colonizing Mars" is just a PR smoke-screen to hide the fact that all SpaceX does is privacy abusing spy satellites! The guy that created the largest online drug and murder-for-hire network did it at SpaceX.

Elon Musk's empire works by paying off public officials with stock market shares.

Elon Musk has no idea how a rocket actually works. SpaceX Rockets have blown up more than any other rocket company and destroyed billions of dollars' worth of nature, atmosphere, carbon burn and technology. One SpaceX rocket launch creates more atmospheric damage than 2000+ chimney fires. See more at <https://www.latimes.com/business/story/2022-11-17/spacex-employees-claim-they-were-illegally-fired-for-speaking-up-about-sexual-harrasment-and-for-criticizing-elon-musk>

- Google spies on competitors and steals their technology
- Google - Alphabet - YouTube stock is owned by almost all of the California politicians and their families and that is why Google
- Alphabet - YouTube is never regulated and always protected by them for their political and profiteering manipulations
- Google runs tens of millions of dollars of defamation attacks against competitors
- Google hides all media and news coverage for competitors of Larry Page's boyfriend: Elon Musk
- Google lies to the public about what they really do with the public's data
- Google promotes illegal immigration in order to get cheap labor and control votes
- Google runs VC funding back-lists against start-ups that are competitive
- Google bribes thousands of politicians
- Google is a criminal RICO-violating monopoly
- Google rigs the stock market with Flash-boy, Pump/Dump and Microblast SEC violating computer tricks
- Google pays bribes to politicians in Google and YouTube stock
- Google manipulates who gets to see what web-sites, globally, for competitor black-lists
- Google has a "no poaching" Silicon Valley jobs blacklist
- Google bosses sexually abuse women and young boys
- Google bosses run sex trafficking operations in the Epstein and NXVIUM cults
- Google bosses control the NVCA financing cartel over start-ups

- Most of the people that Google hires are homosexual leftists
- Google has placed the majority of the corporate staff in at least one White House
- Google controls national elections for anti-competitive purposes
- The company "Polyhop", in the HOUSE OF CARDS TV show, does all the crimes that Google actually does in reality
- Google's law firms, like Wilson Sonsini, are corrupt conduits for payola and political conduit-relays
- Google bribes some politicians with revolving door jobs
- Google is primarily responsible for destroying the Bay Area Housing opportunities
- Google runs DDoS attacks on competitors by massively crawling their sites
- Google boss Andy Rubin runs a sex slave farm according to his own family
- Google boss Eric Schmidt was a philandering sex-penthouse owner according to vast news articles
- Google executives hire so many hookers that one of them, Mr. Hayes, was killed by his hooker
- Google executives sexually abuse so many women that the women staff of Google walked out one day
- In the 2009 White House, you could n### GOOGLE --to swing a cat without hitting a Google insider
- Google has paid covert bribes, PAC funds, real estate and search rigging payola to every CA Senator
- Google has paid bribes, through its lobby fronts, to halt FBI, SEC, FEC and FTC investigations of Google crimes
- Google was funded by the CIA, via In-Q-Tel, a so called "501 c3 charity" which was caught with tons of cocaine
- Google gets millions of dollars of taxpayer cash for spying on Americans inside the USA
- Google's map service was a spy system paid for by taxpayers money that Google now profits off of
- Nancy Pelosi and Dianne Feinstein have promised to "protect" Google because their families profit off Google stocks
- Payment receipts prove that Google and Gawker/Gizmodo exchanged cash and staff for Character Assassination attacks
- Google VC's and bosses have spent \$30M+ rigging the U.S. Patent Office to protect Google and harm Google competitors
- Google bribed it's lawyer into position as head of the U.S. Patent office in order to have her protect Google
- To rig insider stock trades, Google hides negative Tesla stories and pumps positive Tesla stories on "push days"
- Google and Elon Musk Co-own, co-invest and co-market stocks covertly while running anti-trust schemes
- Google rarely likes, or hires, black employees per federal and news media investigations
- Google hired most of the Washington, DC K Street lobby firms and told them to "do whatever they could"
- The film: "Miss Sloane" depicts only 2% of the illicit lobbying tactics Google employs daily
- Demands for an FTC and FBI raid of Google, for criminal activity, securities law and election felonies have been filed
- Google's David Drummond had his Woodside, CA Quail Road house bugged revealing sex and financial misdeeds

"Google" operates it's staffing like a Scientology cult. They control their employee's lives, information, transportation, free time, entertainment & social life. Google & Elon Musk Co-own, co-invest & co-market stocks covertly while running anti-trust schemes - Google rarely likes, or hires, black employees per federal & news media investigations.

<https://truthstreammedia.com/2013/06/02/googles-regime-change-agent-jared-cohen/>

There is no doubt about whether Google has the ability to control voters. In laboratory and online experiments conducted in the United States, we were able to boost the proportion of people who favored any candidate by between 37 and 63 percent after just one search session. The impact of viewing biased rankings repeatedly over a period of weeks or months would undoubtedly be larger. In our basic experiment, participants were randomly assigned to one of three groups in which search rankings favored either Candidate A, Candidate B or neither candidate. Participants were given brief descriptions of each candidate and then asked how much they liked and trusted each candidate and whom they would vote for. Then they were allowed up to 15 minutes to conduct online research on the candidates using a Google-like search engine we created called Kadoodle. Each group had access to the same 30 search results—all real search results linking to real web pages from a past election. Only the ordering of the results differed in the three groups. People could click freely on any result or shift between any of five different results pages, just as one can on Google's search engine.

When our participants were done searching, we asked them those questions again, and, voilà: On all measures, opinions shifted in the direction of the candidate who was favored in the rankings. Trust, liking and voting preferences all shifted predictably. More alarmingly, we also demonstrated this shift with real voters during an actual electoral campaign—in an experiment conducted with more than 2,000 eligible, undecided voters throughout India during the 2014 Lok Sabha election there—the largest democratic election in history, with more than 800 million eligible voters and 480 million votes ultimately cast.

Even here, with real voters who were highly familiar with the candidates and who were being bombarded with campaign rhetoric every day, we showed that search rankings could boost the proportion of people favoring any candidate by more than 20 percent—more than 60 percent in some demographic groups. Given how powerful this effect is, it's possible that Google decided the winner of the Indian election. Google's own daily data on election-related search activity (subsequently removed from the Internet, but not before my colleagues and I downloaded the pages) showed that Narendra Modi, the ultimate winner, outscored his rivals in search activity by more than 25 percent for sixty-one consecutive days before the final votes were cast. That high volume of search activity could easily have been generated by higher search rankings for Modi.

The Silicon Valley "venture capital" offices on Sand Hill Road in Palo Alto, right above the Stanford University campus, work together to decide how they will manipulate elections in a way that will give them the most profits and power. They then tell the bosses at Google, Facebook, Netflix and the other big tech companies that they finance, how to manipulate the media message (with a little help from their CIA advisors at In-Q-Tel), to make the public perceive the left wing message that they want. Google, and it's Cartel (Alphabet, YouTube, and hundreds of other shell-company facades) are a criminal organization engaged in felony-class crimes.

Google's bosses bribe politicians, regulators and law enforcement officials to hold off prosecution. At Google: Kent Walker, Andy Rubin, Larry Page, Eric Schmidt, Sergey Brin, Jared Cohen, Yasmin Green, David Drummond and Ian Fette are so enmeshed in sex scandals, election manipulation, and White House bribes that it is hard to comprehend how they can get any legitimate work done. Between all of the sex cult activity; hookers; rent boys; political bribes to Pelosi, Harris, Newson, and Feinstein; DDoS attacks they run; CIA and NSA stealth deals; privacy harvesting; Scientology-like employee indoctrination; cheap Asian labor; covert Axiom scams and other illicit things they get up to; one just has to wonder. For more about Google's corruption see: https://en.wikipedia.org/wiki/Criticism_of_Google

In California, elite arrogant asshole dynasties send their kids to Stanford University. Stanford puts the kids in asshole frat houses to train them to get away with rape and run monopolies. When they graduate they either go up the hill to Sandhill Road and start a venture capital clone operation or they get their frat friends on Sandhill Road to racketeer-fund their start-up or political campaign using money scammed from your parents pension funds.

They only work with their frat buddies and insiders in a tribal 'old boys club' manner. They steal all the technology and markets they want because they control all of the tech lawyers and politicians via bribes and revolving doors. Most of the money in Stanford University bank accounts is from Foreign and Hollywood oligarchs delivered as bribes meant to get their snot-nosed brats into Stanford. Stanford bosses keep all of this covered-up and covertly fund political campaigns to grease the wheels of political corruption. They then sexually extort some Stanford interns in Rosewood Hotel rooms, get the most 'trophy wife' ones pregnant, and start the cycle all over again.

Alas, Stanford is the training ground for abuse, corruption and 'Bro-Crime'. The issues, that the public and the news media have complained about include: producing child suicides, racism, misogyny, child mental health threats, domestic spying, data harvesting, sex trafficking, election manipulation, tax evasion, Fusion GPS/Media Matters/ Black Cube hit jobs on competitors, censorship, contrived market monopolization, intellectual property theft, political bribery and many other social crimes! An unusually large number of their staff have been arrested for, or charged with, sex crimes, including under-age trafficking. This entity is one of

the largest operators of bribes to public officials. Some of those bribes include billions of dollars of, non-FEC reported, search engine rigging for the political campaigns of the very politicians who are supposed to regulate them. For more read Emily Chang's book: **BROTOPIA**. Silicon Valley has had the largest number of Congressional hearings against it, BUT the least number of regulations imposed on it. Why? You can look no further than the covert ownership of Silicon Valley by elected officials. Our politicians get paid bribes, by Silicon Valley, to keep the political corruption alive and well while they operate, with impunity, as the biggest threats to society ever manifested. While the FBI, FTC, DOJ and FEC are supposed to objectively prosecute this case, it is impossible for them to be objective when their raises, promotions, house payments and stock market profits are entirely determined by the individuals we are charging with these crimes. Trillions of dollars of stock trades and direct payola bribes were exchanged using the White House as a broker and government agencies as a stock market manipulation platform. Politicians turned the government into a cheap garage sale of cronyism!

These matters involve felony charges against U.S. Senators and other public officials. The companies charged in these issues are largely owned by U.S. Senators and their family members, along with major government agency officials. In other words, the companies charged with doing coordinated crimes and corruption are owned by the very people that are responsible for regulating those companies. Those public officials have the means, the motive and the novel ability to manipulate funding for those companies and against their competitors.

Forensic data proves that the charged officials have done so. Analysis of financial disclosure data, FINCEN reports and ICIJ leaks shows senators and their spouses have as much as \$400M invested in corporate stocks. We have first-hand knowledge of, and experience with, West Coast public officials putting hit-jobs, media attacks, de-funding orders and benefits manipulations on their constituents in order to protect their stock interests.

As they set national policy on important issues such as climate change, tech monopolies, medical debt and income inequality, these US senators have glaring conflicts of interest and have participated in cover-ups of these crimes and attacks on us for reporting them.

60 Minutes exposes the number one way that your Senator gets their bribes

Speaking of COVER-UPS: 1.) Simone Biles, The U.S. Olympic Gymnastics Team and Larry Nasser sex case, 2.) The Jeffrey Epstein sex cult case, 3.) The Gov. Gretchen Whitmer kidnapping case, 4.) The 9/11 families case, and hundreds of other cases prove that government officials cover-up crimes. The victims reported to the FBI, DOJ, GAO, FTC, SEC and Congress in a timely manner and got stonewalled, lied to, attacked and retaliated against simply because they reported a crime! THIS CASE is yet another such case where the crimes were reported long ago but because it involved famous rich people, it was covered up by public officials.

The Documented Characteristics of Silicon Valley Venture Capitalists and Tech CEO's:

A horrific phenomenon of cultural depravity and white-collar crime is going unchecked in Silicon Valley because Silicon Valley controls the media and the politicians that are usually supposed to check these kinds of things. Millions of pages of news reports, documentaries, interviews and legal transcripts prove the following to be true:

Elitist Cult. Silicon Valley elitists believe they are better than everyone else. Silicon Valley's Kleiner Perkins founder: VC Tom Perkins, said that poor people must be "*Nazi's*" for not accepting the "*superior intellect*" of VC's. Silicon Valley's Kleiner Perkins VC Vinod Khosla, took over California's favorite public beach, bribed the White House for "green cash" and got sued for arrogance by a horde of public interest lawsuits. Silicon Valley's Kleiner Perkins founder Ray Lane was indicted for tax evasion. Silicon Valley's Kleiner Perkins boss John Doerr was sued for sexual office abuse and running a "frat house". Most of the VC's and tech CEO's in Silicon Valley are charged with ethics breaches.

Prostitutes. Silicon Valley males hire more hookers and "rent-boys" and fly more sex workers into the Bay Area than any other city in America. Google's and Tesla Investments executives were killed in sex and drug romps with hookers. Google's Eric Schmidt ran a huge "sex penthouse" and promotes infidelity and "anti-marriage". Google's search engine rigging boss died at the hands of one of his hookers. The Silicon Valley VC's had the Rosewood Hotel built at the end of Sandhill Road as a place to take interns and hookers to for sex. Underage sex efforts operated by these VC's and Tech CEO's have created the "Pizzagate" phenomenon.

Rapists and Sexual Coercion of Employees. Young interns are "sent up the hill" by Stanford to the VC's Sandhill Road offices to become sexual playthings for the VC's at the Rosewood Hotel. Ellen Pao sued Kleiner Perkins over the sexual "rape culture" that they promoted. Thousands of women have written books and articles about the sexual intimidation they are subjected to by Silicon Valley VC's and their tech CEO's.

VC's Joe Lonsdale, Micheal Goguen and hundreds of others have been charged with rape and sex trafficking. Stanford University gets "endowments" and "gifts" for hushing rape culture and intern-fluffing up.

Assholes. Fraternity *House Take-What-You-Want* culture is re-percussively promoted in the bars, clubs, meetings, conferences and emails of the VC's and CEO's. The TV Show: **Silicon Valley**, underscores the point of the dangers of infectious asshole-ism in Silicon Valley.

Clones. They assemble those around them that have the same stereotypical facial structure. In a room full of ordinary people and Tech VC's, the VC's faces stand out as Hollywood-type character-cartoon duplicates of each other.

Sexual deviance and extremism. Google's founders have all had extreme sex scandals involving cheating, 3-way sex, and divorces over abuse, forced anal sex and other outrages. Their teachers at Stanford have had to quite over their sex scandals. Their willingness and infatuation with sexual extremes defines them as moral degenerates who care little about laws and ethics.

Insider Dysfunctional Parents. The majority of the VC's and Tech CEO's come from rich dynastic families who are cultism-like devoted to "the family bloodline" and run by male oligarchs who believe in a rape culture/oligarch ethos. This belief system is passed on to their children. The oligarch parents threaten to cut endowments to Stanford University if Stanford punishes their son's Frat Houses for date rapes.

Tone Deaf. Silicon Valley Tech people exist in a conceptual ideology reinforcement bubble by never interacting with, or reading information or news from, anyone outside of their group. VC Tim Draper spent vast amounts of money trying to make Silicon Valley its own country in order to systemize the Silicon Valley tunnel-vision bubble. They want to secede from America because they are offended by normal people who they consider to be low-class and unworthy.

Murders. Rajeev Motwani taught the Google founders how to build Google and was found, mysteriously, floating, dead, in his Silicon Valley swimming pool. Silicon Valley's Gary D. Conley reported John Doerr and Elon Musk for corruption and was found with a bullet in his head behind Beale Air Force base. Three top Tesla engineers reported corruption at Tesla Motors and then suddenly died in a plane crash next to Tesla's factory in San Carlos. There are over 100 mysterious deaths associated with people who had conflicts with Google, Kleiner Perkins and other Silicon Valley oligarchs.

Arrogant. Self-Centered Narcissists. Elon Musk has spent over a billion dollars buying exclusive Google, Twitter, MSM and Facebook hype about himself. Every Tech CEO has a multi-million dollar PR agent assigned to make them look like "Gods of Industry". They regularly hold "Babes and Ball's" parties and sex parties in Woodside that require women to beg for their money. They were trained to be "assholes" and "abusive dominants" via the Stanford Rape/Frat Culture.

Misogynists. All White-Male-Controlled with frat house pasts. Women are used As Sex Objects and *Window Dressing*. The largest number of anti-women news stories, jock/bro blog reports and charges for abuse come from Silicon Valley. VC Steve Westly's CEO friend is notorious for kicking his girlfriend hundreds of times because she "sassed" him. Almost of their Divorce filings include abuse charges against the man.

Manipulation of Employees. Silicon Valley cartel companies practice Scientology-like indoctrination and "cultural programming" of employees. These highly impressionable naive young employees are kept in "controlled environments", sent to "mindfulness programming workshops" and told what kind of political opinions they should have. Tight-knit groups of females experience [synchronized menstrual periods](#) over time, cohesive Google and Facebook employee groups engaged in decision-making [discount dissenting viewpoints](#) in the interests of consensus, and that couples who stay together long enough [begin to look alike](#). A [new study](#) has captured another group phenomenon in Silicon Valley and chronicled in humans' natural

habitat: “[group brain synchrony](#)”. This is a CIA-like brainwashing technique exploited to get all Google/Facebook/Twitter employees to rapidly adopt the same political views.

Racists. Silicon Valley companies have the lowest rates of hiring, or promoting blacks, in America even though they have a high population of blacks at the edge of their community.

Male insecurity issues. They use **TED-Talks, SXSW and Synchronicity Events** as self-promoting hype in which to act like an apostle of a tech religion. They buy Tesla cars as a badge of arrogance and mock any male who does not own what they own or who did not go to Stanford or Yale. These pretentious and ostentatious boys are more inclined to brag about penis-size than family.

Blacklisting. In the **AngelGate Investigation** and **Silicon Valley No Poaching Class Action Lawsuit**, Silicon Valley was exposed as an insider club that black-lists those who look different or are not part of the boys club.

Politically corrupt. Silicon Valley has bribed more politicians than any other domestic region in history. They promote more immigration in order to get cheap labor for their tech companies. They steal their technology and bribe politicians to eliminate patent protections for small inventors that they steal from. Political Corruption and Bribery Is *the Norm* for these boys. Silicon Valley created a CIA knock-off called “In-Q-Tel” in order to use CIA technology to manipulate elections at Google, Facebook and Twitter. The 60 Minutes Episode called: “The Cleantech Crash” is about their multi-billion dollar scam using the Dept. of Energy as a slush-fund. They refuse to allow their MSM to report on their corruption and crony kickbacks, i.e.: Tesla Motors Funding, Off-shore tax evasion, Hooker networks, etc.

Collusion. In the **AngelGate Investigation, the Silicon Valley No Poaching Class Action Lawsuit**, and hundreds of other cases, Silicon Valley was exposed as an insider club that colludes to rig valuations, stock markets and employee poaching. They operate in herds within their peer group. They are not inclined to independent thinking. Kleiner Perkins has been caught placing moles and saboteurs inside competitor’s start-ups. They operate in herds within their peer group. They are not inclined to independent thinking.

Stock Market Criminals. Stock Market Pump-and-Dump, Flash Boy Algorithm Manipulation, Insider Trading, Market Rigging. The Securities and Exchange law violations and FTC monopoly law violations are vast in number.

Burning Man Sex-and-Drugs Devotees. Silicon Valley frat boys have a huge participation in the date-rape goings-on at Burning Man and buy extensive pheromone and skin contact delivery animal-tranquilizer drugs to use on young Burning Man girls.

Minimal Regard for Consequences. Although their PR agents promote them as “green” and “socially positive”, it is all hype to get tax waivers and government hand-outs. Mark Zuckerberg’s take-over of San Francisco General Hospital’s brand was entirely a scam to get him a \$1 billion dollar tax evasion deployment. The Silicon Frat Boys act on impulse and try to buy off the collateral damage later.

Closeted homosexuals. Using the tremendous funds they have at hand from their exclusive monopolies in public media, they push their trans-gender agendas through their bought-and-paid for politicians. This has resulted in a generation of sexually confused children who believe that they should cut their penises off. The top bosses at Facebook, Google, Twitter, Tesla and other companies are lying to the public about their sexuality and using hired wives, known as “beards”. If they lie about something so basic, one has to wonder what else they lie about.

Thieves. They steal most of their technology from small inventors who can’t defend themselves. They get inventions from Indian engineers and then ship them back to India before the employees can get any stock or

IP rights. The tech CEO's send their VC friends to competing start-ups to spy on competing technologies and steal it. The VC's say they are just doing "due diligence" but they are actually sucking the competing start-up dry of IP and staff and making a clone of it under another name.

There are so many other awful things about the people of Silicon Valley. You get the picture. Silicon Valley is a swamp and a cesspool.

SENATOR INSIDER TRADING

The corruption is easy to prove with a simple spread-sheet but the corrupt Senators have done everything they can to keep you from seeing that spread-sheet. If you saw the spread-sheet that shows all of the covert family bank accounts, fake trust funds, shell companies and stock market accounts for Dianne Feinstein, Harry Reid,

Nancy Pelosi, etc.; you can easily see how they only get a salary of \$190K per year but put hundreds of millions of dollars in their accounts that all traces back to special interest groups that tell them what laws to make and what laws to stop from moving forward. Forensic accountants at the GAO, FBI or SEC can pop out the latest update on any given day. These Senators have "rules" that delay investigations against themselves, though. Also, as we all saw from the Comey case: Corrupt Senators can even tell the head of the FBI who to NOT investigate! The 2008 and 2021 "Stimulus Funds" were just scams cooked up by politicians for them to skim stock market pump-and-dump profits off of and grab personal payola.

Judges and regulators who reviewed this case who owned the culprits companies:

<https://www.dailymail.co.uk/news/article-10038643/131-federal-judges-broke-law-hearing-cases-involving-companies-financial-in.html>

In all these corruption cases, these corrupt people took the same steps to conceal their assets. They each took the money in secret ways. The main ways are 1.) Via Dark Money stealth political funds; 2.) Bribes paid via insider trading (notice that most of these crooks marry an investment banker to run their dirty schemes) and 3.) Getting government contracts, loans and grants for their friends that they get kick-backs from. They then had their dirty law firms and CPA's shove the money into their standardized covert financial structure to hide it. They use family members to run the operation. Their dirty family members and lawyer/CPA teams cover up their tracks. They then have intermediaries spend the money to get those islands, yachts, mansions, hookers, Tesla's, etc.

FINCEN, The FBI and the GAO have proven that stock ownership by politicians creates noncontractible quid pro quo relations with firms like Tesla, Google, Facebook and Netflix. The ownership by US Congress members in these firms contributing to their election campaigns is higher than in noncontributors. This bias toward contributors depends on the financial incentives of politicians and the relation's value. Firms with a stronger ownership–contribution association receive more government contracts, cash and tax waivers, such as Elon Musk's record-breaking government payola. The financial gains from these contracts are economically large when politicians buy stocks in covert exchange for contributions to the politicians, via insider arrangements.

Where's the politician's 'dirty money' money coming from? everyone is asking.

House Speaker Nancy Pelosi, D-Calif., has served in Congress for nearly 34 years and presently presides in a top-tier position as one of the most powerful figures in the U.S. government.

Speaker was unable to pass the bipartisan infrastructure bill as progressives in her own party signaled their disapproval. Many have condemned her policies, saying they're making it "harder and harder for average Americans to accumulate wealth," shackling them with taxes and "destroying the dollar with reckless spending." The current salary of a Speaker of the House sits in the low six-figures, yet Pelosi is one of the richest members of Congress. So what is her secret: "It appears to be her husband, Paul?"

"After they got married, Paul opened up a real estate and venture capital firm. Through his connections, he pushed Nancy into the political world, helping her get elected to Congress in 1987," This is just like how Dianne Feinstein and Richard Blum hooked up their own deal.

The couple has timed the market and insider trading perfectly over the years while Nancy's been a Washington insider. With real estate and stocks, the Pelosis always know what the right investment is based on her lobbyist deals. The Pelosis own several pieces of real estate including a mansion in Napa Valley valued up to

\$25 million, a DC waterfront condo worth over \$2 million, and a red brick mansion in California's Pacific Heights.

Her husband owns commercial properties in San Francisco "combined, worth up to \$50 million.

In 2018, the Pelosis' wealth has skyrocketed. That year, her financial disclosure report revealed a net worth of over \$114 million. In 2019, Pelosi's assets total up to a whopping \$271 million and in 2020, those numbers went up even more too as high as \$315 million.

In 2007, Visa worried the new Democrat Congress would target their swipe fees, costing them billions. So they hired a team of lobbyists who descended on Pelosi. Visa's CEO personally met with her. She got donations from them. One of his advisers left and became a VISA lobbyist himself. Suddenly, Paul Pelosi got a phone call from his broker. He was in luck, Paul was offered a prescreened invite to get in early on Visa's \$18 billion IPO. Did Nancy and her husband hesitate? No, they bought between \$1 million and \$5 million worth of Visa stock. But it gets better. While Pelosi was speaker, bills that would have hurt Visa's stock price were blocked in the House. Visa shares going up over 200 percent during the time, making the Pelosis a fortune on paper.

In January, the Pelosis got a million dollars' worth of Tesla stock right before Joe Biden announced electric car incentives in June. The Pelosi family cashed in big time just before Congress was set to pounce on Big Tech. Mr. Pelosi exercised options on Google's parent company, Alphabet, making an easy \$5.3 million.

Pelosi, Harris, Feinstein, Google and George Soros own Elon Musk's companies. Could any competitor to Musk get a fair shake in commerce or government funding? Never!

In March, Paul Pelosi exercised \$2 million worth of Microsoft options, just two weeks before the tech giant got a \$22 billion contract to equip the US Army with high tech headsets. The Pelosis and the Feinstein's have never been indicted for insider trading, but her marriage investments and access, combined with extremely fortunate timing, have created a lot of suspicions.

FINCEN, GAO, FBI, ICIJ and private investigators are now following the money, and there sure is a lot of it. There are hundreds of suspected criminal dark money charges that have been pointed at San Francisco Bay Area politicians.

The 2008 and 2021 "stimulus funds" are quid pro quo scams to pay off political insiders. We reported these crimes (with FBI-class evidence) to every law enforcement agency in writing (FBI, DOJ, SEC, IG, FTC, OSC, FEC, etc.). Apparently, citizens are ignored if the crimes involve politicians and their billionaires. The cover-ups are off-the-charts! These mobsters (Google, Tesla, Facebook, LinkedIn, Netflix, In-q-tel, Kleiner Perkins, Greylock, etc; acting in a coordinated, collusion-based, operation) are paying billions of dollars of political bribes (...via cash, real estate, sex trafficking, lobbyists, search engine rigging, crony jobs, biased censoring, campaign funds, stock market manipulations, Ukrainian money laundering, etc.) to delay justice and blockade our, and your, rights! There can be no question about the fact that Google, Facebook, Netflix, Tesla and the Silicon Valley Cartel control the Obama and Biden White House. For example: Elon Musk ordered the politicians who are his bitches to sabotage his competitors.

He gave those political insiders: cash, stock in his cartel, revolving-door jobs, campaign funding, sex workers, off-shore money laundering, and other quid pro quo. Eric Schmidt, Larry Page, Mark Zuckerberg, and the rest of the tech mob, all worked together on these crimes. The hacks and leaks of their documents prove it. Government agency bosses are covering up these crimes to protect their jobs and their corrupt stock market

holdings. Musk and Goldman Sachs have gotten over FIFTEEN BILLION DOLLARS of free taxpayer cash and monopolized exclusives to pay for Musk's drugs, sex parties and mansions. This is one of the largest violations of anti-trust laws in history. The politicians and agencies that are supposed to stop him are getting money from him.

Musk exists entirely from quid pro quo bribes! Musk's banks, including Deutsche Bank, have had to pay more than \$100 million to settle charges related to violating anti-bribery laws and engaging in money laundering. While the Musk-controlled media bloviate on the god-like image of Musk, he and his buddies are just crooks and mobsters. It is now almost impossible for the public to reach any media source that is not controlled by the Silicon Valley Cartel via synchronized talking points. Politicians who say that their only motivation is to "save" the helpless billionaire Elon Musk and his unicorns: 1.) sabotage any companies who are not making Tesla's, 2.) have sex with Tesla lobbyists and bankers, 3.) own the stock in Tesla Motors, 4.) are venture capital partners in Kleiner Perkins (i.e.: Gore) and Greylock capital insiders, 5.) Trade revolving door jobs with the Elon Musk cartel, 6.) Gave Musk over \$15B of free taxpayer money, 7.) Get campaign financing from Musk, 8.) Order government agencies to freeze funding for Musk's competitors, 9.) And engage in a vast number of other corruption and anti-trust crimes.

U.S. Senators, Agency Heads and Congress are bribed by Google intermediaries with: Billions of dollars of Google, Twitter, Facebook, Tesla, Netflix and Sony Pictures stock and stock warrants which is never reported to the FEC; Billions of dollars of Google, Twitter, Facebook, Tesla, Netflix and Sony Pictures search engine rigging and shadow-banning which is never reported to the FEC; Free rent; Male and female prostitutes; Cars; Dinners; Party Financing; Sports Event Tickets; Political campaign printing and mailing services "Donations"; Secret PAC Financing; Jobs in Corporations in Silicon Valley For The Family Members of Those Who Take Bribes And Those Who Take Bribes; "Consulting" contracts from McKinsey as fronted pay-off gigs; Overpriced "Speaking Engagements" which are really just pay-offs conduited for donors; Private jet rides and use of Government fuel depots (i.e.: Google handed out NASA jet fuel to staff); Real Estate; Fake mortgages; The use of Cayman, Boca Des Tores, Swiss and related money-laundering accounts; The use of HSBC, Wells Fargo, Goldman Sachs and Deutsche Bank money laundering accounts and covert stock accounts; Free spam and bulk mailing services owned by Silicon Valley corporations; Use of high tech law firms such as Perkins Coie, Wilson Sonsini, MoFo, Covington & Burling, etc. to conduit bribes to officials. This will never end unless the public demands laws to prevent all politicians, and their families, from owning ANY stock market stocks or securities! See more at: <https://www.cbsnews.com/news/congress-trading-stock-on-inside-information/>

Lithium RARE EARTH MINES And Battery Corruption

Lithium ion batteries: Cause wars, rape and genocide in the Congo, Afghanistan and Bolivia from the corrupt mining deals involved with mining lithium and cobalt; are insider trading-owned by ex-CIA boss Woolsey and DOE Boss Chu; excrete chemicals that mutate fetuses when they burn; destroy your brain, lungs and nervous system when they burn; kill the factory workers who make them; cause Panasonic to be one of the most corrupt companies in the world; poison the Earth when disposed of; can't be extinguished by firemen; poison firemen when they burn; are based on criminally corrupt mining schemes like URANIUM ONE; Have over 61 toxic chemicals in them; come from an industry that spends billions on internet shills and trolls used to nay say all other forms of energy; are insider-trading owned by corrupt U.S. Senators who are running a SAFETY COVER-UP about their dangers. Apple products with lithium ion batteries have been exploding and setting people on fire; over time the chemical dendrites inside each battery grow worse and increase the chances of explosion as they age - LITHIUM ION BATTERIES BECOME MORE AND MORE LIKELY TO EXPLODE AS TIME GOES ON AND AS THEY AGE;

"Bad Guys" have figured out how to make them explode remotely; have their dangers hidden by CNN and MSM because pretty much only the DNC people profit from them; are the heart of Elon Musk's stock market scam. The Obama Administration promised Silicon Valley oligarchs the market monopoly on lithium ion batteries and the sabotage of fuel cells in exchange for campaign financing and search engine rigging; United States Senators that are supposed to protect us from these deadly products own the stock market assets of them so they protect them and stop the FDA, OSHA, DOT & NHTSA from outlawing them.

WRITE YOUR ELECTED REPRESENTATIVE AND DEMAND THAT LITHIUM ION BATTERIES BE MADE ILLEGAL TO SELL! NiCAD and Hundreds of other battery chemistries DO NOT have all of these problems but Lithium Ion batteries get a monopoly because of politician insider trading ownerships. A recent fire on U.S. Highway 101 near Mountain View, CA, burned the driver alive and killed him. In Florida two

kids died in a Tesla, burned alive, screaming in agony. A man died in agony in a Tesla crash in Malibu that set Malibu Canyon on fire. A young woman, at the start of life, and her boyfriend were burned alive in their crashed Tesla. There are many more deaths and crashes than you have heard about.

The deaths and the cover-ups are endless. Senators Dianne Feinstein, Harry Reid, Nancy Pelosi, Kamala Harris and their associates own the stock in Tesla Motors and/or its suppliers and mining companies and those cover-up and halt investigations and laws designed to save the public. They, and their crony's, spend over \$1B a year to shill and troll hype about lithium ion batteries and cover-up the dangers. Lithium ion EVs are more prone to battery fires.

Experts say that their lithium-ion batteries can fuel hotter fires that release toxic fumes and are more difficult to put out. Lithium ion fires keep reigniting which explains why it takes so long and requires copious amounts of water or foam (it is an electric fire, after all) to smother the flames. Tesla employee Bernard Tse and his team warned Elon Musk about these dangers in 2008 and they got fired and/or warned to "say nothing" by Musk. Three top Tesla engineers died in a plane crash next to Tesla offices in San Carlos after two of them agreed to become whistle-blowers. Elon Musk exists because he bribed DNC politicians and Senators Feinstein, Reid, Boxer, Harris, Clinton and Pelosi to give him free taxpayer cash and government resources from the Dept. of Energy and the California treasury.

DOE has been covering-up organized crime activities at DOE in which DOE funds are being used as a slush-fund to pay off DNC campaign financiers and to pay for CIA/GPS Fusion-Class attacks on Silicon Valley business competitors of those DNC campaign financiers who DOE staff share stock market holdings with. Elon Musk is a criminal, a mobster, an asshole, a bald fake-hair wearing, plastic surgery-addicted, douchebag, woman-abusing, sex addicted, tax evader. Musk exploits poor people and child slaves in the Congo and Afghanistan to mine his lithium and Cobalt. Musk spends billions per year to hire Russian trolls, fake blogger fan-boys and buy fake news self-aggrandizement articles about himself. Musk thinks he is the 'Jesus' of Silicon Valley. Fake News manipulator Google is run by Larry Page and Larry is Musk's investor and bromance butt buddy. Musk uses massive numbers of shell companies and trust funds to self-deal, evade the law and hide his bribes and stock market insider trading. A huge number of Tesla drivers have been killed; pedestrians and oncoming drivers have also been killed, and Musk covers it up.

The DNC and the MSM refuse to allow any articles about Musk's crimes to be printed because they benefit from Musk's crimes. Musk has been professionally diagnosed as a 'psychotic narcissist. A 'Silicon Valley Mafia; cartel of frat boy sociopath venture capitalists like Steve Jurvetson, Tim Draper, Eric Schmidt, et al; threaten those who do not support the cult of Tesla or their political candidates. In EVERY blog that you read that mentions 'Musk', at least 1/3 of the comments have been placed there by Musk's paid shills. Musk holds the record for getting sued for fraud by his investors, wives, former partners, employees, suppliers and co-founders. Elon Musk has gone out of his way to hire hundreds of ex-CIA staff and assign them to "dirty tricks teams" to attack his competitors and elected officials who Musk hates.

Musk never founded his companies. Musk's "Starlink" satellites are domestic spy and political manipulation tools - never get your internet from one. Musk stole Tesla in a hostile ownership take-over from Marty the true inventor of the Tesla. The same kind of EMF radiation proven to cause cancer from cell phones exists in massive amounts in a Tesla. Musk can't fix a car or build a rocket and has almost no mechanical skills. If you pull a report of every VIN# of every Tesla ever built and cross reference that with insurance, repair and lawsuit records you will find that the "per volume" fire, crash, death and defect rate is THE WORST of any

car maker in history! Musk is a lying con artist and partners with Goldman Sachs to rig the stock market. Sachs has a dedicated team of 18 men who rig stocks and valuation bumps for Musk. Over 1000 witnesses can prove every one of those claims in any live televised Congressional hearing! Senators Dianne Feinstein, Harry Reid, Nancy Pelosi, Kamala Harris and their associates own the stock in Tesla Motors and/or its suppliers and mining companies.

That is why they criminally help cover-up investigations of Tesla! All of this was reported, in writing, to James Comey, Patricia Rich and David Johnson at the FBI. The DNC bosses own the stock in lithium, Solar and EV markets and use kickbacks from those markets (Especially via convoluted campaign finance laundering via Elon Musk) to finance the DNC. The DNC bosses use character assassination as their main political tool against any member of the public who speaks out against their felony stock market scams and PizzaGate-like scandals. The Harvey Weinstein reports by Ronan Farrow show that they have teams of hired goons that they pay to destroy people's lives.

They use Black Cube, Mossad, and In-Q-Tel, Stratfor, Gawker Media, Gizmodo Media, Media Matters, David Brock, Sid Blumenthal, NY Times, Google servers, Facebook servers, Podesta Group, Perkins Coie, Covington & Burling and a host of "assassins". It should be a felony to hire character assassins in the USA. DEMAND A LAW and DEMAND the termination of these attack services. IE: Gawker and Gizmodo Media sets-up the attack stories and, in paid partnership with Google, Google kicks their attack links around the globe, in front of 8 Billion people, forever. Google locks the attack articles of its enemies on the front top search results of Google search results forever, on purpose! That is why Google is being terminated in the largest, most well-resourced anti-corruption public service take-down in history! Tesla and Musk are protected by shareholders Harris, Pelosi, Feinstein, Brown and Newsom. Panasonic (indicted for bribery and Musk's partner) spends billions of dollars annually cover-up lithium battery fires and battery defects. Fuel Cell cars do not have any of these problems! See more at: <https://lithium-ion.weebly.com/>

Google, Netflix, YouTube, Facebook, META, etc. exist to mass manipulate populations and run stock market scams for their sociopath owners. Essentially, Google, Netflix, YouTube, Facebook, META, etc. get so much money and so many orders from the CIA/NSA that they ARE the CIA/NSA!!! From INSIDE Google, our team saw Google manipulate the entire internet to hype up Larry Page's "boyfriend": Elon Musk and Tesla, which Google execs owned a portion of, while sabotaging Tesla's competitors. Google illicitly and illegally timed these manipulations with stock market pump-and-dump efforts to exploit insider trading.

That is a felony violation of RICO, Antitrust and other laws. Every single thing that Google does is contrived to harm a competitor, a politician, an employee whistle-blower or some other business adversary. There are no "bugs", "operator errors", "server anomalies" or other media "accidents" at Google. Everything Google does is contrived, at a psychological warfare kind of level, to change a social perception. Google must show its software to FBI, SEC, FTC and our search engine optimization experts to prove that they did not engage in these crimes. The fact is: We can prove they did the crimes and FBI experts can help us prove it! Google is known as the "Nazi's of the Internet". In a case unfolding in Britain over whether Google wrongly demoted price comparison rival Foundem from its search results in favor of paid-for adverts, Google must now decide which it values more: the algorithms that rank its search results, or its stance that manually fiddling with those results to promote its own paid-for products over rivals' sites doesn't break competition laws. The integrity of Google's ranking processes relies upon all webmasters or website owners having the same degree of access to information about Google's ranking...

This will no longer be the case if information of this kind is made available to some individuals offering commercial services to assist companies to improve their Search ranking. Google is a criminal operation. Its executives have been publicly exposed as participants in horrific sex scandals, money laundering, political bribery and racism. It is time for the bought and paid shill politicians to stop protecting them! - Google spies on competitors and steals their technology - Google runs tens of millions of dollars of defamation attacks against competitors - Google hides all media and news coverage for competitors of Larry Page's boyfriend: Elon Musk -

The United States Department of Energy AND The FCC have taken bribes via stock payments to their staff, executives and lobbyist contractor/advisors. They were paid off to partner with California Senators in order to rig money exclusively to Elon Musk. The ATVM, LGP and Battery funding programs at DOE are nothing but crony payola scams and most of DOE staff should be indicted for conspiracy.

Pelosi, Harris, Feinstein, White House financier Google and George Soros own Elon Musk's companies. Could any competitor to Musk get a fair shake in commerce or government funding? Never!

Google lies to the public about what they really do with the public's data - Google promotes illegal immigration in order to get cheap labor and control votes - Google runs VC funding back-lists against start-

ups that are competitive - Google bribes thousands of politicians - Google is a criminal RICO-violating monopoly - Google rigs the stock market with Flash-boy, Pump/Dump and Microblast SEC violating computer tricks - Google pays bribes to politicians in Google and YouTube stock - Google manipulates who gets to see what web-sites, globally, for competitor black-lists - Google has a "no poaching" Silicon Valley jobs blacklist - Google bosses sexually abuse women and young boys - Google bosses run sex trafficking operations in the Epstein and NXVIUM cults - Google bosses control the NVCA financing cartel over start-ups - Google has placed the majority of the corporate staff in at least one White House - Google controls national elections for anti-competitive purposes -

The company "Polyhop", in the HOUSE OF CARDS TV show, does all the crimes that Google actually does in reality - Google's law firms, like Wilson Sonsini, are corrupt conduits for payola and political conduit-relays - Google bribes some politicians with revolving door jobs - Google is primarily responsible for destroying the Bay Area Housing opportunities - Google runs DDoS attacks on competitors by massively crawling their sites - Google boss Andy Rubin runs a sex slave farm according to his own family - Google boss Eric Schmidt was a philandering sex-penthouse owner according to vast news articles - Google executives hire so many hookers that one of them, Mr. Hayes, was killed by his hooker - Google executives sexually abuse so many women that the women staff of Google walked out one day -

In the 2009 White House, you could not swing a cat without hitting a Google insider - Google has paid covert bribes, PAC funds, real estate and search rigging payola to every CA Senator - Google has paid bribes, through its lobby fronts, to halt FBI, SEC, FEC and FTC investigations of Google crimes - Google was funded by the CIA, via In-Q-Tel, a so called "501 c3 charity" which was caught with tons of cocaine - Google gets millions of dollars of taxpayer cash for spying on Americans inside the USA - Google's map service was a spy system paid for by taxpayers money that Google now profits off of - Nancy Pelosi and Dianne Feinstein have promised to "protect" Google because their families profit off Google stocks -

Payment receipts prove that Google and Gawker/Gizmodo exchanged cash and staff for Character Assassination attacks - Google VC's and bosses have spent \$30M+ rigging the U.S. Patent Office to protect Google and harm Google competitors - Google bribed it's lawyer into position as head of the U.S. Patent office in order to have her protect Google - To rig insider stock trades, Google hides negative Tesla stories and pumps positive Tesla stories on "push days" - Google and Elon Musk Co-own, co-invest and co-market stocks covertly while running anti-trust schemes - Google rarely likes, or hires, black employees per federal and news media investigations -

Google hired most of the Washington, DC K Street lobby firms and told them to "do whatever they could" - The film: "Miss Sloane" depicts only 2% of the illicit lobbying tactics Google employs daily - Demands for an FTC and FBI raid of Google, for criminal activity, securities law and election felonies have been filed - Google's David Drummond had his Woodside, CA Quail Road house bugged revealing sex and financial misdeeds - Google, and it's Cartel (Alphabet, YouTube, and hundreds of other shell-company facades) are a criminal organization engaged in felony-class crimes. Google's bosses bribe politicians, regulators and law enforcement officials to hold off prosecution.

At Google: Kent Walker, Andy Rubin, Larry Page, Eric Schmidt, Sergey Brin, Jared Cohen, Yasmin Green, David Drummond and Ian Fette are so enmeshed in sex scandals, election manipulation, and White House bribes that it is hard to comprehend how they can get any legitimate work done. Google executives came from most of the fraternity houses involved in the college rape scandals. Google sells covert character assassination

services to politicians and fellow oligarchs. YouTube/Google/Alphabet/Deep State are all the same entity. They conspire to hide news about their corruption and they control most of the internet.

The Musk Empire has paid more bribes to politicians than almost any other modern entity. That is why no full investigation of the Musk scams has ever been completed. Google's Eric Schmidt and Larry Page have a bromance relationship with Musk and use the global resources of Alphabet to hide any negative news about Musk assets. The 2008 Department of Energy Cleantech Crash proves that a federal agency was used as just one big slush-fund to pay-off political campaign financiers, operate insider-trading stocks and sabotage those financiers' competitors using taxpayer-financed resources! We have used private investigator, FBI resources and deep AI research to reveal that all government staff working on our application were getting quid-pro-quo...they were on the take. (Can anyone point out to us EVEN ONE person who was in the DOE/White House loop who was not working for, invested in, getting a future job from or otherwise conflicted?)

What do you do when The U.S. Government convinces you to invest millions of dollars, and your life, into one of their projects? Then their project turns out to be a scam where they had covertly hard-wired the upside to a couple of Senator's and their campaign financier friends. The fix was in and the game was rigged to use a government program as a slush-fund for friends-with-benefits. We, and the public, got defrauded. Now the damages must be paid for, one way, or another. Every one of the insiders who did get government funding got it in the exact same size and order as their covert political campaign funding and stock market bribes to the deciders. Chamath Palihapitiya and other Silicon Valley insiders have now exposed the fact that Greylock, Kleiner, etc. are just a VC Ponzi Scheme! In this whole mess.

Musk used crooked Senators to get his funds. Those Senators and government agency bosses were financed by, friends with, sleeping with, dating the staff of, holding stock market assets in, promised a revolving door job or government service contracts from, partying with, personal friends with, photographed at private events with, making profits by consulting for, exchanging emails with, business associates of or directed by; one of those business adversaries, or the Senators and politicians that those business adversaries pay campaign finances to, or supply political search engine manipulation services to. Elon Musk is notorious for getting Department of Energy money by bribing public officials and placing his friends: Steven Chu, Matt Rogers, Steve Westly, Steve Spinner's 'special friend', etc. on the staff of the Department of Energy and in the White House.

We have FBI-class records, financial tracking, emails, stock market relay records and other forensic data that proves it. We can swear, warrant, certify and prove these assertions in front of Congress in a live Congressional hearing or Civil Jury trial, given non-compromised legal backing. If you think you have bribed the same number of Senators, bought a President and taken over most of the Department of Energy like Musk did... go for it! In this day and age, with every citizen able to track every public figure, with FBI-quality databases, on their home computers, it might be a crash-and-burn but you are welcome to try. Lithium metals, and other rare earth mining materials, are monopolized by Elon Musk and his Silicon Valley Cartel, in rare-earth corrupt mining scams. Lithium's widespread use in cars is hindered by a challenging obstacle: upon multiple charge-discharge cycles, fractal filaments called dendrites always grow through the electrolyte from the negative to the positive electrode and short-circuit the battery from the inside, thus guaranteeing that Tesla Cars will eventually all explode. Musk and Panasonic have known this since 2007 (They are "dumping" the batteries via Tesla) and have paid U.S. Senators, who own stock in Tesla, to cover it up.

The lithium fires and toxic vapors are a major safety concern because they have killed, poisoned and injured too many citizens. Musk gets away with his scams because he pays U.S. Senators bribes with stocks in his corporations and has a thousand crooked Goldman Sachs investment bankers selling his hair-brained schemes to your parent's pension funds. Tesla is known as "the official car of douche-bags". The safety defect cover-ups on the Tesla are extreme. Musk's narcissistic trophy-wife mom and his extremist father (who got his young sister pregnant) are thought to be the cause of Musk's racism and sociopath behaviors.

An Inconvenient Truth: How Tesla Became a Trillion-Dollar Company through Corruption, Bribery and Cronyism

Astonishing story about the rise of green technologies using political payola

By Ilya Pestov and the Justice Alliance

After the news that Hertz decided to buy 100 000 Tesla cars for more than \$4 billion, Tesla capitalization has already increased almost by \$200 billion. I am not talking about the market irrationality anymore, but I feel a bit curious. Hertz has recently emerged from bankruptcy and has not received any wholesale discount from Musk. How and why is Hertz going to buy such expensive cars? The answer is simple — with taxpayers' money.

Apparently, the White House has recently passed the Budget Reconciliation Bill, which would cost \$1.75 trillion for US citizens. There are plenty of benefits for the so-called 'clean energy' in it, particularly, 30% of tax deductions for 'qualified commercial electric vehicles'. It means that after buying Tesla cars Hertz will receive \$1.26 billion of tax cashback. In fact, there are also some benefits for the installing of electric vehicle charging stations. Hertz has already announced plans to make thousands of charging stations.

Lithium, Cobalt and rare earth mines are owned by Kleiner Perkins, Goldman Sachs and Department of Energy/White House insiders. That is what power's Elon Musk's cars. Many say that Tesla was just a front for invading foreign nations for their lithium battery mines (which are operated with child labor).

It is important to mention that common people have also an access to tax benefits that the public pays for with their April income taxes and the compensation limits are increased from \$7500 to \$12 500. As an example, instead of paying \$15 000 income tax you may buy Tesla Model S and pay just \$2500. It is like a pretty bonus from Tesla or a good discount on electric vehicles. Seems to be a good motivation to refuse internal-combustion engines, doesn't it?

Moreover, Tesla also gets ZEV credits and other benefits for manufacturing its products. That way, the US government restructures the automotive market literally by hand and picks the winners and losers. Do you know what I find the most interesting in this story? The fact that the new bill was published on October, 28th but Hertz announced buying of Tesla cars on October, 25th. As you can understand, the decision was made much earlier.

You may already know that Secretary of Energy Steven Chu, who gave Tesla their money, and his Silicon Valley friends at McKinsey Consulting, who provided the staff for the Department of Energy, were all in the pocket of Kleiner Perkins, where Al Gore works. Chu has now been replaced by an actress named Jennifer, who laughs at any suggestion that her job involves protecting America by keeping gas prices low and who owns the very companies that she is giving government funds to.

Now I would like to tell you about one very interesting character in the US establishment named Al Gore. This is the former US Vice President under Clinton, the presidential candidate in 2000 and the Nobel Peace Prize winner for the film *An Inconvenient Truth* (2006) about global warming.

His film and book have actually become the foundation for modern climate policy and the public demand for renewable energy sources. One should notice keep in mind that along with the awareness of internal concern for the ecology Al Gore was one of the first who realized the commercial potential in projects devoted to the protection of the environment.

Two years before ‘An Inconvenient Truth’ Al Gore together with Goldman Sachs Chief Asset Manager David Blood has run a new investment company Generation Investment Management. As a result, they both defined terms sustainable investing and ESG.

The former presidential candidate, as we could see, was very good at technology and finance. In 2007, he was suddenly invited to become a partner in Kleiner Perkins — one of the oldest and largest venture funds of Silicon Valley. John Doerr, one of Kleiner Perkins chief partners, joined the advisory board of Generation Investment Management.

J. Doerr, as Al Gore, stood for the innovations in clean energy to struggle with climate change. On the TED conference in 2007, he quoted his daughter “your generation created this problem, you better fix it”. That reminds me on Greta Thunberg’s words which would be told later. So that J. Doerr and Al Gore had a similar vision of the future and the month after mentioned partners’ rotation Kleiner Perkins fund invested into Silver Spring Networks. Biden's daughter, Ashley, left her hand-written diary for journalists to find where she reveals the same thoughts (in addition to her naked shower play with Joe Biden)

By great coincidence, this deal happened a year before the US Department of Energy had announced a \$3.4 billion grant program for smart grid developers. In fact, \$560 million of this amount was spent to utilities serviced by Silver Spring Networks, which works exactly with smart grids. 6 years later Silver Spring Networks successfully entered an IPO.

Luck literally pursued Kleiner Perkins. In 2008, the fund invested tens of millions dollars in a start-up hybrid cars manufacturer Fisker Automotive. After that, in September 2009, the company received a low-interest \$529 million loan under the Advanced Technology Vehicle Manufacturing (ATVM) direct loan program from the same US Department of Energy.

Congress passed ATVM in 2007 after a drop in sales in the big three (General Motors, Ford, and Chrysler). The volume of the borrowed capital was \$25 billion. The goal of the program was to help the US auto industry to reduce fuel costs because Americans were tend to choose more fuel-efficient Japanese cars. That is, the problem devoted not to ecology issues, but much more to fuel saving.

Again, ATVM passed in 2007, but the allocation of funds began only 2 years later on a competitive basis. In February 2009, 8 months before the government loan to Fisker Automotive, John Doerr of Kleiner Perkins became a member of the Presidential Economic Recovery Advisory Council. The funny thing is that Fisker did not even have manufacturing facilities in the USA and the assembly of their Karma models took place in Finland.

The Obama-Biden administration appointed a venture capitalist from Kleiner Perkins as a member of an economic advisory board. They also signed a government loan for help American automotive industry to a company (without any manufacturing capacity in the United States) that Kleiner Perkins has invested in.

That trick was obviously noticed by the public. Some companies have sued the Department of Energy, Mitt Romney even called on Congress to open an investigation into the loan to Fisker Automotive, pointing out that its investors included Al Gore, who sponsored Obama’s presidential campaign. Nevertheless, somehow all those worries dwindled away as federal cover-ups went into full swing.

Fisker's plans to start the manufacture at a closed GM plant in Delaware at the expense of a government loan, which GM itself did not receive, deserved special attention. These plans caused some questions among local residents, and then current Vice President Joe Biden, who served as Senator from Delaware from 1973 to 2009, assured people that the budget money for Fisker would be paid off, and the company will eventually return "billions-billions" dollars to everyone.

Running ahead, the budget money didn't return to taxpayers because Fisker went bankrupt in 2013. From the bankruptcy documents, which fell into the journalists' hands only 7 years later, it turned out that Hunter Biden (Joe Biden's son) was an investor of Fisker. However, this fact also faded into oblivion without preventing Biden from gaining 58.8% of the votes in Delaware during the 2020 presidential election.

Let us turn back to Tesla. Only \$8.4 billion were allocated from the \$25 billion program of help to the American auto industry. Only 5 companies received money, although 108 applications were received. Almost \$6 billion went to Ford with a democratically oriented management, \$1.5 billion were given to Nissan, about half billion — to Fisker and Tesla and, finally, \$50 million came to a less known VPG company.

Surprisingly, the credit limit has not been exhausted, large manufacturers like General Motors or Chrysler did not receive money, but two unprofitable startups from California, selling several hundred cars each, did. We already know the main lobbyists of Fisker — they are Al Gore and John Doerr, who invested in Fisker through Kleiner Perkins. But were they acquainted with Elon Musk? A brief search immediately gave a positive answer to that question.

In 2013, Al Gore, while talking about his new Tesla S in an interview to Yahoo Finance, called Elon Musk his friend. More than that, his son Al Gore III has been in charge of Policy & Business Development at Tesla since 2015. After learning that I immediately went to have a look at the Generation Investment Management profile on CB Insights. It turned out that the Gore fund had invested in Musk's SolarCity in 2011 and Gore III worked there as a Policy Officer.

Then in 2016, Tesla acquired SolarCity. An unprofitable service company that didn't even produce solar panels was taken over for a suspiciously large amount of money. Recently it turned out that Elon Musk has faced a \$9.4 billion fine for this deal, although the final court decision had not been made yet. It is important that after the takeover in 2018, Al Gore became suddenly nominated for the post of chairman of the Tesla board of directors.

Al Gore rejected that offer but I did not doubt more about his close connection with Tesla. At the same time, I was interested in their possible contacts before receiving the lobbied state subsidies of 2009. That's why I decided to change the angle and check whether Tesla has a relationship with Kleiner Perkins. Then it turned out that Elon Musk had been friends with John Doerr for a very long time.

In 2006, when Tesla looked for money in round C, Kleiner Perkins fund offered \$50 million, while VantagePoint offered \$70 million. Despite the huge difference in bids, Musk wanted to strike a deal with Kleiner Perkins but on the condition that John Doerr would sit on the board of directors. Unfortunately, J. Doerr had many other obligations and was forced to refuse. That's why Musk chose VantagePoint, as he told in an interview.

I went on and learned that the vice president of Tesla in 2006–2017 was Diarmuid O'Connell. As I remember, he was responsible for national security issues under former Secretary of State Colin Powell. He also spoke about Iraq chemical weapons and showed test tube to legitimize the military invasion of Iraq at the UN in 2003.

I wondered how he appeared in that story. However, I didn't have to look for an answer for a long time, so let us meet Colin Powell, a member of the advisory board of Kleiner Perkins, a strategic partner of the fund in 2005.

There was no direct investment from the fund in the company, nevertheless it seems that there was another strong connection between Kleiner Perkins and Tesla. Is Al Gore really not a government subsidy beneficiary for Tesla? My confirmation bias did not allow this thought to get along in my head. Searching for keywords, I came across publications in Yahoo Finance and Insider Monkey. The articles mentioned Gore's earlier investment in Tesla.

Keeping in mind that the journalists could simply make a mistake, I began to study which funds were invested in Tesla at earlier stages and whether Al Gore was involved. Finally, I came across an interview with the managing partner of Capricorn Investment Group on the blog of the Japanese financial holding Nomura. He said that Capricorn financed the filming of 'An Inconvenient Truth' movie.

Capricorn was founded by Jeffrey Skoll, the former eBay president and billionaire. The fund invested in Tesla together with SpaceX at early stages. Mr Gore brought in \$35 million! Can you imagine? "That's a big wad of cash for someone who reported barely \$2 million in assets in 2000, when his job as vice president came to an end", as the New York Times wrote in 2008.

As a result, Al Gore was the direct beneficiary of providing state loans under the ATVM program for Fisker Automotive and Tesla Motors, in which he owned shares through venture funds Kleiner Perkins and Capricorn Investment Group.

When I proved it, I wanted to learn more about Al Gore's bio. It has been revealed that after losing the election, in 2001, he became a vice president of Metropolitan West Financial — a company with more than \$65 billion in assets under management. The company was managed by former heads of Drexel Burnham Lambert. That was a bankrupt investment bank, which history was very similar to Lehman Brothers.

The same year Mr Gore also joined the Google Advisory Board, in which he invested together with Kleiner Perkins in 1999. Probably that was the time when he met John Doerr. Then, in 2003, the former US presidential candidate became a member of Apple's board of directors. In addition, the founders of Google were also early investors in Tesla.

It is clear that Albert Gore had many connections in political and financial communities. In 2006, he started a charitable organization The Alliance for Climate Protection. The company launched a \$300 million (sic!) ad campaign to mobilize Americans to reduce greenhouse gas emissions immediately. As a result, an "inconvenient truth" was told to everyone.

In 2009, Gore appeared before the United States Senate Committee on Foreign Relations to support Obama's economic recovery plan. Then the government had passed the Recovery and Reinvestment Act, which included an \$80 billion stimulus package to promote green energy initiatives. Newspapers called the bill the "biggest energy bill in history".

The person who owns stakes in Tesla and Fisker first knocks out government loans and then pushes a law according to which manufacturers of electric vehicles should pay fewer taxes, and buyers of electric vehicles should receive tax deductions. Can you imagine?

Surely, Al Gore was not the only one who acted in this process. In 2006, Nick Pritzker, the brother of Hyatt founder, invested in Tesla. His niece Penny Pritzker became the 38th US Secretary of Commerce in Barack

Obama's cabinet, and his nephew was the Governor of Illinois. In general, Pritzker is one of the richest families in the US.

Among of early investors in Tesla there is Steve Westley, a politician and businessman. He has already joined the company's board of directors in 2007. More than that, during the 2008 presidential election, Westley acted as a co-chairman of California's Obama for America campaign. Currently, he is a member of the US Department of Energy advisory board.

Al Gore, John Doerr, Nick Pritzker, Steve Westley, Elon Musk, Sergey Brin, Larry Page — all of them were so-called donors and beneficiaries to the Obama campaign. I mentioned only the names from the public access. Let me remind that these people are only mentioned in the context of the Tesla story while the whole green initiative and the Recovery and Reinvestment Act affects a much larger number of companies and investors.

The rapid development of electric vehicle companies is taking place in a distorted market environment. Their commercial success is mainly driven by government incentives unavailable for ICV cars manufacturers.

The US government is literally restructuring the auto market by hand in order to make one guy: Elon Musk, massively rich... In that case the active discussions about climate change and greenhouse gas emissions could probably be nothing more than a part of a program to reallocate money in the US establishment since Nancy Pelosi, George Soros and The Feinstein family are the true owners of the stock profits from Elon Musk.

However, the question remains whether this is really a good thing, because there is no full consensus in the scientific community regarding the general belief in the environmental friendliness of electric vehicles and the beneficiaries are always the same 50 people associated with Nancy Pelosi.

He is the #1 crony capitalist government mooch in America and has received billions of dollars of your tax money to help him buy his mansions, starlets and sex parties. His cars and rockets blow up, his tunnels are unsafe, his satellites spy on consumers and his brain chip company tortures small animals. He swiped all of his technology from someone else and has never come up with his own inventions. Space-X is just a domestic spying company. Don't buy Musk's bullshit about Space-X doing any good deeds. Everything Space-X launches is to spy on the poor folks on the ground and monitor their internet. Also, Musk's Neuralink company tortures small animals to try out Musk's pseudo-science mind-reading chips. Tesla cars have been found to have a vast number of electronic and mechanical defects that cause crashes, fires, explosions, toxic exposures and DEATH! Elon Musk is THE CRONY CAPITALIST GOVERNMENT MOOCH KING taxpayer funds leech of the world. See more at: https://en.wikipedia.org/wiki/Criticism_of_Tesla,_Inc.

Google is a criminal RICO-violating monopoly - Google rigs the stock market with Flash-boy, Pump/Dump and Microblast SEC violating computer tricks - Google pays bribes to politicians in Google and YouTube stock - Google manipulates who gets to see what web-sites, globally, for competitor black-lists - Google has a "no poaching" Silicon Valley jobs blacklist - Google bosses sexually abuse women and young boys - Google bosses run sex trafficking operations in the Epstein and NXVIUM cults - Google bosses control the NVCA financing cartel over start-ups - Google has placed the majority of the corporate staff in at least one White House - Google controls national elections for anti-competitive purposes -

The company "Polyhop", in the HOUSE OF CARDS TV show, does all the crimes that Google actually does in reality - Google's law firms, like Wilson Sonsini, are corrupt conduits for payola and political conduit-relays - Google bribes some politicians with revolving door jobs - Google is primarily responsible for destroying the Bay Area Housing opportunities - Google runs DDoS attacks on competitors by massively crawling their sites - Google boss Andy Rubin runs a sex slave farm according to his own family - Google boss Eric Schmidt was a philandering sex-penthouse owner according to vast news articles - Google executives hire so many hookers that one of them, Mr. Hayes, was killed by his hooker - Google executives sexually abuse so many women that the women staff of Google walked out one day -

In the 2009 White House, you could not swing a cat without hitting a Google insider - Google has paid covert bribes, PAC funds, real estate and search rigging payola to every CA Senator - Google has paid bribes, through its lobby fronts, to halt FBI, SEC, FEC and FTC investigations of Google crimes - Google was funded by the CIA, via In-Q-Tel, a so called "501 c3 charity" which was caught with tons of cocaine - Google gets millions of dollars of taxpayer cash for spying on Americans inside the USA - Google's map service was a spy system paid for by taxpayers money that Google now profits off of -

Nancy Pelosi and Dianne Feinstein have promised to "protect" Google because their families profit off Google stocks - Payment receipts prove that Google and Gawker/Gizmodo exchanged cash and staff for Character Assassination attacks - Google VC's and bosses have spent \$30M+ rigging the U.S. Patent Office to protect Google and harm Google competitors - Google bribed it's lawyer into position as head of the U.S. Patent office in order to have her protect Google - To rig insider stock trades, Google hides negative Tesla stories and pumps positive Tesla stories on "push days" - Google and Elon Musk Co-own, co-invest and co-market stocks covertly while running anti-trust schemes - Google rarely likes, or hires, black employees per federal and news media investigations -

Google hired most of the Washington, DC K Street lobby firms and told them to "do whatever they could" - The film: "Miss Sloane" depicts only 2% of the illicit lobbying tactics Google employs daily - Demands for an FTC and FBI raid of Google, for criminal activity, securities law and election felonies have been filed - Google's David Drummond had his Woodside, CA Quail Road house bugged revealing sex and financial misdeeds - Google, and it's Cartel (Alphabet, YouTube, and hundreds of other shell-company facades) are a criminal organization engaged in felony-class crimes. Google's bosses bribe politicians, regulators and law enforcement officials to hold off prosecution.

At Google: Kent Walker, Andy Rubin, Larry Page, Eric Schmidt, Sergey Brin, Jared Cohen, Yasmin Green, David Drummond and Ian Fette are so enmeshed in sex scandals, election manipulation, and White House bribes that it is hard to comprehend how they can get any legitimate work done. Google executives came from most of the fraternity houses involved in the college rape scandals. Google sells covert character assassination services to politicians and fellow oligarchs. YouTube/Google/Alphabet/Deep State are all the same entity. They conspire to hide news about their corruption and they control most of the internet. Want to help end the tech oligarch's rape of society? Never, EVER: use, read, quote, link to, paste from, or refer to; anything on corrupt and contrived: T-Mobile - Twitter, Google - Alphabet - Facebook - Meta - Instagram - Netflix or YouTube! Don't expand their reach! Don't be their digital bitch! Stop being an addict to Silicon Valley's social media scam! Keep the battery out of your phone so Big Tech can't continue to spy on you.

Did you know you CAN'T turn an iPhone off? Apple iPhone's pretend to be "off" but still monitor you with reserve power. The government should shut these companies down but they don't because these companies

pay the largest bribes on Earth to politicians! Demand that Congress shut down these big tech abusers that cause child suicides, bullying, sex trafficking, money laundering, tax evasion, political bribery, election manipulation and other social crimes. Twitter, Facebook, Google, Netflix, YouTube spy on you and rape your mind by serving manipulated content choices requires by automatically creating covert user dossiers made by spying on users' content consumption preferences and continually changing them based on psychological analysis of the users.

Spy agency-type profiles created by Twitter, Facebook, Google, etc. use abstract content-specific features of the consumed content, such as categories, topic models, and entities, which they automatically extract using NLP methods. They are aggregating these features per user at scale based on what rich white Democrat ideology Google programmers want. In particular, it is impractical to store the entire dynamic history of a user's interaction features, requiring the companies to use biased algorithms that selectively decay information in favor of a more liberal political representation. The more it scales, the more racist, sexist, classist, misogynistic and politically biased it gets.

The history books teach that San Francisco was founded by Prostitutes, Pirates and Gangsters. That crowd still runs San Francisco, even in modern times. These criminals expanded south of San Francisco to Silicon Valley based on Stanford University institutionalizing and teaching business corruption to sociopath frat boys. They then took their circus of bribery and insider trading to Washington, DC and the rest is history.

The Silicon Valley tech Cartel (AKA: "Paypal Mafia", "Deep State") is evil because these racist, ageist, sex-trafficking, money-laundering, elitist, politician bribing, tax evaders: steal any technology they desire; They manufactured the CLEANTECH CRASH as shown in the 60 MINUTES episode of the same name; they run a prostitution ring and sexually extort young women and interns in Silicon Valley; they are 'rape culture' take-what-they-want misogynists, ageists and racists as their history of abuses has proven; their Palo Alto Cartel operates AngelGate-type collusion and stock market insider trading schemes that harm independent business and the public; their Cartel ran the "no poaching" CEO ring which was class-action sued by DOJ and tech workers; 90% of their divorce court files reveal horrific abuses and sex trafficking;

They have an army of lobbyists that pay cash, stock market and revolving door bribes to U.S. Senators; They can even evade FBI & SEC investigations; They hire women to act as 'trophy wives' and 'beards'; they have lobbyists rig the U.S. Patent Office in order to block inventor patent rights because they are using stolen technologies; they have been caught on video and recordings beating, kicking and harming women hundreds of times; They have bought up all of the Tier-One tech law firms and order them to black-list, and never help, those who seek equal tech rights; they collude to abuse your privacy and make databases on the public for political control; they have to cheat to compete because they are only good with spread sheets instead of innovation; They run black-lists, character assassination attacks, collusion and other anti-trust violating acts in violation of RICO laws. Silicon Valley has become the largest assemblage of douche-bags and yuppie frat boy criminals in human history.

Theranos is not the exception, it is the standard. Tesla, Google, Theranos, Wework, Facebook are lies backed by famous political insiders to protect their insider trading and covered-up by fake news operators. They are also fronts to fund political campaigns via the ill-gotten profits from their endeavors. When the bad guys, and their lap-dog politicians, attack you because your products are better than theirs they are proving that they are frat boy scumbags, from Stanford and Yale that operate in a little pack, like dogs! Their Sandhill Road operation should be raided by the FBI! The best thing that could come from the COVID pandemic is that they all are forced into bankruptcy!

When your Senator holds stock market shares in companies that exist to profit on the backs of consumers, via corruption, then it is impossible for that Senator to ever do anything but be corrupt! We have reported this in writing to winklerm@sec.gov, sanfrancisco@sec.gov and 30+ other federal officers but have yet to see our whistle-blower rewards...or any action! Do you wonder how big politician insider stock trading is? Take a look at how many TRILLIONS of dollars pass through the stock markets annually and then look at the reported, AND UNREPORTED, securities holdings of famous U.S. Senators and government agency staff. That is what Seth Rich and the people in the "In Memory Of" section, below, were disclosing. These are massive crimes! The perpetrators operate a massive and abusive national sex cult.

The perverts in the SandHill Road Venture Capital offices, located between Highway 280 down to Santa Cruz Avenue on Sand Hill Road in Menlo Park, California, are the main perpetrators of this global cartel. Their executives at Google, Facebook, Netflix, Linkedin, Twitter, and their related holdings, comprise the rest. The Harvey Weinstein and Ed Buck sex scandals are well known. These men's sex cult actions have been widely covered in the news individually in the Joe Lonsdale rape case, The Kleiner Perkins Ellen Pao sex abuse lawsuit,

The Eric Schmidt sex penthouse stories, The Jeffrey Epstein case, The Google Forrest Hayes hooker murder case, The Andy Rubin sex slave case, The Sergey Brin 3-way sex romp scandal, The British Hydrant investigation, The Elon Musk Steve Jurvetson billionaire sex parties scandals, The NXIVM sexual slave cases, The Michael Goguen anal sex slave trial, The Tom Perkins Hooker Parties and thousands of other cases and federal divorce court filings. This group of people have proven themselves, over and over, to be sociopath control freaks not fit for participation in public commerce, public policy or media control.

The Four Seasons Hotel and Rosewood Hotels in Silicon Valley are estimated to engage in over \$30,000.00 of high-end escort sex trafficking per day, a portion of it managed by Eastern Bloc Mafia operators. The Elon Musk sex perversions are the tip of the iceberg. At least 10 Ukrainian escorts fly in and out of SFO and SJO airports every week for these Cartel members. Google boss David Drummond engaged in horrible philandering sexual violations of his wife yet Google covers up every story about it on the web. Google's Eric Schmidt is under massive investigation.

You hear about the female victims of this sex cult but you rarely hear about the young male victims. One of their vast numbers of prostitutes is quoted as saying that the girls and boys are paid "not just for sex but for the oligarch's endless need to feel that they can control anyone for any reason..." Multiple attorney general's controlled by their cartel, i.e.: Eric Schneiderman and Eliot Spitzer, are involved in these sex rings. These are the main influencers of a national political party and they are all involved in horrific sex perversions and abuses! All Silicon Valley tech cartel media companies work together to censor all news and information in order to hide coverage of their dirty deeds and to only put politicians in office that will give the Cartel political payola, kick-backs and insider stock pumps.

The Smedley Butler "Business Plot" from the past is not unlike the coup that Google and clan tried. See details in Emily Chang's book: BROTOPIA; Roan Farrow's book: CATCH & KILL; Edward Snowden's Book: PERMANENT RECORD; Peter Schwietzer's book: THROW THEM ALL OUT; Dave Eggers book: THE CIRCLE; Franklin Foer's book: WORLD WITHOUT MIND; Corey Pein's book: JOURNEY INTO THE SAVAGE HEART OF SILICON VALLEY; Dan Lyon's book: DISRUPTED; Antonio Martinez book: CHAOS MONKEYS. The Angelgate, Epstein, No-Poaching DOJ Class Action, and hundreds of other cases, prove that they meet, conspire, collude and blacklist in felony violation of anti-trust and RICO Racketeering laws. -

Despite its harsh provisions, RICO-related charges against these perps are easy to prove in court, as the RICO laws focus on patterns of behavior as opposed to criminal acts. The government officials and their tech oligarch partners were audacious in publicly promoting their crimes and their above-the-law attitudes. RICO, here, also permits a private individual "damaged in his business or property" by a "racketeer" to file a civil suit. The government should, thus, join the harmed citizens in this case.

The plaintiffs have proven the existence of an "enterprise".

The defendant(s) are not the enterprise; in other words, the defendant(s) and the enterprise are not one and the same.

The defendant(s) meet the construct of four specified relationships:

1. The defendant(s) and the enterprise: either the defendant(s) invested the proceeds of the pattern of racketeering activity into the enterprise;

2. The defendant(s) acquired or maintained an interest in, or control of, the enterprise through the pattern of racketeering activity;
3. The defendant(s) conducted or participated in the affairs of the enterprise “through” the pattern of racketeering activity;
4. The defendant(s) conspired to do all of the above crimes.

The enterprise, herein, is the ‘prize,’ ‘instrument,’ ‘victim,’ or ‘perpetrator’ of the racketeers. A civil RICO action for this matter should be filed in state AND federal court.

Both the criminal and civil components will allow the recovery of treble damages (damages in triple the amount of actual/compensatory damages) for Plaintiffs.

The evidence is focused on patterns of behavior AND criminal acts.

The harmed citizens seek multiple liability (charges brought against multiple defendants, which means if prosecutors now find the underlying elements of these acts, you have conspiracy on top of it)

Each and every charge against defendants is separate and runs consecutively. Admissible hearsay evidence is offered in this case. Associative evidence is allowed (guilt by association meaning if a defendant profited off the crimes of an organization even if he was not directly involved with the crime himself he shall still be charged as a co-conspirator and go all the way up the chain of command).

This case structure will incentivize the operatives (soldati) at the corrupt law firms, CPA’s, lobbyists and media outlets to flip, or roll-over, on the bosses.

This case structure allows both the government and Plaintiff to engage in substantial asset seizure (over \$900B). The owners of the racketeering shell corporations, real estate scams and trusts are well-known to often abscond with the assets. An injunction and/or performance bond ensures that there is something to seize in the event of a guilty verdict. In addition, the racketeers must forfeit all ill-gotten gains and interest in any business gained through a pattern of “racketeering activity.” Over 1000 false-front shells, trusts, dark money and PAC assets are known to be held by the defendants.

While government bosses may be embarrassed, or find this matter "politically awkward", no citizen in America cares. Any boss who delays or obfuscates this case further should consider that they will, by such action, legally define themselves as a member of the above defined "enterprise" and will be criminally referred to FBI for prosecution.

LAWS YOU NEED TO FORCE YOUR POLITICAL REPRESENTATIVES TO MAKE

These are the steps that the public must demand to strengthen public integrity by eliminating corrupt financial conflicts in Congress.

Congress must be ordered to eliminate both the appearance and the potential for financial conflicts of interest. Americans must be confident that actions taken by public officials are intended to serve the public, and not those officials. These actions counter-act the actions taken by Obama Administration staff and Department of Energy officials in illicit coordination with U.S. Senators. In other words, we experienced all of the damages from each of the abuse-of-power issues listed below. Your public officials are being paid BRIBES through their family stock market holdings. CUT THEM OFF - Demand that Congress make it a felony for any

politician, judge or regulator to own stocks, or to let their family own stocks. If they want to get rich, they can go into another line of work.

If you can get these laws made, it will end 90% of American corruption. Politicians won't allow these laws to be made because it will cut off their corruption. Thus: You have to force the politicians to make these laws and leverage them with this manual. Tell them: "All of the things in this manual will happen to you if you don't make these laws, now!"

These are the actions needed to resolve those issues:

- Ban individual stock ownership by Members of Congress, Cabinet Secretaries, senior congressional staff, federal judges, White House staff and other senior agency officials while in office. Prohibit all government officials from holding or trading stock where its value might be influenced by their agency, department, or actions.
- Apply conflict of interest laws to the President and Vice President through the Presidential Conflicts of Interest Act, which would require the President and the Vice President to place conflicted assets, including businesses, into a blind trust to be sold off
- Require senior Department of Energy government officials, employees, contractors and White House staff to divest from privately-owned assets that could present conflicts, including large companies like Tesla, Google, Facebook, Sony, Netflix, etc., and commercial real estate.
- Make it a felony to not respond to a filing by a citizen within 48 hours. Former White House and Energy Department staff use 'stone-walling' to intentionally delay responses for a decade, or more.
- Apply ethics rules to all government employees, including unpaid White House staff and advisors.
- Require most executive branch employees to recuse from all issues that might financially benefit themselves or a previous employer or client from the preceding 4 years.
- Create conflict-free investment opportunities for federal officials with new investment accounts managed by the Federal Retirement Thrift Investment Board and conflict-free mutual funds.
- Close and lock the Revolving Door between industry and government and stop tech companies from buying influence in the government or profiting off of the public service of any official.
- Lifetime ban on lobbying by Presidents, Vice Presidents, Members of Congress, federal judges, and Cabinet Secretaries; and, multi-year bans on all other federal employees from lobbying their former office, department, House of Congress, or agency after they leave government service until the end of the Administration, but at least for 2 years (and at least 6 years for corporate lobbyists).
- Limit the ability of companies to buy influence through former government officials.
- Require income disclosures from former senior officials 4 years after federal employment.
- Prohibit companies from immediately hiring or paying any senior government official from an agency, department, or Congressional office recently lobbied by that company.
- Prohibit the world's largest companies, banks, and monopolies (measured by annual revenue or market capitalization) from hiring or paying any former senior government official for 4 years after they leave government service.
- Limit the ability of companies to buy influence through current government employees.

- Prohibit corporate outlaws like Google, Tesla, Facebook, LinkedIn, Netflix, Sony, etc., from working in government by banning the hiring of top corporate leaders whose companies were caught breaking federal law in the last 6 years.
- Prohibit contractor corruption by blocking federal contractor and licensee employees from working at the agency awarding the contract or license for 4 years.
- Ban “Golden Parachutes” that provide corporate bonuses to executives for federal service.
- Publicly expose all influence-peddling in Washington.
- Strengthen and expand the federal definition of a “lobbyist” to include all individuals paid to influence government.
- Create a new “corporate lobbyist” definition to identify individuals paid to influence government on behalf of for-profit entities and their front-groups.
- Radically expand disclosure of lobbyist activities and influence campaigns by requiring all lobbyists to disclose any specific bills, policies, and government actions they attempt to influence; any meetings with public officials; and any documents they provide to those officials.
- End Influence-Peddling by Foreign Actors such as that which occurred in the ENER1, Severstal, Solyndra and related scandals.
- Fire the Fed officials that own, trade and pump stocks using the Fed itself for profiteering.
- The most senior officials in the U.S. Government are the worshipers of Elon Musk, investor’s in Elon Musk’s companies and suppliers, deciders of the financing for Elon Musk, suppliers of staffing to Elon Musk, recipients of political campaign financing by Elon Musk and Musk’s covert Google And Facebook partnership, social friends of Elon Musk and the attackers of Elon Musk’s competitors. Make this a felony.
- Combat foreign influence in Washington by banning all foreign lobbying.
- End foreign lobbying by Americans by banning American lobbyists from accepting money from foreign governments, foreign individuals, and foreign companies to influence United States public policy.
- Prohibit current lobbyists from taking government jobs for 2 years after lobbying; 6 years for corporate lobbyists. Public, written waivers where such hiring is in the national interest are allowed for non-corporate lobbyists only.
- End Legalized Lobbyist Bribery and stop lobbyists from trading money for government favors.
- Ban direct political donations from lobbyists to candidates or Members of Congress.
- End lobbyist contingency fees that allow lobbyists to be paid for a guaranteed policy outcome.
- End lobbyist gifts to the executive and legislative branch officials they lobby.
- Strengthen Congressional independence from lobbyists and end Washington’s dependence on
- Make congressional service sustainable by transitioning Congressional staff to competitive salaries that track other federal employees.
- Reinstate the nonpartisan Congressional Office of Technology Assessment to provide critical scientific and technological support to Members of Congress.

- Level the playing field between corporate lobbyists and government by taxing excessive lobbying beginning at \$500,000 in annual lobbying expenditures, and use the proceeds to help finance Congressional mandated rule-making, fund the National Public Advocate, and finance Congressional support agencies.
- De-politicize the rulemaking process and increase transparency of industry efforts to influence federal agencies.
- Prevent McKinsey-type sham research from undermining the public interest by requiring that studies that present conflicts of interest to undergo independent peer review to be considered in the rule-making process.
- Require agencies to justify withdrawn public interest rules via public, written explanations.
- Close loopholes exploited by powerful corporations like Google, Facebook, Tesla, Netflix, Sony, etc., to block public interest actions.
- Eliminate loopholes that allow corporations, like Tesla and Google, to tilt the rules in their favor and against the public interest.
- Restrict negotiated rule-making to stop industry from delaying or dominating the rule-making process by ending the practice of inviting industry to negotiate rules they have to follow.
- Restrict inter-agency review as a tool for corporate abuse by banning informal review, establishing a maximum 45-day review period, and blocking closed-door industry lobbying at the White House's Office of Information and Regulatory Affairs.
- Limit abusive injunctions from rogue judges, like Jackson, et al, by ensuring that only Appeals Courts, not individual District Court judges, can temporarily block agencies from implementing final rules.
- Prevent hostile agencies from sham delays of implementation and enforcement by using the presence of litigation to postpone the implementation of final rules.
- Empower the public to police agencies for corporate capture.
- Increase the ability of the public to make sure their interests are considered when agencies act.
- Create a new Office of the Public Advocate empowered to assist the public in meaningfully engaging in the rule-making process across the federal government.
- Encourage enforcement by allowing private lawsuits from members of the public to hold agencies accountable for failing to complete rules or enforce the law, and to hold corporations accountable for breaking the rules.
- Inoculate government agencies against corporate capture such as Google undertook against the White House.
- Provide agencies with the tools and resources to implement strong rules that reflect the will of Congress and protect the public.
- Boost agency resources to level the playing field between corporate lobbyists and federal agencies by using the proceeds of the tax on excessive lobbying and the anti-corruption penalty fees to help finance Congress-mandated rule-making and facilitate decisions by agencies that are buried in an avalanche of lobbyist activity.
- Reform judicial review to prevent corporations from gaming the courts by requiring courts to presumptively defer to agency interpretations of laws and prohibiting courts from considering sham McKinsey studies and research excluded by agencies from the rule-making process.

- Reverse the Congressional Review Act provision banning related rules that prevent agencies from implementing the will of Congress based on Congress' prior disapproval of a different, narrow rule on a similar topic.
- Improve judicial integrity and defend access to justice for all Americans.
- Strengthen Judicial Ethics Requirements.
- Enhance the integrity of the judicial branch by strengthening rules that prevent conflicts of interest.
- Ban individual stock ownership by federal judges.
- Expand rules prohibiting judges from accepting gifts or payments to attend private seminars from private individuals and corporations.
- Require ethical behavior by the Supreme Court by directing the Court to follow the Code of Conduct that binds all other federal judges.
- Boost the transparency of Federal Courts.
- Enhance public insight into the judicial process by increasing information about the process and reducing barriers to accessing information.
- Increase disclosure of non-judicial activity by federal judges by requiring the Judicial Conference to publicly post judges' financial reports, recusal decisions, and speeches.
- Enhance public access to court activity by mandating that federal appellate courts live-stream, on the web, audio of their proceedings, making case information easily-accessible to the public free of charge, and requiring federal courts to share case assignment data in bulk.
- Eliminate barriers that restrict access to justice to all but the wealthiest individuals and companies.
- Reduce barriers that prevent individuals from having their case heard in court by restoring pleading standards that make it easier for individuals and businesses that have been harmed to make their case before a judge.
- Encourage diversity on the Federal Bench.
- Strengthen the integrity of the judicial branch by increasing the focus on personal and professional diversity of the federal bench.
- Create a single, new, and independent agency dedicated to enforcing federal ethics and anti-corruption laws.
- Support stronger ethics and public integrity laws with stronger enforcement.
- Establish the new, independent U.S. Office of Public Integrity, which will strengthen federal ethics enforcement with new investigative and disciplinary powers.
- Investigate potential violations by any individual or entity, including individuals and companies with new subpoena authority.
- Enforce the nation's ethics laws by ordering corrective action, levying civil and administrative penalties, and referring egregious violations to the Justice Department for criminal arrest and enforcement.
- Receive and investigate ethics complaints from members of the public.

- Absorb the U.S. Office of Government Ethics as a new Government Ethics Division tasked with providing confidential advice to federal employees seeking ethics guidance.
- Consolidate anti-corruption and public integrity oversight over federal officials, including oversight of all agency Inspectors General, all ethics matters for White House staff and agency heads, and all waivers and recusals by senior government officials.
- Remain independent and protected from partisan politics through a single Director operating under strict selection, appointment, and removal criteria.
- Provide easy online access to key government ethics and transparency documents, including financial disclosures; lobbyist registrations; lobbyist disclosures of meetings and materials; and all ethics records, recusals, and waivers.
- Maintain a new government-wide Office of the Public Advocate, which would advocate for the public interest in executive branch rule-making.
- Enforce federal open records and FOIA requirements by maintaining the central FOIA website and working with the National Archives to require agencies to comply with FOIA.
- Strengthen legislative branch enforcement.
- Expand an independent and empowered ethics office insulated from congressional politics.
- Expand and empower the U.S. Office of Congressional Ethics, which will enforce the nation's ethics laws in the Congress and the entire Legislative Branch, including the U.S. Senate.
- Conduct investigations of potential violations of ethics laws and rules by Members of Congress and staff with new subpoena power.
- Refer criminal and civil violations to the Justice Department, the Office of Public Integrity, or other relevant state or federal law enforcement.
- Recommend disciplinary and corrective action to the House and Senate Ethics Committees.
- Boost transparency in government and fix Federal Open Records laws, public official and candidate tax disclosure.
- Disclose basic tax return information for candidates for federal elected office and current elected officials.
- Require the IRS to release tax returns for Presidential and Vice-Presidential candidates from the previous 8 years and during each year in federal elected office.
- Require the IRS to release tax returns for Congressional candidates from the previous 2 years and during each year in federal elected office.
- Require the IRS to release tax returns and other financial information of businesses owned by senior federal officials and candidates for federal office.
- Require the IRS to release tax filings for nonprofit organizations run by candidates for federal office.
- Disclose the Cash behind Washington Advocacy and Lobbying.
- Prevent special interests from using secret donations from corporations and billionaires to influence public policy without disclosure.

- Require nonprofit organizations to list donors who bankrolled the production of any specific rule-making comment, congressional testimony, or lobbying material, and to reveal whether the donors reviewed or edited the document.
- Require individuals and corporations to disclose funding or editorial conflicts of interest in research submitted to agencies that is not publicly available in peer-reviewed publications.
- Prevent sham research, like that from DNC shill McKinsey Consulting, from undermining the public interest by requiring that studies that present conflicts of interest to independent peer review to be considered in the rule-making process.
- Improve the Freedom of Information Act (FOIA).
- Close the loopholes in our open records laws that allow federal officials to hide tech industry and Silicon Valley oligarch industry influence.
- Codify the default presumption of disclosure and affirmatively disclose records of public interest, including meeting agendas; government contracts; salaries; staff diversity; and reports to Congress.
- Require all agencies to use a central FOIA website that is searchable and has downloadable open records databases with all open FOIA requests and all records disclosed through FOIA.
- Strengthen FOIA enforcement by limiting FOIA exemptions and loopholes, and by giving the National Archives the authority to overrule agency FOIA decisions and to compel disclosure.
- Extend FOIA to private-sector federal contractors, including private federal prisons and immigration detention centers, and require large federal contractors to disclose political spending.
- Make Congress more transparent by ending the corporate lobbyist's leg up in the legislative process. The public deserves to know what Congress is up to and how lobbyists influence legislation.
- Require all congressional committees to immediately post online more information, including hearings and markup schedules, bill or amendments text, testimonies, documents entered into the hearing record, hearing transcripts, written witness answers, and hearing audio and video recordings.
- Require Members of Congress to post a link to their searchable voting record on their official websites.
- Require lobbyists to disclose when they lobby a specific congressional office; specific topics of visit; the official action being requested; and all documents provided to the office during the visit.

90% of these guys came from the same date-rape fraternity houses involved in the recent college rape cases. See more at: <http://corruption-videos.com>

POLITICAL KILL ORDERS AND STATE-SPONSORED CHARACTER ASSASSINATIONS - How a Modern Character Assassination and Political "Kill Order" Is Executed by the Silicon Valley Oligarchs and their total control of propaganda media. Patrick George at Jalopnik attacks outsiders under contract with Elon Musk and the DNC. Silicon Valley campaign finance oligarchs hire him to run hatchet jobs on innocent outsiders and then Gawker-Gizmodo-Jalopnik uses their financial partnership with the DNC's Google to push the character assassination articles to the top of Google web products and searches. Patrick George, Adrian Covert, John Hermann and Nick Cook are the sexually degenerate cabin boys that report to boy-loving sleaze-tabloid oligarch Nick Denton.

Every public official involved in these illicit schemes:

A.) held stock and assets in their constituent's competitors,

B.) was compensated by their constituent's competitors,

C.) was a member of organizations who paid news, internet and information services to manipulate their output for their own unjust gain, D.) Knew that their malicious media assertions were false and defamatory, and

E.) and otherwise met the legal means test to qualify as violators of federal RICO laws, Human Rights laws, Civil Rights standards and related State and Federal Constitutional rights laws.

By rigging HUD, SSA, DOE, and other public benefits determinations, to harm the funding, payments, witness fees, informant fees, whistle-blower awards and stock market profits of whistle-blowers and citizen adversaries, the Defendants engaged in felony crimes.

They created the Fake News crisis in the media by flooding the internet with defamation posts and reprisal hatchet job articles designed to damage political enemies of the Socialists. They coordinate a large number of the character assassination efforts at Gawker, Gizmodo, Jalopnik, CNN, New York Times and other propaganda outlets. These Millennial boys are "Media Rapists" and should be treated as abusers. -

How and why did a Donald Trump stripper-date named "Stormy" or an Elon Musk sex party or a Kavanaugh drinking incident or the Moonves and Weinstein indiscretions suddenly hit the news at about the same time in news history? - In addition to actual murder, Politicians and Silicon Valley Oligarchs hire operatives to end people's lives in other creative ways. - It is all part of the modern trend in vendetta, revenge and political payback when a Senator or a tech oligarch issues a "kill order" on an opponent. -

The client does not like to get their hands dirty so the actual social hit job is performed by companies such as: IN-Q-Tel - (DNC); Gawker Media - (DNC); Jalopnik - (DNC); Gizmodo Media - (DNC); K2 Intelligence - (DNC); WikiStrat - (DNC); Podesta Group - (DNC); Fusion GPS - (DNC/GOP); Google - (DNC); YouTube - (DNC); Alphabet - (DNC); Facebook - (DNC); Twitter - (DNC); Think Progress - (DNC); Media Matters - (DNC); Black Cube - (DNC); Mossad - (DNC); Correct The Record - (DNC); Sand Line - (DNC/GOP); Blackwater - (DNC/GOP); Undercover Global Ltd (DNC/GOP) Stratfor - (DNC/GOP); ShareBlue - (DNC); Wikileaks (DNC/GOP); Cambridge Analytica - (DNC/GOP); Sid Blumenthal- (DNC); David Brock - (DNC); PR Firm Sunshine Sachs (DNC); Covington and Burling - (DNC), BuzzFeed - (DNC) Perkins Coie - (DNC); Wilson Sonsini - (DNC) and hundreds of others...

These are the people and companies that except cash, revolving door jobs, political appointments, insider trading stock in Silicon Valley tech companies, prostitutes and real estate in exchange for destroying the lives of others. - These attackers deserve to be punished for the rest of their lives for taking away the lives of others in exchange for cash.

Any company who is corrupt enough to hire any of these assassins should be forced out of business. These attack services are responsible for 90% of the "Fake News" problem in the world because they are the authors of most fake news. Congress must act to make these kinds of companies illegal! - These digital assassination services offer hit-jobs, character assassinations and economic reprisal programs to famous billionaires and corrupt politicians who are seeking revenge, retribution and vendetta executions. - In the case of reporters getting targeted for attacks, President Donald Trump has been accused by the liberal corporate media of whipping up a hateful frenzy against the press.

But while CNN's Jim Acosta grandstands against Trump, real journalists are still reeling from the draconian extrajudicial measures that Barack Obama and his administration used to target them for exposing truth. - This

secretive targeting occurred while Obama speechwriter and hate-filled ANTIFA supporter Ben Rhodes was running “Operation Echo Chamber,” which reportedly continues, in which he fed information to willing corporate media scribes. “They literally know nothing,” Rhodes said of the twentysomething journalists he easily manipulated. - The Freedom of the Press Foundation’s Trevor Timm published documents showing how former attorney general Eric Holder changed the rules to more effectively intimidate and spy on members of the press. -

Timm writes: “Today, we are revealing—for the first time—the Justice Department’s rules for targeting journalists with secret FISA court orders. The documents were obtained as part of a Freedom of Information Act lawsuit brought by Freedom of the Press Foundation and Knight First Amendment Institute at Columbia University.” - Obama is also clearly linked to the plot to obtain fraudulent FISA warrants on President Trump’s team, as evidenced by Peter Strzok and Lisa Page’s texts confirming that Obama was overseeing their fly-by-night operation. - Larry Schweikart reported for Big League Politics: For months pundits and researchers have been pondering the mystery of the FISA approval that led to the illegal and historically titanic scandals to ever hit the U.S. government. Some have argued that Assistant Attorney General Rod Rosenstein knew the FISA was bogus when he extended it.

VA officials attacked hundreds of citizens who reported corruption, i.e.:

<https://www.thenewamerican.com/usnews/health-care/item/18610-va-whistleblowers-facing-retribution>

As shown in this report:

<https://www.pogo.org/analysis/2018/08/new-report-confirms-whistleblower-retaliation-is-alive-and-well-at-department-of-veterans-affairs/>

.... Agencies attack often and harshly.

CIA and NSA executives have been widely shown to use spy tools to attack domestic citizens they don't like, i.e.:

<https://www.dailymail.co.uk/news/article-2435011/NSA-employees-used-phone-tapping-tools-spy-girlfriends-cheating-husbands.html>

And hundreds of other news links that can be provided.

Elon Musk and Tesla, as well as Eric Schmidt and Larry Page at Google, have been proven to use the CIA group: IN-Q-TEL, to run government sponsored/financed attacks on business competitors.

In Civil Action No. 1:13-CV-00777-RBW GOVERNMENT AGENCIES WERE CAUGHT BEING USED FOR ATTACKS AGAINST CITIZENS AND PUNISHED IN THE COURT AND THE MEDIA!

Others have wondered if Special Counsel Robert Mueller knew about the fraudulent basis of the FISA when he used it, in part, to indict Michael Flynn. Other still, that Mueller was fooled by the FBI. This is what President Trump calls “SPYGATE”. - It may well be that the surveillance that was conducted began with UK intelligence services and then was fed back to the White House of Barack Obama. Here’s the kicker: President Barack Obama did not need a FISA warrant to authorize spying/electronic surveillance on Trump because Obama all along had legal authorization to by-pass the normal court vetting process. According to 50 U.S. Code 1802, the “Electronic Surveillance Authorization” () “Foreign intelligence in relation to a US person (Trump or his associates) is information that’s necessary for the US to protect against attack, hostile acts, sabotage, . . . as well as other clandestine activities by a foreign power . . . OR . . . information relevant to national defense/security of the US, or the conduct of foreign affairs of the U.S.” Such an authorization by

Obama required certification by Attorney General Loretta Lynch that must be logged with the FISC court.

("The [AG] + shall immediately transmit under seal to the court [FISC] a copy of his certification.") - In short, the DOJ has this. If we are correct, a copy of that certification is currently under seal at least with the DOJ and the FISC. - This is what they are hiding. - However, the Act requires the AG to keep the Select Committee on Intelligence and the Senate Committee on Intelligence informed of these authorizations and unmasking therein. See 1803 (a) (1) (C) If indeed this is what happened, did Lynch report—or only selectively report—to the committees in a way that excluded non-friendlies?

Can you see why Adam Schiff, Mark Warner, and their ilk are terrified? - These are the playbook tactics that Senators and tech oligarchs most often use to destroy the lives of their political and business enemies: - Government agency bosses sometimes solicit the target victims with false promises of future loans, contracts or grants from their agency and cause the target victims to expend millions of dollars and years of their time for projects which those government bosses had covertly promised to their friends. They use the target victims as a "smokescreen" to cover their illegal government slush-funds for the victim's competitors and personal enemies. By using this tactic, the attackers can drain the target victim's funds and force them into an economic disaster in plain view of everyone without the government bosses fearing any reprisal for their scam. - Every match.com, okcupid.com, Plenty of Fish, Seeking Arrangements and all other IAC-owned, or similar, dating sites (IAC is managed by Hillary Clinton's daughter) have had their profiles, texts, and inter-member communications, since those companies were started, hacked or purchased.

The attack service providers use Palantir and In-Q-Tel financed data analysis software to analyze every activity in those dating services in order to find honey-trap, blackmail, sextortion and social conflict exploitation opportunities. If you had a bad date with someone, that someone will be hunted down and convinced to help harm, #metoo or "rape charge" the intended target. All dates involve a search for sex, so the likelihood that a sexual disappointment experience will exist in each person's dating history is high. Searching every past dating email and text of a subject is quite easy with modern software and hacking techniques.

A synthetically amplified, PR-agency optimized sex scandal can destroy any target. Your dating experiences from the 70's or 80's will come back to haunt you decades later. Most dates involve drinking alcohol and taking drugs. If you were unattractive or had bad sexual skills your bad date will be called "date rape", "drugging your date for sex" and related twisted narratives that are designed to shame you, the target. If you try to get a date in the future, your potential date will be contacted by a third party who will slander and libel you to make sure your potential first date gets cancelled. Your social life will, essentially, end.

Every photo on every dating site is cross checked with every other photo on the internet in order to cull your Facebook, LinkedIn, Snapchat and other social media together to create a total psychological manipulation profile data file on you. A single photo on a dating site can be cross searched on every mug shot archive, photo album and corporate database in the worth within minutes using modern super-computers. Your sex life will be on public record in a flash. - Social Security, SSI, SDI, Disability and other earned benefits are stonewalled. Applications of targets are "lost". Files in the application process "disappeared". Lois Lerner hard drive "incidents" are operated in order to seek to hide information and run cover-ups. - Government officials and tech oligarchs contact members of the National Venture Capital association (NVCA) and created national "black-lists" to blockade target victims from ever receiving investor funding. This was also confirmed in a widely published disclosure by Tesla Motors Daryl Siry and in published testimony.

If Silicon Valley political campaign finance oligarchs black-list you (see the "AngelGate" Scandal and the "High Tech No Poaching Class Action Lawsuit" cases) you will never get investor funding again. - FOIA requests are hidden, frozen, stone-walled, delayed, lied about and only partially responded to in order to seek to hide information and run cover-ups. - State and federal employees will play an endless game of Catch-22 by arbitrarily determining that deadlines had passed that they, the government officials, had stonewalled and obfuscated applications for, in order to force these deadlines that they set, to appear to be missed. This can bankrupt a target victim. - Some Victims found themselves strangely poisoned, not unlike the Alexander Litvenko case. Heavy metals and toxic materials were found right after their work with the Department of Energy weapons and energy facilities. Many wonder if these "targets" were intentionally exposed to toxins in retribution for their testimony.

The federal MSDS documents clearly show that a number of these people were exposed to deadly compounds and radiations, via DOE, without being provided with proper HazMat suits which DOE officials knew were required. - Victims employers are called, and faxed, and ordered to fire target victims from their places of employment, in the middle of the day, with no notice, as a retribution tactic. - On orders from Obama White House officials, DNC-financed Google, YouTube, Gawker Media and Gizmodo Media produce attack articles and defamation videos. Google locks this attack media on the internet on the top line, of the front page of all Google searches for a decade in front of 7.5 billion people, around the world. This attack-type uses over \$40 million dollars in server farms, production costs and internet rigging. The forensic data acquired from tracking some of these attacks proves that Google rigs attacks against individuals on the internet and that all of Google's "impressions" are manually controlled by Google's executives who are also the main financiers and policy directors of the Obama Administration.

This data was provided to the European Union for its ongoing prosecution of Google's political manipulation of public perceptions. - Victims HR and employment records, on recruiting and hiring databases, are embedded with negative keywords in order to prevent the victim targets from ever gaining future employment. - Gary D. Conley, Seth Rich, Rajeev Motwani and many other whistle-blowers in these matters, turned up dead under strange circumstances. It is very possible that some of these attack services, operated by former CIA operatives, even offer discrete murder-for-sale services using high-tech assassination tools that make murders look like heart attacks and brain failures. - Disability and VA complaint hearings and benefits are frozen, delayed, denied or subjected to lost records and "missing hard drives" as in the Lois Lerner case.-

Paypal (A DNC-biased operation) and other on-line payments for on-line sales are de-platformed, delayed, hidden, or re-directed in order to terminate income potential for target victims who competed with the attackers interests and holdings.- DNS redirection, "website spoofing" sends target victims websites to dead ends where no sales orders or customer inquiries actually get back to the target. These internet revenue activity manipulations are conducted using Google and Amazon servers.

All commercial storefronts and on-line sales attempts by target victims, will have had their sites hidden, or search engine de-linked by a massively resourced facility located in Virginia, Texas or Palo Alto, California in order to terminate revenue potentials for the target victims.- Over 50,000 trolls, shells, botnets and synth-blog deployments are deployed to place defamatory statements and disinformation about victims in front of 7.5 billion people around the world on the internet in order to seek to damage their federal testimony credibility by a massively resourced facility. -

Campaign finance dirty tricks contractors are hired by campaign financiers to attack the friends and family members of the target victim in order to create low morale for the target victims psyche and motivation. - Are

you getting weird headaches and hearing a "buzzing sound" in your head? The U.S. Government has now acknowledged that the Cuban, Chinese and other embassy "sonic attacks" are from a known microwave beam weapon. Any one of the technical departments of the attack services listed at the top of this article can build such a biological harassment weapon.

It can be aimed at the target victims office, bedroom or vehicle and, within a week, have caused biological and emotional damage using a weapon that has no visible track of trajectory. It is designed to make the target victim think they are "going crazy" or "hearing sounds in their head". - In one case covert political partner: Google, transferred large sums of cash to dirty tricks contractors and then manually locked the media portion of the attacks into the top lines of the top pages of all Google searches globally, for years, with hidden embedded codes in the links and web-pages which multiplied the attacks on Victims by many magnitudes.-

Covert Cartel financier: Google, placed Google's lawyer: Michelle Lee, in charge of the U.S. Patent Office and she, in turn, stacked all of the U.S. Patent Office IPR and ALICE review boards and offices with Google-supporting employees in order to rig the U.S. Patent Office to protect Google from being prosecuted for the vast patent thefts that Google engages in. Google has hundreds of patent lawsuits for technology theft and a number of those lawsuits refer to Google's operations as "Racketeering", "Monopolistic Cartel" and "Government Coup-like" behaviors. Thousands of articles and investigations detail the fact that Google, "essentially" ran the Obama White House and provided over 80% of the key White House staff. A conflict-of-interest unlike any in American history.

Google's investors personally told Applicant they would "kill him". Google and the Obama Administration were "the same entity". Applicant testified in the review that got Michelle Lee terminated and uncovered a tactical political and social warfare group inside Google who were financed by Federal and State funds. - Honeytraps and moles were employed by the attackers. In this tactic, people who covertly worked for the attackers were employed to approach the "target" in order to spy on and misdirect the subject.

Catch and Kill by Ronan Farrow,

https://en.wikipedia.org/wiki/Catch_and_Kill:_Lies,_Spies,_and_a_Conspiracy_to_Protect_Predators

... shows how billionaires from Google, Tesla, Sony Pictures and movie studios hire character assassination squads and ex spies to attack those that report their crimes

When SILICON VALLEY Attacks Citizens And Journalists

Gawker Media, Gizmodo Media, Snopes, SPLC, FACEBOOK, GOOGLE and other hired media assassins will be retained to produce "hatchet job" character assassination articles about you. Then those articles will be faxed, mailed and emailed to your employer and investors with a note saying: "You don't want to have anything to do with this person, do you..?" in order to get you fired from your job and get your loans or financing pulled. The attackers will use their round one attack media, that they authored, to create a round two second wave attack designed to end your life via economic warfare.-

Mortgage and rental applications will have had red flags added to them in databases to prevent the targets from getting homes or apartments.- Krebs On Security, Wired, Ars Technica, The Wall Street Journal and most major IT publications have reported that hundreds of spy "back-doors" have been found on every Intel, AMD,

Apple, Xfinity, Cisco, Microsoft, Juniper Networks motherboard, chip-set and hardware component set. This means that any kid with the "key" code can open any computer, server, router, cloud-network or other network connected device and read every file, photo, video, your calendar and email on your devices at any time from any location on Earth. The key codes have been released to every hacker community in the world for over ten years.

There is now no government, corporate or personal data that can't be hacked, even data from decades ago. Every single one of your darkest secrets can be in the hands of your enemy within 60 minutes, or less. Important meetings you had planned with potential investors, employers, clients, dates, suppliers and others will suddenly get cancelled at the last minute. They will get cancelled because your enemies are reading your calendar remotely and covertly sending slander information to those you had hoped to engage with in order to sabotage your life. Nothing you have ever typed on a computer or Smartphone is safe. It WILL be acquired and it WILL be used against you. - McCarthy-Era "Black-lists" are created and employed against target victims who competed with Obama Administration executives and their campaign financiers to prevent them from getting funding and future employment. - Obama Administration targets were very carefully placed in a position of not being able to get jobs, unemployment benefits, and disability benefits or acquire any possible sources of income. The retribution tactics were audacious, overt. And quite illegal. -

There are thousands of additional Dirty Tricks tactics being used by these Attack Services yet Congress refuses to pass laws out-lawing such attack services. The cost of an attack on a person ranges from \$150,000.00 to over \$50,000,000.00. While a Silicon Valley billionaire can afford to launch counter-measures to these attacks, any regular taxpayer will be utterly destroyed, and incapable of fighting back, against even the smallest version of one of these "kill orders". A number of modern office shootings are the results of these attacks against an individual who has lost everything because of the attack and has no options left. - Federal law enforcement, the United States Congress and the highest level investigators in the U.S., and abroad, have documented (per the "FISA Memo", Congressional Reports and federal employee testimony) and proven the fact that the Obama Administration regularly engaged in the operation of retribution, vendetta and reprisal campaigns known as "hit-jobs" against domestic natural born U.S. citizen domestic taxpayers.

The Federal Court, in at least one previous court case, has ruled that Applicants, in this particular matter, were the victims and target of a number of these attacks designed to inflict permanent medical, emotional, character assassination, and brand negation, economic and career damage. The FBI has been asked to interview John Cook, Nicholas Guido Denton, Adrian Covert, Patrick George, Ian Fette and John Hermann of Gawker/Gizmodo re: their financing, payola and hit-job attacks on third parties.

TECHNOLOGY THEFT Of Small Inventors Patents By Big Tech Oligarchs

LARRY PAGE AND GOOGLE BASE THEIR BUSINESS MODEL ON STEALING YOUR TECHNOLOGY – See The NY Times Article: "How Larry Page's Obsessions Became Google's Business" <https://www.nytimes.com/2016/01/24/technology/larry-page-google-founder-is-still-innovator-in-chief.html>

- Boyfriend Elon Musk Conspires With Page
- Page Caught Skulking Around Tech Parties To Steal Ideas

SEE HOW YOUTUBE, NETFLIX, FACEBOOK, GOOGLE, AMAZON AND THE SAND HILL ROAD VC'S STEAL YOUR STUFF UNDER THE GUISE OF "TAKING A LOOK UNDER THE HOOD" - <http://www.usinventor.org>

See: <http://www.usinventor.org>

See: <https://www.dailymail.co.uk/sciencetech/article-11760517/Victims-modern-internet-pioneers-like-MySpace-AIM-disappeared.html>

Investigation report clips: "...Big Tech's U.S. Patent Office manipulation computers scale & expand their tools with algorithmic software created by those politically & socially biased frat boys that wrote the code for the VC's. It is all biased. Because Silicon Valley VC's told them to spy on billions of people, even for these web giants, it is impractical to store the entire dynamic history of a user's interaction features. They, thus, out of greed, use algorithms that selectively decay information in order to generalize users & populations. To them, you are just a generalized data point, like cattle on a ranch, to be harvested & fed upon by Silicon Valley. You don't hear about this, much, in the "main-stream news" because nearly half of Congress, White House staff & government agency bosses own the stock in the news broadcasters & receive billions of dollars of financing from them.

Field agents from FBI, FINCEN, etc. have proven all of this but their bosses cover it up. Draper Fisher, Kleiner, Andressen, Sony Ventures, et al... Need to go to prison for running a mob-like, RICO-violating, intellectual property theft mill. They contact start-ups, ask them to come in & pitch, reject them, then send their business plans to Google, Netflix, Sony & Facebook (WHO THEY FINANCE) & tell them: "...HERE COPY THIS, JUST CHANGE THE NAMES OF THINGS..." Tom Perkins, James Bronkema & many other of their members ratted them out in recorded statements! "...We discovered that the patent lawyers that were supposed to be helping us... That we paid to provide our income; were covertly our competitors & were working as shells, for our enemies. Our patent lawyers were; either, financed by, friends, with, sleeping with, dating the staff of, holding stock market assets in, promised a revolving door job or government service contracts from, partying with, personal friends with, photographed at private events with, exchanging emails with, business associates of or directed by; our business adversaries, or the Senators & politicians that those business adversaries pay campaign finances to, or supply political digital search manipulation services to. Criminal U.S. Senators coordinated & profited in these schemes.

Saving America's Inventors - Silicon Valley has spent over a billion dollars on dirty legal tricks, crooked lobbyists and insider bribes in order to put their staff inside the United States Patent Office in order to control the technology markets. Google, Facebook, Netflix and Big Tech companies are partially owned by U.S. Senators and their families. Those Big Tech companies steal their technologies from smaller inventors and never pay them their licensing fees. Corrupt Congress people protect Big Tech. See how their dirty tricks work.

Their own family members & ex-staff have now supplied evidence against them. After receiving tips from

USINVENTOR.ORG, Wall Street Journal, TECH CRUNCH & Congress; Plaintiff hired ex FBI & CIA agents to check it out... BOY, was it ever rigged. Facebook's own staff & investors work INSIDE the U.S. Patent Office in order to protect Facebook from having to pay for technology they stole. Then they showed Plaintiff that most of the Obama & Biden Administration COVERTLY OWN FACEBOOK. Talk about 'rigging elections' & 'rigging industries'... Facebook executives even sit on USPTO boards!!! -

--- What U.S. judge or regulator is complaining? For example, (as one example of MANY THOUS&S) who would complain about S&s Capital's failure to file the S.E.C. Form SC 13G notices of acquisition of Facebook, Baidu & Athena health stock?

---- Not S.E.C Chairman Mary L. Schapiro—she held a boatload of “dark pool” Fidelity, Vanguard, AllianceBern, TIAA-CREF & T. Rowe Price funds.

---- Not Commerce Secretary #1 Rebecca M. Blank—she held TIAA-CREF, Vanguard & Fidelity funds.

---- Not Commerce Secretary #2 Penny S. Pritzker—she holds up to \$23.4 million Morgan Stanley, JPMorgan & Goldman Sachs Facebook dark pools.

---- Not Attorney General Eric H. Holder—he held T. Rowe Price & Fidelity funds. In fact, Holder held Fidelity Contrafund, the largest single Facebook mutual fund stock holder, valued at \$413 million.

---- Who in the judiciary would complain?

---- Not Leader v. Facebook Chief Justice John G. Roberts, Jr.—he held Microsoft, T. Rowe Price, Fidelity, Janus, Vanguard & Blackrock funds, including Fidelity Contrafund.

---- Not Leader v. Facebook Federal Circuit Judges Alan D. Lourie, KimberlyA. Moore & Evan J. Wallach—they held Fidelity, Vanguard & T. Rowe Price funds, including Fidelity Contrafund.

----- Not Leader v. Facebook District Court Judge Leonard P. Stark—he held Vanguard & Fidelity funds.

---- Not Leader v. Facebook Patent Office Director David J. Kappos—he held over a million dollars of Vanguard funds.

Help End the Corruption of the U.S. Patent Office

America's Senator's, and other major politicians, own the stock in Facebook, Google, Netflix, YouTube and Instagram. Those politicians refuse to reform the U.S. Patent Office, or internet privacy, because Facebook, Google, YouTube, Instagram, et al, stole most of their technologies from small inventors that they never paid. Those Big Tech companies have spent billions in lawyer and lobbyist payola to stop inventors from getting paid. Big Tech even has their own staff planted in the U.S. Patent Office to protect Big Tech and to sabotage small inventors. The FBI and FINCEN can easily deliver a forensic auditing report proving that politicians (Mostly those from California) own, and get bribes from, Silicon Valley Big Tech...BUT...Congress refuses to request such a report because it would implicate so many members of Congress! We are exposing the Senator's, Mayors and Governors that covertly take bribes from Big Tech!

Please join inventors and supporters - Write to Congress and Demand That the PTAB and Silicon Valley Oligarch Control of the U.S. Patent Office be over-thrown:

<https://www.congress.gov/contact-us>

It is the 10 year anniversary of the America Invents Act, a radical change to the fundamental structure of the U.S. patent system. The Supreme Court has declared that under the AIA patents are no longer property rights, but are now merely "privileges" from the government, which they can unilaterally revoke at the PTAB. Thus the newly created fascist administrative tribunal INSIDE the patent office has invalidated ISSUED patents of thousands of inventors, usually for the benefit of large corporations accused of infringement.

The AIA – whether deliberate or unintentional – has been devastating for independent inventors and small businesses who attempt to compete through innovation. Regardless of how carefully and precisely the law is followed, large corporations are persuading the USPTO to invalidate 84% of the patents reviewed under the AIA. Clearly this is not only bad for inventors, it is bad for society. National security is jeopardized, innovation lags, while corporate incumbents metastasize and roll their monopoly profits to into even more political influence to crush competition.

The effort is to draw attention to the crisis created by the AIA and to seek legislation to curb unjust patent revocations by the USPTO. Under the AIA, USPTO headquarters along with the 4 regional offices are the venues of the patent "death squads", where administrative patent judges hold hearings and issue orders stripping inventors of our hard-earned intellectual property rights. A sixth location in Vermont is the local office of Senator Patrick Leahy who authored the America Invents Act and needs to hear how his bill has harmed inventors and been weaponized by large corporations to snuff out small competitors.

SONY PICTURES Corruption and Media Manipulation

See: https://en.wikipedia.org/wiki/Sony_Pictures_hack

See: <https://www.washingtonpost.com/news/the-switch/wp/2014/12/18/the-sony-pictures-hack-explained/>

See: <https://www.hollywoodreporter.com/business/business-news/sony-subpoenaed-bribery-probe-resident-762501/>

See: <https://www.hollywoodreporter.com/movies/movie-news/zero-dark-thirty-cia-slammed-821519/>

See: <https://deadline.com/2015/09/zero-dark-thirty-movie-cia-involvement-1201519756/>

The hacks and leaks at Sony Pictures Entertainment have exposed the dark side of Hollywood. The new information reveals an insider vision of a company racked with sexism, office politics, high-school-level personality quibbles and a severe mine-is-bigger-than-yours territoriality culture.

A number of lawsuits against Sony, from Lady GaGa to Sony's own employees, have revealed even more.

An aspect of the revelations involves where Sony gets its ideas from. A number of revelations reveal that Sony seems to have established a process of "borrowing" technology and story ideas while "forgetting" to properly attribute or pay the sources.

Some of the 'dirt' exposed included:

- Sony finances Democrat Presidents in exchange for media 'favored nations' status over competitors.
- Sony and Google coordinate political manipulation campaigns together.
- Sony executives trade female entry-level staff like cattle at a 'ranch'.
- Sony executives hire an insane amount of hookers, rent-boys and under-age sex providers.
- Sony executives bribe their kids into colleges.
- The good-old-white-Jewish-boy club is alive and well at Sony.
- ZERO DARK THIRTY was a political PR hype movie commissioned by the Obama Campaign using government resources
- Sony steals patents from anybody it wants
- Sony stole it's VR technology
- Sony stole its web video technology
- Sex deviancy is the rule at Sony
- Sony is a bunch of high-school whine babies who think their shit doesn't stink
- Sony spends millions and millions of dollars on political bribes

The kids at Sony seem to have been very naughty children. They let their IT system go to pot, and got hacked, and outed, as "racist", "misogynist", "campaign rigging", "high school tantrum throwing" kinds of people, per their own emails. Hollywood Reporter, The Verge, Wikileaks, and a variety of tabloids and pundits, have delighted in dissecting the fraternity house, inside antics, of Sony Pictures. Their boss got fired. They got ridiculed for turning "Zero Dark Thirty" into a, slightly fabricated, political vote-churn tool. Other execs got kicked to the curb. All of their financial, contracting, political cash layout, and tax dynamics were placed under investigation, and even more sketchy bits are shaking loose. These are the main influencers of a national political party & they are all involved in horrific sex perversions & abuses!

The Smedley Butler "Business Plot" from the past is not unlike the coup that Google & clan tried. See details in Emily Chang's book: BROTOPIA; Roan Farrow's book: CATCH & KILL; Edward Snowden's Book: PERMANENT RECORD; Peter Schwetzer's book: THROW THEM ALL OUT; Dave Eggers book: THE CIRCLE; Franklin Foer's book: WORLD WITHOUT MIND; Corey Pein's book: JOURNEY INTO THE SAVAGE HEART OF SILICON VALLEY; Dan Lyon's book: DISRUPTED; Antonio Martinez book: CHAOS MONKEYS. 90% of these guys came from the same date-rape fraternity houses involved in the recent college rape cases..."

The Lies That Silicon Valley Tells About BATTERIES VS FUEL CELLS

See: <https://h2fcp.org/>

See: https://en.wikipedia.org/wiki/California_Fuel_Cell_Partnership

See: <https://www.fchea.org/>

See: <https://www.h2bulletin.com/knowledge/hydrogen-associations/>

Investigation report clips: "...Elon Musk, Panasonic, John Doerr, Tim Draper and others spend a billion dollars per year to create disinfo about hydrogen. There are not enough minerals on Earth to power all the electric cars with batteries. Only fuel cells, which get their fuel from ocean water or organic waste, can solve the problem. Lithium metals, and other rare earth mining materials, are monopolized by Elon Musk and his Silicon Valley Cartel, in rare-earth corrupt mining scams. Lithium's widespread use in cars is hindered by a challenging obstacle: upon multiple charge-discharge cycles, fractal filaments called dendrites always grow through the electrolyte from the negative to the positive electrode and short-circuit the battery from the inside, thus guaranteeing that Tesla Cars will eventually all explode. Musk and Panasonic have known this since 2007 (They are "dumping" the batteries via Tesla) and have paid U.S. Senators, who own stock in Tesla, to cover it up. The lithium fires and toxic vapors are a major safety concern because they have killed, poisoned and injured too many citizens. Tesla and Musk are protected by shareholders Harris, Pelosi, Feinstein, Brown and Newsom.

Panasonic (indicted for bribery and Musk's partner) spends billions of dollars annually cover-up lithium battery fires and battery defects. Hydrogen can be produced from diverse domestic resources with the potential for near-zero greenhouse gas emissions. Once produced, hydrogen generates electrical power in a fuel cell, emitting only water vapor and warm air. It holds promise for growth in both the stationary and transportation energy sectors. When used to power highly efficient fuel cell electric vehicles, hydrogen holds the promise of helping strengthen national energy security, conserve fuel, and diversify our transportation energy options for a more resilient system. About half of the U.S. population lives in areas where air pollution levels are high enough to negatively impact public health and the environment. Emissions from gasoline and diesel vehicles—such as nitrogen oxides, hydrocarbons, and particulate matter—are a major source of this pollution. Hydrogen-powered fuel cell electric vehicles emit none of these harmful substances—only water (H₂O) and warm air. The environmental and health benefits are also seen at the source of hydrogen production if derived from low- or zero-emission sources, such as solar, wind, and nuclear energy and fossil fuels with advanced emission controls and carbon sequestration.

Because the transportation sector accounts for about one-third of U.S. carbon dioxide emissions, using these sources to produce hydrogen for transportation can cut greenhouse gas emissions.

1. **Renewable and Readily Available:** Hydrogen is the most abundant element in the Universe and despite the challenges associated with its extraction from water, is a uniquely abundant and renewable source of energy, perfect for our future zero-carbon needs for combined heat and power supplies.
2. **Hydrogen is a Clean and Flexible Energy Source to support Zero-Carbon Energy Strategies:** Hydrogen fuel cells provide an inherently clean source of energy, with no adverse environmental impact during operation as the byproducts are simply heat and water. Unlike biofuel or hydropower, hydrogen doesn't require large areas of land to produce. In fact, NASA have even been working on using hydrogen as a resource with the water produced as a byproduct being used as drinking water for astronauts. This shows that hydrogen fuel cells are a non-toxic fuel source and therefore superior in this way to coal, natural gas and nuclear power which are all either potentially dangerous or hard to obtain. Production, storage and use of hydrogen will play an important role in driving further development of renewable energy, by balancing their intermittent supply modalities with the challenging end-user demands, avoiding the need for significant early investment to upgrade grid infrastructure.
3. **More Powerful and Energy Efficient than Fossil Fuels:** Hydrogen fuel cell technology provides a high-density source of energy with good energy efficiency. Hydrogen has the highest energy content of any common fuel by weight. High pressure gaseous and liquid hydrogen have around three times the gravimetric energy density (around 120MJ/kg) of diesel and LNG and a similar volumetric energy density to natural gas.
4. **Highly Efficient when Compared to Other Energy Sources:** Hydrogen fuel cells are more efficient than many other energy sources, including many green energy solutions. This fuel efficiency allows for the production of more energy per pound of fuel. For example, a conventional combustion based power plant generates electricity at 33-35% efficiency compared to up to 65% for hydrogen fuel cells. The same goes for vehicles, where hydrogen fuel cells use 40-60% of the fuel's energy while also offering a 50% reduction in fuel consumption.
5. **Almost Zero Emissions:** Hydrogen fuel cells do not generate greenhouse gas emissions as for fossil fuel sources, thus reducing pollution and improving air quality as a result.
6. **Reduces Carbon Footprints:** With almost no emissions, hydrogen fuel cells do not release greenhouse gases, which means they do not have a carbon footprint while in use.
7. **Fast Charging Times:** The charge time for hydrogen fuel cell power units is extremely rapid, similar to that for conventional internal combustion engine (ICE) vehicles and markedly quicker in comparison to battery-powered electric vehicles. Where electric vehicles require between 30 minutes and several hours to charge, hydrogen fuel cells can be recharged in under five minutes. This fast charging time means that hydrogen powered vehicles provide the same flexibility as conventional cars.
8. **No Noise Pollution:** Hydrogen fuel cells do not produce noise pollution like other sources of renewable energy, such as wind power. This also means that, much like electric cars, hydrogen powered vehicles are much quieter than those that use conventional internal combustion engines.
9. **No Visual Pollution:** Some low-carbon energy sources, including wind energy and biofuel power plants can be an eyesore, however, hydrogen fuel cells do not have the same space requirements, meaning that there is

less visual pollution too.

10. Long Usage Times: Hydrogen fuel cells offer greater efficiencies with regard to usage times. A hydrogen vehicle has the same range as those that use fossil fuels (around 300 miles). This is superior to that currently offered by electric vehicles (EVs), which are increasingly being developed with fuel cell power units as ‘range-extendors’. Hydrogen fuel cells are also not significantly impacted by the outside temperature and do not deteriorate in cold weather, unlike EVs. This advantage is increased further when coupled with the short charging times.

11. Ideal for Use in Remote Areas: Where local conditions allow, the availability of hydrogen through local generation and storage could prove to be an alternative to diesel-based power and heating in remote areas. Not only will this reduce the need to transport fuels but will also improve the lives of those living in distant regions by offering a non-polluting fuel obtain from a readily-available natural resource.

12. Versatility of Use: As the technology advances, hydrogen fuel cells will be able to provide energy for a range stationary and mobile applications. Hydrogen powered vehicles are just one example, but it could also be used in smaller applications such as domestic products as well as larger scale heating systems. Similar to ICE power plants, the functions of energy storage capacity (i.e.. the fuel tank) and engine size are decoupled, in contrast to battery-based power (i.e.. for which power scales linearly with mass), thus providing great flexibility in design. 13. Democratisation of Power Supply: Hydrogen fuel cells have the potential to reduce the dependency of a nation on fossil fuels, which will help democratize energy and power supplies around the world. This increased independence will prove a benefit for many countries who are currently reliant on fossil fuel supply. Of course, this will also avoid the problem of rising fossil fuel prices as stocks reduce.

HOUSING Is Stalled Because Of Special Interest Bribes And Monopolies

SILICON VALLEY’S TRILLION DOLLAR CULTURE OF BRIBERY; CENSORSHIP; SEX TRAFFICKING; ELECTION MANIPULATION; PAYOLA TO CITY, STATE, COUNTY AND FEDERAL OFFICIALS; LUDICROUS EXCESS AND REVOLVING DOOR PAY-OFFS TO GOVERNMENT INSIDERS HAS DESTROYED HOUSING OPPORTUNITIES FOR THE POOR AND MIDDLE CLASS BY NEGATING HUMAN RIGHTS OVER OLIGARCH LUXURIES!

The Silicon Valley solution to “The Housing Crisis” is all talk, window dressing, dog-and-pony, un-responded to white papers and absolutely no meaningful action.

REAL ESTATE DEVELOPERS, OLIGARCHS AND REAL ESTATE BANKS PAY BRIBES TO COUNTY OFFICIALS TO KEEP AFFORDABLE HOUSING FROM GETTING BUILT BECAUSE IT COMPETES WITH THEIR SCHEMES! The State of California and HUD housing agencies have long lists of “Certified”, “Qualified”, “Approved”, etc. loan brokers and mortgage brokers that the agencies say will help low-income citizens get single family financing. So we called everybody on one of those lists provided by the State of California.

In fact, those loan brokers and mortgage companies don't want to hear from you unless you are in a bid war on a \$1.5 million dollar bungalow for which you already have \$500K, or more, in cash in the bank. Only a small percentage of the loan brokers and mortgage brokers on those lists had EVER done a completed subsidized home loan and even less had any clue how to paper a HUD Home Ownership financed home loan. Over 20 U.S. Bank mortgage brokers even refused to respond to emails or phone calls if one used the words "Cal-FHA USDA" because, as one unusually talkative U.S. Bank employee stated: "To us, those are code-words for 'poor people', the market is, frankly, too hot for banks to bother with the poor's because we don't make any money off them".

It does not matter if you have spent years trying to keep your FICO score above 700. It does not matter that you never had a bankruptcy. It does not matter that you have guaranteed income for life from your government benefits. All of those things that the media told you to do to be a "good citizen" with a good social credit score seem to be pointless. The loan and mortgage brokers on those lists are only on those lists to get a few PR brownie points. They do not want to hear from you or deal with you unless you are making big bucks in tech. They will let you upload your information but they will do little or nothing to help you because they lose money by helping you. They only make money off of the big deals.

On top of that the big real estate developers like Pulte Homes, Berkshire Hathaway (Warren Buffet), Kauffman and Broad (K&B Homes), etc. are bribing the Governor and the heads of all of the agencies to keep you from building a home or getting a home that is not in one of their giant developments. Most low-income people are the laborers who build the homes in those big real estate developments.

Those people know how to build their own homes but State and Federal agency heads are bribed to make sure you NEVER can build your own home. Those people know they can build an incredible home, on their own, for under \$100,000.00. You can see thousands of videos on the internet showing people that do it every day in any state but California. Try to build a home in California. You will find you are blockaded at every turn EXCLUSIVELY by rules that you have to follow but that big developers do not!

Try to buy a modular or factory build home in California ...Same thing. The political bosses in California have taken so many bribes from big special interests that they can't stop sucking on the graft hose. See more at <https://turnercenter.berkeley.edu/>

U.S. DEPARTMENT OF ENERGY Is a political slush fund

Trillions of dollars of stock trades and direct payola bribes are exchanged using: A.) the White House as a broker and B.) The United States Department of Energy as a stock market manipulation platform and C.) The TAXPAYERS money!

The White House had the Secretaries of Energy sabotage BRIGHT AUTOMOTIVE, ZAP AUTOMOTIVE, XP VEHICLES, BRAMMO AUTO, and many other car companies, in order to protect Obama/Biden political campaign financier Elon Musk and his Big Tech Cartel!

That's right! Your public officials use federal agencies as dark-money laundering operations for their friends.

If you are a taxpayer: You suffered damages!
If you are an American business: You suffered damages!
If you are Democracy: You were broken!
If you were a tech mobster: You made out like a bandit!
This is how it worked.

No public official wants these crimes to end because most of those officials profit from these crimes! Forget about any allegiance you might have to one political party over another. This is not about parties, this is about racketeering crimes!

The Solyndra taxpayer, technology, financial and political disasters that began during the reign of Steven Chu at the Department of Energy typified the overt, organized crime, corruption and crony malfeasance of the public funds.

This trend was created via the back-door deals between 1.) The U.S. Department of Energy and audacious kick-back schemes created by 2.) Silicon Valley campaign financiers and the 3.) White House. This is the story of the racketeering schemes and scams that set out to steal trillions of dollars of taxpayer cash, in plain sight, under the cover of a national “economic” or “health” emergency “stimulus” scam. The United States Department of Energy, the U.S. Patent Office, The EPA and others, since November 2008, have been almost entirely used as scam crony payola slush-funds to pay off political campaign financiers of White House insiders. In addition, government agencies are used as gate-keepers to sabotage and stall the competitors to those political campaign financiers of White House insiders. It is political racketeering operating in plain sight! The cover-ups by the IG, AJ and DOJ are ENDLESS! Politicians turned the government into a cheap garage sale of cronyism! This kind of crime illicitly and illegally manipulates the power over who runs the United States Government and who profits from government decisions which are a matter of many trillions of dollars. Whistle-blowers exposed and reported the corruption crimes to proper authorities through proper channels. Some of those authorities used government resources to operate reprisal attacks against the whistle-blowers, using government resources to operate the attacks, as revenge for reporting the crimes.

Trillions of dollars of stock trades and direct payola bribes were exchanged using the White House as a broker and the United States Department of Energy as a stock market manipulation platform.

Corrupt political families conspire to give government funds, contracts, tax waivers, buildings, stock market profits and other insider perks to themselves and their friends. They also conspire to blockade, harm, sabotage and black-list those who compete with them and their friends. These corrupt politicians are never prosecuted for their crimes, and can laugh in the face of those who point out their crimes, because they control the prosecution system. Their Quid Pro Quo criminal corruption is the single largest cause of the taxpayer hatred of Congress.

What Went Wrong With The Electric Car Industry?

Only men seem to start car companies. Most psychologists say that this is because men see cars as dick insecurity emblems.

Elon Musk is known to be a wildly insecure narcissist who feels that he must get every woman, that he can find, pregnant in order to prove his manhood to his abusive father, who got his sister pregnant.

Musk embodies the ultimate expression of ‘car-as-dick’ thinking because Musk was not only molded by his

purse-swinging, kept-woman, mother, and abusive father and crooked brother but also by the Silicon Valley frat boy rape-culture.

The United States Department of Energy, the U.S. Patent Office, The EPA and others, since November 2008, have been almost entirely used as scam crony payola slush-funds to pay off political campaign financiers of White House insiders. In addition, government agencies are used as gate-keepers to sabotage and stall the competitors to those political campaign financiers of White House insiders. It is political racketeering operating in plain sight! The cover-ups by the IG, AJ and DOJ are ENDLESS! Politicians turned the government into a cheap garage sale of cronyism! This kind of crime illicitly and illegally manipulates the power over who runs the United States

Government and who profits from government decisions which are a matter of many trillions of dollars. Whistle-blowers exposed and reported the corruption crimes to proper authorities through proper channels. Some of those authorities used government resources to operate reprisal attacks against the whistle-blowers, using government resources to operate the attacks, as revenge for reporting the crimes.

Silicon Valley is, of course, the Eden of modern misogyny and tech-bro douche-baggery.

Musk dragged all of the biggest assholes from Silicon Valley, The DNC and Goldman Sachs in

---- If you were a tech mobster: You made out like a bandit! To his Tech Cartel. Together they created a temporary monopoly in the electric car industry by exchanging stock market payola with Senators and White House staff who, in exchange, locked off the electric car and space industries just for Musk.

But that scheme was not sustainable. It was amazingly crooked and lucrative but, it could not last. It was Big Tech's Roman Empire and it was doomed to fail spectacularly.

Musk counted on Obama and Biden to stick with his original quid-pro-quo deal to trade government cash for election rigging via his boyfriends at Google and Facebook. Tesla was the money conduit for a bunch of political scammery.

Biden and his cheerleader actress front girl: Jennifer Granholm, bounced into office with a Wizard of Oz promise to give everybody electric cars. They were so wrong about the pitfalls of their plan and they hired so many idiot sex freaks and unicorn fart unaware fools that their scheme blew up...instantly and literally.

---- That's right! Your public officials use federal agencies as dark-money laundering operations for their friends. EVERY APPLICANT WHO HAS BETTER METRICS THAN WHITE HOUSE INSIDERS FISHER AND TESLA GETS REJECTED. DOE DOES THIS TO PROTECT OBAMA AND BIDEN CAMPAIGN FINANCIERS WHO PAID BRIBES IN ORDER TO GET THIS GREEN PAYOLA. IN A PUBLIC, SIDE-BY-SIDE, COMPARISON THE DOE "WIINERS" WOULD LOSE AND THEY CRONYISM WOULD BE EXPOSED!

---- This is how it worked. No public official wants these crimes to end because most of those officials profit from these crimes! Forget about any allegiance you might have to one political party over another. This is not about parties, this is about racketeering crimes!

---- The Solyndra taxpayer, technology, financial and political disasters that began during the corrupt reign of Steven Chu and Jennifer Granholm at the Department of Energy typified the overt, organized crime, corruption and crony malfeasance of the public funds.

---- This trend was created via the back-door deals between 1.) The U.S. Department of Energy and audacious kick-back schemes created by 2.) Silicon Valley campaign financiers and the 3.) White House. This is the story of the racketeering schemes and scams that set out to steal trillions of dollars of taxpayer cash, in plain sight, under the cover of a national “economic” or “health” emergency “stimulus” scam.

---- There are hundreds of millions of people in America. The same 120 of them are all involved in operating the same crimes and corruption including: the Sony Pictures corruption; the Afghanistan rare earth mine scandals operated through The Energy Department political slush fund that involves the lithium battery cover-ups (headed by Elon Musk); the Big Tech Brotopia rape, sex trafficking, bribery, exclusionism, racism and misogyny issues they were taught at Stanford University; The Facebook – Meta – Google – Alphabet – Netflix, et al, coordinated news manipulation and domestic spying that they engage in; the hiring of Fusion GPS – Black Cube – Gizmodo/Gawker assassins; the destruction of the housing market by their mass real estate manipulations; patent theft and industrial espionage; and the bribery of almost every politician all the way up to the Oval Office.

---- So, while the categories covered in this investigation may seem diverse. They are connected through an enterprise of criminality and illicit, coordinated operations. We list, by name, the 120 most complicit individuals organizing these crimes, in the evidence documents already submitted to the FBI, FINCEN, DOJ, FTC, SEC, FEC, Congress, InterPol and other authorities. Digital financial tracking of those persons and all of their family members should be assumed to have been under way for some time. Wire-taps and device taps of those persons and all of their family members should be assumed to have been under way for some time.

---- The United States Department of Energy runs a political crony payola slush fund. They don't "support green cars"; they support "greenbacks for crony insiders who financed political campaigns". The U.S. Department of Energy violates anti-trust law by funding only the friends of The President and cutting out their competitors. The "Secretary Of Energy" is a paid actor who owns the companies that the government finances.

---- For decades, hundreds of engineers had informed the Department of Energy, in writing that, as Lithium ion batteries age, the dendrite defects in their internal chemistry cause the batteries to constantly increase their tendency to blow up. External forces, moisture, ambient energy waves and other factors, increase their tendency to self-ignite. Department of Energy Secretary's of Energy, their staff, White House and CIA executives have been proven, via their public stock brokerage records, to own lithium ion battery companies and child labor rare earth mining interests.

That is why they cover up the dangers of toxic lithium ion (the burning smoke of which causes cancer, brain and fetus damage) and sabotage efforts to market fuel cells, ultra caps, NiCAD batteries and competing alternative energy storage: in violation of anti-trust laws.

Jennifer Granholm's Proterra Buses are now blowing up, Tesla is known for blowing up, and Bolt's are now blowing up. Ener1 batteries destroyed millions of dollars of Fisker's when they got wet... The Department of Energy has hundreds of reports proving this to be a fact.

Citizens demand an end to this cover up that allows corrupt politicians to profiteer on the death of Americans!

How The Social Security Administration and the IRS have been ILLEGALLY Weaponized for Payback Revenge Reprisals against the Whistle-Blowers and Journalists In This Case

... Social Security, SSI, SDI, Disability and other earned benefits were stone-walled. Applications for benefits for the Plaintiffs were intentionally "lost" like a "Lois Lerner hard drive". Files in the application process "disappeared". A U.S. Senator ordered Plaintiffs benefits to "never be approved" even though Plaintiffs worked 60 hour+ weeks for decades in service to their nation and their community. A SSA official in the local SSA office, who had a devout expressed hatred against one United States President ordered a benefits blockade against Plaintiffs because he found out that Plaintiffs ex-lawyer now worked in the White House.

Forensic evidence and backgrounders on every person who worked on, or had access to, Applicants files, records, benefits decisions and related data sets shows that a number of those employees and contractors were members, financiers, web promoters or supporters of ANTIFA anarchy groups or KKK or Proud Boys related political activist-type groups. In San Francisco and Marin Counties SSA offices, in employee's workspaces and on their Facebook and MySpace sites, many employees proudly display pictures of themselves wearing their pink "pussy hats", black riot gear and sporting political tattoos. FBI records and IG investigations show that SSA has the highest percentage of political activist employees of any federal agency.

Such persons are inclined to become drunk with power when allowed access to the trillions of dollars of government technology on the SSA file and decisions systems. A number of these persons have worked for, or with, U.S. Senators and other politicians who targeted Applicant in political reprisal. At least 3 persons in the San Francisco SSA office, at least 2 persons in the San Mateo SSA office and at least 2 persons in Marin SSA office are known to have engaged in such actions. Applicants funding and benefits were manipulated, so as to harm Applicant, as political reprisal as vendetta for his provision of testimony to federal investigators in a trillion dollar political corruption matter involving famous political figures featured in global news coverage. A vast number of agency abuse cases and lawsuits are now on public record in the Inspector General's offices and federal courts.

It is an indisputable fact that some government agencies run "hit-jobs" on citizens on orders from certain corrupt politicians. These actions are felony violations of the law.

Federal and State Agencies including SSA, FEC, DOE, HHS, VA, CIA, HUD, SA, SEC, FBI, DOJ and many others, have been charged, and found guilty, in these crimes against citizens.

In the Congressional investigation published by the United States Congress in review of the U.S. Department of Energy LGP/ATVM programs, it is clearly proven that the U.S. Department of Energy was used as a slush-fund by some DOE executives in order to pay off campaign financiers by attacking and sabotaging their competitors. The DOE Paducah Gaseous Diffusion Plant under contracts with the Department of Energy and the government-owned U.S. Enrichment Corp paid \$5M whistle-blower awards to those whistle-blowers who were attacked, using government agency resources, for reporting a crime. Dept. of Energy Hanford URS has agreed to settle a lawsuit brought by former employee Walter Tamosaitis for \$4.1 million. The settlement in the whistle-blower case comes almost one year before the case was set for a jury trial in federal court in Richland and compensates Tamosaitis for attacks against him, by DOE officials, in retribution for reporting a crime.

---- Most of the money in the 2008 and 2021 "Stimulus" funding has been steered to companies who are political friends and financiers of The White House!

---- Each city, state, county and federal official charged in this matter was receiving stock market assets, direct cash payments, political career exclusives, sex worker exchanges, real estate perks, promotions and other bribes; and those officials had investment, personal and political affiliations with the adversaries charged herein; and those officials have been found, by federal investigators, to have used spy agency resources to attack plaintiff in reprisal and in anti-competitive business interference.

---- Competitors to White House financiers are specifically and illegally excluded from participation in funding, benefits, jobs and income by major political figures, including U.S. Senators and White House executives, and their Silicon Valley oligarch financiers. These corrupt politicians attack others who refuse to cooperate with their crimes including: 1.) sex trafficking, 2.) tax evasion, 3.) off-shore money laundering, 4.) political bribery quid-pro-quo, 5.) revolving door payola scams, 6.) foreign nation-sponsored domestic manipulations, 7.) stock market rigging, 8.) internet censorship, 9.) search engine manipulation and other crimes.

---- They attacked citizens who report their crimes to federal police. They also attack citizens who make products that obsoleted their products at Facebook, Google, Tesla, Netflix, etc. These corrupt politicians attack citizens using taxpayer-funded state resources. That is a felony violation of the law. The ongoing cover-up of these crimes and attacks is also a felony violation of the law. The victims are owed damages compensation, witness fees and back-pay.

---- Top Lawyers from Perkins Coie and Covington & Burling admitted that they "CONTROL" who gets DOE funding, agency appointees and federal cash

---- For example: All of the money that the U.S. Department of Energy gave out during the Obama and Biden Administrations only went to the friends and financiers of the Obama and Biden Administrations. Anybody that applied for the money, that competed with the friends and financiers of the Obama and Biden Administrations were cut-off and de-funded. The staff and politicians in the Obama and Biden Administrations owned the stocks of those few who got funded and went to work for them after they left Washington. It was as blatant a quid-pro-quo revolving door scam as anyone had ever seen. (i.e.: Solyndra, Tesla, Abound, Abengoa, etc.)

In another example: Feinstein's family owned and controlled A.) Government trained attack 'spies' formerly with the CIA, NSA, etc., B.) The leasing contracts for Tesla and Solyndra, C.) Their office staff that threatened competitors in writing and in-person, D.) The financing for Tesla and Solyndra, E.) The construction services for Tesla and Solyndra, F.) The staffing company for Tesla and Solyndra, G.) The adjacent railroad services for Tesla and Solyndra, H.) Key suppliers for Tesla and Solyndra, I.) Goldman Sachs cooperative relationships for Tesla and Solyndra, J.) Transitions from their own Senate Office staff to revolving door jobs at Tesla and Solyndra, K.) Government decisions for Tesla and Solyndra, L.) The relationship incentives between Google, Tesla and Solyndra and that Senator's campaign financing to that Senator; and other illicit conflicts of interest.

Her husband: Dick and her daughter: Kathy, even confessed to these schemes to a whistle-blower, while being recorded. Competitors owned the competing electric car companies and technology that would have obsoleted Tesla, Google and Solyndra and was the first to begin negotiations with the factory that Tesla later took over at the insistence of that Senator, even though Elon Musk appears in news reports, previously stating that he saw no use for the building for Tesla. Feinstein put a hit job on them to protect her own stock market shares.

The United States Department of Energy runs a political crony-payola slush-fund operation. They don't "support green cars"; they support "greenbacks for crony insiders who financed political campaigns".

The U.S. Department of Energy violates anti-trust law by funding only the friends of The President and cutting out their competitors. Most observers think that the Department of Energy needs to be sued by the government on behalf of the citizens that were harmed and defrauded by the agencies schemes.

The DOE non-crony victims were specifically and illegally excluded from participation in funding, benefits, jobs and income by major political figures, including U.S. Senators and White House executives who they knew, and their Silicon Valley oligarch financiers. The victims had reprisal/retribution/revenge/retaliation hit-jobs put on them by Fusion GPS, Black Cube, Gawker/Gizmodo/Google and other media attack outlets. Financial records show that the hit-jobs were paid for by U.S. Senators and Department of Energy executives who owned the stock in the victim's competitors.

Jennifer Granholm began touting the "amazing electric car funding" from the Department of Energy and "inviting electric car makers to apply" for fabulous amounts of funding from DOE. Upon becoming the new Secretary of Energy, her staff had to report to her that the Department of Energy has fucked over every single car manufacturer in America and that there are no electric car makers that trust DOE except the handful of Obama buddies who already got cash from DOE. She quickly tried to pivot to "funding batteries for all kinds of stuff", only to find that you can't make batteries unless China allows you to. These two dumb, naive, moves clearly demonstrate the unprofessional and crony idiocy that DOE has become widely known for. Fuel cell cars, (like Toyota, Honda, Hyundai, etc. sell), work perfectly, use domestic materials, don't blow-up like lithium-ion batteries always do and solve all of America's energy problems. Fuel Cells obsolete the batteries that Jennifer Granholm and her buddies own the stock in! In fact, Jennifer Granholm's Proterra lithium ion buses have been exploding into fireballs lately. Jennifer hates fuel cell cars because her stock market investments are in lithium.

Dept of Energy officials and operatives attacked applicants because those applicants cooperated with investigations of those political officials. The investigations looked at sex trafficking, tax evasion, off-shore money laundering, political bribery quid-pro-quo, revolving door payola scams, foreign nation-sponsored domestic manipulations, stock market rigging, internet censorship and search engine manipulation and other crimes.

The staff churn at the Department of Energy since 2008 has been nothing short of horrific. You find yourself talking to one major staff person one week and they are gone the next week. The Energy Department likes to sucker-in naive, wide-eyed, deer-in-the-headlights college kids with promises of "save-the-planet" and "cutting edge" but each new hire discovers that the come-on's are false. Once the new employee is inside the Department they can easily see the dirt, cronyism and insider schemes. Their dreams shattered, they head out to work for HUD or some other spot. The only ones that are still there, since 2008, are Obama's insiders that make sure that the money only goes to Obama's stock market partners. Department of Energy staff will lie like dogs to anybody who wants to apply for DOE funds. They will tell them that they have an equal chance of getting funded when they know that, even in 2021, only Elon Musk and the Obama sanctioned insiders will get to move forward.

The politicians attacked the whistle-blowers because they reported the crimes to federal police. They attacked them because non-crony applicant's products obsoleted the insider products of Tesla, Fisker, Solyndra and other crony companies owned covertly by Senators. They attacked the victims using taxpayer-funded state resources. That is a felony violation of the law.

The ongoing cover-up of these crimes and attacks is also a felony violation of the law. The victims are owed damages compensation, witness fees and back-pay. So far they have gotten nothing but cover-ups.

The FBI and other law enforcement organizations define a "cartel" as: 'An association of industrialists and business firms organized covertly to establish a national, or international monopoly, via price fixing and ownership of controlling stock, to operate a trust or monopoly to reduce competition between themselves by allocating markets, censoring public knowledge, manipulating governments or controlling the price and production of media, products and/or services.' This case is about a criminal "cartel". The Silicon Valley Cartel is an organized criminal enterprise!

In 2007, if someone said: "The Social Security Administration and other government offices have been weaponized to provide revenge, retribution, reprisal and retaliation attacks against witnesses, whistle-blowers and journalists..." you might have laughed. Over 2000 victorious lawsuits and IG investigations later: That statement has irrefutably been proven, in courts, to have been totally true. It is now well documented in Court and in federal investigations that Over 120 companies (listed by name, below, sell attack services to well-known politicians. Applicant's investigators have proven that "kill services" were hired by public officials and aimed at Applicant, and other citizens.

In this case, one Applicant's Senators have made many tens of millions of dollars in profits and bribes off of Google. Google is applicant's competitor, patent infringer and operator of the largest of the attacks. Google, literally, controlled and staffed, The White House in 2008. The financing, command and control, deployment and beneficiaries all point directly to the perpetrators in this case. The FBI, FinCEN and other investigators have "no doubt" about who attacked Applicant and the scope of the spy agency tactics that were used.

Said one victim: "Government officials and their Silicon Valley cartel financiers are refusing to pay our damages, blocking our legal rights, operating spy agency-type reprisal attacks and running cover-ups. We demand that they pay us for our damages back fees and harms from their felony crimes... Ask the FBI to show you the 302 reports on this case. Demand that we get a fair Jury Trial. End these bribes and payola schemes. U.S. Government: PAY OUR DAMAGES! 'Hundreds of millions of dollars of crony bribe cash uncovered in covert family trusts, stealth real estate holdings, shell corporations, Cayman Islands hidden accounts, false-front Goldman Sachs accounts, and nepotism deals held by Harris, Boxer, Feinstein, Pelosi, Reid, Biden, etc. They were supposed to protect us and, instead, lied to us, ran hit-jobs against us and competed with us! We found out that our political representatives own the stocks and assets of our competitors, have sex and party with our competitors, get tens of millions of dollars of election manipulation services from our competitors and use government spy and public services agencies to screw us over. Most of our political representatives work for corporations who abuse the public and they do it out of pure mercenary greed and lust for power..."

It is now well documented in Court and in federal investigations that Over 120 companies (listed by name, below, sell attack services to well-known politicians. Applicant's investigators have proven that Fusion GPS, Black Cube, Gawker/Gizmodo and other "kill services" were hired by public officials and aimed at Applicants because they assisted with effective law enforcement cases against these corrupt politicians. The victims got Attorney General Eric Holder fired from his job for corruption. The victims got Secretary of Energy Steven Chu fired from his job for corruption...

Police records prove that the arrested and/or charged financiers (Howard Rubin, Ed Buck, Roger Boas, Jeffrey Epstein, Joe Lonsdale, Eric Schmidt, Andy Rubin, Sergy Brin, Steve Bing, Reid Hoffman, Michael Goguen, Forrest Hayes, Tom Perkins, Steve Westly, etc.) of these public officials ran a national sex cult in which some

victims were murdered and many were underage. The depth of their sick depravity proves that the perpetrators will stoop to any crime, using the highest levels of government resources, to cover-up their crimes. The Complainant helped investigate some of these perverted perpetrators and has had government agencies deployed to attack him in reprisal, retribution, retaliation efforts as payback.

STANFORD UNIVERSITY Creates douche-bags and white collar criminals

See: <https://www.unigo.com/colleges/stanford-university/what-do-you-consider-the-worst-thing-about-your-school-why>

See: <https://www.youtube.com/watch?v=cCM73ICSOs8>

See: <https://www.vox.com/recode/2019/5/2/18526213/tao-zhao-chinese-billionaire-college-admissions-sc&al-bribery>

See: <https://www.kqed.org/forum/2010101889188/murder-corruption-coverups-the-strange-dark-history-of-stanford-university>

Investigations report clips: "...Stanford University builds corporate criminals, sex traffickers, sociopaths & elitist narcissists. It trains naive children to grow up to become adult stains on society! In California, elite arrogant asshole dynasties send their kids to Stanford University. Stanford puts the kids in asshole frat houses to train them to get away with rape & run monopolies. Rape cover-ups by frats from rich families; Epic racism; Staff sex scandals that make the whole campus look like A Caligula party; Dynastic families control the whole campus; Arab, Iranian & Chinese oligarchs pay bribes to get their kids in;

The CIA is always recruiting everyone & the most notorious spy project: STARGATE, happened at Stanford; The Russian, Iranian & Chinese spy agencies have placed a huge number of spies on the campus as 'pretend students' & pretend teachers; Elitism is rampant; The Silicon Valley venture capitalists, up the hill on Sand Hill Road, get all their interns from Stanford & they date rape the hot ones with Ruffies, Scopalomine, & other amnesia drugs. The interns wake up with sore butts & can't remember why; to afford the fees, the girl student's work as hookers at the Rosewood Hotel; the entire school is funded by bribery; 99% of the guys that went to Stanford execute 99% of the corporate corruption crimes in the world; Girls at Stanford, that can't afford tuition, become Match.com hookers.

This is the epic true story of the actual bribes, money-laundering and hit-jobs that American citizens endure when they report a political corruption crime to the authorities. Famous U.S. Senators and their dirty billionaire sex-addict financiers help them to commit crimes against Democracy using the stock market as a bribery conduit. Google, Facebook, Netflix execs and California Senators hide nearly 100 billion dollars in

unjust gains in massive real estate deals. Silicon Valley's Executive Sex Cult - If you heard that "Big Tech executives and VC's have basements full of immigrant Chinese girls strung up by their ankles in their mansions in the forests of Woodside, California..." the reality is almost as bad. Jeffrey Epstein's teenage sex slaves also had handlers at Silicon Valley's Kleiner Perkins. There have been over 100 arrests of men like Jeffrey Epstein but you have not heard about them...until now. They use "modeling" outlets as global supply routes. From Victoria's Secret to Waterbury to Elite Models...these business fronts supply girls to be exploited by Google, Facebook, Tesla, Netflix and Greylock perverts.

Past students and alumni say that "Stanford University Teaches, Promotes and Protects Sociopaths and Hate". Are Stanford's "Halls of Hell" Powered By Bribes, Sex Scandals, Murders and Misogyny?

Everyone in the bay area knows that if a Match.com profile has the words: "STUDENT" & "GENEROUS" anywhere in the text, that the girls are offering sex-for-tuition. Send your hot daughter to Stanford & turn them into hookers. Match.com even has sex agents, on campus, that get a commission for getting girls to join Match.com; Rape is OK at Stanford as long as your daddy is rich or owns part of the Middle East. The Stanford deans & regents say: "Boys Will Be Boys"; Stanford provides buses that transport the sorority girls to the frat houses to get date raped & then back to the sorority houses drunk out of their minds or doped up on Ruffies & Scopalimine; There have been a number of strange murders & suicides at Stanford; Stanford students are prescribed the highest number of mental health medications of any campus in America; The land on the Stanford Campus could solve all of Silicon Valley's housing crisis; Chinese girls are sent to Stanford, by Chinese 'Wife Mills' to bag an Anglo husband then divorce him 1 year after he hits pay dirt. They are instructed to have 2 kids so the alimony upside is high. They pay a % of the money back to China; Tech Trophy Wives were invented at Stanford;

The Guardsman, The Key Club & over 50 "Final Clubs" brain-wash students into elitism & tribal exclusion of all but your fellow 'club members' from your ethnic group; Most of the oligarch families paying bribes to Stanford are engaged in the most brutal human rights violations in history. They murder people & have them cut up with a hacksaw. They run prison camps. Only an idiot would think that modern day Stanford has any remaining 'prestige' or 'credibility'. This isn't the 1800's anymore. Shut this crap campus down!; When they graduate they either go up the hill to Sandhill Road & start a venture capital clone operation or they get their frat friends on Sandhill Road to racketeer-fund their start-up or political campaign using money scammed from your parents pension funds.

They only work with their frat buddies & insiders in a tribal 'old boys club' manner; Most of the money in Stanford University bank accounts is from Foreign & Hollywood oligarchs delivered as bribes meant to get their snot-nosed brats into Stanford. Stanford bosses keep all of this covered-up & covertly fund political campaigns to grease the wheels of political corruption; they then sexually extort interns in Rosewood Hotel rooms, get the most 'trophy wife' ones pregnant, & start the cycle all over again. Stanford is the training ground for abuse, corruption & 'Bro-Crime';

The issues include: producing child suicides, racism, misogyny, child mental health threats, domestic spying, data harvesting, sex trafficking, election manipulation, tax evasion, Fusion GPS/Media Matters/ Black Cube hit jobs on competitors, censorship, contrived market monopolization, intellectual property theft, political bribery & many other social crimes! An unusually large number of their staff have been arrested for, or charged with, sex crimes, including under-age trafficking..."

NETFLIX Corruption and propaganda

See: [Streaming Was Supposed to Rescue Ailing TV Ad Business. It Hasn't...](#)

Let's face it, Netflix sucks. Netflix spies on you and sends your psychological profile, location and interests off to spies, political parties, marketing services, Google, The Silicon Valley mafia, the IRS, the DEA... pretty much anybody can see what you are doing on Netflix.

If you like to get pandered to and treated like one of the data cattle on the privacy harvesting ranch then Netflix is your Pimp!

[Netflix under fire over 'low-grade porn' scene that broke last TV taboo as fully erect penis shocks viewers](#)

Netflix pretty much works for Obama and his political gang and pushes woke mass media manipulation and gay sex social programming at you as a result. If you are a guy, Netflix really, really, really wants you to cut your penis off and call yourself a girl!

What's worse is that with so many studios refusing to license content to Netflix now, streaming services such as Disney plus, Peacock and many more are on the rise. Netflix sucks. Somehow, Netflix subscribers are left feeling like there's nothing to watch on a platform that force feeds an overabundance of content from Indian and Mexican movies to its viewers.

Every Netflix subscriber claims there's nothing above "B-list" movies being served to them on a thirteen dollar per month silver platter (and sixteen for 4k) Not to mention how unfavorable the label "Netflix originals" have become when slapped on a movie or show: "Netflix originals" is building a negative rep on par with Nickel back and Adam Sandler's series of Happy Madison productions movies.

Everyone knows that Netflix is bad now and getting worse every day. Netflix makes young adults feel the same way the price of extra guac at Chipotle does... and that is the: "I don't agree with this, but please take my money", feeling. They know they've got your money because it's too hard to say no each month because Millennials are so stupid and sheep-like.

Did we mention the increase of the monthly price? Netflix sucks. Netflix only hires Burning Man type extreme hair-dyed hipsters who have an ANTIFA-type attitude, especially if they are from Asia and will work like dogs for McDonald's type pay and conditions. People who use Amazon Prime and then go back to Netflix can really see how much Netflix sucks. They would rather set their genitals on fire than stay with Netflix.

Netflix will make you love crippled, fat, black transgendered lesbians. You will get so many of them you won't be able to stand it.

A while back Netflix destroyed its own rating system. What we mean by that is... they literally deleted it. Now, at the start of each movie we're forced to either check rotten tomatoes or risk the next 25 minutes to figure out if a show or movie is worthy of our time and attention. Netflix removed their rating system in order to hide the fact that everyone thinks their movies are absolute shit!

Netflix stole most of its streaming media technology from small inventors that it never paid. If any inventor tries to sue Netflix, Netflix just sends millions of dollars of lawyers after them so that the inventors can never get paid. It is best just to put Netflix out of business.

Netflix spent zillions of dollars making new content but the content they made turned to be the worst shit ever created. When Obama and his buddies make media to try to program you into being "woke", it ends being heartless propaganda. Seriously, Netflix spent more money making shittier content than anyone in history. It's as if Netflix was just funneling money back to Biden and Obama. Speaking of funneling money, the FBI's Peter D. Cair has been busting Netflix executives who steal big money through the Netflix stock market system.

If you use Netflix you enter a "Netflix pit" you fell into and can't get out of... Those Senators & government agency bosses were financed by, friends with, sleeping with, dating the staff of, holding stock market assets in, promised a revolving door job or government service contracts from, partying with, personal friends with, photographed at private events with, making profits by consulting for, exchanging emails with, business associates of or directed by; one of those business adversaries, or the Senators & politicians that those business adversaries pay campaign finances to, or supply political search engine manipulation services to.

Foreign news outlets in our country exhibit the widespread "criminality" and "defamation tactics" of a mostly corrupt news media landscape. The Gawker/Gizmodo/Jalopnik tabloid empire is nothing more than an organized info-crime operation backed up by offshore money-laundering through Russia and the Ukraine.

Despite widespread recognition of their deceptive conduct, fools still read these trash publications. There are massive conflicts of interest related to many news media outlets' conglomerate-ownership as well and industry figures' financial and familial links to companies, interests, and people they ostensibly report on. 'Fake news' isn't the proper term. It's the 'propaganda arm of the Silicon Valley Socialist oligarchs' in most cases. It's no different than the Chinese Communist Party [and] the propaganda they put out. It's no different than what the Soviet Union did with the old Pravda media, and, quite frankly, it's no different than how Putin controls the media today, where 95 percent of his media in Russia is propaganda for the Putin regime. It's the same thing here with The Washington Post, NY Times, CNN, Hearst publications and all of the media owned by Hollywood and Silicon Valley.

[EXPOSED: How Google and Meta funneled millions into secret lobbying effort before Congress signed bill forcing competitor TikTok to divest from its Chinese owner or be BANNED](#)

Partisan news media should be treated as such. News media outlets such as the CNN, the New York Times, and the Washington Post regularly describe themselves as "politically objective and non-partisan." In reality they are a propaganda machine for sick Silicon Valley oligarchs. The information institutions are corrupt. For example, Elon Musk is one of the most corrupt men in the world yet the socialist propaganda news media won't cover any of his crimes and corruptions in their publications because he pays political bribes to keep his dark side hidden in their media. The public should not hurt legitimate news media outlets by engaging with and speaking to corrupt propaganda operations. One should only speak with genuine news media and not reward unethical companies with their time.

A common tool Google, Facebook and Twitter use to exert control over their victims. We all use manipulation at some point in our lives, whether it be telling a little white lie to get out of a situation, or using flattery to get what we want. For some people, however, using manipulation is a way of life, and their first weapon in an arsenal of techniques to overpower their victims.

Silicon Valley's BIG TECH SEX TRAFFICKING

EXECUTIVES FROM GOOGLE, FACEBOOK, NETFLIX AND THE SANDHILL ROAD VENTURE CAPITALIST OFFICES USE SILICON VALLEY AND OTHER REGIONS AS THEIR PERSONAL HUNTING GROUNDS FOR SEX ABUSE, SEX TRAFFICKING, SEX CULTS AND DATE RAPE!

THE PUBLIC IS NOW JOINING TOGETHER TO EXPOSE THEM AND SEEK THEIR ARREST!

Corrupt political families conspire to give government funds, contracts, tax waivers, buildings, stock market profits and other insider perks to themselves and their friends. They also conspire to blockade, harm, sabotage

and black-list those who compete with them and their friends. These corrupt politicians are never prosecuted for their crimes, and can laugh in the face of those who point out their crimes, because they control the prosecution system. Their Quid Pro Quo criminal corruption is the single largest cause of the taxpayer hatred of Congress.

- These twisted deeds indicate the mind-set, moral depravity and disturbed culture of the, so-called, "Oligarchs" who control modern media.

- Silicon Valley Venture Capitalists Rape and Sex-Extort Interns.

- Silicon Valley's Greylock Partners, Kleiner Perkins, and most other VC's are rapists, sexual predators and political bribery enthusiasts and nobody ever arrests them for it...

- They Hire hookers and Rent-Boys, not for the sex, but to be able to "control another human" because they are almost all Sociopath personality types.

- They hire "clubs" to secure underage children for them because they want to have total manipulation over a helpless person because it makes these men feel more powerful.

- The Rosewood Hotel and the Four Seasons hotels in Palo Alto are riddled with \$6000.00 per night hookers, rent boys, Stanford Co-Ed "sugar babies" and Russian Mafia managed Ukrainian prostitutes. You just have to know the "code words" and hand signals to play "the game".

- Google executives killed by their hookers, black-mailed by their hookers, exposed in sex slave rings and worse...

- Huge number of Google, Netflix and Facebook senior executives are homosexual and pressure staff for sex.

- San Jose and San Francisco International Airports have a non-stop flow of European Hookers flown in by tech CEOs who got them off of "seeking arrangements.com" and "match.com" using the "code words".

- Almost every tech executive and Sandhill Road VC has been charged with spousal abuse, sex trafficking, intern sex extortion, bribing Stanford to cover up sex exploitation and worse.

- Stanford University bosses cover-up, and support, frat house sex crimes in order to keep rich daddies donating to Alumni funds.

- Basements and secret rooms in some of their Woodside and Atherton, California mansions house BDSM chambers and sex abuse lock-rooms

-See This shocking video: <https://www.invidio.us/watch?v=O13G5A5w5P0>

Per KATIE BENNER: Rachel Renock, the chief executive of Ethos, center, with her business partners, Claire Humphreys, left, and Kristen Ablamsky. Ms. Renock said they received sexist comments while seeking financing. Credit Sasha Maslov for The New York Times

their stories came out slowly, even hesitantly, at first. Then in a rush.

One female entrepreneur recounted how she had been propositioned by a Silicon Valley venture capitalist while seeking a job with him, which she did not land after rebuffing him. Another showed the increasingly suggestive messages she had received from a start-up investor. And one chief executive described how she had faced numerous sexist comments from an investor while raising money for her online community website.

What happened afterward was often just as disturbing, the women told *The New York Times*. Many times, the investors' firms and colleagues ignored or played down what had happened when the situations were brought to their attention. Saying anything, the women were warned, might lead to ostracism.

Now some of these female entrepreneurs have decided to take that risk. More than two dozen women in the technology start-up industry spoke to *The Times* in recent days about being sexually harassed. Ten of them named the investors involved, often providing corroborating messages and emails, and pointed to high-profile venture capitalists such as Chris Sacca of Lowercase Capital and Dave McClure of 500 Startups.

The disclosures came after the tech news site *The Information* reported that female entrepreneurs had been preyed upon by a venture capitalist, Justin Caldbeck of Binary Capital. The new accounts underscore how sexual harassment in the tech start-up ecosystem goes beyond one firm and is pervasive and ingrained. Now their speaking out suggests a cultural shift in Silicon Valley, where such predatory behavior had often been murmured about but rarely exposed.

The tech industry has long suffered a gender imbalance, with companies such as Google and Facebook acknowledging how few women were in their ranks. Some female engineers have started to speak out on the issue, including a former Uber engineer who detailed a pattern of sexual harassment at the company, setting off internal investigations that spurred the resignation in June of Uber's chief executive, Travis Kalanick.

Most recently, the revelations about Mr. Caldbeck of Binary Capital have triggered an outcry. The investor has been accused of sexually harassing entrepreneurs while he worked at three different venture firms in the past seven years, often in meetings in which the women were presenting their companies to him.

Several of Silicon Valley's top venture capitalists and technologists, including Reid Hoffman, a founder of LinkedIn, condemned Mr. Caldbeck's behavior last week and called for investors to sign a "decency pledge." Binary has since collapsed, with Mr. Caldbeck leaving the firm and investors pulling money out of its funds.

The chain of events has emboldened more women to talk publicly about the treatment they said they had endured from tech investors.

"Female entrepreneurs are a critical part of the fabric of Silicon Valley," said Katrina Lake, founder and chief executive of the online clothing start-up Stitch Fix, who was one of the women targeted by Mr. Caldbeck. "It's important to expose the type of behavior that's been reported in the last few weeks, so the community can recognize and address these problems."

The women's experiences help explain why the venture capital and start-up ecosystem — which underpins the tech industry and has spawned companies such as Google, Facebook and Amazon — has been so lopsided in terms of gender.

Most venture capitalists and entrepreneurs are men, with female entrepreneurs receiving \$1.5 billion in funding last year versus \$58.2 billion for men, according to the data firm PitchBook. Many of the investors hold outsize power, since entrepreneurs need their money to turn ideas and innovations into a business. And because the venture industry operates with few disclosure requirements, people have kept silent about investors who cross the lines with entrepreneurs.

Some venture capitalists' abuse of power has come to light in recent years. In 2015, Ellen Pao took her former employer, the prestigious venture firm Kleiner Perkins Caufield & Byers, to trial for allegations of gender discrimination, leveling accusations of professional retaliation after spurned sexual advances. Ms. Pao lost the case, but it sparked a debate about whether women in tech should publicly call out unequal treatment.

“Having had several women come out earlier, including Ellen Pao and me, most likely paved the way and primed the industry that these things indeed happen,” said Gesche Haas, an entrepreneur who said she was propositioned for sex by an investor, Pavel Curda, in 2014. Mr. Curda has since apologized.

Some of the entrepreneurs who spoke with The Times said they were often touched without permission by investors or advisers.

At a mostly male tech gathering in Las Vegas in 2009, Susan Wu, an entrepreneur and investor, said that Mr. Sacca, an investor and former Google executive, touched her face without her consent in a way that made her uncomfortable. Ms. Wu said she was also propositioned by Mr. Caldbeck while fund-raising in 2010 and worked hard to avoid him later when they crossed paths.

“There is such a massive imbalance of power that women in the industry often end up in distressing situations,” Ms. Wu said. See more at: <https://www.forbes.com/sites/allysonkapin/2020/09/15/sexual-harassment-in-silicon-valley-still-rampant-as-ever/>

SUMMARIES

WHAT DOES THIS EVIDENCE, & THE FILED LAW ENFORCEMENT DATA, PROVE? Report To Congress – Feb. 2023

- That a business Cartel of men operate a racketeering operation, as a criminal “*enterprise*”, between Silicon Valley & Washington – DC. This Cartel manipulates elections, public news & taxpayer funding policies via organized collusion in violation of RICO, anti-trust & other laws and regulations.
- That US. Government officials had top-level, command-control-management-operations and financing authority over all of the crimes, deeds, actions, attacks, reprisals, schemes and enforcement avoidance described herein and thus bear the liability for the harms to Plaintiffs.
- That this cartel is comprised of warped, megalomaniac, sexually addicted & abusive people, many of whom met and conspired at Stanford University, who protect each other with billions of dollars of cover-ups involving the bribery of Senators with insider trading stock & covert, ‘Dark Money’ campaign financing.
- That this cartel receives hundreds of billions of dollars of profits from their crimes, much of it re-routed from the US. Treasury. Their lust for power & money causes them to stoop to extortion, black-lists, government funding blockades & other crimes, in order to gather their ill-gotten gains at the expense of the public.
- That FINCEN, Interpol, The SEC, ICIJ.org, and our investigators, have tracked all of the stock market payola accounts, bribes and payola between all of the public officials, which any court may ask to see.
- That these suspects, who are mostly White House officials, federal agency bosses & members of Congress, defrauded the victims out of tens of millions of dollars via their crony-corruption, insider-trading, stock market scams. They then ordered attacks on the victims when the victims told the FBI, Congress & FTC about the crimes.
- That the Suspects refuse to allow a jury trial, they have blockaded their victims legal rights, they run reprisal attacks using government agencies & taxpayer resources & refuse to pay earned benefits & compensation in vendetta for getting their corruption exposed. Victims have worked in related government programs & known perpetrators intimately for decades. The victims, and expert witnesses can swear, warrant and certify to the veracity of these assertions in front of a Jury and/or Congress.
- That the investors of Google, Facebook, Twitter, Amazon, Ebay, Netflix & a related set of Silicon Valley monopolies conspire in these efforts to manipulate the stock market, lie to advertisers & bias all digital news & information, globally, to push their selfish ideologies.
- That Senators Pelosi, Feinstein, Boxer, Harris, Reid have an active criminal participation in, & benefit from, these efforts & that they, in fact, along with Steven Chu had illicit dealings with offshore financiers & they are paid with insider trading stock, revolving door jobs, & other covert payola.
- That Google, Facebook & Twitter have rigged & manipulated U.S. elections since Barack Obama was elected.

- That the U.S. Department of Energy & the U.S. Department of Justice were used as an illicit slush-fund by the Obama Administration to pay campaign financiers & to sabotage their competitors.
- That government officials hired &/or financed &/or directed deadly economic & character assassination hit jobs against those who reported these crimes using attack services from IN-Q-Tel, Gawker Media, Jalopnik, Gizmodo Media, K2 Intelligence, WikiStrat , Podesta Group, Fusion GPS, Google, YouTube, Alphabet, Facebook, Twitter, Think Progress , Media Matters, Black Cube, Mossad, Correct The Record, Stratfor , ShareBlue, Wikileaks, Cambridge Analytica; the owners of whom have been proven to have accepted compensation for such hatchet job services.
- That the “*The PayPal Mafia*” is an actual Cosa Nostra-like operation that exploits sex cults, prostitutes, gay rent boys & market rigging as illicitly as the old Chicago “Mob”.
- That Tesla Motors is a criminal Dark Money front that “cooks the books”, lies about safety issues & runs sabotage campaigns through Musk’s massive use of Russian bots, trolls, stock shills & his covert manipulations with Google’s Larry Page, Sergey Brin, Kent Walker, David Drummond & Eric Schmidt.
- That the evidence proves that agency officials play a game of “pass-around” to other agencies when this matter is reported to them in order to stall, delay, stone-wall, obfuscate, cover-up & hide the political embarrassment of these crimes.
- That the evidence proves that Department of Energy & White House officials lied through their teeth, hundreds of times, in order to benefit their crony friends & campaign financiers & sabotage their competitors. It was proven in thousands of news reports, documentaries, FBI reports, Congressional investigations, leaked documents, insider reports & our own eye-witness testimony.
- That the evidence proves the assertions of corruption, stock-market manipulation, monopoly, industry gate-keeping, character assassination, revolving-door job payola at Silicon Valley tech companies, tax evasion & more.
- The evidence proves that the government reviewers and government officials involved with victims applications were insider trading in the stock market against the victims. They were getting paid to destroy the victim’s financial future with stock market perks and payola from victim’s competitors.
- That it is proved, via investigators & law enforcement peers, that no investigator can find any past reviewers of this case who were not hand-picked by the “Cartel”. Victims, and news media, have asked Congress to provide any evidence that this case has been fairly reviewed in the past, without bias.
- FBI-class associates have not found a single entity in these case reviews or determinations who was not either: financed by, friends, with, sleeping with, dating the staff of, holding stock market assets in, promised a revolving door job or government service contracts from, partying with, personal friends with, photographed at private events with, exchanging emails with, business associates of or directed by; one of those business adversaries, or the Senators & Department of Energy politicians that those business adversaries pay campaign finances to, or supply political digital services to.
- That, from 2008 forward, The White House & the Department of Energy were controlled by the Silicon Valley tech

oligarchs! That is a violation of the law, the Constitution & the American Way & we have proved that.

- That Elon Musk is a “mobster” that rigs politics, & the stock market, & lies about everything. He is protected by hundreds of lawyers, investment bankers, PR hypsters & lobbyist/operatives & hundreds of public officials who get paid in stock market perk-bribes & other payola.

- That rare earth mining is a six trillion dollar political corruption scandal that California politicians cover-up because they own the stock in them. That lithium batteries are deadly, explosive, toxic fume causing, genocide causing, child labor causing, devices owned, in part, by California politicians!

- That the main way political bribes are paid, these days, is with hidden stock market assets!

- That tech oligarchs & California senators hire character assassins & hit job attackers to harm citizens who speak out!

- That Solyndra was raided by the FBI and the numbers and facts uncovered were tracked back to White Presidential campaign financiers. U.S. taxpayers lost over \$500M, on Solyndra alone. After receiving a massive amount of federal dollars, the company mysteriously disappeared. Solyndra was using indium mined from Afghanistan. Tesla & Solyndra sit on the same plot of land which Senator Feinstein’s family owns interests in. Tesla was using lithium mined from Afghanistan. Ener1 was using lithium mined from Afghanistan. After receiving a massive amount of federal dollars, the company mysteriously disappeared. U.S. taxpayers have, to date, lost over \$6 Trillion dollars on Afghan war mismanagement. Senator Dianne Feinstein lobbied for government funds to be given to Tesla & Solyndra. Her family held HR, land contract, construction, stock & other upside assets in both of those companies. Fisker was using lithium mined from Afghanistan. After receiving a massive amount of federal dollars, the company mysteriously disappeared. Abound Solar was using indium mined from Afghanistan. After receiving a massive amount of federal dollars, the company mysteriously disappeared. The U.S. Secretary of Energy had personal, financial & political relationships with each of the companies who were given federal cash that he controlled. He sabotaged every single other applicant, who, coincidentally, were the competitors to his friends who he awarded the taxpayer cash to.

- That this evidence, & the associated hard drives & witness testimony, will stand up as sworn, certified, warranted testimony in any federal jury trial, grand jury hearing, RICO Racketeering corruption trial &/or live televised Congressional hearing.

- That, given equally resourced, & financed, legal support & proper security protection, many hundreds of person's are willing to swear & warrant to the veracity of these assertions.

- That New York State, California State & Washington, DC elected officials, in particular U.S. Senators, did criminalize the domestic public policy system in order to acquire personal profits & monopolize industry markets for themselves & their friends.

- That the investment firms of Goldman Sachs; Kleiner Perkins; Draper Fisher Jurvetson; Greylock Capital; & other venture firms participated in these schemes in violation of organized crime laws.

- That U.S. Senators Reid, Feinstein, Harris, Boxer, Pelosi, & other Senators, participated in these schemes in

violation of organized crime laws.

- That U.S. Attorney General Holder, Harris, Schniederman, & other Attorney Generals, participated in these schemes in violation of organized crime laws.

- That certain senior law enforcement officials received full & complete crime reports & law violations disclosures about these crimes & stalled investigations, covered-up the crimes & tampered with evidence in order to protect their political friends & profit monetarily.

- That the members of this technology cartel "Mafia" group are selected for their social, physical & family similarities which include the tendency to engage in sociopath behavior, rape, sex abuse & sex-extortion, misogyny, tax evasion, money laundering, real estate fraud, racism, bribery, patent theft & other deviant behavior.

- That Google's VC's & executives, who are part of this cartel, plan & manually run election manipulation programs, privacy abuse, search engine rigging & militaristic information manipulation for personal profiteering at the expense of the public. Per:

- That the Obama Administration used the U.S. Department of Energy as a campaign financier payola slush fund.

- That U.S. elected political officials hire & manage third party services to run reprisal campaigns against taxpayers & that those character assassination providers include: IN-Q-Tel, Think Progress, Black Cube, Podesta Group, EDS, Stratfor, Fusion GPS, IN-Q-Tel, Media Matters, Gawker Media, Gizmodo Media, Syd Blumenthal, & other attack services which are illicitly compensated with laundered taxpayer resources.

- That the bribes & profiteering conduits for this scam are ignored by compromised FEC bosses & include: Dark Money fronts; family trust floats; shell corporation layering; insider trading in tech companies; revolving door jobs at Netflix, Google, etc; prostitutes; sports suites; political campaign search engine rigging, bot attacks & other illicit payola.

Fund by the Obama Administration to pay campaign financiers & to sabotage their competitors.

- That the AI forensics of the FBI, Clearview, Yandex, NSA & thousands of other robotic investigation tools have been chugging away for years accruing all of the key connections, bank accounts, financial records, phone calls, payments to hookers & more. The journalists have produced thousands of hours of proof videos & tens of millions of pages of news reports. We have acquired vast amounts of eye-witness proof. Congress has published a huge number of reports proving our charges. The FBI, SEC & FTC have huge numbers of reports proving our charges. Millions of pages of leaked documents prove the charges. Your own staff whistle-blowers prove the charges!

- Victims demand Government-provided legal counsel, a jury trial & compensation for damages, expenses, back-salaries & monies owed. To be paid by the Defendants.

- Victims demand an end to the use of SSA, HUD, DOE, IRS & other government agencies for political reprisal vendettas & demand full retroactive payments of all stalled benefits, rights & resources that were with-held to punish victims for whistle-blowing.

- Victims demand the arrest & prosecution of the attackers. The attackers have been identified, by name, to the FBI, DOJ, (Because the crimes cross state lines) FTC, SEC, & other enforcement entities. We have also provided their

names (Including Denton, Covert, George, Darbyshire, Podesta, In-Q-Tel, etc.) to the CIA, NSA, Interpol, DIA & related international agencies because the crimes involve international trafficking, money-laundering, tax evasion, bribery & related criminality. We have demanded that those agencies investigate, place under surveillance, interview & forensically trace each attacker back to the command-&-control top-level financier of their attacks. The evidence in the identification of the attacker's compensation providers contains absolute proof of the RICO & Anti-Trust law violating Cartel operations. Nobody else in the world suffered these attacks, by these attackers, who were all financed by, & in partnership with, the same entity. Those forensic connections, from attackers-to-their bosses, expose all of the criminals in the Cartel!

These facts are sworn, warranted and certified to be true before the United States Congress and the people of The United States.

MISCELLANEOUS CASE INVESTIGATION NOTES

The IRS, and hordes of other government agencies have been caught and proven, IN COURT, to target and attack people for presumed political differences.

Why should we assume that the Social Security Administration is not ALSO doing this too to harm citizens who speak out?

The Lois Lerner IRS attacks took many years to resolve. In an unprecedented victorious conclusion to a four year-long legal battle against the IRS, the bureaucratic agency admitted in federal court that it wrongfully targeted citizens, during the Obama Administration, because of their political viewpoints and issued an apology to those people for doing so.

In addition, the IRS is consenting to a court order that would prohibit it from ever engaging in this form of unconstitutional discrimination in the future.

In a proposed Consent Order filed with the Court, the IRS has apologized for its treatment of U.S. citizens including organizations from 20 states that applied for 501(c)(3) and (c)(4) tax-exempt status with the IRS between 2009 and 2012 -- during the tax-exempt determinations process. Crucially, following years of denial by the IRS and blame-shifting by IRS officials, the agency now expressly admits that its treatment of our clients was wrong and a total violation of our Democracy...

As set forth in the proposed Order:

“The IRS admits that its treatment of Plaintiffs during the tax-exempt determinations process, including screening their applications based on their names or policy positions, subjecting those applications to heightened scrutiny and inordinate delays, and demanding of some Plaintiffs’ information that TIGTA determined was unnecessary to the agency’s determination of their tax-exempt status, was wrong. For such treatment, the IRS expresses its sincere apology.”

Throughout litigation of this case, activists have remained committed to protecting the rights of the public who faced unlawful and discriminatory action by the IRS and other agencies. The objective from the very beginning has been to hold agencies accountable for corrupt practices.

This Consent Order represents a historic victory for the public and sends the unequivocal message that a government agency’s targeting of citizens organizations, or any organization, on the basis of political viewpoints, will never be tolerated and that revenge will be swift and vast.

The Order will put an end, once and for all, to the abhorrent practices utilized against citizens, as the agreement includes the IRS’s express acknowledgment of – and apology for – its wrongful treatment of the public. While this agreement is designed to prevent any such practices from occurring again, rest assured that all public interest lawyers will remain vigilant to ensure that the IRS, SSA, DOJ or SEC does not resort to such tactics in the future.

Per detailed reports, in March of 2012 lawyers began being contacted by literally dozens of citizens and groups who were being harassed by the Obama IRS after submitting applications for tax-exempt status. Their tax-exempt applications were held up for years (over seven years in some cases), and they began receiving obtrusive and unconstitutional requests for donor and member information. That began a now more than five and a half year fight

with the burgeoning bureaucracy at the IRS. Then on May 10, 2013, Lois Lerner, the then head of the IRS Tax Exempt Organizations Division, publicly implicated the IRS in one of the worst political targeting scandals of the century.

This is an extraordinary victory against government agency abuse. It sends a powerful warning to the deep state bureaucracy that it will not be allowed to violate the Constitution in order to silence and shut down the whistle-blowers.

In addition to the IRS's admissions of and apology for its wrongful conduct, the Consent Order would specifically award Plaintiffs the following:

- A declaration by the Court that it is wrong to apply the United States tax code to any tax-exempt applicant or entity based solely on such entity's name, any lawful positions it espouses on any issues, or its associations or perceived associations with a particular political movement, position or viewpoint;
- A declaration by the Court that any action or inaction taken by the IRS must be applied evenhandedly and not based solely on a tax-exempt applicant or entity's name, political viewpoint, or associations or perceived associations with a particular political movement, position or viewpoint; and
- A declaration by the Court that discrimination on the basis of political viewpoint in administering the United States tax code violates fundamental First Amendment rights. Disparate treatment of taxpayers based solely on the taxpayers' names, any lawful positions the taxpayers espouse on any issues, or the taxpayers' associations or perceived associations with a particular political movement, position or viewpoint is unlawful.

In the Order, the IRS has also agreed that (unless expressly required by law) certain actions against the Plaintiffs—i.e. the sharing, dissemination, or other use of information unnecessarily obtained by the IRS during the determinations process (such as donor names, the names of volunteers, political affiliations of an organization's officers, etc.)—would be unlawful. In addition, the IRS promises not to take any retaliatory action against our clients for exposing the targeting scheme.

Finally, and of crucial significance, the IRS admits it targeted persons and groups based on their viewpoints (i.e., "policy positions") and that such viewpoint discrimination violates fundamental First Amendment rights. This is the first time the IRS has admitted that its targeting scheme was not just "inappropriate" – as TIGTA found – but, as alleged, blatantly unconstitutional.

To ensure consistency and uniformity within the agency's operations going forward, the IRS is required, pursuant to the Order, to inform all employees within the Exempt Organizations Division, as well as the Commissioners and Deputy Commissioners within other divisions, of the Order's terms.

This Order not only validates allegations about their treatment at the hands of the corrupt Obama-era IRS but also provides important assurances to the American public that the agency understands its obligation to refrain from further such discriminatory conduct. As Attorney General Sessions acknowledged in this regard, "[t]here is no excuse for [the IRS's] conduct," as it is "without question" that the First Amendment prohibits the conduct that occurred here, i.e., subjecting American citizens to disparate treatment "based solely on their viewpoint or ideology." Sessions further confirmed his Department's commitment to ensuring that the "abuse of power" in which the IRS engaged here "will not be tolerated."

It is impossible to overstate the importance of this victory. This marks a years-long fight for justice in defense of the constitutional rights of the public.

This is an extraordinary victory against abuse of power and corruption.

It sends a powerful warning to the deep state bureaucracy that it will not be allowed to violate the Constitution and manipulate the IRS, SSA and other agencies in order to silence and shut down those who speak out about political corruption crimes.

In the wake of Wisconsin Watchdog's investigation into SSA staff allegations of incompetence, misconduct, and retaliation in Social Security disability appeals offices, several employees have taken their complaints to a Senate committee led by Wisconsin Sen. Ron Johnson.

An official with knowledge of the complaints said the Senate Homeland Security and Governmental Affairs Committee, chaired by the Oshkosh Republican, and has received emails and other contacts from "certain people" inside the Social Security Administration's Office of Disability Adjudication and Review.

The initial complaints came from an employee inside the Milwaukee office following Wisconsin Watchdog's opening investigative report that found some claimants waiting more than 1,000 days for an appeals decision on their disability benefits claim.

Following Wednesday's story of a whistleblower in the Madison ODAR office, the committee has received more specific complaints about retaliation against employees, the source said.

Committee staff members sent the latest Watchdog piece to SSA administrators hoping they will "cooperate," the source said. To date, the agency has been less than cooperative.

"This is an ongoing process, and they are not always as forthcoming as we'd like them to be," the source said. "Hopefully with your continued reporting, this is an issue they can't duck."

A Senate committee member said officials there are working with the Office of Special Counsel on "multiple whistleblower retaliation claims." The committee continues to request information from the SSA.

The whistleblower in the Madison office claims management retaliated against her after she was called to testify in a misconduct case. The incident involved "inappropriate behavior" by an administrative law judge, she said.

"They are so corrupt. It's absolutely horrible," said the woman, a lead case technician in the Madison Office of Disability Adjudication and Review.

She spoke on condition of anonymity, fearing more retribution from her supervisors. While she said recounting her particular experiences will more than likely betray her identity anyway, the ODAR case worker insisted she has had enough.

"I'm at point where they don't care about me, I don't see why I'm protecting them. This is my last resort," she said. "I want to do my work without fear of retaliation."

She said she has contacted the Senate committee.

"I forwarded my information to them and I got an email back from them. They said people are coming out of the woodwork with their complaints (about ODAR) following your story," the whistle-blower said.

Ronald Klym, a long-time senior legal assistant in the Milwaukee ODAR office, alleges he has been retaliated against by supervisors for going public with his charges of incompetence and misconduct in the agency.

The federal employee, who has worked for SSA for 16 years, provided Wisconsin Watchdog with documents showing extremely long wait times for claimants appealing their denied applications for benefits.

Doug Nguyen, SSA regional spokesman, in a previous story said the agency acknowledges that Milwaukee ODAR has a "high average processing time for disability appeal hearings, and we are working to address the issue."

Beyond the delays is what Klym calls the “shell game,” the wholesale transferring of cases to other parts of the country by administrators to make the Milwaukee office’s numbers look better than they are.

The Madison office whistle-blower confirmed Klym’s allegations, saying at one point she saw 2,000 cases from the Milwaukee office handed off to the Oak Brook operation.

There are over 10,000 SSA disability manipulation charges against SSA executives and staff....”

WHAT DOES THE FBI NEED TO INVESTIGATE AND REPORT TO THE PUBLIC ABOUT?

Ever since 2004, a group of insiders in Department of Energy programs have warned that at the very moment the United States will be ramping up electric vehicle development manufacturers will be running up against the weakest link in the supply chain — a shortage of battery materials combined with a scheme to put the few sources of battery materials under the monopoly control of Silicon Valley tech oligarchs who hate hydrogen fuel cells because they obsolete batteries. The financiers of Presidential political campaigns own and control all of the TRILLIONS of dollars of lithium and rare earth mining in the world. U.S. Energy Secretary's Jennifer Granholm and Steven Chu work for those tech oligarchs and own parts of their companies. They only shovel money to their friends. They hate the perfectly-operational fuel cell cars that Hyundai, Kia, Honda and Toyota sell because fuel cell cars don't explode and set their owners on fire, like Elon Musk's lithium batteries do. Fuel Cell cars can go way further on less energy and they weigh a huge amount less.

Why it matters: The bottleneck puts the United States at a major disadvantage to China, which controls most of the world's battery minerals mining and processing.

- Without further action, the U.S. risks becoming as dependent on imported batteries as it was on foreign oil — or repeating mistakes of the past with solar panels or smartphones which are now made primarily overseas.

The big picture: Amid tougher emissions regulations worldwide, automakers are racing to add more EVs to their lineup, while phasing out internal combustion engines.

- Planned EV investments jumped 41% in the past year, to \$330 billion globally by 2025, according to AlixPartners.
- In the U.S., President Biden has made vehicle electrification a core element of his clean energy strategy.

Those EV goals are at risk, however, without a secure supply of advanced lithium ion batteries — and the raw materials like lithium, nickel, cobalt and graphite that go into them.

The state of play: The U.S. recently laid out a national blueprint for lithium batteries, which aims to establish a secure supply chain for battery materials and technology by 2030 in ways which only benefit DNC insiders.

- "It will take a strategic investment by the federal government, in concert with industry, to stand up more domestic manufacturing capability," U.S. Rep. Mike Doyle (D-Penn.) said at the DOE roundtable.
- Compared to other countries which invest in manufacturing through public-private partnerships, "we are bringing a knife to a gun fight," said U.S. Energy Secretary Jennifer Granholm.

What's happening: The Energy Department said June 14 it would channel \$200 million in funding over the next five years to U.S. national labs to support EV- and battery-related research.

- The DOE also said that battery projects can qualify to borrow from the \$17 billion available under the Advanced Technology Vehicle Manufacturing loan program, created during the Obama era.

A lawsuit filed by Louisiana shows that an obscure nonprofit organization operated as part of a larger nonprofit founded and largely funded by Silicon Valley billionaire Pierre Omidyar attempted to manipulate local election

officials to apply for grants from the Mark Zuckerberg-funded Center for Technology and Civic Life (CTCL) where those officials were "hard wired" to get the money as bribes to put DNC candidates in office who would funnel taxpayer cash back to tech billionaires in Silicon Valley.

They filed the lawsuit on behalf of the State of Louisiana against CTCL, New Venture Fund DBA Center for Secure and Modern Elections, Dawn Maisel Cole, a private individual; and Full Circle Strategies LLC, "to prevent the injection of unregulated private money into the Louisiana election system." But these Silicon Valley oligarchs are doing this in every state, organized by David Plouffe, Steve Westly, Steve Spinner, John Podesta and related parties.

The lawsuit alleged:

- The New Venture Fund, operating in Louisiana under the trade name Center for Secure and Modern Elections (CSME), partnered with CTCL to solicit applications and information from Louisiana officials in connection with proposed grants [from CTCL as part of the \$350 million in grants made nationwide in the 2020 election].
- CTCL and CSME worked their grant scheme in the State of Louisiana through a lobbyist by the name of Dawn Maisel Cole, owner and operator of Full Circle Strategies, LLC, as their Louisiana representative and agent to target registrars of voters, clerks of court, and local election officials.
- The scheme targeted 13 parishes, some to receive contributions of more than \$500,000, accompanied by a request for detailed information about the operations, conduct and expenses of the registrars/clerk's office.
- Ms. Cole directly solicited registrars and clerks of courts to accept contributions from CTCL and New Venture Fund for the operation of their respective offices.

These practices were prohibited, the lawsuit argued, because:

...private contributions to local election officials are unlawful and contrary to the methods for election funding established by law in the State of Louisiana, and such contributions by these defendants should be declared illegal and permanently enjoined.

The lawsuit was significant in part because it highlighted the role an obscure organization called the Center for Secure and Modern Elections, which describes itself as a "fiscally sponsored project of the New Venture Fund," played in advancing the efforts of the Mark Zuckerberg-funded CTCL in privately funding the administration of the 2020 election.

The New Venture Fund, in turn, is part of Democracy Fund, whose website says it is "an independent and nonpartisan, private foundation that confronts deep-rooted challenges in American democracy while defending against new threats."

Pierre Omidyar, a Silicon Valley billionaire who founded Ebay, also founded and financially backs Democracy Fund:

Democracy Fund has committed more than \$150 million to support a healthy democracy. Established by philanthropist and eBay founder Pierre Omidyar in 2011 and incubated inside Omidyar Network, Democracy Fund launched as an independent foundation in July 2014 and is a part of The Omidyar Group.

Civitas, a well-connected public affairs firm founded and staffed by Democrat activists, counts CSME among its clients, but its website is unclear what services it provides the group.

According to the Form 990 Democracy Fund filed for 2019, the organization provided a \$275,000 grant to CTCL that year.

As was reported:

Private funding of election administration was virtually unknown in the American political system until the 2020 presidential election, when Facebook CEO and founder Mark Zuckerberg and his wife Priscilla Chan donated \$350 million to the Center for Technology and Civic Life (CTCL), which provided funding to county and municipal governments around the country for election administration, and \$69 million to the Center for Election Innovation and Research (CEIR), which provided funding to 23 state governments, primarily through the Secretary of State's office, also for the funding of election administration.

In late October, a Louisiana judge ruled against Landry and in favor of the defendants, as *The Advocate* reported: Judge Lewis Pitman, of the 16th Judicial District in St. Martin Parish, ruled against Landry in the lawsuit last week. Landry said in an interview he would appeal the ruling. . .

In Louisiana, the clerks of court and registrars of voters had applied for around \$7.8 million [in CTCL grant money], which the local officials said they would use to help pay for additional costs brought on by the pandemic. That includes equipment, personal protective gear and wages for election workers staffing early voting sites for longer hours.

The local officials have since backed off the grant money and won't be tapping into the funds before the Nov. 3 election. Early voting is already underway.

According to the CTCL website, not a single Louisiana parish or city ended up with funding from CTCL in the November 2020 election.

But the previously obscured relationship between CTCL and CSME highlighted in the October 2020 lawsuit by Louisiana Attorney General Landry suggests that the relationship between these two groups may have extended too many states beyond Louisiana.

The two groups, for instance, delivered a joint presentation on election administration issues in January 2019. Scott Seeborg, the CSME contact in that January 2019 presentation, was hired in April 2020 as the Pennsylvania State Director for All Voting is Local, a non-profit whose mission statement says, "We fight to dismantle barriers to the ballot well before the next election, so that every voter can cast a ballot that counts."

According to its website, "All Voting is Local Action is a campaign of The Leadership Conference on Civil and Human Rights. We fight for the right to vote in eight states with distinct assaults on the right to vote."

Those eight states are Georgia, Arizona, Florida, Pennsylvania, Ohio, Wisconsin, Nevada, and Michigan.

The Leadership Conference on Civil and Human Rights website states:

The Leadership Conference's founders came together in 1950 out of the belief that the fight for civil rights could not be won by one group alone, but needed to be waged in coalition.

Our members — which have grown from 30 civil and human rights organizations at our founding to more than 200 today — differ in size, scope, and structure. But what transcends our differences and unites The Leadership Conference coalition is our enduring common purpose: full equality for all.

That common purpose gave our leaders the wisdom to see that civil rights are women's rights and LGBTQ rights and immigrant rights and workers' rights and disability rights and human rights. That common purpose is our coalition's inheritance. It is a living legacy that binds us together — in cause and community.

According to the website of the Leadership Conference Education Fund, “All Voting Is Local [is] housed within Access Democracy, an incubated project of The Leadership Conference Education Fund, [and] fights to protect and expand the right to vote for every American.”

Investigators will explore the relationship between CTCL, CSME, All Voting is Local and the Silicon Valley Cartel's national election manipulations.

Tesla and Lying Elon Musk Asked Chinese Government to Help Censor Social Media Posts Critical Of Musk

We have been tracking Elon Musk's fading relationship with the Chinese Communist Party for the better part of the last 18 months. And while we can barely guess what the temperature of the ever-changing relationship is today, one thing seems to be certain: Musk and the Chinese government are growing closer.

And for proof of that, look no further than a new Bloomberg BusinessWeek article profiling Elon Musk's struggles in China. While the content of the article isn't entirely new - our readers are likely very familiar with the story - one portion of the report was stunning: Musk, in true CCP form, reportedly asked the Chinese government to censor the company's critics.

In speaking about how Tesla is trying to create relationships with journalists in China, Bloomberg buried the lede in dropping this bomb:

Previously focused on state-run media, Tesla is now trying to build relationships with auto-industry publications and influencers on platforms such as Weibo and WeChat, for example by inviting them on factory tours, and conducting group “discussion sessions” with policymakers, consumers, and media outlets. According to people familiar with the matter, it's also complained to the government over what it sees as unwarranted attacks on social media, and asked Beijing to use its censorship powers to block some of the posts.

It appears to be more proof positive not only that Musk is working closely with the CCP, but also that Musk may be adopting their tactics for "holding the narrative together".

Recall, we were first, with the help of well-known short seller Montana Skeptic to ask in April of 2020 whether or not Musk risked becoming a Chinese asset, due to how much of a necessity China was becoming to Tesla's business operations.

Things were mostly quiet until the beginning of 2021, when in January, Musk called the Chinese government "more responsible" to its citizens than the U.S. government. In March we noted how Musk continued to kiss the ass of the CCP, singing the praises of the country and its government.

Then, in April 2021, a spat emerged between Musk and the CCP, supposedly after a protestor at the Shanghai Auto Show in April "went viral" after standing on top of a Tesla vehicle and decrying the car's brakes. This led to intense shaming by Chinese media, who called Tesla's handling of the situation a "blunder" and suggested it could "inflict serious damage" on Tesla with the Chinese market.

Since then, we noted that the Chinese government still didn't seem amused by Musk until May of this year, when Musk made a public about-face on Bitcoin and was then immediately praised by China's state owned Global Times. In fact, the Global Times then published a piece stating that "work at Tesla's Shanghai Gigafactory is going smoothly," just days after it was reported that Tesla was halting its expansion in China, seen as key to its plans to export from its Asia headquarters.

As of July, deliveries in China have picked back up and Musk is back to his old self, praising China, even in response to Chinese state-owned media:

In case anyone was wondering who is pulling the strings: <https://t.co/9WAAkwI1PA>

— Quoth the Raven (@QTRResearch) July 1, 2021

Recall, our initial April 2020 report on China and Musk referenced Montana Skeptic's blog called "Tesla's Transformation Into A Chinese Company Seems Unstoppable", which sought to critically examine why the company's Shanghai factory could be a negative for Tesla, how Tesla's China operation could ultimately compete with Fremont and what the Chinese may ultimately gain from having Musk as an ally.

The article first addressed the questions of:

- Who calls the shots at Tesla Shanghai?
- What are the interests of the Chinese leadership?
- Whom does the Shanghai factory actually benefit?
- How will Shanghai affect Tesla's operations elsewhere?
- When will Tesla's security filings reflect the economic reality?

And now it looks like the mainstream media is getting around to asking these very same questions. We can't wait for the answers...

Nancy and Paul Pelosi Making Millions In Crooked Payola Stock Trades in Companies She Actively Regulates - Stock Tips As Bribes

BIG TECH'S ORGANIZED POLITICAL CORRUPTION OPERATION

Most politicians, today, go into politics in order to scam money via bribes and payola. Their corruption is easy to prove with a simple spread-sheet, but the corrupt Senators have done everything they can to keep you from seeing that spread-sheet. If you saw the spread-sheet that shows all of the covert family bank accounts, fake trust funds, shell companies and stock market accounts for Dianne Feinstein, Harry Reid, Nancy Pelosi, etc.; you could easily see how they only get a salary of \$190K per year but put hundreds of millions of dirty dollars in their accounts. That Dark Money all traces back to special interest groups that tell them what laws to make and what laws to stop from moving forward. Forensic accountants at the GAO, FBI or SEC can pop out the latest update on any given day...BUT, These Senators have "rules" that delay investigations against themselves. Also, as we all saw from the Comey case: Corrupt Senators can even tell the head of the FBI who to NOT investigate!

The 2008 and 2021 "Stimulus Funds" were just scams cooked up by politicians for them to skim stock market pump-and-dump profits off of and grab personal payola.

As an analogy: If you wanted to plan one of the largest crimes in history, you could use street 'Stop Signs', for example.

You know that the government pays for all of the stop signs. You could have your friends buy all of the stop sign pole factories, stop sign bolt factories and red reflective paint factories in advance. You then bribe your politicians and fake news outlets to proclaim that there is a global crisis of people running stop signs and killing school children. You manufacture this "stop sign running crisis" that will "kill all of the children within 15 years" if we don't stop it. You claim that the stop sign running is "man made" and caused by your political opponents because they make whiskey and that causes stop sign running. You get your politicians to create a giant "stimulus" that ends up almost exclusively giving all of the stimulus money to you and your corrupt crony friends who own all of the stop sign pole factories, stop sign bolt factories and red reflective paint factories.

The people who make yellow warning lights and other traffic control devices are cut-out of all those funds because they are competitors to the insiders who own all of the stop sign pole factories, stop sign bolt factories and red reflective paint factories.

In the pretend "stimulus" the government treasury funds are used to payola your friends monopolies and cut all of their competitors. If you had done these "stimulus scams" in 2008 and 2021 and evaded paying taxes like Elon Musk did....you would have pulled off a trillion dollar crime with you and your friends.

In actuality, when federal and private investigators traced the instigators and beneficiaries of some other notorious "crisis" things: they and their politicians turned out to all be the exact same handful of people who owned all of the exclusive "solutions" to the manufactured "crisis".

The Silicon Valley Cartel began in California. Elite arrogant asshole dynasties send their kids to Stanford University. Stanford puts the kids in asshole frat houses to train them to get away with rape and run monopolies. When they graduate they either go up the hill to Sandhill Road in Palo Alto and start an insider venture capital clone operation or they get their frat friends on Sandhill Road to racketeer-fund their start-up or political campaign using money scammed from your parents pension funds.

They only work with their frat buddies and insiders in a tribal 'old boys club' manner. They steal all the technology and markets they want because they control all of the tech lawyers and politicians via bribes and revolving doors. Most of the money in Stanford University bank accounts is from Foreign and Hollywood oligarchs delivered as bribes meant to get their snot-nosed brats into Stanford. Stanford bosses keep all of this covered-up and covertly fund political campaigns to grease the wheels of political corruption. They then sexually extort some Stanford interns in Rosewood Hotel rooms, get the most 'trophy wife' ones pregnant, and start the cycle all over again. Alas, Stanford is the training ground for abuse, corruption and 'Bro-Crime'.

In all these corruption cases, these corrupt people took the same steps to conceal their assets. They each took the money in secret ways. The main ways are 1.) Via Dark Money stealth political funds; 2.) Bribes paid via insider trading (notice that most of these crooks marry an investment banker to run their dirty schemes) and 3.) Getting government contracts, loans and grants for their friends that they get kick-backs from. They then had their dirty law firms and CPA's shove the money into their standardized covert financial structure to hide it. They use family members to run the operation. Their dirty family members and lawyer/CPA teams cover up their tracks. They then have intermediaries spend the money to get those islands, yachts, mansions, hookers, Tesla's, etc.

The 2008 and 2021 "stimulus funds" are quid pro quo scams to pay off political insiders. We reported these crimes (with FBI-class evidence) to every law enforcement agency in writing (FBI, DOJ, SEC, IG, FTC, OSC, FEC, etc.). Apparently, citizens are ignored if the crimes involve politicians and their billionaires. the cover-ups are off-the-charts! These mobsters (Google, Tesla, Facebook, LinkedIn, Netflix, In-q-tell, Kleiner Perkins, Greylock, etc; acting in a coordinated, collusion-based, operation) are paying billions of dollars of political bribes (...via cash, real estate, sex trafficking, corrupt lobbyists, search engine rigging, crony jobs, biased censoring, campaign funds, stock market manipulations, Ukrainian money laundering, etc.) to delay justice and blockade our, and your, rights! There can be no question about the fact that Google, Facebook, Netflix, Tesla and the Silicon Valley Cartel control the Obama and Biden White House. For example: Elon Musk ordered the politicians who are his bitches to sabotage his competitors. He gave those political insiders: cash, stock in his cartel, revolving-door jobs, campaign funding, sex workers, off-shore money laundering, and other quid pro quo. Eric Schmidt, Larry Page, Mark Zuckerberg, and the rest of the tech mob, all worked together on these crimes.

The hacks and leaks of their documents prove it. Government agency bosses are covering up these crimes to protect their jobs and their corrupt stock market holdings. Musk and Goldman Sachs have gotten over FIFTEEN BILLION

DOLLARS of free taxpayer cash and monopolized exclusives to pay for Musk's drugs, sex parties and mansions. This is one of the largest violations of anti-trust laws in history. The politicians and agencies that are supposed to stop him are getting money from him. Musk exists entirely from quid pro quo bribes! Musk's banks, including Deutsche Bank, have had to pay more than \$100 million to settle charges related to violating anti-bribery laws and engaging in money laundering. While the Musk-controlled media bloviate on the god-like image of Musk, he and his buddies are just crooks and mobsters. It is now almost impossible for the public to reach any media source that is not controlled by the Silicon Valley Cartel via synchronized talking points. Politicians who say that their only motivation is to "save" the helpless billionaire Elon Musk and his unicorns: 1.) sabotage any companies who are not making Tesla's, 2.) have sex with Tesla lobbyists and bankers, 3.) own the stock in Tesla Motors, 4.) are venture capital partners in Kleiner Perkins (i.e.: Gore) and Greylock capital insiders, 5.) Trade revolving door jobs with the Elon Musk cartel, 6.) Gave Musk over \$15B of free taxpayer money, 7.) Get campaign financing from Musk, 8.) Order government agencies to freeze funding for Musk's competitors, 9.) And engage in a vast number of other corruption and anti-trust crimes.

U.S. Senators, Agency Heads and Congress are bribed by Google intermediaries with: Billions of dollars of Google, Twitter, Facebook, Tesla, Netflix and Sony Pictures stock and stock warrants which is never reported to the FEC; Billions of dollars of Google, Twitter, Facebook, Tesla, Netflix and Sony Pictures search engine rigging and shadow-banning which is never reported to the FEC; Free rent; Male and female prostitutes; Cars; Dinners; Party Financing; Sports Event Tickets; Political campaign printing and mailing services "Donations"; Secret PAC Financing; Jobs in Corporations in Silicon Valley For The Family Members of Those Who Take Bribes And Those Who Take Bribes; "Consulting" contracts from McKinsey as fronted pay-off gigs; Overpriced "Speaking Engagements" which are really just pay-offs conduited for donors; Private jet rides and use of Government fuel depots (i.e.: Google handed out NASA jet fuel to staff); Real Estate; Fake mortgages; The use of Cayman, Boca Des Tores, Swiss and related money-laundering accounts; The use of HSBC, Wells Fargo, Goldman Sachs and Deutsche Bank money laundering accounts and covert stock accounts; Free spam and bulk mailing services owned by Silicon Valley corporations; Use of high tech law firms such as Perkins Coie, Wilson Sonsini, MoFo, Covington & Burling, etc. to conduit bribes to officials. This will never end unless the public demands laws to prevent all politicians, and their families, from owning ANY stock market stocks or securities!

LITHIUM AND RARE EARTH CORRUPT CHILD LABOR MINES FOR ELON MUSK'S DEADLY BATTERIES

Lithium ion batteries: Cause wars, rape and genocide in the Congo, Afghanistan and Bolivia from the corrupt mining deals involved with mining lithium and cobalt; are insider trading-owned by ex-CIA boss Woolsey and DOE Boss Chu; excrete chemicals that mutate fetuses when they burn; destroy your brain, lungs and nervous system when they burn; kill the factory workers who make them; cause Panasonic to be one of the most corrupt companies in the world; poison the Earth when disposed of; can't be extinguished by firemen; poison firemen when they burn; are based on criminally corrupt mining schemes like URANIUM ONE; Have over 61 toxic chemicals in them; come from an industry that spends billions on internet shills and trolls used to nay say all other forms of energy; are insider-trading owned by corrupt U.S. Senators who are running a SAFETY COVER-UP about their dangers. Apple products with lithium ion batteries have been exploding and setting people on fire; over time the chemical dendrites inside each battery grow worse and increase the chances of explosion as they age - LITHIUM ION BATTERIES BECOME MORE AND MORE LIKELY TO EXPLODE AS TIME GOES ON AND AS THEY AGE; "Bad Guys" have figured out how to make them explode remotely; have their dangers hidden by CNN and MSM because pretty much only the DNC people profit from them; are the heart of Elon Musk's stock market scam. The Obama Administration promised Silicon Valley oligarchs the market monopoly on lithium ion batteries and the sabotage of fuel cells in exchange for campaign financing and search engine rigging; United States Senators that are supposed to

protect us from these deadly products own the stock market assets of them so they protect them and stop the FDA, OSHA, DOT & NHTSA from outlawing them. Lithium-ion batteries, which also require mining rare earth metals, are difficult and dangerous to recycle, difficult to dispose of without polluting the environment and it takes about 67,000 cubic feet of water to mine a ton of lithium salt. The carbon costs of producing lithium-ion batteries from mining to shipping to manufacturing the final product compared to that of fuel cells is awful. The lifetime costs of replacing and recycling Li-ion Batteries periodically versus maintaining Fuel cell systems is also awful...

NiCAD and Hundreds of other battery chemistries DO NOT have all of these problems but Lithium Ion batteries get a monopoly because of politician insider trading ownerships. A recent fire on U.S. Highway 101 near Mountain View, CA, burned the driver alive and killed him. In Florida two kids died in a Tesla, burned alive, screaming in agony. A man died in agony in a Tesla crash in Malibu that set Malibu Canyon on fire. A young woman, at the start of life, and her boyfriend were burned alive in their crashed Tesla. There are many more deaths and crashes than you have heard about. The deaths and the cover-ups are endless. Senators Dianne Feinstein, Harry Reid, Nancy Pelosi, Kamala Harris and their associates own the stock in Tesla Motors and/or its suppliers and mining companies and those cover-up and halt investigations and laws designed to save the public. Evan Halper, Elon Musk and their crony's, spend over \$1B a year to still and troll hype about lithium ion batteries and cover-up the dangers. Lithium ion EVs are more prone to battery fires. Experts say that their lithium-ion batteries can fuel hotter fires that release toxic fumes and are more difficult to put out. Lithium ion fires keep reigniting which explains why it takes so long and requires copious amounts of water or foam (it is an electric fire, after all) to smother the flames. Tesla employee Bernard Tse and his team warned Elon Musk about these dangers in 2008 and they got fired and/or warned to "say nothing" by Musk. Three top Tesla engineers died in a plane crash next to Tesla offices in San Carlos after two of them agreed to become whistle-blowers. Elon Musk exists because he bribed DNC politicians and Senators Feinstein, Reid, Boxer, Harris, Clinton and Pelosi to give him free taxpayer cash and government resources from the Dept. of Energy and the Calif treasury. DOE has been covering-up organized crime activities at DOE in which DOE funds are being used as a slush-fund to pay off DNC campaign financiers and to pay for CIA/GPS Fusion-Class attacks on Silicon Valley business competitors of those DNC campaign financiers who DOE staff share stock market holdings with. Elon Musk is a criminal, a mobster, an asshole, a bald fake-hair wearing, plastic surgery-addicted, douchebag, woman-abusing, sex addicted, tax evader. Musk exploits poor people and child slaves in the Congo and Afghanistan to mine his lithium and Cobalt.

Musk spends billions per year to hire Russian trolls, fake blogger fan-boys and buy fake news self-aggrandizement articles about himself. Musk thinks he is the 'Jesus' of Silicon Valley. Fake News manipulator Google is run by Larry Page and Larry is Musk's investor and bromance butt buddy. Musk uses massive numbers of shell companies and trust funds to self-deal, evade the law and hide his bribes and stock market insider trading. A huge number of Tesla drivers have been killed; pedestrians and oncoming drivers have also been killed, and Musk covers it up. The DNC and the MSM refuse to allow any articles about Musk's crimes to be printed because they benefit from Musk's crimes. Musk has been professionally diagnosed as a 'psychotic narcissist.' A 'Silicon Valley Mafia; cartel of frat boy sociopath venture capitalists like Steve Jurvetson, Tim Draper, Eric Schmidt, et al; threaten those who do not support the cult of Tesla or their political candidates. In EVERY blog that you read that mentions 'Musk', at least 1/3 of the comments have been placed there by Musk's paid shills. Musk holds the record for getting sued for fraud by his investors, wives, former partners, employees, suppliers and co-founders. Elon Musk has gone out of his way to hire hundreds of ex-CIA staff and assign them to "dirty tricks teams" to attack his competitors and elected officials who Musk hates. Musk never founded his companies. Musk's "Starlink" satellites are domestic spy and political manipulation tools - never get your internet from one.

Musk stole Tesla in a hostile ownership take-over from Marty the true inventor of the Tesla. The same kind of EMF radiation proven to cause cancer from cell phones exists in massive amounts in a Tesla. Musk can't fix a car or build

a rocket and has almost no mechanical skills. If you pull a report of every VIN# of every Tesla ever built and cross reference that with insurance, repair and lawsuit records you will find that the "per volume" fire, crash, death and defect rate is THE WORST of any car maker in history! Musk is a lying con artist and partners with Goldman Sachs to rig the stock market. Sachs has a dedicated team of 18 men who rig stocks and valuation bumps for Musk. Over 1000 witnesses can prove every one of those claims in any live televised Congressional hearing! Senators Dianne Feinstein, Harry Reid, Nancy Pelosi, Kamala Harris and their associates own the stock in Tesla Motors and/or it's suppliers and mining companies. That is why they criminally help cover-up investigations of Tesla! All of this was reported, in writing, to James Comey, Patricia Rich and David Johnson at the FBI. The DNC bosses own the stock in lithium, Solar and EV markets and use kickbacks from those markets (Especially via convoluted campaign finance laundering via Elon Musk) to finance the DNC. The DNC bosses use character assassination as their main political tool against any member of the public who speaks out against their felony stock market scams and PizzaGate-like scandals. The Harvey Weinstein reports by Ronan Farrow show that they have teams of hired goons that they pay to destroy people's lives.

They use Black Cube, Mossad, In-Q-Tel, Stratfor, Gawker Media, Gizmodo Media, Media Matters, David Brock, Sid Blumenthal, NY Times, Google servers, Facebook servers, Podesta Group, Perkins Coie, Covington & Burling and a host of "assassins". It should be a felony to hire character assassins in the USA. DEMAND A LAW and DEMAND the termination of these attack services. IE: Gawker and Gizmodo Media sets-up the attack stories and, in paid partnership with Google, Google kicks their attack links around the globe, in front of 8 Billion people, forever. Google locks the attack articles of its enemies on the front top search results of Google search results forever, on purpose! That is why Google is being terminated in the largest, most well resourced anti-corruption public service take-down in history! Tesla and Musk are protected by shareholders Harris, Pelosi, Feinstein, Brown and Newsom. Panasonic (indicted for bribery and Musk's partner) spends billions of dollars annually cover-up lithium battery fires and battery defects.

Mining lithium poses environmental risks. The Biden ...

<https://dailyiowan.com/2021/06/15/mining-lithium-poses-environmental-risks-the-biden-administration-isnt-ignoring-them/>

Biden and his Democratic Party offer themselves as environmental defenders. It would be a big deal if they sacrificed local environmental safety in the quest to meet national or global climate change goals. Most lithium mining comes with an environmental cost, and a major new Nevada project has drawn lawsuits from environmental groups.

Lithium Mining: The Hidden Environmental Cost of EVs ...

<https://usa.streetsblog.org/2021/02/09/lithium-mining-and-the-hidden-environmental-costs-of-evs/>

Lithium Americas already operates a mine in Argentina, and the mineral is widely distributed around the world. To evade the Whac-a-mole trap, the fight that Falk and Wilbert are mounting in Nevada has to be waged as well in Argentina, Australia and especially Chile, the world's biggest current provider.

The 'White Gold' Rush: Impacts of lithium mining in South ...

<https://www.theyoungdiplomats.com/post/the-white-gold-rush-impacts-of-lithium-mining-in-south-america>

Dylan Gaymer Lithium, the so-called 'white gold' of the future, is fast becoming a key driver in the modern world. It is essential in the production of lithium-ion batteries, used in mobile phones and electric vehicles (EVs) at a time when the demand for such devices is accelerating. In 2019, batteries accounted for 65 per cent of all lithium end-usage worldwide and lithium demand for electric ...

The Ravages of Lithium Extraction in Chile | Dissident Voice

<https://dissidentvoice.org/2020/07/the-ravages-of-lithium-extraction-in-chile/>

In the lithium mining region of Antofagasta, the Coronavirus positivity rate was a stupendous 46.1%. Along with this sheer infliction of necropolitical violence upon the working class, the indigenous people are also reeling under the pressures of lithium extraction in the form of a water crisis. While singular focus has been placed on the ...

Best cars for 2018 04:53. That's because outside of the Congo, there are few options. Tesla alone will require 7,800 tons of cobalt for the half-a-million Model 3 s the company expects to be ..

These are the "Khaki Pants Mobsters Of Palo Alto"! The "Silicon Valley Mafia" is comprised of The Sand Hill Road venture-capital frat boy company bosses in Palo Alto, their National Venture Capital Association (NVCA) facade (Greylock Capital; Kleiner Perkins Caufield & Byers, Draper, Khosla Ventures, etc.) and the tech companies (Google, Tesla, Facebook, Amazon, Twitter, LinkedIn, etc.) that they control.

They are sometimes referred to as "The Deep State". They have purchased California, New York and Washington, DC politicians (mostly Senators) who they also control and who own stock in their operations. They hire dirty law firms like MoFo, Wilson Sonsini, Covington, Perkins, etc. and dirty lobbyists like McBee, Podesta, Blumenthal, etc. to do their dirty deeds.

They hire rogue ex-intelligence agents to operate Fusion GPS, Gawker/Gizmodo, Black Cube, ShareBlue, New America Foundation, In-Q-Tel, Podesta Group, Media Matters, etc. massive media attack programs against competitors, reporters and outsiders.

They collude with black-lists, valuation payola, election manipulation, search engine rigging, domestic spying for political manipulation, stock rigging, insider trading, Jeffrey Epstein-like executive prostitute sex-trafficking clubs, trophy wife trades, the bribery of politicians and worse. They are felons who bribe politicians to halt investigations and interdiction efforts.

They have quid-pro-quo stock market bribe deals with Senators Reid, Feinstein, Harris, Boxer, Spier, etc. In the CleanTech Crash: Every single Dept of Energy executive, and related Senator, owns stock market assets in Tesla, Fisker, Solyndra, Ener1, etc. so they blockaded and sabotaged every applicant who competed with their holdings in a RICO-violating, felony organized crime, using taxpayer funds, in order to profit at the expense of taxpayers.

They are widely covered in news media articles as: 'sex abusers, cult enthusiasts, elitists, rapists, woman beaters, probiosis practitioners, sexual work extortion operators, extremists, arrogant clones of each other, tone deaf, echo-chamber reinforcing, misogynist, racist, manipulative, insecure, covertly gay, corrupt, thieves' and other anti-social revelations. The divorce court and lawsuit federal court records on them prove that they are sex-abusing sociopaths.

They use their monopolistic control of the internet to massively and exclusively scale services that only they control and use to abuse the public's privacy, human rights, invention rights and information. They run their cartel like the old Italian Mafia once did.

Some of the top crooks and bribe-payers include: Google's Larry Page, his boyfriend Elon Musk; Google's Eric Schmidt, Andy Rubin, David Drummond, Kent Walker, Jared Cohen and Sergy Brin; Political manipulators David Plouffe, Steve Westly, Steve Spinner and Vinod Khosla; Sociopath billionaires Reid Hoffman, Richard Blum, Jeff Epstein, Tim Draper, Steve Jurvetson, etc.

They order their staff and associates to: bribe politicians; operate sex trafficking for them; manipulate stock market valuations; launder money; run off-shore tax evasion schemes; black-list employees and competitors; hide, down-rank, DNS dead-hole, shadow-ban, censor and server obfuscate enemies on the entire web; rig the U.S. Patent Office; help them cheat on their wives; and engage in massive volumes of insider, illicit, RICO and anti-trust violating crimes while bribing public officials to avoid prosecution.

THE SCAMS OF ELON MUSK AND TESLA MOTORS

The Musk empire has paid more bribes to politicians than almost any other modern entity. That is why no full investigation of the Musk scams has ever been completed. Google's Eric Schmidt and Larry Page have a bromance relationship with Musk and use the global resources of Alphabet to hide any negative news about Musk assets. The 2008 Department of Energy Cleantech Crash proves that a federal agency was used as just one big slush-fund to pay-off political campaign financiers, operate insider-trading stocks and sabotage those financiers competitors using taxpayer-financed resources! We have used private investigator, FBI resources and deep AI research to reveal that all government staff working on our application were getting quid-pro-quo...they were on the take. (Can anyone point out to us EVEN ONE person who was in the DOE/White House loop who was not working for, invested in, getting a future job from or other wise conflicted?) What do you do when The U.S. Government convinces you to invest millions of dollars, and your life, into one of their projects. Then their project turns out to be a scam where they had covertly hard-wired the upside to a couple of Senator's and their campaign financier friends. The fix was in and the game was rigged to use a government program as a slush-fund for friends-with-benefits. We, and the public, got defrauded.

Now the damages must be paid for, one way, or another. Every one of the insiders who did get government funding got it in the exact same size and order as their covert political campaign funding and stock market bribes to the deciders. Chamath Palihapitiya and other Silicon Valley insiders have now exposed the fact that Greylock, Kleiner, etc. are just a VC Ponzi Scheme! in this whole mess. Musk used crooked Senators to get his funds. Those Senators and government agency bosses were financed by, friends with, sleeping with, dating the staff of, holding stock market assets in, promised a revolving door job or government service contracts from, partying with, personal friends with, photographed at private events with, making profits by consulting for, exchanging emails with, business associates of or directed by; one of those business adversaries, or the Senators and politicians that those business adversaries pay campaign finances to, or supply political search engine manipulation services to. Elon Musk is notorious for getting Department of Energy money by bribing public officials and placing his friends: Steven Chu, Matt Rogers, Steve Westly, Steve Spinner's 'special friend', etc. on the staff of the Department of Energy and in the White House. We have FBI-class records, financial tracking, emails, stock market relay records

and other forensic data that proves it. We can swear, warrant, certify and prove these assertions in front of Congress in a live Congressional hearing or Civil Jury trial, given non-compromised legal backing.

If you think you have bribed the same number of Senators, bought a President and taken over most of the Department of Energy like Musk did... go for it! In this day and age, with every citizen able to track every public figure, with FBI-quality databases, on their home computers, it might be a crash-and-burn but you are welcome to try. Lithium metals, and other rare earth mining materials, are monopolized by Elon Musk and his Silicon Valley Cartel, in rare-earth corrupt mining scams. Lithium's widespread use in cars is hindered by a challenging obstacle: upon multiple charge-discharge cycles, fractal filaments called dendrites always grow through the electrolyte from the negative to the positive electrode and short-circuit the battery from the inside, thus guaranteeing that Tesla Cars will eventually all explode. Musk and Panasonic have known this since 2007 (They are "dumping" the batteries via Tesla) and have paid U.S. Senators, who own stock in Tesla, to cover it up.

The lithium fires and toxic vapors are a major safety concern because they have killed, poisoned and injured too many citizens. Musk gets away with his scams because he pays U.S. Senators bribes with stocks in his corporations and has a thousand crooked Goldman Sachs investment bankers selling his hair-brained schemes to your parents pension funds. Tesla is known as "the official car of douche-bags". The safety defect cover-ups on the Tesla are extreme. Musk's narcissistic trophy-wife mom and his extremist father (who got his young sister pregnant) are thought to be the cause of Musk's racism and sociopath behaviors. He is the #1 crony capitalist government mooch in America and has received billions of dollars of your tax money to help him buy his mansions, starlets and sex parties. His cars and rockets blow up, his tunnels are unsafe, his satellites spy on consumers and his brain chip company tortures small animals. He swiped all of his technology from someone else and has never come up with his own inventions. Space-X is just a domestic spying company. Don't buy Musk's bullshit about Space-X doing any good deeds. Everything Space-X launches is to spy on the poor folks on the ground and monitor their internet. Also, Musk's Neuralink company tortures small animals to try out Musk's pseudo-science mind-reading chips.

GOOGLE'S ABUSES OF THE PUBLIC AND OF DEMOCRACY

Google exists to mass manipulate populations and run stock market scams for Google's owners. From INSIDE Google, our team saw Google manipulate the entire internet to hype up Larry Page's "boyfriend": Elon Musk and Tesla, which Google execs owned a portion of, while sabotaging Tesla's competitors. Google illicitly and illegally timed these manipulations with stock market pump-and-dump efforts to exploit insider trading. That is a felony violation of RICO, Antitrust and other laws. Every single thing that Google does is contrived to harm a competitor, a politician, an employee whistle-blower or some other business adversary. There are no "bugs", "operator errors", "server anomalies" or other media "accidents" at Google. Everything Google does is contrived, at a psychological warfare kind of level, to change a social perception. Google must show its software to FBI, SEC, FTC and our search engine optimisation experts to prove that they did not engage in these crimes. The fact is: We can prove they did the crimes and FBI experts can help us prove it! Google is known as the "Nazi's of the Internet". In a case unfolding in Britain over whether Google wrongly demoted price comparison rival Foundem from its search results in favour of paid-for adverts, Google must now decide which it values more: the algorithms that rank its search results, or its stance that manually fiddling with those results to promote its own paid-for products over rivals' sites doesn't break competition laws. The integrity of Google's ranking processes relies upon all webmasters or website owners having the same degree of access to information about Google's ranking... This will no longer be the case if information of this kind is made available to some individuals offering commercial services to assist companies to improve their Search ranking. Google is a criminal operation.

It's executives have been publicly exposed as participants in horrific sex scandals, money laundering, political bribery and racism. It is time for the bought and paid shill politicians to stop protecting them! - Google spies on

competitors and steals their technology - Google runs tens of millions of dollars of defamation attacks against competitors - Google hides all media and news coverage for competitors of Larry Page's boyfriend: Elon Musk - Google lies to the public about what they really do with the public's data - Google promotes illegal immigration in order to get cheap labor and control votes - Google runs VC funding back-lists against start-ups that are competitive - Google bribes thousands of politicians - Google is a criminal RICO-violating monopoly - Google rigs the stock market with Flash-boy, Pump/Dump and Microblast SEC violating computer tricks - Google pays bribes to politicians in Google and YouTube stock - Google manipulates who gets to see what web-sites, globally, for competitor black-lists - Google has a "no poaching" Silicon Valley jobs blacklist - Google bosses sexually abuse women and young boys - Google bosses run sex trafficking operations in the Epstein and NXVIUM cults - Google bosses control the NVCA financing cartel over start-ups - Google has placed the majority of the corporate staff in at least one White House - Google controls national elections for anti-competitive purposes - The company "Polyhop", in the HOUSE OF CARDS tv show, does all the crimes that Google actually does in reality - Google's law firms, like Wilson Sonsini, are corrupt conduits for payola and political conduit-relays - Google bribes some politicians with revolving door jobs - Google is primarily responsible for destroying the Bay Area Housing opportunities.

Google runs DDoS attacks on competitors by massively crawling their sites - Google boss Andy Rubin runs a sex slave farm according to his own family - Google boss Eric Schmidt was a philandering sex-penthouse owner according to vast news articles - Google executives hire so many hookers that one of them, Mr. Hayes, was killed by his hooker - Google executives sexually abuse so many women that the women staff of Google walked out one day - In the 2009 White House, you could not swing a cat without hitting a Google insider - Google has paid covert bribes, PAC funds, real estate and search rigging payola to every CA Senator - Google has paid bribes, through its lobby fronts, to halt FBI, SEC, FEC and FTC investigations of Google crimes - Google was funded by the CIA, via In-Q-Tel, a so called "501 c3 charity" which was caught with tons of cocaine - Google gets millions of dollars of taxpayer cash for spying on Americans inside the USA - Google's map service was a spy system paid for by taxpayers money that Google now profits off of - Nancy Pelosi and Dianne Feinstein have promised to "protect" Google because their families profit off Google stocks.

Payment receipts prove that Google and Gawker/Gizmodo exchanged cash and staff for Character Assassination attacks - Google VC's and bosses have spent \$30M+ rigging the U.S. Patent Office to protect Google and harm Google competitors - Google bribed it's lawyer into position as head of the U.S. Patent office in order to have her protect Google - To rig insider stock trades, Google hides negative Tesla stories and pumps positive Tesla stories on "push days" - Google and Elon Musk Co-own, co-invest and co-market stocks covertly while running anti-trust schemes - Google rarely likes, or hires, black employees per federal and news media investigations - Google hired most of the Washington, DC K Street lobby firms and told them to "do what ever they could" - The film: "Miss Sloane" depicts only 2% of the illicit lobbying tactics Google employs daily - Demands for an FTC and FBI raid of Google, for criminal activity, securities law and election felonies have been filed - Google's David Drummond had his Woodside, CA Quail Road house bugged revealing sex and financial misdeeds.

Google, and it's Cartel (Alphabet, Youtube, and hundreds of other shell-company facades) are a criminal organization engaged in felony-class crimes. Google's bosses bribe politicians, regulators and law enforcement officials to hold off prosecution. At Google: Kent Walker, Andy Rubin, Larry Page, Eric Schmidt, Sergy Brin, Jared Cohen, Yasmin Green, David Drummond and Ian Fette are so enmeshed in sex scandals, election manipulation, and White House bribes that it is hard to comprehend how they can get any legitimate work done. Google executives came from most of the fraternity houses involved in the college rape scandals. Google sells covert character assassination services to politicians and fellow oligarchs. Youtube/Google/Alphabet/Deep State are all the same entity. They conspire to hide news about their corruption and they control most of the internet.

THE TECH CARTEL

The Silicon Valley tech Cartel (AKA: "Paypal Mafia", "Deep State") is evil because these racist, ageist, sex-trafficking, money-laundering, elitist, politician bribing, tax evaders: steal any technology they desire; They manufactured the CLEANTECH CRASH as shown in the 60 MINUTES episode of the same name; they run a prostitution ring and sexually extort young women and interns in Silicon Valley; they are 'rape culture' take-what-they-want misogynists, ageists and racists as their history of abuses has proven; their Palo Alto Cartel operates AngelGate-type collusion and stock market insider trading schemes that harm independent business and the public; their Cartel ran the "no poaching" CEO ring which was class-action sued by DOJ and tech workers; 90% of their divorce court files reveal horrific abuses and sex trafficking; They have an army of lobbyists that pay cash, stock market and revolving door bribes to U.S. Senators; They can even evade FBI & SEC investigations; They hire women to act as 'trophy wives' and 'beards'; they have lobbyists rig the U.S. Patent Office in order to block inventor patent rights because they are using stolen technologies; they have been caught on video and recordings beating, kicking and harming women hundreds of times; They have bought up all of the Tier-One tech law firms and order them to black-list, and never help, those who seek equal tech rights; they collude to abuse your privacy and make databases on the public for political control; they have to cheat to compete because they are only good with spread sheets instead of innovation; They run black-lists, character assassination attacks, collusion and other anti-trust violating acts in violation of RICO laws.

Silicon Valley has become the largest assemblage of douche-bags and yuppie frat boy criminals in human history. Theranos is not the exception, it is the standard. Tesla, Google, Theranos, Wework, Facebook are lies backed by famous political insiders to protect their insider trading and covered-up by fake news operators. They are also fronts to fund political campaigns via the ill-gotten profits from their endeavors. When the bad guys, and their lap-dog politicians, attack you because your products are better than theirs they are proving that they are frat boy scumbags, from Stanford and Yale, that operate in a little pack, like dogs! Their Sandhill Road operation should be raided by the FBI! The best thing that could come from the COVID pandemic is that they all are forced into bankruptcy! When your Senator holds stock market shares in companies that exist to profit on the backs of consumers, via corruption, then it is impossible for that Senator to ever do anything but be corrupt! We have reported this in writing to winklerm@sec.gov, sanfrancisco@sec.gov and 30+ other federal officers but have yet to see our whistle-blower rewards...or any action! Do you wonder how big politician insider stock trading is? Take a look at how many TRILLIONS of dollars pass through the stock markets annually and then look at the reported, AND UNREPORTED, securities holdings of famous U.S. Senators and government agency staff. That is what Seth Rich and the people in the "In Memory Of" section, below, were disclosing.

These are massive crimes! The perpetrators operate a massive and abusive n Nancy And Paul Pelosi Making Millions In Stock Trades In Companies She Actively Regulatesational sex cult. The perverts in the SandHill Road Venture Capital offices, located between Highway 280 down to Santa Cruz Avenue on Sand Hill Road in Menlo Park, California, are the main perpetrators of this global cartel. Their executives at Google, Facebook, Netflix, Linkedin, Twitter, and their related holdings, comprise the rest. The Harvey Weinstein and Ed Buck sex scandals are well known. These men's sex cult actions have been widely covered in the news individually in the Joe Lonsdale rape case, The Kleiner Perkins Ellen Pao sex abuse lawsuit, The Eric Schmidt sex penthouse stories, The Jeffrey Epstein case, The Google Forrest Hayes hooker murder case, The Andy Rubin sex slave case, The Sergy Brin 3-way sex romp scandal, The British Hydrant investigation, The Elon Musk Steve Jurvetson billionaire sex parties scandals, The NXIVM sexual slave cases, The Michael Goguen anal sex slave trial, The Tom Perkins Hooker Parties and thousands of other cases and federal divorce court filings. This group of people have proven themselves, over and over, to be sociopath control freaks not fit for participation in public commerce, public policy or media control. The Four Seasons Hotel and Rosewood Hotels in Silicon Valley are estimated to engage in over \$30,000.00 of high-

end escort sex trafficking per day, a portion of it managed by Eastern Bloc Mafia operators. The Elon Musk sex perversions are the tip of the iceberg.

At least 10 Ukrainian escorts fly in and out of SFO and SJO airports every week for these Cartel members. Google boss David Drummond engaged in horrible philandering sexual violations of his wife yet Google covers up every story about it on the web. Google's Eric Schmidt is under massive investigation. You hear about the female victims of this sex cult but you rarely hear about the young male victims. One of their vast numbers of prostitutes is quoted as saying that the girls and boys are paid "not just for sex but for the oligarch's endless need to feel that they can control anyone for any reason...". Multiple attorney general's controlled by their cartel, ie: Eric Schneiderman and Eliot Spitzer, are involved in these sex rings. These are the main influencers of a national political party and they are all involved in horrific sex perversions and abuses! All Silicon Valley tech cartel media companies work together to censor all news and information in order to hide coverage of their dirty deeds and to only put politicians in office that will give the Cartel political payola, kick-backs and insider stock pumps.

The Smedley Butler "Business Plot" from the past is not unlike the coup that Google and clan tried. See details in Emily Chang's book: BROTOPIA; Roan Farrow's book: CATCH & KILL; Edward Snowden's Book: PERMANENT RECORD; Peter Schwetzer's book: THROW THEM ALL OUT; Dave Eggers book: THE CIRCLE; Franklin Foer's book: WORLD WITHOUT MIND; Corey Pein's book: JOURNEY INTO THE SAVAGE HEART OF SILICON VALLEY; Dan Lyon's book: DISRUPTED; Antonio Martinez book: CHAOS MONKEYS. The Angelgate, Epstein, No-Poaching DOJ Class Action, and hundreds of other cases, prove that they meet, conspire, collude and blacklist in felony violation of anti-trust and RICO Racketeering laws. - 90% of these guys came from 100% of the fraternity houses involved in the recent college rape cases.

THE HIRED CHARACTER ASSASSINS AND KILLING THE WHISTLE-BLOWERS

POLITICAL KILL ORDERS AND STATE-SPONSORED CHARACTER ASSASSINATIONS - How A Modern Character Assassination and Political "Kill Order" Is Executed By the Silicon Valley Oligarchs and their total control of propaganda media. Patrick George At Jalopnik attacks outsiders under contract with Elon Musk and the DNC. Silicon Valley campaign finance oligarchs hire him to run hatchet jobs on innocent outsiders and then Gawker-Gizmodo-Jalopnik uses their financial partnership with the DNC's Google to push the character assassination articles to the top of Google web products and searches. Patrick George, Adrian Covert, John Hermann and Nick Cook are the sexually degenerate cabin boys that report to boy-loving sleaze-tabloid oligarch Nick Denton. They created the Fake News crisis in the media by flooding the internet with defamation posts and reprisal hatchet job articles designed to damage political enemies of the Socialists. They coordinate a large number of the character assassination efforts at Gawker, Gizmodo, Jalopnik, CNN, New York Times and other propaganda outlets. These Millennial boys are "Media Rapists" and should be treated as abusers. - How and why did a Donald Trump stripper-date named "Stormy" or an Elon Musk sex party or a Kavanaugh drinking incident or the Moonves and Weinstein indiscretions suddenly hit the news at about the same time in news history? - In addition to actual murder, Politicians and Silicon Valley Oligarchs hire operatives to end people's lives in other creative ways. - It is all part of the modern trend in vendetta, revenge and political payback when a Senator or a tech oligarch issues a "kill order" on an opponent.

The client does not like to get their hands dirty so the actual social hit job is performed by companies such as: Candiru (DNC); IN-Q-Tel - (DNC); Gawker Media - (DNC); Jalopnik - (DNC); Gizmodo Media - (DNC); K2 Intelligence - (DNC); WikiStrat - (DNC); Podesta Group - (DNC); Fusion GPS - (DNC/GOP); Google - (DNC); YouTube - (DNC); Alphabet - (DNC); Facebook - (DNC); Twitter - (DNC); Think Progress - (DNC); Media Matters - (DNC); Black Cube - (DNC); Mossad - (DNC); Correct The Record - (DNC); Sand Line - (DNC/GOP); Blackwater - (DNC/GOP); Undercover Global Ltd (DNC/GOP) Stratfor - (DNC/GOP); ShareBlue - (DNC);

Wikileaks (DNC/GOP); Cambridge Analytica - (DNC/GOP); Sid Blumenthal- (DNC); David Brock - (DNC); PR Firm Sunshine Sachs (DNC); Covington and Burling - (DNC), BuzzFeed - (DNC) Perkins Coie - (DNC); Wilson Sonsini - (DNC) and hundreds of others... These are the people and companies that except cash, revolving door jobs, political appointments, insider trading stock in Silicon Valley tech companies, prostitutes and real estate in exchange for destroying the lives of others. - These attackers deserve to be punished for the rest of their lives for taking away the lives of others in exchange for cash. Any company who is corrupt enough to hire any of these assassins should be forced out of business. These attack services are responsible for 90% of the "Fake News" problem in the world because they are the authors of most fake news. Congress must act to make these kinds of companies illegal! - These digital assassination services offer hit-jobs, character assassinations and economic reprisal programs to famous billionaires and corrupt politicians who are seeking revenge, retribution and vendetta executions. - In the case of reporters getting targeted for attacks, President Donald Trump has been accused by the liberal corporate media of whipping up a hateful frenzy against the press. But while CNN's Jim Acosta grandstands against Trump, real journalists are still reeling from the draconian extrajudicial measures that Barack Obama and his administration used to target them for exposing truth. - This secretive targeting occurred while Obama speechwriter and hate-filled ANTIFA supporter Ben Rhodes was running "Operation Echo Chamber," which reportedly continues, in which he fed information to willing corporate media scribes. "They literally know nothing," Rhodes said of the twentysomething journalists he easily manipulated. - The Freedom of the Press Foundation's Trevor Timm published documents showing how former attorney general Eric Holder changed the rules to more effectively intimidate and surveil members of the press. - Timm writes: "Today, we are revealing—for the first time—the Justice Department's rules for targeting journalists with secret FISA court orders. The documents were obtained as part of a Freedom of Information Act lawsuit brought by Freedom of the Press Foundation and Knight First Amendment Institute at Columbia University."

Obama is also clearly linked to the plot to obtain fraudulent FISA warrants on President Trump's team, as evidenced by Peter Strzok and Lisa Page's texts confirming that Obama was overseeing their fly-by-night operation. - Larry Schweikart reported for Big League Politics: For months pundits and researchers have been pondering the mystery of the FISA approval that led to the illegal and historically titanic scandals to ever hit the U.S. government. Some have argued that Assistant Attorney General Rod Rosenstein knew the FISA was bogus when he extended it. Others have wondered if Special Counsel Robert Mueller knew about the fraudulent basis of the FISA when he used it, in part, to indict Michael Flynn. Other still, that Mueller was fooled by the FBI. This is what President Trump calls "SPYGATE". - It may well be that the surveillance that was conducted began with UK intelligence services and then was fed back to the White House of Barack Obama. Here's the kicker: President Barack Obama did not need a FISA warrant to authorize spying/electronic surveillance on Trump because Obama all along had legal authorization to by-pass the normal court vetting process. According to 50 U.S. Code 1802, the "Electronic Surveillance Authorization" () "Foreign intelligence in relation to a US person (Trump or his associates) is information that's necessary for the US to protect against attack, hostile acts, sabotage, . . . as well as other clandestine activities by a foreign power . . . OR . . . information relevant to national defense/security of the US, or the conduct of foreign affairs of the U.S." Such an authorization by Obama required certification by Attorney General Loretta Lynch that must be logged with the FISC court. ("The [AG]+ shall immediately transmit under seal to the court [FISC] a copy of his certification.") - In short, the DOJ has this. If we are correct, a copy of that certification is currently under seal at least with the DOJ and the FISC. - This is what they are hiding. - However, the Act requires the AG to keep the Select Committee on Intelligence and the Senate Committee on Intelligence informed of these authorizations and unmaskings therein. See 1803 (a) (1) (C) If indeed this is what happened, did Lynch report—or only selectively report—to the committees in a way that excluded non-friendlies? Can you see why Adam Schiff, Mark Warner, and their ilk are terrified? - These are the playbook tactics that Senators and tech oligarchs most often use to destroy the lives of their political and business enemies: - Government agency bosses sometimes solicit the target victims with

false promises of future loans, contracts or grants from their agency and cause the target victims to expend millions of dollars and years of their time for projects which those government bosses had covertly promised to their friends. They use the target victims as a “smokescreen” to cover their illegal government slush-funds for the victims competitors and personal enemies. By using this tactic, the attackers can drain the target victims funds and force them into an economic disaster in plain view of everyone without the government bosses fearing any reprisal for their scam.-

Every match.com, okcupid.com, Plenty Of Fish, Seeking Arrangements and all other IAC-owned, or similar, dating sites (IAC is managed by Hillary Clinton's daughter) have had their profiles, texts, and inter-member communications, since those companies were started, hacked or purchased. The attack service providers use Palantir and In-Q-Tel financed data analysis software to analyze every activity in those dating services in order to find honey-trap, blackmail, sextortion and social conflict exploitation opportunities. If you had a bad date with someone, that someone will be hunted down and convinced to help harm, #metoo or "rape charge" the intended target. All dates involve a search for sex, so the likelihood that a sexual disappointment experience will exist in each persons dating history is high. Searching every past dating email and text of a subject is quite easy with modern software and hacking techniques. A synthetically amplified, PR-agency optimized sex scandal can destroy any target. Your dating experiences from the 70's or 80's will come back to haunt you decades later. Most dates involve drinking alcohol and taking drugs. If you were unattractive or had bad sexual skills your bad date will be called "date rape", "drugging your date for sex" and related twisted narratives that are designed to shame you, the target. If you try to get a date in the future, your potential date will be contacted by a third party who will slander and libel you to make sure your potential first date gets cancelled. Your social life will, essentially, end. Every photo on every dating site is cross checked with every other photo on the internet in order to cull your Facebook, LinkedIn, Snapchat and other social media together to create a total psychological manipulation profile data file on you. A single photo on a dating site can be cross searched on every mugshot archive, photo album and corporate database in the worth within minutes using modern super-computers. Your sex life will be on public record in a flash.- Social Security, SSI, SDI, Disability and other earned benefits are stone-walled. Applications of targets are “lost”. Files in the application process “disappeared”. Lois Lerner hard drive “incidents” are operated in order to seek to hide information and run cover-ups. - Government officials and tech oligarchs contact members of the National Venture Capital association (NVCA) and created national “black-lists” to blockade target victims from ever receiving investor funding. This was also confirmed in a widely published disclosure by Tesla Motors Daryl Siry and in published testimony. If Silicon Valley political campaign finance oligarchs black-list you (see the "AngelGate" Scandal and the "High Tech No Poaching Class Action Lawsuit" cases) you will never get investor funding again. - FOIA requests are hidden, frozen, stone-walled, delayed, lied about and only partially responded to in order to seek to hide information and run cover-ups.- State and federal employees will play an endless game of Catch-22 by arbitrarily determining that deadlines had passed that they, the government officials, had stonewalled and obfuscated applications for, in order to force these deadlines that they set, to appear to be missed. This can bankrupt a target victim.- Some Victims found themselves strangely poisoned, not unlike the Alexander Litvenko case. Heavy metals and toxic materials were found right after their work with the Department of Energy weapons and energy facilities. Many wonder if these “targets” were intentionally exposed to toxins in retribution for their testimony.

The federal MSDS documents clearly show that a number of these people were exposed to deadly compounds and radiations, via DOE, without being provided with proper HazMat suits which DOE officials knew were required. - Victims employers are called, and faxed, and ordered to fire target victims from their places of employment, in the middle of the day, with no notice, as a retribution tactic. - On orders from Obama White House officials, DNC-financed Google, YouTube, Gawker Media and Gizmodo Media produce attack articles and defamation videos. Google locks this attack media on the internet on the top line, of the front page of all Google searches for a decade

in front of 7.5 billion people, around the world. This attack-type uses over \$40 million dollars in server farms, production costs and internet rigging. The forensic data acquired from tracking some of these attacks proves that Google rigs attacks against individuals on the internet and that all of Google's "impressions" are manually controlled by Google's executives who are also the main financiers and policy directors of the Obama Administration. This data was provided to the European Union for its ongoing prosecution of Google's political manipulation of public perceptions. - Victims HR and employment records, on recruiting and hiring databases, are embedded with negative keywords in order to prevent the victim targets from ever gaining future employment. - Gary D. Conley, Seth Rich, Rajeev Motwani and many other whistle-blowers in these matters, turned up dead under strange circumstances. It is very possible that some of these attack services, operated by former CIA operatives, even offer discrete murder-for-sale services using high-tech assassination tools that make murders look like heart attacks and brain failures. - Disability and VA complaint hearings and benefits are frozen, delayed, denied or subjected to lost records and "missing hard drives" as in the Lois Lerner case.- Paypal (A DNC-biased operation) and other on-line payments for on-line sales are de-platformed, delayed, hidden, or re-directed in order to terminate income potential for target victims who competed with the attackers interests and holdings.- DNS redirection, "website spoofing" sends target victims websites to dead ends where no sales orders or customer inquiries actually get back to the target.

These internet revenue activity manipulations are conducted using Google and Amazon servers. All commercial storefronts and on-line sales attempts by target victims, will have had their sites hidden, or search engine de-linked by a massively resourced facility located in Virginia, Texas or Palo Alto, California in order to terminate revenue potentials for the target victims.- Over 50,000 trolls, shills, botnets and synth-blog deployments are deployed to place defamatory statements and disinformation about victims in front of 7.5 billion people around the world on the internet in order to seek to damage their federal testimony credibility by a massively resourced facility. - Campaign finance dirty tricks contractors are hired by campaign financiers to attack the friends and family members of the target victim in order to create low morale for the target victims psyche and motivation.- Are you getting weird headaches and hearing a "buzzing sound" in your head? The U.S. Government has now acknowledged that the Cuban, Chinese and other embassy "sonic attacks" are from a known microwave beam weapon. Any one of the technical departments of the attack services listed at the top of this article can build such a biological harassment weapon. It can be aimed at the target victims office, bedroom or vehicle and, within a week, have caused biological and emotional damage using a weapon that has no visible track of trajectory. It is designed to make the target victim think they are "going crazy" or "hearing sounds in their head".- In one case covert political partner: Google, transferred large sums of cash to dirty tricks contractors and then manually locked the media portion of the attacks into the top lines of the top pages of all Google searches globally, for years, with hidden embedded codes in the links and web-pages which multiplied the attacks on Victims by many magnitudes.- Covert Cartel financier: Google, placed Google's lawyer: Michelle Lee, in charge of the U.S. Patent Office and she, in turn, stacked all of the U.S. Patent Office IPR and ALICE review boards and offices with Google-supporting employees in order to rig the U.S. Patent Office to protect Google from being prosecuted for the vast patent thefts that Google engages in. Google has hundreds of patent lawsuits for technology theft and a number of those lawsuits refer to Google's operations as "Racketeering", "Monopolistic Cartel" and "Government Coup-like" behaviors. Thousands of articles and investigations detail the fact that Google, "essentially" ran the Obama White House and provided over 80% of the key White House staff. A conflict-of-interest unlike any in American history. Google's investors personally told Applicant they would "kill him".

Google and the Obama Administration were "the same entity". Applicant testified in the review that got Michelle Lee terminated and uncovered a tactical political and social warfare group inside Google who were financed by Federal and State funds. - Honeytraps and moles were employed by the attackers. In this tactic, people who covertly

worked for the attackers were employed to approach the "target" in order to spy on and misdirect the subject. - Gawker Media, Gizmodo Media, Snopes, SPLC and other hired media assassins will be retained to produce "hatchet job" character assassination articles about you. Then those articles will be faxed, mailed and emailed to your employer and investors with a note saying: "You don't want to have anything to do with this person, do you..?" in order to get you fired from your job and get your loans or financing pulled. The attackers will use their round one attack media, that they authored, to create a round two second wave attack designed to end your life via economic warfare. - Mortgage and rental applications will have had red flags added to them in databases to prevent the targets from getting homes or apartments. - Krebs On Security, Wired, Ars Technica, The Wall Street Journal and most major IT publications have reported that hundreds of spy "back-doors" have been found on every Intel, AMD, Apple, Xfinity, Cisco, Microsoft, Juniper Networks motherboard, chip-set and hardware component set. This means that any kid with the "key" code can open any computer, server, router, cloud-network or other network connected device and read every file, photo, video, your calendar and email on your devices at any time from any location on Earth.

The key codes have been released to every hacker community in the world for over ten years. There is now no government, corporate or personal data that can't be hacked, even data from decades ago. Every single one of your darkest secrets can be in the hands of your enemy within 60 minutes, or less. Important meetings you had planned with potential investors, employers, clients, dates, suppliers and others will suddenly get cancelled at the last minute. They will 'Fair Use', SLAPP Protections, Public Domain, Freedom-of-the-Press, Creative Commons, Reddit/Voat Wiki, First Amendment, EU GDPR, Wikipedia and other protective rights apply.

get cancelled because your enemies are reading your calendar remotely and covertly sending slander information to those you had hoped to engage with in order to sabotage your life. Nothing you have ever typed on a computer or Smartphone is safe. it WILL be acquired and it WILL be used against you. - McCarthy-Era "Black-lists" are created and employed against target victims who competed with Obama Administration executives and their campaign financiers to prevent them from getting funding and future employment. - Obama Administration targets were very carefully placed in a position of not being able to get jobs, unemployment benefits, disability benefits or acquire any possible sources of income. The retribution tactics were audacious, overt..and quite illegal. - There are thousands of additional Dirty Tricks tactics being used by these Attack Services yet Congress refuses to pass laws out-lawing such attack services. The cost of an attack on a person ranges from \$150,000.00 to over \$50,000,000.00. While a Silicon Valley billionaire can afford to launch counter-measures to these attacks, any regular taxpayer will be utterly destroyed, and incapable of fighting back, against even the smallest version of one of these "kill orders".

A number of modern office shootings are the results of these attacks against an individual who has lost everything because of the attack and has no options left. - Federal law enforcement, the United States Congress and the highest level investigators in the U.S., and abroad, have documented (per the "FISA Memo", Congressional Reports and federal employee testimony) and proven the fact that the Obama Administration regularly engaged in the operation of retribution, vendetta and reprisal campaigns known as "hit-jobs" against domestic natural born U.S. citizen domestic taxpayers. The Federal Court, in at least one previous court case, has ruled that Applicants, in this particular matter, were the victims and target of a number of these attacks designed to inflict permanent medical, emotional, character assassination, brand negation, economic and career damage. The FBI has been asked to interview John Cook, Nicholas Guido Denton, Adrian Covert, Patrick George, Ian Fette and John Hermann of Gawker/Gizmodo re: their financing, payola and hit-job attacks on third parties.

Whistle-blowers reporting this corruption have adopted a Silicon Valley "Insurance Policy". If attacked or harmed again, the victims will use 100% legal eye-for-an-eye tactics on a scale so massive it will be recorded in history books. If you look at A.) their United States Federal Patent awards (proving they think of new technologies first)

and B.) the news coverage of what exotic technological aerospace, internet, media and other things they have built in the past and, C.) the well known technologists that they work with, and, D.) the headline-making federal investigations and lawsuits that they have launched you will see that: 1.) They can produce technological developments that nobody has seen before and that affect millions of users. 2.) They can out-create most any government official. 3.) You can't imagine what they can build or have already built. 4.) Even if they are killed, the thing they deploy will still self-function autonomously. This will all be done using things that are currently totally legal and massively effective. ie: Don't kill the messengers and they won't shame you into oblivion! 'Fair Use', SLAPP Protections, Public Domain, Freedom-of-the-Press, Creative Commons, Reddit/Voat Wiki, First Amendment, EU GDPR, WikiPedia and other protective rights apply in this reporting.

INVESTIGATING THE CULPRITS

The housing crisis has been created by special interest groups including: 1.) Big corporate real estate broker lobbyists (Sotheby, Better Homes Realty, CBRE, Coldwell Banker, etc.) ; 2.) big corporate developers (K&B, Pulte, Blackrock, Vanguard, Berkshire Hathaway, etc.); 3.) NIMBY's and 4.) certain exclusionist tech billionaires want to NEVER allow affordable housing and affordable pre-fab builders to exist. Almost every politician, especially county planning staff, are paid bribes by real estate broker lobbies and big corporate developers. Tracking the stock market assets of the politicians and their families clearly shows the bribes.

We used FBI, CIA, FINCEN-type AI-based forensic tracking software and looked at the heads of all of the housing agencies and housing decision "research" groups, particularly in California and New York State. 98% of those people do not make the majority of their money from their salaries, **THEY MAKE IT FROM INSIDER STOCK MARKET PERKS** and special gifts tied back to the special interests. Why are the real FBI not arresting them? You will have to ask The Director of the FBI that question. You can talk to the folks that run the sites at:

<http://www.pogo.org>

<http://www.sunlightfoundation.com>

<http://followthemoney.org>

<http://icij.org>

... and thousands of other investigative groups and prove it for yourself! Why is the public not demanding that stock market ownership by politicians and their families be made illegal? Because Goldman Sachs controls public policy more than you do?

In other words, the politicians that are supposed to be helping you are accepting bribes to hurt you!

EASY SOLUTIONS TO THE CRISIS ARE BEING BLOCKADED

In San Mateo County, the housing agency does even fill out the forms to apply to the State for housing funds any more. Even though, in 2021, the State has nearly \$100B to give away to housing, San Mateo has so many rich oligarchs living there that poor and middle class housing is too much of a bother for them.

Dwell Magazine-type modern low-cost prefab homes, CREATED in California, are blockaded by these special interest groups. Clayton Homes, BluHomes (now killed off by special interests), Factory OS, Homes Direct and hundreds of other California companies make off-site manufactured homes that are nicer looking, 50% lower cost, safer, faster to erect, more energy efficient and better than site-built homes. The real estate and union lobbies have gotten them banned in most counties because they are jealous of them. Powerful anti-trust law violating real estate and union lobbies got the zoning codes changed to make off-site manufactured homes hard to get permits for. If you want the best home at the best price, sue your county to demand home equality and construction-justice.

Ensuring that our County has sufficient affordable housing for its residents is an urgent challenge. Off-site construction serves as the most promising tool to reduce costs and increase supply, but one whose full potential cannot be realized or optimized without thoughtful and intentional changes in the policy, process, and programs that support affordable housing in the County.

Across all stakeholder groups, you always found a shared desire and passion to address the monumental housing shortage, as well as a collective understanding of the collaboration needed to make modular one part of the solution. As one interviewee put it: “Everyone wants everyone else to succeed.”

While modular may not be a panacea, nor the only innovation needed, the County must take advantage of this opportunity to catalyze innovation in off-site construction methods and remove unnecessary anti-trust-violating barriers to its adoption created by special interest groups.

Many counties just pay lip-service, window-dressing, pretend-we-are-doing-something time to housing because their officials are paid by big business lobbies who HATE affordable housing because it competes with them.

Over a million Californians get \$1500.00 from HUD Section 8 and related programs but they are blockaded by lobbying from these special interest groups from using those funds to buy a home. The HUD Section 8 Home Ownership program in California is a sham. Nobody can find the paperwork, get the help or get the counties to pay attention when they apply.

So there is this massively financed army of mega-powerful anti-housing people who have huge law firms working to stop all of your good deeds and manipulate all of your politicians and social service agencies.

HOW TO WIN THE BATTLE

As California enters what Sacramento calls: "the worst housing crisis in 100 years!", one must look at the big picture. The U.S. housing market is 4 million single-family homes short of what is needed to meet the country's demand, according to a new analysis by mortgage-finance company Freddie Mac. The estimate represents a 52% rise in the nation's home shortage compared with 2018, the first time Freddie Mac quantified the shortfall because states like California have made home-building practically a crime.

Thousands of modern Dwell magazine-type pre-fab home suppliers can deliver amazing modern homes for around \$150K but they are stonewalled, delayed and forced to double or triple those costs because of anti-building rules promoted by California and now mirrored nationally by greedy politicians. Greedy politicians take bribes from real estate lobbies and big developer corporations who HATE affordable homes because they don't make much profit on them.

One approach is to break-up and sue ALL of the real estate broker lobbies and big development corporations. You can sue them and their political lap dogs under RICO and anti-trust laws. Politicians receive bribes from the anti-housing bad guys as: cash, search engine rigging, hookers, dinners and via hundreds of other forms of payola and stock market trades. You would think that using legal tactic to take them all down would be a slam dunk. It isn't. Those politicians control whether or not those legal actions can get launched. So you have to be very creative to counter-measure them. For example, you can shame them into submission using the internet's mass media technologies.

Farmers and Colleges, especially, have tons of extra land. Farmers are losing money on agriculture and could make far more money selling their land for housing. Stanford University is in so much trouble for bribery, sex abuse, mysogyny, politics and other scandals that the State can justify taking back the Stanford campus to build housing on.

If the State of California was serious about solving the housing crisis it would support a SIMPLE program for the hundreds of thousands of renters, who get \$1600.00 a month, forever, from HUD for tiny rental apartments, to EASILY use that money for mortgage to build, or buy, a small home.

By law, there is SUPPOSED to be such a program: The HUD Section 8 Home Ownership Program, is supposed to allow this to happen, but it is shadow-banned across the state. Most county officials don't even know how it works or direct inquiries to dead-ends. The HUD Section 8 Home Ownership Program must be easier to get into, easier to find out about and no longer HIDDEN by County officials.

Don't believe it? Do a test yourself. Call the Housing agency office in each of California's 58 counties. When someone pick's up the phone say: "I am HUD-qualified for the HUD Section 8 Home Ownership Program. I would like to use the program to buy or build a home in your county. What do I need to do to complete the process?". Then experience a hell beyond anything you can imagine. You won't get in, most likely, and it won't be your fault.

You will be kept out. This is a federal law. It is your right to use this law. If you already get HUD money to underwrite your rent, you are per-qualified to use this program. Santa Cruz, Marin, San Francisco and other snooty counties will try to stop you because using it means you might not be white enough for their vision of high tax revenue home owners. You might be a deplorable if you use your federal \$1500.00 for an actual home. The average mortgage payment in America is \$940.00 per month to own a home. HUD pays an average of \$1500.00 per month to your landlord. Do the math! These people will build free home inventory for California, die, and leave that inventory in California. Why won't California help them to help solve California's housing inventory crisis?

A person building their own home is going to make sure it is done right if they are going to live in it. Build-your-own-home singular home-builders can contribute to the home inventory problem faster and more cost-effectively.

Marcia Fudge at HUD said the Biden administration plans to level the playing field for Americans who want to buy a home by providing down payment assistance for people to move from public housing to home-ownership. “We will make sure those who can afford a mortgage are put in a position to be able to buy a home,” Fudge said. “Right now we have banks who don’t want to lend to people to buy a home for less than \$50,000” — homes, she said, that “poor people” can afford, with monthly mortgage payments often lower than rent.

THE FAKE INFLATED COST OF A HOME

San Francisco built brand new homes across from the Police HQ in San Francisco and these small prefab units ended up costing hundreds of thousands of dollars per unit: They cost twice as much as the same unit in Austin, Texas would cost to build. Why are cities spending the same per apartment for homeless people that you can build a 1600 sq. ft. stand-alone single family modular home for!??? The answer is: Cronyism. They could have cost much less but the process tripled their cost in California.

California spends an average of \$800,000.00 to build each "low income apartment" for low income people. That is what the government pays for each unit. If you are not aware of how much things actually cost, and you are willing to pay all of the mark-ups and inflated numbers of retail prices then your average cost to build a 2,600 sq.ft. single-family home in the U.S. ranges from \$240,000 to \$710,000, with most homeowners spending around \$423,800 for the job.

The high cost is \$1,000,000+ for a 2,600 sq.ft. custom-built home with high-end materials, three-car garage, covered deck, and landscaping. That million dollar+ price is for the yuppie people who pay \$150.00 per month for the same tv channels that smart people get for \$10.00 per month. BUT!...The build-it-yourself cost for this is \$140,000 for a 2,600 sq.ft. builder-grade home with no changes. Every time you change even the tiniest thing in your construction plan, add \$10,000.00, or more, to your cost.

Most people only ACTUALLY need a 1,200 sq. ft. home but they can't let go of the "mine-is-bigger-than-yours" syndrome. That build-it-yourself modular/prefab home at 1,200 sq. ft. can be under \$100,000.00 if you are an EDUCATED general supervising contractor who hires a licensed, top-references, electrician, carpenter and plumber to build it with them. If you build-it-yourself without hiring those seasoned specialists, your project will usually fail. Homes only cost a million dollars if you are a sucker.

2 bedroom stand-alone homes can be built for \$100,000.00 in costs. Realtors, builders, developers and politicians will LIE all day long to keep this fact from being exposed. The bribes, mark-ups, payola, padding, profiteering, etc. make that same house cost \$1.2M on the market. For example, see: <http://ruralstudio.org/project/2020-20k-home/>

In Santa Rosa California, it cost the County \$268,000.00 to build a single seat public toilet. In Alabama it costs \$268,000.00 to build a 2 bedroom house.

San Francisco City Hall found that painting and servicing a white rectangle on the ground for homeless people to put their tent in cost the City \$6000.00 per month per rectangle. That is how much a penthouse luxury apartment with multiple bathrooms costs in Austin, Texas. Why is building something costing more than the thing is worth? Cronyism, kickbacks and self-dealing with buddies.

Many Housing Permit Department and City Hall people in San Francisco have been arrested, recently, but the corrupt practices and bribery continues without pause. Bribery of public officials often doubles the cost of a home.

ENCAMPED HOMELESS PEOPLE DON'T WANT YOUR HELP

Even more interesting: San Francisco took over luxury hotels and offered them to the homeless but 70% of the homeless refused to use the free housing. 70% of the homeless refused a free home in a luxury hotel!!! Why?

The homeless people said why, and it is documented, but NOBODY IN SACRAMENTO EVER reads the statements or they hide the statements from the public.

Here is why the homeless said they don't want California's free housing:

- 1.) The rules to live in the housing are not rules they can, or will, comply with.
- 2.) Most of them are addicted to smoking, drinking and drugs and the "free units" have cameras and sensors that record them doing the illicit things. They know that and won't move into a place they know they will get arrested or evicted from as fast as they move in.
- 3.) The vast contracts and regulation documents they must agree to are something they need a lawyer to explain to them and none of them have lawyers.
- 4.) Many of them use sex bartering and the cameras on the units will record sex worker activities.
- 5.) None of them want to be condensed into a tight space with other crazy people because they get set-upon by the worst of the bunch.
- 6.) They don't want multi-unit housing! They hate it. They want individual homes where they control the whole environment. San Francisco is spending at least TWICE as much money for short term solutions as it would cost for individual pre-fab stand-alone homes.
- 7.) Many of them are clinically insane and won't cooperate with any form of order or "rules".

Most of all: Drug-soaked crazy people don't want any help from The State. Families, seniors and disabled people want the help from the SSA and Housing people and they are getting ignored.

ALL homeless people should receive a free mental health evaluation and free therapy until their issues are resolved.

California has published a vast number of reports, at a cost of tens of millions of dollars, listing the exact number of homeless people, but California has never spent the \$60,000.00 it would cost to ask each homeless person the 10 questions about what they want! California politicians in Sacramento don't actually care what homeless people want. They care what they can scam out of a "stimulus" fund to scrape their cut off-the-top of.

HOUSING AGENCIES (PHA'S) AND UNIONS ARE STOPPING SOLUTIONS TO THE HOUSING CRISIS

The San Francisco construction unions and lobbies won't allow the homeless solutions that will work. All of the special interests in San Francisco, from unions, to rich people, to politicians, to realty lobbies, to you-name-it, will block anything that makes housing cheaper. They ALL make their money off of a percentage of the most expensive property values. The Realtor lobby and the big building lobby are probably the most powerful special interest groups in California, after the teachers union. They HATE affordable housing. Anything they say to the contrary is a lie. They bribe 90% of the politicians in the state via Dark Money conduits. They are NOT going to help solve this.

Remember when California shut down it's 400 Redevelopment Agencies because the corruption and bribery was so out of control? It is the same exact thing with California PHA's.

When you call top Housing agency officials in Santa Cruz, Marin, San Francisco, Tulare and other counties to ask them what the main reason is that poor people can't get new homes built, they all pretty much said: "The State and County laws prevent us from building anything these days..."

San Jose got it right by promising a one hour permit time-frame for ADU home construction but other counties are resisting this permit optimization effort because permits are where bribes happen!

Factory OS, Clayton Homes, Homes Direct, and an army of other factory built home companies, have offered homes to Californians for \$150,000.00, or less, if the State will just fix the permit process and give them a pre-order of 200 homes at a time. Banks will finance these...if the State of California will help bundle land and construction financing in the same package.

Marin County staff said: "We have enough open, empty fields in the county to house every single homeless person in the State but we can't get anything built here without a ton of lawsuits, 5 year studies and permit hell-scapes. Every homeless person could get a modern Dwell Magazine-style stand-alone small house if the County Office's didn't block every single construction project that is attempted!"

The difference between what California says, and does, is the same difference between night and day. San Francisco is an example of how home-building has been halted in the State. The rest of the state is following the profiteering based blockades to keep homes from getting built to deliver permanent supportive rental housing for people living with a serious mental illness who are homeless, chronically homeless, or at-risk of chronic homelessness. The government funds are rarely ACTUALLY used to acquire, design, construct, rehabilitate, or preserve permanent supportive housing, which may rarely include a capitalized operating subsidy reserve.

OK, so say you don't care about the homeless people. "Screw em all" you say. "They are low life drug users and weirdos who won't confirm to our white picket fence social programming..."

CORRUPTION AND CRONYISM MAKE IT IMPOSSIBLE FOR CALIFORNIA TO HELP MIDDLE-CLASS AND LOW-INCOME HOME BUYERS

Want to buy a home or buy a bigger home? Forget it, you are screwed if you live in California. The State has, essentially, "outlawed" construction.

You can't build a home without the process being so painful, expensive, delayed and litigation-focused that it will ruin your life.

If the State of California was serious about solving the housing crisis it would create a single two to three page building permit application, that worked in every County, that a single state office could sign off on within 48 to 60 hours.

If the State of California was serious about solving the housing crisis they would change the zoning codes. Nobody can build in California without being punished for it by California and County regulations.

If the State of California was serious about solving the housing crisis they would turn the tsunami of state-created immigrant unemployment into a positive, Now that California has let half of Mexico in to the State, you have huge clusters of skilled workers hanging around, looking for work, a few blocks away from every Home Depot in the State. Each 20 of them can erect a move-in ready home in one week. Give them an empty pasture and a challenge and turn them loose with a pay-per-house incentive payment structure.

All of the programs listed at: <https://www.hcd.ca.gov/grants-funding/active-funding/index.shtml>

... need TRIPLE the amount of funds currently allocated and they need to be moved into no less than 3 main programs. The current MASSIVE number of programs guarantees that corruption, duplication, and transparency inefficiency are at a maximum worst-case level. In all of these programs there is nothing for the individual. Almost all of the plans are based on the "Shove-them-all-in-a-big-concrete-building" concept. The public does not want that. NOBODY wants to live in, or see, multi-unit housing. The State needs to also TRIPLE the amount of programs for the SINGLE FAMILY or INDIVIDUAL. County Housing agencies have been found to be corrupt and motivated by

bribes. If the State of California was serious about solving the housing crisis it would put a billion dollars of it's freebie COVID CASH from Washington, DC into it's CalHOME fund and restart that fund.

On Broadway and Divisadero streets in San Francisco, giant mansions house two to four people. Those structures, without changing the outside of the buildings one tiny bit, can house hundreds of people. NIMBY's biggest complaint is based on appearance. If you change the inside of structures and keep the outside looking "classic", you get the least amount of NIMBY issues. San Francisco already has ALL of the fully constructed square footage to solve ALL of it's housing issues, if it works from the inside out. Empty office buildings and dead millionaire mansions can deliver the square footage.

Gavin Newsom based his election on providing millions of new homes to California. Nobody has been able to find a single one of these new houses he said he was going to build.

THE BIGGEST TAKE-AWAY: "NOBODY wants to live in a multi-unit concrete building block. Multi-unit project buildings harm people's mental state and create conflict, house gangs and they are bad socially. There is enough empty land for everyone in California to have a 1600 sq. ft. home of their own. Change the rules so that more people at below \$100K income levels can buy or build a home and the public will solve the housing crisis.

Until those kinds of things happen, there is no hope for the State! Greed, payola, special interests and revolving door jobs control your housing opportunities in the state of California. California State has every tool, resource and dollar it already needs to solve every single housing issue in the State except one think: "Courage". It takes courage to say "No" to the special interests. It takes courage to say "No" to the Silicon Valley billionaires. It takes courage to cut off the spigot of Congressional bribes. Most of the federal cash that comes to California always ends up in a politician's, or their friend's pockets. It takes courage to say that every Californian that invested their lives in California deserves the home in California that they were promised. Fix the HUD Section 8 Home Ownership Program in California. Make an office in every major city that ONLY helps people with the HUD Section 8 Home "Ownership" Program and not just the Section 8 "rental" program.

ALL OF THE MONEY needed to fund that is already paid out in California, by HUD, EVERY MONTH! Give citizens their promised right to build and own a home!

The State of California and HUD housing agencies have long lists of "Certified", "Qualified", "Approved", etc. loan brokers and mortgage brokers that the agencies say will help low-income citizens get single family financing.

So we called everybody on one of those lists provided by the State of California.

In fact, those loan brokers and mortgage companies don't want to hear from you unless you are in a bid war on a \$1.5 million dollar bungalow for which you already have \$500K, or more, in cash in the bank.

Only a small percentage of the loan brokers and mortgage brokers on those lists had EVER done a completed subsidized home loan and even less had any clue how to paper a HUD Home Ownership financed home loan. Over 20 U.S. Bank mortgage brokers even refused to respond to emails or phone calls if one used the words "Cal-FHA USDA" because, as one unusually talkative U.S. Bank employee stated: "To us, those are code-words for 'poor people', the market is, frankly, too hot for banks to bother with the poors because we don't make any money off them".

It does not matter if you have spent years trying to keep your FICO score above 700. It does not matter that you never had a bankruptcy. It does not matter that you have guaranteed income for life from your government benefits. All of those things that the media told you to do to be a "good citizen" with a good social credit score seem to be pointless.

The loan and mortgage brokers on those lists are only on those lists to get a few PR brownie points. They do not want to hear from you or deal with you unless you are making big bucks in tech. They will let you upload your information but they will do little or nothing to help you because they lose money by helping you. They only make money off of the big deals.

On top of that the big real estate developers like Pulte Homes, Berkshire Hathaway (Warren Buffet), Kauffman and Broad (K&B Homes), etc. are bribing the Governor and the heads of all of the agencies to keep you from building a home or getting a home that is not in one of their giant developments.

Most low-income people are the laborers who build the homes in those big real estate developments. Those people know how to build their own homes but State and Federal agency heads are bribed to make sure you NEVER can build your own home. Those people know they can build an incredible home, on their own, for under \$100,000.00. You can see thousands of videos on the internet showing people that do it every day in any state but California. Try to build a home in California. You will find you are blockaded at every turn EXCLUSIVELY by rules that you have to follow but that big developers do not!

Try to buy a modular or factory build home in California ...Same thing.

The political bosses in California have taken so many bribes from big special interests that they can't stop sucking on the graft hose.

Political Bribes By Special Interest Lobbyists Make California Uninhabitable

If the state and federal government were actually serious about solving the housing crisis, they would have a mortgage agency that only serviced subsidized housing!

Low income people: "approved" lenders and mortgage brokers hate you and don't want you bothering them.

US BANK, Wells Fargo, Guild Mortgage, and all the rest, talk a good story when they are on-camera or doing a public presentation but the reality is that they consider you to be a "waste of their time" if you are needing subsidized housing. They all issue press releases where they talk about their "commitments" and "special programs" but they put zero effort into those green-washing intentions. They only say those things to keep the banking regulators off their backs and to make their favorite politicians happy.

When real estate developers are paying politicians and banks to ignore low-income people and 79% of America is now "low income", with more arriving daily, what chance does the public have?

The trend is edging toward disaster.

THE WORST PLAYERS IN WAR AGAINST HOMES

The incipient "Great Reset" is a multi-faceted beast. We talk a lot about vaccine passports and lockdowns and the Covid-related aspects – and we should – but there's more to it than that.

Remember, they want you to "own nothing and be happy". And right at the top of the list of things you definitely shouldn't own, is your own home.

The headlines about this have been steady for the last few years, but it has picked up pace in the wake of the "pandemic" (as has so much else). An agenda hidden on back pages, behind by Covid's meaningless big red numbers, but perhaps no less sinister.

You can find articles all over the net talking up renting over owning.

Last month, for example, Bloomberg ran an article headlined: "America Should Become a Nation of Renters"; Which praises what they call "the liquefaction of the housing market" and gleefully expounds on the idea that "The very features that made home buying an affordable and stable investment are coming to an end."

The Atlantic published "Why Its Better To Rent Than Own" in March. Financial pages from Business Insider to Forbes to Yahoo and Bloomberg again are filled with lists titled "9 Ways Renting is Better Than Buying", or similar.

Other publications go more personal with it, with anecdotal columns about ignoring financial advice and refusing to buy your home. Vox, never one to sell their agenda with any kind of subtlety, have a piece titled: "Homeownership can bring out the worst in you"

Which literally argues that buying a house can make you a bad person: "It's the biggest thing you might ever buy. And it could be turning you into a bad person."

So what exactly is the narrative here? What's the story behind the story?

The short answer is fairly simple: It's about greed, and it's about control.

It almost always is, in the end.

The longer answer is rather more complicated. Major investment firms such as Vanguard and Blackrock, along with rental companies such as American Homes 4 Rent, are buying up single-family homes in record numbers – sometimes entire neighbourhoods at a time.

They pay well over market value, pricing families who want to own those homes out of the market, which forces the housing market up whilst the Lockdown-created recession is lowering wages and creating millions of newly unemployed.

Of course, this is motivating people to sell the houses they already own.

People all across America have been saddled with houses worth less than they bought them for since the 2008 economic crash, and are eager to take the cash from private investment firms paying 10-20% over market value. Combine an economic recession with a created housing boom and you have a huge population of motivated sellers.

Of course, many of these sellers don't realise, until it's too late, that even if they attempt to downsize or move to a cheaper area, they may be priced out of the market completely, and forced to rent.

As such, in the last year, the private investment share of single-family home purchases is estimated to have increased ten-fold, going from 2% in 2018 to over 20% this year.

As more and more people are forced to rent, of course, rental properties will be in higher and higher demand. This in turn will drive the cost of renting up.

Market Watch has already reported that, in the last year, rent has increased over 3x faster than the government predicted.

This problem is likely to get worse in the near future.

Congress "accidentally failed" to extend the Covid-related eviction ban.

Which means, this weekend, while Senators adjourn to the summer homes they probably don't rent, the ban will officially end and a lot of people are likely to have their houses foreclosed or their landlords kick them out.

The newly empty buildings will be a feeding frenzy for the massive corporate landlords. Who will descend on the banks like starving hyenas to snap up the foreclosed properties for pennies on the dollar. Just like they did in 2008.

None of this is any secret, it's been covered in the mainstream. Tucker Carlson even did a segment on it in early June.

The Wall Street Journal headlined, back in April, "If You Sell a House These Days, the Buyer Might Be a Pension Fund", and reported:

Yield-chasing investors are snapping up single-family homes, competing with ordinary Americans and driving up prices

However, since then, something has clearly changed. The propaganda machine has kicked into gear to defend Wall Street from any backlash.

No better example of this shift can be found than The Atlantic, which ran this story in 2019: **WHEN WALL STREET IS YOUR LANDLORD**

With help from the federal government, institutional investors became major players in the rental market. They promised to return profits to their investors and convenience to their tenants. Investors are happy. Tenants are not.

...and this story last month: **BLACKROCK IS NOT RUINING THE US HOUSING MARKET**, The real villain isn't a faceless Wall Street Goliath; it's your neighbors and local governments stopping the construction of new units.

Going back to the Vox well we have: "Wall Street isn't to blame for the chaotic housing market" Which ran just a few days after the Atlantic article, and is practically identical.

Both these (oddly similar) articles argue that Wall Street and private equity firms can't be blamed for buying up houses, and that the real problem is the lack of supply to meet demand.

You see, all the "selfish" people who already own homes (they did say it makes you a bad person) are blocking the construction of new houses, and thus driving up the cost of property through scarcity.

This has been a logically flawed argument around the housing market for decades.

That there aren't enough houses for people to buy is patently absurd when the US census data says that there are over 15 million houses currently standing empty. That's enough to house all of America's roughly 500,000 homeless people 30x over.

There's plenty of houses, there's just not enough money to buy them.

The reason for that is the same reason the California has massive "homeless camps" in its major cities, and that so many people are having to become renters instead of owners: wage stagnation.

For decades now, wage increases have lagged behind increases in the cost of living. In the 1960s one full-time job could afford a decent standard of living for a family of four or more. These days both parents work, sometimes multiple jobs each.

It was huge amounts of financial de-regulation which created this situation. So, whether you believe Vox's BlackRock apologia or not, one way or another Wall Street very definitely is to blame.

But this isn't just about money. It never is. Just as the war on cash isn't just about efficiency, and the environmental push isn't just about climate change. Ditto veganism. It's about control. Just like vaccines, lockdowns and masks.

It always comes down to control.

It's an oft-used cliché, but no less true for that, that homeownership "gives people a stake in society". A family-owned house is a source of security for the future and something to leave your children. It is also sovereignty and privacy. Your own space that no one else can control or take away.

In short: A homeowner is independent. A renter is not. A renter can be controlled. A homeowner can not.

It's the same reasoning behind the way working people were encouraged to take out loans and become debt slaves. If you limit people's options, if you make them rely on you for a roof over their heads, you have control over them.

There's a great article about this situation called "Your New Feudal Overlords".

Under Feudalism, land wasn't owned by the working class, but provided to them by landed barons, hence the term "Land Lord". If you disrespected your Lord, or broke his rules, or he perceived another peasant/farm animal/crop would be a better use of the land, he could take it back.

Essentially, the behaviour of serfs was kept in check by their reliance on the nobility for a place to live. That's very much the dynamic they're going for here.

Rental agreements can be full of any terms and conditions the landlord wants, and the more desperate people get the more of their consumer rights they will sign over.

Maybe you'll agree to smart meters which monitor your internet or power-usage habits, and then sell the data to behavioural modellers and viral marketers.

Maybe you'll have to agree to certain power limitations or water shortages in order to "fight climate change".

Maybe it will get worse than that.

Maybe they'll go full Black Mirror style corporate dystopia. Maybe, through affiliation programs, the mega-equity firm which owns your rental house has ties to McDonald's, and as such will require you to not eat at any competing fast-food franchises, or demand you observe at least ninety seconds of Disney advertisements per day.

Maybe it will be as simple as including vaccine status in the tenancy agreement, making it impossible for the unvaxxed to find a home.

Maybe they just want to make poor people miserable.

After all, the super-wealthy have got all the money they could ever need, and all the luxury they could ever use. Their living standards are as high as physically possible. So maybe the only way they can keep "winning", is to start driving the living standards of us proles down.

No air travel. No vacations. No going out at all. Live in a tiny house, or a pod. Eat bugs. Get rid of your car. Rent your clothes. Or your furniture. Pay taxes on sugar. And alcohol. And red meat.

They've been very clear about this. They've told you about the Great Reset and the Internet of Things. That's the plan.

You won't own a house. And you'll be happy...or else the mega-corporation you're forced to rent from will kick you out.

The lenders said that Wall Street Conglomerates and investment corporations are coming in right behind the California fires and buying up all the fixer uppers and chunks of homes so that individuals can't get them. The contractors that made money flipping homes are saying they can't get enough fixer uppers any more. The lenders also said that "the lenders market is only looking at these \$1.5M home deals where people are overbidding \$200K or more".

There are two conglomerates that already have people on the ground in South Lake Tahoe and Southern Oakland making cash offers for properties, US Bank told us. We can build a nice house for about \$100K. We have done such nice ones in the past that they were on TV. Access to housing in the county is being limited by the conglomerates and banks and the push by lenders to keep the over-priced housing market going for as long as possible. Alameda County and All East Bay counties should make these people buy houses for low income and seniors since they are stealing all of the homes in the area:

Public Comments from Readers:

- This is an excellent article which should be blatantly obvious to all by now: Blackstone/BlackRock and the CCP are the major real estate owners — this is the culmination of the 50-year long Rockefeller Plan, hatched by the meetings of Rockefeller and Mao and Zhou when Nixon and Kissinger, David Rockefeller's minions, flew to Beijing with Rockefeller aboard Air Force One!

Blackstone Group — founded with Rockefeller seed money by DR's minion, Peter G. Peterson — owned 30% of BlackRock which was spun off from the Blackstone Group — who knows what their ownership is today?! In the 1970s Rockefeller and the Chicoms created the Rigged Market of Rigged Markets — the control of capital/labor between these two economies, establishing them as the top 2 economies 50 years later — eventually merging Wall Street and the CCP, which is exactly what happened! IT IS ALL ABOUT the ultra-concentration of ownership — welcome to the Global Neofeudalist State.

- Vanguard (privately owned) owns most shares of Blackrock as well as most of the other main players. Vanguard sits at the top of the pyramid of power and money and is THE big monopolist in this world. See this video

<https://www.bitchute.com/video/QdbvR9Wn5HFU/>

- If you don't own real property, your economic security and independence is weakened. For the last 20 years I've owned at least 2 places to live just for extra safety. At this time I have 3. But then I've been a real estate investor for almost 50 years.

- Good analysis. Effectively, the US Constitution was Revolutionary because it made a statement that Individual Rights were going to be protected for everyone. In these Rights is understood the right to own, a key feature of real capitalism. But when we can't make the difference anymore between Major Corporations and Government, and these mega corporations get into a complicit scheme to own everything...our individual rights dissipate. Prior to the US revolution, Individual Rights were closely correlated with social status which is closely related to economic status. You just need to read the Plea (<https://craigwright.net/blog/bitcoin-blockchain-tech/satoshi-and-the-sophists/>)

Mega elitists such as Craig Steven Wright, the fake Satoshi Nakamoto and pretend Bitcoin creator, to understand to core of the Big Post Covid Reset...it's running back to your life being a Privilege distributed by the State. In English, 2 words describe the core of our rights: Freedom and Liberty. One carries a exogenous dimension (Liberty), the other an

Endogenous one (Freedom). In the French language, there is no such nuance. And Liberty and Freedom are only Liberté And it their dictum “Liberté Égalité Fraternité”, an Individual Rights incompetency arise. Because with these 3 words persists the idea that we are foremost a community before being Individuals, in line with a Matriarchal concept, but the Antitheses of the American Original vision. Is it surprising that Sarkozy promulgated laws which made it so that even in your House, what you say may be held against you. In France, if more than 3 persons in a house are talking, and that one is not a direct member of the family in the first degree, any hate speech articulated may send you in prison and get you a fine...No sanctity in the Household, even if you are the owner.

- Manfred Max-Neef, the late “Barefoot Economist” from Chile, who lectured at UC Berkeley, said 5 or 10 years ago that USAmerica was the 1st “Undeveloping Nation” and cited formerly affluent homeowners living in vans at the curbside of their foreclosed mansions. An analogue to this, for “dot” collectors, is what Alan Watts called over 50 years ago “the Los Angelization of the world” (himself an L. A. resident, and as a bonus fun fact, interviewed my old man, a profoundly corporatist lawyer — ecjlaw.com — for his services, in 1969, and declined them, despite an intro from his friend Laura Huxley). Both the LosAngelization of the World and Undevelopment are sorry symptoms of the same disease of Organized Greed, without an apparent immune system or other remedy in most societies, since Intel is busily employed with its vast armies of termites to eviscerate all these structures, many ages old.

The controlled demolition of our societies and cultures goes on apace, with accelerants of salivating covetousness, institutionalized sins. I myself have always preferred the nomadic way, the street, rich with the opportunities for unconventional wisdom, such as contented any number of native peoples here in USA, before having even their tribal roots and networks here largely deracinated and decimated by “settlers”. And, even more so, “developers”. All as a fairly recent development into this Age of Undevelopment. I met a guy 50 miles down the coast near the seaside in Bucanneer Park, Oceanside, north San Diego County. We talked a long time one sunny day, he told me from the front seat of his high end Lexus luxury model how he had been living there in his car with his cat for three years, after losing his mansion with custom swimming pool. He had little street savvy and I cringed while he told me, with childlike naiveté, stories of being mistreated by all the usual suspects, health agencies, other street people, and on and on. I tried to warn him, seeing one gnarly red flag after another, but it went in one ear and out the other, from what I could tell.

- Here in the US, the CDC mandated a policy to prohibit eviction of renters for 1 year (that has just now expired). Many landlords sustained huge financial losses or bankruptcy as their renters became squatters. What this might portend for our biowarfare future is the squeezing of individual/small group rental property ownership using onerous regulation, a lack of access to financing, etc. to foster the consolidation of rental property by mega/global corporations who will seamlessly align with any and all tenets of The Great Reset.

- Do they not fear that creating a population that owns nothing, that population also have nothing to lose?

- Why doesn't anyone discuss zero to negative interest rates ? Why has this unprecedented phenomenon been pushed by the banksters ?

- In America, the government owns your home even if you pay the banksters off. Don't pay your property tax and out on the street you go.

- I've given this a lot of thought over the last dozen years. And done a lot of research too. It is one of the most important mechanisms of transforming middle-class life into out and out serfdom in America, this taking away the possibility of home ownership. First they went after the millennials, by way of impossible levels of student debt (so they couldn't buy a house), then they worked on the problem of what to do about the existing tens of millions of homeowners. Private equity entered into the picture big-time and since then has been at it relentlessly. Basically, it is not possible for any normal middle-class person to buy a home in any desirable part of the country (and increasingly even the less desirable, more remote and inaccessible parts), because you can't compete with the endless cash resources of private equity. The article is very right, and I have had the same thesis in mind for many years: homeownership provides a form of security, a political voice that comes from power, that the new feudal lords have to get rid of at any cost. And they've succeeded without any noise.

-IT IS ALL ownership — not just home ownership! Who owns the banks? In a study of the Rockefeller Financial Group back in the early 1970s by Prof. James Knowles (impossible to find now, although once frequently found in other book citations), Prof. Knowles wrote that the owners of the banks was a carefully guarded secret. Once upon a time we knew. Recall that the original primary investors in Intel, Apple and Microsoft was the Rockefeller family — who are the principal investors today — not the investment firms of BlackRock, Vanguard, State Street, etc., but those investing through them??? NOBODY KNOWS!

- “No property rights for private citizens” ? Why so stalinist? It's not necessary at all. They will just make us so poor, that we won't be able to own anything of relevance, everything courtesy of free market inclusive capitalism.
<https://qz.com/work/1942727/pope-francis-backs-the-council-for-inclusive-capitalism/>

They are well on track, today this is home, in few years you won't be able to afford an electric car, carbon indulgences will impoverish us further... People will have tooth brush and clothes of their Choice. And be happy, yeaaaa

- ...Where there's *Rent* there are *Rentiers*...“The Cantillon effect..The Cantillon effect was explained by Richard Cantillon (1680s – 1734) an Irish-French economist and author of “Essai sur la Nature du Commerce en Général” (Essay on the Nature of Trade in General). In his Essay, Cantillon provided an advanced version the quantity theory of money, however he also dug deeper and perceptively into the relative inflation associated with the introduction, circulation and velocity of money. He explained that the original recipients of new money enjoy higher standards of living at the expense of later recipients. This is because of inflation in asset prices e.g. affecting house prices and rents and as a result of time lags impacted by a disproportionate relative inflation in prices of assets and goods decreasing value of money in the hands of non-asset holding individuals i.e. the majority. These concepts of relative inflation, or a differential rise in prices among different goods in an economy, is now known as the Cantillon effect. The Cantillon effect has two components. One is the impact of new money on differential inflation rates between assets and consumption items and, the other, is the real incomes and wealth effects that result in an increasing disparity in incomes and wealth within the country. Under QE this effect has been extreme because banks short-circuited money distribution largely to themselves and a reduced number of large corporate customers to deal in assets and share buy backs. It is self-evident that if rentiers maintain a growth in income that is inflation proof the state of their real income will constantly rise. However, this is not the case of the state of real incomes for an increasing majority of the population. This Bank of England “policy” has done little to help the conditions of the working population which is becoming increasingly asset-less. This mechanism constraining asset access and accumulation by the majority is a driver of an inevitable future increasing inequality.”

“The nature of asset-derived income...Thostein Veblen identified the problems we now face, back in 1921, well before the 1929 New York Stock Exchange crash, when he examined trends in financialisation and the growth in the rentier class in manufacturing and industry. Financialization is the process whereby all economic considerations are

reduced to a nominal financial quantification usually measured in the local currency or expressed in a common currency by applying exchange rates. The crucial problem with financialization is that what appear to be distinct policies or even schools of thought, such as Keynesianism or Monetarism, and supply side economics are in fact questions of emphasis on which aspect of financialization is more significant as a policy target. These are aggregate demand (expressed as a quantified monetary aggregate) or money supply (expressed as a quantified monetary aggregate). Increasingly economic activities involve so-called financial engineering where the manipulation of numbers substitutes for real production or services where income is received in return for little effort beyond the holding of some asset which generates an income from those who make use of the asset. This has created a major financial services activity that is made up of über-rentiers.” ... (Emphasis mine...)

...US M1 Money Supply, 1960-2021: (...Q: – Now just *Where* do y'all think pretty much *Alla* that *Went* (and subsequently *Stayed Put*)?...))

- First time commenting here. Today I just couldn't stand. I've checked the whole article and comments for instances of 'capitali'.

Until now just 4 instances, not a one in article. Horror!!! No wonder we are in deep shit, since knowledge of who is banging us from behind is almost literally absent. Century+ years ago Marx predicted, capitalism will end in monopoly capitalism and that is exactly what we are experiencing now. They will buy everything, they will control everything. Sadly, even majority of the “left” would probably not agree with me on this point, because they believe monopoly capitalism happened during robber barons times. Never mind that concentration of capital today is unprecedented and is just increasing. And when I hear lamenting about feudalism.....I don't know whether to be sad or angry. From article: “The short answer is fairly simple: It's about greed, and it's about control. ”

Sure, control, power, no doubt. But greed.....Invoking greed is completely useless psychologization. It's excellent time for an adage, one profane and profound: Why a dog is licking his balls? Because he is able to, because he can!!!! No bs about he likes it or.....ability is first. Therefore the right question is: What is the basis that allows today monopolists to grab? I haven't been precise enough in the third line from the end. It's not just that ability is first, it is a necessary condition. To rephrase the final question, a million dollar question, not a rhetorical question, for most people is unfortunately like to ask what 42 means and I predict I won't get the right answer: What is the ultimate necessary condition for monopolists' grabbing???

- The investor class has a powerful ally (as if we didn't know that) in the FHA in the US. Example: the condo community I live in now has so many rentals that the FHA will not approve a loan. Since these are lower end condos, FHA loan approval is absolutely crucial for a prospective buyer. Consequently, one has almost no choice but to sell to an investor – who is able to pay cash.

They got you coming and going.

- Yup. Ban ownership all non-resident owned property, along with the existence of all forms of corporate stock ownership, and the “rental” problem resolves in a flash. Of course no one backs these logical remedies, because they're invested in IMF and World Bank controlled portfolios and pension funds. Who's zoomin' who?

- Some guy in libya did it once, does anyone remember what happened to him? Muammar al Ghadafi. "Today there is swine flu. Perhaps tomorrow there will be fish flu, because sometimes we produce viruses by controlling them. It is a commercial business. Capitalist companies produce viruses so that they can generate and sell vaccinations. That is very shameful and poor ethics. Vaccinations and medicine should not be sold," he said. He went on to say that "medicines should be free of charge and vaccinations given free to children, but capitalist companies produce the viruses and vaccinations and want to make a profit. Why are they not free of charge? We should give them free of charge, and not sell them." Muammar Gaddafi Speech To United Nations - September 23, 2009

- Sure our equally faux Govt will soon roll out this horror show too:

<https://www.rt.com/usa/530813-eviction-blackrock-great-reset/>

- Hello everyone! Re: Housing market in cities. Its fckin scandalous what's going on in cities throughout the world. Average people who work damned hard for their barely minimum wages can't get the mortgages to afford to buy at even the bottom end of the market in the cities they were born in. They can't save enough for a deposit cos the prices are constantly rising. Private rentals are through the roof and there is a very, very long waiting list for cheaper, social housing. This is an excellent documentary I saw on TV not so long ago. Sorry I can't find a link for the whole film. The situation has gotten even worse since this film was made in 2019. 'Push' 2019 trailer:

<https://www.youtube.com/watch?v=2iLWpuZrd-I>

'Landlords without faces. Apartments without renters. A documentary exploring the new, unlivable city. Housing prices are skyrocketing in cities worldwide. Incomes are not. The working and middle classes are getting pushed out of cities, while financial powerhouses use housing as a place to park money. PUSH is a documentary from award-winning director Fredrik Gertten, investigating why we can't afford to live in our own cities anymore. We follow UN Special Rapporteur on Housing, Leilani Farha, on her quest to understand who's getting squeezed, who's getting rich and why housing has become one of today's most pressing world issues? ' The film had its World Premiere at CPH:DOX, 2019, where it won the coveted Audience Award.

- I don't know how wonderful a mortgage is. My darling ex paid for it for a while. Though as a migrant DownUnder coming from Berlin about 75% rent. The way the city council administers a quarter of a million buildings means rent doesn't kill life off as it does in similar sized anglo amerikanized cities like Sydney, which mortgage as the con to freedom when you are almost dead means no life before you get there. Saving for the deposit for instance at a time when you are twenty something should be spent getting ripped into life. Conconvid 19-33 or not. Sitting nowhere to save every penny because you know when you're old blah blah blah leaves no money to get into life. Which is perhaps what the politicians want. As they are proving with the lock up regime of no choice. Furthermore one's money ought if possible to be invested in you choice so that with a better saving amount nationally foreign take overs will less than more. In Australia is it basically non existent. No one invests in anything. When Darwin harbour was up for the 99 yr lease no Australian firm, company or investors stepped up because the money was wasted in non productive real estate. The Chinese won the contract. Now the government is complaining that this is the Chinese Governments infiltration of Australia. Well almost. Implied. Apart from nearly all production DownUnder is US, UK, Holland and then EU, Japan in minerals mainly. The Chinese have stopped buying coal and Russian tenders have won some contracts. If the locals put their money where their mouths were they'd have more local ownership. A mortgage is not a life. Though the banks are laughing without having to try it on to get your life signed away for the next quarter of century – spent doing nothing cause you got no money. Most inner cities compared to other societies here are basically lame.

- ...Calling 'em Vampires would be granting them a generous romanticism/glamour that they *Do Not* deserve... – Straight-up-and-down *Leeches* is what they are, in point of fact... ...- *Life-Sucking Leeches*...

- Two phenomena are occurring in parallel, at least here in Canada. On the one hand, in the cities, what we call “renovictions” are multiplying and throwing hundreds of families out on the street who can’t find new housing. New landlords like Blackrock are buying up apartment blocks and shortly afterwards send eviction letters to tenants because major renovation work is needed. These renovations often involve cutting the number of units in a building by half and turning them into deluxe apts. Current tenants can’t afford and, as a result, many people are looking for new housing and prices are skyrocketing. On the other hand, more financially comfortable people, mostly retired baby boomers with good pensions, are buying second and third homes in the countryside, which has pushed up house prices by 20-40% in a few months. Add to this refurbishing of primary residences and their new second homes, which is driving up the price of lumber and creating shortages. In addition, covid-19 has created a buying frenzy: cars, RVs, motorcycles, electric bikes, boats, etc., it’s completely crazy. Everything is going up except the inflation rate. People are living like there’s no tomorrow. Maybe they’re right. Personally I see a gloomy tomorrow.

There’s also dire staff shortages in every sector. Things are not looking good and expect tribulations before owning nothing and being happy.

- ‘it’s completely crazy. Everything is going up except the inflation rate. People are living like there’s no tomorrow. Maybe they’re right. Personally I see a gloomy tomorrow.’ Yes Jean, I’ve been discussing this craziness with friends for quite a while now. Zero % interest rates on regular savings accounts, so people are being coerced into ‘investing’ with any extra cash they may have. The stock markets and housing markets are booming it seems. Mortgage rates have been at an all time low for years.

If (or more likely when) there is a massive crash it will be the small ‘investors’ who will suffer after naively risking all their hard-earned savings. It may be quite lucrative for some right now, but I don’t see how it can carry on like this. This surely can’t be a sign of a healthy economy....or maybe it is, but only for wealthy people. I don’t know.

- A book called The Thought Experiment shows the quantum outcome of changing these things using thought patterning of the masses that Google and Facebook use every second of every day: 1) Obfuscation: Just basic confusion of one thing for another- a smoke and mirrors game. 2) World View Poisoning: Conditioning the way people view human nature and their own self-value. 3) Conditioning of Primal Fear: The exploitation of primal fears. 4) Divide and Conquer Strategy: Highlight any perceived differences between people and then exploit those differences to create infighting so they are easier to control and conquer. 5) Indoctrination of Education System: A left brain form of Nazis called it mastery learning. grade school, HS and university. Trivium and quadrivium education could counteract this. 6) Controlled Opposition: Basic dialectics - dialectical mechanics or Hegelianism Creating conflict that you already have an outcome management system for. Create the conflict and wait for a type of reaction to the conflict (usually chaotic that demands a resolution) and then you step in and resolve it. Artificial conflict resolution. 7) Monetary System of Control: Debt based fiat currency fractional reserve banking a system of illusion that we call money yet people believe in it like its a religion or god. People seem to be the most powerless to come out of. It exists purely in the mind. 8) Control of Mass Media: If you can control the info that people get to see hear and read you control their perception of reality. If you limit the scope of what they can take into their minds and awareness you limit their possibilities of solutions. Human perception management. 9) Food and Medicine: attack on the physical aspects of the body relates to how our brain development goes. You affect thought and consciousness you are what you eat. Use techniques that are damaging to consciousness through the modern medical system 10) Illusion of Time: Very important for people to grasp. Play on people's seeming inability to live in true present moment awareness-- getting people to live in regret over the past or anxiety over the future. Its a fear based technique. Takes us out of true present awareness. Being fully present now to take on what is happening now. If our consciousness can be manipulated into always looking into what has happened. It takes away effectiveness of dealing with the current situation. 11) The DHR Factor: Denial, Hassle, Ridicule: What other people perceive about

you. Denial, hassle ridicule factor. Things are fine the way they are I don't want to rock the boat because I may have to deal with hassle of other people. The hassle free zone is-- I don't want all the uncomfortable aspects of life that come with standing up for truth. These are all fear based. Heightening those three forms of mental instability. Trap of inactivity and not really doing anything to make things better. 12) Religion: We need to understand these last three the best. Religion is a form of binding. To tie back Re-Ligare tying back. Forms of modern religion are mind control based on astro-theology. Giving people an exoteric version of something that was once esoteric or internal. Government is the binding on the left brain... religion is the binding of the right brain. 13) Use of Subversive Symbolism: Based on ancient sacred symbolism. Based on symbols that have been with us from antiquity. Solar symbolism, life force symbols, energy, blood, or anything we need for existence and life. They use these in modern institutions--- banks, police, media, stores. We're drenched in it. Basic symbols have a powerful psychic influence. They can speak to us without words. A wordless form of communication. Connects to occultism. 14) Problem-Reaction-Solution (Chaos Sorcery): A mass demonstration or a public display of the dark aspects of the Hegelian dialectic. Hegelian dialectic can be used in a positive or negative sense. Chaos sorcery or false flag terrorism. This is ritual magic being used openly in the light of day. You are creating a chaotic situation in the light of day and you know it will elicit an extreme reaction of fear and chaos that demands order be brought as soon as possible. You are manipulating the fear in the limbic system-- people are not in a state that they can reason. They are demanding solutions purely out of emotions. They are in a reactive mode of consciousness. They want the outcome of the game known before the game is played. Interject chaos, you know the reaction its going to cause and you know. A leap in consciousness will subvert this technique. This technique works over and over again. Humanity won't wake up. 9-11 was chaos sorcery.

- The astronomical prices for houses in the USA is caused almost 100% by the Fed buying a minimum of \$40 billion a month in mortgage backed securities, the very instruments responsible for the GFC of 2008. Hard to make this shit up. For those who are not familiar with them, the banks make Ninja loans to deadbeats, then they immediately sell them to the Wall Street megabanks, who package them together as MBS. In 2008 the megabanks sold them to brain dead bureaucrats who run pension funds around the world. Now even they are to wary to buy them, so the Fed just prints the money out of thin air and buys them, adding them to their exponentially growing balance sheet. "Give me control of a nation's money and I care not who makes the laws."~ Mayer Amschel Rothschild [Mayer Amschel Bauer] (1744 -1812), Godfather of the Rothschild Banking Cartel of Europe

- Fed: "That's a nice housing market you have there. Be a shame if somethin' happened to it." They did much the same early last year when they helpfully stepped in with generous loans to the flailing paper industry. The dread virus locked everyone up, paper usage took a tumble, the fed issued loans and bought up tumbling bonds, the year moved on and things re-opened, the fed sells back the bonds at interest PLUS gets the interest from the ongoing loans. Rinse, repeat, forever.

- US Federal Reserve provided over \$16 trillion in financial assistance to some of the largest financial institutions and businesses, in USA and abroad, a clear case of socialism for the rich. – Bernie Sanders, 2011. Our investigation reveals that Federal Reserve provided at least \$29.6 trillion in aid. Only one of these facilities, amounting to 12.9%, was within its mandate to protect the commercial banking system. The rest was an attempt to rescue the shadow banking sector, which is highly leveraged and hardly regulated or supervised. – Andrew Felkerson & Nicola Matthews, 2011

UPDATE SOCIAL SECURITY!!!

Demand that Congress set the minimum Social Security benefit to 125% of the federal poverty level, or higher. Seniors are not getting enough money to live on. Do YOU want to be starving and struggling to exist when you are old?

PASS THIS AROUND TO YOUR FRIENDS AND POST ABOUT IT ON SOCIAL MEDIA IF YOU HAVE PARENTS OR RELATIVES!

✓ SOCIAL SECURITY'S BASIC STRUCTURE, WHICH EMBODIES THE BEST OF AMERICAN VALUES AND HAS STOOD THE TEST OF TIME, SHOULD BE PROTECTED.

The late Robert M. Ball, the longest serving commissioner of Social Security, began his Social Security career in 1939 and was involved in all major reforms from that time until his death in 2008. He defined the fundamental structure and principles in the landmark essay, "The Nine Guiding Principles of Social Security."

Both in the essay and throughout his long, storied career, Mr. Ball explained that changes to Social Security have and always should occur "within a framework consisting of nine major principles. Social Security is universal; an earned right; wage-related; contributory and self-financed; redistributive; not means-tested; wage-indexed; inflation-protected; and compulsory."

The members of this Coalition subscribe to each of those guiding principles. We oppose proposals to means-test Social Security, change it into a defined contribution plan, or cut its dedicated premiums and substitute an open-ended draw on the general fund for its financing. These and similar ideas are contrary to Social Security's underlying structure, principles, and values.

✓ SOCIAL SECURITY IS A SOLUTION AND SHOULD BE EXPANDED.

Expanding social security is a solution. It provides retirement, disability, and life insurance to nearly all of America's working families more efficiently, securely, and universally than its private sector counterparts. Social Security lifts millions of Americans, including over a million children, out of poverty and reduces the depth of poverty for millions more. Expanding Social Security is key to addressing many of our nation's most pressing problems, including the retirement income crisis, growing income and wealth inequality, and the financial squeeze on working families.

When signing the Social Security Act of 1935 into law, President Franklin Roosevelt explained, "This law... represents a cornerstone in a structure which is being built but is by no means complete." Consistent with that incremental approach, survivors' and spousal protections were added in 1939, long-term disability insurance was added in 1956, and Medicare and Medicaid were added in 1965. No additional risks have been added since then, though. It is well past time to build on the strong cornerstone laid down in 1935 and address additional risks that result in lost wages and increased expenses.

✓ SOCIAL SECURITY IS A VEHICLE FOR SOCIAL AND ECONOMIC JUSTICE. EXPANDING IT WILL MAKE IT EVEN MORE SO.

Social Security is designed to disproportionately benefit low-wage earners, including people of color, women, those with disabilities, members of the LGBTQ+ community, and others who have suffered discrimination. Moreover, because those discriminated groups are less likely to work in jobs that provide supplemental pensions, they are even more reliant on their earned Social Security benefits than white, non-Hispanic men, on average. Expanding benefits both across-the-board and in targeted ways can cause our Social Security system to be an even more important and effective vehicle of social and economic justice.

✓ ALL REFORMS OF SOCIAL SECURITY SHOULD GO THROUGH REGULAR ORDER, IN THE SUNSHINE.

Social Security is an extremely important issue that touches everyone's lives. It should only be modified in the sunshine, subject to the full Congressional process known as regular order, with open hearings, Committee consideration with the ability to amend, and full debate on the floor of each chamber with the ability to amend. That is what has been done historically and that is what should be done in the future. Opponents of Social Security often try to use bipartisan commissions to fast-track Social Security legislation that would force through unpopular changes. Should that happen, it would be a major disservice to current and future beneficiaries.

Americans' earned protections are under threat by continued, harsh cuts to the operating budget of the Social Security Administration (SSA). These cuts are occurring despite the fact that the services provided by SSA have already been paid for by the American people.

Cuts to SSA's budget have already forced the agency to close field offices, reduce staff and office hours, and freeze hiring—resulting in increased wait times and deterioration's in SSA's world-class services. Further reductions will greatly limit SSA's ability to administer benefit payments while also maintaining critical services to the public. To ensure that SSA can continue to provide Americans with the world-class, in-person services they deserve and have paid for, cuts to the agency's operating budget should be reversed, and Congress should allow SSA to restore and expand the vital services it provides to the American people.

The critical changes that you must ask your elected officials to make are:

1. Changing how your COLA is calculated

Congress must change how cost-of-living adjustments (COLAs) are calculated to better reflect seniors' costs. Social Security currently uses the Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W), which excludes households that don't have at least one person working. That means many retirees are left out. Compared to working-age people, retirees on average spend a higher share of their incomes on medical and housing costs, both of which rise faster than inflation.

Congress should be told to use the Consumer Price Index for the Elderly (CPI-E), which measures costs for older Americans. Using the CPI-E would only increase COLAs by 0.2 percentage points in an average year. Had the 2021 COLA been calculated based on the CPI-E, it would have been 1.5% instead of the 1.3% beneficiaries will receive, though the impact could be more meaningful when compounded over time.

2. A minimum benefit if you worked 30 years

Congress must be told to provide a minimum benefit of 125% of the federal poverty level for people with low lifetime earnings who worked at least 30 years. Based on the 2020 federal guidelines for the 48 contiguous states and the District of Columbia, someone with a 30-year work record would get a guaranteed monthly benefit of about \$1,329. According to a Penn Warren Budget Model analysis, such a plan would also increase benefits by anywhere from 5% to 50% for a small group of people who worked between 10 and 30 years.

3. A higher benefit after 20 years

Congress must be told to increase benefits by 5% for people who have received benefits for 20 years or more. The bonus would be phased in at 1% per year, starting with the 16th year of benefits. The goal is to boost payments for Social Security's oldest recipients because they have been forced into exhausting their retirement savings.

Contact your elected officials at this link to tell them to do these things: <https://www.usa.gov/elected-officials/>

You have to ask why no Social Security reform is mentioned/included in the \$1.5 trillion dollar stimulus package! No one in Congress wants to make a decision when it comes to addressing the reform issue. That is why the public must continue to lobby and fight on the behalf of others that are not receiving benefits they rightfully earned and deserve. Congress likes it the way it is, so they can have money to spend on their “pork-barrel projects” instead of helping their constituents that are in need of basic financial assistance. Congress has your tax money for big parties, hookers, vacations and Rolex watches so they don't care about regular folks.

Inventors Are Being Screwed By Silicon Valley's Intellectual Property Thefts

Randy Landreneau

Innovation is the cornerstone of the American Dream. Everyone can build the next best mousetrap. US Inventor’s vision is to help teach people that process as well as defending that ability on Capitol Hill.

US Inventor brings together the best and brightest innovators of today to help the best and brightest innovators of tomorrow. We teach, promote, and defend the invention process and business methods involved in developing an idea, making a profit, and changing lives.

For those new to the issue of inventors having lost the ability to stop large corporations from just taking valuable, patented technologies, here’s a quick rundown:

1. Patent Trial and Appeal Board (PTAB): The America Invents Act of 2011 (AIA) created an easier way to invalidate (revoke) an issued patent. The PTAB is an administrative court with no jury and much less due process than a real court. Rather than a lifetime-appointed judge, a PTAB trial typically has three attorneys who are called Administrative Patent Judges (APJs). Since inception, 84% of the patents that go through a PTAB process get fully or partially invalidated (partially usually means the parts of the patent that matter).

When you attempt to stop a large corporation from infringing your patent, they will try to use the PTAB to invalidate your patent. If you win one PTAB attack, you can still be pulled into additional ones by the same or other infringers. According to the AIPLA (American Institute of Patent Law Association), a reasonable PTAB defense costs \$400,000 to \$800,000. Historically, the typical inventor would hire an attorney on a contingency basis to fight an infringer (where the inventor doesn’t pay much up front and the attorney gets a percentage of the verdict award or settlement amount). Today, it is extremely rare for an attorney to take any PTAB case on contingency.

2. Injunctive Relief (the ability to stop an infringer after you have won your case): The U.S. Supreme Court decided that it was in the “public interest” for a proven infringer to continue infringing because it could serve the market better than a startup (Ebay, 2006). As a result, even if you win your case, you will have to pass a “public interest” test before an injunction can be issued to stop the infringer. A startup vs an entrenched corporation will typically fail this test, so you can’t stop the infringer. You end up with a court-ordered royalty that you cannot negotiate, and the infringer keeps your invention and the market. This is often an impossible barrier for what would have been, until recently, the next great American disruptive startup.

3. Abstract Idea: The U.S. Supreme Court’s Alice decision (2014), put into law that an “abstract idea” cannot be patented, but did not define this term. The result is that a sharp attorney can often convince a judge, who may have little tech experience, that a patent should have not been issued. This argument is most often used for software related or medical diagnostics patents. The patents of many important, future technologies that are invalidated on this issue in America are valid and defensible in China and Europe, so that is where startup funding is going.

A U.S. Patent is supposed to provide the inventor with the exclusive right to his or her invention (U.S. Constitution Article I, § 8, Clause 8). You should be able to legally stop any infringer, no matter how powerful. You should be able to create a disruptive startup, or license your invention at a market rate. This is what created the incentive to invent that enabled America to lead the world in innovation for over 200 years and has been a major part of the American Dream.

This is what US Inventor is fighting to restore.

Help this vital effort by signing our Inventor Rights Resolution and getting your U.S. Representatives and Senators behind this effort.

In his first speech to the joint session of Congress he recognized there were “new and useful inventions” found abroad. He then admonished, “I cannot forbear intimating to you the expediency of giving effectual encouragement [...] to the exertions of skill and genius in producing them at home.”

Congress answered less than 4 months later with the Patent Act of 1790. George Washington personally signed the first 156 issued patents.

So, how effectual is the US patent system? That depends on who you ask — and, unfortunately, what year you are asking.

It’s fruitless to argue that the rate of innovation didn’t accelerate after the signing of our Constitution. The last 234 years have produced an unprecedented time of discovery in the history of humankind.

The Constitution was signed with a feather (the writing technology of the time). I’m writing this article while sitting in the passenger seat of a motorized vehicle, on a laptop, connected to the internet, through a wireless connection of a mobile phone.

High Tech Connection

Another important word, “Secure” (“to make fast, save, protect, ensure,” Webster, 1806) is only in the Constitution twice.

First, expressing the need to, “secure the blessings of liberty to ourselves and our posterity.” Second, the pointed direction that Congress is accountable for “securing for limited times the exclusive right to authors and inventors.”

Congress seemed to understand their responsibility to secure exclusive rights to inventors back in 1904 when the bicycle shop tinkerers Wilbur and Orville Wright received their first patent.

Argue all you want about the Wright brothers patents and their effect on the “heavier than air” aviation industry. Just remember that that industry didn’t effectively exist before their painstaking efforts that led to the groundbreaking discoveries of these two brothers. Wilbur Wright aptly pointed out, “Those who tried to study the science of aerodynamics knew not what to believe and what not to believe.”

Fast-forward to 2011 when Congress passed the America Invents Act (AIA). The name of the Act harkens back to George Washington’s admonition to motivate exertions of skill and genius at home. Unfortunately, the Act did exactly the opposite.

The AIA created the Patent Trial and Appeal Board (PTAB). Just two years after its implementation the chief judge of the U.S. Court of Appeals observed the devastating impact this Act had on patents, describing it as “death squads killing property rights.”

This new process of invalidating patents, lobbied heavily for by the established technology companies, has been killing off patents at an extraordinary rate – with the PTAB revoking 84% of the 3,000+ patents they have reviewed.

Instead of following their Constitutional mandate to secure exclusive rights to inventors, our elected officials were securing the ability for established multi-national companies to crush independent innovation; innovation which occurred outside the well-funded research and development departments of the conglomerates.

It's a far cry from the year 1921 when a 14-year-old farm boy thought up the idea of “electronic television” while plowing the horizontal lines out in a field. This boy, Philo Farnsworth, conceptualized the idea that an electronic image could be built up line by line. His young-adult life was spent painstakingly proving out that theory in the Green Street labs in San Francisco.

When it came time to protect Philo from the massive companies of the time (manufacturers of radios who had been out-innovated by Philo) the courts and the law protected Philo through the rights granted by his patents.

“Oh My God, This Is So F---ed Up”: Inside Silicon Valley’s Secretive, Orgiastic Dark Side

- A deep insider reveals that the men on Palo Alto's Sand Hill Road control the world with forced sex, drugs and toxic frat boy sociopathy

Some of the most powerful men in Silicon Valley are regulars at exclusive, drug-fueled, sex-laced parties—gatherings they describe not as scandalous, or even secret, but as a bold, unconventional lifestyle choice. Yet, while the guys get laid, the women get screwed. In an adaptation from her new book, Brotopia, Emily Chang exposes the tired and toxic dynamic at play.

By Emily Chang In Vanity Fair

About once a month, on a Friday or Saturday night, the Silicon Valley Technorati gather for a drug-heavy, sex-heavy party. Sometimes the venue is an epic mansion in San Francisco’s Pacific Heights; sometimes it’s a lavish home in the foothills of Atherton or Hillsborough. On special occasions, the guests will travel north to someone’s chateau in Napa Valley or to a private beachfront property in Malibu or to a boat off the coast of Ibiza, and the bacchanal will last an entire weekend. The places change, but many of the players and the purpose remain the same.

The stories I’ve been told by nearly two dozen people who have attended these events or have intimate knowledge of them are remarkable in a number of ways. Many participants don’t seem the least bit embarrassed, much less ashamed. On the contrary, they speak proudly about how they’re overturning traditions and paradigms in their private lives, just as they do in the technology world they rule. Like Julian Assange denouncing the nation-state, industry hotshots speak of these activities in a tone that is at once self-congratulatory and dismissive of criticism. Their behavior at these high-end parties is an extension of the progressiveness and open-mindedness—the audacity, if you will—that make founders think they can change the world. And they believe that their entitlement to disrupt doesn’t stop at technology; it extends to society as well. Few participants, however, have been willing to describe these scenes to me without a guarantee of anonymity.

If this were just confined to personal lives it would be one thing. But what happens at these sex parties—and in open relationships—unfortunately, doesn’t stay there. The freewheeling sex lives pursued by men in tech—from the elite down to the rank and file—have consequences for how business gets done in Silicon Valley.

Sex Parties of the Tech and Famous

From reports of those who have attended these parties, guests and hosts include powerful first-round investors, well-known entrepreneurs, and top executives. Some of them are the titans of the Valley, household names. The female guests have different qualifications. If you are attractive, willing, and (usually) young, you needn’t worry about your

résumé or bank account. Some of the women work in tech in the Bay Area, but others come from Los Angeles and beyond, and are employed in symbiotic industries such as real estate, personal training, and public relations. In some scenarios, the ratio of women to wealthy men is roughly two to one, so the men have more than enough women to choose from. “You know when it’s that kind of party,” one male tech investor told me. “At normal tech parties, there are hardly any women. At these kinds of party, there are tons of them.”

I believe there is a critical story to tell about how the women who participate in these events are often marginalized, even if they attend of their own volition. One female investor who had heard of these parties before I approached her told me, “Women are participating in this culture to improve their lives. They are an underclass in Silicon Valley.” A male investor who works for one of the most powerful men in tech put it this way: “I see a lot of men leading people on, sleeping with a dozen women at the same time. But if each of the dozen women doesn’t care, is there any crime committed? You could say it’s disgusting but not illegal—it just perpetuates a culture that keeps women down.”

To be clear, there is a wide range of parties for experimental sexual behavior. Some, devoted entirely to sex, may be drug- and alcohol-free (to encourage safety and performance) and demand a balanced gender ratio. Others are very heavy on drugs and women and usually end in group “cuddle puddles,” a gateway to ever-so-slightly more discreet sexual encounters.

Men show up only if directly invited by the host, and they can often bring as many women as they want, but guys can’t come along as plus-ones. (That would upset the preferred gender ratio.) Invitations are shared via word of mouth, Facebook, Snapchat (perfect, because messages soon disappear), or even basic Paperless Post. Nothing in the wording screams “sex party” or “cuddle puddle,” in case the invitation gets forwarded or someone takes a screenshot. Besides, there’s no need to spell things out; the guests on the list understand just what kind of party this is. Women too will spread the word among their female friends, and the expectations are hardly hidden. “They might say, ‘Do you want to come to this really exclusive hot party? The theme is bondage,’ ” one female entrepreneur told me. “ ‘It’s at this V.C. or founder’s house and he asked me to invite you.’ ”

“IT’S VERY RISKY—ONCE YOU’RE IN THAT CIRCLE, ONCE YOU DECIDE YOU WANT TO PLAY THE GAME, YOU CAN’T BACK OUT.”

Perhaps this culture is just one of the many offshoots of the sexually progressive Bay Area, which gave rise to the desert festival of free expression Burning Man, now frequented by the tech elite. Still, the vast majority of people in Silicon Valley have no idea these kinds of sex parties are happening at all. If you’re reading this and shaking your head saying, “This isn’t the Silicon Valley that I know,” you may not be a rich and edgy male founder or investor, or a female in tech in her 20s. And you might not understand, anyway. “Anyone else who is on the outside would be looking at this and saying, Oh my God, this is so fucked up,” one female entrepreneur told me. “But the people in it have a very different perception about what’s going on.”

This is how the night goes down, according to those who have attended. Guests arrive before dinner and are checked in by private security guards, who will turn you away if you’re not on the list. Sometimes the evening is catered. But at the most intimate gatherings, guests will cook dinner together; that way they don’t have to kick out the help after dessert. Alcohol lubricates the conversation until, after the final course, the drugs roll out. Some form of MDMA, a.k.a. Ecstasy or Molly, known for transforming relative strangers into extremely affectionate friends, is de rigueur, including Molly tablets that have been molded into the logos of some of the hottest tech companies. Some refer to these parties as “E-parties.”

MDMA is a powerful and long-lasting drug whose one-two punch of euphoria and manic energy can keep you rolling for three or four hours. As dopamine fires, connections spark around the room, and normal inhibitions drop away. People start cuddling and making out. These aren’t group orgies, per se, but guests will break out into

twosomes or threesomes or more. They may disappear into one of the venue's many rooms, or they may simply get down in the open. Night turns to day, and the group reconvenes for breakfast, after which some may have intercourse again. Eat, drugs, sex, repeat.

These sex parties happen so often among the premier V.C. and founder crowd that this isn't a scandal or even really a secret, I've been told; it's a lifestyle choice. This isn't Prohibition or the McCarthy era, people remind me; it's Silicon Valley in the 21st century. No one has been forced to attend, and they're not hiding anything, not even if they're married or in a committed relationship. They're just being discreet in the real world. Many guests are invited as couples—husbands and wives, boyfriends and girlfriends—because open relationships are the new normal.

While some parties may be devoted primarily to drugs and sexual activity, others may boast just pockets of it, and some guests can be caught unawares. In June 2017, one young woman—let's call her Jane Doe—received a Paperless Post invite for “a party on the edge of the earth” at the home of a wealthy venture capitalist. The invite requested “glamazon adventurer, safari chic and jungle tribal attire.” Ironically, the gathering was held just a week after sexual-harassment allegations against Binary Capital co-founder Justin Caldbeck had been reported, but that didn't seem to discourage certain guests from indulging in heavy petting in the open.

“It was in the middle of the Binary thing,” Jane Doe told me, referring to the scandal at the V.C. firm. “And it was all so ridiculous.” Doe found herself on the floor with two couples, including a male entrepreneur and his wife. The living room had been blanketed in plush white faux fur and pillows, where, as the evening wore on, several people lay down and started stroking one another, Doe said, in what became a sizable cuddle puddle. One venture capitalist, dressed up as a bunny (it's unclear how this fit into the edge-of-the-earth theme), offered Jane Doe some powder in a plastic bag. It was Molly. “They said it will just make you feel relaxed and you're going to like being touched,” Doe recounted to me.

Nervous, she dipped her finger into the powder and put it in her mouth. Soon, her guard dropped. Then, the male founder asked if he could kiss her. “It was so weird,” she says. “I'm like, ‘Your wife is right there; is she O.K. with this?’” The founder's wife acknowledged that, yes, she was O.K. with it. Jane Doe, who considers herself fairly adventurous and open-minded, kissed the founder, then became uncomfortable, feeling as if she had been pressured or targeted. “I don't know what I'm doing, I feel really stupid, I'm drugged up because I'd never taken it before, and he knew I'd never taken it,” she recalled. She tried to escape to a different area of the party. “I felt gross because I had participated in making out with him and then he kept trying to find me and I kept trying to run away and hide. I remember saying to him, ‘Aren't people going to wonder?’ And he said, ‘The people that know me know what is going on, and the people that don't, I don't really care.’” Before dawn, she jumped into her car and left. “What's not O.K. about this scene is that it is so money- and power-dominated. It's a problem because it's an abuse of power. I would never do it again.”

While this particular woman felt ambushed, if it's your first time, a friend will normally fill you in on what you're signing up for, and you are expected to keep it to yourself. You know that if you do drugs with someone you work with you shouldn't mention it to anyone, and the same goes with sex. In other words, we're not hiding anything, but, actually, we kind of are. You only get invited if you can be trusted and if you're going to play ball. “You can choose not to hook up with [a specific] someone, but you can't not hook up with anybody, because that would be voyeurism. So if you don't participate, don't come in,” says one frequent attendee, whom I'll call Founder X, an ambitious, world-traveling entrepreneur.

They don't necessarily see themselves as predatory. When they look in the mirror, they see individuals setting a new paradigm of behavior by pushing the boundaries of social mores and values. “What's making this possible is the same progressiveness and open-mindedness that allows us to be creative and disruptive about ideas,” Founder X

told me. When I asked him about Jane Doe's experience, he said, "This is a private party where powerful people want to get together and there are a lot of women and a lot of people who are fucked up. At any party, there can be a situation where people cross the line. Somebody fucked up, somebody crossed the line, but that's not an indictment on the cuddle puddle; that's an indictment on crossing the line. Doesn't that happen everywhere?" It's worth asking, however, if these sexual adventurers are so progressive, why do these parties seem to lean so heavily toward male-heterosexual fantasies? Women are often expected to be involved in threesomes that include other women; male gay and bisexual behavior is conspicuously absent. "Oddly, it's completely unthinkable that guys would be bisexual or curious," says one V.C. who attends and is married (I'll call him Married V.C.). "It's a total double standard." In other words, at these parties men don't make out with other men. And, outside of the new types of drugs, these stories might have come out of the Playboy Mansion circa 1972.

I had a wide-ranging conversation with Twitter co-founder Evan Williams about the peculiar mixture of audacity, eccentricity, and wealth that swirls in Silicon Valley. Williams, who is married with two kids, became an Internet celebrity thanks to his first company, Blogger. He pointed out that he was never single, well known, and rich at the same time, and that he isn't part of this scene, but recognizes the motivations of his peers. "This is a strange place that has created incredible things in the world and therefore attracts these types of people and enables these types of people. How could it be anything but weird and dramatic and people on the edge testing everything?" On the one hand, he said, "if you thought like everyone else, you can't invent the future," yet he also warned that, sometimes, this is a "recipe for disaster."

Rich men expecting casual sexual access to women is anything but a new paradigm. But many of the A-listers in Silicon Valley have something unique in common: a lonely adolescence devoid of contact with the opposite sex. Married V.C. described his teenage life as years of playing computer games and not going on a date until he was 20 years old. Now, to his amazement, he finds himself in a circle of trusted and adventurous tech friends with the money and resources to explore their every desire. After years of restriction and longing, he is living a fantasy, and his wife is right there along with him.

Married V.C.'s story—that his current voraciousness is explained by his sexual deprivation in adolescence—is one I hear a lot in Silicon Valley. They are finally getting theirs.

Founder Hounders

There is an often told story that Silicon Valley is filled with women looking to cash in by marrying wealthy tech moguls. Whether there really is a significant number of such women is debatable. The story about them is alive and well, however, at least among the wealthy men who fear they might fall victim. In fact, these guys even have a term for the women who pursue them: founder hounders.

When I ask Founder X whether these men are taking advantage of women by feeding them inhibition-melting drugs at sex parties, he replies that, on the contrary, it's women who are taking advantage of him and his tribe, preying on them for their money.

On their way up to a potential multi-million-dollar payout, some younger founders report, more and more women seem to become mysteriously attracted to them no matter how awkward, uncool, or unattractive they may be.

However many founder hounders exist, the idea of these women lives large in the minds of Silicon Valley founders, who often trade stories about women they've dated. As Founder X puts it, "We'll say whether some girl is a fucking gold digger or not, so we know who to avoid."

When I tell her this, Ava, a young female entrepreneur, rolls her eyes. According to Ava, who asked me to disguise her real identity and has dated several founders, it's the men, not the women, who seem obsessed with displays of

wealth and privilege. She tells of being flown to exotic locations, put up in fancy hotels, and other ways rich men have used their money to woo her. Backing up Ava's view are the profiles one finds on dating apps where men routinely brag about their tech jobs or start-ups. In their online profiles, men are all but saying, "Hello, would you like to come up to my loft and see my stock options?"

In Ava's experience, however, once men like this land a woman, they are quick to throw her back. After a few extravagant dates, Ava says, she will initiate a conversation about where the tryst is going. The men then end things, several using the same explanation. "They say, 'I'm still catching up. I lost my virginity when I was 25,'" Ava tells me. "And I'll say, 'Well, you're 33 now, are we all caught up yet?' In any other context, [these fancy dates] would be romantic, but instead it's charged because no one would fuck them in high school. . . . I honestly think what they want is a do-over because women wouldn't bone them until now."

Ava's jaundiced view of newly wealthy moguls would be funny if their gold-digger obsession didn't mask something serious. The claim of being stalked by women often becomes an excuse used by some tech stars to justify their own predatory behavior.

What that adds up to is a great deal of ego at play. "It's awesome," says Founder X. At work, he explains, "you're well funded. You have relative traction." Outside work, "why do I have to compromise? Why do I have to get married? Why do I have to be exclusive? If you've got a couple girls interested in you, you can set the terms and say, 'This is what I want.' You can say, 'I'm happy to date you, but I'm not exclusive.' These are becoming table stakes for guys who couldn't get a girl in high school."

Furthermore, these elite founders, C.E.O.'s, and V.C.'s see themselves as more influential than most hot-shit bankers, actors, and athletes will ever be. "We have more cachet than a random rich dude because we make products that touch a lot of people," says Founder X. "You make a movie, and people watch it for a weekend. You make a product, and it touches people's lives for years."

At least on the financial level, Founder X has a point. The payouts of A-list actors and the wolves of Wall Street just aren't that impressive among the Silicon Valley elite. Managing directors at top-tier investment banks may pocket a million a year and be worth tens of millions after a long career. Early employees at tech firms like Uber, Airbnb, and Snapchat can make many times that amount of money in a matter of years. Celebrities such as Ashton Kutcher, Jared Leto, and Leonardo DiCaprio have jumped on that power train and now make personal investments in tech companies. The basketball great Kobe Bryant started his own venture-capital firm. LeBron James has rebranded himself as not just an athlete but also an investor and entrepreneur.

With famous actors and athletes wanting to get into the tech game, it's no surprise that some in the Valley have a high opinion of their attractiveness and what they should expect or deserve in terms of their sex lives. In the Valley, this expectation is often passed off as enlightened—a contribution to the evolution of human behavior.

For many women who describe it, however, it's a new immaturity—sexist behavior dressed up with a lot of highfalutin talk—that reinforces traditional power structures, demeans women, and boosts some of the biggest male egos in history: just another manifestation of Brotopia.

When I spoke about Silicon Valley's sex parties—specifically those where women vastly outnumber men—with Elisabeth Sheff, a Chattanooga-based writer and professor who has spent two decades researching open relationships, her reaction was heated: "That's exploitation. That's old-school, fucked-up masculine arrogance and borderline prostitution," she said. "The men don't have to prostitute themselves, because they have the money. . . . 'I should be able to have sex with a woman because I'm a rich guy.' That is not even one particle progressive; that is the same tired bullshit. It's trying to blend the new and keeping the old attitudes, and those old attitudes are based in patriarchy, so they come at the expense of women."

Jennifer Russell, who runs the established Camp Mystic at Burning Man, is more sympathetic. “Men and women are equally drawn to creating a structure that invites their full sexual expression, and events like this are a safe place to dabble,” she says. “It’s way better than a swingers’ club would feel because this is at a home and you are surrounded by people you know.”

Married V.C. admits, however, that for many men these parties aren’t so much about self-expression as they are about simply sport fucking. “Some guys will whip out their phones and show off the trophy gallery of girls they’ve hooked up with,” he says. “Maybe this is behavior that happened on Wall Street all the time, but in a way they owned it. These founders do this, but try not to own it. They talk about diversity on one side of their mouth, but on the other side they say all of this shit.”

The New Paradigm for Women Getting Screwed

For successful women in Silicon Valley, the drug-and-sex-party scene is a minefield to navigate. This isn’t a matter of Bay Area tech women being more prudish than most; I doubt recent history has ever seen a cohort of women more adventurous or less restrained in exploring sexual boundaries. The problem is that the culture of sexual adventurism now permeating Silicon Valley tends to be more consequential for women than for men, particularly as it relates to their careers in tech.

Take multi-time entrepreneur Esther Crawford, who is familiar with sex parties (specifically those with an equal gender ratio and strict rules around consent) and talks openly about her sexual experiments and open relationships. For four years, she had been in a non-monogamous (they say “monogamish”) relationship with Chris Messina, a former Google and Uber employee best known for inventing the hashtag. More recently, Crawford and Messina have started a company together called Molly—perhaps not un-coincidentally the same name as the drug—where they are developing a “nonjudgmental (artificially intelligent) friend who will support your path to more self-awareness.” They also chose to become monogamous for a while; seeing other people was getting too complicated. “The future of relationships is not just with humans but A.I. characters,” Crawford told me. By December 2017, they had raised \$1.5 million for their new company. In the meantime, Crawford is acutely aware of the harsh reality that as a female entrepreneur she faces so many challenges that men don’t. What she has found is that, for a woman, pushing private sexual boundaries comes with a price.

When Crawford was raising funds for her second company, a social-media app called Glmps, she went to dinner with an angel investor at a hip restaurant on San Francisco’s Valencia Street. At the end of the meal, he handed her a check for \$20,000, then immediately tried to kiss her. “I certainly wasn’t coming on to him,” she asserts. “I kind of leaned back, and he ordered me an Uber, and I was like, ‘I gotta go home.’” Crawford thinks it’s likely that this particular investor knew about her sexual openness and found it difficult to think of her simply as an entrepreneur rather than as a potential hookup. This encounter is an example of a unique penalty women face if they choose to participate in the “we’re all cool about sex” scene.

Ava was working as an executive assistant at Google when she ran into her married boss at a bondage club in San Francisco. He was getting a blow job from a woman strapped to a spanking bench who was being entered by another man from behind. Ava and her boss, an engineer, locked eyes but didn’t exchange a word and never spoke of the encounter again. However, a few months later, at a Google off-site event, another married male colleague approached her. “He hits on me, and I was like, What are you doing? Don’t touch me. Who are you again? He was like, I know who you are. The other guys said you like all this stuff.” Someone had outed Ava. She quit working at Google shortly thereafter. “The trust works one way,” Ava says. “The stigma for a woman to do it is so much higher. I’m supposed to be in this industry where everyone is open and accepting, but as a woman the punishment is so much more unknown.”

Crawford can't even count the number of men who've told her how lucky she is to have so many eligible men to date in the male-dominated tech scene. "Of all the privileges in the world, that is not the one I would choose," she says fiercely. "I'd choose equal pay for equal work. I'd choose having better access to capital and power. I'd choose not being passed over for promotions. I'd choose not having to worry about being in the 23.1 percent of undergraduate college women who get sexually assaulted. I'd choose not being slut-shamed if I do opt to explore my sexuality."

Married V.C. admits he might decline to hire or fund a woman he's come across within his sex-partying tribe. "If it's a friend of a friend or you've seen them half-naked at Burning Man, all these ties come into play," he says. "Those things do happen. It's making San Francisco feel really small and insular because everybody's dated everybody." Men actually get business done at sex parties and strip clubs. But when women put themselves in these situations, they risk losing credibility and respect.

The party scene is now so pervasive that women entrepreneurs say turning down invitations relegates them to the uncool-kids' table. "It's very hard to create a personal connection with a male investor, and if you succeed, they become attracted to you," one told me. "They think you're part of their inner circle, [and] in San Francisco that means you're invited to some kind of orgy. I couldn't escape it here. Not doing it was a thing." Rather than finding it odd that she would attend a sex party, says this entrepreneur, people would be confused about her not attending. "The fact that you don't go is weird," the entrepreneur said, and it means being left out of important conversations. "They talk business at these parties. They do business," she said. "They decide things." Ultimately, this entrepreneur got so fed up that she moved herself and her start-up to New York and left Silicon Valley for good.

The women who do say yes to these parties rarely see a big business payoff. "There is a desire to be included and invited to these kinds of things and sometimes it felt like it was productive to go and you could get ahead faster by cultivating relationships in this way," one female tech worker told me. "Over time, I realized that it's false advertising and it's not something women should think is a way to get ahead. It's very risky—once you're in that circle, once you decide you want to play the game, you can't back out. If you really believe that's going to get you to a serious place in your career, that's delusion."

Another female entrepreneur described the unfair power dynamic that's created. "There is this undercurrent of a feeling like you're prostituting yourself in order to get ahead because, let's be real, if you're dating someone powerful, it can open doors for you. And that's what women who make the calculation to play the game want, but they don't know all the risks associated with it," she said. "If you do participate in these sex parties, don't ever think about starting a company or having someone invest in you. Those doors get shut. But if you don't participate, you're shut out. You're damned if you do, damned if you don't."

It harkens back to those popular 1980s teen movies which tell the "heartwarming" story of a glasses-wearing nerd who is transformed into the cool, funny kid who gets all the hot chicks. But we're not living a teenage dream. Great companies don't spring magically to life when a nerd gets laid three times in a row. Great companies are built in the office, with hard work put in by a team. The problem is that weekend views of women as sex pawns and founder hounders can't help but affect weekday views of women as colleagues, entrepreneurs, and peers.

Google And Facebook Have A Psychological Trick To Make You Do Things You Wouldn't Believe You Might Do
By Conner Lewis For The Congressional Report

Most of the U.S. Senators and government agency heads own stock in, get their political campaigns financed by and party with, the owners and executives of the Silicon Valley big tech companies.

That is why those public officials fail to halt the mass societal abuses of those companies. Above all others, the California politicians are in bed with the same criminals they are supposed to regulate.

While politicians shrug off any attempt to bring the oligarchs into line, they provide lip-service, window-dressing pretend actions that have impressive titles but zero bite.

The authors of this report were in private meetings with the investors and founders of the Silicon Valley “Big Five”, at the inception of their companies, and hereby testify that those owners planned, with malicious intent, the use of their business licenses for the purpose of manipulating, harming and restricting the public interest, and DEMOCRACY, for profiteering purposes.

Big tech’s “green-washing”, false-savior, “we-are-your-mother” fake “do-gooder” facade is a sham to sucker everyone.

They hide behind a curtain of false altruism and do the darkest deeds any industry can undertake behind that contrived screen.

One of Google , Youtube and Facebook’s most insidious technologies can even get you to engage in riots, murders and other crimes, even though you might, otherwise, never do those things. Here is how that technology works:

Since the early 20th century, the name of the Russian scientist Ivan Pavlov has been associated with the idea of brainwashing. Pavlov’s experiments, in which he trained dogs to salivate in response to a signal such as a bell, showed that the mind could be conditioned to react automatically to stimuli. But he looked forward to a time when science could manipulate the brain directly. In a passage eerily accurate in describing today’s neural imaging, he wrote: “If we could look through the skull into the brain of a consciously thinking person... then we should see playing over the cerebral surface a bright spot with fantastic, waving borders, constantly fluctuating in size and form, and surrounded by a darkness, more or less deep, covering the rest of the hemispheres.”

We still don’t have a precise topography of the brain in terms of specific thoughts or feelings. It’s hard to imagine where one would begin if one wanted to surgically force someone to reveal a particular secret, or to persuade him or her to vote for a certain candidate. But since Pavlov’s time, science has moved much closer to enabling direct physical control of the brain. In this century, neuroscientists’ insights into memory, cognition, pleasure and pain may make coercive “mind control” a reality.

The psychologist James Olds (1922-76), one of the founders of modern neuroscience, conducted an experiment at McGill University in 1953 in which he implanted electrodes deep in the brains of rats and started observing their responses to electrical stimulation at various sites. His key observation resulted from an accident: He missed the desired anatomical site slightly on one particular rat. After recovering from surgery, the animal was placed in a special chamber. Every time it went to a corner of the chamber, it received a small electrical stimulus to the brain, with each corner stimulating a different site. The rat kept returning to one specific corner, even skipping eating to hang out there and get the brain stimulation.

Olds inferred that there was something pleasurable about receiving a shock at that site in the brain. Next he started training the rat to go to different parts of the box or to turn right or left before it could receive the desired electrical stimulation. Using this technique, Olds could elicit complex behaviors easily; Pavlov would have been envious about this shortcut to behavioral conditioning. Olds observed that “Left to itself in the apparatus, the animal... stimulated its own brain regularly,” up to 5,000 times an hour.

The mind-control possibilities for this intervention sounded almost limitless, but would it work on people? Psychiatrist Robert Heath (1915-99), of Tulane University, performed studies with human patients, including one code-named B-7, a 28-year-old man with severe narcolepsy. Heath implanted a series of electrodes in various areas

of his brain and asked the patient what he felt after each area was stimulated. One area was so aversive that the patient intentionally broke the stimulus button so that he would never have to experience that sensation again.

However, the feelings evoked by stimulating a different site were intensely pleasurable. The patient learned that he could block an incipient narcoleptic attack by self-stimulating; he was able to control his symptoms so well that for the first time he was able to get a job. On the rare occasion that he fell asleep too rapidly to press the button, his friends knew that they could promptly wake him up by pressing it for him.

Neurosurgical techniques have continued to evolve to be less invasive, less risky and applied to very specific areas of the brain.

At one point the CIA approached Heath, asking if he would work with the agency to study the brain's pleasure and pain system. He spurned the invitation, he told a New York Times reporter in 1977: "If I had wanted to be a spy, I would have been a spy. I wanted to be a doctor and practice medicine." This kind of work, most of which was conducted in the 1960s and 1970s, has largely been shut down because of ethical concerns.

However, the underlying neurosurgical techniques have continued to evolve. Fifty years after Heath's studies, procedures are less invasive, less risky and can be applied to very specific areas of the brain. Implanted deep-brain stimulators (DBS) are used by thousands of people with Parkinson's disease to help control their muscle movements, as well as for other conditions such as pain and epilepsy. There is ongoing interest in using such interventions on different sites in the brain to treat patients with psychiatric disorders, particularly patients with treatment-resistant depression.

Deep-brain stimulation requires painstaking surgery and expensive equipment, suitable for an individual but hardly appropriate for group interventions. Is there a way of stimulating a group of people without implants? In her 1996 book "Cults in Our Midst," Psychologist Margaret Singer described love bombing," an indoctrination technique used by some cults in which recruits are given so much flattery and adulation that they feel welcome and safe.

The neuroendocrine equivalent involves a hormone called oxytocin that is manufactured deep in the brain. People release oxytocin when they are bonding with another; it is sometimes nicknamed the feel-good hormone. Early research found that it is increased during breast-feeding and during sexual intimacy. Subsequent research showed that oxytocin is also produced in other situations of closeness—prayer, team sports, even when dog owners interact with their pets.

But there is a darker side to oxytocin. Experiments have found that it can stoke trust and cooperation within a group at the expense of distrust of people outside the group. Currently, the most effective way of administering oxytocin is through a nasal spray, but if it were possible to administer it orally or via aerosol, it could conceivably be used in group settings to increase attachment and thereby recruit new potential members of a cult or party. People might willingly join a group or adopt a new belief if it allowed them to receive pleasurable stimulation—after all, addicts aren't particularly squeamish about what they need to do to obtain their drugs.

On the other side of the coin, people might repudiate their old beliefs or identities to turn off painful stimulation, the way patient B-7 broke his stimulus button. When the dystopian movie "A Clockwork Orange" was released in 1971, audiences were stunned by its portrayal of the power of aversive conditioning. The advance of neuroscience means that such techniques are no longer just fantasies. So far they have been kept in check only by government regulation and medical professionals' sense of ethics. But governments are always seeking new weaponry, and history suggests that there will always be some researchers who close their eyes to the implications of their work or justify it as a way to protect society from looming threats. Their self-restraint may not always protect us from the dark potential of Google and Facebook's scientific coercion. This report goes deeper into those contrived and manually steered tech manipulations operated by Big Tech's executives.

Google is manipulating your internet searches, your elections, your perceptions of the news, your democracy, your ideologies and your school curriculum's. Google and their cartel (including FACEBOOK, NETFLIX, LINKEDIN, YOUTUBE, et al) collude to manipulate social dynamics.

White House executives, Federal Agency Executives and U.S. Senators including Dianne Feinstein, Kamala Harris, John Podesta, Nancy Pelosi, Harry Reid own, control and finance “The Deep State” because they own, and their families, own the stock in the companies comprising The Deep State, they tell those companies what to do, they fund those companies and they social communicate with each other through covert channels, they engage sexually with each other and they exchange stock market tips and strategies, and that forensic accounting shows that the politicians and the corrupt companies are all the same organization. This, in part, proves that the “Deep State” is “State Sponsored”.

Google, and The Deep State’s, socialistic, anti-Christian bias is invisibly reflected in the suppression of ideological content from appearing in some search results.

In shocking research that has spanned the past 6 ½ years, Dr. Robert Epstein – former editor-in-chief of Psychology Today and now Senior Research Psychologist at the American Institute for Behavioral Research and Technology – has found that by controlling search results, Google possesses unprecedented power to sway the thinking of undecided voters during an election campaign.

How is it done?

Google can manipulate its search engine algorithm to display one-sided search results that decidedly favor one political candidate over another.

Dr. Epstein gave a grim prediction in recent congressional testimony...

He said that “democracy as originally conceived cannot survive Big Tech as currently empowered.”

Dr. Epstein is a registered Democrat. He supported and voted for Hillary Clinton in the 2016 election. He has no hidden agenda ... and no axe to grind for President Trump.

During the 2016 presidential election campaign, he captured and analyzed “more than 13,000 election-related searches conducted by a diverse group of Americans on Google, Bing, and Yahoo in the weeks leading up to the election...”

During the 2018 midterm election cycle, Dr. Epstein captured 47,000 election-related searches – plus nearly 400,000 web pages to which the search results were linked.

The results of his scientific analysis in both cases were disturbing...

The Google search results in 2016 – which account for over 92% of worldwide internet searches – were significantly biased in favor of Hillary Clinton in all 10 positions on the first page of search results in both blue states and red states.

In 2018, the first-page search results heavily favored web sites and articles favoring Democrat candidates rather than being evenly split between Democrat and Republican candidates.

Very few people who do spontaneous searches ever scroll past the first page of search results. And Google knows this.

Dr. Epstein has conducted dozens of controlled experiments in the U.S. and other countries to precisely measure – through before-and-after questionnaires – how opinions and votes shift among undecided voters when search results strongly favor one candidate over another.

He calls this shift “SEME” – Search Engine Manipulation Shift.

“SEME is one of the most powerful forms of influence ever discovered in the behavioral sciences,” Dr. Epstein said in his congressional testimony, “and it is especially dangerous because it is invisible to people – ‘subliminal’ in effect... Bottom line: biased search results can easily produce shifts in the opinions and voting preference of undecided voters by 20% or more – up to 80% in some demographic groups.”

I can tell you, this is enough voters to change the results of any election.

Dr. Epstein calculated that Search Engine Manipulation Shift likely persuaded at least 2.6 million undecided voters to cast their ballots for Hillary Clinton in 2016 ...and perhaps as many as 10.4 million.

In the 2018 midterm elections, Epstein’s evidence suggests that as many as 78.2 million votes may have been shifted to Democrat candidates due to Search Engine Manipulation Shift.

These effects are far more meddlesome and interfering than fake news stories or ads placed by Russians on social media...

While these acts of interference are troubling and unacceptable, they don’t shift very many votes because they are competitive and visible. Search Engine Manipulation Shift – on the other hand – is invisible and non-competitive.

Dr. Epstein explains: “SEME is an example of an ‘ephemeral experience,’ and that’s a phrase you’ll find in internal emails that have leaked from Google recently. A growing body of evidence suggests that Google employees deliberately engineer ephemeral experiences to change people’s thinking... My recent research demonstrates that Google’s ‘autocomplete’ search suggestions can turn a 50/50 split among undecided voters into a 90/10 split without people’s awareness.”

As expected, Google, Hillary Clinton, and progressive media outlets have all disputed Dr. Epstein’s research and his claims...

They all say in unison that this 2016 study of election-related search results has been “debunked,” and that Epstein’s results aren’t valid because he made “weird methodological choices” in an earlier 2010 study.

But they haven’t debunked his methodology or his results at all...

They’re just saying this to try to discredit him and convince people to not take his work seriously. They haven’t refuted him either by conducting their own comparable studies ... or by addressing his explanations of his methodology.

Incidentally, the number one Hillary Clinton financial supporter in the 2016 election was Alphabet Inc. – the parent company of Google.

You can read Dr. Epstein’s testimony and study the methodology of his experiments here.

He is eminently qualified to conduct the type of research he’s been conducting with Google search – having been a research psychologist for nearly 40 years.

He received his Ph.D. at Harvard University in 1981 and has published 15 books and more than 300 scientific articles on artificial intelligence and other behavioral topics.

Dr. Epstein believes the solution to Google’s search engine manipulation is to end its monopoly over its “black box” algorithm operation.

By requiring that the database they use to generate search results must be available in the public domain – accessible to all – many new search platforms will spring up and compete with Google, providing the same excellent search results.

Incidentally, I find that every time I run a Google search on a topic, I am served biased viewpoints...

Usually a CNN report is first on the list, followed by:

The New York Times

The Washington Post

MSNBC

Other pro-socialist media

I often have to scroll to page 7 or 8 to start finding conservative viewpoints.

Since 2012, Google has discriminated against and marginalized our editorial content. If they are doing it to us, they are certainly doing it to conservative web sites with higher numbers of subscribers. See these videos:

<https://youtu.be/rNvgl38TLvI>

and

https://youtu.be/csye_Jkp4eI

There were allegations raised that Google was manipulating the news to help Hillary. They allegedly steered 2.6 million votes to Hillary and had far more of an impact upon the 2016 election than Russians. A whistleblower at Google has come out and warned that things are getting worse. Google whistleblower Zach Vorhies came out and provided documents and warnings. He said:

“Before Trump won, Google had this mission statement to organize the world’s information and making it universally accessible and useful.”

“After Trump won, they said ‘Well, Donald Trump won because of fake news and Russia hacking the election, so what we need to do is ... protect our users from fake news; we need to protect our users from the damaging effects of Russian trolls and bots.’”

What is interesting is that Elizabeth Warren has been a longtime critic of the economic power of Amazon, Google, and Facebook. She is making their break-up under Anti-Trust Laws a key component of her presidential platform.

Google's ubiquitous search engine, Google Search, is the backbone of the tech giant's business.

In many ways, Google Search is the backbone of the modern internet — the way much of the web is sorted and organized and located. Given how crucial it is to daily internet use for billions of people around the world, it's a particularly ripe target for manipulation.

Google denies doing as much, and insists that Google Search is built on algorithms and data gleaned from use.

But a new Wall Street Journal investigation found that Google manipulated search algorithms in some worrying ways, including prioritizing large businesses over smaller ones, removing autocomplete results that involve sensitive topics like immigration and abortion, and even outright blacklisting some websites.

In one such change to Google's search algorithms, the service guided search users to more prominent businesses over lesser-known ones, the Journal reported. That change reportedly helped to boost Amazon's store in search results.

In another example cited in the Journal's report, autocomplete search results for sensitive subjects were replaced with safer results than those found on competing search engines like Yahoo, Bing, and DuckDuckGo.

Google is known for refusing to share specific details on how its search algorithms operate, which it attributes to a measure of operations logistics: If the algorithms were public, then they could be gamed, Google argues.

"Extreme transparency has historically proven to empower bad actors in a way that hurts our users and website owners who play by the rules," Google spokesperson Lara Levin told the Journal.

When reached for a response to the report, a Google spokesperson offered the following statement:

"We have been very public and transparent around the topics covered in this article, such as our Search rater guidelines, our policies for special features in Search like Autocomplete and valid legal removals, our work to combat misinformation through Project Owl, and the fact that the changes we make to Search are aimed at benefiting users, not commercial relationships. This article contains a number of old, incomplete anecdotes, many of which not only predated our current processes and policies but also give a very inaccurate impression of how we approach building and improving Search. We take a responsible and principled approach to making changes, including a rigorous evaluation process before launching any change — something we started implementing more than a decade ago. Listening to feedback from the public is a critical part of making Search better, and we continue to welcome the feedback."

If you use Google's search engine, "There's no way of knowing what you're missing," says Gabriel Weinberg, CEO and founder of search engine DuckDuckGo, whose company released a study Tuesday claiming that Google is manipulating Americans' search results.

The study concludes that Google is editorializing and providing different search results for different users who search for identical terms, within seconds and minutes of each other.

"The editorialized results are informed by the personal information Google has on you, like your search, browsing and purchase history," the study says.

"What we're seeing is intense amounts of variation," Weinberg told Yahoo Finance. "Most of the people in the study saw results completely unique to them."

By unique, Weinberg means that inconsistent source links appeared in search results, and some of the same links appeared in varying hierarchical order.

Seventy-two U.S. participants in the study entered three independent Google search terms — gun control, immigration, and vaccinations — using a desktop Chrome browser at 9 p.m. eastern time on July 24, 2018.

Unique results were returned for 68% of private searches for "gun control," 57% of searches for "immigration," and 92% of searches for "vaccinations."

According to the study, Google returned these filtered results, regardless of whether participants searched in private "incognito," or non-private mode.

“It’s exactly opposite of what people would expect,” Weinberg said.

In non-private mode, unique search results were generated for 59% of searches for “gun control,” 63% of searches for “immigration,” and 92% of searches for “vaccinations.”

“Our proposition is that if you search in the U.S. you should be seeing the same things, especially when you search major political topics,” Weinberg said.

DuckDuckGo decided to run the new study after a previous version examined Google search results in connection with the 2012 presidential campaigns. A Wall Street Journal study, commissioned around the same time, mirrored DuckDuckGo’s findings, showing that Google’s personalized search results inserted tens of millions of more links for then-candidate Barack Obama than for his primary challenger Mitt Romney.

“Search personalization doesn’t actually help search results, it really hurts in the aggregate, making people more politically polarized,” Weinberg said.

In his experience, Weinberg says when consumers think of search personalization they’re really expecting search localization for services like local weather, local restaurants, and maps, rather than national or international political issues.

“You can do that all without a filter bubble because it’s not based on your search history,” he said, adding that search-based ad revenue is not dependent on search personalization.

DuckDuckGo’s study controlled for local results by designating all local search results as equal and accounting for no variation if the local links appeared in the same hierarchical order. A result showing an LA Times link, for example, was treated the same as link to the Chicago Tribune.

For critics who dispense with the importance of result order, Weinberg says they’re mistaken.

“The first link gets about 40% of the clicks, the second gets about 20%, and it drops off by half with each [subsequent] link,” he said. “If you switch the second and first link, that’s actually a huge difference” because the one is now getting twice as many clicks as the other.

Yahoo Finance reached out to Google for a response to DuckDuckGo’s study and didn’t receive a response.

“I’m really not on any particular side,” Weinberg said when asked about his political ideology.

He says he’d like to see Congress question Google CEO Sundar Pichai about search result bias when he testifies before the House Judiciary Committee on December 11.

“We understand [the study] is coming from a competitor and there’s an inclination to believe [the findings] less so. That’s why we made it all public, the data, the code, the directions, and we are basically saying we believe other people should study this,” he said.

Weinberg says editorialized results may be crafted depending on the level of privacy, and the number of Android products you use.

“They may have all your email, they may have all your text messages, have all your photos, all your contacts, so [editorialized content] can be based on all of those things. It’s a completely black box and opaque to consumers.”

A few people in the study were given a much broader range in search results from what the majority of participants were seeing, Weinberg said.

“You would just have no idea if you were one of those people. And you also would have no idea, even if you know you’re seeing something different, why you’re seeing it.”

The rise of renewed and vociferous social movements for every non-white and non-cis male group can be seen as paralleling the rise of social media and the domination of technology platforms. In time, at least in the Western world, when blacks, women, gays, and most other populations have won equal rights, and even preferential rights, under codified federal law, and when their social currency has never been higher, it seems now that their voice has never sounded more pained or aggrieved.

Without a doubt, the ease of emoting through a tweet has certainly affected how individual users can set off maelstroms of irrational fury. Whether calling out real hurt, self-deluded hurt, or pure schadenfreude, there is no shortage of bored and usually meaningless lives attempting to drag down a crab that has nearly escaped the barrel of life.

The other side of the same coin is how the tech giant themselves can influence the narrative. We see this play out with not-so-alleged shadow banning practices of conservative social media accounts, and most people are by now aware of YouTube demonetizing conservative channels. We can add a new wrinkle: The representation of Google Image searches to advance a social narrative.

Let's break down what we saw in our own online queries, and then we can analyze it afterward. Try it out for yourself and leave a comment at the end of the article.

Google Search: "White Men"

One result featuring a woman of color

Three results featuring exclusively black men, either as a victim of white brutality or as a successful black man. Each image is a well-dressed black man wearing a tuxedo or suit.

Five results featuring either a mug shot of some kind or simply an angry visage.

Visible taglines for the images including phrases like "Dear White Men, We Need You," "White Men Are Bad," "An Angry White Man" and one begins "White Men Aren't Thrilled When Women"

Only two results showing white men smiling

Google Search: "Black Men"

The top three rows of the search produced a total of seventeen results. Of those, there were:

All seventeen results featuring black men

Eight of the results featuring black men smiling

At least six of the results explicitly expressing victimhood. A few others are vaguer but allude to it.

Visible taglines for the images including: "The Young Black Men Caught," "Why Do White People Feel," "Photo Campaign That Celebrates Black" and "Resilience Of Black Men."

Google Search (see feature photo): "White Women"

Five results featuring women of color

Two results featuring black men

Four featuring white women smiling

Visible taglines for the first five results including: “The Trouble with White Women,” “White Women Need To Talk About Race,” “White Women Aren’t Allies At Work,” “Dear White Women, No More,” and “White Women: It’s Time To Be...”

Other taglines including “White Women Were Southern Slave Owners,” “Being Exoticised By White Women,” “Black Women Are Paid Less Than White,” and “White Women Benefit Most (from white privilege).”

Google Search: “Black Women”

The top three rows of the search produced a total of sixteen results. Of those, there were:

All sixteen results featuring black women

All sixteen results featuring well-dressed and well-groomed women

Fourteen of the results featuring black women smiling or projecting happiness (the other two project strength)

Visible taglines including: “How Women Have Shaped,” “Studies Suggest Black Women Are More,” “My Heroes Are Black Women,” and “20 Millennial Black-Owned Brands.”

Google Search: “White People”

Seven results featuring people of color

Four additional results featuring white people protesting in solidarity with black people

Just one result featuring a white person smiling (a white woman with dreadlocks)

Visible taglines including: “Dear White People,” “Dear White People (again),” “A Letter To White People,” and another features the deplorable Robin DeAngelo.

Google Search: “Black People”

The top three rows of the search produced a total of fifteen results. Of those, there were:

All fifteen results featuring black people

Eleven results featuring blacks smiling

Visible taglines including: “What’s Life Really Like For Black,” “Being Black In America,” “Racism Grows in Places,” and “Facebook Has Problem With Black People.”

An Analysis of Search Results

An aggregate of the three “white” searches is unflattering for white people. Of the forty-six total results, a full eighteen (39%) of them depict non-whites, sometimes in roles of victimhood but usually in portrayals of independence and success. In and of itself, this is not bad, but it is misrepresentative of the intended search, and as we see, it is not replicated in reverse for other searches. For the whites themselves, just seven (15%) were represented in a positive light as indicated by smiling. Put another way, more than twice the amount of blacks were shown than whites in a positive way – in a search designed to produce white results, to begin with.

The taglines are especially egregious. Just two taglines suggest something positive (“Employment Helps White Men’s Health,” and another is assumed to be positive because it shows white women rallying against the death of a black woman at the hands of police). Two others are neutral in that they advertise white shirts. That leaves a full twenty-four taglines (52%) under an image of white people that states something negative or dangerous about them.

An aggregate of the three “black” searches has a different outcome. Of the forty-eight total results, fully 100% of those results came back with images of black people. In the same vein, none of the taglines suggest that blacks are dangerous or that anything blacks do is harmful to others (as is the case especially with white women, more on that anon).

Amazingly, twenty-nine taglines portray blacks as victims. Despite the overall happiness of blacks as seen through imagery, the titling of the pictures nevertheless contends that blacks must be seen as victims. The taglines refer to the problems being black in America, and several refer to their killings (always at the hands of whites or police, not other blacks, even though black homicide victims are killed by other blacks 90% of the time according to the FBI).

As it relates specifically to the query of white women, something striking is happening. There is clearly a concerted effort to portray white women as comfortably and cunningly subversive (Where is the feminist outrage, by the way?). Most headlines call out white women for a combination of their insincere efforts at allying with blacks, benefiting from white privilege, and to really hammer home a negative stereotype, fulfilling the role of a “Karen.” In the intersectional rat race, the irony is that a significant majority of all women marchers in January 2017 were white and championing leftist causes. Two immalleable rules in life: You can’t please everyone, and the left always consumes its own.

It is obvious that the Marxists at Google have an agenda to pursue, namely that the narrative must be alive and well. White men and women are evil? Check. Are blacks simultaneously victims of white oppression and strong individuals? Check. The more subtle displays arise when looking at the positive and negative dispositions. In Nazi propaganda, Goebbels only had to compare Jews to rats for so long before most Germans went along with the lie. How long before a similar lie is believed here? More concerning, what happens after that?

The Wall Street Journal has undertaken a thorough investigation into how Google, despite its denials and disavowals, manipulates search results to influence what you learn and find online.

For years Google executives have insisted that they do not use human intelligence to arrange the results of online searches. Yet, the Journal found that, “Google’s algorithms are subject to regular tinkering from executives and engineers who are trying to deliver relevant search results, while also pleasing a wide variety of powerful interests and driving its parent company’s more than \$30 billion in annual profit.”

The Journal also found that, “Despite publicly denying doing so, Google keeps blacklists to remove certain sites or prevent others from surfacing in certain types of results.”

The tech giant also influences search results through its auto-complete feature prior to searching the internet. “In auto-complete, the feature that predicts search terms as the user types a query, Google’s engineers have created algorithms and blacklists to weed out more incendiary suggestions for controversial subjects, such as abortion or immigration, in effect filtering out inflammatory results on high-profile topics.”

In response to the investigation, a Google spokeswoman, Ms. Levin, told the Journal, “We do today what we have done all along, provide relevant results from the most reliable sources available.”

Google, which has more than 90% of the market share for online searches, is an extremely powerful company capable of controlling what people know and what they can learn online.

The Journal tested the word “abortion” in Google’s search engine and compared the results to Bing and DuckDuckGo’s results. According to the test, Planned Parenthood was featured in 39% of the results on the first page of Google’s results compared to 14% for Bing and 16% for DuckDuckGo.

Ms. Levin responded to the test by claiming that Google does not promote Planned Parenthood through its algorithm, but the available evidence suggests otherwise.

Google has also been exposed by a former staffer who spoke with the undercover investigative organization Project Veritas. The staffer, Zachary Vorhies, claimed that Google has a “news blacklist” document which censors conservative websites such as LifeNews.com, Newsbusters and the Media Research Center.

According to one researcher, Google even has the power to influence the results of an election. Indeed, they have already done so.

Dr. Robert Epstein, Ph.D., a senior research psychologist at the American Institute for Behavioral Research and Technology, is one of the lonely voices that has been speaking out about Google’s manipulation of search results. Dr. Epstein’s research has focused particularly on the impact of Google’s search result manipulation on elections.

In a testimony before the Senate Judiciary Committee in June of 2019, Dr. Epstein claimed that, “In 2016, biased search results generated by Google’s search algorithm likely impacted undecided voters in a way that gave at least 2.6 million votes to Hillary Clinton (whom I supported).”

Dr. Epstein also claimed that, “On Election Day in 2018, the “Go Vote” reminder Google displayed on its home page gave one political party between 800,000 and 4.6 million more votes than it gave the other party. In other words, Google’s “Go Vote” prompt was not a public service; it was a vote manipulation.”

The evidence Dr. Epstein provides is disconcerting, though not surprising.

In a leaked video following the election of President Donald Trump in 2016, Google executives held a staff meeting in which they conveyed significant remorse about the election results.

In the video, Google co-founder Sergey Brin states, “I know this is probably not the most joyous TGIF (weekly meeting) we have had. Let’s face it, most people here are pretty upset and pretty sad because of the election.”

Brin goes on to say, “Myself, as an immigrant and refugee, I certainly find this election deeply offensive and I know many of you do too. And I think it’s a very stressful time, and it conflicts with many of our values.”

In the same meeting, Google CFO Ruth Porat broke down in tears recounting Hillary Clinton’s loss that Tuesday evening. After texting a friend who was at what would have been Clinton’s election night victory party, Porat said her friend responded, “People are leaving. Staff is crying. We’re going to lose.” With her voice trembling, Porat says, “Uh... that was first moment I really felt like we were going to lose, and it was this massive kick in the gut that we were going to lose.”

Numerous other examples of liberal bias among Google’s top executive team was demonstrated in the video, and what’s remarkable is that there is not a single moment of conservative opinion expressed. The support for Clinton and the sense of dread seemed to be unanimous.

It couldn’t be clearer that Google is an enormously influential company run by an entirely liberal executive team. And the Journal’s excellent investigative work further exposes their manipulative practices.

I think it’s past time we consider whether using Google as our primary search engine, which most Americans do, is wise.

Google, Inc., isn't just the world's biggest purveyor of information; it is also the world's biggest censor.

The company maintains at least nine different blacklists that impact our lives, generally without input or authority from any outside advisory group, industry association or government agency. Google is not the only company

suppressing content on the internet. Reddit has frequently been accused of banning postings on specific topics, and a recent report suggests that Facebook has been deleting conservative news stories from its newsfeed, a practice that might have a significant effect on public opinion – even on voting. Google, though, is currently the biggest bully on the block.

When Google's employees or algorithms decide to block our access to information about a news item, political candidate or business, opinions and votes can shift, reputations can be ruined and businesses can crash and burn. Because online censorship is entirely unregulated at the moment, victims have little or no recourse when they have been harmed. Eventually, authorities will almost certainly have to step in, just as they did when credit bureaus were regulated in 1970. The alternative would be to allow a large corporation to wield an especially destructive kind of power that should be exercised with great restraint and should belong only to the public: the power to shame or exclude.

If Google were just another mom-and-pop shop with a sign saying "we reserve the right to refuse service to anyone," that would be one thing. But as the golden gateway to all knowledge, Google has rapidly become an essential in people's lives – nearly as essential as air or water. We don't let public utilities make arbitrary and secretive decisions about denying people services; we shouldn't let Google do so either.

The Elon Musk Story

By Donna King

Elon Musk is a political money laundering operation. Lapdog hired media shills, that are bribed by Musk's cartel, write hype and fluff about him, (like Douglas Coupland, Ashley Vance and other lying pigs-for-hire). Those PR cover-up weasels need to crawl back to their holes.

SpaceX only exists because NASA budget cuts were timed with SpaceX contract outlays. A huge number of NASA staff were fired, and programs cut, the same time that NASA work for the same exact functions were contracted to SpaceX to pay the Musk Cartel for putting Obama and Biden in office. The billionaires that benefit from SpaceX are the financiers of Obama/Biden. Google and the Silicon Valley Oligarchs are the biggest portion of the Musk Cartel. Google was the biggest staffing source of the Obama White House.

SpaceX is simply a crony political payola scam. If you look at the voter registration of the GAO investigators on the case, 80% of them are Obama/Biden supporters.

100% of Musk's government funds have been voted in or approved by government staff who voted for Obama/Biden. Obama/Biden staff have given the Musk Cartel more billions of dollars than any other person in history and the Musk/Google Cartel have made more exclusive profits from financing Obama/Biden political campaigns than any other lobby group in history.

When you peek behind the curtain in the magical fantasy technology world of Elon Musk you find that the entire emerald utopia is built out of bribes, payola and crony tech Illuminati stock market manipulations. Elon Musk's 'wizardry' is 20% other people's stolen technologies and 80% bullshit! He has purchased his internet PR facade with billions of dollars of the taxpayer's cash and keeps his self aggrandizing front going with extensive contracted off-shore troll farms and stock market "flash boy" algorithm computer hype engines.

Any tech person could do every single thing that Elon Musk has done with ONE THIRD LESS cash than Elon Musk has plowed through. So where does the rest of the money go?

It goes to political candidates in quid pro quo money laundering Dark Money conduits!

Taxpayer money taken by Tesla Motors, which politicians own interest in and also get secret PAC money from:

\$3B-CA Factory Subsidy

\$1.3B-NV tax incentive

\$45M-Discounted DOE Loan

\$90M-CA Alternative energy advanced trans. financing authority

\$517.2M-Sale of CA and other regulatory credits

\$284M-Federal income Tax credits for consumers of Model S Sedan

\$38M-CA rebate for CA buyers of Model S Sedan

\$126M-CA Self Generation incentive program

\$647,626-CA job training reimbursement

Total Subsidy=\$5,355,847,626 BILLION AND COUNTING

Taxpayer money taken by Elon Musk via SolarCity, which politicians own interest in and also get secret PAC money from:

\$750M-NY State cost to build solar panel factory

\$150M- to start NY Factory Operation

\$1.5B-Est. value of 30% subsidy for solar installation since 2006, including at least \$497M- in Treasury grants

\$5.6M-OR tax credits & rebates

\$260M- NY local property tax exemptions

Total Subsidy=\$3,163,100,000 BILLION AND COUNTING

Taxpayer money taken by Elon Musk via SpaceX, which politicians own interest in and also get secret PAC money from:

\$20M- TX state & local incentives & rebates for space launch facility near Brownsville

\$5.5B- Government Contracts

\$1.6B- NASA space taxi contract

Total Subsidy= \$7,120,000,000 BILLION AND COUNTING

Know that everything you have seen in the main stream news media about Elon Musk was bought and placed there by Elon Musk. Elon Musk is a figment of his own propaganda, Chinese click farms, his hired troll “fan boys” and his sociopathy.

Musk has gotten billions of dollars of City, State And Federal Cash and exclusive tax breaks which reduce taxpayer funds for teachers and firemen. He gets taxpayer market space worth hundreds of billions of dollars too. In other words Steven Chu and the Obama White House gave Musk all the stock market valuation perks and cash to monopolize the EV market. They gave this set of perks exclusively to Musk while sabotaging his competitors at the same time. Dept of Energy and White House staff were ALSO shareholders in the Musk Cartel. Bloggers a fake “reporters” that “report” that Musk “hardly got any government help” and “paid it all back” are FULL FLEDGED LYING SHILLS! Musk has harmed the public, democracy, free markets and hundreds of competitors while pocketing billions of dollars that he only got because of taxpayer cash manipulations. He didn’t not earn that money,

he took that money from crooked political deals and bribes paid to White House staff, California Senators and Dept of Energy bosses! Tesla spends \$1 million annually on Washington lobbyists. Its cars are financed by over \$280 million in federal tax incentives, including a \$7,500 federal tax break and millions more in state rebates and development fees. SpaceX has also received over \$5 billion in government support. It has over promised and under delivered. SpaceX rockets, for example, are far less reliable than many of its competitors. This is outlined in reports from December 2017 and January 2018 in which the Department of Defense Inspector General and NASA's Aerospace Safety Advisory Council described a list of security concerns they have with SpaceX, among them 33 significant non-conformities.

Bloomberg Business News reported in November about a Tesla solar factory for which the State of New York paid \$750 million based on a commitment to create 1,500 jobs. The factory had been developed for another Musk-run company, SolarCity, which Tesla bought in 2016 in a \$2.6 billion deal. SolarCity had been \$2.9 billion in debt. Only a relative handful of jobs have been created, and New York officials are expressing dismay. Raymond Walter, a Republican in the New York State Assembly, says he is concerned that the state "has too many eggs in the Tesla basket, which doesn't seem like a very strong basket." John Kaehny, executive director of Reinvent Albany, a nonprofit focused on government accountability, says, "It's a complete hoo-ha! These mega-subsidy deals take place in complete secrecy without scrutiny from the public."

Bloomberg News declares that this is "...a familiar playbook for Musk, start with wild promises followed by product delays, production hell, shareholder anger and finally, hopefully, redemption."

Things, however, may be even worse than they appear. Some are even speculating that Elon Musk, SpaceX and Tesla may be on their way to becoming the new Enron. Enron, the energy giant, employed approximately 20,000 people and claimed revenues of \$111 billion at its peak by 2000. As it turned out, Enron used shady accounting practices to hide its losses and report profits which, in fact, did not exist. Andrew Fastow, the chief financial officer, created the scheme to falsify Enron's real financial status. In April 2001, the fraud began to unravel as analysts began to question Enron's numbers. In the end, Enron was found to have losses of \$591 million and debt totaling \$628 million. Stock prices declined from \$90 in 2000 to less than one dollar when the scandal was exposed. Senior managers, who kept selling their stock while encouraging others to continue buying, were convicted of insider trading. In December 2001, the company declared bankruptcy.

In the view of many, Elon Musk has been engaging in similar behavior. A Bloomberg report in November suggests that SpaceX may be less than honest with its numbers, giving a false illusion of profitability. According to Bloomberg, "While SpaceX is burning through cash, disclosures to potential lenders showed the company had positive earnings before interest, taxes, depreciation and amortization of about \$270 million for the 12 months through September, people with knowledge of the matter said. But that's because it included amounts that customers had prepaid and because it excluded costs related to non-core research and development... Without those adjustments, earnings were negative, they said."

According to Bloomberg, "This shouldn't come as a shock. A Wall Street Journal report from a few years ago showed that its profit margins were laser-thin. But if Musk is now going to these lengths to pad SpaceX's books to secure a loan, it appears there's a serious problem."

In the case of Tesla, the Wall Street Journal reports that, "Federal investigators are probing whether Tesla's stated information about production of its Model 3 electric sedans had misled investors about the company's business. Under examination is Tesla's public statements about Model 3 productions as compared to the number of vehicles that were actually built."

Elon Musk and his companies have a very questionable record when it comes to truth and honesty. Overstating prices to qualify for higher state tax credits seems to fit a pattern. According to a recent report in The Oregonian/Oregon Live, "The state of Oregon has recovered \$13 million it paid to Tesla for solar power projects, after an investigation conclude the company inflated prices to qualify for higher tax credits."

Whatever the potential benefits of such a system, one of the disastrous consequences would be light pollution. As they traveled across the skies, thousands of Starlink satellites would effectively make astronomical images useless by leaving long luminous trails. At the March 9 "Satellite 2020" conference keynote speech, Elon Musk dismissed those worries and claimed that his satellites will do no harm to astronomical research – if need be, they will be painted black. This idea was tested with satellite 1130, "DarkSat". The results were unconvincing, to say the least. The next generation is supposed to be less luminous than the faintest stars that can be seen with the unaided eye, but this is still far too bright for astronomers' ultra-sensitive instruments, which can observe stellar objects four billion times fainter than that threshold. Why did you hide, or avoid, these widely covered facts unless you are a lying shill?

The low Earth orbit region is already heavily used by scientific, remote-sensing and telecom satellites as well as the International Space Station (ISS). A large-scale increase in the number of satellites would increase the risk of space collisions and the ensuing multiplication of debris – in the worst-case scenario, it could render the LEO and near-space environment unusable. The first incident already took place: on September 2, 2019, the European Space Agency was forced to move away one of its Earth observation satellites to avoid a collision after Starlink refused to change the path of its satellite. Elon Musk asserts that all the satellites be equipped with thrusters to make them fall back on Earth once they reach the end of their active life, but that doesn't reduce the risk while they're operational. Why would you hide these facts unless you are a Musk tool.

Since the first launch, six Starlink satellites have already failed. If a mere 5% of Starlink's satellites broke down during their estimated lifespan of five to seven years, they would add many thousands of fragments of space debris to the 20,000 already under surveillance.

Musk initially planned to put a quarter of his constellation at the altitude of 1,110 km (690 miles). Seventy-five percent were due to be placed no higher than 600 km (370 miles). Below this altitude, residual atmospheric drag will eventually cause a failed satellite to fall out of orbit. On April 17, 2020, SpaceX modified its plans and requested permission for all its satellites to orbit lower than 600 km. This reduces the risk of broken-down satellite staying in high-earth orbit for centuries, but increases congestion in the low Earth orbit region.

Beyond the operational risks, building, launching and maintaining such a gigantic network of satellites would require an enormous amount of raw materials and energy. Unlike the geostationary satellites commonly used by telecoms, Starlink satellites will stay in a low Earth orbit and cross the visible sky of a given location for just a few minutes. To follow and connect to them, buyers will have to use purpose-built phased array antennas. To make them affordable, they would have to be mass produced, and SpaceX has asked permission for 1 million of them. For starters. Why did you avoid discussing the obvious megalomania of Musk's scheme?

On March 9, 2020, Elon Musk claimed that thanks to Starlink, anybody "will be able to watch high-def movies, play video games and do all the things they want to do without noticing speed". Thus, Musk explicitly underlines his wish to reinforce already massively energy-guzzling digital activities, such as video streaming and online video games. These consume just below the whole electricity consumption of Europe (if you want figures, the world digital energy consumption of 3,834 TWh expected in 2020 is comparable to the 4,077 TWh for European electricity in 2018). Their share of world greenhouse gas emissions is already 4% and could double to 8% by 2025.

Musk's declaration ends on an ominous note, in essence saying "My clients will be able to do whatever they want, just as I am able to do whatever I want". Why don't you discuss Musk's overt bribery of federal officials that he pays at NHTSA, DOE, FCC, SEC and other agencies, to avoid regulation?

Why do you also ignore the following assertions?

"...Elon Musk (Along with his Silicon Valley Cartel bromance frat boy buddies Eric Schmidt and Larry Page, et al) is a mobster-class criminal sociopath who hired business assassins to attack us and operated anti-trust and RICO law violating competitor "kill programs". He used his windfall of taxpayer funded cash and Goldman Sachs assisted stock market manipulations and intelligence agency staff and tools from In-Q-Tel and Google to engage in these crimes. We have demanded that the FBI arrest him and that the SEC, FTC and NHTSA prosecute him. We will make certain that his legacy, for the rest of time, reveals the true facts about his crimes and political manipulations..."

Per his own staff, ex-wives, partners, ex-founders, suppliers, FBI, SEC, Congress and private investigators. These are all statements from court reports, investigations, FBI submissions and Congressional reports. Each numbered statement is associated with a numbered witness report containing the evidence for the statement. Please pass this report around and post it on Tesla windshields. We demand a hearing, with Musk on-site, on a live Senate televised and webcast investigation hearing in Congress to go over each of these points.

Nobody On Earth Can Launder And Hide Illicit Cash Like Elon Musk. He's worth an estimated \$39 billion, but has repeatedly said he's poor. He is a scumbag liar and a crook!

In one of a series of wild tweets posted last week, Elon Musk stated he would be "selling almost all physical possessions" and that he would "own no house." He appears to be actually following through with that promise, as chronicled in a great story in The Wall Street Journal about Musk's personal finances that you should go read.

According to the WSJ, despite being worth an estimated \$39 billion on paper:

...he has to borrow, sometimes a lot, to pay for his lifestyle and business investments without liquidating shares that help him maintain control of the companies he runs. About half his Tesla stock is pledged as collateral for personal loans, an April 28 financial filing shows. Maintaining his equity stake—about 20%, or around \$29 billion at its current valuation—is important for him to keep control over the Silicon Valley auto maker.

Musk also doesn't take a salary at Tesla, but he apparently became eligible for stock options worth more than \$1 billion this week. To get that money, he will need an eye-watering \$592 million to exercise the option, according to the WSJ. It's not clear if Musk has the money on hand to exercise that option or if the money raised from the house sales will be used to help pay for the sum. "Mr. Musk said he wasn't selling his possessions because he needs the money," the WSJ reported.

The article also lists a few times Musk has said he's cash poor. Here's one example:

Before Tesla went public, Mr. Musk told a judge during a contentious divorce with his first wife that he had run out of cash and had taken on emergency loans from friends to support his family and pay living expenses.

Here's another:

Last year, Mr. Musk's ability to access cash came up again during a defamation lawsuit over comments he made about a man involved in the rescue of a Thai soccer team from a flooded cave in 2018. A lawyer in the case said in a filing that Mr. Musk had described himself as "financially illiquid."

The whole article has a lot of history about Musk, interesting information about his finances backed up by regulatory filings, and numerous quotes from Musk himself, and I sincerely recommend taking 10 minutes to read it in full.

Musk has Goldman Sachs, Welles Fargo and Wilson Sonsini Mobster-Class executive bankers hide his money in a rabbit warren of HUNDREDS of trusts, shell corporations and fake charities from South Dakota, to Switzerland to the Cayman Islands to Russia.

A federal investigation to show the tentacular diagram of scams has been demanded!

FBI, SEC, FTC and citizen forensic investigators are hot on his trail, though!

These are the illicit things that sociopath narcissist Musk has engaged in with the taxpayer cash he mooched from government treasuries:

1. PRIVATE INVESTIGATORS HAVE PRODUCED REPORTS ON THE ELON MUSK AND TESLA MOTORS FRAUD, STOCK RIGGING, BRIBERY AND SAFETY INVESTIGATIONS that Musk's Silicon Valley Sandhill Road venture capitalists cover-up.

2. Musk hides his money in illicit and false-front real-estate scams to avoid taxes and to launder money.

3. "His corrupt cobalt mines promote genocide in the Congo as seen in NETFLIX Black Earth Rising".

4. "His corrupt cobalt mines promote mass rape in the Congo as seen in NETFLIX Black Earth Rising".

5. "His corrupt cobalt mines promote child slave labor in the Congo as seen in NETFLIX Black Earth Rising".

6. "He tries to bury his ill-gotten money from the taxpayers in gobs of real estate acquisitions and houses including his notorious purchase of the Vaughn DeGuigne Court mansion at 891 Crystal Springs Road, in Burlingame, California which is staged for his kinky sex parties and Illuminati-like cartel get-togethers..."

7. "His is not faithful to his girlfriends. Some of them are Ghislane Maxwell-type enablers, too, just to hang around his money and promote his sex schemes like Maxwell did for Epstein"

8. "The workers that build his batteries die or sicken from toxic poisoning and Musk tries to hide his dirty factories overseas"

9. "Tesla bribes U.S. Senators with cash and stock in order to get free taxpayer funds"

10. "He is addicted to drugs and booze"

11. "He has 'sociopath-class' mental issues and he is a narcissist..."

12. "Tesla has had more recalls for safety defects, per volume, than any other car maker. Musk refuses to allow the use of the word RECALL but the facts are the facts."

13. "It is so easy to hack any Tesla and crash it, break into it or give it bad braking orders that it is criminally negligent to allow Tesla's on the street. Even the Chinese have hacked Tesla's from the other side of the world! Tesla's have been hacked and remotely crashed, the drivers killed and Tesla covers this up..."

14. "His partner: Steve Jurvetson, has been charged with sex and corruption issues"

15. "He arranged government kick-backs with the White House"

16. His entire current existence is based on stock market scams created with taxpayer dollars and Goldman Sachs securities manipulations
17. "He is the world's biggest government mooch and has taken more taxpayer cash than anyone in U.S. History as a billionaire who does not need a hand-out"
18. "He is a member of the Palo Alto Tech Mafia operated by Stanford University gay frat house guys"
19. "Google (who is a major Tesla investor) hides all negative Musk/Tesla news in digital media globally and hypes TSLA stock in order to profiteer with Tesla stock. This is a violation of federal SEC laws"
20. "More drivers have been caught driving drunk, in Tesla's, than any other car Per Capita produced"
21. "Google boss Larry Page is Musk's 'bromance' boyfriend buddy and he uses Google to cover-up Musk's scandals"
22. "His so-called 'foundation' is just a payola and tax evasion scam for his family. It is a charity scam"
23. "His batteries are the most dangerous use of lithium ion storage ever conceived"
24. "His partner: Panasonic, has been charged with multiple corruption, dumping, price rigging and manipulation crimes around the globe"
25. "Almost all of the internet 'Tesla Fanboys' are Russian troll farms and hired bloggers that Musk pays vast amounts of money to in order to hype up a fake image for him. Musk has over 1000 click-farm and Russian troll bloggers under his employ via various false-front cover organization contractors.
26. "The drug and murder-for-hire website: Silk Road, was built at drug-enthusiast Musk's company SpaceX by Musk's programmer and Musk hires many people from a group called: In-Q-Tel, who were caught with tons of cocaine on their airplanes in a DEA raid"
27. "His SpaceX is nothing more than a domestic spy satellite company"
28. In-Q-Tel supplies a number of Musk's staff, yet In-Q-Tel has been accused of numerous criminal ventures and abuses of the public.
29. You never hear about these crimes because Musk's buddies in Silicon Valley control 90% of the global media these days and they censor any bad news about Musk in order to protect their Cartel.
30. "Musk's brain chip company tortures monkey's and other small animals in bad science experiments"
31. "His father screwed his daughter and got her pregnant. His father seems to be a pedophile and incest participant"
32. "Dianne Feinstein and her family covertly own many Musk interests and arranged for him to get his funds from the taxpayers. She helped sabotage his competitors in her district"
33. "You can't put out the fires when his batteries explode say fireman because Lithium fires are military class thermo-dynamics"
34. "The fumes from his lithium ion thermal battery vapors give you cancer, lung and brain damage"
35. Psychologists say that Musk is a self promoting, narcissistic, multi-billion dollar, self-aggrandizing PR hype addict.
36. Many of us know these facts from personal interaction with Musk, his companies and his politicians.

37. Everything in these reports can be proven in a jury trial, Congressional hearings or live TV debates but Musk would rather die than face uncontrolled public scrutiny.
38. Musk will do anything to keep this information from getting out, including hiring attack services like his Fusion GPS, Black Cube, Gawker and Gizmodo Kill services.
39. While Musk's dirty deeds sound like a bad Hollywood movie script. It all really happened and there is now massive hard copy evidence to prove it.
40. Elon Musk exists because he bribed DNC politicians including Obama, Clinton and Senators Feinstein, Reid, Boxer, Harris, Spier and Pelosi to give him free taxpayer cash and government resources from the Department of Energy and the California political tax pool.
41. When you follow-the-money and the insider trading, stock ownership and crony payola kick-backs. The payola between Musk, his scummy cronies and the politicians is proven.
42. The Musk empire pays bribes in billions of dollars of Google (Where Musk's boy buddy Larry Page works), Twitter, Facebook, Tesla, Netflix and Sony Pictures stock and stock warrants which is never reported to the FEC
43. The Musk empire pays bribes in billions of dollars of Google, Twitter, Facebook, Tesla, Netflix and Sony Pictures search engine rigging and shadow-banning which is never reported to the FEC
44. The Musk empire pays bribes in free rent
45. The Musk empire pays bribes in Male and female prostitutes
46. The Musk empire pays bribes in cars
47. The Musk empire pays bribes in dinners at fancy restaurants
48. The Musk empire pays bribes in socialite party financing
49. The Musk empire pays bribes in Sports Event Tickets
50. The Musk empire pays bribes in Political campaign printing and mailing services "Donations"
51. The Musk empire pays bribes in Secret PAC Financing. Musk's empire is a massive political financing conduit for the DNC politicians via a tentacular array of covert shell corporations, trusts, 501C's and stock bribes.
52. The Musk empire pays bribes in Jobs in Corporations in Silicon Valley For The Family Members of Those Who Take Bribes And Those Manage Bribes
53. The Musk empire pays bribes in "Consulting" contracts from McKinsey Consulting as fronted pay-off gigs
54. The Musk empire pays bribes in Overpriced "Speaking Engagements" which are really just pay-offs conducted for donors
55. The Musk empire pays bribes in Private jet rides and use of Government fuel depots (ie: Google handed out NASA jet fuel to staff)
56. The Musk empire pays bribes in commercial Real Estate
57. The Musk empire pays bribes in Fake mortgages
58. The Musk empire pays bribes in The use of Cayman, Boca Des Tores, Swiss and related money-laundering accounts and The use of HSBC, Wells Fargo, Goldman Sachs and Deutsche Bank money laundering accounts and covert stock accounts

59. The Musk empire pays bribes in Free spam and bulk mailing services owned by Silicon Valley corporations
60. The Musk empire pays bribes in the use of high tech law firms such as Perkins Coie, Wilson Sonsini, MoFo, Covington & Burling, etc. to conduit bribes to officials
61. The U.S. Energy Dept (DOE) has been covering-up organized political crime activities in which government funds are being used as a slush-fund to pay off political campaign financiers and to pay for CIA/GPS Fusion-Class attacks on Silicon Valley business competitors via Musk political conduits.
62. Political campaign financiers and government agency staff share stock market holdings with each other under family trusts, shell corporations and layered Goldman Sachs accounts.
63. The basic Musk scam-deal goes like this: "Obama funds Tesla, Musk conduits campaign funds to Obama, top Obama staff profit off of insider Musk stocks..."
64. Elon Musk is a criminal, a mobster, an asshole, a balding fake-hair wearing, plastic surgery-addicted, bi-sexual douchebag, woman-abusing, sex addicted, tax evader. We can put this in writing because all of those identifications regarding Musk can be proven in court and are documented in existing lawsuits and news stories.
65. Musk exploits poor people and child slaves in the Congo and Afghanistan to mine his lithium and Cobalt. Look up this phrase on the top search engines: "child labor electric car batteries".
66. Musk spends billions per year to hire Russian trolls, fake blogger fan-boys and buy fake news self-glory look-at-me articles about himself.
67. Musk thinks he is the 'Jesus' of Silicon Valley and he will do anything to make the public think so.
68. Musk is insecure because his father was abusive and his "trophy wife" Mother is overbearing so he developed sociopath-like mental issues.
69. Musk has been professionally diagnosed as a 'psychotic narcissist'.
70. He public stated on an investor call that he uses drugs and alcohol to get through the night. We have the tapes.
71. Musk relies on Google and the DNC Main Stream News (MSN) to hide bad news about him.
72. Fake News manipulator Google is run by Larry Page. Larry is Musk's investor and bromance 'Butt buddy'. They share an apartment.
73. Musk uses massive numbers of shell companies and trust funds to self-deal, evade the law and hide his bribes and stock market insider trading.
74. His brother ran Solar City and is now under federal investigation for securities fraud.
75. A huge number of Tesla drivers have been killed; pedestrians and oncoming drivers have also been killed, and Musk covers it up.
76. Extremist politicians and their controlled news outlets refuse to allow any articles about Musk's crimes to be printed because they benefit from Musk's crimes.
77. Investor oligarch's Tim Draper and Steve Jurvetson are so fanatical about not being embarrassed from a Tesla bankruptcy that they will pump the TSLA stock and threaten anybody who might disclose the Musk misdeeds.
78. Peter Thiel, a Musk 'boyfriend' also protects Musk. Musk, and his cronies, use Palantir, Google and related software to scan the entire internet every few minutes for any occurrence of the words: "Musk", "Tesla" or "Tesla"

Fire”. They send trolls and fake bloggers (Many of them Russian) to put pro-Musk comments on the comments section of any blogs or articles discussing those topics and try to flood out the truth about Musk.

79. In EVERY blog that you read that mentions 'Musk', at least 1/3 of the comments have been placed their by Musk's paid shills.

80. There are no “Tesla Fan Boys”. All of the fanatic Tesla comments on the internet are Musk’s, Thiel’s, Jurvetson’s and Draper’s fake fanboy trolls. Musk, himself, stays up late at night pretending to be a ‘Tesla Fan Boy’ on blogs.

81. The 'Silicon Valley Mafia; cartel of frat boy sociopath venture capitalists like Steve Jurvetson, Tim Draper, Eric Schmidt, et al; threaten those who do not support the cult of Tesla or their political candidates.

82. Musk holds the record for getting sued for fraud by his investors, wives, former partners, employees, suppliers and co-founders.

83. Elon Musk has gone out of his way to hire hundreds of ex-CIA and In-Q-Tel staff and assign them to "dirty tricks teams" to attack his competitors and elected officials who Musk hates.

84. Musk never founded his companies. He took Tesla away from the founder: Marty, in a hostile take-over!

85. Musk's "Starlink" satellites are domestic spy and political manipulation tools - never get your internet from one. SpaceX is entirely a spy satellite operation.

86. The same kind of EMF radiation proven to cause cancer from cell phones exists in massive amounts in a Tesla.

87. Musk can't fix a car or build a rocket and has almost no mechanical skills he can't build or work on any of the things he made himself famous for.

88. If you pull a report of every VIN# of every Tesla ever built and cross reference that with insurance, repair and lawsuit records you will find that the "per volume" fire, crash, death and defect rate is THE WORST of any car maker in history!

89. Musk is a lying con artist and partners with Goldman Sachs to rig the stock market. Sachs has a dedicated team of 18+ men who rig stocks and valuation bumps for Musk.

90. Over 1000 witnesses can prove every one of those claims in any live televised Congressional hearing!

91. Senators Dianne Feinstein, Harry Reid, Nancy Pelosi, Kamala Harris and their associates own the stock in Tesla Motors and/or it's suppliers and mining companies. That is why they criminally help cover-up investigations of Tesla!

92. All of this was reported, in writing, to James Comey, Patricia Rich and David Johnson at the FBI by those who supplied this information but Musk has yet to be arrested because crooked California politicians, who own his stock, protect him from arrest.

93. Why aren't all of those parties in prison if it is so easy to prove the crime? Think back to recent history: the heads of the Department of Energy, the FBI, The DOJ and the U.S. Attorney General were kicked out of their jobs for corruption. THIS was the corruption they were doing. They all knew about this crime but they were covering it up.

94. Musk took over Tesla Motors in a hostile take-over in order to exploit lithium, cobalt and other mining corruption deals for his business partners.

95. When you take a look at the ‘lithium’ in Musk’s horrifically miss-engineered lithium ion batteries you will uncover horrible crimes engaged in to acquire it.

96. His batteries cause wars in the Congo, Afghanistan and Bolivia from the corrupt mining deals involved with mining lithium and cobalt.
97. Lithium ion batteries are insider trading-owned by ex-CIA boss Woolsey and DOE Boss Chu.
98. Lithium ion batteries excrete chemicals that mutate fetuses when they burn and destroy your brain, lungs and nervous system when they burn
99. Musk's batteries kill the factory workers who make them
100. Musk's batteries cause Panasonic to be one of the most corrupt companies in the world
101. Musk's batteries poison the Earth when disposed of
102. Musk's batteries can't be extinguished by firemen
103. Musk's batteries poison firemen when they burn
104. Musk's batteries are based on criminally corrupt mining schemes like URANIUM ONE
105. Musk's batteries have over 61 toxic chemicals in them
106. Musk's batteries come from an industry that spends billions on internet shills and trolls used to nay say all other forms of energy
107. Musk's batteries and are insider-trading owned by corrupt U.S. Senators who are running a SAFETY COVER-UP about their dangers.
108. Apple products with lithium ion batteries have been exploding and setting people on fire.
109. Over time the chemical dendrites, or deposits, inside each Musk battery grow worse and increase the chances of explosion as they age -
110. Musk's LITHIUM ION BATTERIES BECOME MORE AND MORE LIKELY TO EXPLODE AS TIME GOES ON AND AS THEY AGE. This is not a theory. This is a scientific fact. That is why you hear about more and more lithium batteries catching fire and blowing up.
111. Additionally, scientists also speculate that the increasing presence of low energy nuclear background energy and wifi energy in the environment is making lithium ion batteries explode more often lately. This theory is upheld by the increasing number of FAA reports about commercial airline cabins suddenly "filling up with toxic smoke" as some lithium ion battery explodes in someones overhead luggage. As commercial jets go higher they lose the protection of the atmosphere and are subjected to more gamma (and other) radiation from overhead. This makes the already unstable lithium ion batteries on board blow up.
112. "Bad Guys" have figured out how to make them explode remotely in devices by making the device electronics cause the batteries to overload.
113. The dangers of lithium ion batteries are hidden by CNN and Main Stream News (MSN) because pretty much only the DNC people profit from them and the DNC folks control CNN and the MSN.
114. The Obama Administration promised Silicon Valley oligarchs the market monopoly on lithium ion batteries and the sabotage of fuel cells in exchange for campaign financing and search engine rigging
115. United States Senators that are supposed to protect us from these deadly products own the stock market assets of them so they protect them and stop the FDA, OSHA, DOT & NHTSA from outlawing them.

116. Tom Steyer is a notorious DNC financier. His partner, Margaret Sullivan ran, the federal USAID agency, USAID sent all of the DNC campaign financiers in Silicon Valley a federal 'report' from USAID that said there was "A TRILLION DOLLARS OF LITHIUM IN AFGHANISTAN" and promised to give those lithium mines, EXCLUSIVELY, to the Silicon Valley venture capitalists if they funded and web search manipulated the election for Obama to take over the White House. We have the documents proving this. In other words, a re-up of the Afghan War was caused by Elon Musk and it killed American soldiers so that Musk could buy more mansions and trophy wives.

117. Alkaline, NiCAD and hundreds of other battery chemistries DO NOT have all of these problems but Lithium Ion batteries get a monopoly because of politician insider trading ownerships.

118. Tesla Motors has caused far more deaths and injuries than the world generally knows about.

119. A recent fire on U.S. Highway 101 near Mountain View, CA, burned the driver alive and killed him.

120. In Florida two kids died in a Tesla, burned alive, screaming in agony.

121. A man died in agony in a Tesla crash in Malibu that set Malibu Canyon on fire.

122. A young woman, at the start of life, and her boyfriend were burned alive in their crashed Tesla.

123. There are many more deaths and crashes than you have seen in the Main Stream News (MSN) The deaths and the cover-ups are endless.

124. Senators Dianne Feinstein, Harry Reid, Nancy Pelosi, Kamala Harris and their associates own the stock in Tesla Motors and/or it's suppliers and mining companies and they cover-up and halt investigations and laws designed to save the public. They, and their crony's, spend over \$1B a year to shill and troll hype about lithium ion batteries and cover-up the dangers.

125. Lithium ion EVs are more prone to battery fires. Experts say that their lithium-ion batteries can fuel hotter fires that release toxic fumes and are more difficult to put out.

126. Lithium ion fires keep reigniting which explains why it takes so long and requires copious amounts of water or foam (it is an electric fire, after all) to smother the flames.

127. Tesla employee Bernard Tse and his team warned Elon Musk about these dangers in 2008 and they got fired and/or warned to "say nothing" by Musk.

128. Three top Tesla engineers died in a plane crash next to Tesla offices in San Carlos after two of them agreed to become whistle-blowers.

129. The DNC bosses, Congress people and federal executives own the stock in lithium, Solar and EV markets and use kickbacks from those markets (Especially via convoluted campaign finance laundering via Elon Musk) to finance the DNC.

130. The DNC bosses and Musk use character assassination as their main political tool against any member of the public who speaks out against their felony stock market scams and PizzaGate-like scandals. The Harvey Weinstein reports by Ronan Farrow show that they have teams of hired goons that they pay to destroy people's lives. They use Black Cube, Mossad, In-Q-Tel, Stratfor, Gawker Media, Gizmodo Media, Media Matters, David Brock, Sid Blumenthal, NY Times, Google servers, Facebook servers, Podesta Group, Perkins Coie, Covington & Burling and a host of "media assassins".

131. Musk's "cabin boy": Jared Birchell, runs around covering up Musk crimes all day

132. Gawker and Gizmodo Media set-up the attack stories and, in paid partnership with Google, Google kicks their attack links around the globe, in front of 8 Billion people, forever. Google locks the attack articles of its enemies on the front top search results of Google search results forever, on purpose! Google and Musk are partners-in-crime.
133. Larry Page steals technology for Google and Musk meets with Larry Page to advise him on which technologies to steal and how to bypass FEC laws.
134. Musk has exceeded FEC campaign finance limits by billions of dollars via “in-kind” services.
135. Reports at <https://www.propublica.org> prove some of these assertions
136. Reports at <https://www.transparency.org> prove some of these assertions
137. Reports at <https://www.icij.org> prove some of these assertions
138. Reports at DAILY NAIL prove some of these assertions
139. Reports at <https://stopelonfromfailingagain.com> prove some of these assertions
140. Reports at <https://www.zerohedge.com/news/2019-02-24/tesla-slams-tree-florida-bursting-flames-and-killing-driver> prove some of these assertions
141. Reports at Elon Musk is a total fraud - nypost.com prove some of these assertions
142. Reports at Elon Musk is a total fraud: Truth about Tesla billionaire exposed prove some of these assertions
143. Reports at Elon Musk Passes the Hat Again on Capitol Hill... And in China prove some of these assertions
144. Reports at About Elon Musk - A WASHINGTON DC ORGANIZED CRIME prove some of these assertions
145. Reports at Mark Spiegel: Elon Musk is 'a pathological liar' prove some of these assertions
146. Reports at <https://nationalnewsnetwork.net/> prove some of these assertions
147. Reports at NY TIMES.com prove some of these assertions
148. MUSK'S SPACEX COMPANY Will have all of it's satellites destroyed in moments as soon as China gets pissed off: <https://www.japantimes.co.jp/news/2019/02/12/asia-pacific/chinas-space-debris-cleanup-may-cover-story-arms-u-s-satellites-pentagon/>
149. WE HAVE ASKED THE FBI, DOJ, OSC, SEC, FTC, GAO, U.S. CONGRESS, AND OTHERS, TO INVESTIGATE AND PROSECUTE MUSK AND HIS CRONY OPERATION!
150. ELON MUSK'S PAID-FOR MEDIA SHILLS COVER UP HIS CORRUPTION AND PUSH PUFF-STORIES ABOUT MUSK. NEVER TRUST THEM TO BE ANYTHING BUT BIASED PROPAGANDA OUTLETS. MANY OF THEM OWN TESLA STOCK: Electrek, Google, Facebook, CNN, Huffington Post, Dianne Feinstein's PR office, Nancy Pelosi, Steven Chu, MSNBC, PayPal, KPIX-TV, San Jose Mercury News, Any Hearst owned entity, The SF Chronicle, Motley Fool, Green Car Congress, The executive staff of the DNC, The NY Times, etc.
151. We saw Elon Musk commit crimes and we saw the Obama White House cover-up those crimes. We, and our associates, worked for Bright Automotive, Zap Electric, Aptera, Eco Motors, XPV, The United States Department of Energy and the federal Office of Management and Budget and Tesla Motors itself. Americans have an expectation that their tax dollars will be used in a fair and legal manner and not to pay off crony campaign financiers like Elon Musk.

152. Americans have an expectation that fair market competition will decide which companies get to live or die and that no campaign financiers gets to order the White House to produce the death or success decision about any American business. Elon Musk's operation exists entirely because of criminal corruption and all of his companies must be shut down by federal law enforcement.

153. For nearly a decade, the U.S. Department of Energy has refused to comply with Freedom of Information Act (FOIA) requests for copies of Tesla Motors entire D.O.E. funding application documents. Former D.O.E. employees have shredded copies of those documents in order to keep them from being exposed to the public and the media. Why would they do that? Because those documents reveal felony criminal fraud by Tesla Motors, federal violations of the Section 136 law requirements and manipulations of the "hard-wiring" of the entire D.O.E. program. Those documents, which we have seen (and some Senate staff have private copies of) prove that, in a side-by-side comparison with all other applicants, the Tesla application was manipulation, rigged, false-reviewed and crony-advanced in order to pay-off certain campaign financiers and damage their competitors.

154. Demand that the U.S. Department of Energy stop breaking the law and comply with the FOIA requests to stop hiding the incriminating evidence in the Tesla files. Demand that the public be shown the original paper and not the later, "doctored" versions.

155. We saw Elon Musk operate an entirely illegal and unethical program based on State and Federal corruption. We told this, in writing and in person to the U.S. Attorney General: Eric Holder, who then quit his job after we reported these facts to him.

156. We reported that Elon Musk lied about vast number of dangers of the lithium ion chemistry he was using. Nothing was done.

157. We reported that our associates at the Department of Energy were having their safety reports on lithium ion danger suppressed. Nothing was done.

158. We reported that Elon Musk's credit rating and financial records were fraudulent and amounted to "cooking the books". Nothing was done.

159. We reported bribes paid by Musk's lobbyists and associated to government officials in order to grease the skids for his crony payola. Nothing was done.

160. We reported that Goldman Sachs and Tesla Motors were operating a stock fraud pump-and-dump scam to manipulate Elon Musk's stock holdings. Nothing was done.

161. We reported over a hundred illegal and corrupt actions by Elon Musk and his mob of Silicon Valley gangsters. Nothing was done.

162. If you have an ounce of morality, then you will not want to help Musk & Tesla profit from the crony political corruption that created them. Musk exists because he bribes politicians & acts as an illegal campaign financing conduit.

163. DOT/NHTSA has covered up years of reports about an acceleration surge issue that can suddenly crash your Tesla into walls and drive it off cliffs. It is either a known hacking attack or the effect of WiFi on Tesla electronics. Either can kill you.

164. Musk & Tesla are pure evil & exist because of hyper-corruption. You don't want to contribute to their evil or be part of it in any way. You are funding evil & supporting criminal corruption by buying a Tesla or any Elon Musk owned product like Solar City, Tesla, Space X, Hyperloop, etc.!

165. Elon Musk spent more money, than any other car company in history, to do the exact same things that any other car has done, or could do, for 20 times less money. Musk's Tesla was \$100,000.00 over budget, per car, at the time that Musk was handed his crony Dept. of Energy funds by Steven Chu. Musk has no clue how to operate a car company.

166. In one lawsuit it is noted that: "...Plaintiff and Tesla both applied for funds at the same time, in the same funding cycle in the same program. Tesla had the historically epic number of horrific issues listed below, which were known to DOE at the time of application, and Plaintiffs had NONE of these issues. How can any court, or rational person, believe that Plaintiffs were not intentionally bypassed, targeted and damaged for political reasons while Tesla was simultaneously approved for political reasons, when the comparative metrics between the two applicants prove the largest merit disparity in the entire recorded history of the U.S. Department of Energy....the singular, and only, review criteria used by Department of Energy officials was: WHICH ONE BRIBED THE CAMPAIGN FINANCE GROUP FOR BARACK OBAMA?!"; Thus proving that Tesla exists because of organized-crime level political corruption.

167. Elon Musk's self-driving "autopilot" feature, which keeps crashing and failing, is his attempt to scam taxpayer cash from Dept. of Transportation and Dept. of Energy public funds. He is only trying to do it to get more free federal cash.

168. The inventor of lithium ion batteries has confessed that lithium ion batteries blow up eventually. He says that deadly dendrites plague lithium-ion battery technology. The dendrites accumulate as part of the standard charging and recharging cycle and eventually cause a short circuit that often results in a smoldering or burning battery. These dendrites are destined to eventually blow up most Tesla cars and many electronic devices using lithium ion!

169. The CIA's software designed to take over any Tesla on Earth and kill the driver, passengers and bystanders has been released in the wild and every hacker on Earth can now easily get a copy of it and kill you in your Tesla!

170. Ex-employees have leaked faked financial records, evidence of massive click-farm fake social media manipulation and evidence of unreported deaths and accidents. They say that most Tesla's have one kind of defect or another.

171. If you read about the dirty deeds and cocaine dealings with the In-Q-Tel airplanes called "Cocaine 1" & "Cocaine 2", & the corruption behind the company called In-Q-Tel & Musk's software programmer who ran "The Silk Road" drug & murder service then you must be concerned that many In-Q-Tel people work for Musk. Why does Musk need dirty druggies & spies on his payroll unless he is running covert drug and business spying activities?

172. Ex-employees, Gawker writers and gay lawyers from Covington & Burling have leaked stories that Elon Musk, Reid Hoffman, Larry Page are "butt buddies".

173. Musk is anti-American and Anti-Worker Rights and has been caught flying in H1-B cheap offshore labor and exploiting immigrants for his deadly profits. Musk hates unions and worker rights efforts.

174. Elon Musk gets the Cobalt chemical to make his lithium ion batteries from slave trade and blood-money corruption in the Congo!

175. The lithium ion batteries that Musk uses also blow up when they naturally encounter Low Energy Nuclear (LENR) effects in the ambient environment. Millions of chemicals don't blow up from LENR'd but lithium ion does!

176. If you are a Democrat then know that Elon Musk cost you the Hillary Clinton campaign because of his payola schemes. If you are a Republican, know that Elon Musk is the epitome of the worst form of DNC crony corruption you ever saw!

177. Musk bribed California politicians to give him hundreds of millions of dollars of taxpayer dollars & resources he never earned or worked for. He only got those crony payola perks handed to him because he operated as an illicit front for corrupt campaign financing for Dianne Feinstein, Jerry Brown, Harry Reid, Barack Obama and Hillary Clinton.

178. Multiple parties have filed “Demands For The Arrest of Elon Musk” with the FBI, DOJ, AG, FTC, SEC and other law enforcement agencies. It is not likely that Musk, or his companies will survive a full investigation.

179. Tesla and Solyndra sit on the same land in Fremont, CA. Solyndra was raided by the FBI for corruption. Tesla SHOULD be raided by the FBI for corruption. Both companies had kick-back crony payola schemes with Senator Dianne Feinstein. She owned the land, lease, HR, construction company and supplier interests and stock for both companies in one of the most massive conflict-of-interest crony financing schemes in U.S. history. Elon Musk and the Feinsteins are corruption partners.

180. People who see you in a Tesla think of you as a “Tone Deaf Douchebag”, “Tesla Tool!”, “Arrogant Prick”, “Ostentatious Obama Oaf”, “Sheep”, “Mindless Yuppie Scum”, “Misogynistic Silicon Valley Clone”, “Self-promoting Elitist Douche”, “Fake News Reading Main Stream Boob”, “Naive Idiot” or other bad things.

181. Elon Musk is one of the main financiers behind Barack Obama & Hillary Clinton, both of whom have been charged with corruption. Musk endlessly tweets lies & “...No I didn’t do those bad things” BS but nobody else supports him.

182. Tesla financial records are “cooked” in a fraudulent manner to make the stock market valuation of Tesla a falsely manipulated factor. Musk uses “pre-orders”, by his own investors, to fake sales and wrote emails to customers asking them to put small deposits down so he could book them as fully paid sales in one of a large number of stock and loan valuation frauds. Musk and his investors practice stock market skims, pump-and-dumps and Flash Boy manipulations.

183. Lithium ion batteries are blowing up, starting fires & generally, destroying people’s homes, cars, electronics & physical health. Boeing was ordered to stop flying the 787 Dreamliner because it's Lithium ion batteries are catching fire spontaneously. A group of silicon valley venture capitalists forced/leveraged the government to buy & pay for these specific batteries, that they have stock in, in order to benefit their profit margins. Other batteries don’t have these problems. They knew about the dangers from day one, but put greed ahead of safety. There are thousands & thousands of reports of spontaneous lithium ion fires but the VC's who back lithium ion pay to keep this information hushed up. Millions of these batteries have been recalled for fire risk. The VC's tried to push as many as they could before they got caught. Now they are caught. These VC's & the Senators they bribed own stock in lithium mining companies too.

184. Tesla Motors has filed a patent which states the following , THESE ARE TESLA MOTORS WORDS warning about a crisis, the level of which they never disclosed to the consumer: “Thermal runaway is of major concern since a single incident can lead to significant property damage &, in some circumstances, bodily harm or loss of life. When a battery undergoes thermal runaway, it typically emits a large quantity of smoke, jets of flaming liquid electrolyte, & sufficient heat to lead to the combustion & destruction of materials in close proximity to the cell. If the cell undergoing thermal runaway is surrounded by one or more additional cells as is typical in a battery pack, then a single thermal runaway event can quickly lead to the thermal runaway of multiple cells which, in turn, can lead to much more extensive collateral damage. Regardless of whether a single cell or multiple cells are undergoing

this phenomenon, if the initial fire is not extinguished immediately, subsequent fires may be caused that dramatically expand the degree of property damage. For example, the thermal runaway of a battery within an unattended laptop will likely result in not only the destruction of the laptop, but also at least partial destruction of its surroundings, e.g., home, office, car, laboratory, etc. If the laptop is on-board an aircraft, for example within the cargo hold or a luggage compartment, the ensuing smoke & fire may lead to an emergency landing or, under more dire conditions, a crash landing. Similarly, the thermal runaway of one or more batteries within the battery pack of a hybrid or electric vehicle may destroy not only the car, but may lead to a car wreck if the car is being driven or the destruction of its surroundings if the car is parked". See <http://whoiselonmusk.com> for more...

185. Tesla's own staff, & every fire department, have now admitted that once a lithium ion fire gets started in a Tesla, that it is impossible to extinguish burning lithium ion material. This is Telsa's own words in THEIR patent filing, (You can look it up online) saying that the risk is monumental. Tesla has 6800 lithium ion batteries, any one of which can "go thermal", start a chain reaction and blow up all of the rest of the 6800+ deadly batteries! Tesla drivers have been burned alive in thermal globs of flaming lithium ion, plastics & metal. Bystanders have heard their horrific screams of unutterable pain & terror as they were burned alive! Tesla fires can't be extinguished & the bodies are burned into "unrecognizable lumps of charred flesh", according to fireman.

186. Lithium Ion batteries "go thermal" in peoples pockets, in your notebook, especially in a Tesla & Fisker car. There are tens of thousands of articles documenting this & there is a cover-up by the VC's that fund these things to keep this fact out-of-sight. Making Lithium Ion batteries poisons the workers who make them. It is a dangerous product that is covered-up by the Obama Administration. Panasonic knows that these batteries are deadly.

187. Tesla only exists to exploit Elon Musk's briberies. The lithium ion batteries blow up when they get: wet, hot, bumped, over-charged, struck by energy fields, exposed to air or squashed. Lithium ion batteries poison the Earth & that they poison & kill the workers that make them. Lithium ion batteries come from war profiteering in Afghan & Bolivian corruption

188. Panasonic is Elon Musk's partner. Panasonic is one of the most corrupt companies in the world. Panasonic has been charged, on multiple continents with: Product dumping, bribery, collusion, price fixing, anti-trust law violations, racketeering, worker abuse, toxic poisoning of workers, & other crimes. It is no wonder that Elon Musk & Panasonic are partners. Tata Motors executive Karl Slym was killed for exposing this fact.

189. Your tax dollars were stolen in order to make Tesla Motors, as part of a political financing kick-back scam. In other words, part of your paycheck was taken away from you in order to buy hookers, rent-boys & private jets for Musk & company.

190. Tesla's are forged in criminal corruption, so anybody who drives a Tesla must be either ignorant, a weasel or one of the corrupt. The whole world now knows all of the facts in this list so you can never plead ignorance to these crimes.

191. Telsa's have a huge amount of highly documented defects. The defects are so extensive that Tesla made buyers sign confidentiality agreements to try to hide how messed up their cars are.

192. Tesla's have killed more people than the main-stream news has reported. The full Tesla death-list is covered up.

193. Musk lied about why he wanted to make electric cars, when, in fact, he actually poisons the environment because Tesla investors wanted to exploit toxic minerals & materials which can't be recycled in a clean manner

194. No other electric car has been so mundane, & yet had so many problems with it, since the electric car was first sold in the 1800's. There is nothing "novel" or "amazing" about the Tesla aside from dime store parlor tricks for PR hype.

195. More drunks have crashed Tesla's, than any other per capita car in the world, per volume of cars made
196. Elon Musk's co-founders, investors, partners, wives, investors, suppliers & employees have sued him for being a fraud &, essentially, called him an "asshole" in court records.
197. Elon Musk lied on this Department of Energy funding application and the Obama Administration refuses to allow any federal employees or witnesses to testify to these facts in public due to the devastating potential results of these facts.
198. More owners of Tesla's have been found to cheat on their taxes, & be involved in abuse-based divorces, than almost any other car brand owner. Tesla owners are bad people who rationalize their poor life choices. Owning a Tesla is a red-flag for a tax audit!
199. Elon Musk will lie, cheat & steal in order to self-aggrandize & glorify his egotistical mania. Musk has been documented engaging in over 100 lies which were later proven to be false. He has spent tens of millions of dollars to buy fake news about himself on Twitter, Facebook & Google because he is such a mentally disturbed ego-maniac.
200. None of Elon Musk's companies would exist if not for taxpayer funded handouts given to him by corrupt politicians in exchange for illegal campaign finance deals with him & his investors.
201. Google, & Tesla, who are financial & political partners, have both been caught spying on consumers & manipulating Internet data in order to cover-up their complicity in huge political corruption & kick-back deals
202. Musk took U.S. taxpayer dollars from the government & then hired cheap off-shore labor & fired U.S. Union workers & domestic workers. He lied to & screwed the NUMMI workers that were working at the Fremont plant.
203. Musk has put over 18 surveillance devices in the Tesla. Anybody can hack those devices & monitor you. WORSE YET, foreign agents have hacked the Tesla & taken over the controls & driven Tesla's into bystanders & over cliffs.
204. When Erick Strickland was head of the NHTSA he was confronted about DOT safety cover-ups of the Tesla to protect Obama. He quit 48 hours later. The DOT safety cover-ups to protect the Obama campaign finance payola scheme continue to this day. Obama's Gibbs, Emanuel, Plouffe, Axelrod and Carney quit within a week of being threatened with exposure.
205. Elon Musk paid some of the largest bribes in the history of China, facilitated by Dianne Feinstein and her Chinese spy connections, in order to get his China factory opened.
206. Tesla's have had a large number of recalls but Elon Musk refuses to call them "recalls". Tesla's have had multiple recalls for SEVERE safety dangers. DOT has been told this, in writing, for years, but wont take action in order to protect Obama.
207. Elon Musk is a bullshit artist who has no original ideas & wears black-turtle neck shirts (like Elizabeth Homes) to try to create a "cult" around himself & convince the world that he is a "Jesus-like" figure when, in fact, he is a clinical sociopath.
208. Tesla is a severe public safety hazard that has been systematically covered up by corrupt politicians.
209. Large numbers of Ex-CIA staff and In-Q-Tel spy staff work for Musk. Why does he need spies to build cars?
210. Tesla Motors batteries were promoted by those who wished to exploit the Afghanistan War for personal profit by controlling the Afghan lithium mining fields. Kleiner Perkins and Draper Fisher hyped the "...trillions of \$ of lithium in Afghanistan."

211. Tesla Motors batteries blow up on their own because their chemistry causes them to be naturally defective.
212. Tesla Motors batteries blow up when they get wet because their chemistry is activated by water to make them explode.
213. Tesla Motors batteries fires cannot be put out by any common fire-fighting resources.
214. Tesla Motors batteries set themselves on fire.
215. Per Federal MSDS disclosure documents, Tesla Motors batteries emit cancer-causing vapors when they burn.
216. Tesla Motors Vehicles toxicity poison bystanders, nearby vehicular passengers, airline passengers in planes carrying said batteries in their holds, & environments where such incidents occur.
217. Tesla Motors batteries blow up when bumped by the same level of car incident that would, otherwise, only dent a normal car bumper.
218. In an accident, when a Tesla rolls over, molten metal & plastic can drip on & burn the occupants alive.
219. Tesla has multiple sexual harassment and unsafe work-place lawsuits against the company.
220. Per MSDS documents, Tesla Motors batteries emit brain damaging chemicals when they burn
221. Tesla is a stock pumping scam to profiteering on stock market peak manipulation at the expense of taxpayers.
222. Per MSDS documents, Tesla Motors batteries emit chemicals, burning, or not, that can damage an unborn fetus within the mother
223. Per MSDS documents, Tesla Motors batteries emit chemicals that can cause lung damage.
224. Per MSDS documents, Tesla Motors batteries emit chemicals that can cause liver damage.
225. Per published lawsuits & news reports, the factories that make Tesla Motors batteries have been charged with the deaths, & potentially fatal illness, of over 1000 workers & the poisoning of nearby towns.
226. Tesla Motors batteries become even more dangerous over time, particularly when tasked by electric transportation systems like Hover-boards & Tesla's. The chemistry in a lithium ion battery changes to become more unstable over time.
227. Tesla Motors batteries were never designed to be used in automobiles. Tesla used non-automotive batteries in one of the most dangerous configurations possible.
228. Tesla Motors occupants experience higher EMF radiation exposure than gasoline vehicle occupants.
229. Elon Musk's Space X vehicles & Tesla Motors vehicles have both had a higher-than-average number of explosions. This has caused outside experts to doubt Musk's ability to place safety considerations over his need for hyped-up PR.
230. Leaked Sandia National Labs & FAA research videos dramatically demonstrate the unstoppable, horrific, "re-percussive accelerating domino-effect" explosive fire effect of the Tesla Motors batteries.
231. Tesla's own "Superchargers" & home 3-prong chargers have set Tesla's, homes & businesses on fire
232. Consumer rights groups contacted Erick Strickland, the head of the NHTSA, & charged him with a cover-up. He quit days later. The NHTSA then issued a safety investigation request to Tesla Motors, which would have more publicly exposed these dangers, but the safety investigation was never under-taken due to White House requests & lobbyist bribes, from Tesla, which got the investigation shut down.

233. NEPA regulations for the Tesla NUMMI factory in California & the Nevada Tesla “Gigafactory” have been violated relative to environmental safety standards.

234. Tesla Motors vehicles are not “Factory Built” “like Ford” builds cars, as Tesla professes. They are hand built in small volumes & subjected to numerous defects. Blogs have documented hundreds of defects, as listed by Tesla owners. Tesla has lost at least one LEMON CAR LAWSUIT for defective manufacturing.

235. Tesla's “showrooms” are often “pop-up” retail storefronts that are in tight-proximity retail centers, putting it's neighbors at risk of total loss from fire damage.

236. Tesla Motors vehicles have been hacked & taken over. Their doors, steering, listening devices & navigation have been taken over by outside parties. Multiple Tesla have suddenly swerved off the road, over cliffs & into other vehicles, killing bystanders & Tesla drivers.

237. Three Tesla top engineers & two competing senior executives, all of whom had whistle-blown on Tesla, who were in perfect health one day, suddenly died mysteriously the next day.

238. Multiple employees, founders, investors, marital partners, suppliers & others have sued Tesla Motors, &/or it's senior executives for fraud. Musk had nothing to do with creating Tesla. He ran a hostile take-over of Tesla from the founders.

239. In addition to suing him, many of his former staff & partners have described Musk as an “Arrogant Prick”.

240. Main-Stream Media (MSM) have agreed not to provide news coverage of the deadly defects of the Tesla because the MSM are owned by the same politicians who own Tesla Motors. It is now legal to sue The New York Times for hiding these deadly defects, though, particularly if your family member was injured or killed because they covered-up the danger for political reasons.

241. If you think the above bullet-points are bad there are over a 1000 more. Find the book “Is Elon Musk A Fraud” online or visit <https://stopelonfromfailingagain.com/> or thousands of other sites that expose the truth about Musk & Tesla!

242. BANKRUPT MUSK – NO CASH FOR CRONY CORRUPTION. Print this out & freely re-post it on blogs & social media. Post this on bulletin boards. Put this on the windshield of every Tesla you find. Print this out & hand these out in front of every Tesla dealership: Nobody can stop you from handing these out, it is your U.S. Constitutional First Amendment Right! Pass the word! We are prepared to back up every single fact on here at any public meeting with the FBI, Congress, FTC, GAO, SEC or before a Federal Special Prosecutor.

243. The crash of a Tesla Model X through the home of South Korean singer and actor Ji Chang Son. The crash ended with the nose of the vehicle in Ji Chang Son's living room after the Tesla malfunctioned. Hundreds of such Tesla crashes have occurred, resulting in the deaths and injuries of Tesla owners, passengers, bystanders, oncoming drivers and others.

244. Following accusations by a Korean celebrity that a Tesla car spontaneously drove through a wall, the carmaker has replied that the crash was “entirely due to the man’s horrible driving” in an ongoing effort, by Tesla, to steer the blame away from Tesla faulty engineering Actor and singer Son Ji-chang (identified as Ji Chang Son in court documents) claimed he was parking his Tesla Model X SUV when the vehicle suddenly lurched forward into his living room.

245. In a lawsuit filed last week in California, Son claimed that the crash was due to “sudden unintended acceleration” and sought class-action status with other Model X owners. In a nod to the car’s ability to sense and

avoid crashes, the lawsuit also hinted that the Model X should not be allowed take actions that the car “knows will result in the collision with a fixed object.”

246. In June, another California-based Model X owner, Puzant Ozbag, similarly claimed that his Model X spontaneously accelerated through a parking lot and into a wall. A special prosecutor is needed to investigate Tesla due to the huge number of cover-ups, by Tesla and the Obama Administration, to protect campaign financier Elon Musk. Jeff Sessions needs to hire a lawyer from outside the government appointed by Sessions as attorney general or, in the United States, by Congress to investigate a government official for misconduct while in office. A reasoning for such an appointment is that the governmental branch or agency may have political connections to those it might be asked to investigate. Inherently, this creates a conflict of interest and a solution is to have someone from outside the department lead the investigation. The term "special prosecutor" may have a variety of meanings from one country to the next, from one government branch to the next within the same country, and within different agencies within each government branch. Critics of the use of special prosecutors argue that these investigators act as a "fourth branch" to the government because they are not subject to limitations in spending, nor do they have deadlines to meet.

247. Attorneys carrying out special prosecutor functions in either federal or state courts of the United States are typically appointed ad hoc with representation limited to one case or a delineated series of cases that implicate compelling governmental interests, such as: Fraud (SEC, Complex, Cybercrime, Mortgages), Public Corruption, Money Laundering & Asset Forfeiture, Civil Rights, Racketeering Across State lines, Environmental Protection, National Security, Tax & Bankruptcy, Organized Crime, or International cases where the US is a party).[1] Special prosecutors in courts of the United States may either be appointed formally by one of the three branches of government in a criminal proceeding, or when dictated by federal law or regulation, or informally in civil proceedings, and also by one of the three branches of government, or by a non-governmental entity to prosecute alleged unlawful conduct by government agents. When appointed by the judicial branch to investigate and, if justified, seek indictments in a particular judicial branch case, the attorney is called special prosecutor.[2] When appointed/hired particularly by a governmental branch or agency to investigate alleged misconduct within that branch or agency, the attorney is called independent counsel.[3] When appointed/hired by the state or political subdivision to assist in a particular judicial branch case when the public interest so requires, the attorney is called special counsel.[3] When appointed/hired by an organization, corporation, person or other non-governmental entity to investigate and, if justified, seek indictments against one or more government officials for acts committed under color of law, the attorney may be called special counsel or special prosecut. The term is sometimes used as a synonym for independent counsel, but under the former law authorizing the independent counsel, the appointment was made by a special panel of the United States Court of Appeals for the District of Columbia Circuit. The Ethics in Government Act expired in 1999, and was effectively replaced by Department of Justice regulation 28 CFR Part 600, under which Special Counsel Patrick Fitzgerald was appointed to look into the Plame affair. The Tesla Motors and Elon Musk Case requires a Special Prosecutor.

248. ELON MUSK AND TESLA FACE CRIMINAL FRAUD CHARGES BY FEDS! MUSK FINALLY EXPOSED!

249. SEC subpoenas TESLA over Musk tweets...

250. Whistleblower posts 'flawed cars' details...

251. Elon Musk's Incredible Smoke And Mirrors Dance. Elon Musk's untraceable money laundering and political bribery scam has now been exposed. It is called an "Invisible Bridge". It is the way that covert funds move through a secret conduit of close associates and family members. Elon Musk is at the head of the conduit and his mother,

brother and associates Tim Draper, Steve Jurvetson, and George Soros round out the other tentacles. With operational links through Wells Fargo Bank, Silicon Valley Bank and Goldman Sachs, the scheme is perfected corruption. The "bridge" uses a combination of fake tax evasion charities and business assets, passes through Senator's pockets and is never visible to the FBI, the FEC and the SEC unless they have very good agents assigned to the matter.

252. NTSB, DOJ, SEC and FEC have been blocked from action by DNC lobbyists.

253. The overt and arrogant Musk misdeeds have now become "obvious and RICO-violating..."

254. He is protected by Senators Reid, Harris, Pelosi and Feinstein. They are beneficiaries of the scam. Musk's self promoting, narcissistic, multi-billion dollar, self-aggrandizing PR hype. Elon Musk exists because he bribed DNC politicians including Obama, Clinton and Senators Feinstein, Reid, Boxer, Harris, Spier and Pelosi to give him free taxpayer cash and government resources from the Department of Energy and the California political tax pool. This is proven when you follow-the-money and the insider trading, stock ownership and crony payola kick-backs.

255. He is protected by the Clinton and Obama organizations along with most of the DNC. He finances these politicians via this scheme.

256. The U.S. Dept of Energy (DOE) has been covering-up organized crime activities at DOE in which DOE funds are being used as a slush-fund to pay off DNC campaign financiers and to pay for Fusion-GPS attacks on Silicon Valley business competitors.

257. DNC campaign financiers and DOE staff share stock market holdings with each other under family trusts, shell corporations and layered Goldman Sachs accounts. The deal was: Obama funds Tesla, Musk conduits campaign funds to Obama, top Obama staff profit off of insider Musk stocks.

258. Elon Musk is a criminal, a mobster, an asshole, a balding fake-hair wearing, plastic surgery-addicted, bi-sexual douchebag, woman-abusing, sex addicted, tax evader.

259. Musk exploits poor people and child slaves in the Congo and Afghanistan to mine his lithium and Cobalt. Look up this phrase on the top search engines: "child labor electric car batteries"

260. Musk spends billions per year to hire Russian trolls, fake blogger fan-boys and buy fake news self-glory look-at-me articles about himself. Musk thinks he is the 'Jesus' of Silicon Valley and he will do anything to make the public think so. Musk is insecure because his father was abusive and his "trophy wife" Mother is overbearing so he developed sociopath-like mental issues.

261. Musk has been professionally diagnosed as a 'psychotic narcissist.

262. Musk uses shell companies and trust funds to self-deal, evade the law and hide his bribes and stock market insider trading. His brother ran Solar City and is now under federal investigation for securities fraud.

263. A huge number of Tesla drivers, per capita, have been killed; pedestrians and oncoming drivers have also been killed, and Musk covers it up.

264. The DNC and the MSM refuse to allow any articles about Musk's crimes to be printed because they benefit from Musk's crimes.

265. VC's Tim Draper and Steve Jurvetson are so fanatical about not being embarrassed from a Tesla bankruptcy that they will pump the TSLA stock and threaten anybody who might disclose the Musk misdeeds.

266. Peter Thiel, a Musk 'boyfriend' also protects Musk. Musk, and his cronies, use Palantir, Google and related software to scan the entire internet every few minutes for any occurrence of the words: "Musk", "Tesla" or "Tesla Fire". They send trolls and fake bloggers (Many of them Russian) to put pro-Musk comments on the comments section of any blogs or articles discussing those topics and try to flood out the truth about Musk. In EVERY blog that you read that mentions 'Musk', at least 1/3 of the comments have been placed their by Musk's paid skills.
267. There are no "Tesla Fan Boys". All of the fanatic Tesla comments on the internet are Musk's, Thiel's, Jurvetson's and Draper's fake fanboy trolls. Musk, himself, stays up late at night pretending to be a 'Tesla Fan Boy' on blogs.
268. Main Stream DNC-biased News organizations who refuse to cover the story reveal themselves as shills for Musk
269. The Silicon Valley Mafia promotes Musk as a "Tech God" leader but, in reality Musk is the same kind of "Leader" as Charles Manson, Jim Jones, David Koresh, Swami Rajneesh and Al Capone.
270. His own people have sued him for fraud and lies once they realized that Musk-ism and Scientology had so much in common.
271. The 'Silicon Valley Mafia; cartel of frat boy sociopath venture capitalists like Steve Jurvetson, Tim Draper, Eric Schmidt, et al; threaten those who do not support the cult of Tesla or their political candidates.
272. Musk holds the Silicon Valley record for getting sued for fraud by his investors, wives, former partners, employees, suppliers and co-founders.
273. Elon Musk has gone out of his way to hire hundreds of ex-CIA and In-Q-Tel staff and assign them to "dirty tricks teams" to attack his competitors and elected officials who Musk hates.
274. Musk and his culture are being sued for abuse to women and blacks and the Unions hate him for lying to them.
275. <https://stopelonfromfailingagain.com> reveals even more Musk lies.
276. Musk never founded his companies. He took Tesla away from the founder: Marty, in a hostile take-over!
277. Musk's "Starlink" satellites are domestic spy and political manipulation tools - never get your internet from anything SpaceX has launched. SpaceX is entirely a domestic spy operation.
278. Musk's "Mars" scheme is just a PR distraction to keep the news from looking too close at SPACEX domestic spying satellites.
279. The same kind of EMF radiation proven to cause cancer from cell phones exists in massive amounts in a Tesla.
280. Musk can't fix a car or build a rocket and has almost no mechanical skills.
281. If you pull a report of every VIN# of every Tesla ever built and cross reference that with insurance, repair and lawsuit records you will find that the "per volume" fire, crash, death and defect rate is THE WORST of any car maker in history! Musk's lobbyists have bribed DOT and NHTSA to stall safety inspections.
282. NO COMPLETE UNCOMPROMISING SAFETY REPORT ON TESLA CARS HAS EVER BEEN PUBLISHED but we have a copy of a hushed up report that would put Tesla out of business.
283. Musk's 'Autopilot' system is a scam to get government cash BUT IT NEVER WORKS. The Tesla 'Autopilot' has crashed into police cars, pedestrians, swamps and driven owners over cliffs.

284. Musk is a lying con artist and partners with Goldman Sachs to rig the stock market. Sachs has a dedicated team of 18 men who rig stocks and valuation bumps for Musk.
285. The "Silk Road" Cocaine and Murder-For-Hire website was created at Musk's SpaceX
286. Musk's In-Q-Tel staff ran two transport planes filled with drugs; listed as "Cocaine 1" on FAA records.
287. Senators Dianne Feinstein, Harry Reid, Nancy Pelosi, Kamala Harris and their associates own the stock in Tesla Motors and/or it's suppliers and mining companies. That is why they criminally help cover-up investigations of Tesla!
288. All of this was reported, in writing, to James Comey, Patricia Rich and David Johnson at the FBI.
289. Tesla and Solyndra sit on the same land and share staff, contracts and lobbying. California politicians own parts of both companies.
290. Musk took over Tesla Motors in a hostile take-over in order to exploit lithium, cobalt and other mining corruption deals for his business partners.
291. The 'lithium' in Musk's horrifically miss-engineered lithium ion batteries cause wars in the Congo over mining corruption.
292. Afghanistan and Bolivian mobsters benefit from the corrupt mining deals involved with mining lithium and cobalt for Elon Musk's batteries.
293. Elon Musk opened a factory in China to try to avoid American worker safety laws because all of the labor cheats and safety violations he had engaged in, in America, were catching up to him. He neglected to provide adequate worker safety to quarantine for the coronavirus, though.
294. Elon Musk's Lithium ion batteries are insider trading-owned by ex-CIA boss Woolsey and DOE Boss Chu and they engaged in extreme conflict-of-interest to help Musk.
295. Elon Musk's Lithium ion batteries excrete chemicals that mutate fetuses when they burn.
296. Elon Musk's Lithium ion batteries destroy your brain, lungs and nervous system when they burn.
297. Elon Musk's Lithium ion batteries kill the factory workers who make them.
298. Elon Musk's Lithium ion batteries cause Panasonic to be one of the most corrupt companies in the world.
299. Elon Musk's Lithium ion batteries poison the Earth when disposed of.
300. Elon Musk's Lithium ion batteries can't be extinguished by firemen because water makes them explode even more and then explode again hours later.
301. Elon Musk's Lithium ion batteries have chemical dendrites and deposition massing issues (revealed by X-Ray analysis) which makes them more and more likely to explode as they age.
302. Elon Musk's Lithium ion batteries poison firemen when they burn.
303. Elon Musk's Lithium ion batteries are based on criminally corrupt mining schemes like URANIUM ONE.
304. Elon Musk's Lithium ion batteries have over 61 toxic chemicals in them.
305. Elon Musk's Lithium ion batteries come from an industry that spends billions on internet shills and trolls that they hire to nay say all other forms of energy

306. Elon Musk's Lithium ion batteries are insider-trading owned by corrupt U.S. Senators who are running a SAFETY COVER-UP about their dangers.
307. Apple products with lithium ion batteries have been exploding and setting people on fire.
308. Over time the chemical dendrites, or deposits, inside each battery grow worse and increase the chances of explosion as they age - LITHIUM ION BATTERIES BECOME MORE AND MORE LIKELY TO EXPLODE AS TIME GOES ON AND AS THEY AGE. This is not a theory. This is a scientific fact. That is why you hear about more and more lithium batteries catching fire and blowing up. Additionally, scientists also speculate that the increasing presence of low energy nuclear background energy and wifi energy in the environment is making lithium ion batteries explode more often lately. This is upheld by the increasing number of FAA reports about commercial airline cabins suddenly "filling up with toxic smoke" as some lithium ion battery explodes in someones overhead luggage. As commercial jets go higher they lose the protection of the atmosphere and are subjected to more gamma (and other) radiation from overhead. This makes the already unstable lithium ion batteries on board blow up.
309. Tesla owner's had had more DUI's, abuse filings in divorce proceedings and crashes than any other car maker PER VOLUME. This makes Tesla the #1 car for douche bags and scummy people.
310. Tesla's own federal patent filing records confirm that Tesla batteries are as dangerous as this document reports.
311. Political activist George Soros owns part of Tesla Motors so that Soros can help conduit DNC cash.
312. The Obama Administration promised Silicon Valley oligarchs the market monopoly on lithium ion batteries and the sabotage of fuel cells in exchange for campaign financing and search engine rigging.
313. United States Senators that are supposed to protect us from these deadly products own the stock market assets of them so they protect them and stop the FDA, OSHA, DOT & NHTSA from outlawing them.
314. There have been thousands of defect reports filed on Tesla cars.
315. Tom Steyer is a notorious DNC financier. His partner, Margaret Sullivan ran, the federal USAID agency, USAID sent all of the DNC campaign financiers in Silicon Valley a federal 'report' from USAID that said there was "A TRILLION DOLLARS OF LITHIUM IN AFGHANISTAN" and promised to give those lithium mines, EXCLUSIVELY, to the Silicon Valley venture capitalists if they funded and web search manipulated the election for Obama to take over the White House. We have the documents proving this. In other words, a re-up of the Afghan War was caused by Elon Musk and it killed American soldiers so that Musk could buy more mansions and trophy wives.
316. If a Tesla battery gets wet it will explode and cause all of the other batteries to explode in a "cascade of explosions".
317. Water makes Tesla batteries explode.
318. In an accident, when a Tesla rolls over, molten metal & plastic can drip on & burn the occupants alive and seal them in molten metal.
319. Alkaline, NiCAD and hundreds of other battery chemistries DO NOT have all of these problems but Lithium Ion batteries get a monopoly because of politician insider trading owner-ships.
320. Tesla Motors has caused far more deaths and injuries than the world generally knows about.
321. A recent fire on U.S. Highway 101 near Mountain View, CA, burned the driver alive and killed him.
322. In Florida two kids died in a Tesla, burned alive, screaming in agony.

323. A man died in agony in a Tesla crash in Malibu that set Malibu Canyon on fire.
324. A young woman, at the start of life, and her boyfriend were burned alive in their crashed Tesla.
325. There are many more deaths and crashes than you have seen in the Main Stream News (MSN) The deaths and the cover-ups are endless.
326. Senators Dianne Feinstein, Harry Reid, Nancy Pelosi, Kamala Harris and their associates own the stock in Tesla Motors and/or it's suppliers and mining companies and they cover-up and halt investigations and laws designed to save the public.
327. Elon Musk's Lithium ion battery partners spend over \$1B a year to shill and troll hype about lithium ion batteries and cover-up the dangers.
328. Lithium ion EVs are more prone to battery fires.
329. Experts say that their lithium-ion batteries can fuel hotter fires that release toxic fumes and are more difficult to put out. Lithium ion fires keep reigniting which explains why it takes so long and requires copious amounts of water or foam (it is an electric fire, after all) to smother the flames.
330. Tesla employee Bernard Tse and his team warned Elon Musk about these dangers in 2008 and they got fired and/or warned to "say nothing" by Musk.
331. Three top Tesla engineers died in a plane crash next to Tesla offices in San Carlos after two of them agreed to become whistle-blowers. Another whistle-blower has suggested they were killed in a "Boston Brakes" hit-job.
332. The DNC bosses, Congress people and federal executives own the stock in lithium, Solar and EV markets and use kickbacks from those markets (Especially via convoluted campaign finance laundering via Elon Musk) to finance the DNC.
333. The DNC bosses and Musk use character assassination as their main political tool against any member of the public who speaks out against their felony stock market scams and PizzaGate-like scandals. The Harvey Weinstein reports by Ronan Farrow show that they have teams of hired goons that they pay to destroy people's lives.
334. Musk uses Black Cube, Mossad, In-Q-Tel, Stratfor, Gawker Media, Gizmodo Media, Media Matters, David Brock, Sid Blumenthal, NY Times, Google servers, Facebook servers, Podesta Group, Perkins Coie, Covington & Burling and a host of "media assassins".
335. Musk buddies: Gawker and Gizmodo Media set-up the attack stories and, in paid partnership with Google, Google kicks their attack links around the globe, in front of 8 Billion people, forever. Google locks the attack articles of its enemies on the front top search results of Google search results forever, on purpose! Google and Musk are partners-in-crime.
336. Larry Page steals technology for Google and Musk meets with Larry Page to advise him on which technologies to steal and how to bypass FEC laws.
337. Musk has exceeded FEC campaign finance limits by billions of dollars via "in-kind" services.
338. Had the full scope of these facts been acted on during the Obama Administration, Barack Obama would have become the first modern sitting President to have been arrested in the White House. Barack Obama was fully aware of these schemes, crony payola deals and corruption crimes and discussed the implementation of these crimes, daily, with Rahm Emanuel, David Plouffe, Steven Rattner, Robert Gibbs, John Podesta, David Axelrod, Eric Holder and Jay Carney in the Oval Office.

339. THIS corruption involves TRILLIONS of dollars of corrupt mining deals, automotive and energy monopolies!
340. THIS is why the federal budget analysis reports are showing TRILLIONS of dollars of 'untraceable' losses from the United States Treasury from 2006 up to today!
341. THIS is why a large number of reporters, whistle-blowers and prosecutors suddenly, and mysteriously turned up dead!
342. The company that Elon Musk built to usher in the electric-car future might not have enough cash to make it through the calendar year without stock markets scams being used to keep it alive.
343. Tesla again fell far short of its own production targets for the mass-market Model 3 sedan
344. Another person died in a crash involving its assisted-driving feature.
345. Musk entered into a public dispute with federal safety regulators.
346. Tesla's once high-flying stock, buffeted by a downgrade from credit analysts, has dropped 24 percent from its peak in September but Silicon Valley Vc's will pump it up to save face.
347. No one has raised or spent money the way Elon Musk has; Nor has any other chief executive officer of a public company made a bankruptcy joke on Twitter at a time when so much seemed to be unraveling.
348. Tesla is going through money so fast that, without additional financing, there is now a genuine risk that the 15-year-old company could run out of cash in 2018. The company burns through more than \$6,500 every minute, according to data compiled by Bloomberg. Free cash flow—the amount of cash a company generates after accounting for capital expenditures—has been negative for five consecutive quarters. That will be a key figure to watch when Tesla reports earnings May 2. Read the full story here: <https://www.bloomberg.com/graphics/2018-tesla-burns-cash/>
349. In years to come, we will all look back and wonder how so many people were taken in by this shyster, who makes Enron look honest.
350. One of Tesla's greatest strengths is its ability to monetize the patience and goodwill of its customers and loyal fans. The company is sitting on a staggering \$854 million in customer deposits as of the end of 2017.
351. Since Tesla sells its products direct to consumers, without relying on a dealer network, customer deposits are cash payments that essentially serve as interest-free loans—and these loans can stretch on for years. If Tesla were to go bankrupt, those deposit holders would likely be wiped out.
352. Tesla is holding customer deposits for two vehicles that aren't even in production yet: an electric Tesla Semi (\$20,000 deposit) and a next-generation Roadster (either \$50,000 down or the \$250,000 retail price paid up front to reserve a limited edition). Even customers interested in installing an array of solar roof panels or the company's Powerwall home battery must hand over \$1,000 to place an order.
353. Tesla doesn't break out deposit numbers by car, but the vast majority comes from \$1,000 reservations for the Model 3. When Musk first introduced the lower-priced sedan in March 2016, fans stood in long lines at Tesla stores. Two years later, the slower-than-expected pace of production means that most of the more than 400,000 reservation holders are still waiting. And new people appear to be joining the queue: As of April, the company reported "net Model 3 reservations remained stable."

354. There's an additional source of free money from loyal believers: An unknown number of customers have paid up for vehicle features—\$3,000 for “Full Self Driving” capability, for example—that Tesla thus far hasn't figured out or released to anyone.

355. Elon Musk cooked the books by emailing interested sales prospects and asked them to put a deposit down before each quarter ended so he could book their tiny deposits as fully transacted \$60K+ "sales" before each quarter closed.

356. Elon Musk and SpaceX are being sued by multiple employees for "lying about safety standards, safety records" and deadly safety defects.

357. The Elon Musk Tesla Money Laundering Board Of Directors is as full of fraud and corruption as Musk. Birds of a feather stick together and the Jurvetson, Draper, Musk, et al; clan of corruption runs deep. The Board of Directors can't operate their scam without the whole pack of thieves and liars in place. An outsider will break theirs swamp of tax evasion, Dark Money political bribes, off-shore cash, self-dealing, book-cooking, real estate fraud, expense padding and other nefarious deeds.

358. Dianne Feinstein's family member: Herb Newman of Sausalito, California's HR firm: Newman Search (415 332-8425) has a company as of 1972 with the sole purpose of setting up investment bank deals with the People's Republic of China. Feinstein arranged for Newman to provide the staffing for Tesla and Solyndra. Dianne Feinstein has been under investigation for spy activities with China and her senior aide was arrested as a Chinese top spy. In 1973 Mr. Newman arrived in Canton at the invitation of the Chinese Council for the Promotion of International Trade. (CCPIT). He and his company MVTC were one of fifty businesses to be invited to the Canton Trade Fair held in Kwangchow China. In 1978 Mr. Newman founded China Investments and in partnership with California Trade Delegations both companies as members of the San Francisco Chamber of Commerce began taking US Corporations to China. Mr. Newman along with one of his associates at the time Mr. Darryl Schoon helped organize Senator Dianne Feinstein's first trip to China in conjunction with the San Francisco Chamber of Commerce. Herb Newman, Mart Bailey and Feinstein's Husband; Dick Blum are on intelligence agency watch-lists, and under electronic surveillance, for potentially corrupt deals with China, Tesla and Solyndra.

359. Dianne Feinstein's husband owns CBRE which owns the real estate contracts for both Tesla and Solyndra.

360. Dianne Feinstein's family owns interests in the construction companies hired by both Tesla and Solyndra.

361. Dianne Feinstein had her staff warn other California businesses away from using the NUMMI car factory in order to protect the real estate deal for both Tesla and CBRE, which is owned by her husband.

362. Tesla began real estate deals in multiple states and then cancelled them at the last minute, which got them sued for fraud and charged with "lying" to different communities. They started, and then pulled out of these different building (San Jose, Southern California, New Mexico, Etc.) deals, because CBRE and Feinstein were trying to leverage real estate profit exploitation using taxpayer funding.

363. Panasonic and Tesla have known for decades that the Panasonic 18650 batteries used in the Tesla suffer from multiple chemistry degradation defects which will almost always make them eventually explode or "go thermal". The defects include: 1.) LENR activation, 2.) Dendrite lengthening, 3.) Particle congealing, 4.) Chemistry evolution and other defects. The Tesla projects is, essentially, a failed product product dumping effort of a failed and dangerous battery product.

364. Elon Musk has demanded that his employees sign "loyalty pledges", "vows" and engage in Omerta's in order to keep the corruption details of Tesla from being exposed to the public.

365. Tesla insider Antonio Gracias is the mob boss insider at Tesla who arranges media hit-jobs on those who displease Musk.

366. The NHTSB has issued requests to Tesla for safety tests and data that Tesla never complied with. Instead, Tesla paid bribes, which were referred to as "fees" to avoid having to complete those tests. An independent group of outside investigators issued a damning safety report to the NHTSB demanding that Tesla be compelled to produce the safety tests in 2010 but Obama appointed NHTSB executives buried the report and protected Tesla in order to keep the connection between Obama's funding and Tesla protected. NHTSB boss: Strickland, an Obama insider, was confronted with this in Washington, DC and resigned from his job 48 hours later. NHTSB has still not acted on the severe Tesla safety defects that have been reported since 2009.

367. An SEC investigation of Musk uncovered horrific evidence of Musk corruption but the SEC could not report or act on it because Obama congressional bosses and lobbyists got the SEC investigation "limited" to only examine a single Twitter "Tweet" from Musk.

368. Elon Musk is protected by top DOJ, SEC, CFTC, FEC and other Obama left-over staff as well as 45 U.S. Senators and top Federal Reserve members and Goldman Sachs, who live in terror that exposure of the entire Elon Musk financial food-chain will topple the entire DNC Dark Money payola scam. This is the reason that Tesla can get away with so much obvious and overt corruption and still continue operations. Tesla Motors book-cooking, financial frauds and political payola conduits, if fully revealed, would change the course of political influence in America.

369. Elon Musk has been sued by a man that Musk called a "Pedo", yet Musk's own father has been accused of child sex abuse, racism and, indeed, got his own daughter pregnant!

370. Elon Musk's mother has been accused of being a "self-indulgent trophy wife" who Musk was trained by to be an arrogant elitist. Her hatred of black people was imbued on Musk who has been sued by black people at his company for "running a racist culture".

371. Elon Musk divorced the same woman twice because she knew his dirty little secret and threatened to out him if he did not keep the deal going. She was hired to "act" as his wife.

372. Musical artist Iggy Azalea was at a Musk Party, with other friends, who captured Elon Musk on video on drugs and in weird sex acts. Musk had Iggy's camera stolen at the party to hide the evidence but he did not get the other cameras and did not realize that some of those cameras placed their images and videos directly on the Cloud, where hackers acquired them.

373. With cover-up help from Eric Holder, Steven Chu, Obama, Valarie Jarret, DNC FBI agents, Perkins Coie, Covington and Burling, Wilson Sonsini, etc; sociopath Musk actually believes he is "untouchable" and that he can get away with anything. His downfall will be the same downfall of every narcissist sociopath oligarch throughout all of recorded history.

374. Elon Musk is a drug addict. A simple urine and blood test proves it. Musk's downfall and the downfall of John DeLorean are seeming to align.

375. Dianne Feinstein and Nancy Pelosi are violating the law protecting Tesla by withholding investigations and prosecutions? Why are they allowing American citizens to continue to die from the 1.) "sudden acceleration electronics defect"; 2.) "The failed Auto-pilot electronics defect"3.) "The deteriorating and deadly lithium ion batteries" and 4.) numerous other defects widely documented in the news media and filed lawsuits?

376. Elon Musk exists because he bribed DNC politicians including Obama, Clinton and Senators Feinstein, Reid, Boxer, Harris, Spier and Pelosi to give him free taxpayer cash and government resources. This is proven when you follow-the-money and the insider trading, stock ownership and crony payola kick-backs.

377. The Energy Dept (DOE) has been covering-up organized crime activities at DOE in which DOE funds are being used as a slush-fund to pay off DNC campaign financiers and to pay for CIA/GPS Fusion-Class attacks on Silicon Valley business competitors.

378. DNC campaign financiers and DOE staff share stock market holdings with each other under family trusts, shell corporations and layered Goldman Sachs accounts. The deal was: Obama funds Tesla, Musk conduits campaign funds to Obama, top Obama staff profit off of insider Musk stocks.

379. Musk exploits poor people and child slaves in the Congo and Afghanistan to mine his lithium and Cobalt. Look up this phrase on the top search engines: "child labor electric car batteries".

380. The Silicon Valley Paypal Mafia promotes Musk as a "Tech God" leader but, in reality Musk is the same kind of "Leader" as Charles Manson, Jim Jones, David Koresh, Swami Rajneesh and Al Capone. His own people have sued him for fraud and lies once they realized that Musk-ism and Scientology had so much in common.

381. Musk holds the record for getting sued for fraud by his investors, wives, former partners, employees, suppliers and co-founders. Elon Musk has gone out of his way to hire hundreds of ex-CIA and In-Q-Tel staff and assign them to "dirty tricks teams" to attack his competitors and elected officials who Musk hates.

382. Musk and his culture are being sued for abuse to women and blacks and the Unions hate him for lying to them. <https://stopelonfromfailingagain.com> reveals even more Musk lies.

383. THIS corruption is what all of the big political scandals are about today!

384. THIS corruption involves TRILLIONS of dollars of corrupt mining deals, automotive and energy monopolies!

385. THIS is why the federal budget analysis reports are showing TRILLIONS of dollars of 'untraceable' losses from the United States Treasury from 2006 up to today!

386. THIS is why a large number of reporters, whistle-blowers and prosecutors suddenly, and mysteriously turned up dead!

387. THIS can all be proven in jury trial and in live televised Congressional hearings!

388. This is all being covered up because top State and Federal officials are in on it, own the stock in it and are so deeply involved in it that they could go to Federal prison when this all comes out.

389. The anxieties that lurk beneath the tremendous ambition of Tesla Inc. moved into the forefront in recent weeks. The company again fell far short of its own production targets for the mass-market Model 3 sedan, another person died in a crash involving its assisted-driving feature and Musk entered into a public dispute with federal safety regulators. Tesla's once high-flying stock, buffeted by a downgrade from credit analysts, has dropped 24 percent from its peak in September.

390. There's a good reason to worry: No one has raised or spent money the way Elon Musk has. Nor has any other chief executive officer of a public company made a bankruptcy joke on Twitter at a time when so much seemed to be unraveling.

391. Tesla is going through money so fast that, without additional financing, there is now a genuine risk that the 15-year-old company could run out of cash in 2018. The company burns through more than \$6,500 every minute,

according to data compiled by Bloomberg. Free cash flow—the amount of cash a company generates after accounting for capital expenditures—has been negative for five consecutive quarters. That will be a key figure to watch when Tesla reports earnings May 2.

Read the full story here: <https://www.bloomberg.com/graphics/2018-tesla-burns-cash/>

392. In years to come, we will all look back and wonder how so many people were taken in by this shyster, who makes Enron look honest.A

393. lot of Musk’s money has been extracted from suckers, who think he is God’s gift, as Bloomberg reports:One of Tesla’s greatest strengths is its ability to monetize the patience and goodwill of its customers and loyal fans. The company is sitting on a staggering \$854 million in customer deposits as of the end of 2017.

394. Since Tesla sells its products direct to consumers, without relying on a dealer network, customer deposits are cash payments that essentially serve as interest-free loans—and these loans can stretch on for years. If Tesla were to go bankrupt, those deposit holders would likely be wiped out.

395. Tesla is holding customer deposits for two vehicles that aren’t even in production yet: an electric Tesla Semi (\$20,000 deposit) and a next-generation Roadster (either \$50,000 down or the \$250,000 retail price paid up front to reserve a limited edition). Even customers interested in installing an array of solar roof panels or the company’s Powerwall home battery must hand over \$1,000 to place an order.

396. Tesla doesn’t break out deposit numbers by car, but the vast majority comes from \$1,000 reservations for the Model 3. When Musk first introduced the lower-priced sedan in March 2016, fans stood in long lines at Tesla stores. Two years later, the slower-than-expected pace of production means that most of the more than 400,000 reservation holders are still waiting. And new people appear to be joining the queue: As of April, the company reported “net Model 3 reservations remained stable.”

397. There’s an additional source of free money from loyal believers: An unknown number of customers have paid up for vehicle features—\$3,000 for “Full Self Driving” capability, for example—that Tesla thus far hasn’t figured out or released to anyone.

398. The consumer psychology that sees hundreds of thousands of people essentially extending an interest-free loan to a public company is unusual, to say the least. I think the phrase “more money than sense” rather sums it up

399. Apple and Google also named in US lawsuit over Congolese child cobalt mining deaths for Elon Musk's Tesla Cars. Dell, Microsoft and Tesla also among tech firms named in case brought by families of children killed or injured while mining in DRC. ‘I saw the unbearable grief inflicted on families by cobalt mining. I pray for chan Elon Musk's cobalt extraction in DRC has been linked to child labour.

400. A landmark legal case has been launched against the world’s largest tech companies by Congolese families who say their children were killed or maimed while mining for cobalt used to power smartphones, laptops and electric cars, the Guardian can reveal.

401. Apple, Google, Dell, Microsoft and Tesla have been named as defendants in a lawsuit filed in Washington DC by human rights firm International Rights Advocates on behalf of 14 parents and children from the Democratic Republic of the Congo (DRC). The lawsuit accuses the companies of aiding and abetting in the death and serious injury of children who they claim were working in cobalt mines in their supply chain.

402. The lawsuit argues that Apple, Google, Dell, Microsoft and Tesla all aided and abetted the mining companies that profited from the labour of children who were forced to work in dangerous conditions – conditions that ultimately led to death and serious injury. The families argue in the claim that their children were working illegally

at mines owned by UK mining company Glencore. The court papers allege that cobalt from the Glencore-owned mines is sold to Umicore, a Brussels-based metal and mining trader, which then sells battery-grade cobalt to Apple, Google, Tesla, Microsoft and Dell.

403. Other plaintiffs in the court documents say they worked at mines owned by Zhejiang Huayou Cobalt, a major Chinese cobalt firm, which the lawsuit claims supplies Apple, Dell, and Microsoft and is likely to supply the other defendants.

404. Another child, referred to as John Doe 1, says that he started working in the mines when he was nine. The lawsuit claims that earlier this year, he was working as a human mule for Kamoto Copper Company, carrying bags of cobalt rocks for \$0.75 a day, when he fell into a tunnel. After he was dragged out of the tunnel by fellow workers, he says he was left alone on the ground at the mining site until his parents heard about the accident and arrived to help him. He is now paralysed from the chest down and will never walk again.

405. Other families included in the claim say that their children were killed in tunnel collapses or suffered serious injuries such as smashed limbs and broken spines while crawling through tunnels or carrying heavy loads. The families say that none were paid any compensation for the deaths and injuries.

406. One of the central allegations in the lawsuit is that Apple, Google, Dell, Microsoft and Tesla were aware and had “specific knowledge” that the cobalt they use in their products is linked to child labour performed in hazardous conditions, and were complicit in the forced labour of the children

407. Is is charged that the Musk empire is an organized crime program that exists between Silicon Valley tech oligarchs, investment banks, U.S. Senators, government agency staff and White House staff who engage in these crimes.

408. That public officials knowingly participate in these crimes by failing to report their associates who engage in these illicit actions and by hiring suppliers who operate these illicit activities.

409. That the Musk empire suspects manipulate government funds for their personal profiteering at the expense of domestic citizen taxpayers like us.

410. That the Musk empire suspects operate a vast stock market manipulation program, as a core function of their operations, and those illicit deeds function at the expense of the public to render unjust gain to public officials.

411. That the Musk empire suspects contract a known group of lobbyists, corrupt law firms, unethical CPA's, corrupt investment banks and specialized corruption services providers to attack, defame, physically harm, character assassinate, black-list and/or kill those they dislike and they harmed many persons with those acts.

412. That the Musk empire suspects operate an Epstein-like sex-trafficking network of prostitutes and sexual extortion activities and locations for the engagement of said activities and for the bribery of cohorts via sex workers and that Musk was a personal associate of Jeffrey Epstein.

413. That the Musk empire suspects engage in electronic attacks and manipulations including hacking, election manipulation, media censorship and internet search results manipulation in order to mask their schemes.

414. That the Musk empire suspects engage in Lois Lerner-like, SPYGATE-like, VA whistleblower-like reprisal and retribution attacks using government agencies like SSA, DOJ, FBI, LSC, HUD, HHS, DOE, Etc

415. It is demanded that Elon Musk be arrested on RICO Racketeering, Anti-Trust, Tax Evasion, Bribery, and related charges!

416. Elon Musk had sex with a young non-age-appropriate rock and roll girl and got her pregnant.

417. Elon Musk dated anal sex advocate Gwyneth Paltrow who later told her friends that he was full of shit.
418. Elon Musk divorced one actress, then had to remarry her because she had the goods on him.
419. Video exists of Elon Musk at various sex parties.
420. Elon Musk dated Johnny Depp's girlfriend Amber Heard who thought that Musk was even more controlling than Johnny Depp.
421. The NUMMI car factory that Musk took over was first called, by Musk, in the media "non-functional". Even the two major car makers that were using it had abandoned it. Feinstein made Musk take it because her husband's company: CBRE Realty, managed the property around it.
422. Musk never made good on his promises to NUMMI workers or the Unions representing the NUMMI factory.
423. After getting an insane amount of exclusive free cash from the taxpayers, Musk flew workers in from overseas.
424. Multiple women have charged Musk for sexual abuse and factory misogyny.
425. Musk couldn't make it in college and bailed out.
426. Far more SpaceX rockets have exploded and fully failed than the public is aware of.
427. Musk said he would already have sent his buddies around the moon but many potential passengers have bailed out after they saw the due diligence on SpaceX lack of experience.
428. Musk, Draper, Page, Westly, Schmidt, Brin and other famous tech asshole billionaires have formally agreed to run a "cartel" to control news, information and industries.
429. Inside the Tesla that Elon Musk had SpaceX put in orbit is a "confession folder" that would destroy Musk if anyone went up and got it.
430. Elon Musk believes he could kill someone and not get in trouble because he has so many California Senator's, Tier one law firms and former White House staff protecting him.
431. Elon Musk is the Citizen Kane of the modern world. He thinks he is the Al Capone of Technology. He uses things that appear to be all "crunchy granola" on the surface to steal taxpayer subsidies with the help of corrupt politicians.
432. Aside from Musk's own personal dirty operations and orders, the largest facilitator of his crimes is the large group of men inside Goldman Sachs and JP Morgan dedicated to supporting his crimes and corruptions.
433. Through covert conduits, Elon Musk pays blogger James Ayre to shill his schemes online.
434. Musk's entire media plan is self-promotional aggrandizing and fake virtue-signaling to keep the news off his case.
435. The SEC made him quit but he just changed one letterhead graphic and nothing else. Musk still runs Tesla and the rest of the empire just like he always did.
436. Musk covertly funds abortion projects because he gets so many girls pregnant and refuses to use a condom.
437. Deutsche Bank is the other biggest player in the Musk Empire money laundering, political payola and corruption crimes.
438. Musk stole most of his designs from others, as proven by the U.S. Patent office and previous publications.

439. When Elon Musk's Hyper-loop crashes, it will turn all of the passengers into a bloody applesauce like nightmare.
440. Musk's 5G SpaceX Starlink Satellites could destroy the environment, will add to the cancer-causing radiation of the Earth and are to be used to spy on consumer's uses of the internet.
441. In lawsuits, Musk always pleads that he "has no money".
442. X-Ray analysis by over 40 major laboratories prove that Elon Musk's lithium ion batteries have severe and constantly degrading defects inherent in their construction. Musk has known about these dangers for decades but chose to work with Panasonic to cover it up.
443. Elon Musk lost a LEMON CAR lawsuit proving that his cars are poorly designed and manufactured.
444. Elon Musk's union negotiating tactics are: "delay, deny, defer and claim to be conducting a fake study..."
445. Elon Musk's take-over of Tesla from Martin Eberhardt, the actual founder, was based on an Obama Administration scheme to exploit Lithium mines in Afghanistan and Cobalt mines in the Congo, which Obama financiers had bought the rights to. Frank Guistra and Goldman Sachs helped come up with this scheme.
446. A famous article about SpaceX quotes a top Musk staff staffer saying Musk is a "liar".
447. A top SpaceX engineer has sued Spacex for lying about rocket safety and says that Musk does not care about science, he cares about publicity.
448. Most of the "famous" people Musk hired, quit after seeing what a sham his operations are.
449. Jared Birchell, of Burlingame, is terrified that Musk will have him killed because he knows "where the bodies are buried", but he has to act demure and "stay-off-the-press-radar" for now to keep Musk from paying too much attention to him.
450. Every property that Musk owned has been bugged by government, news or competitor specialists.
451. Musk takes a number of drugs for mental issues yet he runs companies with products that can easily kill their users. Many think that he should be under closer federal supervision.
452. The U.S. Department of Energy PR Department has been ordered by Obama officials (who, shockingly, are still there even during the Trump Administration) to always hype up Musk because, WHEN Musk fully fails, it will prove that the Department of Energy funded him because Obama ordered them to and not based on any merits. Most every Applicant for DOE funds beat Musk on every merit EXCEPT CRONYISM!
453. Trump-hating Elon Musk wanted to nay say Trump by subjecting Tesla workers to COVID death by refusing to close plant
454. Musk uses his own workers to play deadly politics with their lives in COVID closure he refused
455. Musk totally lied about his capacity, ability and knowledge to make COVID ventilators in order to scam political funding
456. Musk sent snoring devices instead of ventilators and lied about those products in order to Virtue Signal for his own hype
457. Musk has had babies with many women in an Epstein-like master plan to seed the world with his DNA so that mini-Musk's will live on forever. Each ex-baby momma has been paid massive sums to keep quiet about his misdeeds.

458. Musk uses his many mansions to hide money and operate tax manipulation efforts.

459. The "Mainstream Media" is controlled by Democrat bosses who refuse to allow any negative news to be printed about Musk because Musk conduits funds to the DNC.

460. One of Musk's 'baby ovens' known as "Grimes' has been revealed to have been used as a "sex toy for Musk" by Grimes friends.

461. The U.S. Department of Energy has a federal policy of promoting Musk's hype because they are liable for criminal prosecution because Secretary of Energy Steven Chu and his staff helped organize Musk's embezzlement of taxpayer funded monies and insider-traded on that profiteering.

462. Failing Elon Musk tries to make Alameda County pay for his failed NUMMI factory by using COVID as an excuse!

Why do you ignore, or cover-up, the fact that Musk is an organizer of the Malignant Narcissism And Cartel of the Silicon Valley Billionaire Frat Boy Club?

At almost every juncture, Elon Musk has made egotistical decisions that lead to more failures. His behavior is that of a person who has no care or concern for the health, safety and welfare of the American people. Nothing could epitomize that more perfectly than his grotesque suggestions that we should shoot nuclear bombs off on Mars or that nobody will care that his Starlink Satellites are designed to spy on the public. This would seem comical, and entirely unbelievable, if it had not actually happened.

In 2006 the many scientists told Elon Musk and his advisers of the high likelihood that a pandemic of lithium ion battery explosions would strike the nation and advised the incoming administration to take appropriate steps to reduce its impact. Obama officials hid the dangers because they owned stock in lithium and cobalt mines for those batteries, particularly in Afghanistan.

In November of 2007, the experts warned Obama that the country was likely to be afflicted with a devastating pandemic of lithium ion originating from Asian and Russian oligarchs.

In January 2009, the Obama administration was told by its own experts, Bernard Tse and his team who knew Tesla bosses, Sandia and others that the lithium ion batteries in Tesla cars had degrading chemistry which become a global pandemic of auto danger. Again, Obama chose inaction.

Obama and Musk have deprived Democratic-led regions of the country from receiving needed safety reviews of Tesla cars.

Over the year's since 2006, Americans working with the DOE, NHTSA, SEC and other groups accelerated warnings to Obama officials. These engineers and other science professionals were intentionally ignored in order to protect politicians stock market profits.

In these, and any other examples, Musk and his inner circle of White House and Senate insiders ignored or purged experts and other truth-tellers, and lied about, misrepresented, deflected or denied the dire threat to the American people posed by the lithium ion battery scam.

Considered in total, Musk and his regime have shown themselves to be incompetent, callous, malevolent and deeply cruel in their response to the Tesla safety issue crisis (as well as to a plethora of other issues).

But to merely document the Musk regime's deadly failures in response to the dangers of his companies is to ignore the most important question: What are Musk's and his advisers' underlying motivations?

This forensic question must be answered if we are ever to have a full accounting of the Musk Corruption, and see justice done for the voters, the dead tesla victims and those who will die in the future as well as the damage done to the broader American community.

The coordinated 'main-stream' media's preferred storyline that suggests Musk is simply incompetent doesn't add up because Musk has made the wrong decision every single time in terms of how crises like this are supposed to be dealt with. (i.e. Be consistent, transparent, factual, and credible.) It's increasingly not believable for the left-wing press to suggest that Musk has been distracted or inept during this crisis, in part because of the level of his uselessness has become so staggering.

Maybe Musk is vengeful. Maybe he wants to wreck the economy to create investment opportunities? He's under the thumb of a foreign entity? He wants to cause panic and cancel the November elections? He's a fatalist? Who knows. And honestly, the specific "why" isn't what matters now. What matters is asking the difficult questions and pondering what the Musk oligarchy is truly about, no matter what lurks in the shadows...

Now the press needs to shift some of its focus and ask the truly alarming questions about Musk and his motives. Because we still don't know why he essentially ordered his companies to embark on such sinister ventures involving slicing up brains; over-priced deadly cars for rich douche-bags; digging holes for billionaire hide-outs, launching domestic spy satellites and manipulating elections along with his boyfriend: Larry Page, etc...

Psychologist and psychotherapists have an answer: Elon Musk is a "malignant narcissist". Musk's mental pathologies inexorably compel him to hurt and defraud large numbers of people — including his own supporters.

Experts have looked at Musk's borderline personality disorders. They explain that sadism and violence are central to Musk's malignant narcissism and his decision-making about his self-promotion. They warn that Musk is an abuser locked into a deeply dysfunctional relationship with the American people and that, like other sadists, Musk enjoys causing harm and suffering to any that do not recognize his "tech Jesus" self-proclaimed superiority.

Ultimately, all psychologists generally conclude that Musk is engaging in "democidal behavior" in partnership with Obama and Pelosi and cautions that the many dead and injured (so far) from the Tesla fires and crashes are not simply collateral damage from the Musk madness, but rather the logical outcome of Musk's apparent mental pathologies and the poor decisions that flow from them.

Musk is both denying responsibility by saying things such as, "I take no responsibility. We've done everything right." But at the same time, Musk is also sabotaging the efforts to stop the corruption in his empire. This is a very important aspect of Musk's behavior. Musk is not just deflecting blame onto others, he is actively interfering with the politicians' ability to do their job by controlling Senators with bribes. Musk is not just incompetent. He is actively engaging in sabotage against competitors and reporters who speak the truth about him.

You might wonder: How does someone with his type of mind reconcile claims like "I have total power" with "I take no responsibility"? He has said both things within a few days of each other. Well; That is a function of how the psychology of a malignant narcissist is structured. When Musk says things such as, "I have total power," that's the grandiosity. "I'm in total control" is a function of Musk's paranoia, where everything bad is projected outward. Therefore, anything negative or bad is someone else's fault. Bad things are 'other people' in Musk's mind. The grandiosity and "greatness" are all him. Musk's mind runs on a formula which bends and twists facts, ideas and memories to suit his malignant narcissism. This is why Musk contradicts himself so easily. He lies and makes things up. His fantasies all serve his malignant narcissism and the world he has created in his own mind about his greatness.

Another component of Musk's malignant narcissism is sadism. That part of Musk's mind is more hidden. People such as Musk are malignant-narcissist sadists because they, at some deep level, are driven to cause harm to other people. Musk's life is proof of this. His pedo father and trophy wife narcissist mother demonstrate his roots. He enjoys ripping people off and humiliating people. He does this manically and gleefully. He has lied thousands of times. He threatens people online and elsewhere. Most psychologists believe that Elon Musk is also a sexual sadist, who on some basic level enjoys and is aroused by watching people be afraid of him. In his mind, Musk is creating chaos and instability so that he can feel powerful.

Professor of psychiatry and psychoanalyst Otto Kernberg called that phenomenon "omnipotent destructiveness." The bullying, the violence, the destruction, frightening people, humiliating people, getting revenge and the like — such behavior is what Elon Musk has done his whole life. It is who Elon Musk really is. Unfortunately, too many people are still in denial of that fact.

Musk has to create and control a field of negative corrupting energy around himself. For example, he pressures the scientific experts to bend the truth to his dreamworld during his press conferences. The scientists are basically Musk's hostages. The American people are hostages as well to Elon Musk's lies. We are being abused by him. We know that Musk is lying. We know that he's doing nothing to help us. We feel helpless to do anything to stop him. It is causing collective mental despair. It is not that all Americans are suckers or dupes, it is that Musk is a master at such cruel and manipulative behavior.

Elon Musk is a master at getting negative attention, and the more people he can shock and upset, the better.

Malignant narcissists like Elon Musk view other human beings as kindling wood to be burned for their own personal enrichment, media enlargement and hype expansion.

Follow the facts to the obvious and true conclusion. If all the facts show that Elon Musk (and his little boy buddies Larry Page, Eric Schmidt, John Doerr, Reid Hoffman, Steve Westly, etc.) is a malignant narcissist with these powerful sadistic tendencies, this omnipotent destructiveness, where he's getting pleasure and a sense of power from dominating people and degrading people and destroying people and plundering people and laying waste to people, both psychologically and physically, then to deny such obvious facts is willful ignorance.

When Musk is finally exposed, like Elizabeth Holmes and Theranos or ENRON, it will be glorious.

Rather than making a prediction as to Musk's specific actions when the emperor has no clothes, it is more helpful to describe the type of actions he will take. Rather than trying to say, "This is the move he'll make." Like in a relationship, Elon Musk is the abuser. He is the husband or father who is abusing his partner or children or other relatives. The American people are like a woman who is leaving her abuser. She tells her abuser, "That's it! I am done with you!" She has her keys in hand and is opening the door of the house or apartment to finally leave. What happens? The democidal maniac Elon Musk will attack us, badly. Make no mistake. Elon Musk is going to find a way to attack and cause great harm to the American people if he believes that he will be fully exposed. He will use his spy satellites, his media controls, his remote controlled cars, his stock market manipulation tools, his Goldman Sachs economic destruction team and more. Musk will continue his crimes and shills like you will cover for him, unless the FBI finally arrests him.. and hopefully, you too.

Elon Musk's Hyperloop predicted to turn human beings into "bloody applesauce". Musk's latest taxpayer hand-out scam!

Put a crowd of human beings in a can and connect that can to the ground in a line that never varies. Shoot that can down the line at speeds so high that any error, even the tiniest one, could turn the people inside, instantly, into what one investigator calls "bloody human applesauce".

An earthquake, ISIS, a way-ward pick-up truck, a flood, a tornado, a cow on the tracks, a computer error, a driver mis-calculation, a confused self-diving car, a hacker attack, a solar flare, a fallen tree and hundreds of other possibilities could kill every passenger, at once, in the most horrible manner possible. It is a disaster nightmare guaranteed to happen. The ambulance drivers will be picking up the victims with a sponge.

For those who wish to do harm to others, now increasing in the new world, the Hyperloop gives them a perfectly timed opportunity to create a small anomaly which will cause an epic amount of death. The Hyperloop could not be a worse-timed, more ill-conceived operation.

Musk insists: “Oh we will have the latest technology. Nothing will happen.” But that is what the other CEO's of the companies that had terrible disasters said. The many filed lawsuits against Musk, for fraud; demonstrate that he has a loose relationship with the truth and a close relationship with “Hype”.

Regular trains have been suffering horrible human disasters, now featured in full color on You Tube, in increasing numbers. What kind of naiveté is making the Hyperloop people believe that they are immune to reality?

It is the open-eyed naiveté of Greed!

You see, Elon Musk has long been associated with railroad baron: Richard Blum. Richard “Dick” Blum of the railroad property of the FBI-raided Solyndra and next door property Tesla; Richard Blum of the high speed rail project so corrupt that a law had to be made to try to slow him down; Richard Blum who has a wife named Dianne Feinstein, who keeps routing state and federal tax dollar kick-backs to all of Elon Musk's companies. Many think that the “Hyperloop” is an attempt to bypass the curtailment of the Feinstein/Blum's other railroad project. “THAT” Richard Blum is also under investigation for profiteering, Chinese contractors, Post Office real estate scams, University regent rigging, and more.

Musk uses hype to baffle Senators into giving him billions of taxpayer dollars for all of his companies so that he can turn around and fund their campaigns with the very same money. It is called a “kick-back” scheme.

Musk's billions and his Tesla, Solar City and Space X could not possibly still be alive without tens of billions of dollars of tax credits, free real estate, fee waivers and cash that state and federal agency heads just handed him in exchange for some “perks”. The Hyperloop is the same story. Hyperloop can't exist without government kick-backs. Nobody in the consumer market asked for a “Hyperloop”. As usual, all of the media stories and blogs expressing excitement about the Hyperloop have been traced back to Elon Musk, and his Troll Farms. It is nearly a joke that Musk's latest hype-scam actually has the word “Hype” in it! It is, as if, he is taunting the authorities. He believes that corrupt Senators protect him from prosecution. That bet may be running out.

Musk, and his Google investment partners, have been handed, as a kick-back, most of NASA, free NASA jet fuel for their private jets, free NASA airfields, Free NASA buildings, Free financing for their car, solar and spy satellite factories, Free H1-B overseas labor, and more..on the backs of the public.

While the inevitable disaster of “human sausage” is horrific, the disaster of allowing Elon Musk to engage in another corrupt hype-scam, on the pain of the taxpayer, is the biggest, most horrific, disaster of all.

The Bottom Line: You and Musk are equally dishonorable crooks. You are helping Musk use our tax money to conduct crimes and you are protecting him with your PR hype lies.

We urge you to send this letter to Elon Musk and each of the “executive” front people at his companies. We urge Musk and his front operators to respond in writing to each of the charges in this letter, in writing, as well as in a Jury Trial and a public Congressional hearing.

Were You Attacked By A Sociopath Oligarch? Then Cause Them A One Billion Dollar Valuation Loss, Or Bankruptcy, In Return

By Anderson Key

I have had Elon Musk, Larry Page, Eric Schmidt and Mark Zuckerberg (who are all frat boy bros and political co-conspirators) put hit-jobs on my friends and I. This is what we did to them in return.

What is tech corruption?

Corruption is the abuse of office for personal gain, and it takes many forms. It's the politician taking a bribe before awarding a building contract to the briber. It's the city council member paying for his family vacation with public funds. It's the official demanding bribes from citizens in exchange for access to clean water. It is a California Senator getting payola from Google, Tesla and Facebook with stock market accounts from those companies.

Corruption affects everyone, especially minority and vulnerable populations. As the biggest obstacle to economic and social development it harms societies in these ways:

- It undermines democracy and human rights by weakening governments.
- It diverts funds from public services such as health care, education, and sanitation.
- It discourages foreign investment, leading to fewer jobs.

Those numbers aren't the only reason to get mad. Corrupt officials divert funds from public services like health care and education to projects that will line their pockets. Corruption also harms societies by undermining human rights. It can cost people their freedom and sometimes their lives.

So how can you fight corruption? By making sure the laws in your country are enforced, says former U.N. youth observer Jackson Dougan.

Many countries have anti-corruption laws, but, as Dougan explains, they may not have the resources to monitor and enforce those laws. That's where you can help.

You can make a difference... We did!

Powerful people are often the ones taking bribes or making shady deals, and that discourages honest citizens with few resources. But thanks to new technologies, you don't need a lot of money or power to fight corruption. For example, a couple started an anti-corruption website in India, where people can report instances when they have been asked for bribes.

Transparency International offers these ideas in its anti-corruption kit:

- Organize a committee to count and keep track of public supplies, such as school textbooks.
- Coordinate a sporting event that the community can participate in to raise awareness of corruption.
- Create a petition and take it to the decision-makers.

Thanks to new technologies, you don't need a lot of money or power to bring corruption to light. You can use social media and online platforms, such as I Paid a Bribe, to crowdsource reports of corruption in real-time, even anonymously.

Web and smartphone applications such as Open the Books in the U.S. can help you keep tabs on government spending, including how much officials are being paid. These kinds of data can be used to hold corrupt officials accountable and push through reforms.

Transparency International offers other simple ideas for making a difference in your community.

December 9 is International Anti-Corruption Day. Say “no” to corruption and learn more about what you can do to uphold transparency.

Part of this text is adapted from Stopping corruption might seem impossible. But there are simple ways to fight it. and Delete corruption from the palm of your hand from ShareAmerica.

This is about powerful and greedy people abusing the public system in order to manipulate TRILLIONS of government treasury and stock market dollars into their own pockets. They lie, cheat, bribe, steal, attack, and even kill, in order to grab this money (provided from the pockets of the taxpayers). They create fake "political issues" in order to steer massive amounts of government money to "solutions" that they just happen to own the companies of. ("Follow the Money") They collude on cover-ups, cover-stories, pump-and-dumps, fake "Stimulus Funds" redirection and other illicit deeds. Famous politicians are a very big part of this crime. They are easy to spot via the tens of millions of dollars, in their personal bank accounts, which only appeared after they took office. They broke and separated America by promoting their fake causes, which divide the public, in order to benefit off of their exclusive stock market scams. In fact, if the, completely computer manipulated, stock market did not exist, political corruption in America would be reduced by 95%.

In one example; The Silicon Valley Tech Cartel; an anti-trust violating organized-crime operation based on quid-pro-quo, ran a slush-fund in the U.S. government. They manipulated the Dept of Energy bosses so they would only fund political favorites and sabotage the competitors of those favorites in an epic violation of anti-trust and anti-racketeering laws. We will examine the investigation, exposure and take-down of each of the crooks involved in that scheme.

You have heard the term: “You can’t fight City Hall”, right? We did and we won! We fought the entire United States Government and we won! We fought a rogue division of the CIA and we won! We fought the President of the United States and we won! We fought the most powerful and insane billionaires in the world and we won! We got over 120 famous politicians and agency heads FIRED simply by preparing and filing an FBI-grade dossier on each one with all of the relevant jurisdictional agencies!

You can fight corruption and win!

YOU can use the public "Corruption Kill Box" tactic to wipe out crooked politicians, tech oligarchs and their financiers.

A Corruption Kill Box Procedure combines:

- 1.) Federal police investigations created by formal filed criminal referrals and FBI Form 302 overview drafts,
- 2.) Public class-action lawsuits,
- 3.) Massive news media disclosure blasts,
- 4.) Formal regulatory agency complaint filings,
- 5.) Individual lawsuits against political and agency executives,
- 6.) Documentary film production and distribution,

7.) The promotion and organization of Congressional hearings,

8.) Crowd-sourced social media public forensics,

9.) Open-source AI financial crimes tracking software.

The Kill Box (KB) procedure is an extinction-level event with a 100% success rate against corrupt entities. KB's only work on the corrupt, so non corrupt parties are safe from it's effects. ANY member of the public can engage in these totally legal anti-corruption actions. Just do it!

“Winning” does not mean you actually have to kill the bad guys dead. You can shame corrupt politicians, CEO’s and insiders so bad that they will wish they were dead.

A number of famous tech CEO’s recently had to resign. They did not leave to “spend more time with their family”. They were EXPOSED by citizen and journalist forensic actions. Many of them left before the entire ‘Kill Box’ maneuver was completed. Even partial execution of the Kill Box can often lead to spectacular results.

The most effective interdiction process for political corruption is called "Citizen Forensics". It is the process of the crowd-sourced deep investigation of public officials, and their skills, followed by the global public exposure and shaming of their illicit deeds. Federal law enforcement groups will even help you do this because you, and they, both have a common goal: to take down crooks.

Process Overview

Taking Down Corrupt California Politicians, Dirty Government Agency Executives And Their Tech Oligarch Bosses

At a high-level this is what you will do:

THE MAIN TYPES OF OUR INVESTIGATIONS AGAINST THESE GUYS:

NOTES ON SOME OF THE INVESTIGATIVE TECHNIQUES WE USED:

Immunity

Warrants

Elon Musk moved from California To Texas to try to get away from our investigations but our biggest team of researchers happens to be in Texas, so he is screwed. Larry Page is trying to hide out in New Zealand with Peter Theil but investigation laws make it even easier to spy on people and their private jet tail numbers in New Zealand.

Computers and Computerized Data:

Flipping a Corrupt Senator, administrative aide or tech Insider:

If you are going to go to the trouble to interdict a political, corporate or agency “bad guy” you should pick the ones whose termination and/or shame will have the greatest benefit for all.

This makes Eric Schmidt, Elon Musk, Larry Page, Mark Zuckerberg, David Plouffe, and that gang, ideal targets.

You Owe It To Yourself To Take Them Down!

In addition to the thanks of a grateful nation, you get some mighty fine feelings of satisfaction knowing that the David And Goliath story really can come true.

You can wipe out the bad guys out, all by yourself, in 100% legal ways.

First Steps

You will write up and/or organize a dossier on each crook.

Next...

... get a manila file folder and label it "Target One". Make an encrypted folder on your computer and also label that folder "Target One". These folders are where you will organize all of the data you collect on your target.

You will undertake the investigative tasks, using your personal computer and your free time, completing the following missions (or getting others to):

15. Provide independent analysis from other investigators

123. Read The Big Book <https://www.amazon.com/Big-Book-Revenge-Serious-Getting/dp/0806521414> and many "How To Be A Private Investigator"-type books.

Will The World's Hackers Will Shut Down The Stock Market Forever?

- Stocks are entirely computerized

- Goldman Sachs and Kleiner Perkins staff claim that they can control any stocks that they want to, so can hackers do that too?

- What happens if all the hackers in the world target the stock market at once

Mark Kolakowski

Investors in the stock market, whether through individual shares or funds, face the threat of major losses and disruption from hackers, according to a number of Wall Street investors and regulators studying the issue, the Wall Street Journal reports. The possibility looks all the more real given already successful cyber attacks in recent years against high profile financial institutions including, among others: credit reporting agency Equifax Inc. (EFX); banking giant JPMorgan Chase & Co. (JPM); and the U.S. Securities and Exchange Commission (SEC). The threat is being taken so seriously at the highest levels of government that the Defense Advanced Research Projects Agency (DARPA), which oversees development of advanced technologies for use by the U.S. military, has been charged with identifying vulnerabilities in the financial system. (For more, see also: Was I Hacked? Find Out If the Equifax Breach Affects You.)

Nightmare Scenarios

DARPA has been conducting brainstorming sessions with key players in the financial system to identify potential risks and to develop effective counter-measures against them. Particularly important in these discussions, the Journal notes, have been market participants engaged in high-frequency trading (HFT) or high-speed trading, the managers of quant funds, and other persons with deep knowledge of the automated systems that drive so much of trading today, often with reaction times measured in fractions of a second.

Several scenarios for widespread financial chaos that hackers could attempt to generate are cited by the Journal. Shutting down a huge payroll processor would leave tens of millions of households, many of which also are investors, without sufficient funds to pay for unsettled trades. ADP (ADP) would be a prime target since it generates salary checks and direct deposits for about 16% of U.S. workers.

Hackers could try to inject false price quotes into data feeds. Publishing "fake news" through social media may set off a panic, especially if it purports to come from a reliable news organization. Indeed, in 2013 hackers got into the Associated Press Twitter account, and sent out a false report about explosions in the White House that injured President Obama, sending stocks tumbling, according to U.S. News & World Report.

Seizing control of automated trading algorithms could be used to disrupt the markets. Another tactic might be generating an avalanche of phony sell orders to trigger a market crash. (For more, see also: Most Costly Computer Hacks of All Time.)

Hack, Pump and Dump

In 2010, the SEC uncovered what it called a "hack, pump and dump scheme" run by a Russian trading firm, per Wired.com. It involved buying thinly traded stocks in the trading firm's own accounts, pumping up their prices by placing buy orders at inflated prices through hacked accounts belonging to investors at Scottrade, then selling the shares in the Russian firm's own account. A short-selling variant also was used, with the Russian firm shorting stocks in its own account, then driving their prices down with sell orders placed through the hacked Scottrade accounts. An Indian man was convicted for running a similar scheme in 2008, Wired.com added. Scottrade has since been acquired by TD Ameritrade, a division of The Toronto-Dominion Bank (TD).

Global Threats

During the past several years, hackers have interfered with trading in various locales. In July, online brokers in Malaysia were shut down in a distributed denial of service (DDOS) attack similar to cyber blackmail previously waged against utilities and hospitals in more than 100 countries, the Nikkei Asian Review reported. In 2011, hackers disrupted trading on the Hong Kong Stock Exchange, per Reuters. In 2010, Russian hackers got into Nasdaq's networks, according to Ars Technica, and were able "to roam unmolested for months and plant destructive malware designed to cause disruptions."

Stock Doxing

A shady trading practice is secretly to acquire damaging information on a company, short the company's shares, then release that information in an attempt to drive the share price down. Based on hacker lingo in which to "dox" is an attempt to damage the reputation of a person or organization online, so-called stock doxing has become a growing market manipulation technique, according to a report in Wired UK.

The Department Of Energy's Crony Pipe Dream

Every year since 2000 our research group has checked in with consumer car owners and auto industry suppliers. The bottom line has always been that no consumer electric car market will EVER happen until every consumer can charge their car at their home garage or home apartment parking spot. NOBODY, in any significant numbers, is going to drive many miles to a charging station, wait in line to get to the charger and then wait more than 4 minutes for their car to charge. The current time to charge most electric cars is 40 minutes with all of the fussing around accounted for.

We proposed a hot-swap battery system that any consumer can use, without driving to some special location. A consumer can hot-swap a wheeled battery in less than two minutes.

Senators and government officials don't like that because they bought stock market investments in the ways that don't work. Those White House and Department of Energy officials get bribes and stock market payola from Proterra, Ener1, Tesla and the old school suppliers, so they will not allow non-lithium-ion batteries and they will not allow fuel cell and ultra-capacitors to exist. Those politicians will not allow the only solutions that work to get to market. Here is what we told the Department of Energy and the White House, in writing for the last decade. With revelations like these:

MORAL HAZARD? Fed President Active Trader of Stocks...

Boston Official Who Warned on Real Estate Was Active REIT Trader...

Agency buying bonds of companies that don't seem to need central bank's help...

...it is clear the government officials, especially Department of Energy bosses, don't care about their salaries, they are entirely motivated by their stock market holdings, which compete with the public.

Yes, Department of Energy staff get paid by special interests via stock market insider trading and so those energy executives sabotage any company that competes with their lithium ion battery mining, assembly or marketing payola.

The United States has about 100,000 public chargers, far fewer than Europe and China. It needs 10 times as many, auto experts say, to complete the switch from combustion engine vehicles.

Over the past year, the electric vehicle charging industry has been swept up in a Wall Street gold rush because of growing optimism about electric cars and trucks.

In President Biden's vision of a green future, half of all new cars sold in 2030 will be electric. But something really basic is standing in the way of that plan: enough outlets to plug in all those cars and trucks.

The country has tens of thousands of public charging stations — the electric car equivalent of gas pumps — with about 110,000 chargers. But energy and auto experts say that number needs to be at least five to 10 times as big to achieve the president's goal. Building that many will cost tens of billions of dollars, far more than the \$7.5 billion that lawmakers have set aside in the infrastructure bill.

Private investors are pouring hundreds of millions of dollars into building chargers, but the business suffers from a chicken-and-egg problem: Sales of electric cars are not growing fast enough to make charging profitable. It could be years before most charging companies break even, let alone mint big profits like Exxon Mobil and Chevron.

Fast chargers — ones that can fill up an electric car battery in 20 to 40 minutes — cost tens of thousands of dollars but are typically used less than humdrum gas pumps. Yet the auto and energy industries need to build them to reassure people that they won't be stranded in an electric car with no plug in sight.

"E.V. charging infrastructure is the single biggest barrier to E.V. adoption," said Asad Hussain, a senior analyst at PitchBook, a research firm. "You talk to anyone who's on the fence about buying an E.V. and the No. 1 concern that comes to mind is range anxiety."

The European Union, which is further along in electrifying cars, had nearly 200,000 public charging points last year. China, where electric cars are even more common than in Europe, had more than 800,000 in 2020.

European and Chinese officials have offered better incentives and imposed tougher regulations in part because they want to win a global race to build the cars and trucks of the future. U.S. policies, including the infrastructure bill, have been more modest because most Republicans and some Democrats oppose the regulation and spending needed to quickly ditch fossil fuels.

Soon, even \$7.5 billion won't be enough to lay the groundwork for the electric age, Nick Nigro, founder of Atlas Public Policy, a consulting and research firm based in Washington, said about the proposed federal spending on charging stations.

"Is it sufficient? No," he said. "But it gets things going."

Most drivers today plug in their electric cars at home, and only occasionally use public charging stations. But those stations will be crucial, especially to those who live in apartments and people who drive long distances.

For years, start-ups, automakers and other companies have been slowly building chargers, mainly in California and other coastal states where most electric cars are sold. These businesses use different strategies to make money, and auto experts say it is not clear which will succeed. The company with the most stations, ChargePoint, sells chargers to individuals, workplaces, stores, condo and apartment buildings, and businesses with fleets of electric vehicles. It collects subscription fees for software that manages the chargers. Tesla offers charging mainly to get people to buy its cars. And others make money by selling electricity to drivers.

Once the poor cousin to the hip business of making sleek electric cars, the charging industry has been swept up in its own gold rush. Venture capital firms poured nearly \$1 billion into charging companies last year, more than the five previous years combined, according to PitchBook. So far in 2021, venture capital investments are up to more than \$550 million.

On Wall Street, publicly traded special purpose acquisition companies, or SPACs, have struck deals to buy eight charging companies out of 26 deals involving electric vehicle and related businesses, according to Dealogic, a research firm. The deals typically include an infusion of hundreds of millions of dollars from big investors like BlackRock.

“It’s early, and folks are trying to wrap their heads around what does the potential look like,” said Gabe Daoud Jr., a managing director and analyst at Cowen, an investment bank.

These businesses could benefit from the infrastructure bill, but it is not clear how the Biden administration would distribute money for charging stations.

Another unanswered question is who will be the Exxon Mobil of the electric car age. It might well be automakers.

Tesla, which makes about two-thirds of the electric cars sold in the United States, has built thousands of chargers, which it made free for early customers. The company could open its network to vehicles made by other automakers by the end of the year, its chief executive, Elon Musk, said in July.

Volkswagen also owns a charging network, Electrify America, which is already available to all makes of cars. In Europe, Volkswagen, BMW, Ford Motor, Daimler and other automakers jointly own a charging company called Ionity. Drivers pay fees to charge in both cases, but some automakers offer free charging for a few years to entice car buyers.

Energy giants like BP and Royal Dutch Shell have gotten into the business, too, by buying charging companies in Europe and the United States.

And 14 electric utilities from Maine to Texas have formed the Electric Highway Coalition to build stations at intervals of 100 miles or less. Utilities elsewhere are also building chargers, as are cities like Los Angeles and New York.

They are all competing in a tiny market: Less than 4 percent of new car sales and less than 1 percent of vehicles on U.S. roads are electric.

Charging companies claim they can succeed even if it takes years for electric vehicles to take over. Some businesses like ChargePoint have been around for more than a decade, while others raising money don’t have much of a track record.

The chief executive of ChargePoint, Pasquale Romano, says his company avoids some costs by using contract manufacturers to build equipment and selling stations to employers who own electric vehicle fleets, retailers and others, who also buy software and maintenance subscriptions.

“Everyone thinks this can go fast, and it can’t,” Mr. Romano said. “You have to get in and start pedaling to help shape what it looks like.”

Volta, a smaller charging company, places chargers near the entrances of retailers like Whole Foods Market and Walgreens. The chargers show ads, generating revenue, and the stations pay for themselves within a few years, said the company’s president and a co-founder, Chris Wendel. “It’s a sponsored service brought to you by brands that care about what you’re doing.”

But some companies have stumbled. In December, TPG Pace Beneficial Finance, a SPAC backed partly by TPG, the private equity firm, announced that it would buy EVBox, an Amsterdam-based maker of charging equipment, valuing the company at \$1.4 billion.

In January, Jim Cramer, the host of CNBC’s “Mad Money,” said EVBox was his favorite charging company because it is an established player in Europe. Shares of TPG Pace Beneficial climbed to \$31 in February, from around \$10.

But this month, the companies delayed the merger’s closing because EVBox has not yet released its audited financial statements for 2020. TPG Pace said in a regulatory filing that there was “significant uncertainty” about the deal’s completion, and its shares have fallen back to about \$10.

A spokeswoman for EVBox declined to comment.

Mr. Cramer no longer stands by the EVBox pick. “I suppose we put too much faith in the financials as presented to investors at the time,” he said in an email.

Since the start of 2020, 16 proposed SPAC mergers have been canceled or withdrawn. And investors and regulators have raised questions about the optimistic claims made by executives and promoters of SPACs.

Yet investors continue to pour money into charging. One charging company, EVgo, completed a SPAC deal and started trading in July. Trading in Volta started last month. Several other deals have been announced in recent months, including for Tritium, which makes fast chargers; Wallbox, which sells charging equipment, software and related services; and Allego, which operates a large charging network in Europe.

Some investors think that charging cars might not be the best approach. Lithium ion batteries cause wars, corruption, genocide, mass rapes, child labor, unexpected fires, environmental damage, cancers, liver damage, worker deaths and other awful things.

Last month, Ample, which aims to build stations where drained E.V. batteries are replaced with charged ones, raised \$160 million. Raed Masri, founder of Transform VC, an investor in Ample, said battery swapping would be better for people without a place to plug in their cars because it is much faster.

“They need a quick energy delivery system, and only swapping provides that,” Mr. Masri said.

Other investors are making lots of bets. Energy Impact Partners, a private equity firm based in New York, has invested in several charging networks, a repair app for charging stations and an app that optimizes charging.

Cassie Bowe, a principal at the firm, said that with electric vehicle sales growing fast, it was urgent to build a network to support them. “There’s no more time,” she said. “We need this infrastructure fast.”

The reality is that the current plan can never work. There is not enough money, consumer interest, logistical embrace or other support for public chargers to ever be more than a feel good fancy. The consumer desire for speed-of-delivery increases over 10% per year. Nobody is going to put up with the wait, especially after sitting in rush-hour congestion every morning and night.

Electric cars will never happen in any volume unless every home and apartment has a charger, the rates for the chargers are less than gasoline and the batteries or energy cassettes can be instantly hot-swapped. Department of Energy officials avoid this option, though, because it competes with their stock market holdings. Corruption in America will never end until Congress makes it illegal for a public servant, or their family, to own stocks!

The Justice Alliance Supports The Fair Competition Council Anti-Corruption Efforts

- Anti-trust and anti-cartel actions are already underway with DOJ, FTC, SEC and public/private efforts

SAN FRANCISCO - A team of citizens known as Justice Alliance announced support today for President Biden's important action to reduce the harmful trend of corporate consolidation, increase American competition, and deliver concrete benefits to America's regular folks. Today's historic Executive Order established a whole-of-government effort to promote competition in the domestic economy. With 72 initiatives to be operated by more than a dozen federal agencies, it will promptly tackle some of the most pressing competition problems across the nation.

The White House will be rolling out a new website for this effort, called the White House Competition Council.

J.A. is also working with Inspector General offices and Congress to address the "Big Tech" cartel manipulation of government funding, US Patent Office process and crony funding deals between politicians and oligarchs.

The biggest causes of anti-competitiveness in America are 1.) Cronyism, 2.) Nepotism and 3.) Big Tech Cartel black-listing, censorship, favoritism and political special interest bribes.

Politicians are paid bribes via the stock market. America must make stock ownership by politicians, and their families, completely illegal. For example, California politicians own Google, Facebook and Tesla so they refuse to stop the illicit actions of those companies.

The United States Department of Energy has demonstrated some of the worst aspects of anti-competition cronyism and efforts like this may help fix agencies like DOE that are infected with corruption.

The Justice Alliance supports today's fair competition announcement by The White House. The Justice Alliance has been working with Congress, DOJ, FBI, FTC, SEC and Inspector General offices for many years to help bring competition-equality efforts like this to fruition.

Justice Alliance is a wiki-based crowd sourced community support group.

They are not funded by any political or corporate entity. They are simply members of the public who communicate with FBI, SEC, DOJ, FTC, IG and Congress to help support the enforcement of anti-trust laws and regulations. Said David, a JA staff volunteer, "Justice Alliance is bi-partisan. The FBI and DOJ know us well, we have consulted to them on exact and specific case numbers we can quote. We are not an organization; we are citizens in America. Our mission is to help law enforcement, regulators and community groups stop corruption" He also said: "We take no money, offer no paid membership and are known to the Inspector General's office and every major government agency."

Justice Alliance helps get the FTC, SEC, DOJ and others to sue "bad guys" and put censoring, monopolistic, anti-public interest entities out of business. They claim to have a 100% success rate.

A newly formed White House council to promote competition across the US economy and lower costs for American families is holding its first meeting on Friday in the Roosevelt Room at the White House.

The White House will be rolling out a new website for this council, called the White House Competition Council, on Friday, a White House official told CNN. The group, which consists of eight Cabinet members and the chairs of seven independent agencies, was formed following an executive order President Joe Biden signed in July to promote competition within the economy.

In the meeting, National Economic Council Director Brian Deese "will drive home that promoting competition is a cornerstone of POTUS' Build Back Better agenda, and emphasize that it plays a key role in delivering on the (administration's) strategy to drive down prices for consumers," the official said.

Health and Human Services Secretary Xavier Becerra, Attorney General Merrick Garland, Transportation Secretary Pete Buttigieg and Agriculture Secretary Tom Vilsack "will present deep dives on the work they've been doing in this vein," according to the official.

"This meeting will underscore that the (executive order) was just the floor and that the President expects agencies to keep building out their competition agendas in addition to executing on the EO," the official said.

The official said agencies will be called on in this meeting to come up with new and creative ways to promote competition. As chair of the Competition Council, Deese will task each agency to come back to the council's next meeting with at least one new initiative, the official said.

In July, Biden signed a sweeping executive order to promote competition in the US economy, parts of which target a key business strategy used by Silicon Valley companies. The wide-ranging order aims to lower prescription drug prices, ban or limit non-compete agreements that the White House says impede economic mobility and cracks down on Big Tech and internet service providers, among several other provisions.

The White House also highlighted actions the administration has already taken since the signing of the executive order. The official pointed to the Surface Transportation Board working to protect competition in rail and the Federal Maritime Commission looking into surcharges that ocean carriers are charging American shippers, which the White House says drives up costs throughout the supply chain.

The Federal Communications Commission is also looking actions that shut down tenant's access to broadband options, the official said, and the Department of Agriculture is working to combat consolidation in meatpacking.

"The heart of American capitalism is a simple idea: Open and fair competition. That means that if your companies want to win your business, they have to go out and they have to up their game," Biden said when he signed the executive order earlier this summer.

"Let me be very clear: Capitalism without competition isn't capitalism. It's exploitation," Biden said.

Almost every person in America agrees that 1.) Cronyism, 2.) Nepotism and 3.) Big Tech Cartel black-listing, censorship, favoritism and political special interest bribes; have no place in The White House nor in any part of the United States Government!

TESLA MOTORS LIES AND SAFETY DEFECTS:

---- See: <http://www.gotmusked.com>

---- See: <https://dawnproject.com/full-self-driving-cars-software-at-its-most-dangerous/>

---- See: <http://tesladeaths.com>

---- HORRIBLE DEFECTS: Not everything is unicorns and rainbows when it comes to an electric vehicle, and Tesla (undoubtedly) has a few kinks to work out. However, some of these flaws have seemingly been ignored or swept away from the public eye. There are some things that are never openly admitted or speculated about Tesla vehicles, yet we harshly criticize run-of-the-mill autos with ease. Out of fairness—and for potential buyers, necessity—we should take a look at a few of the complaints that current owners have raised about these beloved EVs. -

--- AWFUL BUILD QUALITY: If you have ever experienced difficulties with a Tesla, firsthand, then you probably know better than anyone how pricey repairs can become if they're not covered by a warranty or insurance. This explains why insurance premiums are so high for these vehicles. However, the truth of the matter is that even if you're not paying to replace those parts, they are much poorer quality than we're all led to believe. If Tesla's parts were, in fact, of great quality, then we wouldn't have freak issues such as bolts rusting off after a mere few years of ownership, or falcon doors constantly misaligning themselves. Not everything on a Tesla is inherently low-quality, but Tesla is certainly cutting corners. The durability shows in the longevity of the parts and by how early rattling, squeaking, and other common problems seem to surface.

---- INSANELY EXPENSIVE TO REPAIR: Part of the appeal of buying something expensive is the expectation that it will save you money in the future. But Tesla has earned a spot in the hall of fame for overpriced vehicles, and that doesn't just apply to the sticker price but also takes into account all the maintenance costs that plague owners. Even though the Tesla's don't need oil changes, spark plug replacements, or oil filters, Tesla recommends drivers invest in their maintenance plans that include a thorough inspection of the vehicle every 12,000 miles. The prices vary based on the year and model of the car, as well as which specific plan the driver chooses, but standalone inspections range anywhere from \$475 to \$750 per visit (not including repairs). A four-year maintenance plan is around \$2,500. Needless to say, you'll need to have a good chunk of change set aside for these evaluations. Issues extend to tires and poor suspension, and yes, we will certainly mention the battery. -

--- EXTENSIVE STEERING FAILURES: It's true that Teslas tend to carry a bit of technological baggage with their state-of-the-art devices. Most of it is just annoying more than it is dangerous, but rest assured, Tesla has also managed to squeeze in a few mechanical problems as well. They've been much less common than the cosmetic flaws but can have life-threatening outcomes. A few new Tesla owners have experienced problems with the steering wheel locking up while turning. Not only will you see your life flash before your eyes, but you may be dismayed to find out that several weeks of repairs are typically involved since it's not an issue that Tesla has completely resolved. This is before we even bring to light the new "yolk" steering wheel in the Model S Plaid.

---- YOU CAN NEVER GET YOUR CAR BACK FROM THE SERVICE CENTERS: Speaking of car troubles, Tesla dealerships are so sparse that many owners are forced to plan out their trip to the service center much more thoroughly than the average driver would. Unfortunately, the plight with their new Tesla's can sometimes be uncharted territory for mechanics—this is a relatively new technology, after all—so it may take several days, and sometimes even weeks, before owners get to see their cars again. What's worse is that many of these technical difficulties aren't fully resolved during the first visit. Like we've said before, there isn't much knowledge on electric vehicles and technicians may not be as familiar with the problems that plague these vehicles, primarily because a Tesla operates more like a computer than it does an old gas guzzler. -

--- TESLA CARS SPY ON YOU: Teslas are incredibly connected... to the point that they're able to (potentially) predict when you plan to drive them and what routes. Elon hasn't been known for respecting privacy and his first

company, PayPal, has even been in lawsuits for it. All respect to his technological advancement, but consider what a man creating a chip for your brain is trying to do with your car! Face recognition, video sharing with or without consent, and Tesla monitoring your driving history and patterns are all open for discussion and unless you dig really deep or have a law degree, you might not be safe. If you're a criminal or just worry about being watched, this is one of the last bit of tech pieces you would want. Some have even raised red flags over issues of hacking Teslas for a new world of issues. -

--- THE EMERGENCY RELEASE WILL SCREW YOU: It may seem like a nitpick (and it is) but the terrible placement of the emergency handle is also a potential threat to the car and therefore, it's a necessary point to bring up. Since Tesla's vehicles don't have your average door handle and everything in the car is electric, the manufacturer was witty enough to install an emergency handle on the interior to prevent passengers from getting trapped inside. There's just one little flaw with this idea: the placement. Since new passengers aren't used to the high-tech vehicle, they tend to go for the emergency handle instead of using the standard electric button that opens the door. This is an honest mistake since the emergency handle is near where a door handle normally would be, but if it's pulled too often it can and will crack the window. And that's the last thing any Tesla owner wants to deal with.

---- DEADLY BLIND SPOTS: Another feature that is seen in many modern-day vehicles (electric or not) is blind-spot detection. This is a nice touch to have and is practically expected on a high-end vehicle these days. The only thing that separates Tesla from other manufacturers that are employing blind-spot detection is the placement of the detector. Similar to the difficulty that people have seeing the speedometer, the blind-spot detection doesn't alert drivers of a threat on the side-view mirrors like most vehicles do. Instead, a notice pops up on the touchscreen. A lot of people have something against the touchscreen and, while we don't find it to be all bad, there are instances such as this one when it's understandable why it can become a nuisance. If every feature is integrated into the touchscreen, it seems like the entire car revolves around a mounted iPad. -

--- BAD COSMETIC DETAILS: Have you ever bought something nice only to have it experience defects shortly after? If you've put a good amount of cash into it, it's not only inconvenient but also extremely frustrating. Proud Tesla owners have been extremely let down to find that their overpriced electric vehicle has scratches all over their car and bulges in the windshield. These unfortunate Teslas were born with cosmetic defects from the factory. Clearly, the newbie manufacturer hasn't been able to get the assembly process down yet. Waiting out the initial wave of manufacturer defects would be wiser than jumping on a waiting list for the latest and greatest model.

---- BATTERY REPLACEMENT IS A NIGHTMARE: Along with the sketchy aspect of having an electric vehicle, there's also a major setback on the cost to repair it as well. While a charge may not be so pricey, the cost to replace any of the parts on a Tesla can really become a burden. For instance, if you had to buy a new battery for a Model 3, the base would cost around \$9,500 (on the low end) and the extended-range battery would come close to \$16k. Sadly, that's as much as a used car (maybe even a few). There's a domino effect with these overpriced repairs as well, as the price to insure a Tesla tends to be more than the average vehicle. The high rate of accidents in Teslas is partly to blame, but their expensive repairs are no help. -

--- THERE ARE NO DEALERSHIPS AROUND TO HELP YOU: Tesla has just recently begun opening service centers in areas with a large amount of foot traffic, but the idea of dealerships is a concept of the past for Tesla. Following a completely different business model from the traditional car manufacturers, Tesla sells its cars directly to its customers through their own small, intimate stores. This allows Tesla to educate the customers on what exactly they're getting into with an electric vehicle and to choose precisely how they'd like their car to look. Of course, it takes months for customers' vehicles to be delivered, but this still allows them to get exactly what they want. It also means that Tesla makes money off of their cars, while traditional dealerships make money from their service departments. The drawback for a Tesla owner is that these are located, largely, in metropolitan areas and so are the

service centers. Unlike traditional dealerships that are in every town, Tesla selects store and service center locations based on foot traffic.

---- TESLA'S AUTOPILOT CAN KILL YOU: Tesla's autopilot has been known to get people in trouble, napping, reading, and working on the freeway. The fact is, there's still no legal protection for someone to sit down and be driven away. Thought Tesla gets close with tools like "tow mode," allowing for an empty car to follow another Tesla with some limitations. Legally you still need to keep your hands on the wheels and be alert, despite the statistically safer autopilot driving and advancements in technology. While a truly autonomous car would open up a new world; safe transport for the elderly, fewer fatalities, easier commutes, and the like, we may be a few major traffic law changes away from that world, and Tesla can't change that yet. -

--- COLD WEATHER KILLS YOUR TESLA: There are so many common glitches that go on with a Tesla that drivers have become paranoid of serious troubles, especially anything involving that precious battery. If you haven't tested one out in cold weather, don't be alarmed at that slow acceleration, it's normal. Yep. If you buy a \$35,000 (and up!) vehicle, you can expect that the cold air will affect the battery just like it would any other vehicle. But cold prevents the battery from regenerating as quickly as it typically would, which limits the driver's ability to move faster. It sounds simple in retrospect, but it can be a frightening few minutes for a Tesla owner to discover their car is having trouble moving quickly.

---- ABOVE ALL ELSE: Tesla's battery system is the worst designed, most deadly, awful power system in history! IT WILL KILL YOU AND BURN YOUR FAMILY ALIVE, LIKE IT HAS DONE TO MANY TESLA VICTIMS

---Also see the additional Tesla issues, above, involving 'rare earth mines', 'lithium battery dangers', 'Elon Musk's constant use of "hit-men" and character assassins' to destroy competitors and reporters, the vast racism and women abuse and the dead workers poisoned in his battery factories around the globe.

AFGHANISTAN RARE EARTH CORRUPTION CREATED BY MUSK AND HIS SILICON VALLEY TECH CARTEL:

---- LITHIUM ION BATTERIES BECOME MORE AND MORE LIKELY TO EXPLODE AS TIME GOES ON AND AS THEY AGE; "Bad Guys" have figured out how to make them explode remotely; have their dangers hidden by CNN and MSM because pretty much only the DNC people profit from them; are the heart of Elon Musk's stock market scam. The Obama Administration promised Silicon Valley oligarchs the market monopoly on lithium ion batteries and the sabotage of fuel cells in exchange for campaign financing and search engine rigging; United States Senators that are supposed to protect us from these deadly products own the stock market assets of them so they protect them and stop the FDA, OSHA, DOT and NHTSA from outlawing them.

DEPT OF ENERGY CRONY SLUSH FUNDS SCAM CREATED BY MUSK AND HIS CRONY CARTEL:

Trillions of dollars of stock trades and direct payola bribes were exchanged using the White House as a broker and the United States Department of Energy as a stock market manipulation platform. ---- That's right! Your public officials use federal agencies as dark-money laundering operations for their friends.

---- If you are Democracy: You were broken! ---- If you were a tech mobster: You made out like a bandit!

---- The Solyndra taxpayer, technology, financial and political disasters that began during the corrupt reign of Steven Chu and Jennifer Granholm at the Department of Energy typified the overt, organized crime, corruption and crony malfeasance of the public funds. -

--- This trend was created via the back-door deals between 1.) the U.S. Department of Energy and audacious kick-back schemes created by 2.) Silicon Valley campaign financiers and the 3.) White House. This is the story of the

racketeering schemes and scams that set out to steal trillions of dollars of taxpayer cash, in plain sight, under the cover of a national “economic” or “health” emergency “stimulus” scam.

---- They attacked citizens who report their crimes to federal police. They also attack citizens who make products that obsoleted their products at Facebook, Google, Tesla, Netflix, etc. These corrupt politicians attack citizens using taxpayer-funded state resources. That is a felony violation of the law. The ongoing cover-up of these crimes and attacks is also a felony violation of the law. The victims are owed damages compensation, witness fees and back-pay

THE ELON MUSK PERSONAL PSYCHOLOGY REPORTS:

What a twisted, raging, sick pervert, narcissist, vengeful, anticompetitive, monopolistic, Goldman Sachs sucking mobster hit-man hiring mobster!

---- Elon Musk, Larry Page, Steve Jurvetson and Jared Birchell hire Ex-CIA losers right after they are fired by the CIA, or directly from IN-Q-TEL or from Fusion GPS, Media Matters and other CYBER ASSASSIN KILL SERVICES. They send their hit men after competitors, reporters, ex-employees and whistle-blowers because they chose to CHEAT RATHER THAN COMPETE!

---- Elon Musk’s “Twitter Purchase” is just a scam to sell his Tesla stock without the SEC or his old investors noticing: THEY NOTICED!

--- Elon Musk is notorious for getting Department of Energy money by bribing public officials and placing his friends: Steven Chu, Matt Rogers, Steve Westly, Steve Spinner’s ‘special friend’, etc. on the staff of the Department of Energy and in the White House. We have FBI-class records, financial tracking, emails, stock market relay records and other forensic data that proves it. -

--- We can swear, warrant, certify and prove these assertions in front of Congress in a live Congressional hearing or Civil Jury trial, given non-compromised legal backing. If you think you have bribed the same number of Senators, bought a President and taken over most of the Department of Energy like Musk did... go for it! In this day and age, with every citizen able to track every public figure, with FBI-quality databases, on their home computers, it might be a crash-and-burn but you are welcome to try.

- His mother 'dated' all the white rich guys in South Africa while his father got his own daughter pregnant, killed some black guys and ran mining companies that treated blacks like slaves. Musk is the WHITE PRIVILEGE poster boy. His whole family are crooks, sex abusers and elitist bitches!

ELON MUSK'S LITHIUM BATTERY LIES:

Elon Musk and the Senators he owns: Pelosi, Harris and Feinstein, will lie, until their dying day about these batteries that they all own stock in!

---- Lithium ion batteries: Cause wars, rape and genocide in the Congo, Afghanistan and Bolivia from the corrupt mining deals involved with mining lithium and cobalt; are insider trading-owned by ex-CIA boss Woolsey and DOE Boss Chu; excrete chemicals that mutate fetuses when they burn; destroy your brain, lungs and nervous system when they burn; kill the factory workers who make them; cause Panasonic to be one of the most corrupt companies in the world; poison the Earth when disposed of; can’t be extinguished by firemen; poison firemen when they burn; are based on criminally corrupt mining schemes like URANIUM ONE; Have over 61 toxic chemicals in them; come from an industry that spends billions on internet shills and trolls used to nay say all other forms of energy; are insider-trading owned by corrupt U.S. Senators who are running a SAFETY COVER-UP about their dangers.

---- Apple products with lithium ion batteries have been exploding and setting people on fire; over time the chemical dendrites inside each battery grow worse and increase the chances of explosion as they age – LITHIUM ION

BATTERIES BECOME MORE AND MORE LIKELY TO EXPLODE AS TIME GOES ON AND AS THEY AGE; “Bad Guys” have figured out how to make them explode remotely; have their dangers hidden by CNN and MSM because pretty much only the DNC people profit from them; are the heart of Elon Musk’s stock market scam.

IN FACT...

...there are thousands of other HARD FACT reasons why Musk and Tesla don't deserve to be in business. If you are a media shill you won't want those news items disclosed. If you are a Silicon Valley Big Tech douche bag, you don't want those reasons disclosed. If you are an honest realist, you will demand the the government SHUT MUSK DOWN!

This web page is "wired", using comparative AI analysis software, to act as evidence proving that Google, Facebook and other tech companies manipulate server access and search results to help themselves and harm their competitors in violation of anti-trust laws and human rights standards. 48 hours after we confronted the White House press officers: Robert Gibbs and Jay Carney with our FBI-produced evidence, they were gone from their positions. The same for Secretary of Energy Steven Chu. The same For NHTSA boss David Strickland. Then AG Holder. Then Sara Winslow, the DOJ Chief of the Civil Division. It has happened over 100 times. Every corrupt government executive that reviews our evidence gets fired or forced to resign because our evidence is rock solid and people from FBI, GAO, CIA and Congress put that evidence together. Dirty politicians might have their insiders inside all of the government agencies but we have ours that: 1.) protect us, 2.) spy on the bad guys 24/7, 3.) outnumber the corrupt ones by 20:1 and always get their targets! Good always finally triumphs over evil!

FOOTER - Protections: Public Domain. Non-Commercial. Fair Use. Freedom of The Press. No Tracking Of Public Allowed. First Amendment Protections, SLAPP, UN Protected. GDPR Compliant. Section 203 protected. Privacy Tools At: <http://privacytools.io> ACLU, ICIJ- supported. If you sue us to try to hide and censor the news, you are allowing us to bypass the demurrer process, and we will counter-sue you for RICO, Anti-trust, Political Bribery, Sex Trafficking, Interference, First Amendment and your other crimes, which we have FBI-grade evidence for! Bring it on corrupt Tesla, Google, Facebook, Youtube, Netflix! We might even get DOJ and/or FTC to partner with us (again) to take your filthy corrupt companies down!....REAL NEWS does not have ads in it. Any news source, with ads in it, is fake news manipulated by the advertisers!....

Internet dating sites abuse their users in the most horrific ways. Be aware of these public reports, about some of the worst ones, before you go online. Know these facts, avoid naivete and be safe by reading this critical info. In your exploration of the sociology of modern dating, you will discover things about how the whole world works as well.

Our modern world, The Silicon Valley control of social media and dating sites and the culture of Big Tech data abuse has brought about the issues discussed here. If you are hoping to find out "who pays for the first meal?" , you will, in spades, but you will also find out why that is even an issue and who the people are (mostly Big Tech oligarchs) that made it an issue.

Your grandparents never had to deal with the things discussed here because the internet did not exist when they were around.

In fact, EVERY, corporate internet dating site is now a fake-profile-based, privacy harvesting, political spying, computerized scam service operating off of your emotional vulnerability in order to profit off of your basic needs. Dating site user data is worth billions and billions of dollars to political parties, corporate marketing companies, government agencies, your business competitors and others. A large number of the pictures are dead prostitutes and dead soldiers from Russia. Dating sites publicly say that they 'fight fake profiles' but privately they encourage fake profile providers because they make vast amounts of money using fake profiles to sucker-in new users.

Covered herein you will find: A Marriage Manual, A Pre-Nup, Online Security Notes, Detailed Issues about Online Dating, Tips And Comments From Most Online Dating Users, Scammer Warnings, Different Ideas of "Dating Rules" From Various Demographics, The Dating Site Hooker Tsunami And More...

The obvious question is: "If dating sites are so bad, why use them?" A quick reality check soon reveals the answer via the state of society: THERE IS NO OTHER OPTION THESE DAYS! You can't find and meet other single people in any other modern venue any more. You could in the 1950's. In the 2020's you can't. Nobody trusts strangers in public. If you go up to a stranger you risk getting maced, charged with stalking, being called a pervert, recorded on camera, posted on the web or other risks.

According to: <https://www.reddit.com/r/OnlineDating/>

"...the worst abuse you can cause yourself to endure is to try to date in San Francisco and Silicon Valley.

Generally: The goal of most women in the San Francisco Dating scene is to bag a Big Tech billionaire and get a mansion in the hills and share his AMEX black credit card for Stanford Shopping Center trips. The goal of most guys in the Bay Area is to get sex and then trade up for a younger model a few months later. There are exceptions to this generalization but online date users in the Bay Area, that have been online for over a year, can confirm that this is accurate.

Everyone on Bumble, Tinder, OK Cupid, Match.com, E-Harmony and the other corporate dating cartel sites, never take their profiles down even after getting a partner. They all say that they "want to keep their options open"... BUT in the Bay Area everyone always 'keeps their options open'...FOREVER! Users of dating sites have seen many of

the same people on the site for over 20 YEARS!!! This inability to let go of the grass-is-always-greener-on-the-other-side-of-the-fence syndrome causes users to be caught in a dead-loop of social dysfunction. Everyone assumes that 'the next one will be richer, cuter, funnier, more employed, etc.' and they are always, always wrong to think that they will find a "perfect" person. Every single person has an addiction, mental problem, sex issue, hygiene or snoring issue (or other bad thing) that you will never find out about until years after you marry them. Just pick the next one and work hard to make it work.

In the modern world, there is no way to meet singles without the internet and corporate exploiters like IAC, Inc., Match Group and other 'vagina vultures' knowing that they can openly sucker you, in plain sight, and get away with it. In America, the FTC, and other agencies, never punish them because they pay politicians big bribes. President's family members and staff own stock in these companies.

By using dating sites, you instantly embed yourself in a horse-race against a vast army of competing guys or gals where only the hottest, richest, funniest, most socially adept will win. Because these other people are forever competing for perfection, their relationships never last and they date for decades without end. Their STD rate is ten times higher. Their demands are ten times higher. Their expectations are ten times higher. Their dopamine addiction rate is ten times higher. Their commitment rate is ten times lower because they know they can just try-the-next-one if they are displeased.

"People that work at dating site companies are either out-sourced data entry contractors from Asian regions and/or college age kids with no comprehension of how life really works. They are usually bored at work so they read all of your emails and text messages. If you mention something political that goes against their zealotry then you get your sexier potential dates replaced with fat people or you get your profile shadow-banned. In fact, if you mention anything that one of these influencer-beholden, naive, worker bees does not agree with, you get shit-listed. Just remember this: if you typed it on a dating site, it is archived and searched on all the dating sites shared databases FOREVER!"

Help put all of the online dating sites and apps OUT OF BUSINESS for abusing their users and exploiting their privacy and emotional rights. Demand a common open-source public dating site!

U.S. Spy Agencies Know Your Secrets. They Bought Them, Or Hacked Them, From Your Dating Sites And Apps (Link)...

Lonely singletons posting \$100,000 dating 'bounties' to anyone who can help them find a life partner

A select sort of 'tech bro' is offering a 'bounty' to the person who finds them a long-term partner.

Remember the old adage 'money talks and wealth whispers'? Not many do. Or so I think after a cursory scroll through TikTok.

The social media platform is rife with get-rich gurus boasting about their bank balances, but an insidious subset of these are often the most popular. Their top tip to a luxe life? Get rich not by earning it but by marrying it.

One, Dixie D'Amelio, a 22-year-old influencer with a 57 million strong fanbase, went viral for a video in which she complains about having to work and decides she is going to 'marry rich' instead. She is not the only one. The hashtag How To Marry Rich has 3.9 million views on the platform and an entire online industry loudly promising to help aspirants do exactly that.

I am not naive. Dixie and her ilk are not the first with plans to marry for money. But the advice was once whispered about discreetly. That civility is lost in today's subtitled TikTok videos.

But it's not just that they're indiscreet. They are also plain wrong. Marrying for money alone simply doesn't guarantee happiness, and I should know because I live my life among women who have done it.

One might imagine being described as a 'trophy wife' would be flattering, with all its connotations of decadent glamour, writes Shruti Advani (pictured). Instead, the first time I was assumed to be one, I was stung by how vacuous people assumed me to be until they asked me what I did.

I grew up with what is now fashionably referred to as 'privilege'. And yes, notwithstanding the occasional rough patch, the years have been kind.

My husband knows I have always valued financial independence, and sacrificing it for a life of leisure never tempted me. Of course, I've enjoyed the holidays to the Maldives via the first-class lounge, the Knightsbridge

boutiques and the Michelin-starred lunches, but I have never pursued that lifestyle for its own sake. And I have never relied upon a man for it.

Had I ever been tempted to give up my own earning power, the prejudice and derision levelled at the women in that situation would have angered me too much for me to truly enjoy it.

One might imagine being described as a ‘trophy wife’ would be flattering, with all its connotations of decadent glamour. Instead, the first time I was assumed to be one, I was stung by how vacuous people assumed me to be until they asked me what I did.

I’m a writer, specialising in financial journalism, but all too often people won’t bother to ask. A woman who ‘marries rich’ as the TikTokers so ruthlessly advocate, loses her own identity and becomes just another part of her husband’s entourage instead.

I remember a man who parked in a resident’s bay outside my house in Kensington, telling me as I asked him to move on: ‘Don’t borrow the husband’s car unless he shows you how to park it, love.’ At an art gallery in St James’s, I was told it was fine if I wanted to reserve a piece until my husband had okayed it.

A salesperson at a furniture store on the King’s Road helpfully pointed out they were open on the weekend when my husband might be free to pop in and approve my picks. The list of minor humiliations is long.

Of course, this may sound irrelevant for thrill-seeking young girls seduced by the glamour of a wealthy man. Why do they care what others think as they flash their husband’s cash and never have to put in a day’s work? But let me add a word of caution.

I have known many Cinderellas in my lifetime and few, if any of them, get their happy ending. Yes, it might seem to start well. The summer wedding at a Tuscan castle is, indeed, straight out of a fairy tale, as is the couture dress and a ten-carat diamond ring.

I’ve known women whose husbands have given them £10,000-a-week spending money over the lifetime of the marriage.

What riches won’t buy, of course, is emotional stability or peace of mind. Neither for them nor their husbands. The near-constant dread of not being good enough or being replaced by someone who is better ensures neither party is happy.

It is often only a matter of time before private detectives are hauled in to follow spouses, or lawyers brought in to follow the money. When you take a transactional approach to relationships, you are asking to be treated like a commodity.

Inevitably, it starts to go wrong. And when the money tap is turned off, more desperate or inventive measures are sometimes required by women who marry for money and do not earn their own.

I recently learned of a shop on the Brompton Road that offers cash for designer handbags, bought at one of the many luxury boutiques in the vicinity. Wary of leaving a digital trail for their husbands to follow, women can walk in with a Hermes or Chanel handbag worth thousands of pounds, paid for with his credit card, and leave with cash.

Those who need to can build up quite a nest egg in this way, without a husband (or more likely, his accountant) becoming suspicious. It is a chilling reminder of the indignity of financial dependence and an iron-clad prenuptial agreement.

Because what Dixie and her fans must also recognise is that it is one thing to marry for money, and quite another to hang on to it should you get divorced.

Worrying as this is for the women in question, I am also concerned for the men who are knowing or unknowing participants in this tawdry trade.

As a mother of two boys, I baulk at the idea of a prospective partner who sees them as little more than a lifestyle upgrade, even though neither is old enough to date yet.

If I suspected someone was after my boys for their money, I would rather write a cheque and send the young woman packing.

That may sound harsh (and just a little neurotic) but in the long run it will save both parties from the hassle and the heartbreak. My advice to young men is the same as it is for young women. Marry because you want to, not because you want to impress people.

If none of this persuades the young women of TikTok not to follow through on their ‘marry rich’ plans, I suggest they work on developing Kardashian-levels of self-confidence.

Without it, they may find themselves losing their grip on reality as well as their prize catch. Imposter syndrome is as crippling for the woman in the bedroom as it is for the one in the boardroom.

Every look and every word said to them will trigger insecurities fed by the fear — nay, belief — that they do not belong. That they are not living up to the standards they imagine they are being held to. There is an accompanying frenzy to be thinner, prettier, politer, funnier — whatever it is that you think will help you finally fit in.

Dixie D’Amelio, a 22-year-old influencer with a 57 million strong fanbase, went viral for a video in which she complains about having to work and decides she is going to ‘marry rich’ instead

To feel like you deserve your newfound status and therefore are more likely to keep it. It’s a cruel game and ultimately an unsuccessful one. The women caught in it put themselves through an unrelenting regimen of grooming and self-improvement, and are always running faster to stay in their place.

Some pay to foster this self-confidence. In London, as in New York or Beijing or Dubai, there are enough psychics, personal trainers, aestheticians or etiquette coaches to help vulnerable young women become the version of themselves they think they need to be, while relieving them of thousands of pounds in fees.

It’s all a sham. These women are told that confusing a pastry fork for a dessert spoon or asking for the toilet instead of the loo are the kiss of death for any status seeker. But the truth is much less complicated. Be who you are, and the world will accept you for what you are.

In fact, a lack of pretence will often get you a place at the table — quite literally in the case of one friend.

She is one of the most charming women I know, one who had a short-lived career in entertainment before she married a very successful and wealthy producer.

I was completely disarmed when — on a night out together — she congratulated the manager at a smart restaurant in Piccadilly for its success, saying: ‘The past five years have been good. I have gone from waiting at these tables to eating at them and you have added another [Michelin] star.’

No one present thought anything less of the woman. Indeed, we laughed along with her, happy for her good fortune. Her lack of pretence showed she had the one thing money cannot buy: authenticity. It was clear to everyone at the table that night that she married for love, not cash.

When you do get something wrong, which all of us do regardless of whether we went to finishing school or failed to finish A-levels, how you handle the situation is most telling.

It's often thought that posh people are obsessed with status and who they let in or keep out of their tribe. But this isn't true either. They do not lay tripwires across their estates, lying in wait for the next person to pronounce the 'g' in Magdalene.

Kindness or good manners prevent most people from making a point of another's real or imagined shortcomings. And good manners, like almost everything else in life, come easily to those with healthy self-esteem. A chip on the shoulder, rather than an improper accent, is the undoing of so many in this world.

So, my advice for those TikTokers who cannot be put off the pursuit of a rich man is to focus on bolstering their self-esteem. Without it, young women can feel threatened or exposed and turn defensive.

I've heard them lash out with passive-aggressive comments of the 'I could never wear that, but it is lovely on you' variety. Others go all-out nuclear. They put down a person or a place because they fear their lack of knowledge will expose their humble beginnings.

'I cannot believe you are going to the Maldives for Christmas again,' is one I heard most recently. Perhaps they feel being condescending goes with the territory of being wealthy. It doesn't. It's a hackneyed and inaccurate prejudice about how wealthy people behave. This approach is tiresome and also guaranteed to alienate the very people whose approval an aspirant craves.

Ultra-high net-worth individuals do not cultivate friends — or romantic partners — because of their perceived usefulness to them either.

They're not looking for a prospective wife who speaks Mandarin or plays professional tennis. When they want to make a connection for work, they have business networks on hand to help. When they want an invitation, whether it is to a private island or on a trip to space, they reach out to their concierge.

For all the messy things in between, they want a partner in the truest sense of the word. But then so do we all.

It's a point aspiring billionaire wives would do well to remember as they follow the latest step-by-step guide to bagging a billionaire. My top tip? Opt for the man who makes you happy, not the one you think will make you rich.

Online Dating apps so bad, abusive and privacy harvesting that speed dating is in again...

As proven by scientific statistics, a majority of the "people" you will encounter on Match.com type dating sites (ie: Match, Zoosk, EHarmony, Tinder, Bumble, etc.) are:

- 1.) Russian scammers,
- 2.) Guys pretending to be girls,
- 3.) Robotic software seeking to scam you,
- 4.) Narcissists, who will never meet you in-person, seeking self-validation,
- 5.) Sex workers,
- 6.) Gold diggers,
- 7.) Free dinner seekers,
- 8.) Recently broken-up people who are addicted to their past partner and will, eventually, go back to them,
- 9.) Oxytocin/Dopamine brain chemical junkies,
- 10.) Single parents looking for a new person to pay the mortgage,

11.) Trans-sexuals trying out their look to see if they can fool you,

12.) Marathon daters going out with a different person every night to see which one can buy them the best dinners and show tickets and other non-qualified subjects.

THE MATCH.COM-TYPE DATING SITE WORLD

This collaboratively edited report was created by the public to educate the rest of the public. It will horrify you, shock you, amaze you, enlighten you and clearly illuminate the fact that Match.com is truly breaking all of the rules of morality.

Most people that sign up for Match.com, or it's clone online dating sites, cancel it within a few weeks because of the trauma of trying to wade through the terrible things that happen to users of the system.

Every Match.com online dater is looking for: marriage, sex, free food, money, social revenge, distraction, entertainment, narcissistic validation, arm-candy, friends, a baby-daddy or related goals. The corporation, though, behind Match.com, is only looking for one thing: Your digital and political data.

Let's take a deeper look at Match.com as our writers go deep under-cover inside Match (including working undercover in their offices) ...

Who Is Match.Com? Match calls itself an "online dating service", but it is really a spy operation, with web sites serving over 50 countries in twelve languages. Its headquarters are in Dallas, Texas. The company has offices in Dallas, West Hollywood, San Francisco, Tokyo, Rio de .

The Match consortium sells it's data to the CIA, FBI, NSA, IRS, DEA and DNC via Axiom and other data brokers. The USPS social media surveillance service uses it to hunt political party members who oppose the Obama Administration.

While you may know that Chelsea Clinton sits on the Board of IAC, the whole tale is much more sordid.

In 1993, Match.com was founded by Gary Kremen and Peng T. Ong in San Francisco. At the beginning, Match.com was the name of the website, while the company that operated it was formally named Electric Classifieds Inc.

[2] Early on, Kremen was assisted by Ong and Steve Klopff, who helped in the design of the initial system, and Simon Glinsky, who co-wrote its business plan, developed product designs including matching criteria, services to LGBT communities, created business models and rollout marketing strategies and made early hires.

[5] Fran Maier later joined the company as its director of marketing. According to a retrospective from The Atlantic, Maier helped to implement Match.com's business strategy, which included a subscription model and the inclusion of diverse communities, including women, technology professionals, and the lesbian, gay, bisexual, and transgender communities. Match.com went live as a free beta in early 1995, and was first profiled in Wired magazine that same year.

Gary Kremen and Steve Klopff are shown in California public records as 2544 Re, LP which is a California Domestic Limited Partnership filed On April 13, 2007. The company's filing status is listed as Active and its File Number is 200710300012.

The Registered Agent on file for this company is Steve Klopff (Later with the highly sexually driven IDEO design group, where staff members sleep with each other) and is located at 23 Jules Avenue, San Francisco, CA 94112. The company's mailing address is 23 Jules Avenue, San Francisco, CA 94112.

The company has 2 principals on record. The principals are Gary Kremen from San Diego CA and Steve Klopff from San Francisco CA. Gary Kremen was marketing SEX.COM.

From its very roots, perversion and dirty money fueled the fires.

David Lawlor published a report about how the sick story of early Match.com as Sex.com reads like a bad Hollywood movie script.

The California public records record: "Kremen, Father & Partners, LLC is a California Domestic Limited-Liability Company filed On May 13, 1999. The company's filing status is listed as Canceled and its File Number is 199913710035.

The Registered Agent on file for this company is Philip Father and is located at 50 California St, Ste 2000, San Francisco, CA 94111. The company's principal address is 50 California St, Ste 2000, San Francisco, CA 94111 and its mailing address is 50 California St, Ste 2000, San Francisco, CA 94111.

The company has 2 principals on record. The principals are Gary Kremen from San Francisco CA and Philip Father from San Francisco CA." Philip Father And Gary Kremen had a Victorian building on 3rd Street in the Portrero Hill neighborhood in San Francisco, not far from Nancy Pelosi's "Goat Hill Pizza". All of their files got leaked. So the story goes...

Boy gets domain name, boy loses domain name, boy gets domain name back. Add in millions of dollars flying about, a possible run-in with Mexican authorities and, naturally, a climactic courtroom finale.

But real life is always stranger than fiction, and the case of Gary Kremen versus Stephen Michael Cohen et alia is no different. No movie could fully reveal the oddities and quirks of the case of the disputed Sex.com domain name.

A trial in a San Francisco court Thursday will bring the two men together, both hoping for very different endings to the tale.

The story begins in 1994 when Gary Kremen registered the name Sex.com with domain name registrar Network Solutions (NSOL), for free and without any official contract -- the way things were often done in the early days of the Web. At the time, the Internet was in its infancy -- Amazon.com (AMZN: Research, Estimates) was still a year away.

After successfully launching the online dating service Match.com, Kremen turned his entrepreneurial attention to Sex.com. He hadn't developed a Web site to accompany the Sex.com nomenclature immediately after registering it. The domain name had sat empty.

While Kremen was busy developing his online dating service and registering Sex.com, Stephen Michael Cohen sat in federal prison serving a 42-month sentence for bankruptcy fraud. The prior felon had orchestrated a number of impersonation and deception schemes in the past. Cohen finished his bankruptcy fraud term in February 1995, and left federal prison.

Then the tale's first plot twist began. In October 1995, Network Solutions received a letter from a company called Online Classifieds Inc. stating that control of the Sex.com domain name was to be turned over to Cohen. The writer of the letter is listed as Sharyn Dimmick.

Dimmick, who was Kremen's roommate until April 1995, did not know Cohen, says Kremen's lawyer Pamela Urueta of San Francisco-based Kerr & Wagstaffe LLP.

Network Solutions obliged and transferred control of the domain name to Cohen.

Following the transfer, Online Classifieds Inc. informed Network Solutions that all correspondence would have to take place via mail or telephone -- because Online Classifieds Inc. did not have Internet access, Urueta says. Online company, no Internet access.

Following the transfer, Cohen developed the Sex.com Website and turned it in to a multimillion dollar venture. How many millions? It's hard to tell, because Cohen has refused to supply the court with accounting information for the Web site.

But the online pornography sector averaged \$2.7 million per day in earnings in 1999, according to a U.S. House of Representatives report. The Internet pornography industry also represents the most consistently successful e-commerce product on the Web.

On November 10, 2005, a class action was filed by Matthew Evans against Match.com in federal court in Los Angeles alleging that Match.com employed fake members to send emails and go on dates with paying members. The suit was repudiated by IAC as baseless, and was later dismissed by the United States District Court for the Central District of California on April 25, 2007. Similar suits were filed in June 2009 and December 2010, with the judges ruling that Match.com did not break user agreements.

Do you see the trend here, yet? Match.com was forged in creepiness and built on slime-ball people with sinister motivations.

In January 2006, Match.com hired Dr. Phil McGraw as a celebrity spokesman.

Gen Z's 'sexual apocalypse': How youngsters looking for love are 'pretending to be woke' to win dates - 'dating right now is like walking on eggshells'

Gen-Zers are struggling to meet dating candidates of the opposite sex who accept their political views - so they're masking their true thoughts.

In February 2021, Match Group acquired Hyperconnect, a technology company based in Seoul, Korea, for \$1.73 billion.

In February 2009, IAC incorporated Match Group as a conglomerate of Match.com and other dating sites it owned. [18] Also in February, it was announced that Match.com's European operations would be sold to Meetic for 5 million Euros and a reported twenty-seven percent interest in the company. At the same time that this sale was announced, the current CEO Thomas Enraght-Moony stepped down, while IAC's (Match.com's parent company) Executive VP and General Counsel, Greg Blatt, took his place.

In July 2009, Match.com acquired People Media, which powered AOL Personals and operated BlackPeopleMeet.com and OurTime.com, from American Capital for \$80 million. The following year, Match.com acquired SinglesNet, another dating site.[22] In December 2010, Match.com's CEO Greg Blatt was made CEO of parent company IAC.

In 2012, Match.com bought OkCupid, and Sam Yagan, OkCupid's co-founder and CEO, became CEO of Match Group. That same year, Match.com announced Stir, an events service that was to offer local events each month for Match.com members to attend.

In April 2014, Match.com launched an updated mobile app with a feature called "Stream" which used location to match people based upon photographs, using similar algorithms as the mobile dating app Tinder. The platform's membership auto-billing method has been criticized by customers for the lack of transparency.

In 2017, Yagan was replaced by Mandy Ginsberg as the CEO of Match.com's parent company, Match Group.

A woman claiming she was raped by another person she met on Match.com sued the site in 2011. The woman and her lawyer wanted Match.com to start doing background checks on their users in order to prevent registered sex offenders from using the site. Match.com has responded that it would create many problems trying to get

background information from all their users. Days after the lawsuit was filed, Match.com announced that the site would begin screening new members.

From 2011 to 2014, a man described by British police as a “sexual predator” contacted thousands of women through the website. He raped five of them. In March 2016 Derby Crown Court heard that four of the victims complained about the man to Match.com; one of the women was told that administrators could not do anything because he had not sent abusive messages through the site.

IAC is an American holding company that owns brands across 100 countries, mostly in media and Internet. The company is headquartered in New York City and incorporated in Delaware. Joey Levin, who previously led the company's search & applications segment, has served as Chief Executive Officer since June 2015.

IAC's largest shareholder, Liberty Media, exited the company in 2010, following a protracted dispute over the 2008 spinoffs. Liberty traded its IAC stock for \$220 million in cash, plus ownership of Evite and Gifts.com. On the same day, Diller stepped down as CEO, though he remained as chairman and Match.com CEO Greg Blatt was appointed to succeed him. That same year, IAC acquired dating site Singlesnet and fitness site DailyBurn.

In January 2013, IAC acquired online tutoring firm Tutor.com. On August 3, 2013, IAC sold Newsweek to the International Business Times on undisclosed terms. On December 22, 2013, IAC fired their Director of Corporate Communications, Justine Sacco after an AIDS joke she posted to Twitter went viral, being re-tweeted and scorned around the world. The incident became a byword for the need for people to be cautious about what they post on social media.

In 2014, IAC acquired ASKfm for an undisclosed sum.

November 2015, IAC and Match Group announced the closing of Match Group's previously announced initial public offering.

In May 2017, HomeAdvisor combined with Angie's List, forming the new publicly traded company ANGI Homeservices Inc. The company made its stock market debut in October 2017. In October 2018, the ANGI made its first acquisition of on-demand platform Handy.

In July 2019, IAC made its largest investment ever in the world's largest peer-to-peer car sharing marketplace, Turo. Later that year, IAC acquired Care.com. In December 2019, IAC and Match Group entered into an agreement providing for the full separation of Match Group from the remaining businesses of IAC.

In January 2020, IAC withdrew its financial backing for CollegeHumor and its sister websites and sold the websites to Chief Creative Officer Sam Reich. As a result of the restructuring, more than 100 employees of CollegeHumor were laid off. In February, IAC completed its \$500 million acquisition of Care.com.

The Clinton Family own an interest in this operation. Anytime you are trying to date on Match.Com think about Chelsea Clinton and her Friend Ghislaine Maxwell ready your emails and texts on the Match.com servers.

The people that work in the lower staff ranks at Match are generally high-strung leftists woke rights activists who are not old enough to have fully developed brains. They party in clusters in sports bar and loud music club scenes and reinforce a party culture. They are mostly female and embrace “influencers”, “Instagram postings” and casual dating. They have a higher tattoo volume than the average corporation.

In July 2020, IAC and Match Group announced the successful completion of the separation of Match Group from the remaining businesses of IAC. As a result of the separation, Match Group's dual class voting structure was eliminated and the interest in Match Group formerly held by IAC is now held directly by IAC's shareholders. As of the separation, "new" IAC trades under the symbol "IAC" and "new" Match Group under the symbol "MTCH."

In August 2020, IAC announced it had invested a 12% stake in MGM Resorts International.

Match Group, Inc. is an American internet and technology company headquartered in Dallas, Texas. It owns and operates the largest global portfolio of popular online dating services including Tinder, Match.com, Meetic, OkCupid, Hinge, PlentyOfFish, Ship, and OurTime totalling over 45 global dating companies. The company was owned by parent company IAC and in 2019, the company had 9.283 million subscribers, of which 4.554 million were in North America. In July 2020, Match Group became a separate, public company.

Match.Com and Attack service: Gawker Media/Gizmodo Media trade Staffer Ian Fette back and forth to share mass computerized political attack and political defamation tools developed at both outfits.

In February 2009, IAC incorporated Match Group as a conglomerate of Match.com and other dating sites it owned. In July 2009, Match Group's Match.com acquired People Media from American Capital for \$80 million in cash. People Media operated dating sites BlackPeopleMeet.com and OurTime, which became part of Match Group's portfolio, and powered AOL Personals.

In February 2010, Match.com acquired dating site Singlesnet. In February 2011, Match Group acquired OkCupid for \$50 million. OkCupid was the first free, advertising-based product added to the Match Group portfolio.

Australia's most sexually-active woman reveals she's set herself a goal of 365 encounters in 2024 after losing her corporate job because of her secret OnlyFans gig

Annie Knight , 26, based in the Gold Coast , sent the internet into meltdown last year after sharing details of her active sex life, and has revealed her new goal: sleeping with 365 men.

In 2012, online dating application Tinder was founded within Hatch Labs, a startup incubator run by parent company IAC. The application allowed users to anonymously swipe to like or dislike other profiles based on their photos, common interests and a small bio. On November 19, 2015, the company became a public company via an initial public offering.

In 2017, Match Group launched Tinder Gold, which established Tinder as the highest grossing non-gaming app globally. In the summer of 2017, the company offered to acquire Bumble for \$450 million.

In January 2018, Mandy Ginsberg, formerly the CEO of Match North America, replaced Greg Blatt as CEO of the company.

In June 2018, Match Group acquired 51% ownership in dating app Hinge. The acquisition was intended to help diversify Match's portfolio and appeal to a wider array of singles. In February 2019, Match Group fully bought out the company.

In July 2018, Match Group launched a Safety Advisory Council comprising a group of experts focused on preventing sexual assault across its portfolio of products. The council included #MeToo movement founder Tarana Burke and worked with organizations like the Rape, Abuse & Incest National Network (RAINN) and the National Sexual Violence Resource Center.

In August 2018, Tinder co-founder Sean Rad filed a \$2 billion lawsuit against Match Group, claiming that Match Group and its parent company IAC purposely undervalued Tinder to avoid paying out stock options to the company's original team. Rad and his co-plaintiffs also accused the former Tinder CEO, Greg Blatt, of sexual harassment. The company said that the allegations are "meritless". In October 2019, Blatt filed a defamation lawsuit against Rad and Tinder founding member Rosette Pambakian seeking at least \$50 million in damages.

In January 2019, Match Group partnered with media brand Betches to launch a dating app, called Ship, that allowed users to help their friends pick out potential dates.

In August 2019, the company acquired Harmonica, an Egyptian online dating service.

In January 2020, Match Group announced an investment and partnership with safety platform Noonlight. The partnership incorporated new safety tools in Match Group's products, including emergency assistance, location tracking and photo verification.

In January 2020, Mandy Ginsberg stepped down as chief executive officer due to personal reasons. Shar Dubey, then President of Match Group, became the CEO of the company effective March 1, 2020.

Match.com, OK Cupid, Bumble, Zoosk and the rest make money, indirectly, off FACE HAVESTING. Face-tracking harvesters grab one picture of you and then use AI to find every other digital picture of you on the web. They open every social media post, resume, news clipping, dating account etc. and sell the full dossier on you to Axcion, the NSA, Political manipulators etc. and hack your bank accounts and credit cards. Never put an unsecured photo of yourself online. Anybody can take a screen grab of your photo on here, put it in Google's or Palantir's reverse image search, find all your other images and social media accounts online and get into your bank account or medical records in 30 minutes. The fact of the internet's failed security is in the headlines every day. The danger of posting pictures on the web is pretty clearly covered in every major newspaper. Fusion GPS, Black Cube and political operatives harvest every photo on here every hour and use the data to spy on people for political dirty tricks. The FBI, CIA, NSA and most 3-letter law enforcement spy operations copy everything on this site and analyze it. Don't you wonder why you never see anybody famous, political, in public service or in law on a dating site? Read Edward Snowden's book 'Permanent Record' or any weekly report at Krebs On Security. Huge numbers of the profiles on here are fake Nigerian scammer type things. 2D pictures have no bearing on 3D experiences of people in person. I am only interested in meeting people in person. Nobody has ever been killed at a Starbucks! There is nothing unsafe about meeting at a highly public Starbucks or Peets. I learned my lessons. There are hundreds of thousands of bait profiles on here. The real people show up for the coffee. The fake ones in Nigeria, and the political spies never show up in person and have a million carefully prepared excuses why not.

For example: Yandex is by far the best reverse image search engine, with a scary-powerful ability to recognize faces, landscapes, and objects. This Russian site draws heavily upon user-generated content, such as tourist review sites (e.g. FourSquare and TripAdvisor) and social networks (e.g. dating sites), for remarkably accurate results with facial and landscape recognition queries. To use Yandex, go to images.yandex.com, then choose the camera icon on the right. From there, you can either upload a saved image or type in the URL of one hosted online.

If you get stuck with the Russian user interface, look out for Выберите файл (Choose file), Введите адрес картинки (Enter image address), and Найти (Search). After searching, look out for Похожие картинки (Similar images), and Ещё похожие (More similar). The facial recognition algorithms used by Yandex are shockingly good. Not only will Yandex look for photographs that look similar to the one that has a face in it, but it will also look for other photographs of the same person (determined through matching facial similarities) with completely different lighting, background colors, and positions. Google and Bing also look for other photographs showing a person with similar clothes and general facial features, Yandex will search for those matches, and also other photographs of a facial match.

Any stranger could snap your picture on the sidewalk or on Match.com then use an app to quickly discover your name, address and other details? A startup called Clearview AI has made that possible, and its app is currently being used by hundreds of law enforcement agencies in the US, including the FBI, says a report in The New York Times.

The app, says the Times, works by comparing a photo to a database of more than 3 billion pictures that Clearview says it's scraped off Facebook, Venmo, YouTube and other sites. It then serves up matches, along with links to the sites where those database photos originally appeared. A name might easily be unearthed, and from there other info could be dug up online.

The size of the Clearview database dwarfs others in use by law enforcement. The FBI's own database, which taps passport and driver's license photos, is one of the largest, with over 641 million images of US citizens. The White House has campaign offices that exploit this picture data through intermediary parties.

In March 2020, Match Group became the first tech company to support the Earn It Act of 2020, a bipartisan bill to combat online child sexual exploitation.

In July 2020, the company completed the separation from IAC. The separation was the largest ever for IAC, as Match Group then had a market capitalization of \$30 billion.[33] After the separation, four new members joins Match Group's board of directors: Stephen Baily, Melissa Brenner, Ryan Reynolds and Wendi Murdoch

In August 2020, amidst the Covid-19 pandemic, Match Group reported growing profit and revenue and surpassed 10 million subscribers across its portfolio.

In September 2020, Match Group joined others companies like Spotify and Epic Games to form the Coalition for App Fairness. The purpose is to combat Apple over its app store policies.

In February 2021, Match Group announced that it would be acquiring Seoul, Korea-based social network company Hyperconnect for \$1.73 billion in both cash and stock.[40] This deal is reportedly Match Group's largest acquisition to date.

Also in February 2021, Match Group took legal action against dating app Muzmatch, the online Muslim dating app, calling the app a "Tinder Clone".

In 2019, the company was sued by the U.S. Federal Trade Commission (FTC) for allegations of unfair and deceptive trade practices. According to the FTC's civil complaint, the company used fake love interest ads to encourage free users to pay for premium subscription services on Match.com. Accounts that were flagged as suspicious or potentially fraudulent by the site were prevented from messaging paid subscribers but were allowed to continue messaging free users who were tricked into believing that the suspicious accounts were real users encouraging them to subscribe and connect with them. The company denied the allegations.

The FTC further alleged that the company offered false promises of guarantees, failed to provide support to customers who unsuccessfully disputed charges, and made it overly difficult for users to cancel their subscriptions, which Match Group disputed as cherry-picked and misrepresenting internal emails. In September 2020, it was reported that the Department of Justice had closed its investigation into the FTC complaint. The big dating sites sell user data to political parties in order to influence elections. The sell the data via intermediates like Axciom, EquiFax and hundreds of other 'data harvesters'.

"Sexually attractive symmetrically facial-featured nordic facial-bone-structured women are socially programmed to date symmetrically facial featured nordic facial-bone-structured men. They are programmed by the media, their friends, their parents and peer pressure. Their relationships with these people never last and they are always cheated on by their partners who are socially programmed to constantly seek more attractive, younger, superficial looks in their partners. This is proven by most sociologists, biologists, scientists and historians. In Silicon Valley this trend is even more extreme because attraction and money are leveraged as a competition between superficial people. These kinds of people swarm towards superficiality communities like Atherton, Woodside, Belvedere, Aspen, Sun Valley, Mill Valley, Pacific Heights in San Francisco and other echo-chamber glass bubble towns where they can share

mutual-admiration, false prestige and elite self-delusion without being distracted by current events. TED Talks were created for these kinds of people to self-congratulate and mutually ego-masturbate each other..."

THE DATING SITES YOU MUST AVOID AT ALL COSTS, AND SEEK TO BANKRUPT, ARE:

- Ablo
- Amourex
- Black People Meet
- BLK
- Chispa
- Disons Demain
- Hawaya (formerly Harmonica)
- Hinge
- Lexa.nl
- Love Scout 24
- Match.com
- Meetic
- neu.de
- OkCupid
- OurTime
- Pairs
- ParPerfeito
- Plenty of Fish
- Ship
- Tinder
- Twoo
- And any other facades that these digital manipulators pop up with.

Those people who think: "I have nothing to worry about..I am not important" ARE the people who get hacked the most. Don't let naivete be your downfall. <https://www.eff.org/deeplinks/2019/07/when-will-we-get-full-truth-about-how-and-why-government-using-facial-recognition>

All of your info on Target, Safeway, Walgreens has been hacked and read by many outsiders. NASA, The CIA, The NSA, The White House and all of the federal background check files have been hacked. The Department of Energy has been hacked hundreds of times. All of the dating sites have been hacked and their staff read all of your messages. Quest labs blood test data and sexual information reports have been hacked and published to the world. There is no database that can't be easily hacked. Every computer system with Intel, AMD, Juniper Networks, Cisco and other hardware in it can be hacked in seconds with the hardware back-doors soldered onto their electronic

boards. All of the credit reporting bureaus have been hacked. Wells Fargo bank is constantly hacked. YOU ARE NOT SAFE if you put information on a network. NO NETWORK is safe! No Silicon Valley company can, or will, protect your data; mostly because they make money FROM your data!

Every single modern cell phone and digital device can be EASILY taken over by any hacker and made to spy on you, your family, your business and your friends in thousands of different ways. Taking over the microphone is only a small part of the ways a phone can be made to spy on you. Your phone can record your location, your voice vibrations, your mood, your thoughts, your sexual activity, your finances, your photos, your contacts (who it then goes off and infects) and a huge number of other things that you don't want recorded.

Privacy watchdog under pressure to recommend facial recognition ban...

Alarming Rise of Smart Camera Networks And Corporate Spying

AMAZON's Ring Doorbell Secretly Shares Private User Data With FACEBOOK...

The worst abusers of your privacy, personal information, politics and psychological information intentions are: Google, Facebook, LinkedIn, Amazon, Netflix, Comcast, AT&T, Xfinity, Match.com & the other IAC dating sites, Instagram, Uber, Wells Fargo, Twitter, Paypal, Hulu, Walmart, Target, YouTube, PG&E, The DNC, Media Matters, Axciom, and their subsidiaries. Never, ever, put accurate information about yourself on their online form. Never, ever, sign in to their sites using your real name, phone, address or anything that could be tracked back to you.

If you don't believe that every government hacks citizens in order to destroy the reputation of anyone who makes a public statement against the current party in power then read the public document at:

<https://www.cia.gov/library/readingroom/docs/CIA-RDP89-01258R000100010002-4.pdf>

That document shows you, according to the U.S. Congress, how far things can go.

A program called ACXIX hunts down all of your records from your corner pharmacy, your taxi rides, your concert tickets, your grocery purchases, what time you use energy at your home, your doctor records...and all kinds of little bits of info about you and puts that a file about you. That file about you keeps growing for the rest of your life. That file sucks in other files from other data harvesting sites like Facebook and Google: FOREVER. The information in that file is used to try to control your politics and ideology.

In recent science studies cell phones were proven to exceed radiation safety limits by as high as 11 times the 2-decade old allowable U.S. radiation limits when phones touch the body. This is one of thousands of great reasons to always remove the battery from your cell phone when you are not talking on it. A phone without a battery in it can't spy on you and send your data to your enemies.

If you are reading this notice, the following data applies to you:

1. EVERY network is known to contain Intel, Cisco, Juniper Networks, AMD, Qualcomm and other hardware which has been proven to contain back-door hard-coded access to outside parties. This is a proven, inarguable fact based on court records, FISA data, IT evidence, national news broadcasts, Congressional presented evidence and inventory records, ie: Krebs On Security, FireEye, ICIJ, Wikileaks Vault 9, EU, Global IT services, FBI.
2. Chinese, Russian FSB, Iranian and other state-sponsored hacking services as well as 14 year old domestic boys are able to easily enter your networks, emails and digital files because of this. They can enter your network at any time, with less than 4 mouse clicks, using software available to anyone. This is a proven, inarguable fact based on

court records, FISA data, IT evidence and inventory records, ie: Krebs On Security, FireEye, ICIJ, Wikileaks Vault 9, EU, Global IT services, FBI.

3. Your financial office is aware of these facts and has chosen not to replace all of the at-risk equipment, nor sue the manufacturers who sold your organization this at risk equipment. They believe that the hassle and cost of replacement and litigation is more effort than the finance department is willing to undertake. This is a proven, inarguable fact based on court records, FISA data, IT evidence, national news broadcasts, Congressional presented evidence and inventory records, ie: Krebs On Security, FireEye, ICIJ, Wikileaks Vault 9, EU, Global IT services, FBI.

4. In addition to the existing tools that were on the internet, in recent years, foreign hackers have released all of the key hacking software that the CIA, DIA and NSA built to hack into any device. These software tools have already been used hundreds of times. Now the entire world has access to these tools which are freely and openly posted across the web. This is a proven, inarguable fact based on court records, FISA data, IT evidence, national news broadcasts, Congressional presented evidence and inventory records, ie: Krebs On Security, FireEye, ICIJ, Wikileaks Vault 9, EU, Global IT services, FBI.

5. The computers, servers, routers, cell phones, IP cameras, IP microphones, Smart Meters, Tesla's, "Smart Devices:", etc. and other devices openly broadcast their IP data and availability on the internet. In other words, many of your device broadcast a "HERE I AM" signal that can be pinged, scanned, spidered, swept or, otherwise, seen, like a signal-in-the-dark from anywhere on Earth and from satellites overhead. Your devices announce that they are available to be hacked, to hackers. This is a proven, inarguable fact based on court records, FISA data, IT evidence, national news broadcasts, Congressional presented evidence and inventory records, ie: Krebs On Security, FireEye, ICIJ, Wikileaks Vault 9, EU, Global IT services, FBI.

6. It is bad policy for your organization, or any organization, to think they are immune or have IT departments that can stop these hacks. NASA, The CIA, The White House, EQUIFAX, The Department of Energy, Target, Walmart, American Express, etc. have been hacked hundreds of times. This is a proven, inarguable fact based on court records, FISA data, IT evidence, national news broadcasts, Congressional presented evidence and inventory records, ie: Krebs On Security, FireEye, ICIJ, Wikileaks Vault 9, EU, Global IT services, FBI.

7. The thinking: "Well, nobody would want to hack us", or "We are not important enough to get hacked" is the most erroneous and negligent thinking one could have in the world today. Chinese, Russian and Iranian spy agencies have a global "Facebook for blackmail" and have been sucking up the data of every entity on Earth for over a decade. If the network was open, they have the data and are always looking for more. The same applies to Google and Facebook who have based their entire business around domestic spying and data re-sale. This is a proven, inarguable fact based on court records, FISA data, IT evidence, national news broadcasts, Congressional presented evidence and inventory records, ie: Krebs On Security, FireEye, ICIJ, Wikileaks Vault 9, EU, Global IT services, FBI.

8. You are a "Stepping Stone" doorway to other networks and data for targeted individuals and other entities. Your networks provide routes into other people's networks. The largest political industry today is called "Doxing" and "Character Assassination". Billions of dollars are expended by companies such as IN-Q-Tel - (DNC); Gawker Media - (DNC); Jalopnik - (DNC); Gizmodo Media - (DNC); K2 Intelligence - (DNC); WikiStrat - (DNC); Podesta Group - (DNC); Fusion GPS - (DNC/GOP); Google - (DNC); YouTube - (DNC); Alphabet - (DNC); Facebook - (DNC); Twitter - (DNC); Think Progress - (DNC); Media Matters - (DNC); Black Cube - (DNC); Mossad - (DNC); Correct The Record - (DNC); Sand Line - (DNC/GOP); Blackwater - (DNC/GOP); Stratfor - (DNC/GOP); ShareBlue - (DNC); Wikileaks (DNC/GOP); Cambridge Analytica - (DNC/GOP); Sid Blumenthal- (DNC); David Brock - (DNC); PR Firm Sunshine Sachs (DNC); Covington and Burling - (DNC), BuzzFeed - (DNC) Perkins Coie

- (DNC); Wilson Sonsini - (DNC) and hundreds of others to harm others that they perceive as political, personal or competitive threats. Do not under-estimate your unintended role in helping to harm others. This is a proven, inarguable fact based on court records, FISA data, IT evidence, national news broadcasts, Congressional presented evidence and inventory records, ie: Krebs On Security, FireEye, ICIJ, Wikileaks Vault 9, EU, Global IT services, FBI.

9. NEVER believe that you are too small to be noticed by hackers. Parties who believe that are the hackers favorite targets. This is a proven, inarguable fact based on court records, FISA data, IT evidence, national news broadcasts, Congressional presented evidence and inventory records, ie: Krebs On Security, FireEye, ICIJ, Wikileaks Vault 9, EU, Global IT services, FBI.

10. NEVER believe that because the word “DELL” or “IBM” or “CISCO” is imprinted on the plastic cover of some equipment that you are safe. Big brands are targeted by every spy agency on Earth and are the MOST compromised types of equipment. This is a proven, inarguable fact based on court records, FISA data, IT evidence, national news broadcasts, Congressional presented evidence and inventory records, ie: Krebs On Security, FireEye, ICIJ, Wikileaks Vault 9, EU, Global IT services, FBI.

11. YOU may not personally care about getting exposed but the person, or agency, you allow to get exposed will be affected for the rest of their lives and they will care very much and could sue you for destroying them via negligence. Be considerate of others in your “internet behavior”. Do not put anything that could hurt another on any network, ever. This is a proven, inarguable fact based on court records, FISA data, IT evidence, national news broadcasts, Congressional presented evidence and inventory records, ie: Krebs On Security, FireEye, ICIJ, Wikileaks Vault 9, EU, Global IT services, FBI.

12. Never post your real photograph online, or on a dating site social media or on any network. There are thousands of groups who scan every photo on the web and cross check those photos in their massive databases to reveal your personal information via every other location your photo is posted. These "image harvesters" can find out where you, who your friends and enemies are and where your kids are in minutes using comparative image data that they have automated and operating around the clock. This is a proven, inarguable fact based on court records, FISA data, IT evidence, national news broadcasts, Congressional presented evidence and inventory records, ie: Krebs On Security, FireEye, ICIJ, Wikileaks Vault 9, EU, Global IT services, FBI.

13. If you think using web security measures like this makes you "paranoid", then think again. Cautious and intelligent people use these security measures because these dangers are proven in the news headlines daily. Uninformed, naive and low IQ people are the types of people who do not use good web hygiene and who suffer because they are not cautious and are not willing to consider the consequences of their failure to read the news and stay informed.

‘Gotham’ software written by Palantir shows how government agencies, or anybody, can use very little information to obtain quick access to anyone’s personal minutiae.

VICE NEWS Motherboard via public records request has revealed shocking details of capabilities of California law enforcement involved in Fusion Centers, once deemed to be a conspiracy theory like the National Security Agency (NSA) which was founded in 1952, and its existence hidden until the mid-1960s. Even more secretive is the National Reconnaissance Office (NRO), which was founded in 1960 but remained completely secret for 30 years.

Some of the documents instructing California law enforcement (Northern California Regional Intelligence Center) “Fusion Center” are now online, and they show just how much information the government can quickly access with little or no knowledge of a person of interest.

“The guide doesn’t just show how Gotham works. It also shows how police are instructed to use the software,” writes Caroline Haskins.

“This guide seems to be specifically made by Palantir for the California law enforcement because it includes examples specific to California.”

According to DHS, “Fusion centers operate as state and major urban area focal points for the receipt, analysis, gathering, and sharing of threat-related information between federal; state, local, tribal, territorial (SLTT); and private sector partners” like Palantir. Further, Fusion Centers are locally owned and operated, arms of the “intelligence community,” i.e. the 17 intelligence agencies coordinated by the National Counterterrorism Center (NCTC). However, sometimes the buildings are staffed by trained NSA personnel like what happened in Mexico City, according to a 2010 Defense Department (DOD) memorandum.

Palantir is a private intelligence data management company mapping relationships between individuals and organizations alike founded by Peter Thiel and CEO Alex Karp and accused rapist Joe Lonsdale. You may remember Palantir from journalist Barrett Brown, Anonymous’ hack of HBGary, or accusations that the company provided the technology that enables NSA’s mass surveillance PRISM. Founded with early investment from the CIA and heavily used by the military, Palantir is a subcontracting company in its own right. The company has even been featured in the Senate’s grilling of Facebook, when Washington State Senator Maria Cantwell asked CEO Mark Zuckerberg, “Do you know who Palantir is?” due to Peter Thiel sitting on Facebook’s board.

In 2011, Anonymous’ breach exposed HBGary’s plan, conceived along with data intelligence firm Palantir, and Berico Technologies, to retaliate against WikiLeaks with cyber attacks and threaten the journalism institutions supporters. Following the hack and exposure of the joint plot, Palantir attempted to distance itself from HBGary, which it blamed for the plot.

Bank of America/Palintir/HBGary combined WikiLeaks attack plan. You can find more here:
<https://t.co/85yECxFmZu> pic.twitter.com/huNtfJp8gl

— WikiLeaks (@wikileaks) November 29, 2016

This was in part because Palantir had in 2011 scored \$250 million in deals ; its customers included the CIA, FBI, US Special Operations Command, Army, Marines, Air Force, LAPD and even the NYPD. So the shady contractor had its reputation to lose at the time being involved in arguably criminal activity against WikiLeaks and its supporters.

Palantir describes itself as follows based on its website:

Palantir Law Enforcement supports existing case management systems, evidence management systems, arrest records, warrant data, subpoenaed data, RMS or other crime-reporting data, Computer Aided Dispatch (CAD) data, federal repositories, gang intelligence, suspicious activity reports, Automated License Plate Reader (ALPR) data, and unstructured data such as document repositories and emails.

Palantir’s software, Bloomberg reports, combs through disparate data sources—financial documents, airline reservations, cellphone records, social media postings—and searches for connections that human analysts might miss. It then presents the linkages in colorful, easy-to-interpret graphics that look like spider webs.

Motherboard shows how Fusion Center police can now utilize similar technology to track citizens beyond social media and online web accounts with people record searches, vehicle record searches, a Histogram tool, a Map tool, and an Object Explorer tool. (For more information on each and the applicable uses see the Vice News article here.)

Police can then click on an individual in the chart within Gotham and see every personal detail about a target and those around them, from email addresses to bank account information, license information, social media profiles, etc., according to the documents.

Palantir's software in many ways is similar to the Prosecutor's Management Information System (PROMIS) stolen software Main Core and may be the next evolution in that code, which allegedly predated PRISM. In 2008, Salon.com published details about a top-secret government database that might have been at the heart of the Bush administration's domestic spying operations. The database known as "Main Core" reportedly collected and stored vast amounts of personal and financial data about millions of Americans in event of an emergency like Martial Law.

The only difference is, again, this technology is being allowed to be deployed by Fusion Center designated police and not just the National Security Agency. Therefore, this expands the power that Fusion Center police — consisting of local law enforcement, other local government employees, as well as Department of Homeland Security personnel — have over individual American citizens.

This is a huge leap from allowing NSA agents to access PRISM database search software or being paid by the government to mine social media for "terrorists."

Fusion Centers have become a long-standing target of civil liberties groups like the EFF, ACLU, and others because they collect and aggregate data from so many different public and private sources.

On a deeper level, when you combine the capabilities of Palantir's Gotham software, the abuse of the Department of Motor Vehicles (DMV) database for Federal Bureau of Investigations/Immigration and Customs Enforcement, and facial recognition technology, you have the formula for a nightmarish surveillance state. Ironically, or perhaps not, that nightmare is the reality of undocumented immigrants as Palantir is one of several companies helping sift through data for the raids planned by ICE, according to journalist Barrett Brown.

YOU HAVE BEEN WARNED:

According to the world's top internet security experts: "...Welcome to the new digital world. Nobody can ever type anything on the internet without getting scanned, hacked, privacy abused, data harvested for some political campaign, spied on by the NSA and Russian hackers and sold to marketing companies. You can't find a corporate or email server that has not already been hacked. For \$5000.00, on the Dark Web, you can now buy a copy of any person's entire dating files from match.com, their social security records and their federal back-ground checks. These holes can never be patched because they exist right in the hardware of 90% of the internet hardware on Earth.

Any hacker only needs to find one hole in a network in order to steal everything in your medical records, your Macy's account, your credit records and your dating data. Be aware, these days, Mr. & Ms. Consumer. Facebook, Google, Twitter and Amazon have turned out to be not-what-they-seem. They manipulate you and your personal information in quite illicit manners and for corrupt purposes. Avoid communicating with anybody on the internet because you will never know who you are really talking to. Only communication with people live and in-person..."

THE PROMIS DOMESTIC SPYING BACKDOOR

Beyond embedded journalists, news blackouts, false flag events, blacklisted and disappeared Internet domains the plotline of America's "free press" there are now ISP-filtering programs subject to Homeland Security guidelines that sift through emails and toss some into a black hole. Insiders and the NSA-approved, however, can get around such protections of networks by means of the various hybrids of the PROM IS backdoor. The 1980 of the Prosecutor's

Management Information System (PROMIS) software handed over the golden key that would grant most of the world to a handful of criminals. In fact, this one crime may have been the final deal with the devil that consigned the United States to its present shameful descent into moral turpitude. PROMIS began as a COBOL-based program designed to track multiple offenders through multiple databases like those of the DOJ, CIA, U.S. Attorney, IRS, etc. Its creator was a former NSA analyst named William Hamilton. About the time that the October Surprise Iranian hostage drama was stealing the election for former California governor Ronald Reagan and former CIA director George H.W. Bush in 1980, Hamilton was moving his Inslaw Inc. from non-profit to for-profit status.

His intention was to keep the upgraded version of PROMIS that Inslaw had paid for and earmark a public domain version funded by a Law Enforcement Assistance Administration (LEAA) grant for the government. With 570,000 lines of code, PROMIS was able to integrate innumerable databases without any reprogramming and thus turn mere data into information.

With Reagan in the White House, his California cronies at the DOJ offered Inslaw a \$9.6 million contract to install public-domain PROMIS in prosecutors' offices, though it was really the enhanced PROMIS that the good-old-boy network had set its sights on. In February 1983, the chief of Israeli antiterrorism intelligence was sent to Inslaw under an alias to see for himself the DEC VAX enhanced version. He recognized immediately that this software would revolutionize Israeli intelligence and crush the Palestine Intifada. Enhanced PROMIS could extrapolate nuclear submarine routes and destinations, track assets, trustees, and judges. Not only that, but the conspirators had a CIA genius named Michael Riconosciuto who could enhance the enhanced version one step further, once it was in their possession. To install public domain PROMIS in ninety-four U.S. Attorney offices as per contract, Inslaw had to utilize its enhanced PROMIS.

The DOJ made its move, demanding temporary possession of enhanced PROMIS as collateral to ensure that all installations were completed and that only Inslaw money had gone into the enhancements. Naïvely, Hamilton agreed. The rest is history: the DOJ delayed payments on the \$9.6 million and drove Inslaw into bankruptcy. With Edwin Meese III as Attorney General, the bankruptcy system was little more than a political patronage system, anyway. The enhanced PROMIS was then passed to the brilliant multivalent computer and chemical genius Riconosciuto, son of CIA Agent Marshall Riconosciuto.⁵ Recruited at sixteen, Michael had studied with Nobel Prize-winning physicist and co-inventor of the laser Arthur Schawlow. Michael was moved from Indio to Silver Springs to Miami as he worked to insert a chip that would broadcast the contents of whatever database was present to collection satellites and monitoring vans like the Google Street View van, using a digital spread spectrum to make the signal look like computer noise. This Trojan horse would grant key-club access to the backdoor of any person or institution that purchased PROMIS software as long as the backdoor could be kept secret. Meanwhile, the drama between Hamilton and the conspirators at DOJ continued.

A quiet offer to buy out Inslaw was proffered by the investment banking firm Allen & Co., British publisher (Daily Mirror) Robert Maxwell, the Arkansas corporation Systematics, and Arkansas lawyer (and Clinton family friend) Webb Hubbell.

Hamilton refused and filed a \$50 million lawsuit in bankruptcy court against the DOJ on June 9, 1986. Bankruptcy Judge George F. Bason, Jr. ruled that the DOJ had indeed stolen PROMIS through trickery, fraud, and deceit, and awarded Inslaw \$6.8 million. He was unable to bring perjury charges against government officials but recommended to the House Judiciary Committee that it conduct a full investigation of the DOJ. The DOJ's appeal failed, but the Washington, D.C. Circuit Court of Appeals reversed everything on a technicality. Under then-President George H.W. Bush (1989 — 1993), Inslaw's petition to the Supreme Court in October 1991 was scorned. When the IRS lawyer requested that Inslaw be liquidated in such a way that the U.S. Trustee program (AG Meese's feeding trough

between the DOJ and IRS) could name the trustee who would convert the assets, oversee the auction, and retain the appraisers, Judge Bason refused.

Under then-President William Jefferson Clinton (1993 — 2001), the Court of Federal Claims whitewashed the DOJ's destruction of Inslaw and the A of PROMIS on July 31, 1997. Judge Christine Miller sent a 186-page advisory opinion to Congress claiming that Inslaw's complaint had no merit a somber message to software developers seeking to do business with Attorney Generals and their DOJ. For his integrity, Judge Bason lost his bench seat to the IRS lawyer.

Throughout three administrations, the mainstream Mockingbird media obediently covered up the Inslaw affair, enhanced PROMIS being a master tool of inference extraction able to track and eavesdrop like nothing else. Once enhanced PROMIS was being sold domestically and abroad so as to steal data from individuals, government agencies, banks, and corporations everywhere, intelligence-connected Barry Kumnick~ turned PROMIS into an artificial intelligence (AI) tool called SMART (Special Management Artificial Reasoning Tool) that revolutionized surveillance. The DOJ promised Kumnick \$25 million, then forced him into bankruptcy as it had Hamilton. (Unlike Hamilton, Kumnick settled for a high security clearance and work at military contractors Systematics and Northrop.) Five Eyes / Echelon and the FBI's Carnivore / Data Collection System 1000 were promptly armed with SMART, as was closed circuit satellite highdefinition (HD) television. With SMART, Five Eyes / Echelon intercepts for UKUSA agencies became breathtaking.

The next modification to Hamilton's PROMIS was Brainstorm, a behavioral recognition software, followed by the facial recognition soAware Flexible Research System (FRS); then Semantic Web, which looks not just for link words and embedded code but for what it means that this particular person is following this particular thread. Then came quantum modification. The Department of Defense paid Simulex, Inc. to develop Sentient World Simulation (SWS), a synthetic mirror of the real world with automated continuous calibration with respect to current real-world information. The SEAS (Synthetic Environment for Analysis and Simulations) soAware platform drives SWS to devour as many as five million nodes of breaking news census data, shiAing economic indicators, real world weather patterns, and social media data, then feeds it proprietary military intelligence and fictitious events to gauge their destabilizing impact. Research into how to maintain public cognitive dissonance and learned helplessness (psychologist Martin Seligman) help SEAS deduce human behavior.

There are legitimate reasons <http://www.learnliberty.org/videos/edward-snowden-surveillance-is-about-power/> to want to avoid being tracked and spied-on while you're online. But aside from that, doesn't it feel creepy knowing you're probably being watched every moment that you're online and that information about where you go and what you do could potentially be sold to anyone at any time--to advertisers, your health insurance company, a future employer, the government, even a snoop neighbor? Wouldn't you feel better not having to worry about that on top of everything else you have to worry about every day?

You can test to what extent your browser is transmitting unique information using these sites:

<http://panopticlick.com>

<http://Shieldsup.com>

<http://ip-check.info>

<https://panopticlick.eff.org/>

<https://www.grc.com/shieldsup>

<https://cheapskatesguide.org/articles/ip-check.info?lang=en>

These sites confirm that browsers transmit a lot of data that can be used for fingerprinting. From playing around with these sites, I have noticed that turning off javascript in my browser does help some. Also the TOR browser seems to transmit less data than most, but even it is not completely effective. The added benefit that you get from the TOR browser and especially the TAILS operating system is that they block your IP address from the websites you visit. You want to try several browsers to see which one transmits the least information. Perhaps you will be lucky enough to find a browser that transmits less information than the TOR browser.

The next thing to be aware of is that corporations have methods other than tracking to spy on you. There is a saying that if a corporation is offering you their product for free, you are their product. This means that corporations that offer you free services are selling the data they collect from you in order to be able to provide you with these services. So, chances are that companies that provide you with free email are reading your email. We know that, in addition to tracking you, Facebook reads your posts and knows who your friends are, and that is just the beginning of Facebook's spying methods. Free online surveys are just ways of collecting more data from you. Companies also monitor your credit card transactions and sell your online dating profiles. If you have a Samsung TV that is connected to the internet, it's probably recording what you watch and may even be listening to your private conversations in your home. In fact, anything that you have in your home that is connected to the internet may be spying on you, right down to your internet-connected light bulb. With a few exceptions, online search engines monitor and log your searches. One of the exceptions is the ixquick.com search engine, which is headquartered in Europe. The steps to counter the nearly ubiquitous activities of free service providers would be to pay for services you receive online, read website privacy agreements, and not buy products that are known to be spying on you. However, the only way to be really secure from corporations using the internet to spy on you is to never connect to the internet or buy any internet-connected appliances. Welcome back to the 1980's.

Protecting yourself from government spying while you are on the internet is the hardest and requires the most knowledge. The biggest problem is that unless a whistle-blower like Edward Snowden tells us, we have no way of knowing how governments may potentially be spying on us. That means that we have no way of protecting ourselves 100% of the time from government spying. Some things whistle-blowers have revealed

<https://securerwisdata.com/9-ways-government-spying-on-internet-activity/>

are that the US government logs the meta data from all phone calls (who calls who and when), secretly forces internet service providers and providers of other services to allow it to "listen in on" and record all traffic going through their servers, reads nearly all email sent from everywhere in the world, and tracks the locations of all cell phones (even when they're turned off). And, although I am not aware of any specific whistle-blower revelations on this, there is every reason to believe that the US government (and perhaps others, including China's) has backdoors built into all computer hardware and operating system software for monitoring everything we do on our cell phones, tablets, laptops, desktop computers, and routers.

<https://www.eteknix.com/nsa-may-backdoors-built-intel-amd-processors/>

See also this. Because Lenovo computers are manufactured in China, the US government has issued warnings to all US government agencies and subcontractors to strongly discourage them from using Lenovo computers. And the US government probably has backdoors

<https://www.atlasobscura.com/articles/a-brief-history-of-the-nsa-attempting-to-insert-backdoors-into-encrypted-data>

into all commercially-available encryption software, with the possible exception of Truecrypt version 7.1a. I hope you are understanding now the magnitude of the lengths that governments are going to (using your tax money) to spy on you. In truth, we are now approaching the level of government spying that George Orwell warned about in his book, 1984

So what can we practically do to protect ourselves from government spying? Seriously, there isn't much, if we want to use cell phones, credit cards, and the internet. About all we can do, if we absolutely need to have a private conversation, is to have a face-to-face meeting without any electronics within microphone range. That includes cell phones, Samsung TV's, video cameras, computers, or land-line telephones. And don't travel to the meeting place using long-distance commercial transportation.

Sending a letter through the US mail is the next best, although it is known that the outsides of all mail sent through the US mail are photographed, and the pictures are stored. So, don't put your return address on the envelope.

http://www.abajournal.com/news/article/new_york_times_post_office_photocopies_envelopes_of_all_mail_sent_in_the_us/

As far as surfing the internet is concerned, begin with all the precautions that I outlined above to protect yourself from corporate spying (except HTTPS and VPN's). Then, add the TAILS operating system on a USB stick. As I said, TAILS will not prevent you from being identified and tracked via the fingerprinting method. And who can be sure whether the government has a backdoor in TAILS? As far as I know, the super-paranoid, hoody and sunglasses method I outlined above is the next step.

Experts warns of 'epidemic' of bugging devices used by stalkers - By James Hockaday

Stalkers are using cheap bugging devices hidden in everyday household items

More funding and legal powers are needed for police to stop a surge of stalkers using eavesdropping devices to spy on victims, experts have warned.

Firms paid to detect the bugs say they're finding more and more of the devices which are readily available on online marketplaces like Amazon and eBay.

Jack Lazzereschi, Technical Director of bug sweeping company Shapestones, says cases of stalking and victims being blackmailed with intimate footage shot in secret has doubled in the past two years.

He told Metro.co.uk: 'The police want to do something about it, they try to, but usually they don't have the legal power or the resources to investigate.

'For us it's a problem. We try to protect the client, we want to assure that somebody has been protected.'

Advert for a hidden camera device planted inside a fire/smoke alarm sold on Amazon

People are paying as little as £15 for listening devices and spy cameras hidden inside desk lamps, wall sockets, phone charger cables, USB sticks and picture frames.

Users insert a sim card into a hidden slot and call a number to listen in on their unwitting targets.

People using hidden cameras can watch what's happening using an apps on their phones.

Jack says the devices are so effective, cheap and hard to trace to their users, law enforcement prefer using them over expensive old-school devices.

Although every case is different, in situations where homeowners plant devices in their own properties, Jack says there's usually a legal 'grey area' to avoid prosecution.

The devices themselves aren't illegal and they are usually marketed for legitimate purposes like protection, making it difficult for cops to investigate.

There is no suggestion online marketplaces like eBay and Amazon are breaking the law by selling them.

But in some instances, images of women in their underwear have been used in listings – implying more sinister uses for the devices.

Even in cases when people are more clearly breaking the law, Jack says it's unlikely perpetrators will be brought to justice as overstretched police will prioritise resources to stop violent crime.

Jack's says around 60 per cent of his firm's non-corporate cases involve stalking or blackmail.

He says it's become an 'epidemic' over the past couple of years with the gadgets more readily available than ever before.

Jack Lazzereschi says he's seen stalking cases double in a few years

Victims are often filmed naked or having sex and threatened with the threat of footage being put online and in the worst cases children are also recorded.

Jack says UK law is woefully unprepared to deal with these devices compared to countries in the Asian-Pacific region.

In South Korea authorities have cracked down on a scourge of perverts planting cameras in public toilets.

James Williams, director of bug sweepers QCC Global says snooping devices used to be the preserve of people with deep pockets and technological know-how.

He said: 'It's gone from that to really being at a place where anybody can just buy a device from the internet.

'Anything you can possibly think of you can buy with a bug built into it. I would say they're getting used increasingly across the board.'

Suky Bhaker, Acting CEO of the Suzy Lamplugh Trust, which runs the National Stalking Helpline, warned using these gadgets could be a prelude to physical violence.

She said: 'We know that stalking and coercive control are extremely dangerous and can cause huge harm to the victim, both in terms of their psychological wellbeing and the potential for escalation to physical violence or even murder.

'The use of surveillance devices or spyware apps by stalkers, must be seen in the context of a pattern of obsessive, fixated behaviour which aims at controlling and monitoring the victim.

She added: 'There should be clarity for police forces that the use of surveillance equipment by stalkers to monitor their victim's location or communications is a sign that serious and dangerous abuse may be present or imminent.'

'All cases of stalking or coercive control should be taken seriously and investigated when reported to police.'

The charity is calling for all police forces across the country to train staff in this area.

Earlier this month a policeman known only by his surname Mills was barred from the profession for life for repeatedly dismissing pleas for help from 19-year-old Shana Grice who was eventually murdered by her stalker ex-boyfriend Michel Lane.

A spokesman for eBay said: ‘The listing of mini cameras on eBay is permitted for legitimate items like baby monitors or doorbell cameras.

‘However, items intended to be used as spying devices are banned from eBay’s UK platform in accordance with the law and our policy.

‘We have filters in place to block prohibited items, and all the items flagged by Metro have now been removed.’

Face-tracking harvesters grab one picture of you and then use AI to find every other digital picture of you on Earth and open every social media post, resume, news clipping, dating account etc. and sell the full dossier on you to Axciom, the NSA, Political manipulators etc. and hack your bank accounts and credit cards. Never put an unsecured photo of yourself online.

Who’s Watching Your WebEx? Webex has many back-door spy paths built in

KrebsOnSecurity spent a good part of the past week working with Cisco to alert more than four dozen companies — many of them household names — about regular corporate WebEx conference meetings that lack passwords and are thus open to anyone who wants to listen in.

Department of Energy’s WebEx meetings.

At issue are recurring video- and audio conference-based meetings that companies make available to their employees via WebEx, a set of online conferencing tools run by Cisco. These services allow customers to password-protect meetings, but it was trivial to find dozens of major companies that do not follow this basic best practice and allow virtually anyone to join daily meetings about apparently internal discussions and planning sessions.

Many of the meetings that can be found by a cursory search within an organization’s “Events Center” listing on Webex.com seem to be intended for public viewing, such as product demonstrations and presentations for prospective customers and clients. However, from there it is often easy to discover a host of other, more proprietary WebEx meetings simply by clicking through the daily and weekly meetings listed in each organization’s “Meeting Center” section on the Webex.com site.

Some of the more interesting, non-password-protected recurring meetings I found include those from Charles Schwab, CSC, CBS, CVS, The U.S. Department of Energy, Fannie Mae, Jones Day, Orbitz, Paychex Services, and Union Pacific. Some entities even also allowed access to archived event recordings.

Cisco began reaching out to each of these companies about a week ago, and today released an all-customer alert (PDF) pointing customers to a consolidated best-practices document written for Cisco WebEx site administrators and users.

“In the first week of October, we were contacted by a leading security researcher,” Cisco wrote. “He showed us that some WebEx customer sites were publicly displaying meeting information online, including meeting Time, Topic, Host, and Duration. Some sites also included a ‘join meeting’ link.”

Financial, Medical, Personal Information Breached Using Dating Site Data

It includes credit card numbers and bank account information, according to a filing... HOW MANY TIMES DO YOU NEED TO BE TOLD: "NEVER, EVER, GIVE TRUE INFORMATION TO ANY COMPANY THAT USES A NETWORK OR MAKES YOU SIGN-IN TO ANYTHING ONLINE!"

Google still keeps a list of everything you ever bought using Gmail, even if you delete all your emails, and provides that data to political parties, the NSA and marketing companies so they can manipulate you

Key Points

- Google Gmail keeps a log of everything you buy.
- Google says this is so you can ask Google Assistant about the status of an order or reorder something.
- It also says you can delete this log by deleting the email, but three weeks after we deleted all email, the list is still there.

Google and other tech companies have been under fire recently for a variety of issues, including failing to protect user data, failing to disclose how data is collected and used and failing to police the content posted to their services.

Companies such as Google have embedded themselves in our lives with useful services including Gmail, Google Maps and Google Search, as well as smart products such as the Google Assistant which can answer our questions on a whim. The benefits of these tools come at the cost of our privacy, however, because while Google says that privacy should not be a “luxury good,” it’s still going to great lengths to collect as much detail as possible about its users and making it more difficult than necessary for users to track what’s collected about them and delete it.

Here’s the latest case in point.

In May, I wrote up something weird I spotted on Google's account management page. I noticed that Google uses Gmail to store a list of everything you've purchased, if you used Gmail or your Gmail address in any part of the transaction.

If you have a confirmation for a prescription you picked up at a pharmacy that went into your Gmail account, Google logs it. If you have a receipt from Macy's, Google keeps it. If you bought food for delivery and the receipt went to your Gmail, Google stores that, too.

You get the idea, and you can see your own purchase history by going to Google's Purchases page.

Google says it does this so you can use Google Assistant to track packages or reorder things, even if that's not an option for some purchases that aren't mailed or wouldn't be reordered, like something you bought at a store.

At the time of my original story, Google said users can delete everything by tapping into a purchase and removing the Gmail. It seemed to work if you did this for each purchase, one by one. This isn't easy — for years worth of purchases, this would take hours or even days of time.

So, since Google doesn't let you bulk-delete this purchases list, I decided to delete everything in my Gmail inbox. That meant removing every last message I've sent or received since I opened my Gmail account more than a decade ago.

Despite Google's assurances, it didn't work.

Like a horror movie villain that just won't die

On Friday, three weeks after I deleted every Gmail, I checked my purchases list.

I still see receipts for things I bought years ago. Prescriptions, food deliveries, books I bought on Amazon, music I purchased from iTunes, a subscription to Xbox Live I bought from Microsoft -- it's all there.

Most Of The Owners Of Big Dating Sites Turn Out To Be Crooks And Political Manipulators

- Beware of who you trust with your sex life
- Big dating site owners found to be engaged in tax evasion, sex trafficking, political bribery, privacy abuse, selling access to hackers, domestic spying, human rights violations, political Honey Traps and other crimes
- "Don't worry, Trust Us" the site owners say but the world always later finds out they are leaking your data to all kinds of awful outsiders
- Never, Ever, trust a dating site to protect your privacy
- Every major dating site reads all of your text messages and stores archives of all of your dating site messages forever
- Every photo, or personal data point, that you put on a data site can instantly be reverse tracked back to all of your other work, employment, medical and personal data on the internet
- A low level admin or operations blogger in the offices of match.com, OKCUPID, Plenty of Fish, Tinder or other sites might tell you that "they don't do any of those bad things" but they are either lying or naive. Big dating sites exist for only two reasons: Profiteering and Political Spying
- Chelsea Clinton's OK Cupid, Match.com and Plenty Of Fish DNC Facial Recognition Political Spy Tech Is Growing Stronger By Stealing Your Face
- They use sex to trap you into revealing how to manipulate you.

- All of the JOIN UP questions at OK Cupid are essentially the DNC's political agenda questions
- They use emotional vulnerabilities to trick you into being spied on for political purposes
- Mass user class-action lawsuits being formed to sue Chelsea Clinton's IAC (The ACTUAL owner of these websites) into oblivion for abusing users

I asked Tinder for my data. It sent me 800 pages of my ...

<https://www.theguardian.com/technology/2017/sep/26/tinder-personal-data-dating-app-messages-hacked-sold>

I asked Tinder for my data. It sent me 800 pages of my deepest, darkest secrets The dating app knows me better than I do, but these reams of intimate information are just the tip of the iceberg.

THE CLINTON DATING SITE SEX CULT CONNECTION

FACTS:

1. Chelsea Clinton went to Stanford University and helped get Stanford's Brainwash project going
2. The Brainwash project, and 12 others, harvest data from Match.com, OKCUPID and Plenty of Fish users
3. Chelsea Clinton runs IAC which owns Match.com, OKCUPID and Plenty of Fish
4. Jeffery Epstein finances the Clinton Family and is an arrested pedophile sex cult operator
5. Jeffrey Epstein harvested sex cult girls for himself and his buddies from Match.com, OKCUPID and Plenty of Fish
6. Ghislaine Noelle Maxwell was one of the heads of Jeffrey Epstein's procurement efforts of young girls
7. Ghislaine Noelle Maxwell was a guest of honor at Chelsea Clinton's wedding
8. Match.com, OKCUPID and Plenty of Fish sell their user data to the DNC and Democrat political operatives and all of the initial site questions on OKCUPID are from the DNC election platform!

SEX CULT BOSS Ghislaine Noelle Maxwell At the Clinton Wedding as Guest Of Honor

Companies gather massive databases of people's images, for facial recognition spy tools, from Match.com And OkCupid

Cade Metz

© Open Data Commons Public Domain Dedication and License/Megapixels via The New York Times In an undated handout image from the website Megapixels, a sample image from the Brainwash database, created by Stanford University researchers, which contains more than 10,000 images and nearly 82,000...

SAN FRANCISCO — Dozens of databases of people's faces are being compiled without their knowledge by companies and researchers, with many of the images then being shared around the world, in what has become a vast ecosystem fueling the spread of facial recognition technology.

The databases are pulled together with images from social networks, photo websites, dating services like OkCupid, and cameras placed in restaurants and on college quads. Although there is no precise count of the datasets, privacy activists have pinpointed repositories that were built by Microsoft, Stanford University, and others, with one holding more than 10 million images while another had more than 2 million.

The facial compilations are being driven by the race to create leading-edge facial recognition systems. This technology learns how to identify people by analyzing as many digital pictures as possible using “neural networks,” which are complex mathematical systems that require vast amounts of data to build pattern recognition.

Tech giants Facebook and Google have most likely amassed the largest face data sets, which they do not distribute, according to research papers. But other companies and universities have widely shared their image troves with researchers, governments, and private enterprises in Australia, China, India, Singapore, and Switzerland for training artificial intelligence, according to academics, activists, and public papers.

Companies and labs have gathered facial images for more than a decade, and the databases are merely one layer to building facial recognition technology. But people often have no idea that their faces ended up in them. And while names are typically not attached to the photos, individuals can be recognized because each face is unique to a person.

Questions about the datasets are rising because the technologies that they have enabled are being used in potentially invasive ways. Documents released last Sunday revealed that Immigration and Customs Enforcement officials employed facial recognition technology to scan motorists’ photos to identify unauthorized immigrants. The FBI also spent more than a decade using such systems to compare driver’s license and visa photos against the faces of suspected criminals, according to a Government Accountability Office report last month. On Wednesday, a congressional hearing tackled the government’s use of the technology.

There is no oversight of the datasets. Activists and others said they were angered by the possibility that people’s likenesses had been used to build ethically questionable technology and that the images could be misused. At least one facial database created in the United States was shared with a company in China that has been linked to ethnic profiling of the country’s minority Uighur Muslims.

Over the past several weeks, some companies and universities, including Microsoft and Stanford, removed their facial datasets from the internet because of privacy concerns. But given that the images were already so well distributed, they are most likely still being used in the United States and elsewhere, researchers and activists said.

“You come to see that these practices are intrusive, and you realize that these companies are not respectful of privacy,” said Liz O’Sullivan, who oversaw one of these databases at the artificial intelligence startup Clarifai. She said she left the New York-based company in January to protest such practices.

“The more ubiquitous facial recognition becomes, the more exposed we all are to being part of the process,” she said.

Google, Facebook, and Microsoft declined to comment.

One database, which dates to 2014, was put together by researchers at Stanford. It was called Brainwash, after a San Francisco cafe of the same name, where the researchers tapped into a camera. Over three days, the camera took more than 10,000 images, which went into the database, the researchers wrote in a 2015 paper. The paper did not address whether cafe patrons knew their images were being taken and used for research. (The cafe has closed.)

The Stanford researchers then shared Brainwash. According to research papers, it was used in China by academics associated with the National University of Defense Technology and Megvii, an artificial intelligence company that The New York Times previously reported has provided surveillance technology for monitoring Uighurs.

The Brainwash dataset was removed from its original website last month after Adam Harvey, an activist in Germany who tracks the use of these repositories through a website called MegaPixels, drew attention to it. Links between

Brainwash and papers describing work to build AI systems at the National University of Defense Technology in China have also been deleted, according to documentation from Harvey.

Stanford researchers who oversaw Brainwash did not respond to requests for comment. “As part of the research process, Stanford routinely makes research documentation and supporting materials available publicly,” a university official said. “Once research materials are made public, the university does not track their use nor did university officials.”

At Microsoft, researchers have claimed on the company’s website to have created one of the biggest facial datasets. The collection, called MS Celeb, spanned over 10 million images of more than 100,000 people.

MS Celeb was ostensibly a database of celebrities, whose images are considered fair game because they are public figures. But MS Celeb also brought in photos of privacy and security activists, academics, and others, such as Shoshana Zuboff, the author of the book “The Age of Surveillance Capitalism,” according to documentation from Harvey of the MegaPixels project. MS Celeb was distributed internationally before being removed this spring after Harvey and others flagged it.

Matt Zeiler, founder and chief executive of Clarifai, the AI startup, said his company had built a facial database with images from OkCupid, a dating site. He said Clarifai had access to OkCupid’s photos because some of the dating site’s founders invested in his company.

He added that he had signed a deal with a large social media company — he declined to disclose which — to use its images in training facial recognition models. The social network’s terms of service allow for this kind of sharing, he said.

“There has to be some level of trust with tech companies like Clarifai to put powerful technology to good use and get comfortable with that,” he said.

An OkCupid spokeswoman said that Clarifai contacted the company in 2014 “about collaborating to determine if they could build unbiased AI and facial recognition technology” and that the dating site “did not enter into any commercial agreement then and have no relationship with them now.” She did not address whether Clarifai had gained access to OkCupid’s photos without its consent.

Clarifai used the images from OkCupid to build a service that could identify the age, sex, and race of detected faces, Zeiler said. The startup also began working on a tool to collect images from a website called Insecam — short for “insecure camera” — which taps into surveillance cameras in city centers and private spaces without authorization. Clarifai’s project was shut down last year after some employees protested and before any images were gathered, he said.

Zeiler said Clarifai would sell its facial recognition technology to foreign governments, military operations, and police departments provided the circumstances were right. It did not make sense to place blanket restrictions on the sale of technology to entire countries, he added.

O’Sullivan, the former Clarifai technologist, has joined a civil rights and privacy group called the Surveillance Technology Oversight Project. She is now part of a team of researchers building a tool that will let people check whether their image is part of the openly shared facial databases.

“You are part of what made the system what it is,” she said.

This is about powerful and greedy people abusing the social system in order to manipulate billions of government treasury and stock market dollars into their own pockets. They lie, cheat, bribe, steal, attack, and even kill, in order to grab this money (provided from the pockets of the taxpayers). They create fake "issues" in order to steer massive amounts of government money to "solutions" that they just happen to own the companies of. ("Follow the Money") They collude on cover-ups, cover-stories, pump-and-dumps, fake "Stimulus Funds" redirection and other illicit deeds. Famous politicians are a very big part of this crime. They are easy to spot via the tens of millions of dollars, in their personal bank accounts, which only appeared after they bribed politicians. They broke and separated America by promoting their fake culture, which divides the public, in order to benefit off of their exclusive stock market scams.

One part of them is: The Silicon Valley Tech Cartel; an anti-trust violating organized-crime operation based on quid-pro-quo. They manipulated the Dept of Energy to only fund political favorites and to sabotage the competitors of those favorites in an epic violation of anti-trust and anti-racketeering laws.

The most effective interdiction process for political corruption is now here. It is called "Citizen Forensics". It is the process of the crowd-sourced deep investigation of public officials, and their shills, followed by the global public exposure and shaming of their illicit deeds. Federal law enforcement groups will even help you do this because you, and they, both have a common goal: to take down crooks.

Over the last decade, these procedures have been proven to work. This manual guides you through procedures that work totally, magnificently and effectively against evil people and scumbags!

KEY TACTICS:

- We identified potential targets
- We developed an investigative theory
- We chose the best investigative techniques
- We examined issues unique to these proactive corruption investigations
- We mitigated special considerations in public corruption investigations

IDENTIFYING POTENTIAL TARGETS:

- We asked law enforcement and government sources, including inspectors general, and contract compliance, Congress members and oversight personnel who they suspect
- We asked citizens; business competitors or political rivals; disgruntled current or former employees; paid informants and cooperating defendants; individuals involved in the illegal activity who are seeking to limit or eliminate their criminal exposure by blowing the whistle on corrupt conduct
- We read print, television, and internet media outlets for tips
- We examined if each specific target may be identified via credible tips. Does source have a motive to lie? Is there corroboration?
- We looked at transactions that were identified or appear suspect without specific targets and used those to identify the entities and individuals involved and make a preliminary assessment of the roles played by these individuals, such as decision makers, knowledgeable actors, unwitting participants, and knowledgeable but uninvolved potential witnesses.

We always follow the money - We determine who profited from the transaction and how - Political corruption cases are always about the money! Use modern AI around-the-clock tracking software on the target and their family members to spot money laundering.

Each corrupt politician and operative made a profit from their corrupt actions and those benefits can always be traced with modern forensic accounting and tracking AI. The recent leaks from CPA, VC, law firm and lobbyist records make it even easier. The hack-and-disclose foreign actor campaigns (ie: Supernova, Spectre, Solarwinds, etc.) have even added to those disclosures.

WE DEVELOPED AN INVESTIGATIVE THEORY:

- Theory gives direction to the investigation, but we stay flexible as new facts are leaked or exposed
- We make an initial assessment of whether the alleged corrupt conduct appears to be criminal, or whether it is civil or administrative in nature
- We then identify the elements needed to prove the crimes
- We then try to anticipate possible factual and legal issues and defenses and build our case to rebut or avoid them
- We then identify corrupt officials in jurisdictional law enforcement and regulatory agencies who may be stopping investigations in order to protect a Senator or tech oligarch that pays them or promises them a career advance

MAIN TYPES OF OUR INVESTIGATIONS:

- Historical cases - based on document analysis and witness interviews
- Proactive/undercover cases - running gamut from one day and one deal to elaborate and long-running multi-transaction and multi-target operations

Taking Down The Corrupt Match.com Executives, Staff And Owners One By One

CHOOSING THE BEST INVESTIGATIVE TECHNIQUES:

- We determined which investigative tools to use depending on a variety of factors, including the nature of the alleged violations, the type of investigation our members are conducting, and the resources we had available
- We used the normal progression from simple to complex, with information from initial steps leading to more advanced steps, such as search warrants and federally assisted wiretaps

- We mix and match our methods as appropriate
- Due to the hybrid public/private/citizen investigative team, an “insurance policy” encrypted file set is pre-distributed to journalists, lawyers and Congressional insiders to protect citizen team members

NOTES ON SOME OF THE INVESTIGATIVE TECHNIQUES WE USE:

- Public Source Information
 - Internet and media sources
 - Court filings, including criminal histories, divorces and other lawsuits, bankruptcy filings, and administrative proceedings before agencies such as the SEC, FTC, and insurance and banking regulators
 - Leaks and hacks
 - Choicepoint, Autotrack, property records
 - Financial disclosure forms; Campaign contribution records; Lobbyist registrations and disclosures
 - Information from Parallel Proceedings
 - Corruption cases are often set in backdrop of contract disputes and fraud cases. There may be ongoing civil litigation or administrative proceedings generating valuable information, and you should obtain relevant depositions, pleadings, transcripts and court orders.
 - Despite common interests, do not work in tandem or actively use the civil litigant to further your investigation, such as by giving them questions to ask at depositions or having them seek documents for you.
 - Mail Covers
 - Very useful in identifying target's banks, investment firms, et al
 - Trash Pulls - "Dumpster Diving"
 - Can be very useful if target has recently become aware that they are under suspicion - panic can cause carelessness in disposing of valuable records
 - Grand Jury Subpoenas - Documents
 - Used to gather foundational materials. Consider whether the entity being served can be relied on to not disclose the subpoena, or whether the records sought are worth the risk
 - Issue as early as possible - document production can be slow, particularly with voluminous requests, older records, and/or smaller producing institutions
- Subpoenas - Documents to Obtain:
- Bank, brokerage, and other investment account records
 - Credit reports & credit card records
 - Loan and mortgage records
 - Telephone records
 - Corporate records

- Do quick initial review to determine subpoena compliance. Do not assume full compliance since many institutions see subpoena compliance as a nuisance and distraction from their "real" business.
- Documents must reviewed and cataloged for use during the investigation and for discovery and trial evidence purposes.
- Document review is time and labor intensive, but is usually the heart of any meaningful historical corruption case.
- Witness Interviews
- Essential investigative steps which require serious thought, planning, and preparation. When possible, conduct interviews after you have obtained and reviewed the documents related to the witness.
- General rule - your way up the chain of involvement and culpability
- Remember to consider interviewing the current and former confidants

Subpoenas - Testimony:

- General rule - do not use the grand jury as your interviewing forum. Usually far better to get voluntary interviews first.
- Two main situations to use grand jury testimony as an investigative tool
- Witnesses who may have useful information but will not agree to a voluntary interview
- Possible defense witnesses - find out what they will say and lock them into that story.
- Immunity
- A double-edged sword. Gets you needed testimony but can cast doubt since people tend to dislike and distrust immunized witnesses.
- Weigh the costs and benefits carefully. Jurors will understand immunizing lower-level witnesses to build a case against the main targets.
- Attempt to secure testimony through cooperation plea agreements Jurors are more likely to believe a witness who has accepted responsibility for their actions by pleading guilty than one who has received a "free pass."

Evidence - Laboratory Analysis:

- Handwriting and fingerprint analysis can be very useful in cases with key documents and knowledge, intent, and/or participation questions. Fingerprints can often be found on documents even after an extended period of time.
- Before requesting handwriting analysis, speak to your examiner to find out if the questioned documents can be analyzed with any degree of certainty. If there is little chance of success, you may not want to do the analysis, particularly if fact witnesses can identify the handwriting or signature.
- Make the analysis request as early as possible
- Tax Return Disclosure Requests - 26 USC Section 6103
- Very useful since targets often understate income on tax returns and overstate it on loan applications, corporate filings, and financial statements.
- Disclosure requests take a significant showing and a court order, and normally come after the investigation has substantiated some level of wrongdoing.

- After tax information is obtained under a disclosure order, there are important restrictions on their use and handling.
- E-Mail Account Information from Internet Service Providers ("ISP")
- Two main types of information you will want: identification of the account holder; and, the stored content of the e-mails maintained on the system.
- Can be very valuable since people use e-mail freely and do not realize or care that hitting erase or delete does not remove the content from the system.
- Court orders and search warrants are needed to get this information.

Since ISPs frequently delete content from their systems, use preservation letters asking ISPs to save the content while you obtain the necessary court orders and search warrants for disclosure.

- Search Warrants
- One of the most powerful investigative tools in corruption cases. Obtains evidence on a surprise basis, before it can be redacted, destroyed, or withheld even when production is required by a grand jury subpoena.
- Provides an opportunity to identify and interview those present at search site.
- Serve contemporaneous grand jury subpoena for the same documents

Search Warrants On Senators And Tech Oligarchs:

- Timing is Key Issue

- Need to be far enough along in investigation to develop probable cause and to know what you are actually looking for.
- The search exposes the investigation, so it generally should not be done until you have exhausted any covert opportunities.
- But, if you wait too long and your target becomes suspicious or aware of the investigation, valuable evidence may be destroyed or moved.
- Search Warrants - They are Not Cost Free

- First and foremost, must commit to promptly and thoroughly review everything seized. This can be an extremely time and labor intensive. If you are not ready, willing, and able to do this review, don't do the search.
- Second, be aware of the public impact of a search on a high-profile target or location. It may bring attention to your investigation, increase public scrutiny on you and the target, and raise expectations that charges are imminent.
- Third, need to plan to best execute the warrant while limiting disruption of important functions when searching a government office. public building

Search Warrants - Computers and Computerized Data:

- Any business or office search warrant is going to include computers and computerized data, and you must be able to seize and use this information.
- Have computer specialists involved in planning and executing the search so that computers and system data can be copied on the scene. It is not desirable or feasible to take away the computers and deal with it later.

- Before searching, try to determine if review the seized data will require specialized assistance and equipment, and how you will make this information available for discovery and later trial use

Physical Surveillance:

- Surveillance is valuable to corroborate information which has been received, to link targets, and identify people associated with the known targets
- Trackers ("Bumper Beepers")
 - A slap-on tracker put on in a public place does not require a court order. An order is required to hard-wire a longer-lasting tracker onto a vehicle.
 - Beware that under federal law, you are now required to disclose a tracker warrant to the person whose vehicle was tracked at the conclusion of its use. Delays of this notification are at the discretion of the court.
- Pen Register and Trap and Trace Orders
 - Allows real-time capture of the incoming and outgoing phone numbers for a particular phone number, and can also order phone company to provide subscriber information for each captured number.
 - Requires a court order which can be based on a showing that the information sought is likely to be relevant to the criminal investigation.
- Consensual Recordings
 - Audio or video recordings where one party to the call or meeting (normally an undercover agent or cooperating witness) has agreed to record the conversation. These are authorized without any court order so long as the consenting party is on the line or in the room.
 - Consensual recordings are the "bread and butter" of proactive investigations.
- Title III Wiretaps and Recording Devices
 - Extremely effective tools to investigate ongoing criminal activity, since they allow recording of phone calls and conversations without the presence or participation of an undercover agent or cooperating witness.
 - Requires court order based on probable cause and satisfaction of other requirements, including exhaustion of other investigative options. The internal review process for a federal Title III is very demanding.
 - Title III's are labor intensive, requiring real-time monitoring and minimization, and regular progress reports to the authorizing judge

Undercover Operations – put a plant inside the Senator’s office or the Google , Netflix, Tesla, Youtube or Facebook executives personal office or home office staff:

- Development and Planning Stage Is Key

- First step is determining what you are trying to achieve (i.e. proving a completed crime, infiltrating ongoing criminal activity, developing new cases on suspected corrupt officials, identifying criminals).
- Second step is creating and implementing a scenario designed to effectively and efficiently achieve those goals. Scenario must be realistic in light of targets, resources, and objectives
- Undercover Operations - Avoiding the Usual Defenses

- Any undercover scenario needs to squarely present the criminal opportunity to the targets. Do not give the target a lack of knowledge or intent defense.
- Plan to avoid entrapment claims. Don't push too hard, offer too much money, or make it too easy, and offer opportunities for the target to back out.
- Undercover Operations - Time, Labor, and Resource Intensive
- Must be patient - will take time to develop trust and opportunities
- Money will have to be spent for payoffs and to set up an undercover business, create appearances, wine and dine targets, etc
- Manpower will be needed - UCAs, case agents, surveillance, et al
- Undercover Operations - Undercover Agents are Crucial
- Should make every effort to introduce a UCA into the scenario.
- UCA is essentially unimpeachable in contrast to either a cooperating defendant who is attempting to avoid charges or get a sentence reduction, or a paid informant, both of whom may have motives to lie
- Undercover Operations - Lights, Camera, Action!
- With or without UCA, to the extent possible, you should have consensual or Title III recordings of every meeting and call.
- Tapes are unimpeachable and jurors expect them.
- Predication
- A reasonable basis to suspect the target is or has engaged in criminal activity. Much lower than probable cause standard.
- Criminal investigations should not be fishing expeditions or integrity testing operations, and predication helps prevent overreaching
- Predication helps overcome entrapment defense, claims of selective or vindictive prosecution, and Hyde Amendment (attorney's fees) claims
- Handling the Cooperating Witness ("CW")
- Give specific directions to the CW and make sure that the CW is told that no "freelancing" is permitted. Enforce this from the beginning, and do not let the CW seize control, even if he or she appears to be producing results.
- Corroborate the CW as much as possible, even on small points, and make sure all contacts between the CW and the targets are recorded. Jurors tend to disbelief the uncorroborated, unrecorded word of a paid witness.
- Plan for impact of CW's plea agreement, immunity, or payments on the jury.

Flipping a Corrupt Senator or tech Insider:

- The tactical "Silver Bullet"

- Leaving a flipped insider in place can be an extremely effective tool in an ongoing public corruption case because of the knowledge and access they can bring to the investigation.

- Can be used to strengthen or build cases against existing targets and to identify, predicate, investigate, and prosecute other targets.
- In setting with institutional or high-level corruption, a flipped target in place may be the key to gaining entry to a "closed-shop" of corruption.
- Flipping a Corrupt Insider - Inherent Risks
 - Beware of: being double-crossed by a flipped insider who warns other targets and/or helps them generate exculpatory recordings; inadvertent leaks; the insider committing other crimes or wrongdoing while "on our side."
 - Must also make sure that you keep the insider safe.
- The Flip Attempt
 - Determine the right target to pitch. Normally neither the top nor the bottom target. Assess which target may be most effective as a continuing cooperator
 - Use the element of surprise and make strongest presentation possible.
 - If target wants to cooperate, start by getting a confession.
 - If target wants to consult an attorney, they need to do it on the spot.

SPECIAL CONSIDERATIONS IN THESE PUBLIC CORRUPTION INVESTIGATIONS:

- Impact of charges is enormous on elected officials or high-level appointees. Mere existence of an investigation can destroy a career or a life.
- Proceed carefully - you do not want to be used by someone looking to settle a political score or strike back at a business rival.
- Conduct the investigation and prosecution "by the book." Expect the defense to attack not only the charges, but also the conduct of the investigation.
- Be prepared for heightened public and press scrutiny. Remember that in any big corruption case, the "world is watching."

Who We are Taking Down – The Targets:

- See the related list of publicly known targets who have already been disclosed in the press. Other targets are not identified yet

Here are the signs that your male friend is secretly in love with you

As a psychotherapist and relationship counsellor, I'm frequently asked: 'How do I know if my friend fancies me?' After The success of the series One Day, here are some key, but subtle, clues to look out for.

The Silicon Valley Big Tech Mafia Bromance Guys Are Andrew Tate Clones

For example; let's look at a corrupt political "crime family" known as the "Paypal Mafia". They are also known as "The Deep State", "The Silicon Valley Cartel" and other quaint names.

They promote their criminal boys club with mobster-emulating pictures of themselves like this:

They have based their lives and culture around the Godfather movies and openly refer to themselves as a "cartel". They have gotten away with it, so far, because they have more money than most law enforcement agencies have.

They have thousands of law firms, lobbyists and dirty tricks operatives who spend all day denying, deferring and delaying the justice that is coming for them.

The indisputable facts about them are the assertions that the Silicon Valley oligarchs:

3. Come from dynastic families that systematically ran them through Stanford, Harvard and Yale men's clubs
5. Operated the "Angelgate" collusion scandal
7. Controlled the Obama Administration and the Obama White House and traded most key staff with that Administration
14. Are a Mafia-like criminal organization
15. Have "command and control and exclusive beneficiary positions in ongoing, coordinated, criminal and anti-trust activities involving government and stock market funds...".
16. On a typical Friday, or Saturday night, in Palo Alto, on University Avenue, over 1/3 of the girls at restaurants with older men are Stanford Sugar Babies being paid for sex by Big tech VC's or CEO's.

As a case-in-point relative to how hard it is to arrest these kinds of mobsters: the sex crime victims of Cartel member Jeffrey Epstein reported him to the DOJ a decade ago, yet nothing was done.

Our peers reported this Cartel to federal agencies in 2008, STILL, nothing has been done!

These people run Ponzi schemes with State and Federal funds in "stimulus" after "stimulus"!

They use free government money (your money), stock valuation pump-and-dump and black-lists to make certain that no competitor can ever operate against them in any market. The public has had enough of them. In addition to filing many formal federal requests for FBI, SEC and FTC investigation, you as a member of the public, can do much more

YOU can fight back and destroy these kinds of dirty oligarchs!

When the bad guys, and their lap-dog politicians, attack you because your products are better than theirs they are proving that they are frat boy scumbags, from Stanford and Yale, that operate in a little pack, like dogs! Their Sandhill Road VC operation should be raided by the FBI!

Indeed, the best thing that could come from the COVID pandemic is that they all are forced into bankruptcy!

As Mother Jones top editor says: "In 18 years of living here, I find zero evidence that the "City Family" is benefiting anybody but its members, developers, old-school socialites, and tech billionaires..."

"I can't even with how insular and incestuous and corrupt SF is. Mayor @londonbreed acknowledges she had relationship with DPW Nuru two decades ago and that they remained close friends <https://t.co/HEhIlulkyj>"

You Owe It To Yourself And The World To Take Them Down!

You can wipe them out, all by yourself, in 100% legal ways.

You can wipe them out even faster with crowd-sourced forensics and anti-corruption ai software! join the rest of the public in an epic anti-corruption effort!

You will learn to write FBI-quality criminal activities reports and file those reports, by certified mail, with every law enforcement and regulatory agency in every country in the world, including the FBI, OSC, GAO, EU, Interpol, FSB, UN, etc. CC the social media sites with your reports.

You will use basic private investigator websites to track and back-ground every person, organization and company involved in the corruption and trace their RICO law violations. You can provide that data to The U.S. Congress and every agency, with a copy to every social media posting.

You will use open-source, free, collaborative NSA-class global databases that can track all of the locations, hookers, fake fronts, family trusts, bank accounts, stock market accounts, bribes and other goodies, of any corrupt public official, in minutes! You get that free anti-corruption software from GitHub, CodePen, Torrents, Onion Project, The Guardian, ICIJ and all over the web.

YOU will run your own private investigator/citizen sleuth crowd-sourced investigations into the following:

You can show up at the front door of their home, office, hotel room or vacation cabin and legally arrest them with a citizen's arrest execution. More on that later.

How To Write Up A Public "Shame Dossier" On Each Crook That Works At, Or Invests In, Match.Com

YOU will hunt down each corrupt politician, oligarch and their operatives

First, send them a note, anonymously, to tell them that you, and the rest of the public, are coming for them.

Include a copy of this manual so that they know what is headed their way. Let them know that none of their New Zealand bolt holes, Cayman and Virgin Island hide-aways, private islands or Ukrainian dachas will protect them and that the public is EVERYWHERE that they are.

If they have nothing to hide, as they say, then they should not care. They should only be afraid of the truth if the truth is as disgusting as everyone says. If they are not buying hookers and rent-boys, laundering money, bribing politicians, manipulating elections, supporting sex cults, abusing interns, violating ant-trust laws and doing the other bad things they are charged with, it should not matter to them.

You undertake the investigative tasks using your personal computer and your free time completing tasks like the following:

1. Dig through their trash and buy their trash bags from the garbage man after they pick them up or pay the local homeless guy to do it for you
2. Locate a beneficiary for a probate proceeding with the name of their family on it
3. Research current and / or historical property holdings of every family member of the crooks
4. Identify mortgage information for each family member of the crooks
5. Identify secured lenders each family member of the crook has used
6. Identify related-party property transactions for money laundering
7. Determine current market value of real property that the crook or family members owns
8. Locate bankruptcy filings for any of their family members or companies
9. Retrieve and analyze bankruptcy records for any of their family members or companies

10. Uncover improper relationships with prostitutes, rent boys, sex cults, BDSM groups, One Taste, Nexium, Inner Circle and other sex abuse operations
11. Locate federal civil lawsuits against them on Pacer.gov
12. Locate federal criminal records against them on Pacer.gov and the 120+ private investigator websites
13. Retrieve and analyze federal civil and criminal records on each of their names
15. Provide independent analysis from other investigators
18. Acquire pictures of them entering or leaving restaurants, hotels, offices and other locations and identify who they are with
21. Identify the owner of related home or cell phone numbers
22. Determine owners of corporations they were involved with
28. Connect the dots via AI software analysis tools
31. Find all of their assets hidden under family trusts and facade corporations
36. Conduct discreet intelligence gathering
42. Show you routes of all of the tail numbers of their aircraft
43. Identify a will for an estate they or a family member might own
53. Identify potential whistle-blowers from their ex employees and contractors
59. Knock on doors for surveys about them
65. They use Google, Facebook and LinkedIn to spy on you. Get the information that Google, Facebook and LinkedIn sells to Axciom, Equifax and hundreds of other spy databases and run searches on THEM!
72. Find all of their ex lovers and aides on LinkedIn
122. Know that there are over 3000 additional forensic tools you can use to expose them 100% legally...
123. Read The Big Book <https://www.amazon.com/Big-Book-Revenge-Serious-Getting/dp/0806521414> and many "How To Be A Private Investigator"-type books.

=====

Match.Com Is A Sick Culture Operated By Sick, Mentally Deviant, Staff

Koty Neelis says: A few weeks ago my roommate T told me she had joined Match.com and was LOVING IT. She's the kind of girl that once she commits to something she puts her all into it. And so, with Match, it was the same as anything else. T had four dates a week, in various cities around the country. I admired her vigor. She was really going for it – love – that elusive thing we all crave in one way or another. Her level of enthusiasm for online dating is something I usually refrain for trips to my local bookstore or when the pizza delivery dude finally shows up.

T had so many dates she didn't really know what to do with them. One in particular she tried to pawn off on me. "I really think you'd be better for this date than me," she said. "I'm not going on your date for you. That's weird." I told her. Nevertheless she continued to text me while on the date. "I FOUND YOUR SOULMATE. HE'S PERFECT FOR YOU."

When she came home she told me she gave the guy my number and that she'd be waiting for invites to the wedding. Why was he perfect for me? "Well, he loves to travel. You love to travel. Ya know...you have...things... in common." Wtf? That was it? Whatever. I was skeptical but I figured I'd at least meet him. And what if he DID turn out to be soulmate? Then we'd have that funny story of how we met – "Hey, remember when you went on a date with my roommate but she wasn't into it all?" "Yeah!!"

Fast forward to the date and things are going well. He's a pretty cool guy and she's right, we have a ton in common (more than just travel), but I'm not getting the vibe. You know what I'm talking about – that feeling you get when you think someone is super awesome and you're like, Wow, how did I not know this person before? I want to hang out with them a lot!

There was absolutely nothing wrong with him, he was great, but something he said sort of weirded me out. So, we're talking about relationships and he tells me he has a "tendency to move really fast and that scares a lot of women away" Oh? Like what? I asked.

"Well..." he hesitated.

"I think it's totally normal for a girlfriend to move in after 4 months of dating."

"Ha! You do? That's my worst fucking nightmare," I told him.

"Why would that be your worst nightmare?" He asked defensively.

"After 4 months of dating!? That just seems like a huge step to make with someone. What's the rush?" He pretty much immediately changed the conversation and it was obvious at that point we were looking for different things. (Also, real talk: he was a vegetarian and did not appreciate my love for cheeseburgers).

And here lies my issue with Match.com – everyone on there is desperate to settle down.

After the date I told my roommate what happened and how I had a feeling everyone on Match was like this. She tried to say I was wrong, so using a Groupon (yay, discount love!) I decided to join Match for the first time and see what it was like. Immediately, I came upon profiles with phrases like "Looking for a bride," "Looking for a sweet girl to live with." Holy shit! I'm sorry but how is this not utterly insane to other people?

If you know you want your next relationship to be serious and long lasting that's totally fine. You should absolutely go for what you want, especially if you're in that phase of your life when you're ready to settle down, but there's something so unattractive about the sheer desperation of needing that kind of seriousness immediately. Are they really looking for someone to fall in love with or literally just anyone to fill the void? What's wrong with letting love happen naturally?

I've heard people say Match is better than a site like OK Cupid because people pay for their membership and if you pay for your membership everyone on there must have their shit together and be super great, right? Meh. I don't know. I've used OK Cupid in the past and it's obvious each online dating site has their own niche of people they attract, but overall, online dating isn't for me. Something about it just takes the fun out of meeting someone IRL.

Is everyone on Match like this or just the people within the radius of my dating profile? I'm genuinely interested to know what other people's experiences have been like on Match versus other sites. So, let me know. I'll be over here eating snacks and listening to some tunes.

Ryan Anderson points out Maslow's hierarchy of needs and conventional wisdom both suggest that love is a fundamental human need. Most people meet their significant others through their social circles or work/school

functions. However, these pools can be relatively shallow. In the search for a potential date, more and more people are switching to less traditional methods.

Online dating is really popular. Using the internet is really popular. A survey conducted in 2013 found that 77% of people considered it “very important” to have their smartphones with them at all times. With the rise of apps like Tinder (and the various copycat models), who could blame them? If you want to think about dating as a numbers game (and apparently many people do), you could probably swipe left/right between 10 to 100 times in the span of time that it would take you to interact with one potential date in ‘real life’.

With the popularity of sites like eHarmony, Match.com, OkCupid and countless others, the stigma of online dating has diminished considerably in the last decade. According to the Pew Research Center, the overwhelming majority of Americans suggest that online dating is a good way to meet people. Online dating services are now the second most popular way to meet a partner.

The popularity of online dating is being driven by several things, but a major factor is time. Online dating presents an effective solution to a serious problem.

Browsing profiles isn’t nearly as time-consuming (or daunting) as mixing with people in a social context. Statistics suggest that about 1 in 5 relationships begin online nowadays. It’s estimated that by 2040, 70% of us will have met our significant other online.

The problem with a lot of online dating applications is that they don’t really work. Before you throw caution to the wind and empty your wallet into the pockets of an online app with the reckless abandon of a love-struck teenager, there are a few things you should know.

1. People lie on their online dating profiles

OK, this is hardly an earth-shattering revelation. Well duh, people want to be appealing. Most people probably wouldn’t be surprised to learn that it’s more common for people to lie in their online profile than be completely honest.

A study of over 1,000 online daters in the US and UK conducted by global research agency OpinionMatters founds some very interesting statistics. A total of 53% of US participants admitted to having lied in their online dating profile. Women apparently lied more than men, with the most common dishonesties being about looks. Over 20% of women posted photos of their younger selves. But men were only marginally better. Their most common lies were about their financial situation, specifically about having a better job (financially) than they actually do. More than 40% of men indicated that they did this, but the tactic was also employed by nearly a third of women.

While dishonesty was slightly less prevalent among the British sample, 44% did admit to lying in their online profile. In both the US and UK samples, dishonesty declined with age. Maybe older people are just more interested in projecting their real self, rather than an imagined or ideal version.

2. Looking for a relationship? That must mean all you want is sex

One of the big problems with online dating for women is that, although there are genuine relationship-seeking men on the sites, there are also plenty of guys on there simply looking for sex. While most people would agree that on average men are more eager for sex than women, it seems that many men make the assumption that if a woman has an online dating presence, she’s interested in sleeping with relative strangers. Online dating does represent the convenience of being able to meet others that you possibly never would have otherwise, but women should be aware that they probably will receive rude/disgusting messages from horny guys, sexual propositions/requests, dick pics, and a lot of creepy vibes.

3. Negotiating the scam-ternet

Let's be honest, the internet is really just a super elaborate and sophisticated farce designed to distract you from having your pockets picked by greasy conmen in cheap suits, right? Not quite, but it is full of unscrupulous vendors looking to separate you from your money by whatever means possible (in other news, have you heard about the secret to getting killer abs in less than 7 minutes using this 1 weird trick...?).

There are pitfalls and tripwires in every sphere of life, but this may be particularly true in the context of online dating. There are literally hundreds (if not thousands) of online scams, and I'm not going to run through any in detail here, but do some research before you go giving your bank details to 'Nigerian princes' promising 'fun moments'. As a matter of fact, you should probably be wary of any person, group or entity asking for any kind of financial or personal information. It might even be advisable to follow these general guidelines:

Set up an anonymous email account from a widely used email service (I_heart_scamming123@gmail.com is already taken).

NEVER give out your home phone, address or personal email address unless you absolutely trust the recipient.

Drive yourself to the date (your date doesn't need to know where you live), keep an eye on your drink/food (...), pay half of the bill (you don't need your date having expectations of repayment).

Of course, there are plenty more do's and do not's of online dating, but I guess the most important thing here is to use your common sense. If something feels off, trust your gut. You don't necessarily have to develop a 'trust no-one and sleep with one eye open' approach to online dating, but it is probably worthwhile to have a healthy degree of skepticism in general.

4. Relationships don't last

Never mind the fact that more than one-third of all people who use online dating sites have never actually gone on a date with someone they met online, those that somehow do manage to find someone else they are willing to marry and who is willing to marry them (a vanishingly tiny subset of online daters) face an uphill battle. According to research conducted at Michigan State University, relationships that start out online are 28% more likely to break down in their first year than relationships where the couples first met face-to-face. And it gets worse. Couples who met online are nearly three times as likely to get divorced as couples that met face-to-face.

However, it isn't all misery and woe. While the overwhelming majority of romantic relationships still begin offline, around 5% of Americans who are currently in either a committed relationship or marriage indicate that they met their significant other online.

5. It makes you picky and judgmental

It's very easy to send one course back (or even one after another) when the menu is overflowing with other potential courses. According to the Association for Psychological Science, reviewing multiple candidates causes people to be more judgmental and inclined to dismiss a not-quite-perfect candidate than they otherwise would be in a face-to-face meeting.

Julia said of her experience on Match.com: Ok..... so I was insane enough to sign up for Match.com a few weeks ago, just to see. I mean, come on.... I was curious. Plus the dating scene in the Midwest SUCKS. Ok... and so maybe the three cups of coffee I had just consumed also likely played a role in my signing up during a study break. So I signed up.... yeah I admit it. And here are a few observations I have made.... 1) The Indian boys on Match.com that "wink" at Indian girls— it ain't the boys. It's their parents. Winking is free.....Indian parents are cheap.... Put two and two together. So, here's what I have to say to these parents: if ya really wanna to find a wife for your son on

Match.com, don't wink. The smart girls will figure it out, mock your son for not having any social skills, then mock him for needing Mommy and Daddy to find him a wife.... and then move on. Also.... don't write one sentence e-mails.... those are dead giveaways that he's not the author.... and the poorly written, grammatically incorrect collection of words further decreases your son's value on the Indian (or any other) dating market. Trust me....no girl with half a brain will write back.

That and the fact that most girls will cross check for them on shaadi.com and find 'em. They might also mock them for the info they find on shaadi.com. Observation #2: Watch out for the lurking Unabombers. So I once went out with this guy from Match.com who I remember thinking "too cabin in the woods." Next thing I know...he wants to build.... a cabin in the woods..... in Montana. 'Nuff said about this one. Observation #3: Match.com is set up to FAIL. Anyone that thinks it is gonna work for them is well.... NAIVE. Let's face it.... if match.com actually worked...then it would be a very unsuccessful business because slowly the demand for it would be lost. The point of Match.com is help you FAIL at dating. That's right Dr. Phil, I figured out your secret!!!!

If you really wanna find your match, save your money and spend it on something more tangible. Observation #4: Another note for you DESI parents: Chances are any Indian girl with a personality you wink at will find you to be their worst nightmare. Think that scene from Bend It Like Beckham, you know the one where a dejected Jess is spinning around with a pot on her head and sees these Indian faces leering at her as she realizes that she's lost the most important thing in her life and that there is no waking up from her nightmare. And yes..... you really do look that gaudy. Bright red, purple and blue with heavy gold bling wasn't meant for most people. Think simpler, and classier and consider the use of makeup that more closely matches your skin tone. Observation #5: Advice for you brainy girls out there.

Beware of the guys who don't have goals..... they also lack personalities. And will probably want you to just settle. So if they can't envision the state of their career..... head for the restroom and climb out the window. It's way better than lowering your standards. Let the nearest society girl pick them up. That's all for now..... Actually, no wait...here's a shameless plea I'd like to send out to my aunts and uncles in India for my upcoming trip here. Please, please, please don't take me jewelry or clothes shopping. The necklaces are heavy, they hurt to wear, they scar my skin. The earrings don't fit in my pierced ears. And it is all ugly. Plus I would never be caught dead in any of that stuff, especially after my mom pulled me aside once and told to never wear Indian clothes. Instead, save your money and earn my immense love and gratitude by taking me shopping for music CDs. I'm gonna go attempt to cook dinner now. Wish me luck. J

=====

New Software Revealed That Tracks The Dirty Money Laundering, Tax Evasions And Payola with Match.Com, And Related Sites; Their Executives, Investors and Insider Politicians

- New open-source, and free, public software let's any citizen get any corrupt official arrested. Any voter can use the software from the comfort of their living room. The AI replicates itself (Like A benign digital version of Covid) across the entire web.
- You can download a copy of the software or build-your-own version of it from freely available code at Github, CERN and Linux repositories.
- We have consulted to the SEC and the GAO on this technology.
- After suffering millions of dollars of losses from public official's Insider Trading schemes, we decided to do something about that!

Illegal and corrupt Congressional insider trading tends to be something we don't hear about until it's hit the big news networks and newspapers as the SEC goes for the throat of the accused. By then, unfortunately, those committing it have made their gains, usually in the multi-millions of dollars, and the damage has been done to the stock, its company, investors and the American Way. Covert stock market trades are now the #1 form of bribes in California and Washinton, DC.

Quite frankly, the jail time assessed doesn't correct the damage done, and the fines rarely aid the investors, or the voters, in getting their money and their democracy back. Many of those hurt are Average Joe's and Jill's who were just trying to save their retirement nest eggs. Shame is the tool that works best on the corrupt!

These crimes involve an investment banker spouse and a Senator or other top official, using information, which was not available to the public, buying and selling a company's stock in an underhanded manner. In many cases bribes have been paid with Google, Tesla or Facebook stock in a covert manner. It is particularly onerous when a Senators buys Tesla, Google, Facebook or Solyndra stock, and makes laws that only benefits Tesla, Solyndra, etc, while sabotaging their competitor constituents.

Because the dealings involved are pretty much done on the sly, it's been difficult, until now, for the governing body of the SEC to prove illegal insider trading, unless one of the cohorts tattles on the others or their actions become glaringly obvious. In some cases, a sharp mind around the action may take notice and become what's called a whistle-blower.

Previously, writes Andrew Beattie of Investopedia: "... insider trading is often difficult for the SEC to spot. Detecting it involves a lot of conjecture and consideration of probabilities." That was the 'old days', though. Today, the new AI software can bust through these scams like a hot knife through butter!

With this new open-source, free, public spy agency-class software, detecting illegal insider trading is actually less complicated than it sounds.

To the eyes of this new super-powerful AI observer server bot and peer-to-peer databases, it is easy work.

You, the citizen, just type the politician or agency employee name into a field and hit the "analyze" button. A few minutes later you receive a multi-page PDF report similar to an FBI report on the target. You can either research the subject in more detail or send copies of the report to the FBI, GAO, OSC, SEC or other enforcement group.

The software is an automated AI temporal matching system which includes 24/7 analysis of all stock trades involving politicians to its information source, politician finances, communications and policy participators. it uses some of the same software code used by the CERN mega-research center in Switzerland.

The technology Core Evaluation Points:

- Analyst estimates - these come from what an analyst estimates that a company's quarterly or annual earnings will be. They are important because they help approximate the fair value of an entity, which basically establishes it price on the stock exchange.
- Share volume - this reflects the quantity of shares that can be traded over a certain period of time. There are buyers and there are sellers, and the transactions that take place between them contribute to total volume.

One Way The AI Detects Congressional Insider Trades

Metricized signs of illegal insider trading occur when trades occur that break out of the historical pattern of share volume traded compared to beneficiary participation's of those connected to company and political entity. Another clue of the illegal insider trading is when a lot of trading goes on right before earnings announcements. That tends to

be a sign that someone already knows what the announcement is going to indicate, and it's an obvious violation. One module of the new software hunts these trends around-the-clock in an unmanned manner like a detective who never needs to sleep.

The software red alerts are issued when trades are linked closer to the actual earnings and politicians bills instead of what the predicted earnings were. In a corruption case, it's clear the trades - especially made by politicians close to the company - stemmed from information that was not readily available to the general public.

In other words, at the time an insider makes a trade, the trade has a stronger relationship to earnings guidance rather than to earnings results achieved.

Part Of The Insider Trading Detection AI Uses 'Dynamic Time Warping (DTW)'

In econometrics, which is a concept frequently used by quantitative analysts to evaluate stock market prices, dynamic time warping (DTW) is an algorithm that can be used for measuring similarity between two data sequences by calculating an optimal match between the two. This sequence "matching" method is often used in time series classification to properly "line things up."

The method, coupled with AI machine learning ensemble methods, can provide a clear path between the trades made by insiders and public data used to make the trades.

This is a product of artificial intelligence that has been expanded by Indexer, Splunk, Palantir and other firms fast becoming experts in products that can be used to advance the art of manipulating political and social trends in business and markets by using social media, financial data and news stories. The new software process has taken that sort of approach to the next level and targeted every member of Congress, their staff, family and friends. The first emphasis is on California and Washington, DC public figures.

In a hypothetical example, a group of executives failed to trade by industry standards by leveraging material non-public information and policy manipulation. Although consensus estimates called for higher commodity prices at the end of 2015, it appears key executives traded for their personal accounts as a result of the forecast provided by a specialist system within the firm that was adept at predicting prices alongside lobbyist manipulations. Flash-boy trading is now dirtier and powered by Google-class server systems.

In the hypothetical scenario the software aggregates executive trades in 2014 and 2015 and finds a strong link between buys and sells of executive stock options, which line up with material non-public estimates of commodity prices that were provided by the specialist system.

For example, in a "Exec Sell and Exec Buys" graph, a green line represents sells, while a black line represents buys. In the corresponding period, one finds a red line represents unrevised prices provided by the specialist system, and green line represents consensus estimates.

During Q1-2014, there was \$28M in purchases of executive stock options, while in Q2-2014, there was \$25M in sales of executive stock options. The specialist system called for Q3-2014 commodity prices to make a precipitous decline going into the end of 2014. Remember, under this scenario, no revisions were made to the specialist systems' price forecast. In this example, executives were afforded a significant advantage using price predictions from the specialist system.

In a final bullet chart, there was a dynamic time warping distance between trades and consensus estimates of 7.23, but this distance is only 2.19 when comparing specialist system estimates and executive trades. Please note, the closer the distance score is to zero, the more similar the trades are to the estimates they are measured against.

We have applied this process to companies well-known for influence buying like, Google, Tesla and Facebook

It's obvious that the tech executives involved did not follow industry standards in their actions and make public the "insider" information they had access to prior to the trades they made. The lobbyists they hired promoted this rigged trend and paid off Senators with perks. These are the kind of violations the SEC and other governing bodies can look to in attempting to protect the trading public and the integrity of financial marketplaces. Artificial intelligence tools are a major factor in assisting the tracking of insider trading.

"Every facet of our everyday lives has been impacted, infiltrated and greatly influenced by artificial intelligence technologies," says Vernon A. McKinley, a multi-jurisdictional attorney, based in Atlanta. "In fact, the U.S. government and its multiple agencies have developed specialized intelligence units to detect, track, analyze and prosecute those unscrupulous individuals seeking to profit from the use of such tools, specifically in the financial industry, and to protect the integrity and strength of the U.S. economy and its investors." Now these tools are being turned against the corrupt!

The public can now detect trading anomalies in financial situations using this artificial intelligence software on their desktop computers. No public official will ever be able to do these kinds of corruptions, again, without getting caught.

This approach has already had an impact on how political insiders trade on Wall Street and in financial markets around the world.

This technology can end this corruption forever!

A module of the software uses data from The Center for Responsive Politics, ICIJ Panama Leaks records, Swiss Leaks records and FEC files to reveal covert routes. Famous politicians own part of Tesla Motors, Facebook, Google, Netflix, YouTube and other companies they helped get government money for. All of their competing constituents have suffered for it or been put out of business by exclusive deals that only Tesla Motors, Facebook, Google, Netflix and YouTube got. That is a crime and charges have been filed with federal law enforcement.

A large volume of forensic research proves that Silicon Valley Cartel tech firms receive benefits from politicians and politicians, at the same time, benefit from these firms.

This evidence on the exchange of benefits between politicians and firms proves an agreement between the politicians and the companies. This agreement, however, cannot be in the form of a written contract as writing direct fee-for-service contracts between a politician and a firm is considered bribery (Krozner and Stratmann 1998; 2000). In addition, either party to this agreement might renege on its promise and the other party cannot resort to the courts.

Procon.org, for example, reports: "Less than two months after ascending to the United States Senate, and before becoming President, one Senator bought more than \$50,000 worth of stock in two speculative companies whose major investors included some of his biggest political donors.

One of the companies was a biotech concern that was starting to develop a drug to treat avian flu. In March 2005, two weeks after buying thousands of dollars of its shares, this Senator took the lead in a legislative push for more federal spending to battle the disease. The most recent financial disclosure form this Senator . . . shows that he bought more than \$50,000 in stock in a satellite communications business whose principal backers . . . had raised more than \$150,000 for his political committees." See more examples from the Citizens for Responsibility and Ethics in Washington (CREW) report (2009.)

The literature and eye-witness experience proves that politically-connected Silicon Valley tech firms monthly obtain economic favors, such as securing favorable legislation, special tax exemptions, having preferential access to finance, receiving government contracts, or help in dealing with regulatory agencies. The evidence proves that Google's support, for example, can help in winning elections. For example, firms can vary the number of people

they employ, coordinate the opening and closing of plants, and increase their lending activity in election years in order to help incumbent politicians get re-elected. (See Roberts 1990; Snyder 1990; Langbein and Lotwis 1990; Durden, Shorgen, and Silberman 1991; Stratmann 1991, 1995, and 1998; Fisman 2001; Johnson and Mitton 2003; Ansolabehere, Snyder, and Ueda 2004; Sapienza 2004, Dinç 2005; Khwaja and Mian 2005; Bertrand, Kramarz, Schoar, and Thesmar 2006; Faccio 2006; Faccio, Masulis, and McConnell 2006; Jayachandran 2006; Leuz and Oberholzer-Gee 2006; Claessens, Feijen, Laeven 2008; Desai and Olofsgard 2008; Ramanna 2008; Goldman, Rocholl, and So 2008, 2009; Cole 2009; Cooper, Gulen, and Ovtchinnikov 2009; Correia 2009; Ramanna and Roychowdhury 2010; Benmelech and Moskowitz 2010.)

The software can see that the share ownership of politicians serves as a mechanism to quid-pro-quo their relationships with big tech firms, is as follows: The ownership of politicians plays multiple distinct (but not necessarily independent) roles; one that relies upon the amount of ownership and one that does not. First, as investors in firms, politicians tie their own interests to those of the firm. Thus, harming (benefiting) the firm means harming (benefiting) the politician and vice versa. By owning a firm's stock, politicians commit their personal wealth to the firm and reduce a firm's uncertainty with regard to their actions toward the firm. This will, in turn, enhance the firm's incentive to support the politician-owner during both current and future elections in order to prolong the incumbency period for as long as possible. Firms have their lobbyists push to be able to know the amount of ownership likely to be material to politicians. This knowledge, in turn, enables them to judge whether the politician's interest is aligned with the firm's interest and optimize quid-pro-quo.

The Political Action Committee (PAC) contribution of firms (which is a direct measure of benefits flowing from firms to politicians) is a significant determinant of ownership allocations by members of Congress. The ownership of Congress members in firms that contribute to their election campaigns is roughly 32.8% higher than their ownership in noncontributing firms even after accounting for factors that are associated with both ownership and contribution (such as familiarity, proximity and investor recognition).

The committee assignments of politicians is a proxy for whether their relations with firms are enforced (Kroznor and Stratmann 1998). Silicon Valley tech firms like Facebook, Tesla and Google obtain private benefits out of their mutual relations with politicians. When the strength of the association between ownership and contributions at the firm level increases, the provision of government contracts to those firms increases.

Members of Congress, candidates for federal office, senior congressional staff, nominees for executive branch positions, Cabinet members, the President and Vice President, and Supreme Court justices are required by the Ethics in Government Act of 1978 to file annual reports disclosing their income, assets, liabilities, and other relevant details about their personal finances.

Personal financial disclosure forms are filed annually by May 15 and cover the preceding calendar year. The Center for Responsive Politics (CRP) collected the 2004–2007 reports for Congress members from the Senate Office of Public Records and the Office of the Clerk of the House. The Center then scanned the reports as digital images, classified the politicians' investments into categories including stocks, bonds, and mutual funds, and built a database accessible via a web query.

Using CRP's data, you can use the software to collect the shares in S&P 500 firms held by members of Congress between 2004 and 2007, for example. You can collect the stock ownership data for every firm that joined the S&P 500 Index any time between January 2004 and April 2009; regardless of when it joined the index, and the software can obtain all the available stock ownership data for that firm between 2004 and 2007. Likewise, if a firm dropped out of the index at any time during 2004–2008, the software, nevertheless, will retain the firm in a sample for the

target period. As such, the sample would include stocks in hundreds of unique firms owned by politicians between 2004 and 2007, for example.

Politicians are required to report only those stocks whose value exceeds \$1,000 at the end of the calendar year or that produce more than \$200 in income. They are CURRENTLY not required to report the exact value of the holding, but instead must simply check a box corresponding to the value range into which the asset falls. The CRP then undertakes additional research to determine the exact values of these stocks. When the Center makes these determinations, it reports them instead of the ranges and I use these values in my study. When only the range is available, you should use its midpoint as the holding's value. You would, thus have data on the stock holdings of hundreds politicians for that time period.

Using the software, you can search for all Political Action Committees (PACs) associated with tech firms. It then collects data on each contribution these PACs made to candidates (both the winners and losers) running for the Senate and House elections. Tricky corrupt Silicon Valley firms establish several PACs, each in a different location, and each of these PACs can contribute to the same candidate. In such cases, the software would total, for each candidate, every contribution he or she received from PACs affiliated with the same firm. To parallel the investment data sample period, for example, the software collects every contribution made from the 2003–2004 cycle up to and including the 2007–2008 cycle. Many Silicon Valley tech firms use deeply covert Fusion GPS, Perkins Coie, BlackCube, Psyops-type service to make very hidden additional payola payments to California politicians.

For sources, for example, the software collects government contract data from Eagle Eye Publishers, Inc., one of the leading commercial providers of Federal procurement and grant business intelligence and <http://www.usaspending.org>

Eagle Eye collects its contract data from Federal Procurement Data System–Next Generation (FPDS-NG), the contract data collection and dissemination system administered by the U.S. General Services Administration (GSA). FPDS-NG provides data on procurement contracts awarded by the U.S. Government. When these contracts are awarded to company subsidiaries, Eagle Eye searches for the names of their parent companies and assigns each subsidiary to its appropriate parent. The software collects both the number and aggregate value of government contracts that were awarded to sample firms between 2004 and 2007 in this example time-frame..

The software reveals, for example, that one Representative is a ten-term member of Congress and a senior member of the House Financial Services Committee. They arranged a meeting between the Department of Treasury and One United Bank, a company with close financial ties to themselves, involving both investments and contributions.

“In September 2008, the Representative asked then-Secretary of the Treasury Henry Paulson to hold a meeting for their friends in banks that had suffered from Fannie Mae and Freddie Mac losses.

The Treasury Department complied and held a session with approximately a dozen senior banking regulators, representatives from those banks, and their trade association. Officials of One United Bank have close ties to the Representative and attended the meeting along with the Representative's chief of staff. Kevin Cohee, chief executive officer of One United, used the meeting as an opportunity to ask for bailout funds.

. . . Former White House officials stated they were surprised when One United Officials asked for bailout funds. . . . In December 2008, the Representative intervened again, asking Treasury to host another meeting to ensure their banks received part of the \$700 billion allocated under the Troubled Asset Relief Program. . . . Within two weeks, on December 19, 2008, One United secured \$12.1million in bailout funds. . . . This was not the first time the Representative used their position to advance the interests of the bank. the Representative's spouse became a shareholder in One United in 2001, when it was known as the Boston Bank of Commerce. In 2002, Boston Bank of Commerce tried to purchase Family Savings, a friend of the Representative in Los Angeles. Instead, Family Savings

turned to a bank in Illinois. The Representative tried to block the merger by contacting regulators at the FDIC. The Representative publicly stated they did not want a major bank to acquire a bank that the Representative was friends with.

When the Representative's efforts with the FDIC proved fruitless, the Representative began a public pressure campaign with other community leaders. Ultimately, when Family Savings changed direction and allowed Boston Bank of Commerce to submit a winning bid, the Representative received credit for the merger. The combined banks were renamed One United. . . . In March 2004, the Representative acquired One United stock worth between \$250,001 and \$500,000, and the Representative's spouse purchased two sets of stock, each worth between \$250,001 and \$500,000. In September 2004, the Representative sold their stock in One United and their husband sold a portion of his.

That same year, the husband joined the bank's board. . . . One United Chief Executive Kevin Cohee and President Teri Williams Cohee have donated a total of \$8,000 to the Representative's campaign committee. . . . On October 27, 2009, less than two months before One United received a \$12 million bailout, the bank received a cease-and-desist order from the FDIC and bank regulatory officials in Massachusetts for poor lending practices and excessive executive compensation . . . the bank provided excessive perks to its executives, including paying for Mr. Cohee's use of a \$6.4 million mansion . . .” (Ref: CREW report 2009, pp. 123–125)

Thanks to Crony quid-pro-quo revelations by an earlier version of the software, you can also see that Fisker Automotive, Inc.'s \$529 Million U.S. Taxpayer Loan Approval by the Department of Energy was dirty. Fisker Automotive's Chief Operating Officer Bernhard Koehler pleaded with the Department of Energy in a panicked Saturday midnight hour email to receive a \$529 million loan as the company was 2 weeks from Chapter 7 liquidation, that it was laying off most of its employees, that no private sector investors would fund the company without DOE guarantees, and that Fisker was unable to raise any further equity funding from independent private-sector investors given the company's financial condition. These statements were made to a Loan Officer at the DOE . No private sector Loan underwriting (approval) committee would ever grant a low interest loan to a desperate buyer that had just confessed it was in a state of insolvency and was about to layoff most of its staff. Yet within a few weeks the DOE would approve a \$529 Million Credit Facility to Fisker. Despite the DOE Loan Officer official's sworn testimony at April 24th's House Oversight Committee that the DOE used "same private sector underwriting standards when approving Fisker and other approved Taxpayer Funded Loans" - likely perjury based in documents.

In a 'U.S. GOVERNMENT CONFIDENTIAL EMAIL': FISKER AUTOMOTIVE: August 2009: Co-Founder Bernhard Koehler emails U.S. Dept. of Energy Loan Officer in Sat. midnight Panic admitting VC Firms all declined to invest, and company is out of cash. Weeks later the U.S. Department of Energy approves \$529M U.S. Taxpayer Funded Loans to FISKER. NO PRIVATE SECTOR Lender would ever authorize a Loan for even \$5 Million let alone \$529 Million after receiving this email stating private sector investors had examined the company and declined equity investments, that they might loan money as more secure Debt, and the Chief Operating Officer of the company further stating that the borrower is totally insolvent. (Weeks after this email the U.S. Federal Government Dept. of Energy Loan Committee Approves Fisker Automotive as a credit-worthy borrow for \$529 Million in U.S. Taxpayer Funded Loans). Fisker got the cash because President Obama said to "give it to them" in order to please his campaign financiers.

The same thing happened with Tesla Motors. Elon Musk and Tesla Motors were broke when DOE gave them the money.

PrivCo CEO Sam Hamadeh stated in an official statement: “The documents obtained by PrivCo paint a picture of how an insolvent, unproven automaker received \$192 million in taxpayer funding. The Department of Energy made

a loan that no rational lender would have made. This loan was the equivalent of staying execution on a company that was terminally ill to begin with." Tesla and Fisker could not have been taxpayer funded unless bribes and criminal quid-pro-quo was underway by President Obama and the U.S. Senator insider traders.

Since its ruling in *Buckley v. Valeo*, the U.S. Supreme Court has expressed concern regarding corruption or the appearance of corruption stemming from political quid pro quo arrangements and the deleterious consequences it may have on citizens' democratic behavior. However, no standard has been set as to what constitutes "the appearance of corruption," as the Court was and continues to be vague in its definition. As a result, campaign finance cases after *Buckley* have relied on public opinion polls as evidence of perceptions of corruption, and these polls indicate that the public generally perceives high levels of corruption in government. The present study investigates the actual impact that perceptions of corruption have on individuals' levels of political participation. Adapting the standard socioeconomic status model developed most fully by Verba and Nie (1972), an extended beta-binomial regression estimated using maximum likelihood is performed, utilizing unique data from the 2009 University of Texas' Money and Politics survey. The results of this study indicate that individuals who perceive higher levels of quid pro quo corruption participate more in politics, on average, than those who perceive lower levels of corruption.

Quid pro quo is not a difficult concept to understand. Too bad the media doesn't endeavor to investigate and explain it. Your politicians don't work for you, they work for their own insider trading stock market holdings for themselves!

SOURCE CODE RESOURCES FOR YOU TO FORK OR MODIFY AS ANTI-CORRUPTION TOOLS:

- Spoke: Spoke is a peer-to-peer texting platform for collaborative investigation with several forks under active development.
- Pollaris, A polling location lookup tool modified to track bad guys. You can integrate this with your website and other tools. An API is provided.
- Caucus App: A way to quickly calculate citizen and pro member evidence sets and report results from each investigator.
- Switchboard (FE and BE): This software takes new potential volunteers, or "hot leads," from your online channels and assigns them to state or section-based based volunteer leads for personal follow up calls offering ways to get involved with the investigations. This is also a great tool for investigation team recruitment.
- Automated organizing email: Your teams can work together to scale email outreach to the widest possible audience and bypass any cover-up.
- Redhook: Investigations run on data, and redhook is a tool that makes data happen. As a system, Redhook ingests web hook data and delivers it to Redshift/Civis in near real time.
- I90: This tool makes a long file name or hard to remember legal evidence document into a short, easy-to-remember, link.
- opendata.cern.ch: The CERN Database Open Source
- <https://github.com>
: One of the collaborative development nets
- <https://citizensleuths.com>
: An example of over 1000 public forensic groups working on crowd-sourced crime-fighting

You are building a forensic anti-corruption version of XKEYSCORE and submitting your results reports to law enforcement and news outlets. Simply look in torrents and code databases like GITHUB, and similar sites, for forensic database and mass collaboration code and you will have a working module up in no time at all if you are a Tier 2 coder, or better.

Amateur Web Sleuths are Solving Cold Cases, You can Too!

Read How

The Skeleton Crew: How Amateur Sleuths Are Solving America's Coldest Cases, by Deborah Halber, describes how amateur web sleuths are helping with cold cases.

How To Use 'The Streisand Effect' To Pass The Word About A Slime Ball Operation Match.Com Is

- How a private-property dispute birthed a web phenomenon.

In 2003, a picture of Barbra Streisand's beachfront home hit the web as part of a public collection of images displaying coastal erosion. In response, in February 2003, Streisand sued the photographer for \$50 million for invasion of privacy, claiming violation of a state law aimed at the telephoto lenses of paparazzi.

Ironically, the media attention surrounding the lawsuit made the photo of her house go viral (at least in 2003 terms). In the month before the lawsuit, the picture had been downloaded only six times, including twice by her lawyers—whereas the image was downloaded more th

an 420,000 times during the month following the lawsuit. This paradoxical result—where an attempt to silence, suppress, or stop something backfires—was dubbed the Streisand effect.

Let's take a closer look at the Streisand effect.

-- Examples of the Streisand Effect

Here are three different times the Streisand effect was apparently reified by real-world examples.

In 2012, a Scottish schoolgirl named Martha Payne started blogging about her school lunches and included pictures of the meals, which, as could be expected by anyone who has ever been to school, were unappetizing.

Soon, celebrity chef and food activist Jamie Oliver tweeted out his support, and the blog garnered three million hits in two months. Consequently, local government authorities banned Payne from taking photos of the lunches because (they claimed) cafeteria workers were worried about getting fired. Even though the authorities quickly reversed this decision, for them it was too late, and the British national media and the Internet ran with the story.

In 2013, BuzzFeed ran a list titled "The 33 Fiercest Moments From Beyoncé's Halftime Show." Although the intention of the list was likely laudatory, some of the still photos were considered "unflattering."

Consequently, Queen Bey's publicist contacted BuzzFeed to request that the unflattering photos, which were cited, be switched out. BuzzFeed responded with a follow-up piece titled "The 'Unflattering' Photos Beyoncé's Publicist Doesn't Want You To See," which included an email from the publicist and the cited shots.

Subsequently, the Internet did its thing, and a meme was born. Countless "unflattering" shots of Beyoncé as a zombie, powerlifter, anime cartoon, and so forth popped up.

In 2014, cab drivers from across Europe went on strike to decry the lack of regulation of the ride-hailing app Uber. Without cabbies on the roads, riders turned to Uber, with downloads of the app increasing more than eight times in London alone.

Deconstructing the Streisand effect to use against corrupt social media executives

Mr. Rubin, the creator of Android, at Google, was caught up using sex trafficking and sex slavery by his wife. She exposed him using the Streisand Effect.

In an article published in the International Journal of Education, Sue Curry Jansen and Brian Martin explained how the Streisand effect is a consequence of failed censorship attempts. These outrage-management processes include cover-up, defamation of the target, reframing events, false justice, and intimidation or rewards.

The authors also argued that censorship is a process that requires active maintenance to conceal the actions of powerful people. Furthermore, they wrote that a clearer understanding of outrage-management processes “stimulates awareness of tactics for challenging censorship by exposing its existence, validating the censored information, explaining the importance of free expression, not relying on official channels for solutions but instead mobilizing wider awareness and support, and resisting intimidation and rewards.”

By the way, you may be wondering how Babs's court case turned out. The chanteuse not only brought viral attention to her bluff-top estate by bringing the suit in the first place but the suit was dismissed in December 2003.

Google, YouTube and Facebook have commercialized "The Streisand Effect" by deploying computerized processes to steer the public towards, or away from, one product, candidate or point-of-view using manually programmed directions.

Former motor racing boss Max Mosley is suing Google for continuing to display photographs he says breach his privacy. But does pressing for information to be kept private, or suppressed, often have the opposite effect?

At first sight not much unites Beyonce and Max Mosley. But they, and several other celebrities and organisations, have become victims of the "Streisand effect".

In 2005, Mike Masnick, founder of the Techdirt website, coined the term. Two years earlier singer Barbra Streisand unsuccessfully sued photographer Kenneth Adelman, who was documenting the coastline of California, for including her cliff-top home in Malibu. The resulting publicity helped drive 420,000 visits in a month to the site where the photo was published. According to documents filed in court, images of Streisand's house had been downloaded only six times before the legal action.

It's not always a fight over privacy. In February last year the BuzzFeed website published a selection of singer Beyonce's "fiercest moments" - mocking her facial expressions while performing at the Superbowl. Her publicist reportedly contacted it to ask that seven of the most "unflattering" photos be removed. BuzzFeed refused and republished exactly this selection with the headline: "The 'Unflattering' Photos Beyonce's Publicist Doesn't Want You To See". The exposure of the unflattering photos was magnified.

A few months later it was reported that lawyers for Pippa Middleton, sister of the Duchess of Cambridge, had asked for the removal of a parody Twitter feed, which offered ridiculously obvious lifestyle advice in her name, such as "Avoid getting lost by consulting with a map" and "A party isn't much fun without people attending". Its following increased.

In 2008 the Church of Scientology reportedly tried to get a video featuring film star Tom Cruise talking about his faith, designed for viewing by its followers only, removed from websites after it was leaked. The publicity meant it became shared more widely.

In 2012, Argyll and Bute Council banned nine-year-old Martha Payne from taking pictures of her school meals and posting them, along with dismissive ratings out of 10, on a blog. Her family complained and this was overturned, amid much publicity. To date the blog has had more than 10 million hits and Martha has raised more than £130,000 for charity.

You don't need to be famous to suffer from the Streisand effect. Spaniard Mario Costeja Gonzalez fought a long legal battle for the right to be forgotten. He complained that a search of his name in Google brought up newspaper articles from 16 years ago about a sale of property to recover money he owed.

He enjoyed a landmark victory to establish the right to be forgotten. But it is unlikely he will ever be forgotten. As of this moment, his name conjures up hundreds of thousands of Google search results.

The Streisand effect history

- Term first used in 2005 by Mike Masnick, founder of the website Techdirt
- Denotes increased publicity as a result of attempts to remove embarrassing online content
- Followed a failed attempt in 2003 by singer Barbra Streisand to sue a photographer who posted a picture of her seaside home on a website

But Max Mosley is arguably the greatest example. He is suing Google for continuing to display in search results images of him with prostitutes at a sex party, citing alleged breaches of the Data Protection Act and misuse of private information. Every time he makes a legal move in his crusade over privacy, there's a danger it becomes more likely people will seek out the very images he is complaining about.

The 74-year-old former president of Formula One's governing body FIA wants Google to block pictures first published in the now-defunct tabloid News of the World, which he successfully sued in 2008. "As the gateway to the internet Google makes enormous profits and has great influence, so I have not taken this action lightly," he has said in a statement. His lawyers add that the company should not be allowed "to act as an arbiter of what is lawful and what is not". Google says it has been working with Mosley "to address his concerns".

But is there a risk that Mosley will cause himself more embarrassment by bringing a fairly old, and perhaps half-forgotten, news story back to people's attention? A survey of Twitter shows some users are posting the pictures that he is keen to remove.

"Anyone trying to get something banned is always going to be of more interest than something that people don't seem bothered by," says Jenny Afia, head of talent at the law firm Schillings. "It's a spark for curiosity."

In previous generations there's no doubt it was more straightforward to attempt to suppress information or images. The ease of sharing now almost means that nothing can really be suppressed.

You could argue that the internet makes attempts to guard your privacy risky on a scale proportional to the likelihood of your privacy being meaningfully breached in the first place. If there was a danger that lots of people would circulate a private photo of you doing something embarrassing, it's very likely that trying to suppress it will have the opposite effect. If there was little danger that the photo would have been circulated, an attempt at suppression might not trigger the Streisand effect.

There are endless mischief-makers who would dedicate themselves to propagating information that someone wanted hidden, just for the very fact of the attempt to hide it.

Mosley is a wealthy man used to publicity. Yet suing could mean a stressful, drawn-out court case, covered in detail by the media.

"It's a horrible dilemma for people who are faced with horrible or untrue stories," says Afia. "That's where Max Mosley is very brave to keep fighting. Many people decide to let it go."

For the likes of Mosley and Costeja Gonzalez, the principle surely supersedes the actual effect of legal action. They effectively end up fighting for the right of others to more easily safeguard their privacy. Even at the de facto cost of their own.

And there's a clear difference between those fighting for a right to privacy and those, like Beyonce's representatives, who are merely trying to manage a reputation or public image. There the Streisand effect is potent. If your reaction to mockery is to try and squash it, there will be lots more mockery.

Google's and Facebook's servers are built and programmed to manipulate the The Streisand Effect for commercial goals. Should Congress allow that?

When The Silicon Valley Match.com frat cartel tried to bury outsiders, they discovered that they were seeds

By Andrew Cosgrove

When you bury a seed, it blooms, and blooms and blooms and millions like it fill the fields...

As American streets are flooded with protests so large that they have changed the course of history, eyes are now turned towards the exclusionary, misogynist, money-laundering, bribery-based, hooker-trafficking frat boys that run Silicon Valley.

In the latter half of the 19th century, before the advent of income tax, there existed a class of millionaires in this country who used many unscrupulous means to gain immense wealth, separating themselves from the working class of the country by previously unheard-of multiples.

The Vanderbilts, the Astors, the Carnegies, the Mellons, the Rockefellers and numerous other “industrialists” (today, we would call them globalists) were able to amass great fortunes and live like royalty, with much of their power enabled through the workings of the politicians they influenced via graft.

In their day and age, they were known as “robber barons,” after the wealthy lords of aristocratic Germany, where landowners charged commoners an illegal tax for passing over their land.

Historian Hal Bridges wrote that the robber barons were “business leaders in the United States from about 1865 to 1900... a set of avaricious rascals who habitually cheated and robbed investors and consumers, corrupted government, fought ruthlessly among themselves, and in general carried on predatory activities comparable to those of the robber barons of medieval Europe.”

Many students of history argue that America’s robber barons were only tamed by the introduction of antitrust laws such as the Sherman Act and the Clayton Act of 1890 and 1914, respectively, as well as the introduction of income tax in 1913 and the stock market crash of 1929. Until that time, the power of these business titans was left mostly unchecked.

Many politicians — especially in large cities like New York — were bought off by their riches and voted for (or even created) laws that would favor and broaden these men’s empires. Regulations, agreements, waivers and amendments were passed that allowed many of these wealth-hoarders to assemble legal monopolies that would almost certainly be outlawed today.

In fact, if one took the wealth of some of these men (like the Rockefellers) and adjusted it for inflation into today’s dollars, their riches would surpass those of even Bill Gates or Jeff Bezos.

But it's these latter figures who now belong to today's equivalent class of men that can be considered the "robber barons" of our own era — the billionaires of high-tech Silicon Valley.

When the Internet boom first occurred in the 1990s, Silicon Valley was quick to tell Congress that Internet sales should not be subject to taxes and that the Internet should not be regulated, lest this burgeoning marketplace be trampled to death before it could fully blossom.

But that was then. In the interim, fortunes have been made, and a very small number of players (Amazon, Google, eBay, Facebook, Craigslist, Netflix, Airbnb, Uber) have dominated specific product niches and made certain savvy players such as the aforementioned Bezos and Gates — along with Mark Zuckerberg, Eduardo Saverin, Larry Page, Sergey Brin, Eric Schmidt, Pierre Omidyar, Craig Newmark, Brian Chesky, Steve Ballmer and Larry Ellison, among others — insanely rich.

In fact, these people's extreme wealth, along with the relatively unregulated and untaxed industry that gave them that wealth, has convinced many of them that they have the innate right to tinker with markets and monopolies without undue fear of being legislated against or taxed as other industry leaders have been.

In many cases — Bezos, Zuckerberg and Gates being some of the most notorious examples — they've been falling all over themselves to enter still further niches — automated cars, robotics and drones, for example — in order to dominate those markets also by using their tremendous fortunes to either acquire the leading players in these industries or to drive them out of business through ruthless competition.

Along the way, the enormous power their market monopolies have given them in terms of the data they've been able to compile and the information they've been able to acquire on ordinary American citizens has enriched them even further — some would say dangerously so.

In many ways, these men (there are virtually zero women among their number) are the proper inheritors of the "robber baron" title today; they've become so wealthy, most often through unique, once-in-a-lifetime opportunities of timing and markets, that the rest of us can't ever hope to come anywhere near their gargantuan fortunes.

Their companies have a permanent presence in Washington, D.C. and rank among the very top retainers of lobbying firms. Left unencumbered, these "masters of the universe" could have a very real potential of ruling over the lives of nearly everyone on the planet in some way for the rest of our lifetimes.

Even now, rumors have been floated that tech billionaires Mark Zuckerberg and Mark Cuban might want to run for president in 2020 or 2024. Nearly all of these men are large contributors to the Democratic Party and have met with Democratic politicians, including Barack Obama, Hillary Clinton, Bill Clinton, Nancy Pelosi and Kamala Harris both one-on-one and in groups.

High among their concerns are that immigrants keep flowing across the country's borders in order to keep their biggest costs — intelligent labor — low. Quick to outsource to foreign countries and even quicker to leave profits offshore to evade taxes, these billionaires are extremely adept at using the law and corrupt politicians to their advantage.

For most of them, the concerns of the common man (the users of their properties) rank far beneath whatever it is that will further expand and perpetuate their empires. The gap between their ilk and that of the working class has multiplied in the last two decades, at the expense of America's middle class.

Like the robber barons of old, these men are addicted to money, and they can never have enough of it to satisfy their own egos. To them, the laws of the United States are just a tool to access more wealth, and whatever political levers and switches they need to throw in order to get their way are simply a means toward an ultimate end.

After more than 20 years in many cases, it's now long past time to put the regulatory brakes on these people's ventures and business power grabs before we turn into a society ruled by technology and a few men behind thin, oversized flat-panel displays. Companies that have too much power and too much wealth concentrated in too few hands may need to be broken up just as the railroad concerns, oil cartels and steel companies of the original robber baron days were by Washington. Trent Lapinski says: "Silicon Valley is run like a cartel, and they are essentially modern day robber barons...."

"...I've actually been working on a similar article myself called "Is Silicon Valley A Cartel?" but I haven't had a chance to finish writing it yet. Perhaps I need to revisit it and publish.

Most of the major tech companies are now using technology to segregate the masses, and social engineer the entire planet much like Hitler and the Nazis attempted previous to WW2, except now the technology exists to do this on a massive scale.

To understand Silicon Valley today, you have to look back to the past and understand how we got here. When Silicon Valley was first founded as a tech hub in the late 1940-50's it was under the intention of developing computer technology for military industrial purposes. The intention was always to further America's technological superiority over the rest of the world.

Many people do not realize that Google and Facebook were both initially funded with both VC and defense contractor money, and many of the tech companies like Amazon have contracts with the CIA and Deep State. Modern day Silicon Valley is the surveillance arm of the Deep State, and has always been an arm of the military industrial complex.

Meanwhile, social media has purposely been engineered to put people in echo chambers, and control the masses. Even Medium is guilty of this, I have nearly 13k followers, yet every time I publish I barely reach 10% of my following. Twitter and Facebook are even worse.

To make matters worse, it gets even more complicated politically. What a lot of people do not know or realize is that after the 2008 market crash Obama was financed by Silicon Valley to get him into office.

Once he was in office he struck a deal with the Federal Reserve to bail the economy out and printed a bunch of money which was handed to the Silicon Valley VC firms and tech companies to rebuild the economy.

What those VC firms did with the money was inflate the current tech bubble with printed money by driving up housing costs, pricing out locals and Millennial's outside the tech industry, and pretty much destroying the local economy in the Bay Area. While the Bay Area was arguably screwed anyway with the market crash, and the tech industry does provide many jobs, they ultimately didn't give those jobs to the locals and brought in indoctrinated college grads to displace much of the local population and pay them just enough to survive but not enough to buy property.

Mormon church couldn't care less about sex abuse victims, says son of pedophile bishop who was 'shielded' by religious leader now charged with covering up crimes

Rhett Hintze, a senior leader within the Mormon church in Pennsylvania, was charged on Jan 31 with failing to report allegations of sexual abuse against a former bishop under his charge.

They then invested in companies that either launder money to increase their power, collect everyones data, spy on their users, or distract and divide them with propaganda. They also invested heavily in machine learning and A.I. so that they can automate most jobs in the future, and we are now at a point where A.I. is advanced enough to censor

the Internet (which Google/Youtube, and Facebook are already doing). This is enabling these companies to become complete and total monopolies, and push political ideologies on the masses with no basis in logic, reason, or reality.

Meanwhile, the billionaires, investors, and CEOs of these companies are so far disconnected from the struggles of every day Americans they actually believe what they're doing is for the greater benefit of humanity. Many of them fancy themselves as superior to the rest of the country, and world, and all their political nonsense is mostly hypocritical virtue signaling rooted in identity politics. The very same identity politics the Nazis used so successfully to divide and conquer the masses during WW2 but with a hypocritical modern day left leaning political spin.

With all that said, what Silicon Valley billionaires are doing is wrong, and hypocritical. However, please don't blame the people, even the tech bros, because even they're all just brainwashed and trying to survive just like everyone else and most don't even realize they're slaves to a system that does not have their long-term interests in mind.

Source: Born and raised in the Bay Area..."

Bill Snyder of globally published InfoWorld Magazine says: " Silicon Valley: Land of the 21st-century robber barons... Apple, Amazon.com, eBay, Facebook, Google, and the other technorati believe someone else should pay taxes, hire Americans, or support the society they sell to. When it comes to paying taxes, Apple doesn't "think different." Like every other global corporation, it does its best to pay as little as is legally permissible. The difference, though, is that Apple does it better than most and tries to convince the people who are stuck with the bills that this is a perfectly normal state of affairs.

In just three years, Apple's tax avoidance ("evasion" is such a tacky word) efforts shifted at least \$74 billion from the reach of the Internal Revenue Service, according to an explosive report by a Senate subcommittee.

I'm no Apple hater; it makes great products I'm happy to use, and it employs tens of thousands of people directly and in its supply chain. But the more I think about its role in public life, the angrier I get. Apple, in its own way, is un-American. Sadly, it has plenty of company in Silicon Valley.

The new aristocracy lives in Silicon Valley, says Snyder. The princelings of technocracy aren't bad people, but their wealth insulates them from the shared experiences that create community. They are a class apart -- maybe even a nation apart. They're the 21st-century successors to the rail and banking tycoons that ruled in the late 19th and early 20th century: the robber barons.

Consider this anecdote told by George Packer in his thoughtful piece in the May 27 issue of the New Yorker: When state budget cuts threatened the quality of their local school, parents in Woodside, Calif. -- one of the wealthiest enclaves in Silicon Valley -- stepped up their fund-raising efforts. The Woodside School Foundation now brings in about \$2 million a year for a school with fewer than 500 children. In a fund-raising auction, one parent bid \$20,000 for a tour of the Japanese gardens of Oracle CEO Larry Ellison, while others paid twice that much for seats at a Mad Men Supper Club dinner for 16 guests.

I'm sure that many of those people would be appalled and upset by the terrible conditions of the underfunded schools in nearby East Palo Alto, and they might even make donations to help out. But I doubt many of them connect the very obvious dots: When big companies and wealthy individuals fail to pay taxes, legally or not, the community suffers.

What makes this so galling in my mind is the hypocritical and egotistical belief in Silicon Valley itself that it is the most enlightened patch of real estate on the planet.

Silicon Valley won't pay fair share, then decries poor public results. As Alec MacGillis of the New Republic points out, it's a bit rich for Apple to argue -- as Steve Jobs did for years, and Tim Cook does now -- that the company needs more visas and green cards for foreign engineers because there aren't enough qualified Americans to fill tech jobs (patently false, by the way), while Apple does its damndest to keep its contribution toward federal education aid as paltry as possible.

Comments Packer:

This is an example so blatant I couldn't have dreamt it up, of the self-deception that exists alongside the hard work, idealism, and engineering brilliance of Silicon Valley. It's the kind of blind spot to which young, self-confident, super-successful industries are especially prone.

One of the subsidiaries set up by Apple in Ireland has paid no corporate income tax to any nation for the past five years, although it reported \$30 billion in net income from 2009 to 2012. Another subsidiary has paid a tax rate to Ireland of 0.1 percent or less in 2009, 2010, and 2011, far below the normal Irish corporate income tax rate of 12 percent, according to the Senate subcommittee's report.

The Founders Of Match.Com Are From The Valley Of The Dolts

Silicon Valley's power brokers want you to think they're different. But they're just average robber barons.

Emmett Rensin In February 2012, after Facebook announced what was in time to become the largest IPO in the history of internet firms, The Economist put a parody of Mark Zuckerberg's profile page on its cover. Next to an insipid, beaming profile picture of the young CEO, there was a status update: "VENI VIDI VICI!!! Am I richer than Bill yet? lol." They were not the first magazine to draw the comparison. In October 2010, Vanity Fair beat them to it, declaring Zuckerberg the No. 1 most influential person in the United States and calling him "our new Caesar."

Zuckerberg, of course, had not conquered Gaul. He had not scattered the German armies nor subjugated Britain, nor crossed the Rubicon and become first consul. He had not visited death and terror upon a continent, nor brought an end to an old republic, setting off a chain of intrigues that would birth the mightiest empire in the history of the world. No. Mark Zuckerberg had made a shit ton of money.

By April of this year, Facebook stock was worth more than \$116 a share, up from its initial offering of \$38. The social network had made its early investors even richer than they had ever anticipated. That same month, The Economist put Zuckerberg on its cover for the second time but now without detectable irony. His face appeared on a marble statue of Augustus, seated in cape and laurel crown beside a tiny globe. "IMPERIAL AMBITIONS" roared the headline. Mark's outstretched arm gave the imperial thumbs-up. He liked it.

The press enjoys excitedly praising tech titans by comparing them to fantastical and mythical figures. Zuckerberg is Caesar. Elon Musk, a wizard. Peter Thiel, who believes that he lives in the moral universe of Lord of the Rings, is a vampire. I do not know if these men believe that they have the supernatural powers the media claims. Maybe they do. I do know that they do not mind the perception, or at least have done nothing to combat it, even among those critics who believe that they're cartoon villains.

The press enjoys excitedly praising tech titans by comparing them to fantastical and mythical figures.

This might not be so bad if the phenomenon were limited to daft profiles by fawning magazine writers. But this Hegelian fan fiction is nowhere more potent than from the mouths of the Disruptors themselves. Mark Zuckerberg speaks in the voice of God. Shane Smith, by his own account, is the Stalin of Vice. Silicon Valley investor Carl Icahn was called "evil Captain Kirk" by fellow billionaire Marc Andreessen, before he was himself dubbed Dr. Evil by Rod Dreher, who has evidently not absorbed a cultural reference since 1999. When Elon Musk worries that Larry

Page is hurtling toward AI without a sufficient appreciation of the risks, he calls it “summoning the demon.” Seamless CEO Jonathan Zabusky, a typical case, says his food delivery application for depressed millennials is “disrupting the paradigm” by showing people that “the era of the paper menu” is over. AirBnB’s mission statement laments “the mechanization and Industrial Revolution of the last century,” which “displaced” “feelings of trust and belonging”; their mission is to turn the world back into the “village” of simpler eras by encouraging longstanding residents of gentrifying areas to rent out their homes to monied travelers. Some firms are more modest: HubSpot, a marketing and sales platform, is merely on a mission to make the whole world “more inbound,” which is to say, more reliant on their blogging tips for small businesses.

Even President Obama speaks of Silicon Valley as if it were an industry for madcap geniuses alone, a land of such earth-changing potential that it’s somewhere he might find himself once he’s left the Oval Office. When he chides citizens of the Valley, he chides them like a Dr. Frankenstein warning his monster about hubris: “Sometime we get, I think, in the scientific community, the tech community, the entrepreneurial community, the sense that we just have to blow up the system or create this parallel society,” he told the Frontiers Conference last October. The president believes that sense is wrong, of course, but where did he get the idea that tech CEOs were capable of these feats in the first place?

Let us state the obvious: None of these men are Roman Emperors, and they haven’t got the wherewithal to “blow up” anything but a stock market bubble. They are not Lex Luthors or Gandalfs or Stalins. Their products do not bring about revolutions. They are simply robber barons, JP Morgans and Andrew Mellons in mediocre T-shirts. I have no doubt that many are preternaturally intelligent, hardworking people, and it is a shame that they have dedicated these talents to the mundane accumulation of capital. But there is nothing remarkable about these men. The Pirates of Silicon Valley do not have imperial ambitions. They have financial ones.

The vast majority of Silicon Valley startups, the sort that project lofty missions and managed improbably lucrative IPOs despite never having graced the cover of *The Economist* or the frontal cortex of the president, work precisely like any other kind of mundane sales operation in search of a product: Underpaid cold-callers receive low wages and less job security in exchange for a foosball table and the burden of growing a company as quickly as possible so that it can reach a liquidation event. Owners and investors get rich. Managers stay comfortable. The employees get hosed. None of this is particularly original. At least the real robber barons built the railroads.

Emily Chang, of Bloomberg, points out that sex trafficking and black-lists run Silicon Valley.

Like all slim ranks of oligarchy, the Silicon Valley billionaires hate and fear nothing more than ordinary people. This manifests itself in mundane ways, in their open, cartoonish class spite (why, they ask, must Innovators in San Francisco be burdened by the existence of homeless riff-raff?); it is revealed in their most contemplative moments too. Peter Thiel has said that when the history of the 21st century is written, René Girard will be remembered as one of its greatest intellectuals. Girard is best known for the contention that all human desire is mimetic, that not only aesthetic taste but even hunger and lust are modeled on the desires of others. Perhaps this is why Thiel does not believe that capitalism and democracy are compatible. We know which side he’s chosen. So long as he and his fellows can continue to exploit that same mimetic tendency to persuade people that they are superhuman and essential to their flourishing, his side will continue to win.

The sins of the prestige firms are no less mundane. While each at least can claim a real and viable product, their evil is nothing so spectacular as the demonic. As *The New York Times*, *Guardian*, and others have reported, even the well-compensated white-collar workers of companies like Amazon and Facebook face notoriously brutal labor conditions. For the warehouse workers and contract laborers required to keep those companies running, matters are even worse. “When you’re in shipping and they double or triple their workforce over the winter holidays, you’re

working at times in below zero temps INSIDE the warehouse,” one Amazon warehouse worker wrote to Gawker’s Hamilton Nolan in 2013. Efforts to unionize employees have been met with duplicity beyond ordinary managerial resistance. Quartz reported in February on sinister attempts to thwart organization at Uber. Not content to resist their own employees’ efforts to unionize, Uber has also worked to undermine other labor guilds, including illegal operations in cities that have led to the destruction of local taxi businesses.

Like all slim ranks of oligarchy, the Silicon Valley billionaires hate and fear nothing more than ordinary people.

AirBnb, despite its Keatsian mission, has mainly succeeded in ravaging the housing market for low-income families. Seamless hasn’t disrupted the “paper menu world” half so much as it has disrupted tipping standards and wage prospects for its delivery workers.

The racist hiring practices of Silicon Valley prestige firms are an open secret, with only 5 percent of technical roles held by black or Latino workers. (“We are not where we want to be,” their diversity reports intone with all the sincerity of a Soviet bureaucrat adjusting potato projections down again). Their collusion with federal spy agencies, assisting in surveillance efforts and voluntarily turning over FISA-court-approved user data in exchange for cash, was a secret, until it wasn’t. Peter Thiel did not use magic to destroy Gawker; he used money.

In 2010, the Department of Justice exposed what it called an “overarching conspiracy” to suppress wages among companies like Apple, Google, Intel, Adobe, Intuit, eBay, and Pixar. The Silicon Valley supermen were aware as far back as 2005 that what they were doing was illegal. “[Google’s Eric] Schmidt instructed his Senior VP for Business Operation Shona Brown to keep the pact secret and only share information ‘verbally, since I don’t want to create a paper trail over which we can be sued later?’” reported Mark Ames. “At times,” he said of the Disruptor’s behavior, “it reads like something lifted straight out of the robber baron era that produced those [anti-trust] laws. Today’s inequality crisis is America’s worst on record since statistics were first recorded a hundred years ago — the only comparison would be to the era of railroad tycoons in the late 19th century.” Although Amazon CEO Jeff Bezos takes only \$81,000 in salary every year – barely more than the average Facebook intern! – he has managed to accrue a net worth in excess of \$65 billion. Perhaps he really is a wizard.

The cultivation of power requires the projection of power in excess of its reality. When Julius Caesar – the real one – made up his mind to annihilate the German tribes who had once again invaded Gaul, he ordered his engineers to build a bridge over the Rhine as wide as a two-lane highway, big enough for 10 soldiers to march across side by side. He wanted the Germani “to experience fear... when they realized that the army of the Roman people was both capable of crossing the Rhine and brave enough to venture it.” It worked. When the bridge was finished, the Roman army marched across it as if on parade in the streets of Rome. They went slow with their horns blasting and their flags aloft, led by cavalry draped in ceremonial colors. They found no army on the other side. Terrified of the Roman engineering feat, the Germani had fled in terror, and for 18 days they cowered in the forest while Caesar pillaged every defenseless village he could find. When he was done he marched back to Gaul and ordered the bridge torn down.

If your enemies can convince you that they are an unprecedented species of madman, you will convince yourself that you need unprecedented weapons to fight back or that you may be better off just hiding in the forest. But you are not.

The rigged contracts and wage suppression, the racism and surveillance collusion (soon to be playing voluntary footsie with Donald Trump’s NSA, with further chicanery to follow), all these sins of Silicon Valley have come about and been overcome before in the short history of American capitalism. They require only the same weapons as before. Organization and agitation. Strikes and labor laws. The ordinary practice of radical politics. Some of these efforts have begun already, with militant organizing and unionization drives beginning to organize Silicon Valley

laborers against their exploiters. But these movements require national and popular support, support that cannot begin until the pretense and terror of world-conquering wizards is abandoned and the truth is laid bare: These are only rich assholes, the same as they ever were. All that superman bullshit is just the cheap propaganda of the powerful, propaganda so thoroughly saturated in the American mind that its own inventors might believe it.

This fall, Silicon Valley Shakespeare (“Innovate • Illuminate • Inspire”) staged Julius Caesar for the first time in the company’s 16-year history. The press release promised that audiences would have a chance to “see this classic political thriller set in a modern world, showing the power and problem of the mob mentality, and how far people will go to rule a nation.”

This summary is instructive. To the entertainers of the Valley, Julius Caesar is a play about “mob mentality,” the dangers of unruly herds who upset the proper order of the world. This is an assessment that might surprise anyone who has read Shakespeare’s history and noticed that with the exception of a soothsayer and a single servant, every character in it is an aristocrat. But more than that, it is remarkable because as any high school student can tell you, Julius Caesar is not a play about the dangers of the mob; it is a play about the dangers of ambition and power. It is about hubris. You do not see the crowds that Brutus and Antony address because the crowds do not matter. They only exist to cheer the rivals as they sort out the pretense of the coming war. The fault that was not in their stars but in themselves has been corrected. They are underlings no more.

Julius Caesar is about a man believed to be a God, a man who cultivated divinity so well that he believed it himself. It is about a man who believed it until the mid-March afternoon when he discovered to his great surprise that even Caesar can be overthrown with old and ordinary weapons.

Per The United States Congress, The FBI and the FTC: The High-Tech Antitrust Black-Listing Litigation is a United States Department of Justice (DOJ) antitrust action and a civil class action against several Silicon Valley companies for secret collusion agreements which targeted high-tech employees. This case was one of the most famous federal lawsuits in Silicon Valley. Scam fronts for Silicon Valley oligarchs are being exposed daily.

The tech Cartel is evil because: they steal any technology they desire; they run a prostitution ring and sexually extort young women and interns in Silicon Valley; they are 'rape culture' take-what-they-want misogynists, ageists and racists as their history of abuses has proven; their Palo Alto Cartel operates AngelGate-type collusion and stock market insider trading schemes that harm independent business and the public; their Cartel ran the "no poaching" CEO ring which was class-action sued by DOJ and tech workers; 90% of their divorce court files reveal horrific abuses and sex trafficking; They have an army of lobbyists that pay cash, stock market and revolving door bribes to U.S. Senators; They can even evade FBI & SEC investigations; They hire women to act as 'trophy wives' and 'beards'; they have lobbyists rig the U.S. Patent Office in order to block inventor patent rights because they are using stolen technologies; they have been caught on video and recordings beating, kicking and harming women hundreds of times;

They have bought up all of the Tier-One tech law firms and order them to black-list, and never help, those who seek equal tech rights; they collude to abuse your privacy and make databases on the public for political control; they have to cheat to compete because they are only good with spread sheets instead of innovation; They run black-lists, character assassination attacks, collusion and other anti-trust violating acts in violation of RICO laws.

Silicon Valley has become the largest assemblage of douche-bags and yuppie frat boy criminals in human history. Theranos is not the exception, it is the standard. Tesla, Google, Theranos, Wework, Facebook are lies backed by famous political insiders to protect their insider trading and covered-up by fake news operators. They are also fronts to fund political campaigns via the ill-gotten profits from their endeavors.

When your Senator holds stock market shares in companies that exist to profit on the backs of consumers, via corruption, then it is impossible for that Senator to ever do anything but be corrupt! We have reported this in writing to winklerm@sec.gov, sanfrancisco@sec.gov and 30+ other federal officers but have yet to see our whistle-blower rewards...or any action! Do you wonder how big politician insider stock trading is?

Take a look at how many TRILLIONS of dollars pass through the stock markets annually and then look at the reported, AND UNREPORTED, securities holdings of famous U.S. Senators and government agency staff. That is what Seth Rich and the people in the "In Memory Of" section, below, were disclosing. These are massive crimes!

Google faces \$5 billion lawsuit in U.S. for tracking 'private' internet use. Google WILL pay for their crimes or be killed off as a business because of their corruption!

What kinds of people were some of these high tech oligarchs? Read their divorce Court Records about their Jeffrey Epstein, NXIVM sex trafficking; Andy Rubin and Goguen sex slaves; tax evasions; money laundering; intern abuses; misogyny; racism; political insider-trading stock market bribes to U.S. Senators; a 'Silicon Valley Tech Mafia' and other horrors.

What would you do if you found out that Eric Schmidt, Larry Page, Elon Musk, Sergy Brin, John Doerr and other dynastic elitist insider Stanford frat boys were running a mob-like Cartel? Over 60,000 engineers in Silicon Valley took the problem to Federal Court!

Ask Christopher Wray, John F. Bennett, Craig D. Fair and the other senior officials at the FBI, DOJ, SEC, FTC and other major federal investigation agencies: Organized crime in Silicon Valley is getting a harder look these days!

The defendants, in the first case, included Adobe, Apple Inc., Google, Intel, Intuit, Pixar, Lucasfilm and eBay, all high-technology companies with a principal place of business in the San Francisco–Silicon Valley area of California where they collude together to harm competitors. It is a well documented fact that Facebook, Google, Netflix, Linkedin, etc. use sophisticated psychological testing on each applicant in order to filter out all but the most radical devotees of the founders ideologies.

These companies then maintain an echo-chamber resonance, throughout the company, to reinforce their ideological message, much like Scientology does. In these companies one must praise Elon Musk and Mark Zuckerberg and hate those who the founders target. The founders target their competitors, in violation of anti-trust laws.

The first civil class action was filed by five plaintiffs, one of whom has died in a curious incident; it accused the tech companies of collusion between 2005 and 2009. In Abolish Silicon Valley: How to liberate technology from capitalism we see another of thousands of insiders expose the fact that Silicon Valley is a pile of filth.

Additional cases are planned for filing. Formal complaints have been filed with The SEC, The DOJ, The GAO, The FBI, The FTC and The U.S. Congress. Active investigations into 'Angelgate' and related collusion and anti-trust matters are known to be under-way by federal, news outlet and private investigators as of 2020. U.S. Senators, and other politicians, who covertly own stock in these Silicon Valley companies, have been delaying enforcement against these corrupt companies. Consumer rights groups have pledged to take down each and every politician who owns these corrupt stocks and protects these corrupt companies!

Our alliance of investigators and agency staff have FBI-level investigated: Steven Chu, Larry Page, David Dummond, Lachlan Seward, Andy Rubin, Jeffrey Epstein, Elon Musk, Nicholas Guido Denton, Harvey Weinstein, Eric Schmidt and the rest of the RICO-violating "Club" and had them fired or removed from their positions. They will remain under public surveillance for the rest of their lives and their case files will be added to monthly via submissions to federal agencies and news entities.

What would an insane tech oligarch (Like Schmidt, Musk, Reid, Brin, Westly, Page, Khosla, etc.) do for trillions of dollars of criminal gain?

When you run the following query on the stock market volume for a single day, ie: "Select sum(Close*volume*0.001), count(*) from myTable where date = '9/27/2017'.."you get the following result: 7300 stocks were traded, Total Money flow: \$271,072,334,824. This is how much was traded on that day.

The total world derivatives market has been estimated at about \$791 trillion face or nominal value, 11 times the size of the entire world economy.

The World Bank publishes global data on stocks traded by \$ value here. ie:

- 2016 - \$77.5 trillion for the year.

Most exchanges publish this stat. Here is the data for NASDAQ

- Feb 6, 2018 - \$192 billion for the day.

And the Indian stock market volume data (in Indian Rupees) is here.

- BSE + NSE cash market, Feb 2018 - About Rs 40,000 crore daily. That's about \$6 billion per day.

Average estimates put daily stock movement between 5 to ten trillion dollars per day. You can buy lot's of Weinstein/Epstein-like private islands, private jets, sex parties, U.S. Senators and crony government contracts with that kind of money. Once an oligarch starts buying sex with underage girls, they don't stop. In fact, there is nothing that a corrupt tech oligarch and their owned Senator won't do to keep their little pig trough filled up.

The average murder/robbery in the United States is undertaken for an average amount under \$100.00

Thus, an Eric Schmidt, Elon Musk, Steve Westly, David Drummond, Vinod Khosla, Reid Hoffman, Steve Jurvetson, Andy Rubin, Larry Page or similar oligarch, who is sociologically addicted to money and power, is most certainly capable of ordering and operating election manipulations, Presidential bribes, murders and engaging in other crimes to protect those greed-based assets. They have the full resources to do so, have federal records proving that they hire lobbyists and operatives who do these things for them and have a documented history of engaging in extremist actions.

=====

Dating Sites Gather Info For Contracted Character Assassinations on Politicians, Reporters and Whistle-Blowers

The Silicon Valley Cartel Hires Gawker, Gizmodo, Jalopnik, Black Cube, Fusion GPS, etc. to run "hit-jobs" on those who report their crimes!

The Hit Job

How much do you have to pay Google, Alphabet, YouTube and Black Cube to dedicate a portion of their servers to push a character assassination set of links, against a competitor, to all five billion people on Earth with internet access? How much did Obama, Clinton, Bloomberg spend using those exact same systems to attack their political enemies?

How much do you have to pay to get them to lock those attack links on one of the first 4 lines of EVERY search result, in the same position in the search results, for over a decade (which proves that their search results are not "organic", they are manually manipulated by Google and YouTube)? How much did Obama, Clinton, Bloomberg spend using those exact same systems to attack their political enemies?

How much does it cost to make a Disney-like animated movie about a whistle-blower? How much does the production and software and person-hour billings cost? How much does it cost to distribute that movie world-wide and lock it in the top line of all search results?

We know. We have their financial records, invoices and receipts and so does the FBI and the NSA.

How much does it cost to hire a warehouse full of Russian, Nigerian and Chinese click-farm operators who use Palantir and Google software to instantly be alerted of any mention of a person's name on the internet and to then go slam that person in the comment sections with endless troll remarks? Elon Musk uses these same people to hype his narcissistic need for attention. Obama, Clinton, Bloomberg and other politicians hire these same people to attack their political adversaries. How much does it cost to have anonymous trolls in foreign countries kill a person's brand globally?

We know. We have their financial records, invoices and receipts and a huge number of lawsuits, court records, federal investigation and investigative journalism reports have exposed those records and details. The FBI, NSA, SEC, FTC and Congressional investigators can also confirm these numbers!

So it turns out that it costs: \$35,422,152.00 to have a person and their business killed!

That is how much they spent on their attack on the Plaintiff! The people at the top of the heap who organized the attacks were David Plouffe, Jay Carney, David Axelrod, Denis McDonough, Steve Rattner, Robert Gibbs, Rahm Emanuel and their associates and they did it from The West Wing and The Oval Office in The White House.

Many of the political attacks were edited by Nick Denton and his seedy tabloid empire Gawker/Gizmodo. Investigations have revealed that the White House and California Senators hired IN-Q-Tel; Gawker Media; Jalopnik; Gizmodo Media; K2 Intelligence; WikiStrat; Podesta Group; Fusion GPS; Google; YouTube; Alphabet; Facebook; Twitter; Think Progress; Media Matters); Black Cube; Correct The Record; Orbis Business Intelligence, Undercover Global Ltd; Stratfor; Jigsaw; ShareBlue/Acronym; Cambridge Analytica; Sid Blumenthal; David Brock; Plouffe Consulting; PR Firm Sunshine Sachs; Covington and Burling; BuzzFeed; Perkins Coie; Advance Democracy Inc.; The Democracy Integrity Project; Popily, Inc; Bean, LLC.; Edward Austin; Istok Associates; Silicon Valley Community Foundation; Yonder and Wilson Sonsini to run hit-jobs, character assassinations, dirty tricks and economic reprisal attacks on any applicants who reported the crimes. Each of those companies are now under federal and civil investigation. These companies sell "kill services" that use CIA and KGB-style tactics to harm witnesses and whistle-blowers.

Media Matters for America founder David Brock is a hired media assassin who reaped illegal profits through the transfer of millions from a nonprofit he founded to a for-profit entity under his control, according to an IRS complaint filed by a watchdog group.

The complaint details how Brock's nonprofit group American Bridge Foundation (AB Foundation) transferred \$2.7 million in tax-exempt assets to True Blue Media, a for-profit company owned by Brock that is the parent company of ShareBlue, a for-profit media company now known as The American Independent. The transfers violated IRS rules that prohibit nonprofit organizations from using their tax-exempt resources to pay personal or private expenses of any key figures connected to the nonprofit, the complaint stated. AB Foundation's transfers to True Blue Media were disclosed in the nonprofit's Form 990s filed to the IRS in 2017 and 2018. "Brock is a well-known hit man who took money to target our group in reprisal for whistle-blowing...." Said Team 7 staff.

The money was conduited and assisted for pass-through by political financiers Eric Schmidt, Larry Page, Sergy Brin, Elon Musk, John Doerr, Vinod Khosla, Steve Westly, Steve Spinner and their Silicon Valley oligarch Cartel black-listing operation.

It was a felony. It violated RICO, Anti-Trust and Constitutional laws.

So they spent over thirty five million dollars attacking the Plaintiff and shutting down a competitor that was targeted to make over six billion dollars in profits. The attackers then made the six billion dollars in profits for themselves, at the expense of the Plaintiff.

So how much do you think they owe the Plaintiff per previous court awards for such crimes against a member of the public?

You can use their EXACT SAME attack methods, that they used on members of the public, AGAINST THEM. If it was illegal for them to do it, they would have been arrested.

Thus, it must be legal for you to do it to them!

Social Media Will Help You Expose And Destroy The Evil And Corrupt Match.Com Oligarchs

“Mass Media” is owned and controlled by a handful of men who own and control it exclusively to manipulate public opinion. They do not own all of the print, radio, TV and web media for fun. They own it because their sociopath need for power makes them think they can steer stupid people into adopting their ideology and voting for candidates who have promised them quid pro quo kick-backs and payola. Here are some examples of news that got sneaked through their filter bubbles and exposed part of the Silicon Valley Cartel.

Google, Facebook and news websites hire college kids to run their news efforts. These children are naive, self-centered people who are easily influenced by herd mentality and who only have a portion of their brains developed. They are the reason people under a certain age are not allowed to have sex, drink or drive cars. They should never be allowed near mass communications systems but they work cheap so the media bosses hire them.

We made this news get out by using the tactics in this manual for force action and to punish those who tried to cover this up:

The perpetrators operate a massive and abusive national sex cult. The perverts in the SandHill Road Venture Capital offices, located between Highway 280 down to Santa Cruz Avenue on Sand Hill Road in Menlo Park, California, are the main perpetrators of this global cartel. Their executives at Google, Facebook, Netflix, LinkedIn, Twitter, and their related holdings, comprise the rest. The Harvey Weinstein and Ed Buck sex scandals are well known. These men's sex cult actions have been widely covered in the news individually in the Joe Lonsdale rape case, The Kleiner Perkins Ellen Pao sex abuse lawsuit, The Eric Schmidt sex penthouse stories, The Jeffrey Epstein case, The Google Forrest Hayes hooker murder case, The Andy Rubin sex slave case, The Sergy Brin 3-way sex romp scandal, The British Hydrant investigation, The Elon Musk Steve Jurvetson billionaire sex parties scandals, The NXIVM sexual slave cases, The Michael Goguen anal sex slave trial, The Tom Perkins Hooker Parties and thousands of other cases and federal divorce court filings. This group of people have proven themselves, over and over, to be sociopath control freaks not fit for participation in public commerce, public policy or media control. T

he Four Seasons Hotel and Rosewood Hotels in Silicon Valley are estimated to engage in over \$30,000.00 of high-end escort sex trafficking per day, a portion of it managed by Eastern Bloc Mafia operators. At least 10 Ukrainian escorts fly in and out of SFO and SJO airports every week for these Cartel members. Google boss David Drummond engaged in horrible philandering sexual violations of his wife yet Google covers up every story about it on the web. Google's Eric Schmidt is under massive investigation. You hear about the female victims of this sex cult but you rarely hear about the young male victims. One of their vast numbers of prostitutes is quoted as saying that the girls and boys are paid "not just for sex but for the oligarch's endless need to feel that they can control anyone for any reason...". Multiple attorney general's controlled by their cartel, ie: Eric Schneiderman and Eliot Spitzer , are

involved this these sex rings. These are the main influencers of a national political party and they are all involved in horrific sex perversions and abuses!

The AngelGate Conspiracy <https://venturecapitalcorruption.weebly.com/the-angelgate-conspiracy.html>

The Job Collusion Case https://en.wikipedia.org/wiki/High-Tech_Employee_Antitrust_Litigation

and hundreds of other cases, prove that the perpetrators regularly meet, conspire, collude and racketeer, in full view of law enforcement, without ever getting arrested by the FBI because they bribe public officials in order to avoid prosecution.

Public officials and Silicon Valley oligarchs exchanged felony bribes and manipulated government actions in order to benefit themselves and harm us. these are the facts including the lists of bribes, attacks and covert financing routes!

Famous members of congress lie, cheat, steal and manipulate public records in order to protect their trillions of dollars of Google, Facebook, Netflix, Tesla and Amazon insider stock market payola.

Now the public is working together, around the globe, to end this corruption forever by exposing every single one of the corrupt and all of their dirty secrets!

Apple, Google reach new deal to end U.S. lawsuit over poaching

. Four Silicon Valley companies including Apple Inc and Google Inc have agreed to a new settlement that would resolve an antitrust class ...

"No cold call" agreements

Cold calling is one of the main methods used by companies in the high-technology sector to recruit employees with advanced and specialised skills, such as software and hardware engineers, programmers, animators, digital artists, Web developers and other technical professionals.[1] Cold calling involves communicating directly in any manner with another firm's employee who has not otherwise applied for a job opening. Cold calling may be done in person, by phone, letter, or email.[2] According to the legal brief filed by a plaintiff in one of the class-action cases, cold calling is an effective method of recruiting for the high-technology sector because "employees of other [high-technology] companies are often unresponsive to other recruiting strategies... [and] current satisfied employees tend to be more qualified, harder working, and more stable than those who are actively looking for employment." [3]

Amy Lambert, Google's associate general counsel, noted in a blog post shortly after the DOJ's actions, that Google's definition of cold calling does not necessarily eliminate recruiting by letter or email, but only the process of calling on the telephone. By implication, recruiting through LinkedIn incurs recruiting by "InMail" - LinkedIn's own mail contact system: "In order to maintain a good working relationship with these companies, in 2005 we decided not to "cold call" employees at a few of our partner companies. Our policy only impacted cold calling, and we continued to recruit from these companies through LinkedIn, job fairs, employee referrals, or when candidates approached Google directly. In fact, we hired hundreds of employees from the companies involved during this time period."

The challenged "no cold call" agreements are alleged bilateral agreements between high technology companies not to cold call each other's employees. The DOJ alleges that senior executives at each company negotiated to have their employees added to 'no call' lists maintained by human resources personnel or in company hiring manuals. The alleged agreements were not limited by geography, job function, product group, or time period. The alleged bilateral agreements were between: (1) Apple and Google, (2) Apple and Adobe, (3) Apple and Pixar, (4) Google and Intel, (5) Google and Intuit,[4] and (6) Lucasfilm and Pixar.[5]

The civil class action further alleges that agreements also existed to (1) "provide notification when making an offer to another [company]'s employee (without the knowledge or consent of the employee)" and (2) "agreements that, when offering a position to another company's employee, neither company would counteroffer above the initial offer." [3]

Department of Justice antitrust action

The United States Department of Justice Antitrust Division filed a complaint in the US District Court for the District of Columbia alleging violations of Section 1 of the Sherman Act. In *US v. Adobe Systems Inc., et al.*, the Department of Justice alleged that Adobe, Apple, Google, Intel, Intuit, and Pixar had violated Section 1 of the Sherman Act by entering into a series of bilateral "No Cold Call" Agreements to prevent the recruitment of their employees (a similar but separate suit was filed against Lucasfilm on December 21, 2010[6]). The DOJ alleged in their Complaint that the companies had reached "facially anticompetitive" agreements that "eliminated a significant form of competition...to the detriment of the affected employees who were likely deprived of competitively important information and access to better job opportunities." The DOJ also alleged that the agreements "were not ancillary to any legitimate collaboration," "were much broader than reasonably necessary for the formation or implementation of any collaborative effort," and "disrupted the normal price-setting mechanisms that apply in the labor setting." [4] The same day it filed the suit, the DOJ and the defendants proposed a settlement.[7]

A final judgment enforcing the settlement was entered by the court on March 17, 2011.[8] Although the DOJ Complaint only challenged the alleged "no cold call" agreements, in the settlement, the companies agreed to a more broad prohibition against "attempting to enter into, entering into, maintaining or enforcing any agreement with any other person to in any way refrain from, requesting that any person in any way refrain from, or pressuring any person in any way to refrain from soliciting, cold calling, recruiting, or otherwise competing for employees of the

other person", for a period of five years; the court can grant an extension.[8] The settlement agreement does not provide any compensation for company employees affected by the alleged agreements.[9] Lucasfilm entered into a similar settlement agreement in December 2010.[5]

Civil class action

In re: High-Tech Employee Antitrust Litigation (U.S. District Court, Northern District of California 11-cv-2509 [10]) is a class-action lawsuit on behalf of over 64,000 employees of Adobe, Apple Inc., Google, Intel, Intuit, Pixar and Lucasfilm (the last two are subsidiaries of Disney) against their employer alleging that their wages were repressed due to alleged agreements between their employers not to hire employees from their competitors.[11][12] The case was filed on May 4, 2011 by a former software engineer at Lucasfilm and alleges violations of California's antitrust statute, Business and Professions Code sections 16720 et seq. (the "Cartwright Act"); Business and Professions Code section 16600; and California's unfair competition law, Business and Professions Code sections 17200, et seq. Focusing on the network of connections around former Apple CEO Steve Jobs, the Complaint alleges "an interconnected web of express agreements, each with the active involvement and participation of a company under the control of Steve Jobs...and/or a company that shared at least one member of Apple's board of directors." The alleged intent of this conspiracy was "to reduce employee compensation and mobility through eliminating competition for skilled labor."[13]

On October 24, 2013 the United States District Court for the Northern District of California granted class certification for all employees of Defendant companies from January 1, 2005 through January 1, 2010.[9]

As of October 31, 2013, Intuit, Pixar and Lucasfilm have reached a tentative settlement agreement. Pixar and Lucasfilm agreed to pay \$9 million in damages, and Intuit agreed to pay \$11 million in damages.[9] In May 2014, Judge Lucy Koh approved the \$20 million settlement between Lucasfilm, Pixar, and Intuit and their employees. Class members in this settlement, which involved fewer than 8% of the 65,000 employees affected, will receive around \$3,840 each.[14]

The trial of the class action for the remaining Defendant companies was scheduled to begin on May 27, 2014. The plaintiffs intended to ask the jury for \$3 billion in compensation, a number which could in turn have tripled to \$9 billion under antitrust law.[15] However, in late April 2014, the four remaining defendants, Apple Inc, Google, Intel and Adobe Systems, agreed to settle out of court. Any settlement must be approved by Judge Lucy Koh.[16][17]

On May 23, 2014, Apple, Google, Intel, Adobe agreed to settle for \$324.5 million. Lawyers sought 25% in attorneys' fees, plus expenses of as much as \$1.2 million, according to the filing. Additional award payments of \$80,000 would be sought for each named plaintiff who served as a class representative.[18] Payouts will average a few thousand dollars based on the salary of the employee at the time of the complaint.

In June 2014, Judge Lucy Koh expressed concern that the settlement may not be a good one for the plaintiffs. Michael Devine, one of the plaintiffs, said the settlement is unjust. In a letter he wrote to the judge he said the settlement represents only one-tenth of the \$3 billion in compensation the 64,000 workers could have made if the defendants had not colluded.[19]

On August 8, 2014, Judge Koh rejected the settlement as insufficient on the basis of the evidence and exposure. Rejecting a settlement is unusual in such cases. This left the defendants with a choice between raising their settlement offer or facing a trial.[20]

On September 8, 2014, Judge Koh set April 9, 2015 as the actual trial date for the remaining defendants, with a pre-trial conference scheduled for December 19, 2014. Also, as of early September 2014, the defendants had re-entered mediation to determine whether a new settlement could be reached.[21]

A final approval hearing was held on July 9, 2015.[22] On Wednesday September 2, 2015, Judge Lucy H. Koh signed an order granting Motion for Final Approval of Class Action Settlement. The settlement website stated that Adobe, Apple, Google, and Intel has reached a settlement of \$415 million and other companies settled for \$20 million.

According to the settlement website, Gilardi & Co., LLC distributed the settlement to class members the week of December 21, 2015.

The Techtopus: How Silicon Valley's most celebrated social media CEOs conspired to do sick crimes and abuse interns

By Mark Ames

In early 2005, as demand for Silicon Valley engineers began booming, Apple's Steve Jobs sealed a secret and illegal pact with Google's Eric Schmidt to artificially push their workers wages lower by agreeing not to recruit each other's employees, sharing wage scale information, and punishing violators. On February 27, 2005, Bill Campbell, a member of Apple's board of directors and senior advisor to Google, emailed Jobs to confirm that Eric Schmidt "got directly involved and firmly stopped all efforts to recruit anyone from Apple."

Later that year, Schmidt instructed his Sr VP for Business Operation Shona Brown to keep the pact a secret and only share information "verbally, since I don't want to create a paper trail over which we can be sued later?"

These secret conversations and agreements between some of the biggest names in Silicon Valley were first exposed in a Department of Justice antitrust investigation launched by the Obama Administration in 2010. That DOJ suit became the basis of a class action lawsuit filed on behalf of over 100,000 tech employees whose wages were artificially lowered — an estimated \$9 billion effectively stolen by the high-flying companies from their workers to pad company earnings — in the second half of the 2000s. Last week, the 9th Circuit Court of Appeals denied attempts by Apple, Google, Intel, and Adobe to have the lawsuit tossed, and gave final approval for the class action suit to go forward. A jury trial date has been set for May 27 in San Jose, before US District Court judge Lucy Koh, who presided over the Samsung-Apple patent suit.

In a related but separate investigation and ongoing suit, eBay and its former CEO Meg Whitman, now CEO of HP, are being sued by both the federal government and the state of California for arranging a similar, secret wage-theft agreement with Intuit (and possibly Google as well) during the same period.

The secret wage-theft agreements between Apple, Google, Intel, Adobe, Intuit, and Pixar (now owned by Disney) are described in court papers obtained by PandoDaily as "an overarching conspiracy" in violation of the Sherman Antitrust Act and the Clayton Antitrust Act, and at times it reads like something lifted straight out of the robber baron era that produced those laws. Today's inequality crisis is America's worst on record since statistics were first recorded a hundred years ago — the only comparison would be to the era of the railroad tycoons in the late 19th century.

Shortly after sealing the pact with Google, Jobs strong-armed Adobe into joining after he complained to CEO Bruce Chizen that Adobe was recruiting Apple's employees. Chizen sheepishly responded that he thought only a small class of employees were off-limits:

I thought we agreed not to recruit any senior level employees.... I would propose we keep it that way. Open to discuss. It would be good to agree.

Jobs responded by threatening war:

OK, I'll tell our recruiters they are free to approach any Adobe employee who is not a Sr. Director or VP. Am I understanding your position correctly?

Adobe's Chizen immediately backed down:

I'd rather agree NOT to actively solicit any employee from either company.....If you are in agreement, I will let my folks know.

The next day, Chizen let his folks — Adobe's VP of Human Resources — know that "we are not to solicit ANY Apple employees, and visa versa." Chizen was worried that if he didn't agree, Jobs would make Adobe pay:

if I tell Steve [Jobs] it's open season (other than senior managers), he will deliberately poach Adobe just to prove a point. Knowing Steve, he will go after some of our top Mac talent...and he will do it in a way in which they will be enticed to come (extraordinary packages and Steve wooing).

Indeed Jobs even threatened war against Google early 2005 before their "gentlemen's agreement," telling Sergey Brin to back off recruiting Apple's Safari team:

if you [Brin] hire a single one of these people that means war.

Brin immediately advised Google's Executive Management Team to halt all recruiting of Apple employees until an agreement was discussed.

In the geopolitics of Silicon Valley tech power, Adobe was no match for a corporate superpower like Apple. Inequality of the sort we're experiencing today affects everyone in ways we haven't even thought of — whether it's Jobs bullying slightly lesser executives into joining an illegal wage-theft pact, or the tens of thousands of workers whose wages were artificially lowered, transferred into higher corporate earnings, and higher compensations for those already richest and most powerful to begin with.

Over the next two years, as the tech industry entered another frothing bubble, the secret wage-theft pact which began with Apple, Google and Pixar expanded to include Intuit and Intel. The secret agreements were based on relationships, and those relationships were forged in Silicon Valley's incestuous boards of directors, which in the past has been recognized mostly as a problem for shareholders and corporate governance advocates, rather than for the tens of thousands of employees whose wages and lives are viscerally affected by their clubby backroom deals. Intel CEO Paul Otellini joined Google's board of directors in 2004, a part-time gig that netted Otellini \$23 million in 2007, with tens of millions more in Google stock options still in his name — which worked out to \$464,000 per Google board event if you only counted the stock options Otellini cashed out — dwarfing what Otellini made off his Intel stock options, despite spending most of his career with the company.

Meanwhile, Eric Schmidt served on Apple's board of directors until 2009, when a DoJ antitrust investigation pushed him to resign. Intuit's chairman at the time, Bill Campbell, also served on Apple's board of directors, and as official advisor — "consigliere" — to Google chief Eric Schmidt, until he resigned from Google in 2010. Campbell, a celebrated figure ("a quasi-religious force for good in Silicon Valley") played a key behind-the-scenes role connecting the various CEOs into the wage-theft pact. Steve Jobs, who took regular Sunday walks with Campbell near their Palo Alto homes, valued Campbell for his ability "to get A and B work out of people," gushing that the conduit at the center of the \$9 billion wage theft suit, "loves people, and he loves growing people."

Indeed. Eric Schmidt has been, if anything, even more profuse in his praise of Campbell. Schmidt credits Campbell for structuring Google when Schmidt was brought on board in 2001:

His contribution to Google — it is literally not possible to overstate. He essentially architected the organizational structure.

Court documents show it was Campbell who first brought together Jobs and Schmidt to form the core of the Silicon Valley wage-theft pact. And Campbell's name appears as the early conduit bringing Intel into the pact with Google:

Bill Campbell (Chairman of Intuit Board of Directors, Co-Lead Director of Apple, and advisor to Google) was also involved in the Google-Intel agreement, as reflected in an email exchange from 2006 in which Bill Campbell agreed with Jonathan Rosenberg (Google Advisor to the Office of CEO and former Senior Vice President of Product Management) that Google should call [Intel CEO] Paul Otellini before making an offer to an Intel employee, regardless of whether the Intel employee first approached Google.

Eric Schmidt has A psychotic need to control governments and society. Eric Schmidt does not think twice about hiring assassins, media hit-job operators, Black Cube and Fusion GPS hatchet job providers and bribe-positive lobbyists

In July 2016, Raymond Thomas, a four-star general and head of the U.S. Special Operations Command, hosted a guest: Eric Schmidt, the chairman of Google.

General Thomas, who served within the 1991 gulf war and deployed many times to Afghanistan, spent the higher half of a day showing Mr. Schmidt around Special Operations Command's headquarters in Tampa, Fla. They scrutinized prototypes for a robotic exoskeleton suit and joined operational briefings, which Mr. Schmidt needed to study extra about as a result of he had recently begun advising the military on technology.

After the go-to, as they rode in a Chevy Suburban towards an airport, the conversation turned to a form of artificial intelligence.

“You absolutely suck at machine learning,” Mr. Schmidt informed General Thomas, the officer recalled. “If I got under your tent for a day, I could solve most of your problems.” General Thomas said he was so offended that he needed to throw Mr. Schmidt out of the car, however refrained.

Four years later, Mr. Schmidt, 65, has channeled his blunt assessment of the military's tech failings into a private campaign to revamp America's defense forces with extra engineers, extra software program and extra A.I. In the method, the tech billionaire, who left Google last year, has reinvented himself because of the prime liaison between Silicon Valley and the national security community.

Mr. Schmidt now sits on two government advisory boards aimed toward bounce beginning technological innovation in the Defense Department. His confidants embrace former Secretary of State Henry Kissinger and ex-Deputy Defense Secretary Robert Work. And by means of his personal enterprise capital agency and a \$13 billion fortune, Mr. Schmidt has invested millions of {dollars} into more than half a dozen defense start-ups.

In an interview, Mr. Schmidt — by turns thoughtful, pedagogical and hubristic — stated he had embarked on an effort to modernize the U.S. military because it was “stuck in software in the 1980s.”

He portrayed himself as a successful technologist who didn't consider in retirement and who owed a debt to the country for his wealth — and who now had time and perception to resolve one of America's hardest issues. The purpose, he stated, “should be to have as many software companies to supply software of many, many different kinds: military, H.R. systems, email systems, things which involve military intelligence, weapons systems and what have you.”

Mr. Schmidt is urgent ahead with a Silicon Valley worldview the place advances in software program and A.I. are the keys to determining nearly any situation. While that philosophy has led to social networks that spread disinformation and different unintended penalties, Mr. Schmidt stated he was convinced that making use of new and comparatively untested technology to complex conditions — together with lethal ones — would make service members extra environment friendly and bolster the United States in its competition with China.

His techno-solutionism is difficult by his ties to Google.

Though Mr. Schmidt left the corporate's board final June and has no official working function, he holds \$5.3 billion in shares of Google's parent, Alphabet. He also stays on the payroll as an adviser, incomes a \$1 annual wage, with two assistants stationed at Google's Silicon Valley headquarters.

That has led to allegations that Mr. Schmidt is placing Google's financial pursuits forward of different concerns in his protection work. Late final yr, a federal court ordered a congressional advisory committee he leads to flip over data that would make clear whether or not Mr. Schmidt had advocated his business interests whereas heading the group.

Mr. Schmidt stated he had adopted guidelines to keep away from conflicts. "Everybody is rule-bound at the Pentagon, and we are too," he stated.

Google and the Defense Department declined to touch upon Mr. Schmidt's work.

Even without these issues, shifting the military's path isn't any easy process. While Mr. Schmidt has helped generate reports and recommendations about know-how for the Pentagon, few have been adopted.

"I'm sure he'll be frustrated," stated Representative Mac Thornberry, a Republican of Texas who nominated Mr. Schmidt in 2018 to an advisory committee on A.I. "Unlike the private sector, you can't just snap your fingers and make it happen."

Mr. Schmidt acknowledged that progress was sluggish. "I am bizarrely told by my military friends that they have moved incredibly fast, showing you the difference of time frames between the world I live in and the world they live in," he stated.

But he stated he had little intention of backing down. "The way to understand the military is that the soldiers spend a great deal of time looking at screens. And human vision is not as good as computer vision," he stated. "It's insane that you have people going to service academies, and we spend an enormous amount of training, training these people, and we put them in essentially monotonous work."

Mr. Schmidt's first brush with the military got here in 1976, whereas he was in graduate college on the University of California, Berkeley. There, he centered on research on distributed computing, funded by cash from Darpa, an analysis arm of the Defense Department.

The work catapulted Mr. Schmidt into his technology profession. After finishing his graduate studies in pc science, he labored at various tech firms for more than twenty years, together with the networking software maker Novell. In 2001, Google appointed him chief govt.

The search engine firm was then in its infancy. Its 20-something founders, Larry Page and Sergey Brin, were contemporary out of a Stanford University doctorate program and had little business expertise. Mr. Schmidt was hired to assist information them, offering "adult supervision," which he did — after which some.

Mr. Schmidt took Google public in 2004 and built it right into a behemoth, diversifying into smartphones, cloud computing and self-driving cars. The success turned him right into an enterprise movie star. In 2009, he served as a tech adviser to the Obama administration.

In 2011, with Google price almost \$400 billion, the corporate introduced Mr. Page was able to resume the C.E.O. reins. Mr. Schmidt turned govt chairman.

In that function, Mr. Schmidt took on new tasks, many of which introduced him to Washington. In 2012, he participated in categorized briefings on cybersecurity with Pentagon officers as half of the Enduring Security Framework program. In 2015, he attended a seminar on the banks of the Potomac River, hosted by then-Defense Secretary Ash Carter, on the use of know-how inside the government.

“It was all interesting to me,” Mr. Schmidt stated. “I didn’t really know much about it.”

He additionally traveled to North Korea, Afghanistan and Libya whereas writing a guide about know-how and diplomacy, and dabbled in politics, lending technical assist to Hillary Clinton within the run-up to her 2016 presidential marketing campaign.

His enterprise capital fund, Innovation Endeavors, was lively too. It invested in start-ups like Planet Labs, which operates satellites and sells the imagery to protection and intelligence companies, and Team8, a cybersecurity firm based by former Israeli intelligence members.

At the 2016 World Economic Forum in Davos, Switzerland, Mr. Carter requested Mr. Schmidt to fulfill. He had a proposal: Could Mr. Schmidt lead the Defense Innovation Board, a civilian advisory group tasked with bringing new technology to the Pentagon?

“We were in one of these dumpy hotels, and there he is with his small entourage walking in, and he basically said to me, ‘This is what I want to do. You’d be the perfect person to be chairman,’” Mr. Schmidt said.

Mr. Schmidt said he turned down the function as a result of he was busy and had no military background. But Mr. Carter argued that Mr. Schmidt’s tech experience was wanted, because the U.S. military — which had as soon as been a middle of innovation — was falling behind companies like Google and Facebook in software and A.I.

Mr. Schmidt finally agreed. (Mr. Carter didn’t reply to requests for remark.)

As head of the Defense Innovation Board, Mr. Schmidt started touring navy bases, plane carriers and plutonium strongholds. The journeys, which took Mr. Schmidt to about 100 bases in locations like Fayetteville, N.C., and Osan, South Korea, have been a definite break from his well-heeled life in Silicon Valley.

“You want to see these things,” Mr. Schmidt stated. “I received the nuclear missile tour. Things which are exhausting. I received a tour of Cheyenne Mountain so I might perceive what their actuality was.”

One of the primary journeys was to Tampa to go to General Thomas, who is named Tony, the place Mr. Schmidt saw maps and reside video feeds displayed on huge screens. “Eric’s observation was that a huge part of what the military does is it sits and watches,” stated Josh Marcuse, the then executive director of the Defense Innovation Board who was on the journey.

The visits made tangible what Mr. Carter had told Mr. Schmidt about how the military was lagging in technology. Mr. Schmidt quickly made ideas to vary that.

Some of his concepts have been impractical. Eric Rosenbach, then the chief of workers to Mr. Carter, recalled Mr. Schmidt as soon as telling him that the Pentagon can be higher off if it employed nobody however engineers for a year.

Others have been helpful. At an Air Force facility in Qatar in 2016, Mr. Schmidt visited officers who scheduled flight paths for the tankers that refueled planes. They used a white board and dry-erase markers to set the schedule, taking eight hours to finish the duty.

Mr. Schmidt stated he recalled considering, “Really? This is how you run the air war?” Afterward, he and others on the Defense Department labored with the tech company Pivotal to ship software to the officers.

On one other journey to a navy base in South Korea in 2017, an intelligence analyst complained to Mr. Schmidt that the software program he used to evaluate surveillance movies from North Korea was clunky.

“Let me guess,” Mr. Schmidt said, according to a Defense Department aide who traveled with him. “You don’t have the flexibility to change that.”

In December 2017, Mr. Schmidt stepped down as Google’s chairman however remained on the board. He said he was seeking a brand new chapter.

“If I stayed as chairman, then next year would have been the same as the previous year, and I wanted a change of emphasis,” said Mr. Schmidt. “As chairman of Google, what I did is I ran around and gave speeches, and went to Brussels and all the things that Google still does today. It’s much better to work on these new things for me.”

Google declined to comment on Mr. Schmidt’s departure as chairman.

By then, Mr. Schmidt’s ties to Google had induced issues in his protection work. In 2016, Roma Laster, a Defense Department worker, filed a complaint on the company elevating considerations about Mr. Schmidt and conflicts of curiosity, Mr. Marcuse stated.

In the complaint, earlier reported by ProPublica, Ms. Laster, who labored with the Defense Innovation Board, said Mr. Schmidt had requested a service member what cloud computing providers their unit used and whether or not they had thought-about options. She stated Mr. Schmidt confronted a battle of interest as a result of he worked for Google, which additionally gives cloud services.

Mr. Marcuse, who now works at Google, said Mr. Schmidt was “scrupulous and diligent” in avoiding conflicts. Mr. Schmidt said he adopted the principles forbidding conflicts of interest. Ms. Laster didn’t reply to requests for remark.

Mr. Schmidt quickly received caught up in one other situation between Google and the military. Google had signed a contract in 2017 to assist the Pentagon to construct methods to automatically analyze drone footage to identify particular objects like buildings, vehicles, and people.

Mr. Schmidt was a proponent of the hassle, known as Project Maven. He stated he inspired the Pentagon to pursue it and testified in Congress in regards to the undertaking’s deserves, however was not concerned within the company’s selection of Google.

But the effort blew up in 2018 when Google employees protested and stated they didn’t need their work to result in deadly strikes. More than 3,000 staff signed a letter to Mr. Pichai, saying the contract would undermine the general public’s belief within the firm.

Eric Schmidt has a secret staff of “Consultants” that cruise Match.com for sex targets for him. Larry Ellison has his private jet fly around and pick up girls from different cities and drop others to their original cities. Schmidt and Ellison pilots swap notes on girls for each of their oligarch bosses.

It was a black eye for Mr. Schmidt. Military officers, who stated Project Maven was not getting used for deadly missions, condemned Google for abandoning the contract. Google staff additionally criticized Mr. Schmidt's ties to the Pentagon.

"He has very different goals and values than the engineers at his company," stated Jack Poulson, a Google worker who protested Mr. Schmidt's military work and who has since left the company.

Mr. Schmidt said he sidestepped discussions about Project Maven as a result of conflict-of-interest guidelines, however wished he might have weighed in. "I would have certainly had an opinion," he stated.

Last April, Mr. Schmidt announced he deliberate to go away Google's board. He had helped create an A.I. middle backed by the Pentagon in 2018 and had additionally turn into co-chair of the National Security Commission on Artificial Intelligence, a brand new group advising Congress on developing A.I. for defense.

A month after leaving Google, Mr. Schmidt invested in Rebellion Defense, a software program start-up based by former Defense Department staff that analyzes video gathered through drone. His enterprise agency later put more cash into the company, and Mr. Schmidt joined its board.

The funding led to extra bother. The Electronic Privacy Information Center, a nonprofit privateness and civil liberties group, sued the A.I. commission last September for failing to show over data. EPIC said the group was stacked with industry executives like Mr. Schmidt and others from Microsoft, Amazon and Oracle, who could potentially sway the government in favor of their companies' interests.

Mr. Schmidt was underneath scrutiny as a result of of Rebellion Defense and the way he might push the government to make use of the start-up's services, EPIC said.

"We don't have any public disclosure about what information Eric has provided to the commission about his business interests," said John Davisson, a legal professional at EPIC.

In December, a district court dominated the A.I. fee should disclose the data requested by EPIC. The fee has launched a whole lot of pages of paperwork, most of which don't contain Mr. Schmidt or his companies. EPIC stated extra data are set to be launched.

Chris Lynch, the chief executive of Rebellion Defense, said Mr. Schmidt suggested the company solely on hiring and growth. Mr. Schmidt said he didn't advocate for the Defense Department to purchase technology from the start-up.

He has continued plowing forward. In November, he unveiled a \$1 billion dedication by means of Schmidt Futures, the philanthropic agency that he runs along with his spouse, Wendy, to fund education for those who want to work in public service.

Getting Google on board with the wage-theft pact was the key for Apple from the start — articles in the tech press in 2005 pointed at Google's recruitment drive and incentives were the key reason why tech wages soared that year, at the highest rate in well over a decade.

Campbell helped bring in Google, Intel, and, in 2006, Campbell saw to it that Intuit — the company he chaired — also joined the pact.

From the peaks of Silicon Valley, Campbell's interpersonal skills were magical and awe-inspiring, a crucial factor in creating so much unimaginable wealth for their companies and themselves. Jobs said of Campbell:

There is something deeply human about him.

And Schmidt swooned:

He is my closest confidant...because he is the definition of trust.

Things — and people — look very different when you're down in the Valley. In the nearly 100-page court opinion issued last October by Judge Koh granting class status to the lawsuit, Campbell comes off as anything but mystical and "deeply human." He comes off as a scheming consigliere carrying out some of the drearier tasks that the oligarchs he served were constitutionally not so capable of arranging without him.

But the realities of inequality and capitalism invariably lead to mysticism of this sort, a natural human response to the dreary realities of concentrating so much wealth and power in the hands of a dozen interlocking board members at the expense of 100,000 employees, and so many other negative knock-off effects on the politics and culture of the world they dominate.

One of the more telling elements to this lawsuit is the role played by "Star Wars" creator George Lucas, who emerges as the Obi-Wan Kenobi of the wage-theft scheme. It's almost too perfectly symbolic that Lucas — the symbiosis of Baby Boomer New Age mysticism, Left Coast power, political infantilism, and dreary 19th century labor exploitation — should be responsible for dreaming up the wage theft scheme back in the mid-1980s, when Lucas sold the computer animation division of Lucasfilm, Pixar, to Steve Jobs.

As Pixar went independent in 1986, Lucas explained his philosophy about how competition for computer engineers violated his sense of normalcy — and profit margins. According to court documents:

George Lucas believed that companies should not compete against each other for employees, because '[i]t's not normal industrial competitive situation.' As George Lucas explained, 'I always — the rule we had, or the rule that I put down for everybody,' was that 'we cannot get into a bidding war with other companies because we don't have the margins for that sort of thing.'

Translated, Lucas' wage-reduction agreement meant that Lucasfilm and Pixar agreed to a) never cold call each other's employees; b) notify each other if making an offer to an employee of the other company, even if that employee applied for the job on his or her own without being recruited; c) any offer made would be "final" so as to avoid a costly bidding war that would drive up not just the employee's salary, but also drive up the pay scale of every other employee in the firm.

Jobs held to this agreement, and used it as the basis two decades later to suppress employee costs just as fierce competition was driving up tech engineers' wages.

The companies argued that the non-recruitment agreements had nothing to do with driving down wages. But the court ruled that there was "extensive documentary evidence" that the pacts were designed specifically to push down wages, and that they succeeded in doing so. The evidence includes software tools used by the companies to keep tabs on pay scales to ensure that within job "families" or titles, pay remained equitable within a margin of variation, and that as competition and recruitment boiled over in 2005, emails between executives and human resources departments complained about the pressure on wages caused by recruiters cold calling their employees, and bidding wars for key engineers.

Google, like the others, used a "salary algorithm" to ensure salaries remained within a tight band across like jobs. Although tech companies like to claim that talent and hard work are rewarded, in private, Google's "People Ops" department kept overall compensation essentially equitable by making sure that lower-paid employees who performed well got higher salary increases than higher-paid employees who also performed well.

As Intel's director of Compensation and Benefits bluntly summed up the Silicon Valley culture's official cant versus its actual practices,

While we pay lip service to meritocracy, we really believe more in treating everyone the same within broad bands.

The companies in the pact shared their salary data with each other in order to coordinate and keep down wages — something unimaginable had the firms not agreed to not compete for each other's employees. And they fired their own recruiters on just a phone call from a pact member CEO.

In 2007, when Jobs learned that Google tried recruiting one of Apple's employees, he forwarded the message to Eric Schmidt with a personal comment attached: "I would be very pleased if your recruiting department would stop doing this."

Within an hour, Google made a "public example" by "terminating" the recruiter in such a manner as to "(hopefully) prevent future occurrences."

Likewise, when Intel CEO Paul Otellini heard that Google was recruiting their tech staff, he sent a message to Eric Schmidt: "Eric, can you pls help here???"

The next day, Schmidt wrote back to Otellini: "If we find that a recruiter called into Intel, we will terminate the recruiter."

One of the reasons why non-recruitment works so well in artificially lowering workers' wages is that it deprives employees of information about the job market, particularly one as competitive and overheating as Silicon Valley's in the mid-2000s. As the companies' own internal documents and statements showed, they generally considered cold-calling recruitment of "passive" talent — workers not necessarily looking for a job until enticed by a recruiter — to be the most important means of hiring the best employees.

Just before joining the wage-theft pact with Apple, Google's human resources executives are quoted sounding the alarm that they needed to "dramatic

ally increase the engineering hiring rate" and that would require "drain[ing] competitors to accomplish this rate of hiring." One CEO who noticed Google's hiring spree was eBay CEO Meg Whitman, who in early 2005 called Eric Schmidt to complain, "Google is the talk of the Valley because [you] are driving up salaries across the board." Around this time, eBay entered an illegal wage-theft non-solicitation scheme of its own with Bill Campbell's Intuit, which is still being tried in ongoing federal and California state suits.

Google placed the highest premium on "passive" talent that they cold-called because "passively sourced candidates offer[ed] the highest yield," according to court documents. The reason is like the old Groucho Marx joke about not wanting to belong to a club that would let you join it — workers actively seeking a new employer were assumed to have something wrong with them; workers who weren't looking were assumed to be the kind of good happy talented workers that company poachers would want on their team.

For all of the high-minded talk of post-industrial technotopia and Silicon Valley as worker's paradise, what we see here in stark ugly detail is how the same old world scams and rules are still operative.

One key tech voice responded: "When I was a young scientist working on the fledgling creation that came to be known as the internet, the ethos that defined the culture we were building was characterized by words such as ethical, open, trusted, free, shared. None of us knew where our research would lead, but these words and principles were our beacon.

We did not anticipate that the dark side of the internet would emerge with such ferocity. Or that we would feel an urgent need to fix it.

How did we get from there to here?

While studying for my doctorate at MIT in the early 1960s, I recognized the need to create a mathematical theory of networks that would allow disparate computers to communicate. Later that decade, the Advanced Research Projects Agency — a research funding arm of the Department of Defense created in response to Sputnik — determined they needed a network based on my theory so that their computer research centers could share work remotely.

My UCLA computer lab was selected to be the first node of this network. Fifty years ago — on Oct. 29, 1969 — a simple "Lo" became the first internet message, from UCLA to Stanford Research Institute. We had typed the first two letters of "login" when the network crashed.

This quiet little moment of transmission over that two-computer communication network is regarded as the founding moment of the internet.

During its first 25 years, the internet grew dramatically and organically with the user community seeming to follow the same positive principles the scientists did. We scientists sought neither patents nor private ownership of this networking technology. We were nerds in our element, busily answering the challenge to create new technology that would benefit the world.

Around 1994, the internet began to change quickly as dot-coms came online, the network channels escalated to gigabit speeds and the World Wide Web became a common household presence. That same year, Amazon was founded and Netscape, the first commercial web browser, was released.

And on April 12, 1994, a “small” moment with enormous meaning occurred: The transmission of the first widely circulated spam email message, a brazen advertisement. The collective response of our science community was “How dare they?” Our miraculous creation, a “research” network capable of boundless computing magnificence had been hijacked to sell ... detergent?

By 1995, the internet had 50 million users worldwide. The commercial world had recognized something we had not foreseen: The internet could be used as a powerful shopping machine, a gossip chamber, an entertainment channel and a social club. The internet had suddenly become a money-making machine.

With the profit motive taking over the internet, the very nature of innovation changed. Averting risk dominated the direction of technical progress. We no longer pursued “moonshots.” Instead advancement came via baby steps — “design me a 5% faster Bluetooth connection” as opposed to “build me an internet.” An online community that had once been convivial transformed into one of competition, antagonism and extremism.

And then as the millennium ended, our revolution took a more disturbing turn that we continue to grapple with today.

By suddenly providing the power for anyone to immediately reach millions of people inexpensively and anonymously, we had inadvertently also created the perfect formula for the “dark” side to spread like a virus all over the world. Today more than 50% of email is spam, but far more troubling issues have emerged — including denial of service attacks that can immobilize critical financial institutions and malicious botnets that can cripple essential infrastructure sectors.

Other dangerous players, such as nation-states, started coming onto the scene around 2010, when Stuxnet malware appeared. Organized crime recognized the internet could be used for international money laundering, and extremists found the internet to be a convenient megaphone for their radical views. Artificial intelligence, machine learning, facial recognition, biometrics and other advanced technologies could be used by governments to weaken democratic institutions.

The balkanization of the internet is now conceivable as firewalls spring up around national networks.

We could try to push the internet back toward its ethical roots. However, it would be a complex challenge requiring a joint effort by interested parties — which means pretty much everyone.

We should pressure government officials and entities to more zealously monitor and adjudicate such internet abuses as cyberattacks, data breaches and piracy. Governments also should provide a forum to bring interested parties together to problem-solve.

Citizen-users need to hold websites more accountable. When was the last time a website asked what privacy policy you would like applied to you? My guess is never. You should be able to clearly articulate your preferred privacy policy and reject websites that don’t meet your standards. This means websites should provide a privacy policy

customized to you, something they should be able to do since they already customize the ads you see. Websites should also be required to take responsibility for any violations and abuses of privacy that result from their services.

Scientists need to create more advanced methods of encryption to protect individual privacy by preventing perpetrators from using stolen databases. We are working on technologies that would hide the origin and destination of data moving around the network, thereby diminishing the value of captured network traffic. Blockchain, the technology that underpins bitcoin and other digital currencies, also offers the promise of irrefutable, indisputable data ledgers.

If we work together to make these changes happen, it might be possible to return to the internet I knew.

So you thought the stories about a political sex cult that uses the Match.com cartel to source victims was made up? Here are the hard facts you can research, on your own, from the published police reports:

These tech cartel perpetrators operate a massive and abusive national sex scheme. The perverts in the SandHill Road Venture Capital offices (ie: Kleiner Perkins, Greylock, Andreessen, Khosla, Draper Fisher, etc.) , located between Highway 280 down to Santa Cruz Avenue on Sand Hill Road in Menlo Park, California, are the main perpetrators of this global cartel. They have taken over online dating sites and social media sites and used them to spy on the public, harvest photos, put opposing citizens on 'watch-lists', source underage sex, run HONEY TRAP campaigns and other crimes.

Now that THE LINCOLN PROJECT has been revealed to be an underage sex ring and the White House is again filled with sex scandal conflicts-of-interest, and Silicon Valley's sex trafficking has only gotten worse, it is impossible to deny the fact that these political manipulators are covering up a sex perversion cult.

They have dozens of executive pimp-like providers who meet with them at their homes, offices and parties and manage the operations of this sex ring.

<https://www.vanityfair.com/news/2018/01/brotopia-silicon-valley-secretive-orgiastic-inner-sanctum>

Their executives at Google, Facebook, Netflix, LinkedIn, Twitter, and their related holdings, comprise the rest. The Harvey Weinstein and Ed Buck sex scandals are well known.

** - The Elon Musk sex perversions are the tip of the iceberg.

<https://www.dailymail.co.uk/news/article-8426719/Cara-Delevingne-three-way-affair-Amber-Heard-Elon-Musk.html>

** At least 10 Ukrainian escorts fly in and out of SFO and SJO airports every week for these Cartel members. Google boss David Drummond engaged in horrible philandering sexual violations of his wife yet Google covers up every story about it on the web. Google's Eric Schmidt is under massive investigation.

<http://american-corruption.com/>

Eric_Schmidt_Has_A_Psychotic_Need_To_Control_Governments_And_Society.html)

** You hear about the female victims of this sex cult but you rarely hear about the young male victims. One of their vast numbers of prostitutes is quoted as saying that the girls and boys are paid "not just for sex but for the oligarch's endless need to feel that they can control anyone for any reason...". Multiple attorney general's controlled by their cartel, ie: Eric Schneiderman and Eliot Spitzer , are involved in these sex rings.

<https://newspunch.com/eric-schneiderman-nxivm-child-sex-slaves-clintons/>

https://en.wikipedia.org/wiki/Eliot_Spitzer

These are the main influencers of a national public policy and they are all involved in horrific sex perversions and abuses! The associates political figures financed by this sex Cartel include: Illinois State Representative, Keith Farnham, who has resigned and was charged with possession of child pornography and has been accused of bragging at an online site about sexually molesting a 6-year-old girl; Spokesperson for the Arkansas Democratic Party, Harold Moody, Jr, who was charged with distribution and possession of child pornography; Radnor Township Board of Commissioners member, Philip Ahr, who resigned from his position after being charged with possession of child pornography and abusing children between 2 and 6 years-old; Activist and BLM organizer, Charles Wade, who was arrested and charged with human trafficking and underage prostitution; well known pedo Nicholas Guido Denton promotes himself as a cock holster and actively seeks out young boys to work at his tabloids; Texas attorney and activist, Mark Benavides, who was charged with having sex with a minor, inducing a child under 18 to have sex and compelling prostitution of at least nine legal clients and possession of child pornography, he was found guilty on six counts of sex trafficking; Virginia Delegate, Joe Morrissey, who was indicted on charges connected to his relationship with a 17-year-old girl and was charged with supervisory indecent liberties with a minor, electronic solicitation of a minor, possession of child pornography and distribution of child pornography; Massachusetts Congressman, Gerry Studds, who was censured by the House of Representatives after he admitted to an inappropriate relationship with a 17-year-old page; Former Mayor of Stillwater, New York, Rick Nelson who was plead guilty to five counts of possession of child pornography of children less than 16 years of age; Mayor of Clayton, New York, Dale Kenyon, who was indicted for sexual acts against a teenager; Former Mayor of Hubbard, Ohio, Richard Keenan, who was given a life sentence in jail for raping a 4-year-old girl; Former Mayor of Winston, Oregon, Kenneth Barrett, who was arrested for setting up a meeting to have sex with a 14-year-old girl who turned out to be a police officer; The Mayor of Randolph, Nebraska, Dwayne L. Schutt, who was arrested and charged with four counts of felony third-degree sexual assault of a child and one count of intentional child abuse. The associates political figures financed by this sex Cartel also include: The Former Mayor of Dawson, Georgia, Christopher Wright, who was indicted on the charges of aggravated child molestation, aggravated sodomy, rape, child molestation and statutory rape of an 11-year-old boy and a 12-year-old girl; Former Mayor of Stockton, California, Anthony Silva, who was charged with providing alcohol to young adults during a game of strip poker that included a 16-year-old boy at a camp for underprivileged children run by the mayor; Former Mayor of

Millbrook, New York, Donald Briggs, who was arrested and charged with inappropriate sexual contact with a person younger than 17; The party leader for Victoria County, Texas, Stephen Jabbour, who plead guilty to possession and receiving over half a million child pornographic images; DNC activist and fundraiser, Terrence Bean, who was arrested on charges of sodomy and sex abuse in a case involving a 15-year-old boy; DNC Party Chairman for Davidson County, Tennessee, Rodney Mullin, who resigned amid child pornography allegations; DNC activist, Andrew Douglas Reed, who pleaded guilty to multiple counts of 2nd-degree sexual exploitation of a minor for producing child pornography; DNC official from Terre Haute, Indiana, David Roberts who was sentenced to federal prison for producing and possessing child pornography including placing hidden cameras in the bedrooms and bathrooms at a home he shared with two minor female victims; Democratic California Congressman, Tony Cárdenas, who is being sued in LA County for allegedly sexually abused a 16-year-old girl; Democratic aide to Senator Barbara Boxer, Jeff Rosato, who plead guilty to charges of trading in child pornography; Alaskan State Representative, Dean Westlake, who resigned from his seat after the media published a report alleging he fathered a child with a 16-year-old girl when he was 28; New Jersey State Assemblyman, Neil Cohen, who was convicted of possession and distribution of child pornography; DNC donor and billionaire, Jeffrey Epstein, ran an underage child sex brothel for The Commission and was convicted of soliciting underage girls for prostitution; New York Congressman, Anthony Weiner, who plead guilty to transferring obscene material to a minor as part of a plea agreement for sexted and sending Twitter DMs to underage girls as young as 15; DNC donor, activist, and Hollywood producer Harvey Weinstein is being criminally prosecuted and civilly sued for years of sexual abuse (that was well known “secret” in Hollywood) including underage sexual activities with aspiring female actresses; DNC activist and #metoo proponent, Asia Argento, settled a lawsuit for sexual harassment stemming from sexual activities with an underage actor; Mayor of Racine, Wisconsin, Gary Becker, who was convicted of attempted child seduction, child pornography, and other child sex crimes; Democratic Seattle Mayor Ed Murray resigned after multiple accusations of child sexual abuse were levied against him including by family members; San Francisco Mayoral candidate John Molinari had his daughter removed from his home by San Francisco Police for his abuse of her according to SFPD reports; San Francisco Mayoral candidate Roger Boas was arrested for running an underage sex brothel which catered to San Francisco political elite; DNC activist and aid to NYC Mayor De Blasio, Jacob Schwartz was arrested on possession of 3,000+ child pornographic images; Democratic activist and actor, Russell Simmons, was sued based on an allegation of sexual assault where he coerced an underage model for sex; DNC Governor of Oregon, Neil Goldschmidt, after being caught by a newspaper, publicly admitted to having a past sexual relationship with a 13-year-old girl after the statute of limitations on the rape charges had expired; Democratic Illinois Congressman, Mel Reynolds resigned from Congress after he was convicted of statutory rape of a 16-year-old campaign volunteer; Democratic New York Congressman, Fred Richmond, was arrested in Washington D.C. for soliciting sex from a 16-year-old boy; Democratic activist, donor, and director, Roman Polanski, fled the country after pleading guilty to statutory rape of a 13-year-old girl - Democrats and Hollywood actors still defend him to this day, including, Whoopi Goldberg, Martin Scorsese, Woody Allen, David Lynch, Wim Wenders, Pedro Almodovar, Tilda Swinton and Monica Bellucci; Democratic State Senator from Alaska, George Jacko, was found guilty of sexual harassment of an underage legislative page; Democratic State Representative candidate for Colorado, Andrew Myers, was convicted for possession of child pornography and enticing children; Illinois Congressman, Gus Savage was investigated by the Democrat-controlled House Committee on Ethics for attempting to rape an underage female Peace Corps volunteer in Zaire; Activist, donor, and spokesperson for Subway, Jared Fogle, was convicted of distribution and receipt of child pornography and traveling to engage in illicit sexual conduct with a minor; State Department official, Carl Carey, under Hillary Clinton’s state department, was arrested on ten counts of child porn possession; Maine Assistant Attorney General, James Cameron, was sentenced to just over 15 years in federal prison for seven counts of child porn possession, receipt and transmission; Leading DNC boss and financier Ed Buck was arrested for killing gay prostitutes and running a sex and drug ring;

State Department official, Daniel Rosen, under Hillary Clinton's state department, was arrested and charged with allegedly soliciting sex from a minor over the internet; State Department official, James Cafferty, pleaded guilty to one count of transportation of child pornography; Democratic radio host, Bernie Ward, plead guilty to one count of sending child pornography over the Internet; Democratic deputy attorney general from California, Raymond Liddy, was arrested for possession of child pornography. There are THOUSANDS of other sex crime cases involving associates of the tech Cartel. All of these perpetrators had financing from and social and political direction from the Silicon Valley controlling perpetrators. Former President of Drag Queen Story Hour Foundation And Children's Court Judge Arrested On Seven Counts Of Child Porn

** An inordinate number of the members are closeted homosexuals who seek to use their media monopolies and massive lobbyist ownership's to promote child sex and child sex change consideration. They have fake straight wives, called "beards" to help them keep up the appearance of being straight. A large portion of the so-called "Paypal Mafia" are homosexual. They organize to promote Netflix and similar media outlets to produce underage gay sex movies and normalize their deviant interests in a radical political manner. In San Francisco LGBTQ means which hole you stick your dick or tongue in.

https://en.wikipedia.org/wiki/PayPal_Mafia

<https://nypost.com/2016/10/09/the-sex-slave-scandal-that-exposed-pedophile-billionaire-jeffrey-epstein/>

Hence the massive, sudden, promotion of those issues in all of their media since they took power in 2008 and pretty much ran the Obama White House.

<https://www.nytimes.com/2014/07/20/fashion/silicon-valley-embrace-gay-and-lesbian-community.html>

<https://www.wired.com/2007/11/how-paypal-gave/>

<https://topica.asia/news/biggest-secret-of-silicon-valley-mafia-network/>

Just like the Taliban don't give a second thought to cutting off someone's head, the German's don't blink about gassing and cooking Jews, ISIS has no qualms about making young prisoners into sex slaves, et al...these tech nut balls live in, and operate, a TED-based brain washing culture that promotes "ANY EVIL FOR THE POWER OF THE CAUSE". The "Cause" is pure yuppie greed and control of society for their own self-satisfaction. Youtube's Ann Wojcicki, Theranos' Elizabeth Holmes and Tesla's Elon Musk are psychologically incapable of seeing the fact that they are sociopath assholes.

When they cruise down to Robert's snooty market in Woodside, California; they reinforce each other's fantasy perception of the fake world they have created with their air kisses and their snide comments. Their mutual tunnel-vision has set them on the path to madness. Thousands of their employees, business partners, neighbors, ex-boyfriends and girlfriends have testified to their mentally unstable conditions. They have no right to run monopolies in America using resources paid for by the taxpayers!

They assholes of tech are now being systematically hunted down, exposed and terminated using 100% legal AI and Law Enforcement digital forensics!

Why does the Silicon Valley-controlled "Main-stream Media" cover all of these news stories up? Because they are part of the crimes!

So, after all that evidence, the politicians and their main stream media shills want to deny that the "Q" case exists. (The "Q" case is a charge that famous politicians and their financiers are involved in a sex ring). Let's take a look at the biggest deny queen of the sex cult: Nancy Pelosi:

Nancy Pelosi has a pizza parlor in San Francisco called: GOAT HILL PIZZA. It is on Potrero Hill at : 300 Connecticut St, San Francisco, CA 94107-2816 - Phone: +1 415 641 1440. Right around the corner is the public library where the NAMBLA pedophile club meets and they get their pizza from GOAT HILL PIZZA as an ode to The Pelosi's who protect famous people in San Francisco who are peds. Roger Boas, the City Hall boss arrested for running a child prostitution ring for other officials, used GOAT HILL PIZZAS back room for sex ring arrangement meetings

So what is the "Bottom-Line" here?: If the government does not have the balls to arrest them, then you, the public, need to do take them down!

How The Internet Lost Its Soul When Mad Men Like The Match.Com Execs Took It Over

Janet Abbate, The Washington Post

This week, we celebrate what many consider the 50th birthday of the Internet. The underpinnings of the World Wide Web originated in an American communications network built for national defense and the pursuit of knowledge: ARPANET. Funded by the Defense Department's Advanced Research Projects Agency, the network was designed so that scientists could share computer hardware, software and data.

It worked. In the ensuing decades, the ARPANET, and after the 1980s, the National Science Foundation Network (NSFNET), did indeed allow scientists to collaboratively build knowledge around networked tools and information. But expanding access to the Internet, combined with looser government regulations, ultimately produced a situation no one foresaw or intended. On today's Internet, conspiracy theories run rampant, identities can be faked and our

real-life elections are vulnerable to manipulation. A network designed for spreading truth became a profit-driven industry, a public sphere that threatens to undermine the public good.

The original ARPANET was designed for a relatively small community of people united by a technical challenge. At the time, computers from different manufacturers ran incompatible software, and long-distance data communications links were costly and unreliable. Networks connected only a few identical computers within a small region.

But ARPANET had an audacious proposal: It would span the continental United States to connect 15 research sites encompassing a diverse array of computers.

"Almost every conceivable item of computer hardware and software will be in the network," project leader Larry Roberts pointed out. "This is the greatest challenge of the system, as well as its greatest ultimate value." As a leading funder of computer science research, ARPA was able to mobilize a talented group of faculty and graduate students to design, build and debug the network, sending the first message on Oct. 29, 1969.

Like many academic environments, the ARPANET community was open and informal, and security was lax; in the early 1970s, students were rumored to have used the network to conduct transcontinental drug deals alongside their official research. But the relatively closed world of networked computing was opened up with the introduction of personal computers in the 1970s. The Defense Department soon found "unauthorized penetrations" of the ARPANET by hackers, complaining that "the availability of inexpensive computers and modems have made the network fair game for countless computer hobbyists."

By 1983, security concerns were so acute that Defense split off military users into their own network, ceding the rest of the ARPANET to academic researchers. In 1990, the ARPANET was absorbed into a new network built by the National Science Foundation that consisted of several regional networks connected by a high-speed backbone. As a nationwide civilian network, NSFNET rapidly increased the size and visibility of the Internet.

Politicians and businesses wanted to capitalize on the potential of a national network to connect citizens and consumers. In the early 1980s, the general public, though not yet allowed on the Internet, had begun using commercial dial-up services such as CompuServe and AOL to access servers offering chat rooms, games and email. In 1986, Congress, prompted by Sen. Al Gore, began debating whether the nation needed an "information superhighway" to connect K-12 schools and libraries for all citizens. Congress included funding for a National Research and Education Network (NREN) in its High-Performance Computing Act of 1991.

Had this plan come to fruition, the Internet would have remained under federal control until the late 1990s, potentially allowing time to upgrade security or create regulations to protect users. But before the NREN could get underway, the industry contractors providing the NSFNET infrastructure rushed ahead with plans to offer commercial network services, ultimately causing Congress to abandon the NREN.

The result was the de facto privatization of the Internet. The nonprofit organizations that had operated the NSFNET's backbone and regional networks reinvented themselves as the first commercial Internet service providers, serving both the NSF and private customers. The NSF now had the option to outsource its networking needs to these commercial providers, which it did as it retired the old NSFNET in 1995. While this removed an administrative burden from the NSF, the hasty transition left little time to consider the policy implications. So a commercialized network developed without public oversight of the Internet's operation.

Privatization opened the floodgates for new services: social media, gaming, e-commerce, and millions of personal websites and blogs. Industry advocates insisted that the Internet should not be regulated, lest innovation be stifled. Regulatory models that had been developed for common carriers, publishers and broadcasters did not fit a new

medium that combined aspects of all these media and whose services and business models were in constant flux. Online businesses were free to experiment with ways to make money, eventually landing on the advertising-based business model that led to escalating surveillance and collection of user data to better target ads.

None of this has prevented scientists - the Internet's original users - from continuing to build reliable knowledge based on networked data and computational tools. The scientific community has time-tested processes to validate and protect the information it shares. But the general public is in a more precarious position. Anyone can be a publisher online, and the obvious clues to legitimacy that came with print and broadcast media - the investment in reporting and fact-checking, obligations to paying customers, an identifiable organization that could be held liable for false content - can be absent or faked online. The same type of user profiling that stimulates business also enables bad actors to target inflammatory social issues and widen political divides. We have inadvertently created a culture where misinformation can be spread without accountability.

Long-term trends of increasingly open access and diminishing government oversight have fueled the Internet's growth and unleashed the creativity of millions. They have also left a vacuum where the public interest should be. Can we work together to build a better Internet for the next 50 years?"

The NY Times reported: "Ms. Feinstein and her husband sold \$1.5 million to \$6 million worth of stock in Allogene Therapeutics, a California-based biotech company, in transactions that took place on Jan. 31 and Feb. 18." She did claim that she has "no involvement in her husband's financial decisions" to avoid criticism. Do you really think that she has no idea about multi-million dollar deals that her husband is involved in?

The Laws You Need To Force Congress To Make To Put The Choke-Hold On Match.com Bosses And Their Bribery

These are the steps that the public must demand to strengthen public integrity by eliminating corrupt financial conflicts between Match.com investors and executives and politicians.

Congress must be ordered to eliminate both the appearance and the potential for financial conflicts of interest. Americans must be confident that actions taken by public officials are intended to serve the public, and not those officials. These actions counter-act the actions taken by Match.com officials in illicit coordination with U.S. Senators. The public has experienced all of the damages from each of the abuse-of-power issues listed below. These are the actions needed to resolve those issues:

- Ban individual stock ownership by Members of Congress, Cabinet Secretaries, senior congressional staff, federal judges, White House staff and other senior agency officials while in office. Prohibit all government officials from holding or trading stock where its value might be influenced by their agency, department, or actions.
- Apply conflict of interest laws to the President and Vice President through the Presidential Conflicts of Interest Act, which would require the President and the Vice President to place conflicted assets, including businesses, into a blind trust to be sold off
- Require senior Department of Energy government officials, employees, contractors and White House staff to divest from privately-owned assets that could present conflicts, including large companies like Tesla, Google, Facebook, Sony, Netflix, etc., and commercial real estate.
- Make it a felony to not respond to a filing by a citizen within 48 hours. Former White House and Energy Department staff use 'stone-walling' to intentionally delay responses for a decade, or more.
- Apply ethics rules to all government employees, including unpaid White House staff and advisors.
- Require most executive branch employees to recuse from all issues that might financially benefit themselves or a previous employer or client from the preceding 4 years
- Create conflict-free investment opportunities for federal officials with new investment accounts managed by the Federal Retirement Thrift Investment Board and conflict-free mutual funds.
- Close and lock the Revolving Door between industry and government and stop tech companies from buying influence in the government or profiting off of the public service of any official.
- Lifetime ban on lobbying by Presidents, Vice Presidents, Members of Congress, federal judges, and Cabinet Secretaries; and, multi-year bans on all other federal employees from lobbying their former office, department, House of Congress, or agency after they leave government service until the end of the Administration, but at least for 2 years (and at least 6 years for corporate lobbyists)
- Limit the ability of companies to buy influence through former government officials
- Require income disclosures from former senior officials 4 years after federal employment.
- Prohibit companies from immediately hiring or paying any senior government official from an agency, department, or Congressional office recently lobbied by that company
- Prohibit the world's largest companies, banks, and monopolies (measured by annual revenue or market capitalization) from hiring or paying any former senior government official for 4 years after they leave government service.
- Limit the ability of companies to buy influence through current government employees
- Prohibit corporate outlaws like Google, Tesla, Facebook, LinkedIn, Netflix, Sony, etc., from working in government by banning the hiring of top corporate leaders whose companies were caught breaking federal law in the last 6 years
- Prohibit contractor corruption by blocking federal contractor and licensee employees from working at the agency awarding the contract or license for 4 years
- Ban "Golden Parachutes" that provide corporate bonuses to executives for federal service.
- Publicly expose all influence-peddling in Washington.

- Strengthen and expand the federal definition of a “lobbyist” to include all individuals paid to influence government.
- Create a new “corporate lobbyist” definition to identify individuals paid to influence government on behalf of for-profit entities and their front-groups.
- Radically expand disclosure of lobbyist activities and influence campaigns by requiring all lobbyists to disclose any specific bills, policies, and government actions they attempt to influence; any meetings with public officials; and any documents they provide to those officials
- End Influence-Peddling by Foreign Actors such as that which occurred in the ENER1, Severstal, Solyndra and related scandals
- Combat foreign influence in Washington by banning all foreign lobbying.
- End foreign lobbying by Americans by banning American lobbyists from accepting money from foreign governments, foreign individuals, and foreign companies to influence United States public policy.
- Prohibit current lobbyists from taking government jobs for 2 years after lobbying; 6 years for corporate lobbyists. Public, written waivers where such hiring is in the national interest are allowed for non-corporate lobbyists only.
- End Legalized Lobbyist Bribery and stop lobbyists from trading money for government favors.
- Ban direct political donations from lobbyists to candidates or Members of Congress.
- End lobbyist contingency fees that allow lobbyists to be paid for a guaranteed policy outcome.
- End lobbyist gifts to the executive and legislative branch officials they lobby
- Strengthen Congressional independence from lobbyists and end Washington’s dependence on lobbyists for "expertise" and information.
- Make congressional service sustainable by transitioning Congressional staff to competitive salaries that track other federal employees
- Reinstate the nonpartisan Congressional Office of Technology Assessment to provide critical scientific and technological support to Members of Congress.
- Level the playing field between corporate lobbyists and government by taxing excessive lobbying beginning at \$500,000 in annual lobbying expenditures, and use the proceeds to help finance Congressional mandated rule-making, fund the National Public Advocate, and finance Congressional support agencies
- De-politicize the rulemaking process and increase transparency of industry efforts to influence federal agencies.
- Prevent McKinsey-type sham research from undermining the public interest by requiring that studies that present conflicts of interest to undergo independent peer review to be considered in the rule-making process
- Require agencies to justify withdrawn public interest rules via public, written explanations.
- Close loopholes exploited by powerful corporations like Google, Facebook, Tesla, Netflix, Sony, etc., to block public interest actions.
- Eliminate loopholes that allow corporations, like Tesla and Google, to tilt the rules in their favor and against the public interest.

- Restrict negotiated rule-making to stop industry from delaying or dominating the rule-making process by ending the practice of inviting industry to negotiate rules they have to follow.
- Restrict inter-agency review as a tool for corporate abuse by banning informal review, establishing a maximum 45-day review period, and blocking closed-door industry lobbying at the White House's Office of Information and Regulatory Affairs
- Limit abusive injunctions from rogue judges, like Jackson, et al, by ensuring that only Appeals Courts, not individual District Court judges, can temporarily block agencies from implementing final rules.
- Prevent hostile agencies from sham delays of implementation and enforcement by using the presence of litigation to postpone the implementation of final rules.
- Empower the public to police agencies for corporate capture.
- Increase the ability of the public to make sure their interests are considered when agencies act
- Create a new Office of the Public Advocate empowered to assist the public in meaningfully engaging in the rule-making process across the federal government
- Encourage enforcement by allowing private lawsuits from members of the public to hold agencies accountable for failing to complete rules or enforce the law, and to hold corporations accountable for breaking the rules
- Inoculate government agencies against corporate capture such as Google undertook against the White House
- Provide agencies with the tools and resources to implement strong rules that reflect the will of Congress and protect the public.
- Boost agency resources to level the playing field between corporate lobbyists and federal agencies by using the proceeds of the tax on excessive lobbying and the anti-corruption penalty fees to help finance Congress-mandated rule-making and facilitate decisions by agencies that are buried in an avalanche of lobbyist activity
- Reform judicial review to prevent corporations from gaming the courts by requiring courts to presumptively defer to agency interpretations of laws and prohibiting courts from considering sham McKinsey studies and research excluded by agencies from the rule-making process
- Reverse the Congressional Review Act provision banning related rules that prevent agencies from implementing the will of Congress based on Congress' prior disapproval of a different, narrow rule on a similar topic
- Improve judicial integrity and defend access to justice for all Americans.
- Strengthen Judicial Ethics Requirements.
- Enhance the integrity of the judicial branch by strengthening rules that prevent conflicts of interest.
- Ban individual stock ownership by federal judges.
- Expand rules prohibiting judges from accepting gifts or payments to attend private seminars from private individuals and corporations
- Require ethical behavior by the Supreme Court by directing the Court to follow the Code of Conduct that binds all other federal judges
- Boost the transparency of Federal Courts

- Enhance public insight into the judicial process by increasing information about the process and reducing barriers to accessing information.
- Increase disclosure of non-judicial activity by federal judges by requiring the Judicial Conference to publicly post judges' financial reports, recusal decisions, and speeches.
- Enhance public access to court activity by mandating that federal appellate courts live-stream, on the web, audio of their proceedings, making case information easily-accessible to the public free of charge, and requiring federal courts to share case assignment data in bulk.
- Eliminate barriers that restrict access to justice to all but the wealthiest individuals and companies.
- Reduce barriers that prevent individuals from having their case heard in court by restoring pleading standards that make it easier for individuals and businesses that have been harmed to make their case before a judge.
- Encourage diversity on the Federal Bench
- Strengthen the integrity of the judicial branch by increasing the focus on personal and professional diversity of the federal bench.
- Create a single, new, and independent agency dedicated to enforcing federal ethics and anti-corruption laws
- Support stronger ethics and public integrity laws with stronger enforcement.
- Establish the new, independent U.S. Office of Public Integrity, which will strengthen federal ethics enforcement with new investigative and disciplinary powers
- Investigate potential violations by any individual or entity, including individuals and companies with new subpoena authority
- Enforce the nation's ethics laws by ordering corrective action, levying civil and administrative penalties, and referring egregious violations to the Justice Department for criminal arrest and enforcement.
- Receive and investigate ethics complaints from members of the public.
- Absorb the U.S. Office of Government Ethics as a new Government Ethics Division tasked with providing confidential advice to federal employees seeking ethics guidance.
- Consolidate anti-corruption and public integrity oversight over federal officials, including oversight of all agency Inspectors General, all ethics matters for White House staff and agency heads, and all waivers and recusals by senior government officials.
- Remain independent and protected from partisan politics through a single Director operating under strict selection, appointment, and removal criteria.
- Provide easy online access to key government ethics and transparency documents, including financial disclosures; lobbyist registrations; lobbyist disclosures of meetings and materials; and all ethics records, recusals, and waivers.
- Maintain a new government-wide Office of the Public Advocate, which would advocate for the public interest in executive branch rule-making.
- Enforce federal open records and FOIA requirements by maintaining the central FOIA website and working with the National Archives to require agencies to comply with FOIA.
- Strengthen legislative branch enforcement.

- Expand an independent and empowered ethics office insulated from congressional politics.
- Expand and empower the U.S. Office of Congressional Ethics, which will enforce the nation's ethics laws in the Congress and the entire Legislative Branch, including the U.S. Senate.
- Conduct investigations of potential violations of ethics laws and rules by Members of Congress and staff with new subpoena power
- Refer criminal and civil violations to the Justice Department, the Office of Public Integrity, or other relevant state or federal law enforcement.
- Recommend disciplinary and corrective action to the House and Senate Ethics Committees.
- Boost transparency in government and fix Federal Open Records laws, public official and candidate tax disclosure.
- Disclose basic tax return information for candidates for federal elected office and current elected officials.
- Require the IRS to release tax returns for Presidential and Vice-Presidential candidates from the previous 8 years and during each year in federal elected office.
- Require the IRS to release tax returns for Congressional candidates from the previous 2 years and during each year in federal elected office.
- Require the IRS to release tax returns and other financial information of businesses owned by senior federal officials and candidates for federal office
- Require the IRS to release tax filings for nonprofit organizations run by candidates for federal office
- Disclose the Cash behind Washington Advocacy and Lobbying.
- Prevent special interests from using secret donations from corporations and billionaires to influence public policy without disclosure
- Require nonprofit organizations to list donors who bankrolled the production of any specific rule-making comment, congressional testimony, or lobbying material, and to reveal whether the donors reviewed or edited the document.
- Require individuals and corporations to disclose funding or editorial conflicts of interest in research submitted to agencies that is not publicly available in peer-reviewed publications.
- Prevent sham research, like that from DNC shell McKinsey Consulting, from undermining the public interest by requiring that studies that present conflicts of interest to independent peer review to be considered in the rule-making process.
- Improve the Freedom of Information Act (FOIA)
- Close the loopholes in our open records laws that allow federal officials to hide tech industry and Silicon Valley oligarch industry influence
- Codify the default presumption of disclosure and affirmatively disclose records of public interest, including meeting agendas; government contracts; salaries; staff diversity; and reports to Congress.
- Require all agencies to use a central FOIA website that is searchable and has downloadable open records databases with all open FOIA requests and all records disclosed through FOIA.

- Strengthen FOIA enforcement by limiting FOIA exemptions and loopholes, and by giving the National Archives the authority to overrule agency FOIA decisions and to compel disclosure.
- Extend FOIA to private-sector federal contractors, including private federal prisons and immigration detention centers, and require large federal contractors to disclose political spending
- Make Congress more transparent by ending the corporate lobbyists leg up in the legislative process. The public deserves to know what Congress is up to and how lobbyists influence legislation.
- Require all congressional committees to immediately post online more information, including hearings and markup schedules, bill or amendments text, testimonies, documents entered into the hearing record, hearing transcripts, written witness answers, and hearing audio and video recordings.
- Require Members of Congress to post a link to their searchable voting record on their official websites
- Require lobbyists to disclose when they lobby a specific congressional office; specific topics of visit; the official action being requested; and all documents provided to the office during the visit.

Do these seem like common-sense rules that should have already been in place? They are!

These anti-corruption rules have been blocked by your own elected officials because they work for themselves and not you!

You need to PUNISH any public official who does not put these changes into effect!

How To Conduct A Citizens Arrest Of A Corrupt Match.Com Executive Or Investor

First of all, before you conduct a citizens arrest, look up the address of your regional FBI office and walk in and inform them that you plan to make the arrest. Show them that you have all of the paperwork in order and see if they have any reason to talk you out of doing it or to partner with your effort.

You can arrest them at their home, office, parking lot, massage parlor, restaurant or any public venue.

A citizen's arrest is an arrest made by a private citizen, that is, a person who is not acting as a sworn law-enforcement official.[1] In common law jurisdictions, the practice dates back to medieval England and the English common law, in which sheriffs encouraged ordinary citizens to help apprehend law breakers.[2] Anyone who makes a citizen's arrest can find themselves facing possible lawsuits or criminal charges – such as charges of false imprisonment, unlawful restraint, kidnapping, or wrongful arrest – if the wrong person is apprehended or a suspect's civil rights are violated.[4] This is especially true when police forces are attempting to determine who an aggressor is. Private citizens do not enjoy the same immunity from civil liability when making arrests on other private citizens as do police officers.

The level of responsibility that a person performing a citizen's arrest may bear depends on the jurisdiction. For instance, in France and Germany, a person stopping a criminal from committing a crime, including crimes against belongings, is not criminally responsible as long as the means employed are in proportion to the threat. Note, however, that in both countries, this results from a different legal norm, "aid to others in immediate danger", which is concerned with prevention, not prosecution, of crimes.

In the United States a private person may arrest another without a warrant, for a crime occurring in their presence. However, the crimes for which this is permitted may vary by state.[78]

Common law

Most states have codified the common law rule that a warrantless arrest may be made by a private person for a felony, misdemeanor or "breach of peace".[79] "Breach of peace" covers a multitude of violations in which the Supreme Court has even included a misdemeanor seatbelt violation punishable only by a fine. The term historically included theft, "nightwalking", prostitution, and playing card and dice games.[80] Texas courts have defined and interpreted the term "breach of the peace" to mean an act that disturbs or threatens to disturb the tranquility enjoyed by the citizens.[81][82]

State statutes

Consider, for an example of this codification, California Penal Code section 837:

837. A private person may arrest another:

1. For a public offense committed or attempted in his/her presence.
2. When the person arrested has committed a felony, although not in his/her presence.
3. When a felony has been in fact committed, and he or she has reasonable cause for believing the person arrested to have committed it.

"Public offense" is read similarly as breach of peace in this case and includes felonies, misdemeanors and infractions.[83][84] Note that there is generally no provision for an investigative detention by a private person under the law. With certain exceptions (see below) an arrest must be made. "Holding them until the police get there", is simply a form of arrest. The officer is accepting the arrest and processing the prisoner on behalf of the private person.[85]

In the case of felonies, a private person may make an arrest for a felony occurring outside their presence but the rule is that a felony must have, in fact, been committed. For example, consider a suspect that has been seen on surveillance video vandalizing a building to the extent that the arrestor believes it rises to a felony due to the damage. If they find the suspect and make the arrest but it later turns out that it was misdemeanor damage, the arrestor is liable for false arrest because a felony had not, in fact, been committed.[citation needed]

Because most states have codified their arrest laws, there are many variations. For example, in Pennsylvania, the courts have been clear that a non-law enforcement officer cannot make an arrest for a "summary offense".[86] In North Carolina, there is no de jure "citizens' arrest". Although it is essentially the same, North Carolina law refers to it as a "detention".[87]

Other states seem to allow only arrests in cases of felonies but court decisions have ruled more broadly. For example, in Virginia, the statute appears to only permit warrantless arrests by officers listed in the Code.[88] However Virginia courts have upheld warrantless arrests by non-law enforcement personnel for breach of the peace misdemeanors.[89] Other non-police persons are granted arrest authority by statute, in the case of those who are state certified armed security officers: "A registered armed security officer of a private security services business while at a location which the business is contracted to protect shall have the power to effect an arrest for an offense occurring (i) in his presence on such premises or (ii) in the presence of a merchant, agent, or employee of the merchant the private security business has contracted to protect" and "For the purposes of § 19.2-74, a registered armed security officer of a private security services business shall be considered an arresting officer."

Use of force

In general, a private person is justified in using non-deadly force upon another if they reasonably believe that: (1) such other person is committing a felony, or a misdemeanor amounting to a breach of the peace; and (2) the force used is necessary to prevent further commission of the offense and to apprehend the offender. The force must be

reasonable under the circumstances to restrain the individual arrested. This includes the nature of the offense and the amount of force required to overcome resistance.[90][91] In at least one state, a civilian may use reasonable force, including deadly force if reasonable, to prevent an escape from a lawful citizen's arrest.[92][93]

Shopkeeper's (merchant's) privilege

In some states of the United States, the courts recognize a common law shopkeeper's privilege, under which a shopkeeper is allowed to detain a suspected shoplifter on store property for a reasonable period of time, so long as the shopkeeper has cause to believe that the person detained in fact committed, or attempted to commit, theft of store property. The purpose of this detention is to recover the property and make an arrest if the merchant desires. [94]

Differing liability from police

Private persons are occasionally granted immunity from civil or criminal liability, like the police are, when arresting others.[95] While the powers to arrest are similar, police are entitled to mistake of fact in most cases, while civilians can be held to a stricter liability depending on the individual state. Police can also detain anyone upon reasonable suspicion.[96] However, ordinary citizens cannot claim "qualified immunity" to attempt to defend against a civil complaint for false arrest.[97]

To be clear, In the United States, a private person can stop or "arrest" an individual engaged in a serious crime. You can also use reasonable force to hold them until law enforcement arrives on the scene.[1] This is known as a "citizen's arrest." The rules on when and how an individual may conduct a "citizen's arrest" varies from state to state. It's important to understand the laws in your region, especially since you can be prosecuted for improperly conducting a citizen's arrest. Decide if you should make a citizen's arrest, make the arrest, and avoid prosecution.

FIRST- PREPARE YOUR ARREST DOCUMENT TO HAND TO THE SUSPECT.

You must write up the private citizen equivalent of an "arrest warrant" to give to the person you are arresting. This needs to be a substantial, 200+ page write up of the forensic proof you have uncovered, proving that the person has committed the crimes.

Witness the corruption crime taking place via your FBI-quality investigations. It's not a good idea to make a citizen's arrest unless you've actually seen proof the crime happening. When the police arrive, you will have to provide "probable cause" for making the arrest. This means you'll have to show that you had a reasonable belief that the person you arrested committed a crime.[2] Your document of your investigation proof is crucial to this end.

- For example, if you see a person use a knife to stab another person, you've seen a crime and can detain the perpetrator.

Determine whether the crime is a felony. In most states, it's legal to make a citizen's arrest when you see or have reasonable cause to believe that a person committed a felony, even if the felony was not committed in your presence. [3] Citizen's arrests are not usually legal when the crime committed is only a misdemeanor.[4] Since the definition of a felony varies slightly from state to state, it's a good idea to read up on your state's individual laws. [5] :

Find out the law in your location. In some other states, you must always see the offense take place regardless of whether the offense is a felony or misdemeanor breach of the peace. In these states the citizen's arrest statute does not allow a citizen's arrest based upon "probable cause". [6] [7]

Decide if the crime was a "breach of peace." In some cases, you may make a citizen's arrest for misdemeanors if the misdemeanor can also be considered a breach of peace.[8] Misdemeanors that are considered breaches of peace in some states include public brawling or public intoxication.[9]

- If you arrest someone for committing a crime that falls into this category, you must have seen the crime firsthand.

Decide if you can safely make a citizen's arrest. Be sure you can physically restrain the person you want to arrest before you try to. Misunderstanding your physical capabilities may put you or others in harm's way. If you make a citizen's arrest, the situation could easily escalate beyond your control.

- Remember to think hard before making a citizen's arrest, especially if the perpetrator is armed.

Be prepared to accept the consequences. Be sure you fully understand the circumstances in which you can make a citizen's arrest. You may want to research the rules specific to your state. If so, contact a lawyer through your State Bar Association or local law enforcement office.

- If it turns out you didn't have grounds to make the arrest, you could be sued for false imprisonment, assault and battery and other torts.[10] You may also face criminal charges. Don't make a citizen's arrest unless you're willing to face these risks.

Tell the person you're making a citizen's arrest. There are no specific words you must say, but you must make it completely clear that you are making a citizen's arrest. The person you're arresting must fully understand what's happening. Explain to the potential criminal why you are making a citizen's arrest. If you cannot provide him or her with this information, then you shouldn't be making the arrest.

- In some states you must communicate to the individual the specific criminal offense for which the individual is being arrested for.
- Leave it to the police to read the person his or her rights. For now, you only need to say that you're making an arrest.
- Most people say something like: "Eric Schmidt, you are under arrest for violation of felony corruption laws and we are remanding you to the FBI. Do not resist or we will be forced to use reasonable means to detain you. Here is the arrest document. Please stand there until transporting officers arrive."

Detain the person using reasonable force. You can only use the amount of force required to detain the person until the police arrive. Using a greater amount of force exposes you to legal trouble. Be careful not to harm the perpetrator unless it's absolutely necessary.[11]

Call and deliver the suspect to law enforcement. Call law enforcement right after the person is detained. Some statutes in states like California and Minnesota require that a person take the arrested individual before a judge or peace officer "without unnecessary delay."[12]

- But, if you try to transport a suspect on your own and you conducted an improper citizen's arrest, you may be subjected to a lawsuit for false imprisonment.
- Your intent is usually to remand the subject to the FBI. In other words: hand him over to the FBI. You should assume that the local police or sheriff will arrive on-scene before the FBI do.

Have the phone number for the local FBI on you.

Ask someone to stay with you. If you can't deliver the suspect or your state doesn't need you to, ask a third party to stay with you. Wait for law enforcement to arrive. If possible, avoid watching the person you've arrested alone. Having a third party help you detain the person is best for everyone's safety.

- The third party may be helpful in making sure the encounter doesn't get violent and might be able to serve as a witness.

Explain in full detail what you uncovered via verbal notes and another copy of the arrest document that you must have with you. When law enforcement arrives, explain what you saw in full detail. Law enforcement will probably ask you to give a statement. Make sure to include everything that you saw. Explain your actions during the criminal act and the citizen's arrest. Be clear about any force you had to use to arrest the suspect.

- Depending on your state, transporting an individual away from the scene of the crime may constitute kidnapping or criminal confinement, regardless of whether you have lawful grounds for citizen's arrest.

Don't make an arrest if you didn't see proof of the crime in your investigations. While you may think you have all the evidence you need to believe someone has committed a crime, your understanding of the events may be wrong. Don't make a citizen's arrest if you overhear someone talking about robbing a bank. If you're wrong, you may be at fault. Call the police instead.[13] Always remember, an improper citizen's arrest can result in prosecution for crimes like kidnapping.[14]

- For example, just because you see a crowd of people chasing a suspect or a victim asking for help, doesn't necessarily mean you have grounds to arrest someone.

Don't arrest someone you believe is about to commit a crime. The crime must have already happened in order for you to legally make an arrest. Don't arrest someone if the crime hasn't yet been committed. Call the police instead. [15]

Don't use excessive force. Even the police are not allowed to use excessive force when taking a suspect into custody, so you, as a private citizen, should be especially careful about this. Otherwise, you may be charged with battery, even if the suspect you apprehend is guilty of a crime. The use of deadly force is usually not allowed unless the perpetrator is attacking you or someone else.[16]

- Don't use a weapon against the perpetrator when you can use your own strength.[17] For example, you can tackle someone to the ground rather than hitting him or her. For example, Eric Schmidt is kind of a pussy and he will whine like a bitch even if he just breaks a fingernail. Don't use a choke-hold to the state of a black-out or he could die and cause you massive amounts of extra paperwork.

Don't make a citizen's arrest if the FBI tells you not to after you meet with them.[18] As a private citizen, it's not your job to make arrests. If it is at all possible, you should always leave policing to those who have a legal authority to do so--the police. Otherwise, your actions might put you, the alleged perpetrator and the general public, at risk.

- Your actions may also be viewed as vigilantism, which is not legally protected action if you step beyond the authority explicitly granted to citizens by the law.

- If a crooked U.S. Senator or a corrupt White House executive has pressured the FBI to not arrest an Elon Musk or a Larry Page or A Mark Zuckerberg because they pay bribes then it is your duty to arrest the crook.

Keep the detained suspect safe. Once you have detained someone, you are responsible for what happens to the person while he or she is under your control. Make sure they are not in the road, where they could be hit by a car, and make sure they are protected from onlookers who might try to attack them.

Yes, you can arrest a police officer but only if you see them commit a crime. Most officers that are arrested are arrested for police brutality. If the police officer then resists, arrests you, or tries to detain you, let them know that they are breaking the law, and say this loud and clearly. If you are arrested do not resist, if you do not resist you have the chance to press a law suit against the officer, which will result in the police office being charged for: the original crime, resisting arrest, using excessive force and illegal detainment.

Be confident. Showing the suspect that you don't know what you're doing will make them more likely to leave the scene of the crime.

- When dealing with potential criminals, it's better to be on the side of caution and leave the crime control to trained professionals.
- Be as observant as possible. Even if you aren't able to keep the suspect at the scene, you can act as witness and identify the suspect later.
- Be Calm, Careful, Aware, Professional, Respectful & Thorough.
- Safety is the priority. Ask other bystanders to help if you feel the suspect will try to harm someone.
- Have, at least, two people filming the entire arrest for your records.
- The arresting document you give to the suspect, at the time of the arrest, should i

ntimately detail their crime and be ready to stand as evidence in federal court. The good arresting document has, at least, 200 pages of forensic details and has been reviewed by your lawyer.

Bribery - Wikipedia

<https://en.wikipedia.org/wiki/Bribery>

Bribery is defined by Black's Law Dictionary as the offering, giving, receiving, or soliciting of any item of value to influence the actions of an official, or other person, in charge of a public or legal duty. With regard to governmental operations, essentially, bribery is "Corrupt solicitation, acceptance, or transfer of value in exchange for official action."

Why Corruption So Easily Festers in San Francisco City Hall: News

Ever since the arrest of then-Public Works Director Mohammed Nuru in 2020, San Francisco City Hall has remained embroiled in a corruption ...

The solipsistic self-aggrandizing corrupt pigs in San Francisco's City Hall and Pacific Heights are being hunted down (100% legally) and eviscerated by the FBI, public task forces like ours, the news media, private citizens and the biggest email leaks in history. Hundreds of people will be taken down. The few arrests you have read about in the media are only the beginning. We are all starting at the bottom of the cesspool and working our way up, all the way through Elon Musk, Eric Schmidt, Larry Page, et al, and up to the White House. They will not escape, even in death. Roger Boas, Jeffrey Epstein, et al, may not still be lurking around but the truth about them will live on FOREVER!

The Insiders That Finance, Exploit, Use For Spying And/Or Sex Traffic With Match.Com - These are the people known as "The Deep State", "The Silicon Valley Cartel",

The five personality traits that prove you've really found 'The One', by Tinder dating expert Paul Brunson: Take our quiz to see if YOUR love will stand the test of time

We all have ideas about how our perfect partner would look or behave but most have nothing to do with the basis of a happy, settled relationship. There are five personality traits you need in a partner...

"The Tech Mafia", et al:

“To date, every single one of the targets that attacked us: 1.) have been sued; 2.) investigated by the government and our private investigators; 3.) had case files opened on them by the IRS, DOJ, GAO, FBI, FEC, SEC, FTC and others; 4.) placed under surveillance; 5.) had whistle-blowers and ex-staff expose them; 6.) been tracked across every social media post that has ever been made about them; 7.) had all of their illicit campaign funding and covert PAC cash exposed; 8.) had all of their family trust and shell corporation hiding places tracked and exposed by AI forensic software that works around-the-clock and 9.) placed on law enforcement watch-lists. Even the “untouchables” like Musk, Tesla, Google, Facebook, et al, now have nut-crunching law-suits filed against them, with more coming. There is no place to hide! You tried to kill us and we killed you back you criminal scum-bags!”

The following Parties participated in the scam, thought they were “untouchable” and found out that the arm of the law is very long, the hatred of the public for corruption is profound and that hundreds of public service groups have identified, tracked and assisted in their termination. This is the current list of the primary political mobster-scammers in this corruption who are all connected by financial, email and forensic FBI, SEC, FTC and CIA-class evidence. It is well known that every significant hacking and surveillance tool from the CIA, NSA, Fire-Eye and the FSB has been leaked on to the internet. Every teenage hacker is now exposing the last 20 years of these crooks crimes. They are all under deep investigation, surveillance and targeted for 100% legal termination using all the info found freely on the web and whistle-blower tips.

Please report your complaints about Match.com, OK Cupid, Netflix, Facebook, Kleiner Perkins, Sony Pictures (and the other tech cartel members) for the active investigations and federal lawsuits now in progress. By filing a complaint and telling your story, you can help identify trends and patterns of questionable business practices that will contribute to law enforcement and consumer protection efforts. You can be certain that these particular cases will get driven hard and pushed before Congress. The more reports we can get filed on these bad guys, the bigger the cases we can get processed. File your complaint at <http://www.ftc.gov/complaint>

Are you wondering why you don't see any of the true facts on the "mainstream" internet or "news" sites. The tech Taliban of the internet have colluded to become an information and ideological control empire. If they can make you

think, act and vote like they want then they can put their candidates in office who will give them trillions of dollars of government contracts. It has already worked. They all: sleep with each other; go to each other's parties; hire the same lobbyists, lawyers, Goldman Sachs fund managers; marry and date only people from the same frat houses and sororities; have the same homosexual agenda; finance the same PAC's; hide their money in the same off-shore bolt holes; instruct their HR departments to only hire young, naive, easily brainwashed, radical dyed-hair hippie-types; have bank accounts that have received CIA or In-Q-Tel cash; control the National Venture Capital Association so that nobody who competes with them can get funded; practice exclusionary culture, ie: while screaming about women's rights and BLM they never hire women or blacks; buy off the U.S. Patent Office to keep from having to pay for stealing most of their technology; own the servers and control equipment that operates 90% of the internet; etc. The Tech Taliban are: Netflix, Google, Alphabet, Youtube, Linkedin, Amazon, AWS, CNN, Facebook, Tesla, SpaceX, Survey Monkey, etc.

FBI warns AI 'sextortion' has risen by more than 1,000% in the US - and a former police officer reveals warning signs you're being targeted

The government is warning Americans about the rise in AI 'sextortion' that is sweeping the nation - and the viscous attack has caused at least a 20 suicides in recent years.

They do what they do to get profits from politicians they put in office.

TAKING DOWN THE CROOKED SOCIAL MEDIA EXECUTIVES AND THEIR CORRUPT, SPYING, SCAMMING, ELECTION RIGGING, DATING SITES:

Don't let these abusive sites continue to profit at the expense of your heart! The government, community groups and users have sued them over and over again but they just keep doing the same evil things over and over again. They do not deserve to exist any longer.

ANY member of the public can engage in these totally legal anti-corruption actions. Don't sit around and complain about these criminals. They own parts of the government.

YOU have to do something!

(Pass this along to others who might partner up and take action)

Every public figure we file a complaint with that does nothing or that runs a cover-up is listed on a document and in a dossier that they will have to answer for later!

THE DEADLY LITHIUM BATTERY POLITICAL PROFITEERING LIES OF THE DEPARTMENT OF ENERGY

- Stanford Engineering Research

Key highlights from the report:

Lithium batteries: Explosive, deadly, home-burning, worker poisoning, genocide-causing, child-labor-produced, fetus mutating chemicals, give off cancer causing smoke when they burn, controlled by China...and worse...

When you smell smoke in the cabin of your airplane or commute bus, it was an exploding lithium ion battery that has just exposed you to cancer causing, brain damaging, fetus mutating, liver cancer causing chemicals in the air from that thermal event.

The Mine-To-Wheelbase cost of lithium batteries, as opposed to NICAD and other batteries, is the most expensive in the world, of any energy storage option, and gets more expensive every year. When you include in the costs the: poisoned workers medical costs; the replacement costs of the homes and offices destroyed by lithium ion fires and explosions; the Congo genocides and child labor; the wars to get those minerals from foreign nations that hate the U.S.; the mitigation expenses from the toxins in the soil from dumping the depleted batteries and other costs lithium ion batteries are LITERALLY the worst option on Earth!

Fuel Cell electric cars solve all of the problems of lithium ion electric cars but DNC billionaires own the mines for lithium ion batteries, so they sabotage and blockade fuel cell electric cars. As warned, there is not enough lithium ion to solve America's electric car problem and the whole lithium ion electric car industry has crashed as everyone realizes that what they were warned about lithium ion is true.

The Russian's left mining "Treasure Maps" behind in Afghanistan. But; were those "Treasure Maps" a trick or a treat? The maps claimed to show ten trillion dollars of electric car minerals hidden in the Afghan desert... but was that all a lie?

To this day, controversy exists across the intelligence communities, of many nations, about whether, or not, those maps were a scam created to "trick the American's" or the actual locations of trillions of dollars of mining deals that were "antibody's for the taking". The papers that the CIA geologists pulled out of that archival library in Kabul, Afghanistan still read to be a bit too convenient for what happened next.

Decades later, after an invasion or two, and vast expenditures of cash, political capitol and lives, very little of the promised golden mining treasure has materialized. What has materialized is epic corruption, political payola, campaign secrets, deaths and controversy.

Goldman Sachs, McKinsey Consulting and Deloitte helped a few rogue CIA buddies distribute a huge number of white papers and press releases which used the buzz words: "Trillions of dollars of lithium in Afghanistan" and "Afghanistan is the Saudi Arabia of Lithium". Why would those particular companies put so much effort into hyping a pile of dirt on the other side of the planet? The answer lies in who they hyped it to and who took the bait. It turns out, most of the money that flowed through this (probable) scam financed the Obama campaign.

It also turns out that those who skimmed profits from this vast flowing river of corruption sludge were Elon Musk, John Doerr, Eric Schmidt, Steve Jurvetson and the very pack of investors who co-funded the Obama campaign. They were also the very same people who, exclusively, got the only cash from the Obama Administration. Mining Oligarch Frank Guistra became notorious for his involvement in White House matters.

They are also the very same people who had partnered with the Russian mining companies who were standing by to go back into Afghanistan to dig up this magical dirt-pile. Where "covert mining deals" were never a big election deal, in 2016, thanks to some monumental document leaks, they became one of the biggest deals in U.S. history..and not in a good way.

Lithium ion batteries are blowing up, starting fires and, generally, destroying people's homes, cars, electronics and physical health. Boeing was just ordered to stop flying the 787 Dreamliner because it's Lithium ion batteries are catching fire spontaneously.

A group of silicon valley venture capitalists forced/leveraged the government to buy and pay for these specific batteries, that they have stock in, in order to benefit their profit margins. Other batteries don't have these problems.

They knew about this from day one but put greed ahead of safety. There are thousands and thousands of reports of spontaneous lithium ion fires but the VC's who back lithium ion pay to keep this information hushed up.

Millions of these batteries have been recalled for fire risk. The VC's tried to push as many as they could before they got caught. Now they are caught.

There are vast sets of other links proving the point.

Tesla Motors has filed a patent which states the following , THESE ARE TESLA MOTORS WORDS warning about a crisis, the level of which they never disclosed to the consumer:

Tesla's own staff have now admitted that once a lithium ion fire gets started in one of their cars, it is almost impossible to extinguish burning lithium ion material. This is Telsa's own words in THEIR patent filing, (You can look it up online) saying that the risk is monumental. Tesla has 6800 lithium ion batteries, any one of which can “go thermal” and start a chain reaction! If you look at all of the referenced YOUTUBE movies you will see how easy it is to set these things into danger mode.

Imagine a car crash with a Tesla where these 6800 batteries get slammed all over and then exposed to rain, fire hose water, water on the roads, cooling system liquid.. OMG!! And then if, in that same accident the other car is a gasoline car... getting burned alive sounds “BAD”! Telsa is covering up the problems with its batteries.

LION batteries have already crashed a UPS plane and killed people. Look here:

<http://washingtonexaminer.com/dreamliner-fires-spark-new-doubts-about-a-green-energy-technology/article/2519353>

Tesla and Fisker have only sold a few hundred cars, (thank god) because nobody but dicks want these overpriced eliteist toys. A regular car company sells hundreds of thousands of cars per model. Every single Tesla or Fisker sold increases the likelihood of a burn up. Those burn-ups will affect the homes, cars and lives of the people next door who never even bought one.

Go to <http://www.youtube.com> and type into the search window:

“Lithium ion explosion” or “lithium battery and water” or “lithium ion water” and any related derivation and you will hundreds of videos about how dangerous these batteries are.

This article in the LA Times sheds more light of the horrors of Lithium Ion:

<http://articles.latimes.com/2013/jan/18/business/la-fi-dreamliner-battery-20130119>

Lithium Ion batteries “go thermal” in peoples pockets, in your notebook, especially in your Tesla and Fisker car and everywhere else. There are thousands and thousands of articles documenting this and there is a cover-up by the VC's that fund these things to keep this fact out-of-sight.

Making Lithium Ion batteries poisons the workers who make them. It is a dangerous product. Each time the workers, particularly in Asia, realize they are being poisoned by the factory, they jack up the product.

In the report: The Afghanistan Mining Scam Failure, G.I. Dough - The U.S. Spent a Half Billion on Mining in Afghanistan With ‘Limited Progress’ - Megan McCloskey reveals that

ProPublica is investigating how billions of U.S. tax dollars have been spent on questionable or failed projects and how those responsible for this waste are rarely held accountable.

The Military Built Another Multimillion-Dollar Building in Afghanistan That No One UsedThe United States has spent nearly half a billion dollars and five years developing Afghanistan's oil,

gas and minerals industries — and has little to show for it, a government watchdog reported today.

The project's failings are the result of poorly planned programs, inadequate infrastructure and a challenging partnership with the Afghan government, the Special Inspector General for Afghanistan Reconstruction wrote in its newest damning assessment of U.S. efforts in the war-torn country. The finding comes after some 200 SIGAR reports have detailed inefficient, unsuccessful or downright wasteful reconstruction projects. A recent ProPublica analysis of the reports found that there has been at least \$17 billion in questionable spending.

We Blew \$17 Billion Hunting Electric Car Battery Minerals In Afghanistan. How Would You Have Spent It?

Here's just what the Special Inspector General for Afghanistan Reconstruction found. See for yourself how that money could have been used at home. Explore the app. The United States Agency for International Development and a Pentagon task force were in charge of developing a so-called "extractive" industry in Afghanistan — basically a system for getting precious

resources out of the ground and to the commercial market. SIGAR called out both USAID and the Defense Department last year for their failures to coordinate and to ascertain the ability of Afghans to sustain the project, which unsurprisingly is not promising. In fact, when international aid stopped supporting the Afghan office responsible for oversight of the petroleum and natural gas industries, two-thirds of the staff were fired.

Exploiting these resources, which are estimated to be worth as much as \$1 trillion, is pivotal to Afghanistan's economic future. SIGAR noted that the Afghan government has shown progress under USAID's tutelage in regulating and developing the commercial export of the resources. But the report said the project was still hampered by corruption, structural problems and a lack of infrastructure for the mining industry, such as reliable roads. Many of the mines operate illegally, with some profit going to the insurgency, SIGAR said.

When it came to individual extractive projects, there was little progress made, the IG found.

The controversial Pentagon task force in charge of much of the effort, the Task Force for Business Stability Operations, spent \$215 million on 11 extractive programs, but "after operating in Afghanistan for 5 years, TFBSO left with nearly all of its extractive projects incomplete," SIGAR found. Three of the programs technically met objectives, but one of those is of questionable value at best. The task force built a gas station for an outrageously inflated cost and in the end it didn't have any customers.

So while the objective to create the station was achieved, SIGAR doubted it was a worthwhile venture.

The task force, made up of mostly civilian business experts and designed to develop the Afghan economy, has come under fire from SIGAR and Congress for demanding unusual and expensive

accommodations in the country, allegedly punishing a whistleblower, and lacking overall accountability. The Senate is holding a hearing on the task force. In today's report, SIGAR highlighted that the task force spent \$46.5 million to try to convince companies to agree to develop the resources, but not one ended up signing a contract. About \$122 million worth of task force programs had mixed results, SIGAR said.

The Defense Department declined SIGAR's request to comment on its findings. In its response, USAID said it has helped Afghanistan "enact investor-friendly extractive legislation, improve the ability to market, negotiate and regulate contracts, and generate geological data to identify areas of interest to attract investors." Any conclusions and criticisms, USAID told SIGAR, "need to be substantially tempered by the reality that mining is a long-term endeavor."

WHY A WEBSITE COMPANY DESPERATELY WANTS TO PUSH ELECTRIC CARS! GOOGLE'S AWFUL SECRET

Google's owners got an exclusive kickback scam between themselves and the White House over lithium ion batteries ravaged from war profiteering in Afghanistan, political rigging in Bolivia and other war incursions. Google wants to push electric cars to keep its owners political payola scams alive and to payola taxpayer cash to Obama/Biden political financiers. Deadly, toxic, explosive, a risk to national security, fetus damaging...yet Google charged full speed ahead into it..Obama administration to announce efforts to boost self-driving cars

By David Shepardson

Reuters

DETROIT (Reuters) - The Obama administration will announce efforts to boost self-driving cars on Thursday, and President Barack Obama may discuss advanced transportation efforts in his final State of the Union Address on Tuesday, according to government officials. Mark Rosekind, head of the National Highway Traffic Safety Administration, told reporters that

Transportation Secretary Anthony Foxx will be in Detroit to talk about efforts by the Obama administration to speed the introduction of self-driving vehicles.

"This is huge because this is the White House telling you that the secretary is going to be here to amplify stuff that is coming out of the State of the Union, and it's focused on self-driving cars,"

Rosekind told reporters in Detroit.

There is not yet a clear legal framework governing their presence on U.S. roads. Automakers and technology companies such as Alphabet Inc's Google have called on regulators to

clarify guidelines for introduction of autonomous driving technology, in part out of concern that a mishap involving a self-driving car could result in costly litigation.

A Google spokesman said the company will take part in Thursday's announcement by Foxx. Detroit automakers are also likely to participate.

In December, Rosekind said he opposes a "patchwork" of state regulations on driverless cars and promised a "nimble, flexible" approach to writing new rules for self-driving vehicles.(Reporting by David Shepardson; Editing by Bill Rigby and Dan Grebler)

Google Seeks Multiple Auto Partners for Self-Driving Car Unit That Will Seek Taxpayer Cash

Dana Hull danahull

John Lippert johnmlippert

- Company wants to begin announcing some joint efforts this year

- Google vehicle chief John Krafcik speaks at Detroit meeting

Google hopes to form partnerships with many automakers and suppliers as it develops self-driving cars to reduce traffic accidents and expand mobility for elderly and disabled people, the head of its vehicle project said.

Google wants to spy on you inside of, and around, its cars.

The Alphabet Inc. company wants to announce some of those joint efforts during 2016, John Krafcik, the Google executive, said in Detroit at an Automotive News conference Tuesday held in conjunction with North American

International Auto Show. Almost every automaker “has been in to speak with us, if only to understand where we are,” Krafcik, said. “I don’t know how many we’ll end up having.”

His comments counter speculation that Google would pick a single automaker as its exclusive partner for self-driving cars. Yahoo Autos reported last month that Ford Motor Co. would announce a joint venture with Google on self-driving. Fiat Chrysler Automobiles NV and General Motors Co. have also said they’re talking with Google about developing self-driving cars. Google's owns mining interests related to these cars and gets political perks from them.

Google Hires Former Obama Adviser Atkinson to Lead Global Policy In order To Control Politics On Electric Cars And Energy Mines

Jack Clark

- Caroline Atkinson was deputy national security adviser
- Company faces probes in Europe and U.S. as influence grows

Google has hired former White House Deputy National Security Adviser Caroline Atkinson to lead its global policy team as the Internet advertising giant seeks an advocate to deal with regulators around the world.

Atkinson, 63, stepped down in December from her post in U.S. President Barack Obama’s administration as an emissary to the Group of 20 economies, negotiating behind-the-scenes on

agreements of international scope and significance. Google, a unit of Alphabet Inc., currently faces probes from both federal and European regulators into its businesses, as the company’s increasing influence over areas like mobile phones and Web search draws scrutiny. "Caroline’s an internationally respected diplomat and adviser, and we’re delighted to have such a

thoughtful leader heading our global policy team," Google General Counsel Kent Walker said in a statement.

Atkinson also previously worked at the National Security Council, the International Monetary Fund, the Treasury Department, and investor consultancy Stonebridge International. She was selected by the Obama administration in June 2013. Her job is to manipulate politics and oligarch interests in spite of what the citizens wants, or need.

The Future Of Corrupt Silicon Valley Cronyism May Lie In The Mountains Of Afghanistan

Richard Byrne Reilly

Tags: Andrew Chung, Apple, Donald R. Sadoway, editor's pick, Jay Jacobs, Khosla Ventures, lithium, Lithium Exploration Group, lithium-ion batteries, Michel Chossudovsky, Tesla, Tesla Motors, top- stories

The future of Silicon Valley's technological prowess may well lie in the war-scarred mountains and salt flats of Western Afghanistan. United States Geological Survey teams discovered one of the world's largest untapped reserves of lithium there six years ago. The USGS was scouting the volatile country at the behest of the U.S.

Department of Defense's Task Force for Business and Stability Operations. Lithium is a soft metal used to make the lithium-ion and lithium-polymer batteries essential for powering desktop computers, laptops, smartphones, and tablets. And increasingly, electric cars like Tesla's. The vast discovery could very well propel Afghanistan — a war-ravaged land with a population of 31

million largely uneducated Pashtuns and Tajiks, and whose primary exports today are opium, hashish, and marijuana — into becoming the world's next "Saudi Arabia of lithium," according to an internal Pentagon memo cited by the New York Times.

The USGS survey report on Afghanistan that detailed the findings also noted that, in addition to lithium, the country also contains huge deposits of iron ore, gold, cobalt, copper, and potash, among many other valuable minerals.

"The mineral wealth there is astonishing," said professor Michel Chossudovsky of the Montreal-based Center for Research and Globalization, who has written extensively on Afghanistan.

A conservative estimate of the riches is \$1 trillion. In some circles, it's as high as \$5 trillion. Above: A typical lithium "button" cell found in many small electronics.

In Silicon Valley and beyond, tech companies like Apple, Google, Amazon, Microsoft, Hewlett-Packard, Samsung, Sony, and Tesla rely on continual, and uninterrupted, access to lithium, as lithium-based batteries are the primary power storage devices in their mobile hardware. Without these batteries, MacBooks, iPads, iPhones, Kindles, Nooks, Galaxy IIIs, Chromebooks, and,

yes, Tesla Model S cars would be largely worthless. If forced to use older, nonlithium batteries, their battery lives would certainly be much shorter.

The world's current lithium heavyweight is Bolivia, the biggest exporter of the element. There, in the swamps and marshlands of the southern region of the country near where the borders of Chile and Argentina meet, are the biggest deposits.

Canada, China, Australia, and Serbia also have varying amounts of lithium, but not as much as Bolivia. Or apparently, Afghanistan. Enough to last a lifetime. Depending on who you talk to, the current lithium global reserves are adequate for at least another generation of lithium-ion battery manufacturers to produce them.

But not everybody thinks so, and some say the light metal compound may someday run dry. That could in turn spell trouble for any company whose business depends on light and portable mobile electronics — unless someone comes up with an alternative to lithium batteries before then.

The experts VentureBeat interviewed pointed to sharp year-on-year increases in the demand for lithium. That's putting heavy pressure on existing stockpiles. According to Lithium Americas, a Canadian lithium-mining company with significant business interests in Argentina, lithium demand will more than double in the next 10 years, while lithium prices

have nearly quadrupled during the same timeframe.

Tesla, for its part, is in the process of investing up to \$5 billion to build its own lithium-ion Gigafactory in Texas, a plant capable of churning out 500,000 expensive battery packs a year by 2020 for its line of zero-emission, all-

electric cars. Above: Tesla predicts that its “Gigafactory” will produce more lithium batteries (by capacity) in 2020 than the entire global production of such batteries in 2013.

A Tesla spokeswoman did not return calls seeking comment. As a potential source to feed that demand, enter Afghanistan. “At some point, if present trends continue, demand [for lithium] will outstrip the supply. And again, at some point, the market for lithium-ion could get so big that it actually affects the supply chain,” said.

Donald R. Sadoway, a professor of the Materials Chemistry Department of Materials Science and Engineering at MIT.

Looking at Afghanistan, Sadoway says the war-ravaged nation, which has no effective mining infrastructure in place, may well be attractive to the world’s mining outfits. “In this regard,” Sadoway, one of the world’s foremost experts on energy sources, says, “the deposits in Afghanistan could be important.”

Andrew Chung, a venture capitalist with Khosla Ventures in Silicon Valley who has invested in multiple startups producing alternative batteries, says lithium-ion batteries are limited in their lifetime cycles, scalability, and cost. Despite this, Chung says, he can understand how the untapped reserves of Afghan lithium are now an increasing focus.

“It is an issue of the supply chain, whether it’s Afghanistan or other [countries]. There is a finite supply, and lithium-ion will continue to be the [power] choice for the next decade,” Chung said.

Some of the Valley’s biggest and most powerful tech companies either declined to comment for this story or never returned calls. But they didn’t deny the importance of lithium-ion batteries.

For instance, an Apple spokesperson declined to comment for this story but provided VentureBeat with a 2014 “Suppliers List” of the 200-plus vendors it uses to produce its products. A related post made the Cupertino, Calif.-based company’s commitment to lithium batteries clear, at least in the short term. “Rechargeable, lithium-based technology currently provides the best performance for your Apple notebook computer, iPod, iPhone, or iPad,” the Apple post says.

Sony Energy Devices Corp. invented the lithium-ion battery in 1994. It was hailed as a breakthrough, providing longer battery life and without the “memory effect” that gradually reduced the effective capacity of previous types of batteries. Since then, companies have gradually refined lithium battery technology but have not succeeded in moving beyond it. Indeed, early Tesla cars are actually powered by large packs of industry-standard lithium-ion battery cells — the same type of cells found in many laptop batteries. And here is where it gets interesting.

Sharply increasing demand

The custom battery pack Tesla uses for its Tesla Model S. Inside are hundreds of lithium cells.

If electric car manufacturers begin ramping up production of lithium-ion battery-powered cars, the global demand for lithium will skyrocket. This could potentially come about at the same time for increasing demand for handheld consumer goods like tablets and laptops, Chung said, thus creating a perfect storm.

“So you want to start looking at other sources producing it with current supplies being called into question, if we move more toward production of electric cars,” Chung said. Which is why, increasingly, eyes are turning to Afghanistan and its new purported lithium reserves, a country long referred to as the “graveyard of empires.” The U.S. invaded Afghanistan after the terror

attacks of Sept. 11, 2001, and according to iCasualties, 2,315 American servicemen and women have been killed there.

Analyst Jay Jacobs of Global X Funds in New York, which has interests in lithium mining, said demand for the compound is growing, and that “there are two regions that have been revealed to contain huge lithium reserves: Afghanistan and Bolivia.”

William Tahil, a respected lithium expert who lives in France and is the general director for Material International Research, argues that lithium deposits in Bolivia will at some point be depleted. Jacobs was sanguine about safely extracting lithium from Afghanistan. He said political risks there were considerable. “With that being said, should there be a substantial and sustained increase in demand for lithium, lithium miners may become increasingly interested in the country as it has an abundance of the resource,” Jacobs said.

It was the Soviets who first discovered the country’s deposits when they invaded in 1979. Soviet geologists began mapping Afghanistan’s lithium, gold, and potash fields but abandoned their efforts after the former communist superpower pulled out of the country in 1989.

But with a weak and corruption-plagued “central government,” Afghanistan is now ripe for the picking, Chossudovsky said. Indeed, the country is still very much divided into fiefdoms, with the Muslim fundamentalist Taliban, warlords, and drug traffickers controlling large swaths of the country — and using violence to advance their interests. “There’s no question the mining companies will go in there. No question. There’s no real functioning government there to reap the foreign investment of the mineral deposits. This makes it all the more enticing to the mining companies because nobody in the government of [President] Hamid Karzai will be regulating the bonanza of lithium, so they can do what they want,” he said.

Jockeying For Position

For its part, the U.S. government, which helped locate the lithium deposits using flyovers with a sensor-filled Lockheed P-3 Orion and teams of geologists fielding soil samples, knows a potential gold rush when it sees one. And it has no intention of being left on the sidelines. Especially since the Chinese are now — and quickly — making deals with Afghan pols for mineral rights to copper deposits.

The USGS did return multiple calls seeking comment. Nor did the Pentagon. Despite what some say are the shortcomings of lithium-ion batteries, venture capitalists and investors

continue pouring money into them. Amprius, a lithium battery maker based in Sunnyvale, Calif., snared a \$30 million infusion round of investor cash in January. Over at the Afghan embassy in Washington, D.C., the Afghans are licking their lips at the potential lithium and mineral windfall despite the country’s continued conflict with a resurgent Taliban. What

this may portend for the impoverished and war-torn nation is anybody’s guess. But the Afghans are playing up the finds — or they were, until recently.

“In recent years, headlines from the Afghan mineral sector have competed to outdo each other in scale: from the landmark \$3 billion Chinese investment in the Aynak copper concession to the astounding survey work of the U.S., Afghan, and British Geological Services estimating anywhere between \$1 trillion and \$3 trillion in mineral potential, to the historic \$11 billion deal now being finalized with an Indian consortium for the Hajigak iron ore concession,” said a posting on the Afghani Washington DC website.

Afghanistan’s ambassador to the U.S., Eklil Hakimi, presided over a press conference at the Afghan embassy in Washington, D.C., on March 10, where he talked about the untapped deposits, along with reps from the USGS and other U.S. politicians. But Hakimi, through a spokesman, told me he simply didn’t have the time to talk.

Key exploiters of Lithium ion mines: Apple, Goldman Sachs, Tesla Motors, Lithium Exploration Group, Khosla Ventures

Scientists Discover That Lithium Ion Batteries Grow More Explosive Over Time

- Using lithium ion batteries in cars, hover-boards and other “high tasking” systems FORCES them to blow up more
- Chemicals degrade into more self-igniting states over time
- Use in a system with electric motors dramatically increases likelihood of explosions, self-ignition and release of cancer-causing, brain damaging fumes that can harm un-born infants
- Exposure to electric fields, high altitude radiation and water in air causes very much increased danger parameters
- Cover-up of safety issues charged because many Senators and Energy Department executives own stocks in Lithium Ion batteries
- Public welfare at risk due to political greed, per <http://lithium-ion.weebly.com/>
- Combining the type of chemicals that lithium ion batteries hold is like “making a blasting cap” warn researchers

Over 1000 Reason's Why Lithium-ion Is a DEADLY, CRIMINAL, VERY BAD THING! - (LINK)

Lithium ion batteries, when they burn, cause brain cancer, liver cancer and other, potentially lethal, toxic poisoning. Certain regulators are told to "ignore these issues" because certain lithium ion investors donated cash to certain campaigns.

The chemicals for lithium ion batteries come from countries which needed to be invaded in order to monopolize the mining of those chemicals. Certain politicians are told to "ignore these issues" because certain lithium ion investors engaged in war profiteering in order to control those minerals.

The FAA has issued numerous warnings and videos showing that lithium ion batteries do spontaneously self-ignite and crash airplanes. Numerous people have been killed in lithium ion plane crashes. Certain regulators are told to "ignore these issues" because certain lithium ion investors donated cash to certain campaigns.

Lithium ion batteries have self-ignited and set numerous children and senior citizens on fire. They have set homes on fire. They have set offices on fire. They have set Apple Stores on fire. You constantly hear about passenger airlines being forced to land because passengers "smell smoke in the cabin". This is almost always a lithium ion battery going off in the cabin and exposing all of the passengers to it's carcinogenic ignition vapors.

Silicon Valley investors took over the lithium ion battery market, along with Goldman Sachs, because they knew they were getting large government hand-outs from the Department of Energy in exchange for campaign contributions.

Lithium ion batteries lose their power and memory over a relatively short time.

Lithium ion batteries blow up when they get wet or bumped. Fisker Motors went out of business when millions of dollars of Fisker cars, using lithium ion batteries, got wet and all blew up.

Tesla battery packs have blown up, on multiple occasions, from simply hitting bumps in the road.

Manufacturing these kinds of batteries is so toxic that even China, a country known for the most minimal regulations, has closed a huge number of

battery factories because of the massive numbers of deaths they caused to workers and nearby residents.

Journalists have published a glut of articles exposing cover-ups about the dangers and corruption involved with lithium ion batteries. The U.S. Government and numerous groups have filed charges against Panasonic, and similar battery companies for bribery, corruption, dumping, price fixing and other unethical tactics.

Every key investor in lithium ion was also a campaign donor who also received huge federal cash from the Department of Energy in the same funding cycle in which they paid campaign contributions.

Did Lithium ion blow the Malaysian Airlines flight out of the air? Websearch: "Malaysian Airlines Lithium Ion" for details...

Are militants trying to hack Tesla's to make their battery packs overcharge and blow up? Websearch "TSA Lithium Ion Warnings" for details...

- The Trillion dollar + Lithium-ion industry pays over a billion dollars a year to elected officials, appointed officials, their staff and lobbyists in order to get them to cover up the facts listed here and to promote this dangerous chemical for profit. Many of those have family stock in lithium-ion companies, private sector job promises and PAC funding from lithium-ion companies. Why won't the people who are using lithium-ion stop using it? Why is there almost no regulation of deadly lithium-ion? The answer: KICKBACKS!

- If you are exposed to burning lithium-ion from a burning car, iPad, phone, airplane, FED-Ex or UPS truck, or other fire from lithium-ion batteries, the smoke and vapors that you inhale are some of the most cancer-causing, brain-damaging, lung damaging liver poisoning chemicals you could be exposed to. SEE HIS LINK and THIS ONE and THIS ONE and THIS ONE (More coming)

- Lithium-ion batteries are made in "concentration camp-like" fenced-in compounds where low income workers are exposed to poison gas and powders from the lithium-ion manufacturing process. A dramatically large group of these workers die from the cancers and toxic poisoning from these factories. They have always been made in overseas, impoverished, regions because there is little or no occupational safety regulation there. Tesla's factory has been fined by OSHA for setting workers on fire. This is a very deadly business. Now they are trying to build these factories in the American southwest to try to exploit Mexican workers like they do overseas. Some argue that large "white man owned" corporations "fighting for immigration rights" are really fighting to relax laws to allow cheap labor into these kinds of camp-factories in the desert. Some of the factory owners have even purchased multiple lots, in multiple southern states, and told investors that they will "build on the one where we can buy control of the most local politicians".

- The makers of lithium ion batteries have issued a document called the "MSDS". It states known facts about the batteries. The MSDS warns firefighters they can get cancer. It warns that the batteries are toxic. It clearly states the very great dangers of spontaneous, or easily caused fire from bumps or moisture. Why did Panasonic kill it's MSDS web links the day the first Tesla fires hit the news? Look at the facts HERE.

- Lithium-ion batteries seem to have caused some wars. At THIS LINK, you will see hundreds of facts, films and links showing the direct connection between lithium ion investors in Silicon Valley and wars for ore in middle east countries.

- Silicon Valley Lithium-ion investors signed deal with Russian "businessmen" to create an international lithium ion cartel.

- Lithium ion battery companies Enerdel, and A123, and others, went bankrupt, after being funded with your tax dollars, from corruption, explosions and spontaneous fires. Facts that were well known by the people that funded them.

- Less compromised Senators have railed against the dangers of lithium-ion has shown HERE and HERE

- IPAD Lithium-ion batteries have blown up setting entire stores on fire.
- Samsung lithium-ion batteries in cell phones have set a number of people, including many children, on fire.
- Lithium-ion does not even work as well as other lower-cost, safer energy solutions:
 - The charge-keeping capability of a typical lithium-ion battery degrades steadily over time and with use. After only one or two years of use, the runtime of a laptop or cell phone battery is reduced to the point where the user experience is significantly impacted. For example, the runtime of a typical 4-hour laptop battery drops to only about 2.5 hours after 3,000 hours of use. By contrast, the latest fuel cells continue to deliver nearly their original levels of runtime well past the 2,000 and 3,000 hour marks and are still going strong at 5,000+ hours.
 - The electrical capacity of batteries has not kept up with the increasing power consumption of electronic devices. Features such as W-LAN, higher CPU speed, “always-on”, large and bright displays and many others are important for the user but severely limited by today’s battery life. Lithium ion batteries, and lithium-polymer batteries have almost reached fundamental limits. A laptop playing a DVD today has a runtime of just above one hour on one battery pack, which is clearly not acceptable.
 - Silicon Valley Lithium-ion billionaires try to exploit the lack of public awareness with disinformation campaigns linking anti-lithium-ion to saying that you are anti-environment. In fact: Lithium ion use and manufacturing is one of the most toxic industries on the planet.
 - Lithium-ion battery companies have actually been charged with, and sued for organized crime. HERE IS AN EXAMPLE
 - AT&T ‘s U-verse TV service now had a exploding battery problem, making it necessary for the firm to replace 17,000 backup batteries in its nationwide network.
 - Lithium-ion batteries might have crashed the Malaysian airlines flight. SEE DETAILS HERE.

TESLA SAFETY REPORT Vers. 1.05M- Public Wiki Produced for NHTSA other governmental agencies and public transparency

Draft- 1.05M (Document under construction – not final)- First Final Draft Due to NHTSA Due: 1/14/14. (Note: The head of the NHTSA has now quit over this, let’s keep all eyes on this make sure nothing is rigged) For Public Comment and Review

Please refer all agencies to this document link at:

OR

<http://wp.me/p4e1uX-AK>

CONTENTS:

3. Safety tests that were never conducted and must now be conducted.
5. Contacts to follow-up on investigations
6. Are Tesla drivers more likely to get in accidents than mainstream drivers?

Appendix

- Lithium ion site
- NHTSA Demand Letter

– Additional data

– Video Evidence

- Demand for identification matrix showing campaign backers who were lithium ion investors who had had their contacts exert influence over NHTSA decisions!

(Supplemental material now numbers over 10,000 pages and will be submitted directly to regulators in order to avoid congesting this site)

1. Overview

Regulators asked Tesla to detail the possible consequences of battery pack damage to the Model S and how those problems were addressed in the Model S design. NHTSA also asked Tesla to describe the “limits of that design to prevent damage to the propulsion battery, stalling and fires”. While electric cars have been in commercial production since the 1800’s, and have been widely released by major automobile manufacturers, only the Tesla vehicles have experienced the fire issues, relative-to-inventory, in this magnitude. The questions and data required by NHTSA, in the letter from NHTSA, contained below, demands disclosure of certain Tesla information which will reveal conflicts in previously provided Tesla data. Reporters and public interest law firms will be using the FOIA process to disclose the responses, required under federal law, in the public interest.

2. Known, Unresolved, Safety Issues.

- Dense packing non-automotive lithium cells
- Self ignition from exposure to air
- Self ignition from exposure to water
- Burning lithium ion, plastics and human skin
- Inability to extinguish lithium ion fires
- Failure to provide disclosures to buyers
- Failure to provide required CO2 fire extinguishers to buyers
- Toxic carcinogenic chemicals released in Tesla Fire- Danger to passengers
- Toxic carcinogenic chemicals released in Tesla Fire- Danger to bystanders
- Brain damage from toxic chemicals released in Tesla Fire- Danger to passengers
- Brain damage from toxic chemicals released in Tesla Fire- Danger to bystanders
- Lung damage from toxic chemicals released in Tesla Fire- Danger to passengers
- Lung damage from toxic chemicals released in Tesla Fire- Danger to bystanders
- Birth defects from toxic chemicals released in Tesla Fire- Danger to passengers
- Birth defects from toxic chemicals released in Tesla Fire- Danger to bystanders
- Home and office conflagration as warned in Tesla’s own patents
- BMS (Battery Management System) programming, ie: Vampire issues, etc.
- Danger to factory workers exposed to internal materials in Tesla Lithium ion cells

- Electronic door locks failing. Could passengers be locked inside car in fire?
- Previous seat safety recall
- Miscellaneous owner complaints about technical issues and relation to safety

Additional...

3. Safety Tests That Were Never Conducted and Must Now Be Conducted.

The continued failure to engage in these tests, and/or provide the results from these tests, continues to call into question the efficacy and conflicts of interest of the original testing. The batteries used by Tesla were never designed, or created, to be used in automobiles and this short-cut to cost reduction must be mitigated by the relative increase in safety reduction.

- Vehicle with fully charged batteries drives into 3', 4", 5", 6", 7" 8" concrete curb at 5MPH, 15MPH, 20MPH, 25MPH, 30MPH, 35MPH, 40MPH, 45MPH, 50MPH, 55MPH, 60MPH, 65MPH, 70MPH, 75MPH and then is allowed to sit, post crash, for up to 3

hours to analyze spontaneous lithium ion combustion.

- Vehicle with fully charged batteries drives into 3", 4", 5", 6", 7" 8" metal post embedded in road at 5MPH, 15MPH, 20MPH, 25MPH, 30MPH, 35MPH, 40MPH, 45MPH, 50MPH, 55MPH, 60MPH, 65MPH, 70MPH, 75MPH and then is allowed to sit, post crash, for up to 3 hours to analyze spontaneous lithium ion combustion..

- Vehicle with fully charged batteries drives into 3", 4", 5", 6", 7" 8" concrete curb at 5MPH, 15MPH, 20MPH, 25MPH, 30MPH, 35MPH, 40MPH, 45MPH, 50MPH, 55MPH,

60MPH, 65MPH, 70MPH, 75MPH and then is allowed to sit, post crash, for up to 3

hours in simulated rain storm to analyze spontaneous lithium ion combustion..

- Vehicle with fully charged batteries drives into 3", 4", 5", 6", 7" 8" concrete

curb at 5MPH, 15MPH, 20MPH, 25MPH, 30MPH, 35MPH, 40MPH, 45MPH, 50MPH, 55MPH, 60MPH, 65MPH, 70MPH, 75MPH and then is allowed to sit, post crash, for up to 3 hours after complete immersion in water as in a hurricane or high-water event to analyze spontaneous lithium ion combustion..

- Rolling the vehicle with fully charged batteries in a 3 roll crash at 20MPH, 25MPH, 30MPH, 35MPH, 40MPH, 45MPH, 50MPH, 55MPH, 60MPH, 65MPH, 70MPH, 75MPH ending in the vehicle laying on it's roof and counting the number of lithium ion cells that came loose from their mounts risking burning lithium falling on passengers.

- Rolling the vehicle with fully charged batteries in a 3 roll crash at 20MPH, 25MPH, 30MPH, 35MPH, 40MPH, 45MPH, 50MPH, 55MPH, 60MPH, 65MPH, 70MPH, 75MPH ending in the vehicle laying on it's roof and counting the number of lithium ion cells that had their housings damaged risking burning lithium falling on passengers.

- Rolling the vehicle with fully charged batteries in a 3 roll crash at 20MPH, 25MPH, 30MPH, 35MPH, 40MPH, 45MPH, 50MPH, 55MPH, 60MPH, 65MPH, 70MPH, 75MPH ending in the vehicle laying on it's roof and simulating a full rain storm on the, now exposed, underside of the vehicle for 2 hours to see if lithium ion ignites when wet risking burning lithium falling on passenger and to analyze spontaneous lithium ion combustion.

- Filling the battery compartment, with fully charged batteries, with water, draining it and observing for 4 hours to analyze spontaneous lithium ion combustion.

- Pouring 18 Oz. soft drinks into the battery compartment, with fully charged batteries, and observing for 4 hours to analyze spontaneous lithium ion combustion.
- Impacting the lower quarter panel of Tesla with fully charged batteries on the side of the car, on each side, at the lower center of the passenger door and two feet to either side at 20MPH, 25MPH, 30MPH, 35MPH, 40MPH, 45MPH, 50MPH, 55MPH, 60MPH, 65MPH, 70MPH, 75MPH at 3", 4", 5", 6", 7" 8" so as to penetrate the battery chamber at least 4 inches and then saturating the damaged area with water and waiting four hours to analyze spontaneous lithium ion combustion.
- Forced ignition of lithium ion cells in flipped over (vehicle resting upside down on it's roof) with fully charged batteries and timing of penetration of smoke and flames to occupants simulated as contained within.
- Spectrograph analysis and complete full-range chemical read-out of the front metal and plastics of a Tesla on fire with fully charged batteries along with the lithium ion batteries. Disclosure of all known harmful chemicals in said smoke.
- Manually cutting 10 (ten) fully charged lithium ion Tesla battery cells in half long-ways in open air at average humidity and videotaping the results followed by dropping them in a bucket of water 60 seconds after cutting them. With the large number of lithium ion cells in a Tesla, physics and the law of averages predict that at least 10 cells will be fully ruptured in a high speed accident.

Plus such additional tests to be specified by:

Davis College Engineering Department
 Denver College Engineering Department
 General Motors
 Ford Motor Company
 Automobile Dealers Association
 and other public interest safety groups

4. How many fire incidents have there been.

Factory Fire 1?

Factory Fire 2?

Boston Fire?

Half Moon Bay Fire?

Tenn. Fire?

Seattle Fire?

Mexico Fire?

Factory Prototype Fires?

other post crash and testing fires...

Tesla Drivers More Likely To Get In Accidents, With Their Exploding Cars, Than Mainstream Drivers?

Sociological reports, such as the report below, confirm that Tesla drivers are more likely to drive drunk, use drugs and respect less laws:

Various crash reports find that a large number of Tesla drivers drive drunk. Here is a typical mocking web graphic pointing out this fact:

Tesla related investors engage in this sort of extreme behavior and use their resources to promote the car as a tool to skirt social bounds with speed and sex. Skirting social bounds often lies close to skirting laws and common sense. Here are reports on activities and personalities of these people who promote the vehicle:

<http://vcrocket.weebly.com>

A Tesla Driver is now charged with the homicide of two people in a crash with their Tesla.

The evidence shows that Tesla drivers and the Tesla Culture promotes extra-carelessness, extra arrogance, extra drinking, extra distraction due to sexual theatrics and an overall requirement to create higher-than-normal safety parameters for these drivers, particularly in light of the highly explosive bed of material they are driving around amongst other consumers and structures. Tesla drivers appear to be more likely to crash, or create lithium ion thermal event circumstances, because of the cultural dynamic which Tesla attracts.

7. Original participant conflicts-of-interest created reduced safety oversight

A certain, specific, group of investors, known to the FBI, The GAO, The SEC and the Senate Ethics Committee, purchased undo influence on the previous Tesla decisions process, in order to acquire “unjust rewards” from the U.S. Treasury.

These investors, coincidentally, provided funds to related campaign efforts and, shockingly, they all hold major investments in the very battery system in question.

Because of this, the American consumer has been forced to “accidentally” conduct some of these tests at great personal risk to those consumers. These risks should have been disclosed by Tesla prior to the application for their DOE loan and prior to their first contact with NHTSA. Tesla produced documents show that Tesla was aware of the dangers disclosed herein.

Appendix: Reference Data:

The lurking threat in your car and home “over a million failures of this chemistry and these batteries globally..”

Go to <http://www.nts.gov/> and demand action:

“LITHIUM ION BATTERIES ARE MADE OVERSEAS BY CHEAP LABOR WHERE OSHA CAN’T WATCH. POOR PEOPLE MAKE LITHIUM ION BATTERIES OFF SHORE WHERE THEY ARE NOT TOLD ABOUT THE TOXIC CANCER, LIVER AND LUNG DISEASES THEY GET FROM THE MANUFACTURING PROCESS. SILICON VALLEY VC’S PUSH LITHIUM ION BECAUSE THEY CAN MAKE A HUGE PROFIT ON THE CHEAP LABOR BUILDING A BATTERY THAT SELF DESTRUCTS BUILT BY WORKERS WHO DIE FROM TOXIC POISONING. CHINESE, MALAY, MEXICAN AND OTHER WORKERS, SHOULD FILE CLASS ACTION LAWSUITS AGAINST SILICON VALLEY VC’S WHO PUSH THESE BATTERIES.”

Tesla Motors Inc. TSLA shares tanked after a video of a Model S on fire circulated on the web, prompting the electric car company to move quickly to douse the flames of bad publicity.

Another Tesla Caught On Fire While Sitting In A Toronto ...

Earlier this month, a Tesla Model S sitting in a Toronto garage ignited and caught on fire. The car was about four months old and was not plugged in to an electric socket, says a source.

rr.com/articles/2014/02/13/a/another-tesla-cau...

MMamta Badkar

Tesla's stock was down over 7% to a low of \$175.40 today, but pared some of its losses to close down 6.24% at \$180.95.

Some speculated that the video highlights problems with the car's battery. Though others rushed to point out that the battery is located in the back of the car.

"Media finds that "Safety Investigators" (read "SHILLS") are bribed by VC's and lithium holding companies to say "nothing to see here", "lithium batteries are probably ok". Beware of NTSB "consultant's" and "investigators" who are being bribed, offered after-politics high pay jobs, called up by bribed congressional staff with "suggestions", given sports tickets, handed stock in certain ventures and other bribes. Many of the "investigators" need to be put under investigation themselves!!!! When you see an investigator talking about how lithium ion is a wonderful thing, investigate them!"

just ordered to stop flying the 787 Dreamliner because it's Lithium ion batteries are catching fire spontaneously."

"A group of silicon valley venture capitalists forced/leveraged the government to buy and pay for these specific batteries, that they have stock in, in order to benefit their profit margins. Other batteries don't have these problems. They knew about this from day one but put greed ahead of safety. There are thousands and thousands of reports of spontaneous lithium ion fires but the VC's who back lithium ion pay to keep this information hushed up.

Millions of these batteries have been recalled for fire risk. The VC's tried to push as many as they could before they got caught. Now they are caught. These VC's own stock in lithium mining companies too."

"Here is the Fisker Karma after it got wet and the batteries blew up. These batteries blow up JUST FROM GETTING WET! ALL of these burned up hulks are brand new \$100,000.00+ cars that just blew up and torched everything around them just because they got wet! How bad do you want a Fisker or Tesla now? Fisker's insurance company is balking at paying for this saying: "You knew this would happen".

Picture

These links show vast sets of Fisker electric cars that burst into flames just because they GOT WET:

THE UNDERPAN OF THE TESLA MAGIC CARPET OF DOOM. THIS WHOLE THING IS FULL OF LITHIUM. YOUR WHOLE FAMILY IS SUPPOSED TO SIT ON TOP OF THIS!!!

"TESLA ELECTRIC CARS HAVE 6800 CHANCES OF "GOING THERMAL".

"TESLA ELECTRIC CAR BATTERIES ARE MORE LIKELY TO BLOW UP." SAYS STANFORD ENGINEER, "USING LITHIUM ION IN AN ELECTRIC CAR DOUBLES THE CHANCES IT WILL EXPLODE OR GO THERMAL BECAUSE AN ELECTRIC CAR PUSHES IT FURTHER THAN ANYTHING ELSE. BOEING HAD

MANY SAFETY CIRCUITS AND EVEN THOSE FAILED. THERE IS NO WAY THE TESLA SAFETY CIRCUITS WILL NOT EVENTUALLY FAIL”

“Tesla Electric cars have 6800 lithium ion batteries wedged into a box. This can create a repercussive thermal event that can set the whole car off. The TESLA 18650 batteries can be seen exploding in multiple YOUTUBE videos. It is NOT TRUE that they are “an entirely different battery” they are the same chemical compound that blows up.”

“A direct quote from Tesla’s patent application, below. Tesla KNEW this was going to happen and never adequately warned anybody. Tesla wrote these words in the federal papers they filed yet they never showed these words to any buyers :

“Thermal runaway is of major concern since a single incident can lead to significant property damage and, in some circumstances, bodily harm or loss of life. When a battery undergoes thermal runaway, it typically emits a large quantity of smoke, jets of flaming liquid electrolyte, and sufficient heat to lead to the combustion and destruction of materials in close proximity to the cell. If the cell undergoing thermal runaway is surrounded by one or more additional cells as is typical in a battery pack, then a single thermal runaway event can quickly lead to the thermal runaway of multiple cells which, in turn, can lead to much more extensive collateral damage. Regardless of whether a single cell or multiple cells are undergoing this phenomenon, if the initial fire is not extinguished immediately, subsequent fires may be caused that dramatically expand the degree of property damage. For example, the thermal runaway of a battery within an unattended laptop will likely result in not only the destruction of the laptop, but also at least partial destruction of its surroundings, e.g., home, office, car, laboratory, etc. If the laptop is on-board an aircraft, for example within the cargo hold or a luggage compartment, the ensuing smoke and fire may lead to an emergency landing or, under more dire conditions, a crash landing. Similarly, the thermal runaway of one or more batteries within the battery pack of a hybrid or electric vehicle may destroy not only the car, but may lead to a car wreck if the car is being driven or the destruction of its surroundings if the car is parked.”

“WTF!!!!!!

Tesla’s own staff have now admitted that once a lithium ion fire gets started in one of their cars, it is almost impossible to extinguish burning lithium ion material. This is Telsa’s own words in THEIR patent filing, (You can look it up online) saying that the risk is monumental. Tesla has 6800 lithium ion batteries, any one of which can “go thermal” and start a chain reaction! If you look at all of the referenced YOUTUBE movies you will see how easy it is to set these things into danger mode.”

“Imagine a car crash with a Tesla where these 6800 batteries get slammed all over and then exposed to rain, fire hose water, water on the roads, cooling system liquid.. OMG!! And then if, in that same accident the other car is a gasoline car... getting burned alive sounds “BAD”! Telsa is covering up the problems with its batteries.”

“Lithium ion batteries have already crashed a UPS plane and killed people. Look here:

<http://washingtonexaminer.com/dreamliner-fires-spark-new-doubts-about-a-green-energy-technology/article/2519353> “

“AS A DEMONSTRATION OF HOW DANGEROUS LITHIUM IS, NASA IS GOING TO MAKE IT BURN IN OUTER SPACE:

“If you’re along the Eastern Seaboard tonight, it might be worth your while to look at the sky this evening. NASA’s Wallops Flight Facility is scheduled to launch a sounding rocket that will release “two red-colored lithium vapor trails in space.”

northern Florida. Space.com explains how these trails will produce a “night sky show:”

“The sounding rocket that will be used to create the two NASA-made glowing cloud trails will be a Terrier-Improved Orion. In this technology test launch, two canisters in the rocket’s payload section will contain solid metal lithium rods or chips

embedded in a thermite cake. The thermite is ignited and produces heat to vaporize the lithium.

“Once the vapor is released in space, it can be detected and tracked optically. The rocket will eject two streams of lithium which will be illuminated at high altitudes by the sun (which will be below the local horizon at ground level).”

In a statement, mission project manager Libby West said the launch is a test flight for two upcoming missions. It’ll give scientists a view of two different methods for creating lithium vapor trails. By the way, NASA says the “lithium combustion process poses no threat to the public during the release in space.”

“Tesla and Fisker have only sold a few hundred cars, (thank god) because nobody but dicks want these overpriced eliteist toys. A regular car company sells hundreds of thousands of cars per model. Every single Tesla or Fisker sold increases the likelihood of a burn up. Those burn-ups will affect the homes, cars and lives of the people next door who never even bought one.”

“Go to <http://www.youtube.com> and type into the search window:

“Lithium ion explosion” or “lithium battery and water” or “lithium ion water” and any related derivation and you will find hundreds of videos about how dangerous these batteries are. There are numerous videos of Tesla’s 18650 batteries blowing up.”

“This article in the LA Times sheds more light on the horrors of Lithium Ion:

<http://articles.latimes.com/2013/jan/18/business/la-fi-dreamliner-battery-20130119> “

“Lithium Ion batteries “go thermal” in peoples pockets, in your notebook, especially in your Tesla and Fisker car and everywhere else. There are thousands and thousands of articles documenting this and there is a cover-up by the VC’s that fund these things to keep this fact out-of-sight.

There are PLENTY of other energy storage solutions that do not involve the highly compromised Lithium Ion chemistry!”

“Below are a few samples of HUNDREDS of videos proving that Lithium Ion Batteries JUST BLOW UP. This is why TSA does not want them, or liquid, on planes.”

Lithium Battery Explosion Burns Hong Kong Home To The Ground:

By Stephanie Mlot

The man, identified in the original Xianguo.com report only as Mr. Du, claims that his phone, battery, and charger were all legitimate Samsung products, but that’s now difficult to confirm since his home and everything in it were destroyed.

According to the translated report, Du sat on the living room sofa playing the game “Love Machine” on his charging GS4 when it suddenly exploded. In the heat of the moment, he threw the device onto the couch, which caught fire. The flames then spread to the curtains and the rest of the house, “out of control,” Xianguo said.

Du, his wife, and his dogs managed to escape the house unscathed; neighbors were temporarily evacuated as firefighters fought the flames. Almost all of the couple’s furniture and appliances burned to ash, the news site said, adding that their Mercedes parked outside was also damaged.

Whether or not the true cause of an entire house fire was a singular 5-inch smartphone remains to be seen, though a fire department investigation initially resulted in a report of “no suspicious circumstances.”

Samsung did not immediately respond to PCMag’s request for comment, but told Xianguo that it will “carry out detailed investigations and tests to determine the cause of the incident.” Last year, a Galaxy S III owner in Dublin was driving in his car when the device caught fire. Cell phone safety is increasingly becoming an issue in Asia, where two cases of iPhone shock occurred within a week of each other this month. On July 11, a 23-year-old flight attendant with China Southern Airlines was allegedly electrocuted when she took a call on her Apple device while it was charging. She was reportedly using the original charger when she was killed.

Boeing 787 Dreamliner woes put spotlight on lithium ion battery risks

Chances are the same kind of battery that twice caught fire in Boeing 787 Dreamliners in recent weeks is in your pocket at this very moment.

Lithium ion batteries, small and powerful, have become the electricity storage device of choice. They are everywhere — in cellular phones, laptops, power tools, even cars. They allow us to talk, email and drill longer than ever possible in the past.

But the incidents that led to the grounding of the 787 fleet worldwide, and the decision by Boeing on Friday to temporarily halt all deliveries of the plane, have highlighted a troubling downside of these energy-dense dynamos: their tendency to occasionally burst into flames.

FOR THE RECORD: Dreamliner batteries: An article in the Jan. 19 Section A on lithium ion battery safety and the grounding of the Boeing 787 incorrectly described a fire in a Chevrolet Volt automobile. The battery did not ignite spontaneously; instead it burned after a crash test damaged the vehicle’s cooling system and the test car was left parked with the battery fully charged, eventually causing it to overheat. With investigators now working to determine the cause of the incidents, one on a Dreamliner on a Boston runway, the other forcing an emergency landing of a 787 in western Japan, the larger question of lithium ion safety has snapped into focus.

“Every battery can burn and every battery can be flammable,” said Mike Eskra, a Milwaukee-based battery development scientist who also works as a battery fire investigator for insurers. “But lithium ion batteries are more dangerous because they store more energy. It’s like a firecracker instead of a stick of dynamite.”

The casualty list is long. In recent years, tens of thousands of laptop batteries have been recalled due to the risk of fire or explosion. The 400-pound lithium ion battery on General Motors’ cutting-edge electric car, the Chevrolet Volt, burst into flames seemingly spontaneously while parked in 2011. And investigators blamed a cargo hold full of lithium ion batteries for a fire that

caused a UPS-operated 747 to crash shortly after takeoff from Dubai in late 2010.

That crash, which killed both pilots, is one of more than 100 incidents recorded by the Federal Aviation Administration linking lithium ion batteries to onboard fires over the last two decades. This month, new rules took effect limiting the transport of lithium ion batteries in aircraft. And the FAA had long prohibited use of the technology in commercial airplanes.

That changed in 2007, when it granted Boeing permission to use the batteries in the 787 under a number of conditions to ensure safety. For Boeing the lithium ion advantage was clear.

Thanks to their chemistry, the rechargeable batteries can store as much energy as a nickel metal hydride pack that’s 50% heavier, while charging and discharging faster than other battery types. That’s made them attractive for military applications such as the B-2 bomber and also for use on the International Space Station and the Mars Rover.

Lithium ion batteries enabled Boeing to swap out heavy hydraulic systems in the airframe for lightweight electronics and electric motors to operate systems like wing de-icers. That's a key reason the Dreamliner burns 20% less fuel than other wide-body aircraft.

The weight and power savings are exactly what made lithium ion batteries popular in other applications. In excess of 95% of mobile phone batteries worldwide are lithium ion, and without lithium ion, laptops couldn't run anywhere near as long as they do without a recharge.

"They completely dominate the consumer market," said Vishal Sapru, energy and power systems research manager at consulting firm Frost & Sullivan in Mountain View, Calif.. He estimates that global sales of lithium ion batteries reached \$14.7 billion last year, up from \$9.6 billion in 2009, a 53% increase. Sapru expects the market to soar to \$50.7 billion by 2018. "No other battery chemistries are growing at that rate."

But lithium ion also has downsides. The batteries tend to have shorter life spans than older, more proven battery technologies. And although the price is falling, lithium ion is still more expensive than other batteries. Although some carmakers have embraced the technology, others, such as Toyota, have decided against it. Several makers of lithium ion auto batteries for electric vehicles have filed for bankruptcy last year because of weak demand.

Safety experts also have concerns. Because lithium ion batteries can store more energy, and discharge it more quickly, than other batteries, lithium ion cells can get much hotter than other technologies in the event of an overcharge or the external application of a heat source. Larger applications, such as the 63-pound batteries on the 787, incorporate multiple cells and the heat can spread rapidly from cell to cell, a chain reaction called "thermal runaway."

And while other types of batteries use a water-based electrolyte in each cell, lithium ion relies on a highly flammable solvent. When heated up, that solvent tends to vaporize, spraying the burnable gas into the surrounding air. As a result, lithium ion battery fires burn extremely hot, as high as 2,000 degrees Fahrenheit.

Those conditions were blamed for an explosion at a General Motors battery testing lab last April that caused \$5 million in damage and sent one person to the hospital. GM said flammable gas had vented from an experimental lithium ion battery that heated up during extreme testing.

"Lithium ion is very controversial in the safety engineering space," said Brian Barnett, vice president for battery technology at Tiax, a technology firm in Lexington, Mass. He spoke last month at a conference on battery safety in Las Vegas, where more than three-quarters of the presentations focused on lithium ion batteries.

The cause of the fires in the two Dreamliners has still not been determined and neither Boeing nor the Japanese company that made the batteries, GS Yuasa, have publicly commented on likely factors. Boeing subjected the batteries on the plane to thousands of hours of testing and installed numerous safety systems specific to the batteries.

"We have high confidence in the safety of the 787 and stand squarely behind its integrity as the newest addition to our product family," Boeing Chief Executive Jim McNerny said Friday.

Barnett and others emphasize that it's not uncommon to see problems in relatively new technologies. But they add that most lithium ion fires are caused by an external problem, such as a bad circuit or a software glitch that leads to overcharging. Another common problem in consumer electronics is the use of low-cost wiring and other components that can overheat and spark or catch fire next to the battery itself.

Eskra, the battery fire investigator, said he's seen fires started by Chinese-made toys that use lithium ion batteries hooked up to chargers designed for nickel cadmium or nickel metal hydride batteries. Manufacturing errors, including allowing tiny metal particles to contaminate cells, can cause dangerous shorts, although they are exceedingly rare.

"Somebody tried to cut corners somewhere," he said, noting that most lithium ion fires are caused by a tiny part that malfunctioned somewhere along the line and are easily resolved. "It's a \$2 fix, but it takes half a million dollars in research to

figure out what it is."

Sometimes the problem is more persistent. In 2006, Sony announced a global recall of more than 10 million lithium ion laptop batteries used in a variety of laptop computers after more than a dozen fires, and two years later issued a second recall.

"This is a battery type that is only one of hundreds of possible batteries but this particular type was pushed by a few companies and investors so they could make money off it at the risk of public injury or death..."

When a test of a lithium-ion battery charger turned into an inferno at Securaplane Technologies Inc. in 2006, temperatures reached as high as 1,200

degrees and three waves of firefighters failed to save the building. An employee of the Oro Valley company blasted the flaming battery with a fire

extinguisher to no effect. Two hours later, the galvanized metal roof collapsed, and the 10,000 square-foot building was a total loss.

It's a fire that federal safety regulators are taking another look at now, since Securaplane provides two key battery components to the Boeing 787

Dreamliner, the start-power and battery-charger units. Records from local Golder Ranch Fire Department, the first of three fire departments to respond to the blaze, describe "an uncontrolled thermal reaction (that) caused the battery to vent and this venting caused the ignition to various items and fixtures throughout the test lab area."

"The electrical technician who was performing a test on the battery when it exploded likened the experience to being near a jet after-burner.

Electrolytes from inside the battery were shooting 10 feet into the air, the former Securaplane employee, Michael Leon, said in an interview Friday. "The

magnitude of that energy is indescribable."

"The fire stands as a graphic illustration of the power stored within energy-dense lithium-ion batteries and the potential consequences if something

goes awry. It also highlights the importance and delicacy of the quality-control measures applied to a novel – and potentially explosive – technology, a

technology now allowed, under special conditions, to be used as the main and auxiliary power source of certain aircraft.

The Boeing 787 Dreamliner, the company's newest and most energy-efficient plane, uses two lithium-ion batteries. After two battery-related incidents in the past month, the 50 Dreamliners distributed so far have been grounded."

"Whistleblower: Dreamliner LITHIUM ION Batteries Could Explode

Boeing's (NYSE:BA) new 787 Dreamliner could end up being a nightmare for the aircraft giant.

A former senior engineering technician at Securaplane Technologies, which makes the charging system for the lithium-ion batteries used in 787 Dreamliners, told CNBC that the batteries are defective and liable to explode if they overheat.”

” Lithium-ion batteries are heat intolerant, according to a potential whistleblower familiar with...

Lithium-ion batteries are heat intolerant, according to a potential whistleblower familiar with their technology. “Too much heat on those things, they will go into a thermal runaway, they will explode.” The informant, a former senior engineering technician of Securaplane Technologies, was fired in 2007 for repeated misconduct, but he says it was in retaliation for voicing concerns about the batteries. The NTSB acknowledges that the lithium-ion batteries in Boeing's (BA) Dreamliner experienced a thermal runaway, but insists there's no connection between the incident and the whistleblower's claims. “

“The Japan Transport Safety Board makes a number of interim points. This battery, unlike one that burst into flames in a Japan Airlines 787 earlier in January, did not actually ignite. It experienced a thermal runaway, as a result of a build up of heat, yet the materials affected did not start burning. While the semantics might escape the casual observer the safety investigator said:-

“The battery was destroyed in a process called thermal runaway, in which the heat builds up to the point where it becomes uncontrollable.

“But it is still not known what caused the uncontrollable high temperature”.

In simple language, uncontrollable rises in temperature will if uncontrolled most likely result in a fire, including one that can burn through structural composites and alloys, and prove almost uncontrollable by fire fighters, even on the ground.

It took a Boston airport fire brigade detachment 99 minutes to put out the Japan Airlines fire using equipment unavailable if the airliner was hours away from an emergency landing strip in the high arctic or north Pacific, which that particular flight had only recently traversed before the fire broke out after landing.

The Japan air safety investigator said the wire supposed to ground or discharge static electricity build ups in the battery had been severed meaning

it had experienced abnormal levels of current.

However as also confirmed by the early stage of the US incident investigation into the Japan Airlines fire, this large lithium-ion battery had not experienced a voltage surge, and had so far as flight data recordings could tell, had been operating normally immediately before the emergency landing.

Expect the news release in Japan to cause more tension between those who want the 787s to fly again pending a full understanding of the causes and cures in these incidents, and independent safety investigators who will recommend to safety regulators like the FAA a continuation of the grounding”

“One aspect that may confuse some people relates to the decision to use this particular type of battery. The danger posed by it has been evident by a lengthy and documented list of disturbing events in recent years. They include many thousands of batteries used in laptops being recalled, because of determined risks of fire or explosion. General Motors were also placed in the battery limelight. In 2011, the 400 pounds Lithium ion battery in their Chevrolet Volt apparently was subject to spontaneous combustion when it burst into flames, while reportedly in a parked vehicle. In

2010, a UPS-operated Boeing 747 crashed just after take-off from Dubai. Investigators placed the blame on a cargo hold that contained Lithium ion batteries, for a fire that caused the incident.”

FISKERS CARS THAT BLEW UP AND BURST INTO FLAMES JUST BECAUSE THEIR LITHIUM ION BATTERIES GOT WET

“Here is where they make some of these batteries, in forced labor camps:

<http://www.thedailybeast.com/newsweek/2013/01/13/china-s-labor-pains.html> Because, as we all know, chinese prostitutes are the best choice to make the things that keep our airplanes in the air and our cars on the road. The silicon valley venture capital guys front these batteries because they have such cheap labor to give them great profits.. quality control? not so much...”

NHTSA DEMAND LETTER

ADDITIONAL DATA:

Additional Mechanical Failures of the Tesla. Some could lead to lock-in during fire:

Mocking web image, below, highlights acknowledgement of high volume of Tesla drivers drinking and driving:

Image, below, shows that the battery compartment of Tesla has more impact points to cause ignition than any other electric car:

The Chevy Volt did a recall because of the lithium ion dangers and added extra steel, (image below) around the lithium ion chamber but they had already acknowledged this danger by burying the lithium ion deep within the body of the car without exposing it to the outside edges like Tesla does:

The following article (image below:) indicates that Tesla was in violation of federal law when it applied for DOE funds, which required that a company was not about to go bankrupt. Musk, herein states that he WAS about to go bankrupt when he applied. Additionally, he states that he front-loading his friends contracts to grab all the federal cash at a bankruptcy. This seems to indicate that safety due diligence data was being manipulated, along with federal law, on behalf of Tesla investors. Tjis calls into question, all data has submitted, or will submit, relative to honesty.

Tesla Model S charging system may have started garage fire – California fire dept

BY BERNIE WOODALL AND NORIHIKO SHIROUZU

(Reuters) – A fire department in Southern California said a garage fire may have been caused by an overheated charging system in a Tesla Model S sedan, in the latest link between the top selling electric car and the potential for fire.

While Tesla Motors Inc maintains that the fire was not related to the car or its charging system, the Orange County Fire Authority said the Tesla-supplied charging system or the connection at the electricity panel on the wall of the garage of a single-family home could have caused the fire.

“The fire occurred as a result of an electrical failure in the charging system for an electric vehicle,” said a report by the fire authority, a copy of which was obtained by Reuters. The report also emphasizes that the cause of the fire is unclear.

“The most probable cause of this fire is a high resistance connection at the wall socket or the Universal Mobile Connector from the Tesla charging system” which was plugged into a 240-volt wall socket, the report said.

The fire occurred on November 15 in Irvine, California. The possible link between the fire and the Tesla Model S was not reported previously.

The garage fire is not related to three road fires in Model S sedans that occurred in October and November and which caused Tesla's stock to fall sharply last month. The road fires occurred in Washington state, Tennessee and Mexico.

In the U.S. incidents, Model S sedans caught fire after running over road debris. In Mexico, a Model S caught fire after striking a concrete wall. U.S. regulators are investigating the cause of the U.S. road fires, which caused the high-flying stock of the "green" car maker to fall from a high of \$194.50 in late September to under \$120 in late November. On Wednesday, Tesla shares fell 2.9 percent to close at \$147.98 on the Nasdaq. The November residential fire on the campus of the University of California-Irvine caused \$25,000 of damage to the garage and its contents, but the Model S sustained only smoke damage, and no one in the house was injured, according to the Orange County Fire Authority's report.

A Tesla representative disagreed on Wednesday with some of the report's findings. "We looked into the incident," said Tesla spokeswoman Liz Jarvis-Shean. "We can say it absolutely was not the car, the battery or the charging electronics."

She added: "The cable was fine on the vehicle side. All the damage was on the wall side. "A review of the car's logs showed that the battery had been charging normally, and there were no fluctuations in temperature or malfunctions within the battery or the charge electronics," said Jarvis-Shean.

The owner of the Model S, who lives at the Irvine residence, had parked the car in the garage the evening of November 14, plugged the cord from the vehicle into the 240-volt wall socket, and set a timer to begin the flow of electricity to the car's on-board batteries at midnight. She noticed a fire just before 3 a.m. and called for help. Fire crews put out the blaze quickly.

Some cardboard boxes stacked near the point of connection between the Tesla Model S charging system and the connection to the 240-volt outlet helped the fire spread, the report said. (Reporting by Bernie Woodall in Detroit and Norihiko Shirouzu in Beijing; editing by Matthew Lewis)

- Questioning the validity of the German "Safety Report"

Re-Quoted from:

<http://www.freerepublic.com/focus/f-bloggers/3098653/posts>

NLPC ^ | December 5, 2013 | Paul Chesser

by jazusamo

Following incidents in Washington state, Mexico and Tennessee, the National Highway Traffic Safety Administration announced it would probe fires that occurred recently over a six week period in Tesla Motors' electric Model S.

And this week, as revealed in a Detroit News story, the NHTSA looks like they're serious – at least more serious than Germany's transportation safety authority.

Why bring up Germany? Because as the regulatory heat bears down in the U.S. on Tesla and high-profile CEO Elon Musk, they have trotted out the Eastern Europe nation to demonstrate that they've been absolved of any culpability

in the fires. The media that has mostly fawned over the electric automaker helpfully amplified the development, which certainly Musk welcomed. He even got a slight recovery in the company stock price as a result.

On Monday Tesla posted a press release that claimed the company received an inquiry from the German Federal Motor Transport Authority about the three fires. While the NHTSA seems intent on conducting a thorough investigation (I'll get to those details momentarily), the Germans have already wrapped up their inquiry! The result: After Tesla provided "data and additional information" and the Germans "reviewed Tesla's responses to their inquiries," they determined that "no manufacturer-related defects could be found. Therefore, no further measures under the German Product Safety Act are deemed necessary."

Tesla posted a copy of the letter from the German Transport Authority – which is addressed to what appears to be the company's local legal counsel – with the translation into English in the press release. Four things beg for explanation:

- The letter references a phone call earlier in the day with the attorney. What was that discussion about, that the Transport Authority immediately issued its exculpatory letter the same day?

Compare that to what the US NHTSA is asking for. As the Detroit News reported Tuesday, the safety agency has requested that Tesla turn over detailed records of all consumer complaints, field reports, warranty claims and property damage claims related to the fires.

But the crash data doesn't support that. As Justin Hyde of Yahoo!'s automotive Web site Motoramic wrote in early November, "Even though it has fewer electric cars on the road than its competitors (such as the Chevy Volt or Nissan Leaf), none have reported similar fires after crashes. And while liquid-fueled vehicles suffer about 170,000 such fires every year, federal data show they take place in only 0.1 percent of all crashes."

As for the American investigation, time – and a serious examination – will tell whether Tesla needs to revisit its Model S design or not. Before the fires NHTSA still gave it a top safety rating, which seemed more like it was joining the irrational exuberance party rather than an accurate evaluation. The signs point to the agency taking this a lot more seriously than the Germans did, but then again, this is the Obama administration we're talking about, which has relentlessly protected and subsidized the electric vehicle industry.

Paul Chesser is an associate fellow for the National Legal and Policy Center and publishes CarolinaPlottHound.com, an aggregator of North Carolina news.

Samsung exploding Lithium ion Galaxy COVER-UP Expose proves Danger of Lithium ion! Lithium ion and Cover-Ups seem to go hand-in-hand

Hard to Take the German Absolution of Tesla Fires Seriously

- by Paul Chesser

Following incidents in Washington state, Mexico and Tennessee, the National Highway Traffic Safety Administration announced it would probe fires that occurred recently over a six week period in Tesla Motors' electric Model S.

And this week, as revealed in a Detroit News story, the NHTSA looks like they're serious – at least more serious than Germany's transportation safety authority.

Why bring up Germany? Because as the regulatory heat bears down in the U.S. on Tesla and high-profile CEO Elon Musk, they have trotted out the Eastern Europe nation to demonstrate that they've been absolved of any culpability in the fires. The media that has mostly fawned over the electric automaker helpfully amplified the development, which certainly Musk welcomed. He even got a slight recovery in the company stock price as a result.

On Monday Tesla posted a press release that claimed the company received an inquiry from the German Federal Motor Transport Authority about the three fires. While the NHTSA seems intent on conducting a thorough investigation (I'll get to those details momentarily), the Germans have already wrapped up their inquiry! The result: After Tesla provided "data and additional information" and the Germans "reviewed Tesla's responses to their inquiries," they determined that "no manufacturer-related defects could be found. Therefore, no further measures under the German Product Safety Act are deemed necessary."

Tesla posted a copy of the letter from the German Transport Authority – which is addressed to what appears to be the company's local legal counsel – with the translation into English in the press release. Four things beg for explanation:

- The letter is dated Nov. 27, which is only about three weeks after the most recent fire. Such a rapid conclusion to an inquiry would seem to be a new record for governmental efficiency looking into complicated, sensitive matters such as this.
- The letter references a phone call earlier in the day with the attorney. What was that discussion about, that the Transport Authority immediately issued its exculpatory letter the same day?
- Tesla blacked out the identity and contact information of the Transport Authority representative who wrote the letter. Why?
- It's apparent the German authority depended only on limited information supplied to it by Tesla ("According to the documents, no manufacturer-related defects could be found"). So it's hard to give their "investigation" much credibility.

Compare that to what the US NHTSA is asking for. As the Detroit News reported Tuesday, the safety agency has requested that Tesla turn over detailed records of all consumer complaints, field reports, warranty claims and property damage claims related to the fires.

"Describe in detail all possible consequences to the vehicle from an impact to the subject component that damages the battery," wrote NHTSA vehicle integrity chief D. Scott Yon. "Describe in detail how these possible consequences were addressed in the design of the (Model S) and the limits of that design to prevent damage to the propulsion battery, stalling and fires."

The newspaper reported that Yon also asked for the results of all Tesla's tests, studies, and investigations to review the battery fires and the alleged defect, and information about whether Tesla made any changes to the Model S to address the possible defect of roadway debris sparking fires in the battery packs. He also wants detailed records of vehicles at the time of the incidents, owner contact information, and all communication to owners or regional officers that the company plans to issue in the next four months.

The letter was dated November 27, and Tesla has until January 14 to respond. That's about 50 days just to gather the information – more than twice as long as it took the Germans to collect, analyze and conclude their "inquiry" that "cleared" Tesla.

Tesla has carefully controlled information that's been released about the fires, including statements from the Model S owners. For the most part media reports have derived from these. It makes you wonder if there is some sort of non-disclosure agreement between the company and its vehicle owners.

For example, in early October – shortly after the first fire in Kent, Wash. – Musk posted an essay on Tesla's blog that explained how the Model S “struck a large metal object” that caused damage.

“A curved section that fell off a semi-trailer was recovered from the roadway near where the accident occurred and, according to the road crew that was on the scene, appears to be the culprit,” Musk explained. “The geometry of the object caused a powerful lever action as it went under the car, punching upward and impaling the Model S with a peak force on the order of 25 tons. Only a force of this magnitude would be strong enough to punch a 3-inch diameter hole through the quarter inch armor plate protecting the base of the vehicle.”

Maybe so, but for all the physical explanations Musk has tried to present, no photos of the large metal object have been produced. Nor are there any pictures – that are reasonably findable on the Web, at least – of the tow hitch that was accused of causing the Model S fire in Tennessee. In such a hotly scrutinized case you'd think Musk would be parading the evidence if it existed, but he hasn't.

In the same blog post Musk went to great lengths to argue a conventional gasoline powered car, in the same circumstances, could have experienced a far worse fate.

“A typical gasoline car only has a thin metal sheet protecting the underbody, leaving it vulnerable to destruction of the fuel supply lines or fuel tank, which causes a pool of gasoline to form and often burn the entire car to the ground,” he wrote.

But the crash data doesn't support that. As Justin Hyde of Yahoo!'s automotive Web site Motoramic wrote in early November, “Even though it has fewer electric cars on the road than its competitors (such as the Chevy Volt or Nissan Leaf), none have reported similar fires after crashes. And while liquid-fueled vehicles suffer about 170,000 such fires every year, federal data show they take place in only 0.1 percent of all crashes.”

Tesla's control freakishness is also reflected in how the Model S owners who were fire victims. Has any independent journalist interviewed them? Below Musk's blog post was a portion of an email exchange between Tesla's vice president for sales and service and Rob Carlson, the Washington driver. The VP's missive came off as a carefully crafted (lawyered?) explanation of how the fire occurred and that the Model S's safety protections “operated correctly.” In reply, Carlson supported Tesla's response to the incident and said, “I am still a big fan of your car and look forward to getting back into one.” Then he revealed that he is an investor in Tesla – so certainly a critical response on his part would not have helped the value of the shares he owns!

While not exactly tanking, Musk likely felt some anxiety (and investor pressure) when the company's stock dropped from almost \$200 earlier this year to about \$120 the last couple of weeks, after the fires. Publicly Musk has said Tesla's share price was overpriced anyway (he's right), but at the same time, what executive wants to see a rapid drop like he's seen? Not a moment too soon, this week he discovered a way to turn the German “inquiry” of the Model S fires into a Wall Street bump – the stock is up to almost \$139 this morning.

As for the American investigation, time – and a serious examination – will tell whether Tesla needs to revisit its Model S design or not. Before the fires NHTSA still gave it a top safety rating, which seemed more like it was joining the irrational exuberance party rather than an accurate evaluation. The signs point to the agency taking this a lot more seriously than the Germans did, but then again, this is the Obama administration we're talking about, which has relentlessly protected and subsidized the electric vehicle industry.

Tesla Safety Challenged! The Facts:

Deadly Smoke and Fumes. If the crash and fire don't kill you now, the toxins in the deadly smoke fumes kill you later.

(See all that smoke in the TESLA fire, above? That smoke is filled with deadly toxins from burning lithium ion combined with plastics. Why does Tesla say nothing about this in its buyer documents? See all the cars stuck in traffic in the smoke plume? Do those innocent drivers, and their families, that have to sit there, behind the fire and in the smoke, appreciate having to breath in deadly vapors? See the fireman with the Full-Hazmat breathing apparatus on? He knows it sucks.)

Per the IJES via the State School of Chemical Engineering and Technology of China:

(Image above: New tests can see the cancer causing chemicals that got in your body from a Tesla fire from just two strands of your hair or one drop of blood or one swab of saliva. You can't hide product toxic poisoning anymore.)

There are a vast number of MSDS disclosure forms and technical product documents from the feds, the battery companies, the FAA, the TSA, the SME, The IEEE and tons of others say that "Lithium ion batteries will explode and they will give off toxic gas".

Why were the Tesla's not equipped with carbon dioxide fire extinguishers as required? Why was a simple sheet of soft metal placed between the explosives and a "thousands-of-pound-per-sq.-ft. impact surface" (the road)? Was the car actually engineered or did Musk just doodle it out on the back of a napkin? You can hit the edge or front of the car and it will go off. The reason "Elon Musk stands behind Tesla" is because they usually blow up starting from the front.

Andrew- DC Group

TESLA COVER UP

Lithium Ion goes boom when it gets wet, poked, charged, used or pretty much gets unhappy for no apparent reason. All those car hulks, below, lined up next to each other are lithium ion electric piles of burned up \$100K, per pile, cars, Nice huh? They are going to great lengths to cover that fact up:

(Notice the surgeon who owned it. Most of these guys are Swingin' D Rich Guy Male Doctors)

Those images above show many different lithium ion electric car fires. Why is this being covered up? By whom? So far, most Tesla's have been acquired by Tesla Fan Boys and their own investors to pump up the numbers. This has prevented a number of "thermal events" from getting reported.

WHAT!!!? You don't think that's enough burning Tesla's? Well here's some more, the next one is from Boston:

Not enough burning Tesla's?

Stand by...

RS- LAT

Tell The U.S. Government to order Tesla to remove all Lithium Ion chemicals from it's cars! Is someone telling the NTSB not to do their job? Who?

TESLA CAN LOCK DOORS ON ITS OWN- BURNING ALIVE = BAD THING!

You can read a number of postings online about the continual failure of the Tesla electronic door handles and door locks. How might fire increase these failure-to-unlock issues. Is it possible your own Tesla could lock you, and your family, INSIDE the car when it catches fire? How was this tested in the safety tests, or was it even tested?

The Tesla Defects seem to be multiplying.

Roberta- (A Mother)

Lithium ion = Bad Stuff

Notice that in the following movie, the lithium ion battery like Tesla uses starts exploding just when the insides are exposed to air and ALSO when it gets wet:

Another Tesla Movie

So you think: "OK, I would never drive my Tesla over any metal or bumpy roads so I never need to worry about that", Well, that's what this Tesla driver thought:

Watch the left side of the screen along the meridian wall. You can recognize the Tesla by the round open mouth grill.

No matter what kind of a persnickety, self-centered, rich douche-kinda guy you are: Your Tesla is eventually going to hit a pot-hole, bottom-out or hit some crap in the road and then: fire and toxic smoke!

SHOCKER EXCLUSIVE!!!!!! Tesla "battery supply" problem -NOT. Battery explosion problem- YES.

"The napalm-like lava that is burning lithium-ion, combined with burning Tesla plastic, can eat through your entire face in about 2.5 seconds and it is nearly impossible to extinguish. This is not good stuff. They tried it on pig-corpse, ugly results.

There are over 1000 different ways to store electricity. Lithium ion is the worst. The faster a car goes, the more likely it is to crash and to flip over in a crash. Tesla is the fastest car so it will crash more and flip over more. People that drive Tesla's are, generally, arrogant yuppie males with ego issues who want to go fast and show off. That makes crashes even more likely. While you are driving around on a carpet of deadly lithium ion, buried in the floorboards of the Tesla at your feet, and the car suddenly flips over, you are now trapped under a ceiling of burning lithium ion that firefighters can't extinguish and your face burns off. This is like flouridation of water controversy; this chemical was specified because a certain group is making money off of this chemical. Over time, each battery has a higher and higher chance of "going off" because the charging demands of a car combined with the degradation offset of a single lithium ion battery is high in normal circumstances. Tesla uses them in extreme circumstances. They were never built for cars. You are not going to see less Tesla fires, you are going to see more. Tesla has dense-packed 6800 lithium ion packs in a closed metal box under your seat. That is 6800 chances of having your face burned off and 6800 chances of getting rained on with burning lithium ion and plastic, gassed out and burned up by the Tesla. I don't like the odds. Look at some of these pictures on this site, it even melts the metal.

The people that are telling you “Lithium Ion is just a lovely thing, don’t worry about all of those scare stories” have a financial investment in batteries using this chemical. Almost all of them have worked for, invested in or been hired by the people that make money off it. The form factor Tesla uses is a common 18650 battery you can buy on Amazon and Ebay so Tesla is not telling the truth about “having a battery supply problem” in their latest financial reports. They are having a battery blow-up problem. Suppliers won’t sell them any batteries because they know Tesla abuses the batteries in the way they deploy them in cars and they don’t want to get sued too, along with the lawsuits that are coming after Tesla. These batteries were never intended to be used in cars. All this has been known for decades. If the “biggest electric car funding effort in history” hired the “greatest technical review team ever created”, how did this get by? Why didn’t the reviewers mention this for Tesla’s ‘loan’? This is not new technical information!”

Dr. Lee- USGA

(FYI- I am available for TV interviews. Contact me through the SOMO funnel.)

NHTSA has now called Musk a Liar TWICE, said he lied about probe and lied about NHTSA safety rating

The National Highway Traffic Safety Administration (NHTSA), which produced the safety rating, isn’t happy about Tesla’s boasting.

In its announcement, Tesla explained that the Model S earned five-star marks in every category; a rare feat. On top of that, its overall Vehicle Safety Score, provided to manufacturers, gave it a “new combined record of 5.4 stars.”

In a statement on its website, the NHTSA issued a rebuke to Tesla:

“NHTSA does not rate vehicles beyond 5 stars and does not rank or order vehicles within the star rating categories. In addition, the agency has guidelines in place for manufacturers and advertising agencies to follow to ensure that accurate and consistent information is conveyed to the public.”

<http://www.businessinsider.com/nhtsa-tesla-didnt-request-investigation-2013-11>

<http://www.businessinsider.com/government-mad-at-tesla-over-safety-claim-2013-8>

Reporters use a new technology called: FACTS, to recall that only just the other day Musk was screaming in the press that “no recall” and “no probe” was needed, yet today he says he has secretly been demanding that NHTSA do a probe. Hmmmmm? Interesting!

Bloomberg, Guardian and Reuters staff have now spoken with NHTSA staff, including the head: David Strickland, who have said, on record, that Tesla did NOT request probe and that it would be “unprecedented” for any car company to request a liability probe like that. Another Musk lie to his investors. Both the lie and the counter, published and on the record. NHTSA said it had already had concerns about Tesla prior to any calls from Tesla or Tesla’s investors. Previous communications had been from Tesla backers and Senators (Who Tesla investors already had in their pockets) saying “don’t do a probe”! Another P.T. Barnum “smoke-screen” move by Musk. Musk tried to take credit for creating Tesla even though Martin Eberhard created Tesla. Musk tried to take credit for creating the probe even though the feds had it already going. Musk tried to take credit for inventing electric cars even though GM and others did it decades earlier. Musk changed the NHTSA safety results and got caught lying about that too. Musk tried to take credit for creating the HyperLoop even though MIT created it 9 years earlier. What’s up with this douche bag?

GHT- LAT

Tesla: Unsafe At Any Speed, Unethical at Inception.

If I read all of the posts and articles on this page I get:

“Tesla seems to have been used to provide kickbacks to lithium ion investors in exchange for politics and those investors may, or may not, have known that lithium ion blows up, on its own, way more often than gasoline. When it does blow-up, along with the plastics and metals of the car, the toxic smoke and vapors can lead to a slow death of the occupants and bystanders. The Tesla batteries were not made for cars and when they are made, the workers who make them become very ill or fatally ill. There are plenty of electric cars available, today, from other companies. Tesla was not the first or the last and has led no wave of innovation that was not already in place decades earlier. Tesla staff and bundlers bribed Washington DC officials to get taxpayer money and fake stock market positioning for a billionaire. They deserve no applause. Almost all of the “Tesla fanboy Hype” is Tesla’s own hired bloggers, and investors, run out of Fremont, creating fake buzz by operating as thousands of fake social media accounts.”

Does that about sum it up?

EACH of those electric Fisker cars, in the photos above, blew up as they sat there when their lithium ion got wet in a storm. Lithium Ion blows up just from getting wet (or overcharged or banged). The cars, in the photos above, were not all brought there, and put together, after they blew up. They just blew up sitting in the parking lot waiting to get delivered to customers. That is a picture of dozens and dozens of VERY expensive cars that were being used as a scam to sell this chemical called “lithium ion” that campaign financiers had a near monopoly on. It was a kickback deal. Due Diligence was done, but ordered to be ignored, in order to shove as much cash out the door, and in their pockets, before they got caught.

Here is another one, below, the owner just ran into the grocery store and BOOM the lithium ion batteries in his \$100K+ lithium ion electric super car just blew up, taking the tree and the car next to it out:

TESLA PATENTS, FILED WITH FEDS, SHOW MUSK KNEW CARS WERE UNSAFE!

TESLA knew their car was unsafe and says so in their own patent filings. This, alone, says Musk was lying. The extreme military tank-type “ballistic shield” measures called for in their patent, below, are shocking proof that they

knew how awful lithium ion is the way they use it. In another Tesla patent, Tesla says, in THEIR words filed with the feds: ““Thermal runaway is of major concern since a single incident can lead to significant property damage and, in some circumstances, bodily harm or loss of life. When a battery undergoes thermal runaway, it typically emits a large quantity of smoke, jets of flaming liquid electrolyte, and sufficient heat to lead to the combustion and destruction of materials in close proximity to the cell. If the cell undergoing thermal runaway is surrounded by one or more additional cells as is typical in a battery pack, then a single thermal runaway event can quickly lead to the thermal runaway of multiple cells which, in turn, can lead to much more extensive collateral damage. Regardless of whether a single cell or multiple cells are undergoing this phenomenon, if the initial fire is not extinguished immediately, subsequent fires may be caused that dramatically expand the degree of property damage. For example, the thermal runaway of a battery within an unattended laptop will likely result in not only the destruction of the laptop, but also at least partial destruction of its surroundings, e.g., home, office, car, laboratory, etc. If the laptop is on-board an aircraft, for example within the cargo hold or a luggage compartment, the ensuing smoke and fire may lead to an emergency landing or, under more dire conditions, a crash landing. Similarly, the thermal runaway of one or more batteries within the battery pack of a hybrid or electric vehicle may destroy not only the car, but may lead to a car wreck if the car is being driven or the destruction of its surroundings if the car is parked.”

Plus this other Tesla patent which says you need to, essentially, be in a military tank to drive a Tesla safely. Patent calls for “Ballistic Shielding” to keep drivers & passengers alive !!!!:

http://www.patentlens.net/patentlens/patents.html?patnums=US_8286743#tab_1

HJ- BOST

Per SME, lithium ion has blown up in products over 2000 times more often than any other energy storage.

Lead acid batteries, gasoline, hydrogen, nickel metal hydride, and all other product energy storage technologies COMBINED have NOT blown up as much as lithium ion has gone thermal in cars, airplanes, cell phones, computers, data centers, tablets, backup power systems and other systems. People have died in some of these incidents. Planes have crashed. Homes have been set on fire. People have been horribly burned. It is not OK to let lithium ion investors buy the news media and shut down the articles about these dangers.

Hj, WSJ

Please Send This open letter to the German Federal Motor Transport Authority, or Kraftfahrt-Bundesamt (KBA):

Regarding: Your recent Tesla “safety declaration”.

Dear German Federal Motor Transport Authority:

It is quite surprising to hear that your organization has declared the Tesla completely safe without engaging in full due diligence. It makes it appear like someone got bribed. We certainly hope that Deutsche Bank staff’s substantial positions in Tesla held no bearing. We see that Deutsche Bank staff were just indicted for massive securities fraud and we hope that is just a coincidence.

Numerous organizations and experts have provided data showing that the car is not safe. The statistics, historical facts about lithium ion, and actual evidence point to the opposite conclusion. Many websites, including: <http://lithium-ion.weebly.com> and others provide rather contrary evidence. Tesla’s own patent documents state that the car is not safe. The Chevy Volt was recalled for far less battery issues with lithium ion.

There are over 200 safety concerns that can be provided to you in a documented report. America has not even started their safety investigation and has requested a deep set of technical documents from Tesla. Did your agency request such documents?

The members of the public hereby request publication of the identities of the reviewers, the methods and analysis methods they employed, the read-out of their data and the conclusive, specific data that the research was based upon. Here is a link to a much more overt investigation you might want to review:

<http://somo1.com/2013/12/06/tesla-safety-report-vers-1-05-public-wiki-produced-for-nhtsa-and-other-governmental-agencies/>

Samsung exploding Lithium ion Galaxy COVER-UP Expose proves Danger of Lithium ion! Lithium ion and Cover-Ups seem to go hand-in-hand. Samsung tries to silence user whose S4 caught fire, it doesn't go over well

Brad Sams0

Oh Samsung, you tried to have a YouTube video pulled after it showed a Galaxy S4 that caught fire while charging but this is about to blow up in your PR and legal teams face after you sent a 'hush' document to the user.

Here's the deal, YouTube user GhostlyRich posted a video on YouTube in early December that showed that his Samsung Galaxy S4 caught fire while charging. While the battery did not explode (thankfully) you can clearly see

the charging port is burnt. To no surprise, a burnt charging point rendered the device useless and seeing that the Phone is still under warranty, you would think Samsung would simply exchange the device and make good with the consumer to fix the issue.

Wrong. What Samsung has done, foolishly, is sent the user a document saying that they will exchange his defective device only after he pulls his initial video from YouTube. If Samsung was unaware of how the Internet works, it's about to find out that trying to quiet the user will result in a black eye for the company.

Yes, we can understand why a company would want keep this type of incident quiet but anyone who has a basic understanding of the Internet will tell you that once it's posted to the web, there is no way to delete it. Sure, removing the video might keep it a bit quieter, but that would likely only raise more suspicion in the long run with the followers of that YouTube channel.

Samsung has goofed up big time as the original YouTube video, at the time of this posting, had 45,000 views and the video showing the Samsung demand letter, well, it has over 277,000 views.

The video discussing the letter and the incident is posted above and is worth a watch. It goes to show what Samsung will do anything to keep its S4 issues off the radar but in this case, it has completely backfired. Not to mention that having to sign a contract to execute a warranty is borderline unethical for the circumstances of this incident.

Germany Clears Tesla Of Fire Probe...????? Was it a real probe?

Tue Dec 3, 2013

(Business Insider) The German Federal Motor Transport Authority, Kraftfahrt-Bundesamt (KBA) has concluded an investigation into three recent Tesla Model S fires and found "no manufacturer-related defects," Tesla said today.

In a press release, Tesla said it provided the KBA with relevant data on the accidents, and received a letter saying "no further measures under the German Product Safety Act [Produktsicherheitsgesetz (ProdSG)] are deemed necessary."

In November, the National Highway Transportation Safety Administration (NHTSA) opened an investigation into the three fires. Tesla said it has "requested" the process, but NHTSA Administrator told a House panel that was untrue, according to The Detroit News.

That investigation is ongoing, but at least the Germans have been placated.

If you woke up this morning and read this, as I did, upon seeing TSLA up 6% before the open and my puts reversing lower on this "news", you could be forgiven if your first impression was, "when the hell did Germany open an investigation?"

You see, I remember being told about the investigation being conducted by the NHTSA, the US based auto safety agency. I remember they opened an investigation following three fires, two of which occurred in the US, and the remaining one in Mexico. Barely a few weeks ago...

But it's funny, as I don't recall there ever being an announcement of a German investigation. It must have got lost under the Blankenship resignation announcement.

In fact, swinging over to Tesla's Investor Press Releases – it's astounding – but it seems completely devoid of any bad news at all. Not even a mention of the US based investigation, much less a German one, or a peep about the VP of sales leaving the company.

Meanwhile, in the real world, real men and women are throwing their money into this company, shaking off oversold conditions on a hard bounce. And class action lawsuits are raining from the sky. I've mostly been thinking those lawsuits were warrantless before now, but if this is how Tesla handles communications, I'm not so sure.

This isn't a game, people.

Mr. Cain Thaler

Stock advice in actual English.

If GM had to do a recall for a potential thing, why didn't Tesla have to do one for an actual thing? (Hint: Bribes)

“GM to Call Back 8,000 Chevrolet Volt to Strengthen Battery Pack

Michael Graham Richard

Transportation / Cars @ Treehugger

The saga continues! After some Chevy Volt battery fire issues during testing and GM offering Volt owners to buy back their cars or loan them replacements, we learn that that GM has decided to not take any chances; it is supposedly about to announce a call back of 8,000 Volt electric cars.

The Associated Press only writes: “A person briefed on the matter says General Motors will ask Volt owners to bring their electric cars into dealers to strengthen the structure around the batteries.” We should have more details later today, but if you own a Volt, expect to be contacted by your dealer and to have to bring them you car for some strengthening of the structure protecting the battery pack.”

###

See image below. Even though Chevy Volt batteries are contained deep within the body and chassis of the car, GM still had to do a recall to cover the lithium ion batteries up in even more steel. Tesla lithium ion batteries are fully exposed at the edges and bottom of the car. It should not be possible for NHTSA to NOT require a recall unless someone is paying someone off. Is Musk “Convinced there will be no recall” because Rahm told him so?

(C) GM

The Tesla Battery pack has TONS more impact points than a Chevy Volt, Nissan Leaf or other car. It has less shielding density per Lithium Ion Square inches than any car. The batteries are very close to the edge and exterior of the car without protection equal to the known, and calculated, destruction potential. That is why Tesla's blow up more often:

The Tesla battery box wall is a mere breath away from a deadly road surface moving with tremendous force and the lower edge of the car where an impact is most likely to occur. Thousands of pounds of shock force will instantly do things to those batteries that will be: Awesome in a frightening and fire-explosion kinda way.

KF & GG

Incriminating New Evidence!

Corporate testing videos have now been uncovered showing mice in a glass box exposed to a single burning Tesla Lithium ion cell and then exposed to a single burning Tesla Lithium 2 inch ion battery with a section of Tesla car body plastic and metal burning. After the horrid results, the mouse bodies were tested for toxins. Needless to say, none of the results were good. U.S. Government MSDS documents reveal the toxic vapor danger from these batteries was fully documented outside of DOE, yet never discussed by staff. Federal MSDS documents, from multiple federal agencies, specifically state that the Tesla lithium ion batteries are deadly toxic when burning.

DF- NYP

Tesla fires Can't be ignored no matter what the CEO says

<http://www.consumeraffairs.com/news/tesla-fires-cant-be-ignored-no-matter-what-teslas-ceo-claims-112013.html>

Tesla Batteries Act Like Solid "rocket fuel" when they ignite!

As of 11/6/2013 Tesla had said there were only 3 fires, yet social media shows there were many more fires. Those other fires have been documented in photos and videos and Elon Musk has said he has tracking chips on all of the cars so Tesla had to have known about all of the other fires. The reality of the documentation and the statements from Tesla seem to clearly show a cover-up. Lithium ion in a metal box burns like solid rocket fuel when it gets going in a fire. Musk would have known this since he started SPACE X: A rocket company! (Which keeps having technical failures)

Bad Engineering

It was an idiotic move to use thousands of lithium ion consumer flashlight-type batteries, that were never made to be used in a car, to create an entire bed of toxic explosive material and put it just a hair breadth away from a surface that can puncture, explode and inflame it. That surface, the road, is trying to puncture, bump, and destroy the undercarriage, of every car, every inch of every mile of every road across the country. Also, the batteries are so close to almost all of the outside edges of the car, that puncture damage in a crash is certain. They decided to CHEAP OUT with the flashlight batteries yet they charge buyers insane amounts of money for a car with a growing list of technical failures. What were these people thinking?

Update: See Fluoride controversy (below) for explanation about why someone would do this:

Understanding Tesla's Life Threatening Battery Decisions

SEEKING ALPHA- John Peterson

Nov 22 2013

In the last couple of months, electric cars from Tesla Motors (TSLA) have had three collision-related battery fires that were widely covered by the media. Last week, the NHTSA decided to conduct a formal investigation of these incidents. While Tesla's CEO Elon Musk immediately went on the offensive arguing that Tesla's BEVs have a lower fire risk than gasoline powered cars, the question an increasing number of investors are asking is "Why has Tesla had three battery fires in a fleet of 17,000 BEVs while Nissan hasn't had any fires in its fleet of over 90,000 BEVs?" The answer is simple. Tesla's battery decisions significantly increased battery risks for both the customer and the company. MORE...

Musk Claim of Fewer Tesla Fires Questioned in MIT Report

Bloomberg

By Angela Greiling Keane & Jeff Green

Tesla Motors Inc. (TSLA) cars have caught fire caused by collisions more often than gasoline-powered vehicles, according to a Massachusetts Institute of Technology report rebutting assertions by Elon Musk, the electric-car maker's chief executive officer.

Because only 4 percent of vehicle fires are caused by collisions, Tesla's Model S sedan, with a rechargeable lithium-ion battery, is statistically more likely to catch fire than are cars with gasoline tanks, wrote Kevin Bullis, senior editor for energy for MIT Technology Review.

Update: <http://muckrack.com/link/tdT2/musk-claim-of-fewer-tesla-fires-questioned-in-mit-report>

LITHIUM!!!!!!!!!!

Randy Oates- DC

TESLA MATH:

If one IPAD can take out a whole store and a Tesla has the equivalent of thousands of IPAD batteries in each car, how many homes in your neighborhood can a Tesla take out?

I want my neighbor to keep his Tesla at the office. Musk has made a big point out of saying, in recent interviews, that the new fires were not “spontaneous” thereby admitting he knows that Lithium Ion CAN go off spontaneously like it did in the Boeing planes and with many other electronics in the last 10 years.

GH- Boston G

EXPOSE: Here is a video made by Tesla’s own employees about their product:

You can also see it at:

<http://tinypic.com/r/7295hs/6>

WATCH THIS VIDEO OF A TESLA BURNING AND BLOWING UP BECAUSE OF BATTERY UNHAPPINESS.

<http://m.digitaltrends.com/cars/second-tesla-model-s-catches-fire-critical-crash-mexico/>

“Is the beginning of an onslaught of fiery Tesla Model S wrecks?”

A second Tesla Model S reportedly caught fire last week after crashing through a concrete wall in Mexico.

According to Mexican paper Progreso Hoy (by way of Business Insider), a Model S owner was speeding when he lost control of the car and went through a concrete wall and then into a large tree.

You can see the resulting fire in the video below.

The man was apparently not seriously injured and walked away from the incident.

Here is an official recount from Tesla:

“We were able to contact the driver quickly and are pleased that he is safe. This was a significant accident where the car was traveling at such a high speed that it smashed through a concrete wall and then hit a large tree, yet the driver walked away from the car with no permanent injury. He is appreciative of the safety and performance of the car and has asked if we can expedite delivery of his next Model S. The first reported Model S fire occurred earlier this month when a Washington State driver struck an object in the road, which caused a fire in the front portion of the car, beneath the carpeted trunk area. It appears the Mexican Model S fire also began in the forward section of the car.” ”

Manu Fs. – Obsido

The Lithium ion profiteering scam. Dump, grab the money and run.

FISKER lithium Ion batteries burst into flames at the drop of a hat. This is now well-known. Tesla and Fisker funding with tax dollars was more about funding battery company deals for their investors than anything else. Lithium Ion Batteries blow up in Boeing's, Tesla's and they just blow up. That is why TSA does not allow liquid on airplanes. That is why AT&T eliminated Lithium Ion in its server racks. EVERYBODY knows that lithium ion blows up and releases deadly chemicals, why is this cover-up still going on? Oh, I See: Profits and kickbacks!

Everyone was warned about this. Over 100 published reports from major universities and federally funded studies have now been sourced and posted showing that this had been guaranteed to happen by some of the top scientists in the world prior to Tesla receiving DOE money. Who owns all these battery companies? Watch for the WESTON REPORT from a major Huffington Post Journalist which links every investor in TESLA to all of their political connections and influences. Invest in Tesla and you will get tracked by numerous investigative reporters.

Dan

THERE HAVE BEEN A VAST NUMBER OF ADDITIONAL LITHIUM ION FIRES. SEE THESE LINKS.

November 7, 2013

By Jerry Hirsch November 7, 2013, 8:39 a.m.

Tesla Motors shares continued to fall Thursday as the automaker confirmed a third fire in one of its high-end electric cars and a major auto reviewer pointed out problems with its Model S luxury hatchback.

The 9%, or \$13.40, decline in mid-morning trading to \$137.76 followed a 15% plunge in the shares Wednesday after the automaker said limited supplies of batteries were hampering sales and that it was spending heavily on research and development to design new models. Tesla shares have been on a run for most of the year, rising about 400% before this reversal.

Car shopping website Edmunds.com said its 2013 Model S was “making an ominous noise under acceleration and deceleration. It originates from the rear of the car and seems to be getting worse.”

It is a complaint that’s also starting to show up on Tesla’s owners forum, an online discussion group hosted by the automaker for drivers of its cars.

“Mine had that and it got bad at 70 mph,” said one owner, posting under the “mortgagebruce” moniker.

He said Tesla had to replace the drive unit twice to fix the problem.

Tesla also replaced the drive unit on the Edmunds car, but declined to tell the company what caused the problem. It also replaced the driver door mechanism because of another problem. The car has just less than 11,000 miles on the road.

“We’re not sure what to think about the fact that both of these repairs were completed with just one overnight stay,” said Mike Schmidt, Edmunds’ vehicle testing manager. “Maybe the dealer is really on the ball. Maybe the supply chain is short. Or maybe the parts are readily available because they’ve seen these before.”

Tesla spokeswoman Liz Jarvis Shean said she was not familiar with the Edmunds complaint.

Meanwhile, another Model S electric car caught fire Wednesday near Smyrna, Tenn., following a crash. This was the third Model S to have caught fire in the last five weeks. One burned near Seattle and another in Mexico. Both cars were in crashes and the fires injured no one.

Normally, car fires are not significant events that influence investors. There are about 150,000 annually, according to the National Fire Protection Assn. However, safety officials have been tracking fires in electric cars, as well as computers and other equipment, out of concern that the lithium-ion battery systems might be fire-prone.

Earlier this year, federal regulators grounded Boeing 787 planes for four months after batteries on two planes overheated, with one catching on fire. Boeing later ordered modifications to the jets to increase ventilation and insulation near the batteries, but the company and investigators never determined the root cause of the overheating.

The National Highway Traffic Safety Administration reviewed the Tesla fire in Seattle and concluded it was caused by the accident rather than a vehicle defect.

Tesla said it contacted the driver of the car in Tennessee and noted he was not injured and “believes the car saved his life. Our team is on its way to Tennessee to learn more about what happened in the accident.”

“The problem is that we have three fires in six weeks,” said Karl Brauer, senior analyst at Kelley Blue Book, the car information company. “For a company with a stock price based as much or more on image than financials, those recurring headlines are highly damaging.”

The Palo Alto automaker said Tuesday it posted a loss of \$38.5 million, or 32 cents per share, in the third quarter. That compares to a loss of \$110.8 million, or \$1.05 per share, in the same period a year earlier. Now that it is delivering cars, revenue grew to \$431 million from just \$50.1 million a year earlier.

Science Question

With all of these lithium ion cars, IPADs and phones just blowing up and going off more and more, does the increased prevalence of WIFI, broadcast signals and atmospheric radiation and other ion drivers make Lithium Ion increasingly more likely to go off?

DDF

"over a milion failures of this chemistry and these batteries.."

<http://www.youtube.com/watch?v=uFl8v1lxH0k>

October 2, 2013, 4:27 PM

Tesla Motors Inc. TSLA shares tanked after a video of a Model S on fire circulated on the web, prompting the electric car company to move quickly to douse the flames of bad publicity.

Elizabeth Jarvis-Shean, director of global communications at Tesla, confirmed that the vehicle engulfed in flames was indeed a Tesla but stressed that the driver walked away without injuries.

Tesla Issues Statement On Fiery Car Crash That Caused The Stock To Tank

◆ Mamta Badkar Oct. 2, 2013, 3:45 PM 13,469 11

tesla

Aj Gill via YouTube

Tesla's stock was down over 7% to a low of \$175.40 today, but pared some of its losses to close down 6.24% at \$180.95.

It appears that shares began to tumble in the last half hour on reports that a Tesla Model S car caught fire on Washington State Route 167.

Some speculated that the video highlights problems with the car's battery. Though others rushed to point out that the battery is located in the back of the car.

"Media finds that "Safety Investigators" (read "SHILLS") are bribed by VC's and lithium holding companies to say "nothing to see here", "lithium batteries are probably ok". Beware of NTSB "consultant's" and "investigators" who are being bribed, offered after-politics high pay jobs, called up by bribed congressional staff with "suggestions", given sports tickets, handed stock in certain ventures and other bribes. Many of the "investigators" need to be put under investigation themselves!!!! When you see an investigator talking about how lithium ion is a wonderful thing, investigate them!"

The following are a variety of quotes, from across the web, demonstrating the critical nature of this public safety issue:

"Lithium ion batteries are blowing up, starting fires and, generally, destroying people's homes, cars, electronics and physical health. Boeing was

just ordered to stop flying the 787 Dreamliner because it's Lithium ion batteries are catching fire spontaneously."

"A group of silicon valley venture capitalists forced/leveraged the government to buy and pay for these specific batteries, that they have stock in, in order to benefit their profit margins. Other batteries don't have these problems. They knew about this from day one but put greed ahead of safety. There are thousands and thousands of reports of spontaneous lithium ion fires but the VC's who back lithium ion pay to keep this information hushed up.

Millions of these batteries have been recalled for fire risk. The VC's tried to push as many as they could before they got caught. Now they are caught. These VC's own stock in lithium mining companies too."

"Here is the Fisker Karma after it got wet and the batteries blew up. These batteries blow up JUST FROM GETTING WET! ALL of these burned up hulks are brand new \$100,000.00+ cars that just blew up and torched

everything around them just because they got wet! How bad do you want a Fisker or Tesla now? Fisker's insurance company is balking at paying for this saying: "You knew this would happen".

These links show vast sets of Fisker electric cars that burst into flames just because they GOT WET:

There are vast sets of other links proving the point.

Look at this: We were just sent a link that our website showed up in this movie:

Here is another link to the movie at: <http://tinypic.com/r/7295hs/6>

HERE IS THE BATTERY YOU COULD HAVE BEEN SITTING ON TOP OF IN A TESLA

THIS IS THE TESLA MAGIC CARPET OF DOOM. THIS WHOLE THING IS FULL OF LITHIUM. YOUR WHOLE FAMILY IS SUPPOSED TO SIT ON TOP OF THIS!!!

TESLA HAS TO TEST THEIR BATTERIES IN a BLAST CHAMBER!!!!!!!:

IF TESLA SAYS THIS THING IS SO SAFE WHY DO THEY TEST IT IN A STEEL ENCLOSED EXPLOSION ROOM WITH WIRES COMING IN THROUGH BLAST HOLES!!!!???????

"TESLA ELECTRIC CARS HAVE 6800 CHANCES OF "GOING THERMAL".

"TESLA ELECTRIC CAR BATTERIES ARE MORE LIKELY TO BLOW UP." SAYS STANFORD ENGINEER, "USING LITHIUM ION IN AN ELECTRIC CAR DOUBLES THE CHANCES IT WILL EXPLODE OR GO THERMAL BECAUSE AN ELECTRIC CAR PUSHES IT FURTHER THAN ANYTHING ELSE. BOEING HAD MANY SAFETY CIRCUITS AND EVEN THOSE FAILED. THERE IS NO WAY THE TESLA SAFETY CIRCUITS WILL NOT EVENTUALLY FAIL "

"Tesla Electric cars have 6800 lithium ion batteries wedged into a box. This can create a repercussive thermal event that can set the whole car off. The TESLA 18650 batteries can be seen exploding in multiple YOUTUBE videos. It is NOT TRUE that they are "an entirely different battery" they are the same chemical compound that blows up."

"A direct quote from Tesla's patent application, below. Tesla KNEW this was going to happen and never adequately warned anybody. Tesla wrote these words in the federal papers they filed yet they never showed these words to any buyers :

"Thermal runaway is of major concern since a single incident can lead to significant property damage and, in some circumstances, bodily harm or loss of life. When a battery undergoes thermal runaway, it typically emits a large quantity of smoke, jets of flaming liquid electrolyte, and sufficient heat to lead to the combustion and destruction of materials in close proximity to the cell. If the cell undergoing thermal runaway is surrounded by one or more additional cells as is typical in a battery pack, then a single thermal runaway event can quickly lead to the thermal runaway of multiple cells which, in turn, can lead to much more extensive collateral damage. Regardless of whether a single cell or multiple cells are undergoing this phenomenon, if the initial fire is not extinguished immediately, subsequent fires may be caused that dramatically expand the degree of property damage. For example, the thermal runaway of a battery within an unattended laptop will likely result in not only the destruction of the laptop, but also at least partial destruction of its surroundings, e.g., home, office, car, laboratory, etc. If the laptop is on-board an aircraft, for example within the cargo hold or a luggage compartment, the ensuing smoke and fire may lead to an emergency landing or, under more dire conditions, a crash landing. Similarly, the thermal runaway of one or more batteries within the battery pack of a hybrid or electric vehicle may destroy not only the car, but may lead to a car wreck if the car is being driven or the destruction of its surroundings if the car is parked."

"WTF!!!!!!

Tesla's own staff have now admitted that once a lithium ion fire gets started in one of their cars, it is almost impossible to extinguish burning lithium ion material. This is Tesla's own words in THEIR patent filing, (You can look it up online) saying that the risk is monumental. Tesla has 6800 lithium ion batteries, any one of which can "go thermal" and start a chain reaction! If you look at all of the referenced YOUTUBE movies you will see how easy it is to set these things into danger mode."

"Imagine a car crash with a Tesla where these 6800 batteries get slammed all over and then exposed to rain, fire hose water, water on the roads, cooling system liquid.. OMG!! And then if, in that same accident the other car is a gasoline car... getting burned alive sounds "BAD"! Tesla is covering up the problems with its batteries."

"Lithium ion batteries have already crashed a UPS plane and killed people. Look here:

<http://washingtonexaminer.com/dreamliner-fires-spark-new-doubts-about-a-green-energy-technology/article/2519353> "

More Lithium Ion Battery disasters: <http://www.forbes.com/sites/petercohan/2013/01/24/is-787s-lithium-ion-battery-hazardous-to-boeings-health/>

"AS A DEMONSTRATION OF HOW DANGEROUS LITHIUM IS, NASA IS GOING TO MAKE IT BURN IN OUTER SPACE:

"If you're along the Eastern Seaboard tonight, it might be worth your while to look at the sky this evening. NASA's Wallops Flight Facility is scheduled to launch a sounding rocket that will release "two red-colored lithium vapor trails in space."

As Space.com reports, those trails might be seen across the Mid-Atlantic and perhaps as far north as Canada and as far south as

northern Florida. Space.com explains how these trails will produce a "night sky show:"

"The sounding rocket that will be used to create the two NASA-made glowing cloud trails will be a Terrier-Improved Orion. In this technology test launch, two canisters in the rocket's payload section will contain solid metal lithium rods or chips embedded in a thermite cake. The thermite is ignited and produces heat to vaporize the lithium.

"Once the vapor is released in space, it can be detected and tracked optically. The rocket will eject two streams of lithium which will be illuminated at high altitudes by the sun (which will be below the local horizon at ground level)."

In a statement, mission project manager Libby West said the launch is a test flight for two upcoming missions. It'll give scientists a view of two different methods for creating lithium vapor trails. By the way, NASA says the "lithium combustion process poses no threat to the public during the release in space."

If lithium is so dangerous it will even burn in space, why are we putting it in our airplanes and cars???????

Lithium Ion batteries blow up and burn down commercial building:

<http://westhawaiiitoday.com/sections/news/nation-world-news/787-battery-blew-%E2%80%99906-lab-test-burned-down-building.html>

"Tesla and Fisker have only sold a few hundred cars, (thank god) because nobody but dicks want these overpriced eliteist toys. A regular car company sells hundreds of thousands of cars per model. Every single Tesla or Fisker sold increases the likelihood of a burn up. Those burn-ups will affect the homes, cars and lives of the people next door who never even bought one."

"Go to <http://www.youtube.com> and type into the search window:

"Lithium ion explosion" or "lithium battery and water" or "lithium ion water" and any related derivation and you will hundreds of videos about how dangerous these batteries are. There are numerous videos of Tesla's 18650 batteries blowing up."

"This article in the LA Times sheds more light of the horrors of Lithium Ion:

<http://articles.latimes.com/2013/jan/18/business/la-fi-dreamliner-battery-20130119> "

"Lithium Ion batteries "go thermal" in peoples pockets, in your notebook, especially in your Tesla and Fisker car and everywhere else. There are thousands and thousands of articles documenting this and there is a cover-up by the VC's that fund these things to keep this fact out-of-sight.

Making Lithium Ion batteries poisons the workers who make them. It is a dangerous product. Each time the workers, particularly in Asia, realize they are being poisoned by the factory, they jack up the product. Outlaw lithium ion batteries. Demand a recall."

There are PLENTY of other energy storage solutions that do not involve the highly compromised Lithium Ion chemistry!"

"Below are a few samples of HUNDREDS of videos proving that Lithium Ion Batteries JUST BLOW UP. This is why TSA does not want them, or liquid, on planes."

Report: Galaxy S 4 Lithium Explosion Burns Hong Kong Home To The Ground:

• By Stephanie Mlot

A Hong Kong couple have been displaced after an exploding Samsung Galaxy S 4 smartphone burst into flames, burning their house to a crisp.

The man, identified in the original Xianguo.com report only as Mr. Du, claims that his phone, battery, and charger were all legitimate Samsung products, but that's now difficult to confirm since his home and everything in it were destroyed.

According to the translated report, Du sat on the living room sofa playing the game "Love Machine" on his charging GS4 when it suddenly exploded. In the heat of the moment, he threw the device onto the couch, which caught fire. The flames then spread to the curtains and the rest of the house, "out of control," Xianguo said.

Du, his wife, and his dogs managed to escape the house unscathed; neighbors were temporarily evacuated as firefighters fought the flames. Almost all of the couple's furniture and appliances burned to ash, the news site said, adding that their Mercedes parked outside was also damaged.

Whether or not the true cause of an entire house fire was a singular 5-inch smartphone remains to be seen, though a fire department investigation initially resulted in a report of "no suspicious circumstances."

Samsung did not immediately respond to PCMag's request for comment, but told Xianguo that it will "carry out detailed investigations and tests to determine the cause of the incident." Last year, a Galaxy S III owner in Dublin was driving in his car when the device caught fire. Cell phone safety is increasingly becoming an issue in Asia, where two cases of iPhone shock occurred within a week of each other this month. On July 11, a 23-year-old flight attendant with China Southern Airlines was allegedly electrocuted when she took a call on her Apple device while it was charging. She was reportedly using the original charger when she was killed.

Here is what the Lithium Ion Batteries did to their home:

Boeing 787 Dreamliner woes put spotlight on lithium ion battery risks

BY KEN BENSINGER, Los Angeles Times

Chances are the same kind of battery that twice caught fire in Boeing 787 Dreamliners in recent weeks is in your pocket at this very moment.

Lithium ion batteries, small and powerful, have become the electricity storage device of choice. They are everywhere — in cellular phones, laptops, power tools, even cars. They allow us to talk, email and drill longer than ever possible in the past.

But the incidents that led to the grounding of the 787 fleet worldwide, and the decision by Boeing on Friday to temporarily halt all deliveries of the plane, have highlighted a troubling downside of these energy-dense dynamos: their tendency to occasionally burst into flames.

FOR THE RECORD: Dreamliner batteries: An article in the Jan. 19 Section A on lithium ion battery safety and the grounding of the Boeing 787 incorrectly described a fire in a Chevrolet Volt automobile. The battery did not ignite spontaneously; instead it burned after a crash test damaged the vehicle's cooling system and the test car was left parked with the battery fully charged, eventually causing it to overheat. With investigators now working to determine the cause of the incidents, one on a Dreamliner on a Boston runway, the other forcing an emergency landing of a 787 in western Japan, the larger question of lithium ion safety has snapped into focus.

"Every battery can burn and every battery can be flammable," said Mike Eskra, a Milwaukee-based battery development scientist who also works as a battery fire investigator for insurers. "But lithium ion batteries are more dangerous because they store more energy. It's like a firecracker instead of a stick of dynamite."

The casualty list is long. In recent years, tens of thousands of laptop batteries have been recalled due to the risk of fire or explosion. The 400-pound lithium ion battery on General Motors' cutting-edge electric car, the Chevrolet Volt, burst into flames seemingly spontaneously while parked in 2011. And investigators blamed a cargo hold full of lithium ion batteries for a fire that caused a UPS-operated 747 to crash shortly after takeoff from Dubai in late 2010.

That crash, which killed both pilots, is one of more than 100 incidents recorded by the Federal Aviation Administration linking lithium ion batteries to onboard fires over the last two decades. This month, new rules took effect limiting the transport of lithium ion batteries in aircraft. And the FAA had long prohibited use of the technology in commercial airplanes.

That changed in 2007, when it granted Boeing permission to use the batteries in the 787 under a number of conditions to ensure safety. For Boeing the lithium ion advantage was clear.

Thanks to their chemistry, the rechargeable batteries can store as much energy as a nickel metal hydride pack that's 50% heavier, while charging and discharging faster than other battery types. That's made them attractive for military applications such as the B-2 bomber and also for use on the International Space Station and the Mars Rover.

Lithium ion batteries enabled Boeing to swap out heavy hydraulic systems in the airframe for lightweight electronics and electric motors to operate systems like wing de-icers. That's a key reason the Dreamliner burns 20% less fuel than other wide-body aircraft.

The weight and power savings are exactly what made lithium ion batteries popular in other applications. In excess of 95% of mobile phone batteries worldwide are lithium ion, and without lithium ion, laptops couldn't run anywhere near as long as they do without a recharge.

"They completely dominate the consumer market," said Vishal Sapru, energy and power systems research manager at consulting firm Frost & Sullivan in Mountain View, Calif.. He estimates that global sales of lithium ion batteries reached \$14.7 billion last year, up from \$9.6 billion in 2009, a 53% increase. Sapru expects the market to soar to \$50.7 billion by 2018. "No other battery chemistries are growing at that rate."

But lithium ion also has downsides. The batteries tend to have shorter life spans than older, more proven battery technologies. And although the price is falling, lithium ion is still more expensive than other batteries. Although some carmakers have embraced the technology, others, such as Toyota, have decided against it. Several makers of lithium ion auto batteries for electric vehicles have filed for bankruptcy last year because of weak demand.

Safety experts also have concerns. Because lithium ion batteries can store more energy, and discharge it more quickly, than other batteries, lithium ion cells can get much hotter than other technologies in the event of an overcharge or the external application of a heat source. Larger applications, such as the 63-pound batteries on the 787, incorporate multiple cells and the heat can spread rapidly from cell to cell, a chain reaction called "thermal runaway."

And while other types of batteries use a water-based electrolyte in each cell, lithium ion relies on a highly flammable solvent. When heated up, that solvent tends to vaporize, spraying the burnable gas into the surrounding air. As a result, lithium ion battery fires burn extremely hot, as high as 2,000 degrees Fahrenheit.

Those conditions were blamed for an explosion at a General Motors battery testing lab last April that caused \$5 million in damage and sent one person to the hospital. GM said flammable gas had vented from an experimental lithium ion battery that heated up during extreme testing.

"Lithium ion is very controversial in the safety engineering space," said Brian Barnett, vice president for battery technology at Tiax, a technology firm in Lexington, Mass. He spoke last month at a conference on battery safety in Las Vegas, where more than three-quarters of the presentations focused on lithium ion batteries.

The cause of the fires in the two Dreamliners has still not been determined and neither Boeing nor the Japanese company that made the batteries, GS Yuasa, have publicly commented on likely factors. Boeing subjected the

batteries on the plane to thousands of hours of testing and installed numerous safety systems specific to the batteries.

"We have high confidence in the safety of the 787 and stand squarely behind its integrity as the newest addition to our product family," Boeing Chief Executive Jim McNerny said Friday.

Barnett and others emphasize that it's not uncommon to see problems in relatively new technologies. But they add that most lithium ion fires are caused by an external problem, such as a bad circuit or a software glitch that leads to overcharging. Another common problem in consumer electronics is the use of low-cost wiring and other components that can overheat and spark or catch fire next to the battery itself.

Eskra, the battery fire investigator, said he's seen fires started by Chinese-made toys that use lithium ion batteries hooked up to chargers designed for nickel cadmium or nickel metal hydride batteries. Manufacturing errors, including allowing tiny metal particles to contaminate cells, can cause dangerous shorts, although they are exceedingly rare.

"Somebody tried to cut corners somewhere," he said, noting that most lithium ion fires are caused by a tiny part that malfunctioned somewhere along the line and are easily resolved. "It's a \$2 fix, but it takes half a million dollars in research to

figure out what it is."

Sometimes the problem is more persistent. In 2006, Sony announced a global recall of more than 10 million lithium ion laptop batteries used in a variety of laptop computers after more than a dozen fires, and two years later issued a second recall.

"This is a battery type that is only one of hundreds of possible batteries but this particular type was pushed by a few companies and investors so they could make money off it at the risk of public injury or death..."

LITHIUM ION BATTERIES BLOW UP THE VEHICLES THEY POWER

By Carli Brosseau Arizona Daily Star

When a test of a lithium-ion battery charger turned into an inferno at Securaplane Technologies Inc. in 2006, temperatures reached as high as 1,200 degrees and three waves of firefighters failed to save the building. An employee of the Oro Valley company blasted the flaming battery with a fire extinguisher to no effect. Two hours later, the galvanized metal roof collapsed, and the 10,000 square-foot building was a total loss.

It's a fire that federal safety regulators are taking another look at now, since Securaplane provides two key battery components to the Boeing 787 Dreamliner, the start-power and battery-charger units. Records from local Golder Ranch Fire Department, the first of three fire departments to respond to the blaze, describe "an uncontrolled thermal reaction (that) caused the battery to vent and this venting caused the ignition to various items and fixtures throughout the test lab area."

"The electrical technician who was performing a test on the battery when it exploded likened the experience to being near a jet after-burner. Electrolytes from inside the battery were shooting 10 feet into the air, the former Securaplane employee, Michael Leon, said in an interview Friday. "The magnitude of that energy is indescribable."

"The fire stands as a graphic illustration of the power stored within energy-dense lithium-ion batteries and the potential consequences if something goes awry. It also highlights the importance and delicacy of the quality-control measures applied to a novel - and potentially explosive - technology, a technology now allowed, under special conditions, to be used as the main and auxiliary power source of certain aircraft.

The Boeing 787 Dreamliner, the company's newest and most energy-efficient plane, uses two lithium-ion batteries. After two battery-related incidents in the past month, the 50 Dreamliners distributed so far have been grounded."

"Whistleblower: Dreamliner LITHIUM ION Batteries Could Explode

He says he was fired after warning about battery problems

By Christopher Freeburn, InvestorPlace Writer

Boeing's (NYSE:BA) new 787 Dreamliner could end up being a nightmare for the aircraft giant.

A former senior engineering technician at Securaplane Technologies, which makes the charging system for the lithium-ion batteries used in 787 Dreamliners, told CNBC that the batteries are defective and liable to explode if they overheat."

"Lithium-ion batteries are heat intolerant, according to a potential whistleblower familiar with...

Lithium-ion batteries are heat intolerant, according to a potential whistleblower familiar with their technology. "Too much heat on those things,

they will go into a thermal runaway, they will explode." The informant, a former senior engineering technician of Securaplane Technologies, was fired in 2007 for repeated misconduct, but he says it was in retaliation for voicing concerns about the batteries. The NTSB acknowledges that the lithium-ion batteries in Boeing's (BA) Dreamliner experienced a thermal runaway, but insists there's no connection between the incident and the whistleblower's claims. "

"The Japan Transport Safety Board makes a number of interim points. This battery, unlike one that burst into flames in a Japan Airlines 787 earlier in

January, did not actually ignite. It experienced a thermal runaway, as a result of a build up of heat, yet the materials affected did not start burning. While the semantics might escape the casual observer the safety investigator said:-

"The battery was destroyed in a process called thermal runaway, in which the heat builds up to the point where it becomes uncontrollable.

"But it is still not known what caused the uncontrollable high temperature".

In simple language, uncontrollable rises in temperature will if uncontrolled most likely result in a fire, including one that can burn through structural composites and alloys, and prove almost uncontrollable by fire fighters, even on the ground.

It took a Boston airport fire brigade detachment 99 minutes to put out the Japan Airlines fire using equipment unavailable if the airliner was hours away from an emergency landing strip in the high arctic or north Pacific, which that particular flight had only recently traversed before the fire broke out after landing.

he Japan air safety investigator said the wire supposed to ground or discharge static electricity build ups in the battery had been severed meaning it had experienced abnormal levels of current.

However as also confirmed by the early stage of the US incident investigation into the Japan Airlines fire, this large lithium-ion battery had not experienced a voltage surge, and had so far as flight data recordings could tell, had been operating normally immediately before the emergency landing.

Expect the news release in Japan to cause more tension between those who want the 787s to fly again pending a full understanding of the causes and cures in these incidents, and independent safety investigators who will recommend to safety regulators like the FAA a continuation of the grounding"

Death By Tesla

By Susan Johnlo For Web Times (Based on actual events)

The sun glistened off the sleek futuristic body of the six figure Tesla sports car as it careened around the next curve of the beautiful Malibu coastal highway.

Below, the Pacific Ocean spread out to the horizon in an endless carpet of blue, undulating waves and sparkling wonder.

Nickleback was blaring from the speakers of the car, the driver's hair was tossed in the wind, his popped collar was flapping in the high speed rush of air and his Ray Bans barely hid his I-own-the-world feeling of delight in the moment.

Then the gates of hell opened up...

The car suddenly swerved, it dived straight off the cliff. Did the driver smell the smoke, or see the flames first? We may never be sure.

Was the, notoriously, hackable Tesla suddenly taken over by Chinese hackers, who had found his car IP address on the internet? That is another question that has yet to be resolved.

What is certain, is the horrific death that then followed. As investigators, safety engineers and fire officials detail the sequence of events, the results require a warning to readers: Do not read further if you have a weak stomach –

First, lithium ion battery number 862, in the floor pan of the car, experienced the collapsing housing of the lightweight aluminum box housing that surrounded it. The collapsing metal pierced the skin of the first battery. This was caused by the first rock that the lower corner of the Tesla floor pan slammed into.

The rapid compression, and distortion of the 3 inch long Tesla battery caused that battery to buckle and forced the metal compounds inside, the lithium ion core battery chemicals, to experience the force as a pyrotechnic trigger. This, then caused that battery to release vapors, while at the same time, igniting those vapors like a little hand-grenade.

This battery had just been struck, ignited and exploded, and in that fire and explosion it was releasing gases which the driver was inhaling in his last moments of life. Those gasses have been publicly documented by The FDA, OSHA, Panasonic, and hundreds of other laboratory-grade facilities, to be the cause of cancer, liver damage, neurological damage, fetal damage and other deadly health issues.

If this driver had not been killed by the fire and explosions, he would have had a longer, slower set of lethal issues to contend with.

Back to battery number 862; a few milliseconds after battery number 862 experienced the catastrophic explosion, battery number 863, right next to it, experienced the same devastating failure. This was followed by battery number 864, then number 865, then number 866, milliseconds apart. A chain reaction of self-igniting thermal hell was underway and no fireman could stop it now, nor, could they stop it after the crash.

The unstoppable nature of this lithium ion battery fire, set Malibu Canyon, itself, on fire.

So these flashlight-type batteries, that every Tesla driver is sitting on top of, are going off like military grade incendiary devices, during this crash, one-after-the-other.

These flashlight batteries were never made to be used in cars. Safety engineers say that Elon Musk's decision to use these batteries, in this way, was based on rapid profit exploitation, and not on proper engineering.

Be that as it may, we are now mid-way through the slow motion movie of this crash. The batteries are exploding, one after the other, the car is plowing through the rocks and debris as it dives off the cliff. But the horror has only begun. How many batteries do we have to watch explode in this single vehicle? **NEARLY 8000 EXPLODING BATTERIES.**

Let us stop and consider this fact.

Where only one in 40 gasoline tanks, in each regular car accident, ever explodes. Here, in one car, you have nearly 8000 possibilities of an explosion AND each battery, that explodes, has an extremely high likelihood of setting off, all the rest, in a chain reaction. Do you like those odds? You have a 400% better chance of winning the lottery.

In our slow motion analysis, we have only crossed the half-way point in the accident. The front of the car is crumpling, the heavy batteries are being thrown upwards, through the floor of the car, to cover the driver in exploding lithium metal particles, and the cockpit of the car is filling up with some of the most toxic fumes you can legally produce.

Still, the worst is yet to come.

The special alloys, which Tesla decided to make its car out of, turn out to interact with the exploding batteries to cause an effect called alloy conflagration. The very metal of the Tesla car has now been set on fire by the massive heat from these exploding batteries. The car has turned into the public version of a military phosphorous bomb, one of the most hideous military weapons of all time. This burning metal composition is worse than napalm, it can burn all the way through your face, your skull, and any bones in your body. It is a fire that almost nothing can extinguish.

Molten, flaming metal is dripping on the driver and it is coming from every side of the car, surrounding him in a fireball of deadly metal lava.

The car has finally come to a rest in a fireball. The driver is consumed in a nightmare of fire, dripping molten metal and deadly toxic smoke. The pain is beyond comprehension.

He is, in the same moment, burned to death, asphyxiated and entombed in red hot liquid metal.

The resulting fire, in the Canyon, is, at first, unstoppable and threatens the entire community of homes.

The first responder's attempts to douse the car fire, only make it worse! Water, it turns out, makes lithium ion batteries explode all over again. The car has been filled with a type of battery that mere bumps, and water, can cause to explode. Let me repeat this for emphasis: **WATER MAKES LITHIUM ION BATTERIES EXPLODE.** Not only does water not put out lithium ion fires, **IT MAKES THEM WORSE!**

Hours later, after the car has burned itself out, the first responders try to recover the body.

The problem is, they can't recognize a body. The driver has been burned into an unrecognizable lump of melted plastic, molten metal and human flesh.

His lovely drive down the coast ended in a horror as awful as any nightmare midnight movie.

So this use, of this battery, in this way, was decided by the very Senators and billionaire campaign investors who owned the stock in this battery. If you wonder why a deadly choice, like this, was made about a battery that already had all of these dangers fully documented, on federal record; the answer can be found in one word: **Corruption.**

This massive oversight, putting the public at such risk, took place because a kick-back scheme was created by Mr. Musk, and his campaign finance partners. They chose greed, over scientific facts. Those chose mining commodity deals, and expediency, over proper engineering. They chose corruption, over anything else.

So, when you buy a Tesla, you need to think about your own safety and the safety of the American political system. Consider not supporting corruption and consider supporting the safety of yourself and your family: Buy an Audi!

"One aspect that may confuse some people relates to the decision to use this particular type of battery. The danger posed by it has been evident by a lengthy and documented list of disturbing events in recent years. They include many thousands of batteries used in laptops being recalled, because of

determined risks of fire or explosion. General Motors were also placed in the battery limelight. In 2011, the 400 pounds Lithium ion battery in their Chevrolet Volt apparently was subject to spontaneous combustion when it burst into flames, while reportedly in a parked vehicle. In 2010, a UPS-operated Boeing 747 crashed just after take-off from Dubai. Investigators placed the blame on a cargo hold that contained Lithium ion batteries, for a fire that caused the incident."

A number of incidents of cell phones with lithium ion batteries blowing up in peoples pockets, notebook computers blowing up in peoples briefcases and other shocking fires have been deeply documented.

FISKERS CARS BLEW UP AND BURST INTO FLAMES JUST BECAUSE THEIR LITHIUM ION BATTERIES GOT WET

"Here is where they make some of these batteries, in forced labor camps:

<http://www.thedailybeast.com/newsweek/2013/01/13/china-s-labor-pains.html> Because, as we all know, chinese prostitutes are the best choice to make the things that keep our airplanes in the air and our cars on the road. The silicon valley venture capital guys front these batteries because they have such cheap labor to give them great profits.. quality control? not so much..."

Elon Musk and the Senators he owns: Pelosi, Harris and Feinstein, will lie, until their dying day about these batteries that they all own stock in! -

--- Lithium ion batteries: Cause wars, rape and genocide in the Congo, Afghanistan and Bolivia from the corrupt mining deals involved with mining lithium and cobalt; are insider trading-owned by ex-CIA boss Woolsey and DOE Boss Chu; excrete chemicals that mutate fetuses when they burn; destroy your brain, lungs and nervous system when they burn; kill the factory workers who make them; cause Panasonic to be one of the most corrupt companies in the world; poison the Earth when disposed of; can't be extinguished by firemen; poison firemen when they burn; are based on criminally corrupt mining schemes like URANIUM ONE; Have over 61 toxic chemicals in them; come from an industry that spends billions on internet shills and trolls used to nay say all other forms of energy; are insider-trading owned by corrupt U.S. Senators who are running a SAFETY COVER-UP about their dangers.

---- Apple products with lithium ion batteries have been exploding and setting people on fire; over time the chemical dendrites inside each battery grow worse and increase the chances of explosion as they age

– LITHIUM ION BATTERIES BECOME MORE AND MORE LIKELY TO EXPLODE AS TIME GOES ON AND AS THEY AGE; "Bad Guys" have figured out how to make them explode remotely; have their dangers hidden by CNN and MSM because pretty much only the DNC people profit from them; are the heart of Elon Musk's stock market scam.

---- The Obama Administration promised Silicon Valley oligarchs the market monopoly on lithium ion batteries and the sabotage of fuel cells in exchange for campaign financing and search engine rigging; United States Senators that are supposed to protect us from these deadly products own the stock market assets of them so they protect them and stop the FDA, OSHA, DOT and NHTSA from outlawing them. WRITE YOUR ELECTED REPRESENTATIVE AND DEMAND THAT LITHIUM ION BATTERIES BE MADE ILLEGAL TO SELL! NiCAD and Hundreds of

other battery chemistries DO NOT have all of these problems but Lithium Ion batteries get a monopoly because of politician insider trading ownerships.

---- A recent fire on U.S. Highway 101 near Mountain View, CA, burned the driver alive and killed him. In Florida two kids died in a Tesla, burned alive, screaming in agony. A man died in agony in a Tesla crash in Malibu that set Malibu Canyon on fire. A young woman, at the start of life, and her boyfriend were burned alive in their crashed Tesla.

---- There are many more deaths and crashes than you have heard about. The deaths and the cover-ups are endless. Senators Dianne Feinstein, Harry Reid, Nancy Pelosi, Kamala Harris and their associates own the stock in Tesla Motors and/or its suppliers and mining companies and they cover-up and halt investigations and laws designed to save the public. They, and their crony's, spend over \$1B a year to shill and troll hype about lithium ion batteries and cover-up the dangers. Lithium ion EVs are more prone to battery fires. Experts say that their lithium-ion batteries can fuel hotter fires that release toxic fumes and are more difficult to put out.

---- Lithium ion fires keep reigniting which explains why it takes so long and requires copious amounts of water or foam (it is an electric fire, after all) to smother the flames. Tesla employee Bernard Tse and his team warned Elon Musk about these dangers in 2008 and they got fired and/or warned to "say nothing" by Musk. Three top Tesla engineers died in a plane crash next to Tesla offices in San Carlos after two of them agreed to become whistle-blowers. Elon Musk exists because he bribed DNC politicians and Senators Feinstein, Reid, Boxer, Harris, Clinton and Pelosi to give him free taxpayer cash and government resources from the Dept. of Energy and the Calif treasury.

---- DOE has been covering-up organized crime activities at DOE in which DOE funds are being used as a slush-fund to pay off DNC campaign financiers and to pay for CIA/GPS Fusion-Class attacks on Silicon Valley business competitors of those DNC campaign financiers who DOE staff share stock market holdings with. Elon Musk is a criminal, a mobster, an asshole, a bald fake-hair wearing, plastic surgery-addicted, douchebag, woman-abusing, sex addicted, tax evader.

---- Musk exploits poor people and child slaves in the Congo and Afghanistan to mine his lithium and Cobalt. Musk spends billions per year to hire Russian trolls, fake blogger fan-boys and buy fake news self-aggrandizement articles about himself. Musk thinks he is the 'Jesus' of Silicon Valley. Fake News manipulator Google is run by Larry Page and Larry is Musk's investor and bromance butt buddy.

---- Musk uses massive numbers of shell companies and trust funds to self-deal, evade the law and hide his bribes and stock market insider trading. A huge number of Tesla drivers have been killed; pedestrians and oncoming drivers have also been killed, and Musk covers it up.

---- The DNC and the MSM refuse to allow any articles about Musk's crimes to be printed because they benefit from Musk's crimes. Musk has been professionally diagnosed as a 'psychotic narcissist.' A 'Silicon Valley Mafia; cartel of frat boy sociopath venture capitalists like Steve Jurvetson, Tim Draper, Eric Schmidt, et al; threaten those who do not support the cult of Tesla or their political candidates.

---- In EVERY blog that you read that mentions 'Musk', at least 1/3 of the comments have been placed their by Musk's paid shills. Musk holds the record for getting sued for fraud by his investors, wives, former partners, employees, suppliers and co-founders.

---- Elon Musk has gone out of his way to hire hundreds of ex-CIA staff and assign them to "dirty tricks teams" to attack his competitors and elected officials who Musk hates. Musk never founded his companies. Musk's "Starlink" satellites are domestic spy and political manipulation tools – never get your internet from one. Musk stole Tesla in a hostile ownership take-over from Marty the true inventor of the Tesla.

---- The Facebook – Meta – Google – Alphabet – Netflix, et al, coordinated news manipulation and domestic spying that they engage in; the hiring of Fusion GPS – Black Cube – Gizmodo/Gawker assassins; the destruction of the housing market by their mass real estate manipulations; patent theft and industrial espionage; and the bribery of almost every politician all the way up to the Oval Office.

Elon Musk's Electric Car Batteries Made By Forced Labor Overseas

Increasing ties have been found between the origin of the batteries needed to power the technology and forced labor in Chinese work camps.

Jarryd Jaeger Vancouver, BC

As many environmentalists push for a quick transition to electric vehicles and clean energy, increasing ties have been found between the origin of the batteries needed to power the technology and forced labor in Chinese work camps.

One province in particular, Xinjiang, is facing mounting criticism as more details emerge surrounding working conditions for members of the Uyghur Muslim minority. According to the New York Times, while China produces 75 percent of the world's lithium ion batteries, much of the raw material is mined elsewhere. In recent years, however, the Chinese government has set their sights on controlling all aspects of the supply chain.

In order to compete with other countries, China has ramped up production in the western province of Xinjiang, home to the nation's Uyghur Muslim minority.

As the Times reports, companies such as Xinjiang Nonferrous Metal Industry Group have partnered with the Chinese government to move hundreds of Uyghurs from the south to the industrialized north where they are put to work in mines, smelters, and factories producing lithium, nickel, manganese, beryllium, copper and gold.

While such companies deny that their workers are mistreated, reports show that Uyghurs are subject to what could easily be deemed to be forced labor.

Uyghurs who refuse to work in accordance with Chinese government policies are often sent to internment camps, and in May it was revealed that many of those camps have a "shoot-to-kill" policy for those who attempt to escape.

Thus, the official claim that "all employment is voluntary" is not supported.

In addition to forced labor, Uyghurs are also subjected to re-education, wherein government-appointed "teachers" attempt to create loyal subjects to the nation and communist regime.

On June 21, a new law will go into effect in the United States called the "Uyghur Forced Labor Prevention Act." As NPR reports, it gives the US authority to seize goods produced in Xinjiang unless companies can prove they did not engage in forced labor practices.

It's true that doing so will be resisted by Democrats who don't want to slow the deployment of solar panels and electric cars in the US, and be resisted by free market Republicans, but the evidence is clear and this is becoming a moral and national security imperative.

— Michael Shellenberger (@ShellenbergerMD) June 20, 2022

Environmental realist, author, and California gubernatorial candidate Michael Shellenberger is one of many calling on the Biden administration to go one step further and ban the importation of all goods from Xinjiang. He says the US should instead focus on manufacturing green technology at home.

As he points out, however, the decision would face pushback from both Democrats "who don't want to slow the deployment of solar panels and electric cars in the US," and "free market Republicans."

The world has shone a spotlight on the Chinese government's treatment of the Uyghurs in Xinjiang, but it remains to be seen whether the Communist Party and the companies to which it is so closely tied will change their practices.

Blame Lithium Batteries for Samsung Note 7 And Tesla Motors Fires

A major recall of Samsung Galaxy Note 7 phones could also be a wakeup call for manufacturers and consumers about lithium-ion (Li-ion) batteries.

"My brand new Note 7 exploded this morning while I was still asleep, it was plugged in and charging." So begins a Reddit post from a user in Australia, detailing how a Samsung Galaxy Note 7 caught fire in a hotel room -- causing \$1,800 in damage.

An image of a damaged Samsung Galaxy Note 7 shows that the overheating began at the center of the Li-ion battery.

(Source: Reddit user -- Crushader)

The Reddit post, made in September, was the first noted case in Australia but it would be far from the last in the world. According to the US Consumer Product Safety Commission, beginning in mid-September Samsung received 96 reports of Note 7 phones overheating, of those 13 resulted in burn injuries and 47 in some type of property damage.

On Sept. 15, Samsung initiated a recall of the Note 7, offering to replace units for customers. But in early October the Note 7 made its biggest headlines when a replacement model phone started emitting smoke on a Southwest Airlines flight from Louisville to Baltimore. Airlines subsequently banned the Note 7 from flights and Samsung would go on to recall all of its Note 7 models, including the replacements -- a total of 1.9 million phones, according to the US Consumer Product Safety Commission.

Initially Samsung stayed quiet on what was causing the phones to overheat, but after dozens of pictures of burnt out Note 7s were posted online, Internet sleuths were able to figure out the problem. Noting where the burn marks appear, a technology reviewer on YouTube who goes by the name JerryRigEverything deduced that the failure was happening with the phone's lithium-ion battery itself and not with the charging port or any part of the motherboard, which were also potential points of failure.

South Korea-based Samsung has since acknowledged that the problem is with the battery but hasn't gone deep into specifics. However, Bloomberg obtained documents from Korea's Agency for Technology and Standards saying the overheating was being caused by a lack of insulation between the battery's positive and negative electrodes, which created a short. Chris Robinson, research analyst at Lux Research, told Design News that battery shorts like this are common, but there could be more to these Samsung incidents. "A battery short is a common mode of failure, which results when electrical contact is made between the positive and negative electrodes. This oftentimes is caused by a manufacturing defect, such as a contaminant getting into the manufacturing process, but in this case there may be more to the Samsung story," Robinson said via email. "The replacement batteries started catching fire, which could indicate a larger problem with the design of the handset."

Measuring Battery Life in IoT devices. Many devices used in IoT applications must run on battery power for extended periods of time. To support this, complex power management is required and verifying the effectiveness of these techniques requires specialized testing techniques. Learn more at ESC Silicon Valley, Dec. 6-8, 2016 in San Jose, Calif. Register here for the event, hosted by Design News' parent company, UBM.

Of course, the Note 7 is only the latest in what has been a series of recent lithium-ion-related issues in consumer products. Back in 2012 the Fisker Karma was recalled because of battery overheating issues. In 2013 a Tesla Model S caught fire, revealing a design flaw in which the vehicle's battery pack wasn't properly shielded against road debris that could potentially puncture it. And just last Christmas the hottest item on the shelves -- the hoverboard -- had its hype train derailed when reports started surfacing of shoddy knockoff products with defective lithium-ion batteries catching fire.

It really brings to question why we rely on such a potentially volatile solution for our battery needs. But Robinson said that issues with lithium-ion batteries do not happen at random. "These incidents are problems given how much we use electronic devices and the severity of the fires, but Li-ion batteries can be made safe. However, with Li-ion battery fires there is almost always a reason why they catch fire -- it's not just a random event," he said.

"Considering the hoverboard fires, they were caused by mostly Chinese Li-ion manufacturers with poor quality control and no established track record of making volumes of batteries, who hoverboard manufacturers turned to as Li-ion demand increased ahead of rushing these products to market ahead of the holiday season. Fisker battery fires were caused by coolant leaks which led to batteries overheating, and several Tesla fires were related to external damaging of the battery from debris or a crash."

READ MORE ABOUT LI-ION BATTERIES ON DESIGN NEWS:

- [Choosing Between Supercapacitors and Li-ion Batteries in Industrial Applications](#)
- [Thin-Film Coating Boosts Lithium-Ion Battery Performance](#)

"The key component which prevents shorting, a major failure mode of batteries, is the separator," Robinson said. "Many use a polymer separator, but ceramics have been of some interest to the industry for improved safety and durability. However, these add weight and cost to the battery, which is why most companies forego their use." He suggested that, moving forward, these types of separators may become more attractive to companies looking to increase product safety. Next-generation chemistries, things like solid-state batteries, could also be an option. "This also could allow for improved energy density," Robinson said. "But these batteries are not manufactured at the large scale required to supply cell phones, and also add significant costs.

Right now, despite any risks, Li-ion batteries are still the best choice for consumer products and electric vehicles since they offer the best balance of energy and power density and lifecycle. "Previous chemistries, primarily NiMH batteries, could only offer about half of the performance relative to size and weight that Li-ion batteries can provide." Robinson said.

However, as consumers demand products that are not only higher performing but also increasingly light and thin, we may be putting a greater burden on OEMs as far as ensuring product safety. Cramming a battery into a smaller and smaller space while still demanding more power and performance also opens the door for the sort of incidents seen with the Note 7. The Note 7, for example, is Samsung's lightest and thinnest Note model yet (by a small margin), but also has more sensors, a better camera, and more hard drive storage space.

"As manufacturers push for lighter and thinner phones that does make both the battery and system design more difficult," Robinson said. "Batteries must be kept fairly cool to prevent thermal runaway, which leads to fires, and increasingly small space make this difficult. Furthermore, on the cell level, manufacturers try to use the thinnest and cheapest separators as possible, since they add weight, volume, and price to the cell."

BIDEN AND OBAMA PROMISED THEIR BIG TECH POLITICAL FINANCIERS EXCLUSIVE ACCESS TO THE ELECTRIC VEHICLE MARKET AND LITHIUM ION BATTERY MINES

...IT ALL BLEW UP IN THEIR FACES

Fewer people are buying electric cars — the slowdown hints at a problem at the heart of America's EV push. NurPhoto/Getty, Tyler Le/BI © NurPhoto/Getty, Tyler Le/BI

Biden and Obama ordered their Department of Energy to sabotage hydrogen fuel cell cars because they obsolete lithium ion cars. That turned out to be a huge disaster for Biden and Obama!

Electric vehicles were supposed to be inevitable. Two years ago President Joe Biden climbed behind the wheel of a beefy white electric Hummer to tout his plan to make half of all new cars sold electric by 2030. The following year Congress passed the Inflation Reduction Act, which created a bevy of incentives for drivers to buy electric and for automakers to invest in EVs. That set off a flurry of new projects: EV plants, battery-manufacturing facilities, and mining operations began popping up. By the end of 2022 the situation looked promising: More and more Americans were going electric, and soon everyone would be driving an EV, reducing emissions in the process.

The transition to an all-EV future seemed like a slam dunk. It would not only give the government a highly visible way to show it's fighting the climate crisis but boost the economy through new jobs and investment. But the electric-vehicle takeover has hit some serious roadblocks.

Sure, sales of EVs keep going up — a record 300,000 cars sold in the US in the third quarter of 2023 were electric — but the pace of adoption has markedly slowed, and analysts have suggested the country is no longer on track to hit the government's sales targets. The trickle-down effects of this decreased demand are everywhere. EVs accumulated at dealerships this fall, even as automakers cut prices to try to entice customers. Automakers have backtracked on their promised investments: Ford delayed \$12 billion of its planned \$15 billion investment in EV manufacturing capacity, while General Motors delayed production of key EV models and scrapped a \$5 billion partnership with Honda to make cheaper EVs. Even Tesla — once the superstar of EVs — announced it would delay a planned factory in Mexico. Auto execs who were once trumpeting the potential of electric cars are even publicly acknowledging that EVs aren't working.

Industry analysts have pointed to several reasons for the slowdown, including insufficient charging infrastructure and a lack of affordable EV options. But they're a symptom of the larger problem: America's EV plan was flawed from the start. Instead of seeing EVs as one piece of a plan for more sustainable transportation, America has focused on using EVs as a one-to-one replacement for gas guzzlers. But this one-size-fits-all solution fails to address our broader transportation problems, meaning emissions targets are likely to be missed and other transportation problems will continue to go unaddressed.

"The entire myth at the heart of this whole transition is that the battery car seamlessly fits right into the gas car's position," Edward Niedermeyer, the author of "Ludicrous: The Unvarnished Story of Tesla Motors," told me. "It doesn't, and that's the problem."

The EV myth

The mission to replace gas cars with EVs has led to a series of major miscalculations, one of which has to do with the sheer size of the new electric vehicles being put on the road.

Over the past few decades the American auto industry has become obsessed with huge vehicles. The reasons for the size inflation range from profit margins to distorted government fuel standards, but the proliferation of bigger vehicles created a doom loop of consumer preference: Drivers saw the vehicles around them getting bigger, so they wanted bigger cars to make themselves feel safer. Automakers argued that this was proof that people wanted only big cars, so they cut small models and made existing vehicles bigger, which made people with smaller cars feel less

safe — you get the picture. Meanwhile, road deaths and injuries soared, while the larger, less efficient vehicles wiped out environmental benefits from higher emissions standards.

The entire myth at the heart of this whole transition is that the battery car seamlessly fits right into the gas car's position. Edward Niedermeyer

When automakers pivoted to EVs, they focused on the kinds of cars that were already popular — which meant a flood of big electrified SUVs and trucks. But massive-bodied EVs don't make much sense. Larger EVs require bigger batteries, which require more raw materials to manufacture, which requires producers to beef up their environmentally destructive mining operations. While bigger batteries allow drivers to travel farther between charges, they also make the cars heavier, more dangerous, more expensive, and worse for the planet.

The "range anxiety" that has resulted in massive batteries is another reason EVs don't work as a replacement for gas cars. Niedermeyer said that while an electric car can meet most people's driving needs, it struggles with edge cases like road trips because of the need to recharge. Since Americans have been promised a one-to-one substitute for their gas cars, this seems like a failure; an EV should be able to do everything a gas car can. This idea persists even though in 2023 the average US driver traveled only about 40 miles a day, and in 2022 about 93% of US trips were less than 30 miles. Still, in a survey conducted by Ipsos last fall, 73% of respondents indicated they had concerns about EV range.

The focus on increasing EVs' range is contributing to their relatively high prices. Unlike with gas cars, the more you pay for an EV, the more range you can expect to receive. And since Americans have been conditioned to want a lot of range, cars with big batteries and longer ranges have dominated the market, resulting in stubbornly high prices. In September, Cox Automotive pegged the average EV price at \$50,683, down 22% from the same time last year. But an analysis from CarGurus found that EV prices were still 28% higher than gas-vehicle prices on average. With prices for everything else — rent, groceries, and other goods — increasing, the average person has less cash to splurge on an expensive electric vehicle.

All of this means there's a natural limit to the number of American households willing and able to make the shift to electric. They've largely been high-income households in places like California, where charging infrastructure is more plentiful. The polling firm Strategic Vision found that EV buyers have a median household income of \$186,000. Cox estimated that 8% to 9% of new-vehicle sales in the United States in 2023 would be electric, but getting above that threshold is proving to be more difficult than expected.

The Norway model

If there's any direct inspiration for the United States' EV policy, it's Norway. As the story goes, Norway introduced some compelling subsidies for EVs, sales took off, and now the vehicles virtually dominate the roads. But the reality isn't so simple. And Norway's challenges bode poorly for America's EV push.

Norway shows that if US policymakers stick with the current model of EV transition, it's going to be a difficult road.

Norway introduced EV incentives in the 1990s, then added more when EV technology really took off in the 2010s. EV drivers could get perks like free parking, permission to drive in bus lanes, and, most importantly, exemptions from taxes and fees that could ultimately save them a lot of money. In September, 87% of new-vehicle sales were fully electric vehicles. The problem, Ketan Joshi, a climate-analysis expert in Oslo, told me, is that that stat "doesn't really give you a good picture of the rate of change." Though the new-vehicle sales figure is high, data from Statistics Norway indicates the total share of EVs on Norwegian roads in 2022 was only about 20% — there's still a long way to go until everyone's driving electric.

Even with this shift, Norway isn't on track to meet its 2030 emissions-reduction targets. While emissions from passenger vehicles have fallen slightly, Joshi said, those reductions are being canceled out by an increase in emissions from trucks. People in Norway own more cars than they have in the past, in part because EV incentives encourage people to buy more cars, and the government has no plans to reduce how much people are driving. The researcher Benjamin Sovacool and his colleagues have pointed out that, just like in the US, EV buyers in Norway "tend to be in higher income brackets, often using their EV as a second car."

The Norwegian approach has also had a ton of unintended consequences. Joshi told me that the decline in gas tax revenue due to EV adoption had triggered a contentious political debate about increasing road tolls to make up the difference. (A political party was even formed on the platform of stopping the tolls.) Plus, heavier electric vehicles are harder on roads, produce more air pollution, and pose a greater safety risk for pedestrians.

Norway has made great headway in getting buyers to go for EVs, but it's not a silver bullet, especially on a short timeline. "It shows you the extreme slowness of transition that is basically guided by the rate at which people buy a new car," Joshi said of Norway's approach. Reducing transportation emissions by incentivizing people to replace their car with an EV is incredibly slow. And for countries like the US that got started late, it's a warning sign.

Norway shows that if US policymakers stick with the current model of EV transition, it's going to be a difficult road. Even if adoption keeps ticking up, it will take a long time to get existing internal-combustion-engine vehicles off the road and see a notable decline in transport emissions. Plus, there will be other issues to deal with like increased road maintenance and pedestrian safety.

"Narrow success in one area is not something you necessarily want to emulate," Joshi said.

Time for a rethink

The shift from gas-powered cars to electric vehicles is an opportunity to rethink how Americans get from place to place. But so far the US government, carmakers, and consumers have been pursuing a small-minded swap that lacks the necessary ambition.

Getting Americans to ditch driving altogether would be the most effective way to reduce emissions, but it would require a massive rethink of our transport system. Something like that doesn't happen overnight, and given the decadeslong lack of investment in anything other than car infrastructure, there are plenty of other opportunities for a better future. If the government and automakers are serious about making transportation more sustainable, they should be incentivizing smaller vehicles, hybrid cars, and public transportation like trains and buses.

EVs can be an important part of the fight against the climate crisis, but America's EV plan needs to lean into what these cars do well: short daily trips that can be taken in small, affordable cars. People who frequently take long trips can take advantage of hybrid cars. And better public transit and faster intercity trains could make a huge difference for people and the planet.

While it may be a sexy and industry-friendly approach to the climate crisis, an EV-first plan isn't the most effective way to tackle the enormous challenge we face.

ELON MUSK AND TESLA MOTORS FRAUD, STOCK RIGGING, BRIBERY AND SAFETY INVESTIGATIONS

Elon Musk's toxic battery fires, spaceship exhaust, private jet vapors, toxic battery factories and battery chemical mines have caused over 1000 times more environmental damage than all of the minimal "green" values he has hyped, combined.

The CIA, FBI, FTC, EU and other agencies have been studying Elon Musk and the effects his strange government windfall financing has had on world economic and geopolitical events.

While some news outlets portray Musk as a man "...raised by a racist escort mother, that Musk desired sexually, and a hateful father who killed a number of black's in South Africa and impregnated his own daughter..."; the psychological profile of Elon Musk is more complex and severe.

Musk has been diagnosed with a buffet of psychological defects. Musk is predominantly driven by a desire to impress his mother and to show his abusive father that he is as good as Musk says he is.

Musk is a consummate liar who will rationalize every lie, when caught, with a "what I really meant was this" tactic.

ELON MUSK SPENDS BILLIONS ON HYPE PR TO COVER UP THESE FAILURES OF HIS:

Elon Musk's Biggest Tech Failures That No One Talks About

Elon Musk, at times the world's richest man, is certainly one of its most discussed. After making a name for himself at PayPal, he would go on to buy his way into the already-established Tesla Motors company, becoming an industry leader in electric vehicles. Unable to be constrained by Earth or its gravity, his next venture was SpaceX, and Musk became a leader in private space exploration.

For years, Musk was hailed as a "visionary" (A term Musk pays reporters to say about him) who would help end the era of fossil fuels and might even propel humanity to other planets. He was even a partial inspiration for the character of Tony Stark in the Marvel Cinematic Universe, to whom he has often been compared.

But with wild success comes wild failure, and Musk's past is riddled with it. From being forced out of his own company to costly business mismanagement, and even seeing his creations crash or explode, here are Elon Musk's biggest tech failures that no one talks about. Musk will change his politics at the drop of a hat, depending on which party he can get the most cash from.

He was fired from PayPal

One of Elon Musk's earliest successes came with the financial services website X.com, which he founded by investing the money he'd made from his first company, Zip2, after it was purchased by Compaq. Musk founded X.com in 1999, and the company merged with tech vampire Peter Thiel's Confinity, which offered a money-transfer service called PayPal, but the combined venture retained the name X.com (via The Verge).

But there were stormy seas ahead for Musk. In September 2000, while Musk was on honeymoon with his first wife, Justine, a collection of employees at PayPal, dissatisfied with Musk's leadership, threatened to resign if Musk didn't step down as CEO. Executives delivered a vote of no confidence to the board of X.com, forcing Musk out and replacing him with Thiel. After Musk's departure, the company was renamed PayPal, and Thiel would later go on to sell it to eBay for \$1.5 billion (via The New Yorker).

It was a rough early blow for the entrepreneur, but in the coming years, it would barely be remembered as a speed bump on his road to riches.

He waged war against Tesla whistleblowers

One of the least discussed but most revealing chapters in Musk's history came in 2018 when a Tesla assembly worker named Martin Tripp noticed some concerning things at Tesla's Gigafactory in California. Tripp identified a number of wasteful practices in production, so he brought his concerns to Musk, who proved unreceptive.

Tripp next brought internal Tesla documents to Business Insider, but in response, Musk waged war against the leaker, as detailed in a bizarre and harrowing Bloomberg investigation. He fired Tripp, then sued him for \$167 million. He hired private investigators who tailed him in person and hacked his phone to see his texts in real-time. And, on his alleged orders, Tesla's security team passed along a "tip" to police claiming that Tripp was planning to commit a mass shooting at the factory. The SWAT team deployed to Tripp's house found him unarmed and sobbing.

Aside from being, to put it mildly, a bit of an overreaction, Musk's enraged response to Tripp's whistleblowing is a major failure for a tech CEO overseeing his own factory. As noted by CNBC, companies that are responsive to whistleblower concerns are ultimately more profitable in the long run. And, as we shall see, this would not be the last time Musk paid a price for ignoring the concerns of his workers. Musk has hired Nick Denton's tabloid empire of Gawker, Gizmodo, Jalopnik, etc. to attack and destroy Musk's competitors and disfavored politicians.

Under his management, Tesla covered up safety violations, workplace injuries, and racism

In 2019, Forbes found that Tesla had been investigated by California OSHA 24 times between 2014 and 2018 and was fined for 54 violations. One worker lost a finger after his glove was caught in a torque gun. There were eight investigations at Tesla's Tennessee factory with five violations found, and the one in Kentucky was investigated 13 times with four violations issued. In 2020, the Los Angeles Times reported that Tesla had covered up hundreds of factory-related injuries since 2015.

Then, a judge ruled in April 2022 that Tesla must pay out \$15 million to a Black contract worker who was systematically discriminated against inside the company (via NPR). And in July of that year, fifteen Black employees, both former and current, filed a lawsuit alleging they were racially harassed with slurs, compared to chattel slaves, and assigned to the most physically exhaustive labor while being passed over for promotions (via Al Jazeera).

Given Elon Musk's iron grip over his companies, noted by outlets like The Guardian, the buck stops with him. When factories are this chaotic, is it really surprising we have yet to see deliveries of the Tesla Roadster or Cybertruck?

Under his management, a shocking number of SpaceX rockets have exploded

After Tesla's success in the years after Elon Musk bought his way into the company, the billionaire's next venture left the road behind in favor of the stars. SpaceX, the private, Musk-controlled spacecraft and satellite manufacturer has become one of the leaders in space technology and was even the first private company to develop a liquid-propellant rocket that achieved Earth orbit when it launched the Falcon 1 in 2008 (via NASA). But despite its successes, a surprising number of SpaceX rockets have gone down in flames — according to the New York Post, at least 10 rockets have combusted between 2014 and 2021.

Indeed, many of SpaceX's rockets have become nothing more than incredibly expensive fireworks, such as a Falcon 9 that exploded over the Atlantic Ocean in 2015, costing the company an estimated \$112 million according to Futurism. As reported by Reuters, another Falcon 9 carrying cargo bound for the International Space Station

combusted two minutes after liftoff that same year. And among the most spectacular failures was a Falcon 9 rocket that exploded on the launch pad, a failure so mind-boggling to Musk that he — according to The Washington Post — investigated it as a case of sabotage.

At times, these technological failures can even present a threat to those of us who are terrestrially bound. According to The Guardian, in August 2022, two Australian farmers found debris from a SpaceX crash on their respective properties.

He got in trouble with the FCC over rigging Tesla stock prices

Elon Musk has always considered himself a bit of a troll, and nothing tickles his posting syndrome more than a weed joke. But in 2018, Musk's stoner antics backfired when he made what may just be the world's costliest 420 joke. On Twitter, the billionaire posted, "considering taking Tesla private at \$420 a share." Laughs were had. Yuks were yukked. And then the Securities and Exchange Commission (SEC) got involved.

Musk's proposed share price may have been intended in jest, but he seemed serious about taking Tesla private, and his announcement, which suggested a valuation 11% higher than the current trading price at that time, caused a sudden spike in Tesla's stock prices and trading was halted by Nasdaq (via CNBC). The SEC charged him with civil securities fraud. Investors sued, and a judge ruled that Musk had made intentionally false statements; he had been lying, to begin with (via CNBC). It wouldn't even be the last time he messed with Tesla stock.

In 2019, Musk settled with the SEC, landing on an arrangement that included personally paying \$20 million — pocket change for a man like Musk — and agreeing to have any tweets about Tesla vetted by the company's legal counsel before posting them, as reported by Reuters. Though it was regarded as a slap on the wrist by experts, Musk filed to kill the SEC deal in 2022, accusing the regulating body of violating his free speech (via Reuters).

Clearly, Musk is still chafing against the consent decree, but if there's one thing American businesspeople know, it's that regulators never take kindly to defrauding investors.

Under Musk's management, over 270 Tesla vehicles crashed on Autopilot in one year

While many of Elon Musk's technological failures represent setbacks for his companies or for himself, personally, others have had much more dire consequences. Nothing is more representative of that fact than the staggering number of Tesla cars that have been involved in crashes while in Autopilot mode. Between June 2021 and June 2022, a staggering 273 Teslas were involved in crashes while in Autopilot mode, accounting for almost 70% of crashes that involved driver-assistance systems according to the National Highway Traffic Safety Administration.

Tesla's Autopilot is, despite what its name suggests, not meant to drive the car fully autonomously. Rather, it is a suite of driver-assistance features that help the vehicle maintain speed, make safe lane switches, and the like. Although a beta of "Full Self Driving" mode is available on some models, it is not reliable enough to allow drivers to divert their attention from the road. But that doesn't stop some Tesla drivers from doing so anyway, perhaps trusting Musk's exaggerated promises about the technology (via The Verge). When that technology fails, the results can be deadly, which is probably why other auto manufacturers avoid such hyperbole about their own vehicles' self-driving capabilities.

He brought Tesla and SpaceX to the verge of bankruptcy

As the head of two companies that manufacture, respectively, automobiles and rockets, tech issues can be costly. And as the head of both Tesla and SpaceX, both companies came dangerously close to the precipice of bankruptcy under Elon Musk's leadership.

In the case of Tesla, the issues came while the company was in the production of its Model 3 electric sedan. As reported by CNBC, Musk shared on Twitter that, from mid-2017 to mid-2019, Tesla was within a month of bankruptcy as production on their vehicles stalled. The CEO named “production and logistics hell” as the culprit.

Then, in 2021, SpaceX nearly exploded into financial flames like a failed rocket launch. The problem was, similarly, production issues with its Raptor rockets. In a companywide email obtained by CNBC, Musk warned his employees at the space technology firm, “The Raptor production crisis is much worse than it seemed a few weeks ago. We face genuine risk of bankruptcy if we cannot achieve a Starship flight rate of at least once every two weeks next year.”

Ultimately, both companies overcame their technological difficulties, and their respective near bankruptcies became another in a long list of Musk’s least publicized failures.

His Starlink satellites became Russian and Chinese military targets

Russia’s invasion of Ukraine has dominated the 2022 news cycle, and Elon Musk plays a surprisingly key role in the ongoing conflict. Starlink satellites provided by SpaceX formed the backbone of Ukraine’s communications network, helping its armed forces and civilians as Russia pummeled the country’s ground infrastructure. The satellites were subsidized by the United States, though as *The Washington Post* suggests, SpaceX representatives have framed it as a charity operation.

Aside from their invaluable role in Ukraine’s communications, the besieged nation uses the satellites provided by Musk’s company to photograph Russian military deployments, review damage done to its enemy’s air bases, and even provide grim evidence of mass graves in Russian-occupied territory (via *Axios*).

In September 2022, the Russian delegation to the U.N. General Assembly released a statement promising that “quasi-civilian infrastructure” could be a “legitimate target” if Ukraine continues to use them, almost certainly referring to SpaceX’s Starlink Satellites, according to *Futurism*.

But as dire as the situation was, it was about to escalate due to Musk’s own actions.

He threatened Ukraine but was forced to back down

In October 2022, as the Russo-Ukrainian war waged on, Musk abruptly threatened to cease funding the use of Starlink satellites by Ukraine, as reported by *The Washington Post*. Given the nation’s heavy reliance on those satellites for its war efforts, such a move would have crippled Ukraine’s defenses and provided a major tactical advantage to Russia.

Even more shockingly, the threat seemed to be a response to a Ukrainian ambassador who insulted him on Twitter. After Musk ran a Twitter poll suggesting the conflict be ended via a UN-supervised vote, and that the contested Crimea region remain part of Russia, Andriy Melnyk, Ukraine’s ambassador to Germany, told Musk, “F— off is my very diplomatic reply to you.” Shortly after threatening to cut Ukraine off from the Starlink network, Musk tweeted, “We’re just following his recommendation.”

But only a day later, Musk rescinded his threat, promising to continue funding with a bitter tweet that read, “The hell with it ... even though Starlink is still losing money & other companies are getting billions of taxpayer \$, we’ll just keep funding Ukraine govt for free” (via *The New York Times*). The *Times* speculated that Musk’s about-face was in response to international rebuke for his threat, and noted that SpaceX had only donated 3,000 satellites to the Ukrainian effort, while the United States, the United Kingdom, and Poland footed the bill for almost 17,000.

The incident was a bizarre instance of a tech company becoming mired in international geopolitics, and the world may never know how close Musk came to handing Russia its desired annexation of Ukraine.

His management of Twitter is predicted to result in the loss of 32M users

While Twitter wasn't exactly in peak shape before Elon Musk took the reigns of the social media platform, his management since then has been chaotic to say the least, and market analysis now suggests those mistakes may be costly.

As SlashGear recently reported, market research firm Insider Intelligence is predicting a loss of 32 million Twitter users by 2024 due to Musk's layoffs at the company and a declining public perception of Musk himself. According to the report, Twitter's vastly reduced workforce will likely struggle to address technical issues, leading to user frustration and, ultimately, attrition.

Additionally, the report cites a proliferation of hateful content and a personal distaste of Musk as another reason users may choose to abandon the platform, a concern raised by other tech experts. As Nilay Patel at The Verge pointed out in an opinion column shortly after Musk marched into Twitter HQ with his sink in tow, social media may contain inbuilt mechanisms that help to proliferate extreme content, but users generally like their experiences to be pleasant.

As of this writing, Musk is in the process of suspending notable journalists from the platform, ostensibly for violating a new policy by posting the publicly available flight data of his private jet, which Musk claims is a personal safety risk. But while it's not clear how many of those journalists did so, many appear to have been critical of the "chief Twit" (via CNBC). In the immediate aftermath, many more media figures have declared their intention to leave Twitter for good. According to The Washington Post, Musk may also face sanctions from the European Union.

While the dire long-term projections are not the subject of widespread discussion, the decline of Twitter would be Musk's most visible tech failure yet.

Any homeless person could have done everything that Elon Musk has done if they too were handed billions of taxpayer dollars, tax free perks, thousands of investment bankers and outside engineers and the exclusive favors of The White House. Musk has never built a car or a rocket. He has invented nothing and has only taken the innovations of others. His cars and rockets blow up; he tortured huge numbers of animals for his 'brain chip' experiments; his hole making company is ridiculous' his father is a pedo, blood mineral exploiter and incest violator; his mother was an escort, and his brother is a scammer. He is part of Jeffrey Epstein and Steve Jurvetson's sex ring. He is a mobster. His whole family is a pack of racist, perverted, privileged assholes.

All of the 'glowing' news articles about him that ignore his lies were paid for by Musk's PR staff. Feinstein and Pelosi own Musk assets and rig Congress on his behalf for their own profits. SpaceX is never going to Mars, that is just a smoke-screen tale to hide the fact that all SpaceX does is satellites that spy on people. Musk gets so many girls pregnant because he subscribes to the Deep Breeder scheme of Jeffrey Epstein. Musk is a narcissistic, drug abusing, sociopath that hires In-Q-Tel and Black Cube to attack others. His Tesla Cars have more safety defects than any car in the world. Obama shut down part of NASA, fired NASA staff and then gave that same part to Musk as political quid pro quo. His controlled news articles only talk about the few things that have worked and ignore the thousands of Musk things that have failed horrifically. Google and Musk are partners in stock market rigging and information manipulation.

Musk Has Become Villain Liberals Always Imagined Him to Be...

How Musk Destroyed The Electric Car Industry

Many investigative journalists have written about the scheming world of Elon Musk. Here are a small set of these clippings from investigations and analysis of his covert operations:

"He has sociopath mental issues and he is a narcissist..."

"It is so easy to hack any Tesla and crash it, break into it or give it bad braking orders that it is criminally negligent to allow Tesla's on the street. Even the Chinese have hacked Tesla's from the other side of the world! Tesla's have been hacked and remotely crashed, the drivers killed and Tesla covers this up..."

"Larry Page is Musk's 'bromance' boyfriend buddy and he uses Google to cover-up Musk's scandals"

"The drug and murder-for-hire website: Silk Road, was built at drug-enthusiast Musk's company SpaceX by Musk's programmer and Musk hires many people from a group called: In-Q-Tel, who were caught with tons of cocaine on their airplanes in a DEA raid"

"Dianne Feinstein and her family covertly own many Musk interests and arranged for him to get his funds from the taxpayers"

You may have run across Musk's self promoting, narcissistic, multi-billion dollar, self-aggrandizing PR hype but here is the other side of his hype-coin. Here is who Elon Musk really is:

We know these facts from personal interaction with Musk, his companies and his politicians. Everything in this report can be proven in a jury trial, Congressional hearings or live TV debates.

Musk will do anything to keep this information from getting out but... it is too late for him!

While Musk's dirty deeds sound like a bad Hollywood movie script. It all really happened and there is now massive hard copy evidence to prove it.

Elon Musk exists because he bribed DNC politicians including Obama, Clinton and Senators Feinstein, Reid, Boxer, Harris, Spier and Pelosi to give him free taxpayer cash and government resources from the Department of Energy and the California political tax pool. This is proven when you follow-the-money and the insider trading, stock ownership and crony payola kick-backs. The payola between Musk, his scummy cronies and the politicians included:

Billions of dollars of Google (Where Musk's boy buddy Larry Page works), Twitter, Facebook, Tesla, Netflix and Sony Pictures stock and stock warrants which is never reported to the FEC; Billions of dollars of Google, Twitter, Facebook, Tesla, Netflix and Sony Pictures search engine rigging and shadow-banning which is never reported to the FEC; Free rent; Male and female prostitutes; Cars; Dinners; Party Financing; Sports Event Tickets; Political campaign printing and mailing services "Donations"; Secret PAC Financing; Jobs in Corporations in Silicon Valley For The Family Members of Those Who Take Bribes And Those Who Take Bribes; "Consulting" contracts from McKinsey as fronted pay-off gigs; Overpriced "Speaking Engagements" which are really just pay-offs conducted for donors; Private jet rides and use of Government fuel depots (ie: Google handed out NASA jet fuel to staff); Real Estate; Fake mortgages; The use of Cayman, Boca Des Tores, Swiss and related money-laundering accounts; The use of HSBC, Wells Fargo, Goldman Sachs and Deutsche Bank money laundering accounts and covert stock accounts; Free spam and bulk mailing services owned by Silicon Valley corporations; Use of high tech law firms such as Perkins Coie, Wilson Sonsini, MoFo, Covington & Burling, etc. to conduit bribes to officials; and other means now documented by us, The FBI, the FTC, The SEC, The FEC and journalists.

INSIDE THE MUSK CORRUPTION OPERATION

The U.S. Energy Dept (DOE) has been covering-up organized political crime activities in which government funds are being used as a slush-fund to pay off political campaign financiers and to pay for CIA/GPS Fusion-Class attacks on Silicon Valley business competitors.

Political campaign financiers and government agency staff share stock market holdings with each other under family trusts, shell corporations and layered Goldman Sachs accounts.

The Musk scam-deal was: "Obama funds Tesla, Musk conduits campaign funds to Obama, top Obama staff profit off of insider Musk stocks..."

Extremist politicians and their controlled news outlets refuse to allow any articles about Musk's crimes to be printed because they benefit from Musk's crimes.

Investor oligarch's Tim Draper and Steve Jurvetson are so fanatical about not being embarrassed from a Tesla bankruptcy that they will pump the TSLA stock and threaten anybody who might disclose the Musk misdeeds.

Peter Thiel, a Musk 'boyfriend' also protects Musk. Musk, and his cronies, use Palantir, Google and related software to scan the entire internet every few minutes for any occurrence of the words: "Musk", "Tesla" or "Tesla Fire". They send trolls and fake bloggers (Many of them Russian) to put pro-Musk comments on the comments section of any blogs or articles discussing those topics and try to flood out the truth about Musk.

In EVERY blog that you read that mentions 'Musk', at least 1/3 of the comments have been placed their by Musk's paid shills. There are no "Tesla Fan Boys". All of the fanatic Tesla comments on the internet are Musk's, Thiel's, Jurvetson's and Draper's fake fanboy trolls. Musk, himself, stays up late at night pretending to be a 'Tesla Fan Boy' on blogs.

MUSK'S SPACEX COMPANY Will have all of it's satellites destroyed in moments as soon as China gets pissed off: <https://www.japantimes.co.jp/news/2019/02/12/asia-pacific/chinas-space-debris-cleanup-may-cover-story-arms-u-s-satellites-pentagon/>

WE HAVE ASKED THE FBI, DOJ, OSC, SEC, FTC, GAO, U.S. CONGRESS, AND OTHERS, TO INVESTIGATE AND PROSECUTE MUSK AND HIS CRONY OPERATION!

ELON MUSK'S PAID-FOR MEDIA SHILLS. THEY COVER UP HIS CORRUPTION AND PUSH PUFF-STORIES ABOUT MUSK. NEVER TRUST THEM TO BE ANYTHING BUT BIASED PROPAGANDA

OUTLETS. MANY OF THEM OWN TESLA STOCK: Electrek, Google, Facebook, CNN, Huffington Post, Dianne Feinstein's PR office, Nancy Pelosi, Steven Chu, MSNBC, PayPal, KPIX-TV, San Jose Mercury News, Any Hearst owned entity, The SF Chronicle, Motley Fool, Green Car Congress, The executive staff of the DNC, The NY Times, etc.

ELON MUSK AND HIS CRONY STOCK MARKET SLUSH-FUND PAYOLA

- Why We Know That Elon Musk Is A Criminal

By Susan T. and Andrew H.

We saw Elon Musk commit crimes and we saw the Obama White House cover-up those crimes.

We, and our associates, worked for Bright Automotive, Zap Electric, Aptera, Eco Motors, XPV, The United States Department of Energy and the federal Office of Management and Budget and Tesla Motors itself.

Americans have an expectation that their tax dollars will be used in a fair and legal manner and not to pay off crony campaign financiers like Elon Musk. Americans have an expectation that fair market competition will decide which companies get to live or die and that no campaign financiers gets to order the White House to produce the death or success decision about any American business. Elon Musk's operation exists entirely because of criminal corruption and all of his companies must be shut down by federal law enforcement.

For nearly a decade, the U.S. Department of Energy has refused to comply with Freedom of Information Act (FOIA) requests for copies of Tesla Motors entire D.O.E. funding application documents. Former D.O.E. employees have shredded copies of those documents in order to keep them from being exposed to the public and the media. Why would they do that? Because those documents reveal felony criminal fraud by Tesla Motors, federal violations of the Section 136 law requirements and manipulations of the "hard-wiring" of the entire D.O.E. program. Those documents, which we have seen (and some Senate staff have private copies of) prove that, in a side-by-side comparison with all other applicants, the Tesla application was manipulation, rigged, false-reviewed and crony-advanced in order to pay-off certain campaign financiers and damage their competitors. Tell the U.S. Congress to demand that the U.S. Department of Energy stop breaking the law and comply with the FOIA requests to stop hiding the incriminating evidence in the Tesla files. Demand that the public be shown the original paper and not the later, "doctored" versions.

We saw Elon Musk operate an entirely illegal and unethical program based on State and Federal corruption. We told this, in writing and in person to the U.S. Attorney General: Eric Holder, who then quit his job after we reported these facts to him.

We reported that Elon Musk lied about vast number of dangers of the lithium ion chemistry he was using. Nothing was done.

We reported that our associates at the Department of Energy were having their safety reports on lithium ion danger suppressed. Nothing was done.

We reported that Elon Musk's credit rating and financial records were fraudulent and amounted to "cooking the books". Nothing was done.

We reported bribes paid by Musk's lobbyists and associated to government officials in order to grease the skids for his crony payola. Nothing was done.

We reported that Goldman Sachs and Tesla Motors were operating a stock fraud pump-and-dump scam to manipulate Elon Musk's stock holdings. Nothing was done.

We reported over a hundred illegal and corrupt actions by Elon Musk and his mob of Silicon Valley gangsters. Nothing was done.

BANKRUPT MUSK – NO CASH FOR CRONY CORRUPTION. Print this out & freely re-post it on blogs & social media. Post this on bulletin boards. Put this on the windshield of every Tesla you find. Print this out & hand these out in front of every Tesla dealership: Nobody can stop you from handing these out, it is your U.S. Constitutional First Amendment Right! Pass the word! We are prepared to back up every single fact on here at any public meeting with the FBI, Congress, FTC, GAO, SEC or before a Federal Special Prosecutor.

The crash of a Tesla Model X through the home of South Korean singer and actor Ji Chang Son. The crash ended with the nose of the vehicle in Ji Chang Son's living room after the Tesla malfunctioned. Hundreds of such Tesla crashes have occurred, resulting in the deaths and injuries of Tesla owners, passengers, bystanders, oncoming drivers and others.

Following accusations by a Korean celebrity that a Tesla car spontaneously drove through a wall, the carmaker has replied that the crash was “entirely due to the man's horrible driving” in an ongoing effort, by Tesla, to steer the blame away from Tesla faulty engineering

Actor and singer Son Ji-chang (identified as Ji Chang Son in court documents) claimed he was parking his Tesla Model X SUV when the vehicle suddenly lurched forward into his living room.

In a lawsuit filed last week in California, Son claimed that the crash was due to “sudden unintended acceleration” and sought class-action status with other Model X owners.

In a nod to the car's ability to sense and avoid crashes, the lawsuit also hinted that the Model X should not be allowed take actions that the car “knows will result in the collision with a fixed object.”

But Tesla contends its Model X was only dutifully following Son's instructions to plough through his house.

“The evidence, including data from the car, conclusively shows that the crash was the result of Mr. Son pressing the accelerator pedal all the way to 100 per cent,” said Tesla in a statement to Reuters.

Although most new cars are equipped with “black box” technology to record driver actions in the event of a crash, Tesla is unique for amassing vehicle data as detailed as whether a driver's hands are on the steering wheel.

The data is collected to aid in research and design, but Tesla user agreements also reserve the carmaker's right to use it to defend itself in court.

The term “sudden unintended acceleration” has a checkered recent history. Most famously, between 2009 and 2011 Toyota recalled more than eight million vehicles following widespread allegations that the vehicles were subject to unexpected acceleration.

But a subsequent investigation by the U.S. Department of Transportation found that most of the reported cases of “sudden unintended acceleration” were simply drivers stepping on the gas instead of the brake — with only a handful of incidents being due to pedals getting stuck on floor mats.

In June, another California-based Model X owner, Puzant Ozbag, similarly claimed that his Model X spontaneously accelerated through a parking lot and into a wall. In that case, too, Tesla reviewed vehicle records and reported that the actual culprit was Ozbag jamming his foot down on the accelerator. A special prosecutor is needed to investigate Tesla due to the huge number of cover-ups, by Tesla and the Obama Administration, to protect campaign financier Elon Musk. Jeff Sessions needs to hire a lawyer from outside the government appointed by Sessions as attorney general or, in the United States, by Congress to investigate a government official for misconduct while in office. A reasoning for such an appointment is that the governmental branch or agency may have political connections to those it might be asked to investigate. Inherently, this creates a conflict of interest and a solution is to have someone from outside the department lead the investigation. The term "special prosecutor" may have a variety of meanings from one country to the next, from one government branch to the next within the same country, and within different agencies within each government branch. Critics of the use of special prosecutors argue that these investigators act as a "fourth branch" to the government because they are not subject to limitations in spending, nor do they have deadlines to meet.

Attorneys carrying out special prosecutor functions in either federal or state courts of the United States are typically appointed ad hoc with representation limited to one case or a delineated series of cases that implicate compelling governmental interests, such as: Fraud (SEC, Complex, Cybercrime, Mortgages), Public Corruption, Money Laundering & Asset Forfeiture, Civil Rights, Racketeering Across State lines, Environmental Protection, National Security, Tax & Bankruptcy, Organized Crime, or International cases where the US is a party).[1] Special prosecutors in courts of the United States may either be appointed formally by one of the three branches of government in a criminal proceeding, or when dictated by federal law or regulation, or informally in civil proceedings, and also by one of the three branches of government, or by a non-governmental entity to prosecute alleged unlawful conduct by government agents. When appointed by the judicial branch to investigate and, if justified, seek indictments in a particular judicial branch case, the attorney is called special prosecutor.[2] When appointed/hired particularly by a governmental branch or agency to investigate alleged misconduct within that branch or agency, the attorney is called independent counsel.[3] When appointed/hired by the state or political subdivision to assist in a particular judicial branch case when the public interest so requires, the attorney is called special counsel.[3] When appointed/hired by an organization, corporation, person or other non-governmental entity to investigate and, if justified, seek indictments against one or more government officials for acts committed under color of law, the attorney may be called special counsel or special prosecutor, but not independent counsel.[3]

On January 3, 1983, the United States federal government substituted the term independent counsel for special prosecutor.[4] Archibald Cox was one of the most notable special prosecutors. However, special prosecutor Archibald Cox today would be called independent counsel Archibald Cox in the United States.

The term is sometimes used as a synonym for independent counsel, but under the former law authorizing the independent counsel, the appointment was made by a special panel of the United States Court of Appeals for the District of Columbia Circuit. The Ethics in Government Act expired in 1999, and was effectively replaced by Department of Justice regulation 28 CFR Part 600, under which Special Counsel Patrick Fitzgerald was appointed to look into the Plame affair. The Tesla Motors and Elon Musk Case requires a Special Prosecutor.

THE CORRUPTION, FRAUD AND BRIBERY CHARGES AGAINST ELON MUSK AND TESLA MOTORS

Update 2.7

The following, culled from a variety of news articles, lawsuits and investigative reports, demonstrates the profound number of illicit actions charged against Elon Musk and his Silicon Valley cartel insiders. While any given,

unbiased, expose on Musk covers some of these issues, it is important to examine the width and breadth of Musk's culture of corruption. Expert witnesses, former employees and investigators are able to fully detail and confirm, with extended evidence, the following charges, in court, or Congressional public hearings:

A.) ELON MUSK AND TESLA FACE CRIMINAL FRAUD CHARGES BY FEDS! MUSK FINALLY EXPOSED!

B.) SEC subpoenas TESLA over Musk tweets...

C. Whistleblower posts 'flawed cars' details...

D.) Elon Musk's Incredible Smoke And Mirrors Dance. Elon Musk's untraceable money laundering and political bribery scam has now been exposed. It is called an "Invisible Bridge". It is the way that covert funds move through a secret conduit of close associates and family members. Elon Musk is at the head of the conduit and his mother, brother and associates Tim Draper, Steve Jurvetson, and George Soros round out the other tentacles. With operational links through Wells Fargo Bank, Silicon Valley Bank and Goldman Sachs, the scheme is perfected corruption. The "bridge" uses a combination of fake tax evasion charities and business assets, passes through Senator's pockets and is never visible to the FBI, the FEC and the SEC unless they have very good agents assigned to the matter.

E.) NTSB, DOJ, SEC and FEC have been blocked from action by DNC lobbyists.

F.) The overt and arrogant Musk misdeeds have now become "obvious and RICO-violating..."

G.) He is protected by Senators Reid, Harris, Pelosi and Feinstein. They are beneficiaries of the scam. Musk's self promoting, narcissistic, multi-billion dollar, self-aggrandizing PR hype. Elon Musk exists because he bribed DNC politicians including Obama, Clinton and Senators Feinstein, Reid, Boxer, Harris, Spier and Pelosi to give him free taxpayer cash and government resources from the Department of Energy and the California political tax pool. This is proven when you follow-the-money and the insider trading, stock ownership and crony payola kick-backs.

H.) He is protected by the Clinton and Obama organizations along with most of the DNC. He finances these politicians via this scheme.

I.) The U.S. Dept of Energy (DOE) has been covering-up organized crime activities at DOE in which DOE funds are being used as a slush-fund to pay off DNC campaign financiers and to pay for Fusion-GPS attacks on Silicon Valley business competitors.

J.) DNC campaign financiers and DOE staff share stock market holdings with each other under family trusts, shell corporations and layered Goldman Sachs accounts. The deal was: Obama funds Tesla, Musk conduits campaign funds to Obama, top Obama staff profit off of insider Musk stocks.

K.) Elon Musk is a criminal, a mobster, an asshole, a balding fake-hair wearing, plastic surgery-addicted, bi-sexual douchebag, woman-abusing, sex addicted, tax evader.

L.) Musk exploits poor people and child slaves in the Congo and Afghanistan to mine his lithium and Cobalt. Look up this phrase on the top search engines: "child labor electric car batteries".

K.) Musk spends billions per year to hire Russian trolls, fake blogger fan-boys and buy fake news self-glory look-at-me articles about himself. Musk thinks he is the 'Jesus' of Silicon Valley and he will do anything to make the public think so. Musk is insecure because his father was abusive and his "trophy wife" Mother is overbearing so he developed sociopath-like mental issues.

M.) Musk has been professionally diagnosed as a 'psychotic narcissist'.

- N.) Musk has publicly stated on an investor call that he uses drugs and alcohol to get through the night. We have the tapes.
- O.) Musk relies on Google and the DNC Main Stream News (MSN) to hide bad news about him. Fake News manipulator Google is run by Larry Page. Larry is Musk's investor and bromance buddy. They share an apartment.
- P.) Musk uses shell companies and trust funds to self-deal, evade the law and hide his bribes and stock market insider trading. His brother ran Solar City and is now under federal investigation for securities fraud.
- Q.) A huge number of Tesla drivers, per capita, have been killed; pedestrians and oncoming drivers have also been killed, and Musk covers it up.
- R.) The DNC and the MSM refuse to allow any articles about Musk's crimes to be printed because they benefit from Musk's crimes.
- S.) VC's Tim Draper and Steve Jurvetson are so fanatical about not being embarrassed from a Tesla bankruptcy that they will pump the TSLA stock and threaten anybody who might disclose the Musk misdeeds.
- T.) Peter Thiel, a Musk 'boyfriend' also protects Musk. Musk, and his cronies, use Palantir, Google and related software to scan the entire internet every few minutes for any occurrence of the words: "Musk", "Tesla" or "Tesla Fire". They send trolls and fake bloggers (Many of them Russian) to put pro-Musk comments on the comments section of any blogs or articles discussing those topics and try to flood out the truth about Musk. In EVERY blog that you read that mentions 'Musk', at least 1/3 of the comments have been placed there by Musk's paid shills.
- U.) There are no "Tesla Fan Boys". All of the fanatic Tesla comments on the internet are Musk's, Thiel's, Jurvetson's and Draper's fake fanboy trolls. Musk, himself, stays up late at night pretending to be a 'Tesla Fan Boy' on blogs.
- V.) Main Stream DNC-biased News organizations who refuse to cover the story reveal themselves as shills for Musk.
- W.) The Silicon Valley Mafia promotes Musk as a "Tech God" leader but, in reality Musk is the same kind of "Leader" as Charles Manson, Jim Jones, David Koresh, Swami Rajneesh and Al Capone.
- X.) His own people have sued him for fraud and lies once they realized that Musk-ism and Scientology had so much in common.
- Y.) The 'Silicon Valley Mafia; cartel of frat boy sociopath venture capitalists like Steve Jurvetson, Tim Draper, Eric Schmidt, et al; threaten those who do not support the cult of Tesla or their political candidates.
- Z.) Musk holds the Silicon Valley record for getting sued for fraud by his investors, wives, former partners, employees, suppliers and co-founders.
- A1.) Elon Musk has gone out of his way to hire hundreds of ex-CIA and In-Q-Tel staff and assign them to "dirty tricks teams" to attack his competitors and elected officials who Musk hates.
- A2.) Musk and his culture are being sued for abuse to women and blacks and the Unions hate him for lying to them.
- A3.) <https://stopelonfromfailingagain.com> reveals even more Musk lies.
- A4.) Musk never founded his companies. He took Tesla away from the founder: Marty, in a hostile take-over!
- A5.) Musk's "Starlink" satellites are domestic spy and political manipulation tools - never get your internet from anything SpaceX has launched. SpaceX is entirely a domestic spy operation.

- A6.) Musk's "Mars" scheme is just a PR distraction.
- A7.) The same kind of EMF radiation proven to cause cancer from cell phones exists in massive amounts in a Tesla.
- A8.) Musk can't fix a car or build a rocket and has almost no mechanical skills.
- A9.) If you pull a report of every VIN# of every Tesla ever built and cross reference that with insurance, repair and lawsuit records you will find that the "per volume" fire, crash, death and defect rate is THE WORST of any car maker in history! Musk's lobbyists have bribed DOT and NHTSA to stall safety inspections.
- A10.) NO COMPLETE UNCOMPROMISING SAFETY REPORT ON TESLA CARS HAS EVER BEEN PUBLISHED but we have a copy of a hushed up report that would put Tesla out of business.
- A11.) Musk's 'Autopilot' system is a scam to get government cash BUT IT NEVER WORKS. The Tesla 'Autopilot' has crashed into police cars, pedestrians, swamps and driven owners over cliffs.
- A12.) Musk is a lying con artist and partners with Goldman Sachs to rig the stock market. Sachs has a dedicated team of 18 men who rig stocks and valuation bumps for Musk.
- A13.) The "Silk Road" Cocaine and Murder-For-Hire website was created at Musk's SpaceX
- A14.) Musk's In-Q-Tel staff ran two transport planes filled with drugs; listed as "Cocaine 1" on FAA records.
- A15.) Senators Dianne Feinstein, Harry Reid, Nancy Pelosi, Kamala Harris and their associates own the stock in Tesla Motors and/or it's suppliers and mining companies. That is why they criminally help cover-up investigations of Tesla!
- A16.) All of this was reported, in writing, to James Comey, Patricia Rich and David Johnson at the FBI.
- A17.) Tesla and Solyndra sit on the same land and share staff, contracts and lobbying. California politicians own parts of both companies.
- A18.) Musk took over Tesla Motors in a hostile take-over in order to exploit lithium, cobalt and other mining corruption deals for his business partners.
- A19.) The 'lithium' in Musk's horrifically miss-engineered lithium ion batteries cause wars in the Congo over mining corruption.
- A20.) Afghanistan and Bolivian mobsters benefit from the corrupt mining deals involved with mining lithium and cobalt for Elon Musk's batteries.
- A21.) Elon Musk's Lithium ion batteries are insider trading-owned by ex-CIA boss Woolsey and DOE Boss Chu and they engaged in extreme conflict-of-interest to help Musk.
- A22.) Elon Musk's Lithium ion batteries excrete chemicals that mutate fetuses when they burn.
- A23.) Elon Musk's Lithium ion batteries destroy your brain, lungs and nervous system when they burn.
- A24.) Elon Musk's Lithium ion batteries kill the factory workers who make them.
- A25.) Elon Musk's Lithium ion batteries cause Panasonic to be one of the most corrupt companies in the world.
- A26.) Elon Musk's Lithium ion batteries poison the Earth when disposed of.
- A27.) Elon Musk's Lithium ion batteries can't be extinguished by firemen because water makes them explode even more and then explode again hours later.

- A28.) Elon Musk's Lithium ion batteries have chemical dendrites and deposition massing issues (revealed by X-Ray analysis) which makes them more and more likely to explode as they age.
- A29.) Elon Musk's Lithium ion batteries poison firemen when they burn.
- A30.) Elon Musk's Lithium ion batteries are based on criminally corrupt mining schemes like URANIUM ONE.
- A31.) Elon Musk's Lithium ion batteries have over 61 toxic chemicals in them.
- A32.) Elon Musk's Lithium ion batteries come from an industry that spends billions on internet shills and trolls that they hire to nay say all other forms of energy
- A33.) Elon Musk's Lithium ion batteries are insider-trading owned by corrupt U.S. Senators who are running a SAFETY COVER-UP about their dangers.
- A34.) Apple products with lithium ion batteries have been exploding and setting people on fire.
- A35.) Over time the chemical dendrites, or deposits, inside each battery grow worse and increase the chances of explosion as they age - LITHIUM ION BATTERIES BECOME MORE AND MORE LIKELY TO EXPLODE AS TIME GOES ON AND AS THEY AGE. This is not a theory. This is a scientific fact. That is why you hear about more and more lithium batteries catching fire and blowing up. Additionally, scientists also speculate that the increasing presence of low energy nuclear background energy and wifi energy in the environment is making lithium ion batteries explode more often lately. This is upheld by the increasing number of FAA reports about commercial airline cabins suddenly “filling up with toxic smoke” as some lithium ion battery explodes in someones overhead luggage. As commercial jets go higher they lose the protection of the atmosphere and are subjected to more gamma (and other) radiation from overhead. This makes the already unstable lithium ion batteries on board blow up.
- A36.) Tesla owner's had had more DUI's, abuse filings in divorce proceedings and crashes than any other car maker PER VOLUME. This makes Tesla the #1 car for douche bags and scummy people.
- A37.) Tesla's own federal patent filing records confirm that Tesla batteries are as dangerous as this document reports.
- A38.) "Bad Guys" have figured out how to make Elon Musk's Lithium ion batteries explode remotely in devices by making the device electronics cause the batteries to overload.
- A39.) The dangers of Elon Musk's Lithium ion batteries are hidden by CNN and Main Stream News (MSN) because pretty much only the DNC people profit from them and the DNC folks control CNN and the MSN.
- A40.) George Soros owns part of Tesla Motors so that Soros can help conduit DNC cash.
- A41.) The Obama Administration promised Silicon Valley oligarchs the market monopoly on lithium ion batteries and the sabotage of fuel cells in exchange for campaign financing and search engine rigging.
- A42.) United States Senators that are supposed to protect us from these deadly products own the stock market assets of them so they protect them and stop the FDA, OSHA, DOT & NHTSA from outlawing them.
- A43.) There have been thousands of defect reports filed on Tesla cars.
- A44.) Tom Steyer is a notorious DNC financier. His partner, Margaret Sullivan ran, the federal USAID agency, USAID sent all of the DNC campaign financiers in Silicon Valley a federal ‘report’ from USAID that said there was “A TRILLION DOLLARS OF LITHIUM IN AFGHANISTAN” and promised to give those lithium mines, EXCLUSIVELY, to the Silicon Valley venture capitalists if they funded and web search manipulated the election for Obama to take over the White House. We have the documents proving this. In other words, a re-up of the Afghan

War was caused by Elon Musk and it killed American soldiers so that Musk could buy more mansions and trophy wives.

A45.) If a Tesla battery gets wet it will explode and cause all of the other batteries to explode in a "cascade of explosions".

A46.) Water makes Tesla batteries explode.

A47.) In an accident, when a Tesla rolls over, molten metal & plastic can drip on & burn the occupants alive and seal them in molten metal.

A48.) Alkaline, NiCAD and hundreds of other battery chemistries DO NOT have all of these problems but Lithium Ion batteries get a monopoly because of politician insider trading owner-ships.

A49.) Tesla Motors has caused far more deaths and injuries than the world generally knows about.

A50.) A recent fire on U.S. Highway 101 near Mountain View, CA, burned the driver alive and killed him.

A51.) In Florida two kids died in a Tesla, burned alive, screaming in agony.

A52.) A man died in agony in a Tesla crash in Malibu that set Malibu Canyon on fire.

A53.) A young woman, at the start of life, and her boyfriend were burned alive in their crashed Tesla.

A54.) There are many more deaths and crashes than you have seen in the Main Stream News (MSN) The deaths and the cover-ups are endless.

A55.) Senators Dianne Feinstein, Harry Reid, Nancy Pelosi, Kamala Harris and their associates own the stock in Tesla Motors and/or it's suppliers and mining companies and they cover-up and halt investigations and laws designed to save the public.

A56.) Elon Musk's Lithium ion battery partners spend over \$1B a year to shill and troll hype about lithium ion batteries and cover-up the dangers.

A57.) Lithium ion EVs are more prone to battery fires.

A58.) Experts say that their lithium-ion batteries can fuel hotter fires that release toxic fumes and are more difficult to put out. Lithium ion fires keep reigniting which explains why it takes so long and requires copious amounts of water or foam (it is an electric fire, after all) to smother the flames.

A59.) Tesla employee Bernard Tse and his team warned Elon Musk about these dangers in 2008 and they got fired and/or warned to "say nothing" by Musk.

A60.) Three top Tesla engineers died in a plane crash next to Tesla offices in San Carlos after two of them agreed to become whistle-blowers. Another whistle-blower has suggested they were killed in a "Boston Brakes" hit-job.

A61.) The DNC bosses, Congress people and federal executives own the stock in lithium, Solar and EV markets and use kickbacks from those markets (Especially via convoluted campaign finance laundering via Elon Musk) to finance the DNC.

A62.) The DNC bosses and Musk use character assassination as their main political tool against any member of the public who speaks out against their felony stock market scams and PizzaGate-like scandals. The Harvey Weinstein reports by Ronan Farrow show that they have teams of hired goons that they pay to destroy people's lives.

A63.) They use Black Cube, Mossad, In-Q-Tel, Stratfor, Gawker Media, Gizmodo Media, Media Matters, David Brock, Sid Blumenthal, NY Times, Google servers, Facebook servers, Podesta Group, Perkins Coie, Covington & Burling and a host of "media assassins".

A65.) Musk buddies: Gawker and Gizmodo Media set-up the attack stories and, in paid partnership with Google, Google kicks their attack links around the globe, in front of 8 Billion people, forever. Google locks the attack articles of its enemies on the front top search results of Google search results forever, on purpose! Google and Musk are partners-in-crime.

A66.) Larry Page steals technology for Google and Musk meets with Larry Page to advise him on which technologies to steal and how to bypass FEC laws.

A67.) Musk has exceeded FEC campaign finance limits by billions of dollars via "in-kind" services.

A68.) Had the full scope of these facts been acted on during the Obama Administration, Barack Obama would have become the first modern sitting President to have been arrested in the White House. Barack Obama was fully aware of these schemes, crony payola deals and corruption crimes and discussed the implementation of these crimes, daily, with Rahm Emanuel, David Plouffe, Steven Rattner, Robert Gibbs, John Podesta, David Axelrod, Eric Holder and Jay Carney in the Oval Office.

A69.) THIS corruption involves TRILLIONS of dollars of corrupt mining deals, automotive and energy monopolies!

A70.) THIS is why the federal budget analysis reports are showing TRILLIONS of dollars of 'untraceable' losses from the United States Treasury from 2006 up to today!

A71.) THIS is why a large number of reporters, whistle-blowers and prosecutors suddenly, and mysteriously turned up dead!

A72.) The company that Elon Musk built to usher in the electric-car future might not have enough cash to make it through the calendar year.

A73.) Tesla again fell far short of its own production targets for the mass-market Model 3 sedan

A74.) Another person died in a crash involving its assisted-driving feature.

A75.) Musk entered into a public dispute with federal safety regulators.

A76.) Tesla's once high-flying stock, buffeted by a downgrade from credit analysts, has dropped 24 percent from its peak in September.

A77.) No one has raised or spent money the way Elon Musk has; Nor has any other chief executive officer of a public company made a bankruptcy joke on Twitter at a time when so much seemed to be unraveling.

A78.) Tesla is going through money so fast that, without additional financing, there is now a genuine risk that the 15-year-old company could run out of cash in 2018. The company burns through more than \$6,500 every minute, according to data compiled by Bloomberg. Free cash flow—the amount of cash a company generates after accounting for capital expenditures—has been negative for five consecutive quarters. That will be a key figure to watch when Tesla reports earnings May 2. Read the full story here: <https://www.bloomberg.com/graphics/2018-tesla-burns-cash/>

A79.) In years to come, we will all look back and wonder how so many people were taken in by this shyster, who makes Enron look honest.

A80.) One of Tesla's greatest strengths is its ability to monetize the patience and goodwill of its customers and loyal fans. The company is sitting on a staggering \$854 million in customer deposits as of the end of 2017.

A81.) Since Tesla sells its products direct to consumers, without relying on a dealer network, customer deposits are cash payments that essentially serve as interest-free loans—and these loans can stretch on for years. If Tesla were to go bankrupt, those deposit holders would likely be wiped out.

A82.) Tesla is holding customer deposits for two vehicles that aren't even in production yet: an electric Tesla Semi (\$20,000 deposit) and a next-generation Roadster (either \$50,000 down or the \$250,000 retail price paid up front to reserve a limited edition). Even customers interested in installing an array of solar roof panels or the company's Powerwall home battery must hand over \$1,000 to place an order.

A83.) Tesla doesn't break out deposit numbers by car, but the vast majority comes from \$1,000 reservations for the Model 3. When Musk first introduced the lower-priced sedan in March 2016, fans stood in long lines at Tesla stores. Two years later, the slower-than-expected pace of production means that most of the more than 400,000 reservation holders are still waiting. And new people appear to be joining the queue: As of April, the company reported "net Model 3 reservations remained stable."

A84.) There's an additional source of free money from loyal believers: An unknown number of customers have paid up for vehicle features—\$3,000 for "Full Self Driving" capability, for example—that Tesla thus far hasn't figured out or released to anyone.

A85.) Elon Musk cooked the books by emailing interested sales prospects and asked them to put a deposit down before each quarter ended so he could book their tiny deposits as fully transacted \$60K+ "sales" before each quarter closed.

A86.) Elon Musk and SpaceX are being sued by multiple employees for "lying about safety standards, safety records" and deadly safety defects.

A87.) The Elon Musk Tesla Money Laundering Board Of Directors is as full of fraud and corruption as Musk. Birds of a feather stick together and the Jurvetson, Draper, Musk, et al; clan of corruption runs deep. The Board of Directors can't operate their scam without the whole pack of thieves and liars in place. An outsider will break theirs swamp of tax evasion, Dark Money political bribes, off-shore cash, self-dealing, book-cooking, real estate fraud, expense padding and other nefarious deeds.

A88.) Dianne Feinstein's family member: Herb Newman of Sausalito, California's HR firm: Newman Search (415 332-8425) has a company as of 1972 with the sole purpose of setting up investment bank deals with the People's Republic of China. Feinstein arranged for Newman to provide the staffing for Tesla and Solyndra. Dianne Feinstein has been under investigation for spy activities with China and her senior aide was arrested as a Chinese top spy. In 1973 Mr. Newman arrived in Canton at the invitation of the Chinese Council for the Promotion of International Trade. (CCPIT). He and his company MVTC were one of fifty businesses to be invited to the Canton Trade Fair held in Kwangchow China. In 1978 Mr. Newman founded China Investments and in partnership with California Trade Delegations both companies as members of the San Francisco Chamber of Commerce began taking US Corporations to China. Mr. Newman along with one of his associates at the time Mr. Darryl Schoon helped organize Senator Dianne Feinstein's first trip to China in conjunction with the San Francisco Chamber of Commerce. Herb Newman, Mart Bailey and Feinstein's Husband; Dick Blum are on intelligence agency watch-lists, and under electronic surveillance, for potentially corrupt deals with China, Tesla and Solyndra.

A89.) Dianne Feinstein's husband owns CBRE which owns the real estate contracts for both Tesla and Solyndra.

A90.) Dianne Feinstein's family owns interests in the construction companies hired by both Tesla and Solyndra.

A91.) Dianne Feinstein had her staff warn other California businesses away from using the NUMMI car factory in order to protect the real estate deal for both Tesla and CBRE, which is owned by her husband.

A92.) Tesla began real estate deals in multiple states and then cancelled them at the last minute, which got them sued for fraud and charged with "lying" to different communities. They started, and then pulled out of these different building (San Jose, Southern California, New Mexico, Etc.) deals, because CBRE and Feinstein were trying to leverage real estate profit exploitation using taxpayer funding.

A93.) Panasonic and Tesla have known for decades that the Panasonic 18650 batteries used in the Tesla suffer from multiple chemistry degradation defects which will almost always make them eventually explode or "go thermal". The defects include: 1.) LENR activation, 2.) Dendrite lengthening, 3.) Particle congealing, 4.) Chemistry evolution and other defects. The Tesla project is, essentially, a failed product product dumping effort of a failed and dangerous battery product.

A94.) Elon Musk has demanded that his employees sign "loyalty pledges", "vows" and engage in Omerta's in order to keep the corruption details of Tesla from being exposed to the public.

A95.) Tesla insider Antonio Gracias is the mob boss insider at Tesla who arranges media hit-jobs on those who displease Musk.

A96.) The NHTSB has issued requests to Tesla for safety tests and data that Tesla never complied with. Instead, Tesla paid bribes, which were referred to as "fees" to avoid having to complete those tests. An independent group of outside investigators issued a damning safety report to the NHTSB demanding that Tesla be compelled to produce the safety tests in 2010 but Obama appointed NHTSB executives buried the report and protected Tesla in order to keep the connection between Obama's funding and Tesla protected. NHTSB boss: Strickland, an Obama insider, was confronted with this in Washington, DC and resigned from his job 48 hours later. NHTSB has still not acted on the severe Tesla safety defects that have been reported since 2009.

A97.) An SEC investigation of Musk uncovered horrific evidence of Musk corruption but the SEC could not report or act on it because Obama congressional bosses and lobbyists got the SEC investigation "limited" to only examine a single Twitter "Tweet" from Musk.

A98.) Elon Musk is protected by top DOJ, SEC, CFTC, FEC and other Obama left-over staff as well as 45 U.S. Senators and top Federal Reserve members and Goldman Sachs, who live in terror that exposure of the entire Elon Musk financial food-chain will topple the entire DNC Dark Money payola scam. This is the reason that Tesla can get away with so much obvious and overt corruption and still continue operations. Tesla Motors book-cooking, financial frauds and political payola conduits, if fully revealed, would change the course of political influence in America.

A99.) Elon Musk has been sued by a man that Musk called a "Pedo", yet Musk's own father has been accused of child sex abuse, racism and, indeed, got his own daughter pregnant!

A100.) Elon Musk's mother has been accused of being a "self-indulgent trophy wife" who Musk was trained by to be an arrogant elitist. Her hatred of black people was imbued on Musk who has been sued by black people at his company for "running a racist culture".

A101.) Elon Musk divorced the same woman twice because she knew his dirty little secret and threatened to out him if he did not keep the deal going. She was hired to "act" as his wife.

A102.) Musical artist Iggy Azalea was at a Musk Party, with other friends, who captured Elon Musk on video on drugs and in weird sex acts. Musk had Iggy's camera stolen at the party to hide the evidence but he did not get the

other cameras and did not realize that some of those cameras placed their images and videos directly on the Cloud, where hackers acquired them.

A103.) With cover-up help from Eric Holder, Steven Chu, Obama, Valarie Jarret, DNC FBI agents, Perkins Coie, Covington and Burling, Wilson Sonsini, etc; sociopath Musk actually believes he is "untouchable" and that he can get away with anything. His downfall will be the same downfall of every narcissist sociopath oligarch throughout all of recorded history.

A104.) Elon Musk is a drug addict. A simple urine and blood test proves it. Musk's downfall and the downfall of John DeLorean are seeming to align.

Who is violating the law protecting Tesla by withholding investigations and prosecutions?

Why are they allowing American citizens to continue to die from the 1.) "sudden acceleration electronics defect"; 2.) "The failed Auto-pilot electronics defect"3.) "The deteriorating and deadly lithium ion batteries" and 4.) numerous other defects widely documented in the news media and filed lawsuits?

Why Elon Musk is a really bad guy and why his business operation is a corruption scam

By Former Tesla Staff

Musk spends billions per year to hire Russian trolls, fake blogger fan-boys and buy fake news self-glory look-at-me articles about himself. Musk thinks he is the 'Jesus' of Silicon Valley and he will do anything to make the public think so. Musk is insecure because his father was abusive and his “trophy wife” Mother is overbearing so he developed sociopath-like mental issues. Musk has been professionally diagnosed as a 'psychotic narcissist. He publicly stated on an investor call that he uses drugs and alcohol to get through the night. We have the tapes.

The DNC and the MSM refuse to allow any articles about Musk's crimes to be printed because they benefit from Musk's crimes. VC's Tim Draper and Steve Jurvetson are so fanatical about not being embarrassed from a Tesla bankruptcy that they will pump the TSLA stock and threaten anybody who might disclose the Musk misdeeds. Peter Thiel, a Musk ‘boyfriend’ also protects Musk. Musk, and his cronies, use Palantir, Google and related software to scan the entire internet every few minutes for any occurrence of the words: “Musk”, “Tesla” or “Tesla Fire”. They send trolls and fake bloggers (Many of them Russian) to put pro-Musk comments on the comments section of any blogs or articles discussing those topics and try to flood out the truth about Musk. In EVERY blog that you read that mentions 'Musk', at least 1/3 of the comments have been placed their by Musk's paid shills. There are no “Tesla Fan Boys”. All of the fanatic Tesla comments on the internet are Musk's, Thiel's, Jurvetson's and Draper's fake fanboy trolls. Musk, himself, stays up late at night pretending to be a ‘Tesla Fan Boy’ on blogs. Main Stream News organizations who refuse to cover the story reveal themselves as shills and are then targeted for bankruptcy (ie: Time, Gawker, etc.) because they serve no public service.

The Silicon Valley Mafia promotes Musk as a "Tech God" leader but, in reality Musk is the same kind of "Leader" as Charles Manson, Jim Jones, David Koresh, Swami Rajneesh and Al Capone. His own people have sued him for fraud and lies once they realized that Musk-ism and Scientology had so much in common.

Musk and his culture are being sued for abuse to women and blacks and the Unions hate him for lying to them. <https://stopelonfromfailingagain.com> reveals even more Musk lies.

Musk's "Starlink" satellites are domestic spy and political manipulation tools - never get your internet from anything SpaceX has launched. SpaceX is entirely a domestic spy operation. Musk's "Mars" scheme is just a PR distraction.

If you pull a report of every VIN# of every Tesla ever built and cross reference that with insurance, repair and lawsuit records you will find that the "per volume" fire, crash, death and defect rate is THE WORST of any car maker in history! Musk's lobbyists have bribed DOT and NHTSA to stall safety inspections. NO COMPLETE UNCOMPROMISING SAFETY REPORT ON TESLA CARS HAS EVER BEEN PUBLISHED but we have a copy of a hushed up report that would put Tesla out of business. Musk's 'Autopilot' system is a scam to get government cash BUT IT NEVER WORKS. The Tesla 'Autopilot' has crashed into police cars, pedestrians, swamps and driven owners over cliffs.

Musk is a lying con artist and partners with Goldman Sachs to rig the stock market. Sachs has a dedicated team of 18 men who rig stocks and valuation bumps for Musk. The "Silk Road" Cocaine and Murder-For-Hire website was created at Musk's SpaceX and Musk's In-Q-Tel staff ran two transport planes filled with drugs; listed as "Cocaine 1" on FAA records.

Over 1000 witnesses can prove every one of those claims in any live televised Congressional hearing! Senators Dianne Feinstein, Harry Reid, Nancy Pelosi, Kamala Harris and their associates own the stock in Tesla Motors and/or it's suppliers and mining companies. That is why they criminally help cover-up investigations of Tesla! All of this was reported, in writing, to James Comey, Patricia Rich and David Johnson at the FBI. Tesla and Solyndra sit on the same land and share staff, contracts and lobbying. California politicians own parts of both.

Tesla owner's had had more DUI's, abuse filings in divorce proceedings and crashes than any other car maker PER VOLUME. This makes Tesla the #1 car for douche bags and scummy people.

Tesla's own federal patent filing records confirm that Tesla batteries are as dangerous as this document reports.

"Bad Guys" have figured out how to make them explode remotely in devices by making the device electronics cause the batteries to overload. The dangers of lithium ion batteries are hidden by CNN and Main Stream News (MSN) because pretty much only the DNC people profit from them and the DNC folks control CNN and the MSN. George Soros owns part of Tesla Motors so that Soros can help conduit DNC cash.

The Obama Administration promised Silicon Valley oligarchs the market monopoly on lithium ion batteries and the sabotage of fuel cells in exchange for campaign financing and search engine rigging; United States Senators that are supposed to protect us from these deadly products own the stock market assets of them so they protect them and stop the FDA, OSHA, DOT & NHTSA from outlawing them. There have been thousands of defect reports filed on Tesla cars.

If a Tesla battery gets wet it will explode and cause all of the other batteries to explode in a "cascade of explosions". Water makes Tesla batteries explode. In an accident, when a Tesla rolls over, molten metal & plastic can drip on & burn the occupants alive and seal them in molten metal.

Alkaline, NiCAD and hundreds of other battery chemistries DO NOT have all of these problems but Lithium Ion batteries get a monopoly because of politician insider trading owner-ships.

Had the full scope of these facts been acted on during the Obama Administration, Barack Obama would have become the first modern sitting President to have been arrested in the White House. Barack Obama was fully aware of these schemes, crony payola deals and corruption crimes and discussed the implementation of these crimes, daily, with Rahm Emanuel, David Plouffe, Steven Rattner, Robert Gibbs, John Podesta, David Axelrod, Eric Holder and Jay Carney in the Oval Office.

THIS corruption is what all of the big political scandals are about today!

THIS corruption involves TRILLIONS of dollars of corrupt mining deals, automotive and energy monopolies!

THIS is why the federal budget analysis reports are showing TRILLIONS of dollars of 'untraceable' losses from the United States Treasury from 2006 up to today!

THIS is why a large number of reporters, whistle-blowers and prosecutors suddenly, and mysteriously turned up dead!

THIS can all be proven in jury trial and in live televised Congressional hearings!

There is so much more to reveal but you get the picture.

This is all being covered up because top State and Federal officials are in on it, own the stock in it and are so deeply involved in it that they could go to Federal prison when this all comes out.

This is Part 1. There is more to be released. Show this document to the United States Senate and see what they say about all this..."

A complete guide to how Elon Musk has raised, and then spent, billions of dollars, mostly from your tax money and pension funds.

The company that Elon Musk built to usher in the electric-car future might not have enough cash to make it through the calendar year.

The anxieties that lurk beneath the tremendous ambition of Tesla Inc. moved into the forefront in recent weeks. The company again fell far short of its own production targets for the mass-market Model 3 sedan, another person died in a crash involving its assisted-driving feature and Musk entered into a public dispute with federal safety regulators. Tesla's once high-flying stock, buffeted by a downgrade from credit analysts, has dropped 24 percent from its peak in September.

There's a good reason to worry: No one has raised or spent money the way Elon Musk has. Nor has any other chief executive officer of a public company made a bankruptcy joke on Twitter at a time when so much seemed to be unraveling.

Tesla is going through money so fast that, without additional financing, there is now a genuine risk that the 15-year-old company could run out of cash in 2018. The company burns through more than \$6,500 every minute, according to data compiled by Bloomberg. Free cash flow—the amount of cash a company generates after accounting for capital expenditures—has been negative for five consecutive quarters. That will be a key figure to watch when Tesla reports earnings May 2.

<https://www.bloomberg.com/graphics/2018-tesla-burns-cash/>

In years to come, we will all look back and wonder how so many people were taken in by this shyster, who makes Enron look honest.

A lot of Musk's money has been extracted from suckers, who think he is God's gift, as Bloomberg report: other defects widely documented in the news media and filed lawsuits?

Why Elon Musk is a really bad guy and why his business operation is a corruption scam

One of Tesla's greatest strengths is its ability to monetize the patience and goodwill of its customers and loyal fans. The company is sitting on a staggering \$854 million in customer deposits as of the end of 2017.

Since Tesla sells its products direct to consumers, without relying on a dealer network, customer deposits are cash payments that essentially serve as interest-free loans—and these loans can stretch on for years. If Tesla were to go bankrupt, those deposit holders would likely be wiped out.

Tesla is holding customer deposits for two vehicles that aren't even in production yet: an electric Tesla Semi (\$20,000 deposit) and a next-generation Roadster (either \$50,000 down or the \$250,000 retail price paid up front to reserve a limited edition). Even customers interested in installing an array of solar roof panels or the company's Powerwall home battery must hand over \$1,000 to place an order.

Tesla doesn't break out deposit numbers by car, but the vast majority comes from \$1,000 reservations for the Model 3. When Musk first introduced the lower-priced sedan in March 2016, fans stood in long lines at Tesla stores. Two years later, the slower-than-expected pace of production means that most of the more than 400,000 reservation holders are still waiting. And new people appear to be joining the queue: As of April, the company reported “net Model 3 reservations remained stable.”

There's an additional source of free money from loyal believers: An unknown number of customers have paid up for vehicle features—\$3,000 for “Full Self Driving” capability, for example—that Tesla thus far hasn't figured out or released to anyone.

The consumer psychology that sees hundreds of thousands of people essentially extending an interest-free loan to a public company is unusual, to say the least. Consider the devotion of Bruce Sidlinger, a 60-year-old aerospace engineer who lives in Flagstaff, Arizona:

“The morning after the Roadster was announced, I put a deposit down. Putting down \$50,000 for a Roadster that won't be out for a few years is kind of like buying a bond that returns zero. Elon Musk is one of our planet's great hopes. I would offer a kidney to him if he needed it.”

Keep in mind that Sidlinger already owns both a Model S and a Model X. He drove across the country to Florida earlier this year in a car made by one Musk company so he could watch a rocket made by another Musk company take flight for the first time.

I think the phrase “more money than sense” rather sums it up

Apple and Google also named in US lawsuit over Congolese child cobalt mining deaths for Elon Musk's Tesla Cars

Exploitation in focus

Global development

Dell, Microsoft and Tesla also among tech firms named in case brought by families of children killed or injured while mining in DRC

• Comment: ‘I saw the unbearable grief inflicted on families by cobalt mining. I pray for change’

Exploitation in focus is supported by

About this content

Annie Kelly

A landmark legal case has been launched against the world's largest tech companies by Congolese families who say their children were killed or maimed while mining for cobalt used to power smartphones, laptops and electric cars, the Guardian can reveal. Apple, Google, Dell, Microsoft and Tesla have been named as defendants in a lawsuit filed

in Washington DC by human rights firm International Rights Advocates on behalf of 14 parents and children from the Democratic Republic of the Congo (DRC). The lawsuit accuses the companies of aiding and abetting in the death and serious injury of children who they claim were working in cobalt mines in their supply chain. The families and injured children are seeking damages for forced labour and further compensation for unjust enrichment, negligent supervision and intentional infliction of emotional distress. It is the first time that any of the tech companies have faced such a legal challenge. Cobalt is essential to power the rechargeable lithium batteries used in millions of products sold by Apple, Google, Dell, Microsoft and Tesla every year. The insatiable demand for cobalt, driven by desire for cheap handheld technology, has tripled in the past five years and is expected to double again by the end of 2020. More than 60% of cobalt originates in DRC, one of the poorest and most unstable countries in the world. Aerial view of the Kasulo neighborhood of Kolwezi. In the first picture, taken May 2016, there are just residential houses. By May 2019, Congo DongFang International Mining (a subsidiary of Chinese company Huayou Cobalt) have built a mining site, with a walled perimeter and processing buildings (in blue). The pink tarps cover tunnels used for mining. The extraction of cobalt from DRC has been linked to human rights abuses, corruption, environmental destruction and child labour. The lawsuit argues that Apple, Google, Dell, Microsoft and Tesla all aided and abetted the mining companies that profited from the labour of children who were forced to work in dangerous conditions – conditions that ultimately led to death and serious injury. The families argue in the claim that their children were working illegally at mines owned by UK mining company Glencore. The court papers allege that cobalt from the Glencore-owned mines is sold to Umicore, a Brussels-based metal and mining trader, which then sells battery-grade cobalt to Apple, Google, Tesla, Microsoft and Dell.

Other plaintiffs in the court documents say they worked at mines owned by Zhejiang Huayou Cobalt, a major Chinese cobalt firm, which the lawsuit claims supplies Apple, Dell, and Microsoft and is likely to supply the other defendants.

In the court documents, the Congolese families describe how their children were driven by extreme poverty to seek work in large mining sites, where they claim they were paid as little as \$2 (£1.50) a day for backbreaking and dangerous work digging for cobalt rocks with primitive tools in dark, underground tunnels.

The families claim that some of the children were killed in tunnel collapses while others were paralysed or suffered life-changing injuries from accidents.

I saw the unbearable grief inflicted on families by cobalt mining. I pray for change

Another child, referred to as John Doe 1, says that he started working in the mines when he was nine. The lawsuit claims that earlier this year, he was working as a human mule for Kamoto Copper Company, carrying bags of cobalt rocks for \$0.75 a day, when he fell into a tunnel. After he was dragged out of the tunnel by fellow workers, he says he was left alone on the ground at the mining site until his parents heard about the accident and arrived to help him. He is now paralysed from the chest down and will never walk again.

Other families included in the claim say that their children were killed in tunnel collapses or suffered serious injuries such as smashed limbs and broken spines while crawling through tunnels or carrying heavy loads. The families say that none were paid any compensation for the deaths and injuries.

One of the central allegations in the lawsuit is that Apple, Google, Dell, Microsoft and Tesla were aware and had “specific knowledge” that the cobalt they use in their products is linked to child labour performed in hazardous conditions, and were complicit in the forced labour of the children.

The families argue in the court papers that all companies named as defendants entered into commercial “ventures” with the mining companies operating in DRC, and all gained significant financial advantages from the widespread illegal mining of cobalt by children, which continues to enter global supply chains.

Children digging for cobalt near Lake Malo. Photograph: Siddharth Kara The court papers claim that Apple, Dell, Microsoft, Google and Tesla all have the authority and resources to supervise and regulate their cobalt supply chains and that their inability to do so contributed to the deaths and injuries suffered by their clients. A spokesperson for Glencore said: “Glencore notes the allegations contained in a US lawsuit filed on 15th December 2019.

“Glencore supports and respects human rights in a manner consistent with the universal declaration of human rights.

“Glencore’s production of cobalt in the DRC is a by-product of our industrial copper production. Glencore’s operations in the DRC do not purchase or process any artisanally mined ore.

“Glencore does not tolerate any form of child, forced, or compulsory labour.”

Huayou, Apple, Google, Dell, Microsoft and Tesla have also been approached for comment.

THE BOTTOM LINE ON ELON MUSK:

The facts are:

- That an organized crime program exists between Silicon Valley tech oligarchs, investment banks, U.S. Senators, government agency staff and White House staff to engage in these crimes.
- That public officials knowingly participate in these crimes by failing to report their associates who engage in these illicit actions and by hiring suppliers who operate these illicit activities.
- That the suspects manipulate government funds for their personal profiteering at the expense of domestic citizen taxpayers like us.
- That the suspects operate a vast stock market manipulation program, as a core function of their operations, and those illicit deeds function at the expense of the public to render unjust gain to public officials.
- That the suspects contract a known group of lobbyists, corrupt law firms, unethical CPA's, corrupt investment banks and specialized corruption services providers to attack, defame, physically harm, character assassinate, black-list and/or kill those they dislike and they harmed us with those acts.
- That the suspects operate an Epstein-like sex-trafficking network of prostitutes and sexual extortion activities and locations for the engagement of said activities and for the bribery of cohorts via sex workers.
- That the suspects engage in electronic attacks and manipulations including hacking, election manipulation, media censorship and internet search results manipulation in order to mask their schemes.
- That the suspects engage in Lois Lerner-like, SPYGATE-like, VA whistleblower-like reprisal and retribution attacks using government agencies like SSA, DOJ, FBI, LSC, HUD, HHS, DOE, Etc.

We demand that Elon Musk be arrested on RICO Racketeering, Anti-Trust, Tax Evasion, Bribery, and related charges!

What a twisted, raging, sick pervert, narcissist, vengeful, anti-competitive, monopolistic, Goldman Sachs sucking, hit-man hiring mobster!

--- The Musk empire has paid more bribes to politicians than almost any other modern entity. That is why no full investigation of the Musk scams has ever been completed.

---- Elon Musk, Larry Page, Steve Jurvetson and Jared Birchell hire Ex-CIA losers right after they are fired by the CIA, or directly from IN-Q-TEL or from Fusion GPS, Media Matters and other CYBER ASSASSIN KILL SERVICES. They send their hit men after competitors, reporters, ex-employees and whistle-blowers because they chose to CHEAT RATHER THAN COMPETE! ---- Elon Musk's "Twitter Purchase" is just a scam to sell his Tesla stock without the SEC or his old investors noticing: THEY NOTICED!

---- Google's Eric Schmidt and Larry Page have a bromance relationship with Musk and use the global resources of Alphabet to hide any negative news about Musk assets. The 2008 Department of Energy Cleantech Crash proves that a federal agency was used as just one big slush-fund to pay-off political campaign financiers, operate insider-trading stocks and sabotage those financiers competitors using taxpayer-financed resources!

---- We have used private investigator, FBI resources and deep AI research to reveal that all government staff working on our application were getting quid-pro-quo...they were on the take. (Can anyone point out to us EVEN ONE person who was in the DOE/White House loop who was not working for, invested in, getting a future job from or other wise conflicted?) What do you do when The U.S. Government convinces you to invest millions of dollars, and your life, into one of their projects.

---- Then their project turns out to be a scam where they had covertly hard-wired the upside to a couple of Senator's and their campaign financier friends. The fix was in and the game was rigged to use a government program as a slush-fund for friends-with-benefits. We, and the public, got defrauded. Now the damages must be paid for, one way, or another.

---- Every one of the insiders who did get government funding got it in the exact same size and order as their covert political campaign funding and stock market bribes to the deciders. Chamath Palihapitiya and other Silicon Valley insiders have now exposed the fact that Greylock, Kleiner, etc. are just a VC Ponzi Scheme! in this whole mess.

---- Musk used crooked Senators to get his funds. Those Senators and government agency bosses were financed by, friends with, sleeping with, dating the staff of, holding stock market assets in, promised a revolving door job or government service contracts from, partying with, personal friends with, photographed at private events with, making profits by consulting for, exchanging emails with, business associates of or directed by; one of those business adversaries, or the Senators and politicians that those business adversaries pay campaign finances to, or supply political search engine manipulation services to.

--- Elon Musk is notorious for getting Department of Energy money by bribing public officials and placing his friends: Steven Chu, Matt Rogers, Steve Westly, Steve Spinner's 'special friend', etc. on the staff of the Department of Energy and in the White House. We have FBI-class records, financial tracking, emails, stock market relay records and other forensic data that proves it.

---- We can swear, warrant, certify and prove these assertions in front of Congress in a live Congressional hearing or Civil Jury trial, given non-compromised legal backing. If you think you have bribed the same number of Senators, bought a President and taken over most of the Department of Energy like Musk did... go for it! In this day and age, with every citizen able to track every public figure, with FBI-quality databases, on their home computers, it might be a crash-and-burn but you are welcome to try.

---- Lithium metals, and other rare earth mining materials, are monopolized by Elon Musk and his Silicon Valley Cartel, in rare-earth corrupt mining scams. Lithium's widespread use in cars is hindered by a challenging obstacle: upon multiple charge-discharge cycles, fractal filaments called dendrites always grow through the electrolyte from the negative to the positive electrode and short-circuit the battery from the inside, thus guaranteeing that Tesla Cars will eventually all explode. Musk and Panasonic have known this since 2007 (They are "dumping" the batteries via Tesla) and have paid U.S. Senators, who own stock in Tesla, to cover it up.

---- The lithium fires and toxic vapors are a major safety concern because they have killed, poisoned and injured too many citizens. Musk gets away with his scams because he pays U.S. Senators bribes with stocks in his corporations and has a thousand crooked Goldman Sachs investment bankers selling his hair-brained schemes to your parents pension funds.

---- Tesla is known as “the official car of douche-bags”. The safety defect cover-ups on the Tesla are extreme. Musk’s narcissistic trophy-wife mom and his extremist father (who got his young sister pregnant) are thought to be the cause of Musk’s racism and sociopath behaviors.

---- Musk is the POSTER BOY OF WHITE ANTI-BLACK PRIVILEGE

---- He is the #1 crony capitalist government mooch in America and has received billions of dollars of your tax money to help him buy his mansions, starlets and sex parties.

---- He pays women for sex and pays other women not to disclose that he tried to sexually extort them. He paid Amber Heard at least \$500K for sex, paid his stewardess \$250K to report his sex abuse of her, and has a provider service via a layer of insiders.

---- His cars and rockets blow up, his tunnels are unsafe, his satellites spy on consumers and his brain chip company tortures small animals. He swiped all of his technology from someone else and has never come up with his own inventions.

---- Space-X is just a domestic spying company. Don’t buy Musk’s bullshit about Space-X doing any good deeds. Everything Space-X launches is to spy on the poor folks on the ground and monitor their internet. Also, Musk’s Neuralink company tortures small animals to try out Musk’s pseudo-science mind-reading chips.

---- See: <https://carbuzz.com/news/nearly-500000-tesla-models-have-serious-defects>

---- THESE CARS BLOW-UP AND RELEASE POISON SMOKE THAT WILL POISON YOU, YOUR FAMILY AND YOUR FETUS!!!!!!

---- THE VAMPIRE POWER DEFECT: Your Tesla will suck more power than it needs in order to try to charge itself. A huge bunch of Tesla charging cords set themselves on fire. IF YOU WANT YOUR HOME OR OFFICE TO BURN DOWN, THEN PARK YOUR TESLA INSIDE IT.

----- TESLA HAD to POWER DOWN all of their cars because they blow up when charging. THIS MEANS THAT THE CAR THAT WAS ADVERTISED IS NOT THE CAR THAT YOU BOUGHT! BECAUSE OF TESLA'S BAD ENGINEERING, ALL OF THEIR CARS HAD TO HAVE ADDED SAFETY SHIELDS AND POWER REDUCTION AFTER-MARKET PROGRAMMING TO DETUNE THEM.

---- TESLA'S GO OUT OF CONTROL ALL OF THE TIME AND CRASH

----- HORRIBLE DEFECTS: Not everything is unicorns and rainbows when it comes to an electric vehicle, and Tesla (undoubtedly) has a few kinks to work out. However, some of these flaws have seemingly been ignored or swept away from the public eye. There are some things that are never openly admitted or speculated about Tesla vehicles, yet we harshly criticize run-of-the-mill autos with ease. Out of fairness—and for potential buyers,

necessity—we should take a look at a few of the complaints that current owners have raised about these beloved EVs.

---- **AWFUL BUILD QUALITY:** If you have ever experienced difficulties with a Tesla, firsthand, then you probably know better than anyone how pricey repairs can become if they're not covered by a warranty or insurance. This explains why insurance premiums are so high for these vehicles. However, the truth of the matter is that even if you're not paying to replace those parts, they are much poorer quality than we're all led to believe. If Tesla's parts were, in fact, of great quality, then we wouldn't have freak issues such as bolts rusting off after a mere few years of ownership, or falcon doors constantly misaligning themselves. Not everything on a Tesla is inherently low-quality, but Tesla is certainly cutting corners. The durability shows in the longevity of the parts and by how early rattling, squeaking, and other common problems seem to surface.

---- **HORRIBLE SPEEDOMETER PLACEMENT:** The golden rule we're all taught in driving school is to keep your eyes on the road. This is, obviously, why police have been cracking down on drivers who use handheld electronic devices while driving. You would expect that a carmaker would probably build a car with safety in mind and take things like this into consideration during the design process. But technology comes first for Tesla. Their (controversial) touchscreen is also the home for the speedometer, which on the edge of the driver's peripheral vision, which means that they have to look away from the road in order to see what speed they're going. It's not necessarily the biggest problem, at least in hindsight, but it can become a dangerous feature for the unsuspecting. Still, the feature is shared with the Mini Cooper, including the electric Mini Cooper SE.

---- **INSANELY EXPENSIVE TO REPAIR:** Part of the appeal of buying something expensive is the expectation that it will save you money in the future. But Tesla has earned a spot in the hall of fame for overpriced vehicles, and that doesn't just apply to the sticker price but also takes into account all the maintenance costs that plague owners. Even though the Tesla's don't need oil changes, spark plug replacements, or oil filters, Tesla recommends drivers invest in their maintenance plans that include a thorough inspection of the vehicle every 12,000 miles. The prices vary based on the year and model of the car, as well as which specific plan the driver chooses, but standalone inspections range anywhere from \$475 to \$750 per visit (not including repairs). A four-year maintenance plan is around \$2,500. Needless to say, you'll need to have a good chunk of change set aside for these evaluations. Issues extend to tires and poor suspension, and yes, we will certainly mention the battery.

---- **EXTENSIVE STEERING FAILURES:** It's true that Teslas tend to carry a bit of technological baggage with their state-of-the-art devices. Most of it is just annoying more than it is dangerous, but rest assured, Tesla has also managed to squeeze in a few mechanical problems as well. They've been much less common than the cosmetic flaws but can have life-threatening outcomes. A few new Tesla owners have experienced problems with the steering wheel locking up while turning. Not only will you see your life flash before your eyes, but you may be dismayed to find out that several weeks of repairs are typically involved since it's not an issue that Tesla has completely resolved. This is before we even bring to light the new "yolk" steering wheel in the Model S Plaid.

---- **YOU CAN NEVER GET YOUR CAR BACK FROM THE SERVICE CENTERS:** Speaking of car troubles, Tesla dealerships are so sparse that many owners are forced to plan out their trip to the service center much more thoroughly than the average driver would. Unfortunately, the plight with their new Tesla's can sometimes be uncharted territory for mechanics—this is a relatively new technology, after all—so it may take several days, and sometimes even weeks, before owners get to see their cars again. What's worse is that many of these technical difficulties aren't fully resolved during the first visit. Like we've said before, there isn't much knowledge on electric vehicles and technicians may not be as familiar with the problems that plague these vehicles, primarily because a Tesla operates more like a computer than it does an old gas guzzler.

---- TESLA CARS SPY ON YOU: Teslas are incredibly connected... to the point that they're able to (potentially) predict when you plan to drive them and what routes. Elon hasn't been known for respecting privacy and his first company, PayPal, has even been in lawsuits for it. All respect to his technological advancement, but consider what a man creating a chip for your brain is trying to do with your car! Face recognition, video sharing with or without consent, and Tesla monitoring your driving history and patterns are all open for discussion and unless you dig really deep or have a law degree, you might not be safe. If you're a criminal or just worry about being watched, this is one of the last bit of tech pieces you would want. Some have even raised red flags over issues of hacking Teslas for a new world of issues.

---- THE EMERGENCY RELEASE WILL SCREW YOU: It may seem like a nitpick (and it is) but the terrible placement of the emergency handle is also a potential threat to the car and therefore, it's a necessary point to bring up. Since Tesla's vehicles don't have your average door handle and everything in the car is electric, the manufacturer was witty enough to install an emergency handle on the interior to prevent passengers from getting trapped inside. There's just one little flaw with this idea: the placement. Since new passengers aren't used to the high-tech vehicle, they tend to go for the emergency handle instead of using the standard electric button that opens the door. This is an honest mistake since the emergency handle is near where a door handle normally would be, but if it's pulled too often it can and will crack the window. And that's the last thing any Tesla owner wants to deal with.

---- DEADLY BLIND SPOTS: Another feature that is seen in many modern-day vehicles (electric or not) is blind-spot detection. This is a nice touch to have and is practically expected on a high-end vehicle these days. The only thing that separates Tesla from other manufacturers that are employing blind-spot detection is the placement of the detector. Similar to the difficulty that people have seeing the speedometer, the blind-spot detection doesn't alert drivers of a threat on the side-view mirrors like most vehicles do. Instead, a notice pops up on the touchscreen. A lot of people have something against the touchscreen and, while we don't find it to be all bad, there are instances such as this one when it's understandable why it can become a nuisance. If every feature is integrated into the touchscreen, it seems like the entire car revolves around a mounted iPad.

---- BAD COSMETIC DETAILS: Have you ever bought something nice only to have it experience defects shortly after? If you've put a good amount of cash into it, it's not only inconvenient but also extremely frustrating. Proud Tesla owners have been extremely let down to find that their overpriced electric vehicle has scratches all over their car and bulges in the windshield. These unfortunate Teslas were born with cosmetic defects from the factory. Clearly, the newbie manufacturer hasn't been able to get the assembly process down yet. Waiting out the initial wave of manufacturer defects would be wiser than jumping on a waiting list for the latest and greatest model.

---- ZERO FUTURE PROTECTION: Except Tesla and Rivian, there have been no major car manufacturers to emerge in almost 100 years. Naturally, this doesn't include off-shoot luxury brands or foreign brands that were bought out. Tesla respectably came from the ground-up in the 21st century on its own. That being said, it doesn't have a long carefully-recorded history of reliability, work ethic, or quality control, and it shows hard. Besides body gaps that range from dog doors to atomic fusion, the real longevity of a Tesla is almost entirely unknown. The used market for a Tesla is not great to begin with, but with the emergence of high battery replacement costs, how the old Teslas hold up is a big fat question mark. New rules and restrictions like to speed or features can be turned off without your consent remotely at the whim of a the bureaucrats.

---- VERY UNSAFE WHEEL DESIGN: There are some things that you never know about a car until you personally own it. And, to be fair, owners tend to critique their own cars harshly. A common nitpick with the Tesla Model 3 is the obnoxious fact that it comes with all-terrain (otherwise known as, 'all season') tires. Many Model 3 owners dislike this because they want more performance-oriented tires. Not to say that it's not a smooth ride—it has received incredible reception for that alone—but if it was included with performance tires, the experience could be

enhanced tremendously. The shared belief among many owners (specifically, those who don't need winter tires) is that all-terrain tires should be something that a buyer can purchase on their own if they happen to need them.

---- BATTERY REPLACEMENT IS A NIGHTMARE: Along with the sketchy aspect of having an electric vehicle, there's also a major setback on the cost to repair it as well. While a charge may not be so pricey, the cost to replace any of the parts on a Tesla can really become a burden. For instance, if you had to buy a new battery for a Model 3, the base would cost around \$9,500 (on the low end) and the extended-range battery would come close to \$16k. Sadly, that's as much as a used car (maybe even a few). There's a domino effect with these overpriced repairs as well, as the price to insure a Tesla tends to be more than the average vehicle. The high rate of accidents in Teslas is partly to blame, but their expensive repairs are no help.

---- THERE ARE NO DEALERSHIPS AROUND TO HELP YOU: Tesla has just recently begun opening service centers in areas with a large amount of foot traffic, but the idea of dealerships is a concept of the past for Tesla. Following a completely different business model from the traditional car manufacturers, Tesla sells its cars directly to its customers through their own small, intimate stores. This allows Tesla to educate the customers on what exactly they're getting into with an electric vehicle and to choose precisely how they'd like their car to look. Of course, it takes months for customers' vehicles to be delivered, but this still allows them to get exactly what they want. It also means that Tesla makes money off of their cars, while traditional dealerships make money from their service departments. The drawback for a Tesla owner is that these are located, largely, in metropolitan areas and so are the service centers. Unlike traditional dealerships that are in every town, Tesla selects store and service center locations based on foot traffic.

---- TESLA STILL COSTS MORE THAN A GAS CAR AND IS WORSE FOR THE ENVIRONMENT: Even though Tesla has managed to bring down the customer's cost of a vehicle by cutting out dealerships altogether, they're still pretty pricey. Many of Tesla's major competitors have a bit of an edge by offering vehicles that aren't 100% electric, which is an appealing point for many buyers, but they're also less expensive. The base Chevy Volt, for instance, is cheaper than Tesla's base Model 3. Less people are as willing to go for the Model S purely because they have no desire to have an electric vehicle that revolves around performance. For many, the price just isn't worth it, not when the battery will need to be replaced in a matter of a few years (depending on use). This goes hand-in-hand with the cost of Tesla's parts because consumers don't want to spend a lot of money on a car that will also be pricey to fix down the road.

---- TESLA'S AUTOPILOT CAN KILL YOU: Tesla's autopilot has been known to get people in trouble, napping, reading, and working on the freeway. The fact is, there's still no legal protection for someone to sit down and be driven away. Thought Tesla gets close with tools like "tow mode," allowing for an empty car to follow another Tesla with some limitations. Legally you still need to keep your hands on the wheels and be alert, despite the statistically safer autopilot driving and advancements in technology. While a truly autonomous car would open up a new world; safe transport for the elderly, fewer fatalities, easier commutes, and the like, we may be a few major traffic law changes away from that world, and Tesla can't change that yet.

---- COLD WEATHER KILLS YOUR TESLA: There are so many common glitches that go on with a Tesla that drivers have become paranoid of serious troubles, especially anything involving that precious battery. If you haven't tested one out in cold weather, don't be alarmed at that slow acceleration, it's normal. Yep. If you buy a \$35,000 (and up!) vehicle, you can expect that the cold air will affect the battery just like it would any other vehicle. But cold prevents the battery from regenerating as quickly as it typically would, which limits the driver's ability to move faster. It sounds simple in retrospect, but it can be a frightening few minutes for a Tesla owner to discover their car is having trouble moving quickly.

---- ACCELERATION SURGE DEFECTS WILL KILL YOU: Contrary to what Elon Musk has claimed on social media, Tesla has been accused of having a fatality rate that's more than triple what you see in luxury vehicles. Musk claims that Tesla's are the safest vehicles on the road, which is either an ill-researched claim or a blatant lie on his part. Since his stats are based on vehicle miles (rather than vehicle years) it leads you to an inaccurate conclusion, and we don't actually know how many miles these vehicles have traveled, and this also leaves out passengers. After thorough research, many of the Tesla accidents weren't even properly coded, meaning that Musk's claim leaves out several accidents within the US and other countries (such as China) that have higher accident rates. Really, this could all be because of accident-prone drunk Tesla owners who are, mostly, drunk douche bags.

---- CONSTANT RATTLING NOISES: The little things in life shouldn't bother you, but when it's an incessant rattling noise in your brand-new luxury car, those little things can be difficult to ignore. There's a common problem with Teslas experiencing rattling in several areas of the cars. Owners have taken their cars to service centers numerous times for this issue but a very rare few have seen the annoyance resolved. In fact, a few have even documented their experience online, while some have even received their car from the service center only to discover that the rattle has not gone away plus there is a new one! It shouldn't be blown out of proportion, but the fact of the matter is that consumers have put a lot of their money into these cars and they expect a decent level of quality so if problems occur then some resolutions would be nice.

---- TESLA SOLAR STUFF IS NEVER IN STOCK: Lesser known than Tesla's famed electric vehicles is the Solar Roof and Powerwall. As the names imply, these are solar panels that store energy that is even cleaner for the car to run off of. Just two years into this accessory, though, sales have dropped over 70% from their peak. The Powerwall 2 is said to lose 70% of its efficiency after 10 years and solar tiles are close to \$42 per square foot, which is part of why most consumers steer clear. Investors aren't extremely pleased with the outcome of SolarCity's products (which Musk has endorsed with open arms), but the signs were written on the walls, as it were. If solar panels were cheap enough for everyone to afford, wouldn't we all have them on our houses? Since they don't even have a guaranteed longevity, consumers generally feel that the Powerwall and Solar Roof are simply not worth it. In the home solar markets, even if consumers beg for the still "available" Powerwall or new shingle-replacing solar roof, it's almost guaranteed they won't be able to find or get any of them anywhere!

---- TESLA CUSTOMER SUPPORT JUST SUCKS: The underworld of the customer service department is dreaded by customers of just about any major corporation. No customer wants to call in and get passed around from rep to rep and robot to robot. You'd think that Tesla would have come up with a more efficient way to handle their 'valued' customers' problems and have a decent customer service team. That's wishful thinking, though. If you need any help, particularly with SolarCity's products, then you can forget ever getting through to anyone the first time. Attempting to get ahold of the 'right' representative is a game of cat-and-mouse, and you'll have a pretty challenging time catching them in a spare moment (when they can actually speak, at all).

---- TESLA IS ALWAYS ON THE VERGE OF BANKRUPTCY: While it's no secret that Tesla has struggled with sales, it raises a few questions about what that means for the future of the corporation. We don't really know how close Tesla truly came to going under, seeing as how Elon Musk has repeatedly glossed over Tesla's issues instead of being frank about things (e.g., the SolarCity investments, accident rates, etc). So, Musk's exasperated croaks of how Tesla nearly went bankrupt almost sound like the boy who cried wolf, at least from an outside perspective. If Musk is being honest about the company's financial struggles, then the future looks bleak. Scraping by when the economy is relatively stable is not a good sign for a new car company, and what happens when those battery costs skyrocket? No one is going to be willing to pay more than \$40k for a base Model 3.

---- TESLA CARS HAVE AWFUL BODY PANEL GAPS: You don't have to give a Tesla, specifically the Model 3, a thorough inspection to notice that there's an insane amount of space between the body in some parts and less in

others. It's not an overly invasive issue, but when you're paying around \$35,000 for a car, there are a few minimum expectations that should be met. One of those is definitely a clean look. Each of the Tesla models has perfectly executed an aerodynamic style, with concealed handles and sleek lines, which makes the gap that much more noticeable to anyone who happens to glance in the direction of a Model 3. Since Tesla factory workers have been killing each other in Tesla's parking lot in Fremont, you can't expect too much from them.

---- DEADLY TESLA DOOR HANDLES: One of the most notable characteristics of every Tesla is their futuristic door handles that pop out with ease. The higher-end models have nice, metal handles with chrome finishes. However, if you happen to compare, say, a Model S to a Model 3, you'll immediately notice the lack of strength behind the latter's handles. Not only are the door handles on the Model 3 thinner, but they seem to be made with inferior materials to the higher-tier models. There have even been a few people who have had the door handles freeze to the car, leaving them unable to get inside. We have to note that there hasn't been a plague of door handle issues, so this isn't an official defect, but it's more of a cosmetic problem that could become a mechanical one in the future.

---- TESLA CARS ADD AWFUL INCONVENIENCE TO YOUR LIFE: The naïve car buyer is often led to believe that electric cars are all ponies and rainbows. However, many manufacturers acknowledge that we have yet to get everything down to a science. Plus, there's a learning curve for those new to EVs, which is why most semi-electric cars are still able to be powered with gasoline. The serious drawback with a Tesla is the lack of a safety net should the battery run dead. Jumper cables are entirely out of the question, which is why owners of EV's get anxiety on road trips and long-distance commutes. The remaining range can be inaccurate, potentially leaving a driver stranded if they don't judge their car's abilities correctly.

---- TESLA'S ALL LOOK ALIKE AND ARE NOW RUN-OF-THE-MILL: Although this isn't much of a shock at all, little fail to recognize the total lack of variety that's offered in the Tesla fleet. Of course, the higher-end models have prettier finishes and tend to look nice no matter what, but each and every Tesla is almost identical. This is obviously the case with everyday run-of-the-mill vehicles as well, but that's sort of the point, isn't it? If you're spending a good chunk of change to claim that over-hyped Tesla as your own, wouldn't it be nice if you at least had a decent amount of options to truly make it feel like your own? For what you're paying, it seems like there should already be a plethora of options.

---- ABOVE ALL ELSE: Tesla's battery system is the worst designed, most deadly, awful power system in history! IT WILL KILL YOU AND BURN YOUR FAMILY ALIVE, LIKE IT HAS DONE TO MANY TESLA VICTIMS
---Also see the additional Tesla issues, above, involving 'rare earth mines', 'lithium battery dangers', 'Elon Musk's constant use of "hit-men" and character assassins' to destroy competitors and reporters, the vast racism and women abuse and the dead workers poisoned in his battery factories around the globe.

ADVANCED TECHNOLOGY VEHICLE MANUFACTURING LOAN AND LOAN GUARANTEE SLUSH-FUND CORRUPTION

Trillions of dollars of stock trades and direct payola bribes were exchanged using the White House as a broker and the United States Department of Energy as a stock market manipulation platform.

---- That's right! Your public officials use federal agencies as dark-money laundering operations for their friends. EVERY APPLICANT WHO HAS BETTER METRICS THAN WHITE HOUSE INSIDERS FISHER AND TESLA GETS REJECTED. DOE DOES THIS TO PROTECT OBAMA AND BIDEN CAMPAIGN FINANCIERS WHO PAID BRIBES IN ORDER TO GET THIS GREEN PAYOLA. IN A PUBLIC, SIDE-BY-SIDE, COMPARISON THE DOE "WIINERS" WOULD LOSE AND THEY CRONYISM WOULD BE EXPOSED!

---- If you are a taxpayer: You suffered damages!

---- If you are an American business: You suffered damages!

---- If you are Democracy: You were broken!

---- If you were a tech mobster: You made out like a bandit!

---- This is how it worked. No public official wants these crimes to end because most of those officials profit from these crimes! Forget about any allegiance you might have to one political party over another. This is not about parties, this is about racketeering crimes!

---- The Solyndra taxpayer, technology, financial and political disasters that began during the corrupt reign of Steven Chu and Jennifer Granholm at the Department of Energy typified the overt, organized crime, corruption and crony malfeasance of the public funds.

---- The United States Department of Energy runs a political crony payola slush fund. They don't "support green cars"; they support "greenbacks for crony insiders who financed political campaigns". The U.S. Department of Energy violates anti-trust law by funding only the friends of The President and cutting out their competitors. The "Secretary Of Energy" is a paid actor who owns the companies that the government finances.

---- Competitors to White House financiers are specifically and illegally excluded from participation in funding, benefits, jobs and income by major political figures, including U.S. Senators and White House executives, and their Silicon Valley oligarch financiers. These corrupt politicians attack others who refuse to cooperate with their crimes including: 1.) sex trafficking, 2.) tax evasion, 3.) off-shore money laundering, 4.) political bribery quid-pro-quo, 5.) revolving door payola scams, 6.) foreign nation-sponsored domestic manipulations, 7.) stock market rigging, 8.) internet censorship, 9.) search engine manipulation and other crimes.

---- They attacked citizens who report their crimes to federal police. They also attack citizens who make products that obsoleted their products at Facebook, Google, Tesla, Netflix, etc. These corrupt politicians attack citizens using taxpayer-funded state resources. That is a felony violation of the law. The ongoing cover-up of these crimes and attacks is also a felony violation of the law. The victims are owed damages compensation, witness fees and back-pay.

---- Top Lawyers from Perkins Coie and Covington & Burling admitted that they "CONTROL" who gets DOE funding, agency appointees and federal cash

THE UNITED STATES DEPARTMENT OF ENERGY

The Advanced Technology Vehicles Manufacturing (ATVM) Loan Program is a \$25 billion direct loan program funded by Congress in fall 2008 under the guise of "providing debt capital to the U.S. automotive industry for the

purpose of funding projects that help vehicles manufactured in the U.S. meet higher mileage requirements and lessen U.S. dependence on foreign oil. " The PR department for the U.S. Department of Energy spends nearly a million dollars per year seeking to manipulate news and social media to try to pitch their message that the program was a "success". In fact, it has been, and remains today, one of the most criminally corrupt failures in American history.. It was only a "success" as one of the biggest political slush-funds ever created!

THE FACTS:

Victims had global character assassination and propaganda-media defamation reprisal attacks operated against them by White House staff and their political financiers: Elon Musk, Larry Page, Steve Jurvetson, Eric Schmidt, Steve Westly, John Doerr, et al. Jury and FBI-compliant evidence proves this as fact.

Victims were attacked because 1.) they helped law enforcement investigate the attackers, 2.) They competed with the attackers that attacker's products and the Silicon Valley Cartel attackers chose to "cheat rather than compete". Jury and FBI-compliant evidence proves this as fact.

The attackers spent over \$30M, part of that using taxpayer resources, attacking the victims as proven in the financial transaction records from Google, Gawker, Gizmodo, Jalopnik, Media Matters, Fusion GPS, et al. Jury and FBI-compliant evidence proves this as fact.

Victims had been previously funded by the U.S. Government and had a multi-decade relationship with the highest offices of the Government, which provided them with deep knowledge of the crimes that were committed. Jury and FBI-compliant evidence proves this as fact.

The U.S. Department of Energy is used as a political slush fund to pay back campaign finance millionaires while blockading the competitors of those millionaires from reaching the market or receiving funding. Jury and FBI-compliant evidence proves this as fact.

The only entities who participated in the global character assassination and propaganda-media defamation reprisal attacks were those entities owned and controlled by the attackers. Jury and FBI-compliant evidence proves this as fact.

Through corrupt rare-earth mining scams and control of federal contracts and grants, attackers had planned to acquire at least one trillion dollars in unjust gains and illegal profiteering. Jury and FBI-compliant evidence proves this as fact.

This amount of money they sought, and the "Mafia-like" structure they adopted, caused the suspects to engage in the most extreme crimes, including murder and "Deep State" coup attempts. Jury and FBI-compliant evidence proves this as fact.

A significant number of person's who were in conflict with the attackers have died in suspicious manners. Jury and FBI-compliant evidence proves this as fact.

The suspects have hired the largest numbers of lobbyists and corporate manipulation lawyers in U.S. history in order to manipulate political decisions. Jury and FBI-compliant evidence proves this as fact.

The suspects have spent more money on political bribes than any group of men has spent in the last century. Jury and FBI-compliant evidence proves this as fact.

The suspects placed top federal law enforcement and agency bosses (ie: Michelle Lee, Steven Chu, Kamala Harris, James Comey, et al) from their own Cartel, into top government positions, with orders to run cover and protection schemes for them. Jury and FBI-compliant evidence proves this as fact.

California State officials including the Governor, Controller, The Senators, Secretary of State and regional officials participated in these crimes and pocketed the initial profits from these crimes in covert investment banking. Jury and FBI-compliant evidence proves this as fact.

Tesla Motors, Google, Netflix, Facebook, LinkedIn, Amazon and other tech Cartel members operate with a common goal of psychological mass ideology manipulation and monopolistic profiteering based on government sponsored anti-trust violations and server control exclusivity. Jury and FBI-compliant evidence proves this as fact.

The attempted cover-ups of these crimes continues to this day. Jury and FBI-compliant evidence proves this as fact.

A case study in pay-to-play cronyism

By Dan Epstein

News flash: Government subsidies and special-interest favors go hand in hand.

The latest example comes from a federal green-energy loan program. Last month, the DC District Court ruled that Cause of Action, where I am executive director, can proceed with a lawsuit against the Department of Energy. We're suing the federal government for the blatant political favoritism in its \$25 billion "Advanced Technology Vehicle Manufacturing Loan Program."

In principle, this taxpayer-funded program was supposed to support the manufacture of energy-efficient cars. In practice, it rewarded a select few well-connected companies.

Since the program was created in 2008, numerous businesses have applied for its taxpayer-backed financial support. Yet only a small number were approved. Among the lucky few were two electric car manufacturers: Tesla and Fisker.

Both companies' political connections run deep, especially Tesla's. The company's founder, Elon Musk, was a max donor for President Obama. One of its board members, Steven Westly, was appointed to a Department of Energy advisory board. And another Obama bundler, Tesla investor and adviser Steven Spinner, secured employment in the department's Loan Program Office—the very office that gave the company a taxpayer-backed loan.

Fisker also has friends in high places. The company, which has since gone bankrupt, was backed by a San Francisco venture capital firm whose senior partners donated millions to the 2008 Obama campaign and other Democrat causes. One partner, John Doerr, parlayed his support into a seat on the President's Council of Jobs and Competitiveness.

Such connections can allow a company to exert political pressure to enrich itself. Unsurprisingly, Department of Energy emails show that such pressure was rampant in its loan programs.

There's no shortage of examples. The department's leaders—including then-Secretary of Energy Steven Chu—repeatedly promised to deliver results to politicians like Rep. Steny Hoyer (D-Md.) and Sen. Harry Reid (D-Nev.). One email reads, "DOE has made a political commitment" to approve a company's loan. Another says the "pressure is on real heavy" from none other than Vice President Joe Biden. And still another shows an employee asking, "what's another billion anyhow?"

Unsurprisingly, the Obama administration gave Tesla and Fisker preferential treatment, and then some.

The Department of Energy revised its review process in order to finish the companies' applications faster. The government gave them extraordinary access to its staff and facilities—even to the point of having government employees personally walk them through the loan application and approval process. The department ignored its own lending rules in order to approve the companies' loans. And it renegotiated the terms of some loans after the

companies could not keep their original commitments or were experiencing financial difficulties. Tellingly, Fisker has since gone out of business, despite receiving over a billion dollars in loans through this federal program.

Now contrast this preferential treatment with what happened to XP Vehicles and Limnia, neither of which have the same political connections. (My organization is suing the Department of Energy on their behalf). The two companies partnered to manufacture an energy-efficient sport utility vehicle that would have competed with Tesla and Fisker's cars. They applied for loans in 2008 and 2009 under the same loan program.

The department refused them both—and it used bogus reasons to do so.

For starters, the department made claims that were laughably false. To take one example: It rejected XPV's application because its vehicle was powered by hydrogen. It was an electric SUV. It also raised objections that it didn't raise with other companies whose applications were approved. For instance: The bureaucracy criticized the proposed all-electric vehicle for not using a specific type of gasoline. Yet Tesla and Fisker received the loans despite producing similar all-electric cars.

In light of these obvious problems and hypocrisy, both companies presented the Department of Energy with detailed rebuttals. Yet the government failed to respond. To this day, both XPV and Limnia are awaiting a satisfactory reply. In the meantime, XPV has gone out of business, unable to compete against its politically connected—and subsidized—rivals.

This casts the Department of Energy's loan program in a new light. It was sold to the American public as a means of promoting energy-efficient vehicles. Instead, it was used to benefit a select few well-connected companies. It was a blatant crony handout, paid for by the U.S. taxpayer.

Sadly, similar examples are widespread in Washington. That's no surprise considering the feds spend roughly \$100 billion a year in taxpayer-funded handouts to businesses. This breeds the sort of government-business collusion Americans think is rampant in Washington. In fact, over two-thirds of likely voters think the federal government helps businesses that hire the most lobbyists, shake the right hands, and pad the right pockets. They're right.

This points to a simple conclusion: Politicians and bureaucrats shouldn't use the public's money to pad private companies' bottom lines. As the Department of Energy's green-vehicle loan program shows, the capacity for corruption is immense—and inevitable.

Note: We have absolute and indisputable intelligence agency, FBI-verifiable and forensic expert proof of all of these assertions.

The program was used by the Obama Administration to provide crony payola kick-backs to financiers and friends of the Obama Administration and to attack the competitors of the Silicon Valley financiers of the Obama Administration.

As of 2019, the U.S. Department of Energy claims that they "overhauled" and "re-did" the ATVM program and it's sister program: the Loan Guarantee Program. In fact, that is false.

When you peel back the onion-skin of corruption around the covert stock market and investment bank holdings of Eric Schmidt, Dianne Feinstein, Nancy Pelosi, Elon Musk, etc.; you find that they are invested in something called "rare-earth mining". Rare earth mines are generally in third world nations and use child slave labor. These toxic corrupt operations are responsible for more murders, beatings, rapes and genocides (over control of these "blood minerals") than anything on Earth. These minerals are used in the electric cars, cell phones and solar panels that

Silicon Valley has attempted to control. So, you see, it isn't about "saving the environment"; it is about greed, bribes and corruption on an epic scale.

The program continues today as a political slush-fund and it is as corrupt as ever. It has NOT been "cleaned-up"! It is STILL a cesspool of corruption! Obama hold-overs and corrupt insiders, with personal conflict-of-interest stock and revolving door career deals, still control the funds and steer the monies exclusively to their friends.

The program has not funded any company who is not a campaign-finance friend of the Obama Administration. The DOE program attacked, lied to, stalled, delayed, gate-keeper blocked and harmed any Applicants who competed with Tesla, Fisker and the Obama financiers. Through the Silicon Valley control of the facade group: "The National Venture Capital Association", DOE ensured that NO car company or solar company in America could get funded, by any private means, without Silicon Valley oligarch approval. The DOE is a corrupt organization operated by corrupt insiders for corrupt purposes!

DOE's two main manipulation tricks are: 1.) STONE-WALLING - Where DOE staff throw outsider Applicant's filings in a box and forget about them for many years in a Lois-Lerner'd review process that takes any commercial bank only 2 weeks to complete. DOE spends years doing hyperbolic nothings in order to delay campaign financiers competitors, and 2.) INTERPRETIVE LYING - Where DOE staff make up things that Applicant's never said and twist the Applicant's words into anything BUT what the Applicant's intended, in order to manipulate non-favored Applicant's into negative interpretations. DOE staff never even called outsider Applicant's for clarity discussions of any key data. They did not want to hear the truth, they couldn't handle the truth! They only wanted their crony's to win the funding!

Every applicant who applied, who was not a crony insider, hard-wired, Obama bagman was DEFRAUDED, LIED TO, STONE-WALLED and used as a smoke-screen to hide the true nature of the crony payola scheme operated by Secretary of Energy bosses Chu, Moniz and Perry. They are owed money to pay for their damages from tort-based interference in their businesses and other fraud-related DOE-operated causes-of-action.

Silicon Valley oligarchs hired "Lobbyists" (who are political operatives who offer bribes to politicians without ever using the word "bribe") to take-over the program. Silicon Valley insider McKinsey staffed the DOE department while working for the Silicon Valley oligarchs. In a typical corruption example: Steve Spinner worked at DOE handing out money to Solyndra which his wife Alison Spinner worked at as Solyndra's lawyer, while the DNC mailer referred to each of them as the "top West Coast fund-raisers for the DNC".

Originally Obama's "car Czar" Steven Rattner (indicted for stock market securities fraud), working from the West Wing of the White House, had offered a portion of the money to Detroit Auto Unions if the Detroit Unions ordered all of their members to vote for Obama in exchange for bail-outs. Obama insiders David Plouffe (indicted for payoffs to Rahm Emanuel), David Axelrod, and Robert Gibbs extended the deal to the Silicon Valley oligarchs in exchange for global search engine manipulation favoring Obama

A "Silicon Valley Mafia" (AKA - "The PayPal Mafia") exists and is populated by the Bay Area technology oligarchs, their operatives and the West Coast Senators, all of whom profit illicitly off of a combined monopoly and stock market cartel that they control. FBI Director James Comey was fired for protecting his friends in this cartel.

Let us examine the charges against the Department of Energy supported by the factual evidence:

- DOE officials told Applicant's they had to pay tens of thousands of dollars in order to apply for the LGP monies but with-held responses until after the dead-line had passed in order to cut non-Obama financiers out of the running.

- Google provided the staffing for the agencies involved, the media manipulation for the politicians involved, and was the beneficiary for some of the funds in a 4-way conflict of interest in which Google staffed the largest contingent of Obama White House staff.
- Steven Chu handed massive amounts of DOE cash to Russian billionaires from Ener1, Severstal and other Russian connections even though they were foreign billionaires who had no need of U.S. taxpayer subsidies. If one wants to look at dirty Russian collusion, they need look no further than Steven Chu, the architect of the failed Iran Nuclear deal and corrupt Uranium One deal. Steven Chu and Rahm Emanuel ordered DOE's Sandia Livermore Labs and Argonne Labs (who they were both connected to) to manipulate Applicant data in order to only favor campaign financiers companies.
- DOE abuses of process defrauded non-insider Applicants out of billions of dollars of their savings and investor monies yet DOE never offered those that it harmed and recompense.
- DOE officials owned stock market stock and revolving door job promises in the very companies that they were supposed to be conducting "due diligence" on.
- Tesla Motors and SpaceX were staged as campaign finance dark money conduits to transfer taxpayer cash from government treasuries to private parties and then into campaign funds without transparent public disclosure.
- The Obama Administration promised an exclusive on Afghanistan mining deals to Frank Guistra and the Silicon Valley oligarchs for lithium, indium, cobalt and rare-earth metals mining after USAID pitched (http://2.bp.blogspot.com/_VyTCyizqrHs/TBaffwKixYI/AAAAAAAAAH74/Wee8LTQfo3k/s1600/afghanminerals.jpg) manipulated reports from McKinsey Consulting saying that "Afghanistan was the Saudi Arabia of lithium and had trillions of dollars of lithium" to dig up. It turned out to be a lie to get oligarchs to support Obama's Afghan invasion. (<http://pubs.usgs.gov/fs/2007/3063/pdf-page.jpg>) DOE helped sell this lie because the Russians had already scoured Afghanistan and found it to be fairly worthless as a mining potential. Elon Musk bought into this for his battery monopoly. This is why Steven Chu gave so much money to Russians at Ener1 and Severstal. DOE staff were fully aware of this. (<http://www.mining.com/1-trillion-motherlode-of-lithium-and-gold-discovered-in-afghanistan/>)
- Google, a Tesla investor and bromance buddy with Elon Musk, hired more lobbyists for DOE influencing than anybody had ever hired before in U.S. history. Google hides all negative news stories about Musk and Tesla and only shows fake news hype about Musk, Tesla and SpaceX because Larry Page and Elon Musk share an apartment and financial programs.
- The DOE ATVM and LGP programs are based on arbitrary metrics which are not even followed by DOE evaluation staff. There is a secret black-list in operation to keep companies who are competitors to Obama's financiers from ever getting funded. Even though many Applicant's beat every "winner" in Obama's DOE handouts, they were excluded, denied and discriminated against simply for competing with Obama's Silicon Valley oligarchs.
- Steven Chu, after getting thrown out of office, went to work for the very people he was supposed to have been conducting due diligence on. Chu is considered to be one of the most criminally corrupt public officials ever in charge of an agency aside from his peer, who also made corruption history: Eric Holder, who helped Comey cover-up the crimes.
- The DOE ATVM and LGP programs resulted in: THE LARGEST DISTRIBUTION OF TAXPAYER CASH TO THE MOST COMPANIES THAT THEN WENT IMMEDIATELY WENT BANKRUPT IN THE HISTORY OF AMERICA! Not only has the DOE ATVM and LG program been NOT A SUCCESS, they have been a disaster!

- Goldman Sachs and Deloitte engineered INTENTIONAL bankruptcies so that their Silicon Valley oligarch clients could claim windfall tax write-offs which the U.S. Treasury said resulted in "unjust gains" for those oligarchs. In other words, the tech oligarch billionaires took U.S. taxpayer subsidies, which they did not need, and then bankrupted their own companies so that they could reap profits in tax write-offs. On top of this Goldman Sachs skimmed "fees" off-the-top for arranging these deals, at taxpayer expense, and then ALSO profited from the "bumps" to the stock market valuations in pump-and-dump crimes. TO BE CLEAR: MANY OF THESE BANKRUPTCIES WERE TAX SKIMS CREATED TO FAIL! After realizing this, Applicants and Congressional insiders forced ALL of the kick-back funded companies into bankruptcy as payback for the corruption and abuse of their resources. Said one Senator: "If they want bankruptcies, we will give them bankruptcies..."
- Lachlan Seward, one of the DOE money laundering insiders, threatened Applicant's that if they "made trouble" they "would never be funded by DOE as long as they lived".
- When Tesla Motors got their DOE money approved they had NO DESIGN AND WERE PLANNING TO BUILD A FACTORY. Both of which were against the so-called Section 136 Rules. Tesla used the DOE money to hire engineers to design the car from scratch as proven by the engineers that were hired. Tesla was running all over the country trying to stage a real estate scam with Dianne Feinstein's Husband's company CBRE. Tesla even got sued for these real estate scams. DOE stated that the "rules" said you already had to have a factory and a design, which the other applicants had. So, against the "rules" Tesla got the money and figured out the car LATER and did not use a pre-existing factory until they were later forced to follow the rules.
- For the same kind of commercial loans, Bank of America and Wells Fargo take 4 weeks to approve loans this large. DOE staff were either too stupid to review loans in less than 3 years or were intentionally stone-walling every applicant who was not an Obama crony.
- As shown by this letter: <https://news.wttw.com/sites/default/files/Letter%20from%20Bright%20Automotive%20to%20US%20Dept%20of%20Energy.pdf> ...and hundreds of Congressional reports, DOE staff proved themselves to be liars and scumbag political manipulators at every turn.
- The public has not seen the entire FBI and SEC investigation records on the FBI raid and investigation of Solyndra because the records point straight back to the White House Oval Office!
- A Congressional report on the ATVM and LG programs exposed layers and layers of crony payola.
- The only Judges who got to rule on the cases were "Obama Judges" appointed by or beholden to the Obama Administration.
- A CBS News 60 Minutes segment called: "The Cleantech Crash" revealed that many of the assets of the ATVM and LGP disasters had been funded by the taxpayers and then sold to China in deals that benefited Diane Feinstein's family and financiers. Later Dianne Feinstein was found to have Chinese spies and insiders on her staff. The Feinstein family owned the stock, staffing services, construction company and services companies at Tesla and Solyndra, which Feinstein got the federal cash for. Her staff then went to work at Tesla and Solyndra.
- Although felony-class crimes occurred, no DOE officials have ever been charged with crimes..although multiple FBI officials have been charged with covering up those crimes.
- Vice President Al Gore, John Doerr and Vinod Khosla have had all of their finances tracked and connected together through covert routes that reveal insider stock trading and government policy manipulation, in this case, for their own personal profiteering.

- Attorney General William Barr has been formally asked, by Applicants, to appoint a federal Special Counsel to investigate this matter.
- The Dark Money FEC campaign finance limits were exceeded by the Silicon Valley oligarchs by many magnitudes in this novel deployment of quid-pro-quo and search engine rigging services for political favors and funding.
- There has not been a single person involved in "green" DOE funding programs who cared anything about "green energy". The use of the term "green" was a psychological ploy to seek to pacify the public with a crunchy granola positive vibe while stealing taxpayer money in plain sight.
- The Obama White House produced a "white list" of friends companies who could get funded and a "black list" of their competitors who could never be funded because Silicon Valley financiers said so. These lists were created from input from John Doerr, Steve Westly and Doerr's business partner: Al Gore. Even though most Applicant's beat the metrics, features and national security issues of favored Obama Applicant's, no outsiders and no non-campaign financiers would ever be approved.
- The very first Applicant for the ATVM fund was XP Vehicles, which was solicited to apply by DOE and Barbara Boxer's office. The 1.) Section 136 law, 2.) DOE videos of meetings and 3.) DOE documents clearly state that Applicant's would be reviewed on a "first-come, first served" basis per the federal law. When XP, which was black-listed by the White House because it competed with Obama financiers Tesla and Fisker, moved far ahead in the Applicant list, DOE illegally changed the rules so that "first come - first served" was ignored and only favored insiders were reviewed. XP, Brammo, EcoMotors, Elio, etc. were all "bottom drawered". Even though XP hand delivered, to DOE and Congress, more customer order proofs than ALL other Applicant's combined, DOE insiders, who held stock in competing companies, placed XP on a permanent black-list.
- As of December 28, 2008 DOE staff already decided who would "win" the money, and who would not, because the entire program had been hard-wired, via lobbyists and insiders, to only go to the "white list" applicants. Nobody who was not on the original "white list" could ever get DOE funding. It only takes one "insider" at DOE, from the Obama Administration (many are still there) to kill any application, no matter how much better that proposal is compared to every other applicant.
- U.S. Department of Energy and White House officials hired Nick Denton's sleaze-ball tabloid empire comprised of Jalopnik, Gawker Media and Gizmodo Media to run character assassination and defamation campaigns, in partnership with the DNC's Google, to attack any person who exposed the corruption scam at DOE.
- The GAO wrote multiple federal reports confirming that DOE was running one of the most poorly administrated non-transparent operations ever and that DOE staff were not even following the Section 136 law.
- White House and DOE staff hired Gawker, Gizmodo, Jalopnik defamation bloggers to attack those who exposed the plot. Patrick George At Jalopnik attacks outsiders under contract with Elon Musk and DNC. Silicon Valley campaign finance oligarchs hire him to run hatchet jobs on innocent outsiders and then Gawker-Gizmodo-Jalopnik uses their financial partnership with the DNC's Google to push the character assassination articles to the top of Google web products and searches. Patrick George, Adrian Covert, John Hermann and Nick Cook are the sexually degenerate cabin boys that report to boy-loving sleaze-tabloid oligarch Nick Denton. They created the Fake News crisis in the media by flooding the internet with defamation posts and reprisal hatchet job articles designed to damage political enemies of the Socialists. They coordinate a large number of the character assassination efforts at Gawker, Gizmodo, Jalopnik, CNN, New York Times and other propaganda outlets.

(Above, From tens of thousands of internal Google documents leaked)

- DOE staff never even communicated with Applicant's, who were not Obama insiders; yet Tesla, Fisker and other Obama insiders got hundreds of phone calls, meetings and careful help to hand-hold them through the process to make certain that they got their payola while the outsiders only got blockades, Lois Lerner "missing hard drives" and stone-walls.

- The DEFRAUDED staff and employees of Bright, XP, Limnia, ZAP, Brammo, and the other Applicant's, have NEVER gotten a fair court hearing, Congressional or IG hearing that was not compromised by an Obama Judge or stock-owning insider. They are owed money for their damages from the deeply corrupt DOE programs!

- The Obama Administration officials who carefully manipulate the DOE and federal process for crony favorites include: Steven Chu, Kathy Zoi, Carol Battershal, Steve Westly, Steven Spinner, John Podesta, Jonathan Silver, Danial Cohen, et al; with cover-up support from James Comey, Eric Holder, Steve Rattner, et al...

- Over a thousand other criminal and ethics violation charges are charged against DOE and its associates yet no actual interdictions have taken place in California or federal government actions because the "Deep State" cover-ups are so extensive. The raw criminality of the U.S. Department of Energy in these matters is verified, proven and audacious...

'Treason!' - AG Barr Finds 'Government Power Was Used By Obama Administration To Spy On American Citizens And Run Dirty Tricks Reprisal Operations'

by Tyler Durden

In his first pair of interviews since being sworn in, Attorney General Barr told Fox News and WSJ that he was pursuing the investigation into the origins of the Trump-Russia probe - an investigation he has tasked

John Durham, the US Attorney from Connecticut, with leading - because Americans need to know whether the government "put a thumb on the scale" to try and undermine President Trump both during the campaign and during the first two years of his term, just like "we need to ensure that foreign actors don't influence the outcome of our elections."

Separately, he told WSJ that "government power was used to spy on American citizens...I can't imagine any world where we wouldn't take a look and make sure that was done properly."

Barr has doubled-down on using the term 'spying', which has angered Democrats, after first using it during Senate committee testimony from April 10, where he uttered the now-infamous phrase "I think spying did occur."

The AG has declined to elaborate on what prompted these concerns, though he has said he'd be interested to see the underlying intelligence that sparked the FBI decision, in the summer of 2016, to open a counterintelligence investigation. At this point, Durham's review isn't a criminal investigation, and Barr hasn't offered a timetable for when the investigation might be completed. Ultimately, the probe could lead to changing FBI protocols involving investigations into political campaigns.

Appearing to respond to Barr's interviews, President Trump declared that his campaign was "conclusively" spied on.

My Campaign for President was conclusively spied on. Nothing like this has ever happened in American Politics. A really bad situation. TREASON means long jail sentences, and this was TREASON!

— Donald J. Trump (@realDonaldTrump) May 17, 2019

As far as we know, the FBI first started investigating the campaign after an Australian ambassador told his superiors that George Papadopoulos had appeared to know about Russian plans to release 'dirt' on Hillary Clinton. The FBI

later sent an informant, Stefan Halper, and a woman who identified herself as a research assistant, to meet with Papadopoulos and push him to say whether Russia was helping the Trump campaign.

The Corrupt Greentech VC Influence Over Washington

Katie Fehrenbacher

- How Silicon Valley Oligarchs Took Over The Obama Administration

There've been a couple articles in the past few weeks pointing to President Obama as the "clean tech investor in chief" and the presidential VC with bets on clean energy. The real trend is that venture capitalists focusing on greentech seem to have had an unprecedented influence on U.S. federal policy and allocations of the stimulus package.

When I attended the Department of Energy's (DOE) first ARPA-E conference (Advanced Research Projects Agency-Energy) earlier this year in Washington D.C., I was struck by how many venture capitalists were there. I shared a cab back to the airport with some familiar Silicon Valley faces, and was told if your firm didn't have a dedicated person in Washington — in some circles they call them lobbyists — maneuvering grant and loan programs, you weren't able to be competitive.

Just look at the figures from the stimulus package (which I am fully in support of): somewhere between \$50 billion and \$80 billion into clean power and energy efficiency initiatives (depending on how you slice it). The Obama administration has gone out of its way to seek the advice of green-leaning venture capitalists and entrepreneurs in the Valley on how to spend that colossal amount and what programs would be the most affective.

Kleiner Perkins managing partner John Doerr is on President Obama's Economic Recovery Advisory Board, and was able to convince Vice President Al Gore to join Kleiner, in addition to former Secretary of State Colin Powell. Kleiner's investments have had some successful government bids, most notably the \$529 million loan to Kleiner portfolio company Fisker Automotive out of the DOE's highly competitive Advanced Technology Vehicles Manufacturing, or ATVM, program. Fisker plans to use the loan to build its factory and launch its electric vehicle in 2011.

If you remember, another winner of the \$25 billion ATVM program was Tesla Motors (s TLSA), which, as most of us know, was backed by venture capitalists from Draper Fisher Jurvetson, Technology Partners, and Vantage Point among others.

I attended Khosla Venture's LP meeting earlier this year where the firm announced that former UK Prime Minister Tony Blair would be joining the firm as Senior Advisor. Several of my journalism peers were comparing the political influence Blair could wield to what Kleiner was doing with Gore.

The Obama administration appointed former venture capitalist Jonathan Silver as its loan chief to lead both the DOE's loan guarantee and ATVM loan programs. About a third of the DOE's loan guarantee commitments went to venture-backed startups, including thin film solar maker Solyndra and solar thermal company BrightSource.

I wondered earlier this year if the loan guarantee for Solyndra wasn't a mistake, given the company has one of the highest manufacturing costs out of its competitors. The company withdrew its IPO plans, citing poor market conditions. The Government Accountability Office also found that the loan guarantee process treated some companies unfairly in their bids and risked "excluding some potential applicants unnecessarily."

There's nothing inherently wrong with venture-backed companies getting government support, and the energy sector needs even more federal funding to create innovation. I support Doerr and Bill Gates' calls for boosting federal government investing to \$16 billion per year into energy innovation. All I'm saying is that this level of influence should be watched.

Another Tesla car catches fire in Hong Kong parking lot: media - ALL TESLA BATTERIES EXPECTED TO HAVE CHEMISTRY DEGRADE AND EXPLODE AS DOE WAS WARNED IN WRITING BY BERNIE TSE, BRIGHT AND XP

HONG KONG (Reuters) - A Tesla Inc electric car caught fire in a parking lot in a Hong Kong shopping mall, the Apple Daily newspaper said on Tuesday, but no one was injured in the blaze, whose cause was not immediately known.

The electric car burst into flames 30 minutes after being parked in the city's San Po Kong district on Sunday, the newspaper said, with three explosions seen on CCTV footage.

Firemen took 45 minutes to douse the fire.

The vehicle was a Tesla Model S 85 KWH dual power version, added the paper, which gave no explanation of what might have caused the blaze.

Responding to a request from Reuters, Tesla declined to comment. Reuters was not able to contact the vehicle owner or obtain CCTV footage of the incident.

Hong Kong's fire services department told Reuters a vehicle caught fire on Sunday, but gave no details, such as the make of the car. Authorities are investigating the cause.

The incident comes three weeks after Tesla said it had sent a team to investigate a video on Chinese social media that showed a parked Tesla Model S car exploding in the commercial hub of Shanghai.

The automaker has said its EVs are about 10 times less likely to experience a fire than petrol-powered cars.

There have been at least 14 instances of Tesla cars catching fire since 2013, most of them after a crash.

DEADLY EXPLODING LITHIUM ION BATTERIES AND COBALT CORRUPT MINING SCAMS ARE KILLING AND ROBBING THE PUBLIC WITH DIRTY "BLOOD MINERALS" THAT ARE TOXIC, SELF-IGNITING DANGERS

Lithium ion batteries: Cause wars in the Congo, Afghanistan and Bolivia from the corrupt mining deals involved with mining lithium and cobalt; are insider trading-owned by ex-CIA boss Woolsey and DOE Boss Chu; excrete chemicals that mutate fetuses when they burn; destroy your brain, lungs and nervous system when they burn; kill the factory workers who make them; cause Panasonic to be one of the most corrupt companies in the world; poison the Earth when disposed of; can't be extinguished by firemen; poison firemen when they burn; are based on criminally corrupt mining schemes like URANIUM ONE; Have over 61 toxic chemicals in them; come from an industry that spends billions on internet shills and trolls used to nay say all other forms of energy; are insider-trading owned by corrupt U.S. Senators who are running a SAFETY COVER-UP about their dangers.

NiCad Batteries and hundreds of other battery types do not have this many problems... but the ownership of the lithium mining business by Elon Musk, his Silicon Valley cartel and California Senator's families causes other solutions to be hidden, the dangers of lithium ion to be hidden and a monopoly to exist.

Apple products with lithium ion batteries have been exploding and setting people on fire; over time the chemical dendrites inside each battery grow worse and increase the chances of explosion as they age - LITHIUM ION BATTERIES BECOME MORE AND MORE LIKELY TO EXPLODE AS TIME GOES ON AND AS THEY AGE; "Bad Guys" have figured out how to make them explode remotely; have their dangers hidden by CNN and MSM because pretty much only the DNC people profit from them; are the heart of Elon Musk's stock market scam.

The Obama Administration promised Silicon Valley oligarchs the market monopoly on lithium ion batteries and the sabotage of fuel cells in exchange for campaign financing and search engine rigging; United States Senators that are supposed to protect us from these deadly products own the stock market assets of them so they protect them and stop the FDA, OSHA, DOT & NHTSA from outlawing them. WRITE YOUR ELECTED REPRESENTATIVE AND DEMAND THAT LITHIUM ION BATTERIES BE MADE ILLEGAL TO SELL! NiCAD and Hundreds of other battery chemistries DO NOT have all of these problems but Lithium Ion batteries get a monopoly because of politician insider trading ownerships. A recent fire on U.S. Highway 101 near Mountain View, CA, burned the driver alive and killed him. In Florida two kids died in a Tesla, burned alive, screaming in agony. A man died in agony in a Tesla crash in Malibu that set Malibu Canyon on fire. A young woman, at the start of life, and her boyfriend were burned alive in their crashed Tesla.

There are many more deaths and crashes than you have heard about. The deaths and the cover-ups are endless. Senators Dianne Feinstein, Harry Reid, Nancy Pelosi, Kamala Harris and their associates own the stock in Tesla Motors and/or it's suppliers and mining companies and they cover-up and halt investigations and laws designed to save the public. They, and their crony's, spend over \$1B a year to shill and troll hype about lithium ion batteries and cover-up the dangers. Lithium ion EVs are more prone to battery fires. Experts say that their lithium-ion batteries can fuel hotter fires that release toxic fumes and are more difficult to put out. Lithium ion fires keep reigniting which explains why it takes so long and requires copious amounts of water or foam (it is an electric fire, after all) to smother the flames. Tesla employee Bernard Tse and his team warned Elon Musk about these dangers in 2008 and they got fired and/or warned to "say nothing" by Musk. Three top Tesla engineers died in a plane crash next to Tesla offices in San Carlos after two of them agreed to become whistle-blowers.

Elon Musk exists because he bribed DNC politicians and Senators Feinstein, Reid, Boxer, Harris, Clinton and Pelosi to give him free taxpayer cash and government resources from the Dept. of Energy and the Calif treasury. DOE has been covering-up organized crime activities at DOE in which DOE funds are being used as a slush-fund to pay off DNC campaign financiers and to pay for CIA/GPS Fusion-Class attacks on Silicon Valley business competitors of those DNC campaign financiers who DOE staff share stock market holdings with. Elon Musk is a criminal, a mobster, an asshole, a bald fake-hair wearing, plastic surgery-addicted, douchebag, woman-abusing, sex addicted, tax evader. Musk exploits poor people and child slaves in the Congo and Afghanistan to mine his lithium and Cobalt.

Musk spends billions per year to hire Russian trolls, fake blogger fan-boys and buy fake news self-aggrandizement articles about himself. Musk thinks he is the 'Jesus' of Silicon Valley. Fake News manipulator Google is run by Larry Page and Larry is Musk's investor and bromance butt buddy. Musk uses massive numbers of shell companies and trust funds to self-deal, evade the law and hide his bribes and stock market insider trading. A huge number of Tesla drivers have been killed; pedestrians and oncoming drivers have also been killed, and Musk covers it up. The DNC and the MSM refuse to allow any articles about Musk's crimes to be printed because they benefit from Musk's crimes. Musk has been professionally diagnosed as a 'psychotic narcissist.' A 'Silicon Valley Mafia; cartel of frat boy sociopath venture capitalists like Steve Jurvetson, Tim Draper, Eric Schmidt, et al; threaten those who do not support the cult of Tesla or their political candidates.

In EVERY blog that you read that mentions 'Musk', at least 1/3 of the comments have been placed their by Musk's paid skills. Musk holds the record for getting sued for fraud by his investors, wives, former partners, employees, suppliers and co-founders. Elon Musk has gone out of his way to hire hundreds of ex-CIA staff and assign them to "dirty tricks teams" to attack his competitors and elected officials who Musk hates. Musk never founded his companies. Musk's "Starlink" satellites are domestic spy and political manipulation tools - never get your internet from one. Musk stole Tesla in a hostile ownership take-over from Marty the true inventor of the Tesla. The same kind of EMF radiation proven to cause cancer from cell phones exists in massive amounts in a Tesla.

Musk can't fix a car or build a rocket and has almost no mechanical skills. If you pull a report of every VIN# of every Tesla ever built and cross reference that with insurance, repair and lawsuit records you will find that the "per volume" fire, crash, death and defect rate is THE WORST of any car maker in history! Musk is a lying con artist and partners with Goldman Sachs to rig the stock market. Sachs has a dedicated team of 18 men who rig stocks and valuation bumps for Musk. Over 1000 witnesses can prove every one of those claims in any live televised Congressional hearing! Senators Dianne Feinstein, Harry Reid, Nancy Pelosi, Kamala Harris and their associates own the stock in Tesla Motors and/or it's suppliers and mining companies. That is why they criminally help cover-up investigations of Tesla! All of this was reported, in writing, to James Comey, Patricia Rich and David Johnson at the FBI.

The DNC bosses own the stock in lithium, Solar and EV markets and use kickbacks from those markets (Especially via convoluted campaign finance laundering via Elon Musk) to finance the DNC. The DNC bosses use character assassination as their main political tool against any member of the public who speaks out against their felony stock market scams and PizzaGate-like scandals. The Harvey Weinstein reports by Ronan Farrow show that they have teams of hired goons that they pay to destroy people's lives. They use Black Cube, Mossad, In-Q-Tel, Stratfor, Gawker Media, Gizmodo Media, Media Matters, David Brock, Sid Blumenthal, NY Times, Google servers, Facebook servers, Podesta Group, Perkins Coie, Covington & Burling and a host of "assassins".

It should be a felony to hire character assassins in the USA. DEMAND A LAW and DEMAND the termination of these attack services. IE: Gawker and Gizmodo Media sets-up the attack stories and, in paid partnership with Google, Google kicks their attack links around the globe, in front of 8 Billion people, forever. Google locks the attack articles of its enemies on the front top search results of Google search results forever, on purpose! That is why Google is being terminated in the largest, most well resourced anti-corruption public service take-down in history!

You have probably seen the many issues with Elon Musk And Tesla Motors including:

"His corrupt cobalt mines promote genocide in the Congo as seen in NETFLIX Black Earth Rising"

"His corrupt cobalt mines promote mass rape in the Congo as seen in NETFLIX Black Earth Rising"

"His corrupt cobalt mines promote child slave labor in the Congo as seen in NETFLIX Black Earth Rising"

"His is not faithful to his girlfriends"

"The workers that build his batteries die or sicken from toxic poisoning"

"Tesla bribes U.S. Senators with cash and stock in order to get free taxpayer funds"

"He is addicted to drugs and booze"

"He has sociopath mental issues"

"He is a narcissist"

"Tesla has had more recalls for safety defects, per volume, than any other car maker. Musk refuses to allow the use of the word RECALL but the facts are the facts."

"It is so easy to hack any Tesla and crash it, break into it or give it bad braking orders that it is criminally negligent to allow Tesla's on the street. Even the Chinese have hacked Tesla's from the other side of the world!"

"His partner: Steve Jurvetson, has been charged with sex and corruption issues"

"He arranged government kick-backs with the White House"

"He is the world's biggest government mooch"

"He is a member of the Palo Alto Mafia"

"Google (who is a major Tesla investor) hides all negative Musk/Tesla news and hypes TSLA stock in order to profiteer with TSLA stock. This is a violation of federal SEC laws"

"More drivers have been caught driving drunk, in Tesla's, than any other car Per Capita produced"

"Larry Page is Musk's bromance buddy and he uses Google to cover-up Musk's scandals"

"His so-called 'foundation' is just a payola and tax evasion scam for his family"

"His batteries are the most dangerous use of lithium ion storage ever conceived"

"His partner: Panasonic has been charged with multiple corruption, dumping, price rigging and manipulation crimes around the globe"

"Almost all of the internet 'Tesla Fanboys' are Russian troll farms and hired bloggers that Musk pays vast amounts of money to in order to hype up a fake image for him"

"His SpaceX is nothing more than a domestic spy satellite company"

"Musk's brain chip company tortures small animals in bad science experiments"

"His father screwed his daughter and got her pregnant"

"Dianne Feinstein and her family own Musk interests"

"You can't put out the fires when his batteries explode"

"The fumes from his thermal battery vapors give you cancer, lung and brain damage"

"Elon Musk only takes over other people's ideas. He took over Tesla and ran it into the ground, he destroyed SolarCity with his brothers self-dealing scam, his brain cap company just cuts open the heads of helpless animals and all SpaceX does, now that Musk took it over, is launch satellites that spy on civilians and manipulate media..."
etc.....

You may have run across Musk's self promoting, narcissistic, multi-billion dollar, self-aggrandizing PR hype but here is the other side of the coin. We know these facts from personal interaction with Musk, his companies and his politicians. Everything in this letter can be proven in a jury trial, Congressional hearings or live TV debates. Musk will do anything to keep this information from getting out but... it is too late for him! While this may sound like a bad Hollywood movie script. It all really happened and there is now massive hard copy evidence to prove it.

Elon Musk exists because he bribed DNC politicians including Obama, Clinton and Senators Feinstein, Reid, Boxer, Harris, Spier and Pelosi to give him free taxpayer cash and government resources from the Department of Energy and the California political tax pool. This is proven when you follow-the-money and the insider trading, stock ownership and crony payola kick-backs.

The Energy Dept (DOE) has been covering-up organized crime activities at DOE in which DOE funds are being used as a slush-fund to pay off DNC campaign financiers and to pay for CIA/GPS Fusion-Class attacks on Silicon Valley business competitors. DNC campaign financiers and DOE staff share stock market holdings with each other under family trusts, shell corporations and layered Goldman Sachs accounts. The deal was: Obama funds Tesla, Musk conduits campaign funds to Obama, top Obama staff profit off of insider Musk stocks.

Elon Musk is a criminal, a mobster, an asshole, a balding fake-hair wearing, plastic surgery-addicted, bi-sexual douchebag, woman-abusing, sex addicted, tax evader. We can put this in writing because all of those identifications regarding Musk can be proven in court and are documented in existing lawsuits and news stories.

Musk exploits poor people and child slaves in the Congo and Afghanistan to mine his lithium and Cobalt. Look up this phrase on the top search engines: “child labor electric car batteries”.

Musk spends billions per year to hire Russian trolls, fake blogger fan-boys and buy fake news self-glory look-at-me articles about himself. Musk thinks he is the 'Jesus' of Silicon Valley and he will do anything to make the public think so. Musk is insecure because his father was abusive and his “trophy wife” Mother is overbearing so he developed sociopath-like mental issues. Musk has been professionally diagnosed as a 'psychotic narcissist'. He public stated on an investor call that he uses drugs and alcohol to get through the night. We have the tapes.

Musk relies on Google and the DNC Main Stream News (MSN) to hide bad news about him. Fake News manipulator Google is run by Larry Page. Larry is Musk's investor and bromance ‘Butt buddy’. They share an apartment. Musk uses massive numbers of shell companies and trust funds to self-deal, evade the law and hide his bribes and stock market insider trading. His brother ran Solar City and is now under federal investigation for securities fraud.

A huge number of Tesla drivers have been killed; pedestrians and oncoming drivers have also been killed, and Musk covers it up.

The DNC and the MSM refuse to allow any articles about Musk's crimes to be printed because they benefit from Musk's crimes. VC’s Tim Draper and Steve Jurvetson are so fanatical about not being embarrassed from a Tesla bankruptcy that they will pump the TSLA stock and threaten anybody who might disclose the Musk misdeeds. Peter Thiel, a Musk ‘boyfriend’ also protects Musk. Musk, and his cronies, use Palantir, Google and related software to scan the entire internet every few minutes for any occurrence of the words: “Musk”, “Tesla” or “Tesla Fire”. They send trolls and fake bloggers (Many of them Russian) to put pro-Musk comments on the comments section of any blogs or articles discussing those topics and try to flood out the truth about Musk. In EVERY blog that you read that mentions 'Musk', at least 1/3 of the comments have been placed there by Musk's paid shills. There are no “Tesla Fan Boys”. All of the fanatic Tesla comments on the internet are Musk’s, Thiel’s, Jurvetson’s and Draper’s fake fanboy trolls. Musk, himself, stays up late at night pretending to be a ‘Tesla Fan Boy’ on blogs.

The 'Silicon Valley Mafia; cartel of frat boy sociopath venture capitalists like Steve Jurvetson, Tim Draper, Eric Schmidt, et al; threaten those who do not support the cult of Tesla or their political candidates.

Musk holds the record for getting sued for fraud by his investors, wives, former partners, employees, suppliers and co-founders. Elon Musk has gone out of his way to hire hundreds of ex-CIA and In-Q-Tel staff and assign them to "dirty tricks teams" to attack his competitors and elected officials who Musk hates.

Musk never founded his companies. He took Tesla away from the founder: Marty, in a hostile take-over!

Musk's "Starlink" satellites are domestic spy and political manipulation tools - never get your internet from one. SpaceX is entirely a spy satellite operation.

The same kind of EMF radiation proven to cause cancer from cell phones exists in massive amounts in a Tesla.

Musk can't fix a car or build a rocket and has almost no mechanical skills.

If you pull a report of every VIN# of every Tesla ever built and cross reference that with insurance, repair and lawsuit records you will find that the "per volume" fire, crash, death and defect rate is THE WORST of any car maker in history!

Musk is a lying con artist and partners with Goldman Sachs to rig the stock market. Sachs has a dedicated team of 18 men who rig stocks and valuation bumps for Musk.

Over 1000 witnesses can prove every one of those claims in any live televised Congressional hearing! Senators Dianne Feinstein, Harry Reid, Nancy Pelosi, Kamala Harris and their associates own the stock in Tesla Motors and/or its suppliers and mining companies. That is why they criminally help cover-up investigations of Tesla! All of this was reported, in writing, to James Comey, Patricia Rich and David Johnson at the FBI.

Why aren't all of those parties in prison if it is so easy to prove the crime? Think back to recent history: the heads of the Department of Energy, the FBI, The DOJ and the U.S. Attorney General were kicked out of their jobs for corruption. THIS was the corruption they were doing. They all knew about this crime but they were covering it up.

Musk took over Tesla Motors in a hostile take-over in order to exploit lithium, cobalt and other mining corruption deals for his business partners. Let's take a look at the 'lithium' in Musk's horrifically miss-engineered lithium ion batteries:

His batteries cause wars in the Congo, Afghanistan and Bolivia from the corrupt mining deals involved with mining lithium and cobalt. Lithium ion batteries are insider trading-owned by ex-CIA boss Woolsey and DOE Boss Chu. Lithium ion batteries excrete chemicals that mutate fetuses when they burn; destroy your brain, lungs and nervous system when they burn; kill the factory workers who make them; cause Panasonic to be one of the most corrupt companies in the world; poison the Earth when disposed of; can't be extinguished by firemen; poison firemen when they burn; are based on criminally corrupt mining schemes like URANIUM ONE; Have over 61 toxic chemicals in them; come from an industry that spends billions on internet shills and trolls used to nay say all other forms of energy; and are insider-trading owned by corrupt U.S. Senators who are running a SAFETY COVER-UP about their dangers.

Apple products with lithium ion batteries have been exploding and setting people on fire. Over time the chemical dendrites, or deposits, inside each battery grow worse and increase the chances of explosion as they age - LITHIUM ION BATTERIES BECOME MORE AND MORE LIKELY TO EXPLODE AS TIME GOES ON AND AS THEY AGE. This is not a theory. This is a scientific fact. That is why you hear about more and more lithium batteries catching fire and blowing up. Additionally, scientists also speculate that the increasing presence of low energy nuclear background energy and wifi energy in the environment is making lithium ion batteries explode more often lately. This theory is upheld by the increasing number of FAA reports about commercial airline cabins suddenly "filling up with toxic smoke" as some lithium ion battery explodes in someones overhead luggage. As commercial jets go higher they lose the protection of the atmosphere and are subjected to more gamma (and other) radiation from overhead. This makes the already unstable lithium ion batteries on board blow up.

"Bad Guys" have figured out how to make them explode remotely in devices by making the device electronics cause the batteries to overload. The dangers of lithium ion batteries are hidden by CNN and Main Stream News (MSN) because pretty much only the DNC people profit from them and the DNC folks control CNN and the MSN.

The Obama Administration promised Silicon Valley oligarchs the market monopoly on lithium ion batteries and the sabotage of fuel cells in exchange for campaign financing and search engine rigging; United States Senators that are supposed to protect us from these deadly products own the stock market assets of them so they protect them and stop the FDA, OSHA, DOT & NHTSA from outlawing them.

Tom Steyer is a notorious DNC financier. His partner, Margaret Sullivan ran, the federal USAID agency, USAID sent all of the DNC campaign financiers in Silicon Valley a federal 'report' from USAID that said there was "A TRILLION DOLLARS OF LITHIUM IN AFGHANISTAN" and promised to give those lithium mines, EXCLUSIVELY, to the Silicon Valley venture capitalists if they funded and web search manipulated the election for Obama to take over the White House. We have the documents proving this. In other words, a re-up of the Afghan

War was caused by Elon Musk and it killed American soldiers so that Musk could buy more mansions and trophy wives.

Alkaline, NiCAD and hundreds of other battery chemistries DO NOT have all of these problems but Lithium Ion batteries get a monopoly because of politician insider trading ownerships.

Tesla Motors has caused far more deaths and injuries than the world generally knows about. A recent fire on U.S. Highway 101 near Mountain View, CA, burned the driver alive and killed him. In Florida two kids died in a Tesla, burned alive, screaming in agony. A man died in agony in a Tesla crash in Malibu that set Malibu Canyon on fire. A young woman, at the start of life, and her boyfriend were burned alive in their crashed Tesla. There are many more deaths and crashes than you have seen in the Main Stream News (MSN) The deaths and the cover-ups are endless.

Senators Dianne Feinstein, Harry Reid, Nancy Pelosi, Kamala Harris and their associates own the stock in Tesla Motors and/or it's suppliers and mining companies and they cover-up and halt investigations and laws designed to save the public. They, and their crony's, spend over \$1B a year to shill and troll hype about lithium ion batteries and cover-up the dangers. Lithium ion EVs are more prone to battery fires. Experts say that their lithium-ion batteries can fuel hotter fires that release toxic fumes and are more difficult to put out. Lithium ion fires keep reigniting which explains why it takes so long and requires copious amounts of water or foam (it is an electric fire, after all) to smother the flames. Tesla employee Bernard Tse and his team warned Elon Musk about these dangers in 2008 and they got fired and/or warned to "say nothing" by Musk. Three top Tesla engineers died in a plane crash next to Tesla offices in San Carlos after two of them agreed to become whistle-blowers.

The DNC bosses, Congress people and federal executives own the stock in lithium, Solar and EV markets and use kickbacks from those markets (Especially via convoluted campaign finance laundering via Elon Musk) to finance the DNC.

The DNC bosses and Musk use character assassination as their main political tool against any member of the public who speaks out against their felony stock market scams and PizzaGate-like scandals. The Harvey Weinstein reports by Ronan Farrow show that they have teams of hired goons that they pay to destroy people's lives.

They use Black Cube, Mossad, In-Q-Tel, Stratfor, Gawker Media, Gizmodo Media, Media Matters, David Brock, Sid Blumenthal, NY Times, Google servers, Facebook servers, Podesta Group, Perkins Coie, Covington & Burling and a host of "media assassins".

Gawker and Gizmodo Media set-up the attack stories and, in paid partnership with Google, Google kicks their attack links around the globe, in front of 8 Billion people, forever. Google locks the attack articles of its enemies on the front top search results of Google search results forever, on purpose! Google and Musk are partners-in-crime. Larry Page steals technology for Google and Musk meets with Larry Page to advise him on which technologies to steal and how to bypass FEC laws. Musk has exceeded FEC campaign finance limits by billions of dollars via "in-kind" services.

ELON MUSK'S PAID-FOR FAKE NEWS MEDIA SHILLS. THEY COVER UP HIS CORRUPTION AND PUSH PUFF-STORIES ABOUT MUSK. NEVER TRUST THEM TO BE ANYTHING BUT BIASED PROPAGANDA OUTLETS. MANY OF THEM OWN TESLA STOCK: Electrek, Google, Facebook, CNN, Huffington Post, Dianne Feinstein's PR office, Nancy Pelosi, Steven Chu, MSNBC, PayPal, KPIX-TV, San Jose Mercury News, Any Hearst owned entity, The SF Chronicle, Motley Fool, Green Car Congress, The executive staff of the DNC, The NY Times, Tesla's out-of-control sudden-acceleration surge defects

and exploding batteries are not as bad as Tesla's out-of-control corruption and bribery.

HOW THE DEPARTMENT OF ENERGY AND THE OBAMA WHITE HOUSE ATTACKS ANYBODY WHO EXPOSES THE SCHEME:

How and why did a Donald Trump stripper-date named "Stormy" or an Elon Musk sex party or a Kavanaugh drinking incident or the Moonves and Weinstein indiscretions suddenly hit the news at about the same time in news history?

In addition to actual murder, Politicians and Silicon Valley Oligarchs hire operatives to end people's lives in other creative ways.

It is all part of the modern trend in vendetta, revenge and political payback when a Senator or a tech oligarch issues a "kill order" on an opponent.

The client does not like to get their hands dirty so the actual social hit job is performed by companies such as:

IN-Q-Tel - (DNC); Gawker Media - (DNC); Jalopnik - (DNC); Gizmodo Media - (DNC); K2 Intelligence - (DNC); WikiStrat - (DNC); Podesta Group - (DNC); Fusion GPS - (DNC/GOP); Google - (DNC); YouTube - (DNC); Alphabet - (DNC); Facebook - (DNC); Twitter - (DNC); Think Progress - (DNC); Media Matters - (DNC); Black Cube - (DNC); Mossad - (DNC); Correct The Record - (DNC); Sand Line - (DNC/GOP); Blackwater - (DNC/GOP); Stratfor - (DNC/GOP); ShareBlue - (DNC); Wikileaks (DNC/GOP); Cambridge Analytica - (DNC/GOP); Sid Blumenthal- (DNC); David Brock - (DNC); PR Firm Sunshine Sachs (DNC); Covington and Burling - (DNC), Buzzfeed - (DNC) Perkins Coie - (DNC); Wilson Sonsini - (DNC) and hundreds of others... These are the people and companies that except cash, revolving door jobs, political appointments, insider trading stock in Silicon Valley tech companies, prostitutes and real estate in exchange for destroying the lives of others.

These attackers deserve to be punished for the rest of their lives for taking away the lives of others in exchange for cash. Any company who is corrupt enough to hire any of these assassins should be forced out of business. These attack services are responsible for 90% of the "Fake News" problem in the world because they are the authors of most fake news. Congress must act to make these kinds of companies illegal!

These digital assassination services offer hit-jobs, character assassinations and economic reprisal programs to famous billionaires and corrupt politicians who are seeking revenge, retribution and vendetta executions.

In the case of reporters getting targeted for attacks, President Donald Trump has been accused by the liberal corporate media of whipping up a hateful frenzy against the press. But while CNN's Jim Acosta grandstands against Trump, real journalists are still reeling from the draconian extrajudicial measures that Barack Obama and his administration used to target them for exposing truth.

This secretive targeting occurred while Obama speechwriter and hate-filled ANTIFA supporter Ben Rhodes was running "Operation Echo Chamber," which reportedly continues, in which he fed information to willing corporate media scribes. "They literally know nothing," Rhodes said of the twentysomething journalists he easily manipulated.

The Freedom of the Press Foundation's Trevor Timm published documents showing how former attorney general Eric Holder changed the rules to more effectively intimidate and surveil members of the press.

Timm writes: "Today, we are revealing—for the first time—the Justice Department's rules for targeting journalists with secret FISA court orders. The documents were obtained as part of a Freedom of Information Act lawsuit brought by Freedom of the Press Foundation and Knight First Amendment Institute at Columbia University."

Trending: Brennan and Clapper Accused of Hacking John Roberts To Blackmail Him

Here is the memo published by the Foundation, which dropped the documents in their entirety:

Obama is also clearly linked to the plot to obtain fraudulent FISA warrants on President Trump's team, as evidenced by Peter Strzok and Lisa Page's texts confirming that Obama was overseeing their fly-by-night operation.

Larry Schweikart reported for Big League Politics:

For months pundits and researchers have been pondering the mystery of the FISA approval that led to the illegal and historically titanic scandals to ever hit the U.S. government. Some have argued that Assistant Attorney General Rod Rosenstein knew the FISA was bogus when he extended it. Others have wondered if Special Counsel Robert Mueller knew about the fraudulent basis of the FISA when he used it, in part, to indict Michael Flynn. Other still, that Mueller was fooled by the FBI.

This is what President Trump calls "SPYGATE".

It may well be that the surveillance that was conducted began with UK intelligence services and then was fed back to the White House of Barack Obama. Here's the kicker:

President Barack Obama did not need a FISA warrant to authorize spying/electronic surveillance on Trump because Obama all along had legal authorization to by-pass the normal court vetting process. According to 50 U.S. Code 1802, the "Electronic Surveillance Authorization" () "Foreign intelligence in relation to a US person (Trump or his associates) is information that's necessary for the US to protect against attack, hostile acts, sabotage, . . . as well as other clandestine activities by a foreign power . . . OR . . . information relevant to national defense/security of the US, or the conduct of foreign affairs of the U.S." Such an authorization by Obama required certification by Attorney General Loretta Lynch that must be logged with the FISC court. ("The [AG]+ shall immediately transmit under seal to the court [FISC] a copy of his certification.")

In short, the DOJ has this. If we are correct, a copy of that certification is currently under seal at least with the DOJ and the FISC. This is what they are hiding.

However, the Act requires the AG to keep the Select Committee on Intelligence and the Senate Committee on Intelligence informed of these authorizations and unmaskings therein. See 1803 (a) (1) (C) If indeed this is what happened, did Lynch report—or only selectively report—to the committees in a way that excluded non-friendlies? Can you see why Adam Schiff, Mark Warner, and their ilk are terrified?

- 1) Obama authorized spying/electronic surveillance on Team Trump, by-passing normal judicial oversight.
- 2) To create “foreign intelligence,” John Brennan and others organized for UK intelligence to conduct surveillance on Trump and his associates, either from the UK or from UK assets within the U.S. This is another reason revealing this will unleash an excrement storm: the UK is about to be caught meddling bigly in an American election.
- 3) Lynch certified Obama’s authorization which is now held under seal by DOJ (and FISC).

From this authorization, all unmaking followed, as well as the FBI fraudulent counter intel investigation and perhaps the FISA warrant too. Obama knew this was all fake when he made the authorization; Lynch knew it was fake when she certified it; the entire inner circle, including the FBI, all knew. This takes the U.S. into uncharted territory, and could imperil any politician in the British government who supported this or had knowledge of it. Proving any of this would be difficult, as if confronted Lynch would almost certainly cover up and Obama would simply deny knowledge. Without a paper trail, a conviction might be a bridge too far. This is only one of thousands of "kill order" tactics introduced by the Obama Administration.

These are the playbook tactics that Senators and tech oligarchs most often use to destroy the lives of their political and business enemies:

- Government agency bosses sometimes solicit the target victims with false promises of future loans, contracts or grants from their agency and cause the target victims to expend millions of dollars and years of their time for projects which those government bosses had covertly promised to their friends. They use the target victims as a “smokescreen” to cover their illegal government slush-funds for the victims competitors and personal enemies. By using this tactic, the attackers can drain the target victims funds and force them into an economic disaster in plain view of everyone without the government bosses fearing any reprisal for their scam.
- Every match.com, okcupid.com, Plenty Of Fish, Seeking Arrangements and all other IAC-owned, or similar, dating sites (IAC is managed by Hillary Clinton's daughter) have had their profiles, texts, and inter-member communications, since those companies were started, hacked or purchased. The attack service providers use Palantir and In-Q-Tel financed data analysis software to analyze every activity in those dating services in order to find honey-trap, blackmail, sextortion and social conflict exploitation opportunities. If you had a bad date with someone, that someone will be hunted down and convinced to help harm, #metoo or "rape charge" the intended target. All dates involve a search for sex, so the likelihood that a sexual disappointment experience will exist in each persons dating history is high. Searching every past dating email and text of a subject is quite easy with modern software and hacking techniques. A synthetically amplified, PR-agency optimized sex scandal can destroy any target. Your dating experiences from the 70's or 80's will come back to haunt you decades later. Most dates involve drinking alcohol and taking drugs. If you were unattractive or had bad sexual skills your bad date will be called "date rape", "drugging your date for sex" and related twisted narratives that are designed to shame you, the target. If you try to get a date in the future, your potential date will be contacted by a third party who will slander and libel you to make sure your potential first date gets cancelled. Your social life will, essentially, end. Every photo on every dating site is cross checked with every other photo on the internet in order to cull your Facebook, LinkedIn, Snapchat and other social media together to create a total psychological manipulation profile data file on you. A single photo on a dating site can be cross searched on every mugshot archive, photo album and corporate database in the worth within minutes using modern super-computers. Your sex life will be on public record in a flash.

- Social Security, SSI, SDI, Disability and other earned benefits are stone-walled. Applications of targets are “lost”. Files in the application process “disappeared”. Lois Lerner hard drive “incidents” are operated in order to seek to hide information and run cover-ups.
- Government officials and tech oligarchs contact members of the National Venture Capital association (NVCA) and created national “black-lists” to blockade target victims from ever receiving investor funding. This was also confirmed in a widely published disclosure by Tesla Motors Daryl Strydom and in published testimony. If Silicon Valley political campaign finance oligarchs black-list you (see the "AngelGate" Scandal and the "High Tech No Poaching Class Action Lawsuit" cases) you will never get investor funding again.
- FOIA requests are hidden, frozen, stone-walled, delayed, lied about and only partially responded to in order to seek to hide information and run cover-ups.
- State and federal employees will play an endless game of Catch-22 by arbitrarily determining that deadlines had passed that they, the government officials, had stonewalled and obfuscated applications for, in order to force these deadlines that they set, to appear to be missed. This can bankrupt a target victim.
- Some Victims found themselves strangely poisoned, not unlike the Alexander Litvenko case. Heavy metals and toxic materials were found right after their work with the Department of Energy weapons and energy facilities. Many wonder if these “targets” were intentionally exposed to toxins in retribution for their testimony. The federal MSDS documents clearly show that a number of these people were exposed to deadly compounds and radiations, via DOE, without being provided with proper HazMat suits which DOE officials knew were required.
- Victims employers are called, and faxed, and ordered to fire target victims from their places of employment, in the middle of the day, with no notice, as a retribution tactic.
- On orders from Obama White House officials, DNC-financed Google, YouTube, Gawker Media and Gizmodo Media produce attack articles and defamation videos. Google locks this attack media on the internet on the top line, of the front page of all Google searches for a decade in front of 7.5 billion people, around the world. This attack-type uses over \$40 million dollars in server farms, production costs and internet rigging. The forensic data acquired from tracking some of these attacks proves that Google rigs attacks against individuals on the internet and that all of Google’s “impressions” are manually controlled by Google’s executives who are also the main financiers and policy directors of the Obama Administration. This data was provided to the European Union for it’s ongoing prosecution of Google’s political manipulation of public perceptions.
- Victims HR and employment records, on recruiting and hiring databases, are embedded with negative keywords in order to prevent the victim targets from ever gaining future employment.
- Gary D. Conley, Seth Rich, Rajeev Motwani and many other whistle-blowers in these matters, turned up dead under strange circumstances. It is very possible that some of these attack services, operated by former CIA operatives, even offer discrete murder-for-sale services using high-tech assassination tools that make murders look like heart attacks and brain failures.
- Disability and VA complaint hearings and benefits are frozen, delayed, denied or subjected to lost records and "missing hard drives" as in the Lois Lerner case.
- Paypal (A DNC-biased operation) and other on-line payments for on-line sales are de-platformed, delayed, hidden, or re-directed in order to terminate income potential for target victims who competed with the attackers interests and holdings.

- DNS redirection, "website spoofing" sends target victims websites to dead ends where no sales orders or customer inquiries actually get back to the target. These internet revenue activity manipulations are conducted using Google and Amazon servers. All commercial storefronts and on-line sales attempts by target victims, will have had their sites hidden, or search engine de-linked by a massively resourced facility located in Virginia, Texas or Palo Alto, California in order to terminate revenue potentials for the target victims.
- Over 50,000 trolls, shills, botnets and synth-blog deployments are deployed to place defamatory statements and disinformation about victims in front of 7.5 billion people around the world on the internet in order to seek to damage their federal testimony credibility by a massively resourced facility.
- Campaign finance dirty tricks contractors are hired by campaign financiers to attack the friends and family members of the target victim in order to create low morale for the target victims psyche and motivation.
- Are you getting weird headaches and hearing a "buzzing sound" in your head? The U.S. Government has now acknowledged that the Cuban, Chinese and other embassy "sonic attacks" are from a known microwave beam weapon. Any one of the technical departments of the attack services listed at the top of this article can build such a biological harassment weapon. It can be aimed at the target victims office, bedroom or vehicle and, within a week, have caused biological and emotional damage using a weapon that has no visible track of trajectory. It is designed to make the target victim think they are "going crazy" or "hearing sounds in their head". While this may sound pretty out there, web search "Embassy sonic attacks" on the top 5 non-Google search engines and read the very credible reports of these attacks.
- In one case covert political partner: Google, transferred large sums of cash to dirty tricks contractors and then manually locked the media portion of the attacks into the top lines of the top pages of all Google searches globally, for years, with hidden embedded codes in the links and web-pages which multiplied the attacks on Victims by many magnitudes.
- Covert Cartel financier: Google, placed Google's lawyer: Michelle Lee, in charge of the U.S. Patent Office and she, in turn, stacked all of the U.S. Patent Office IPR and ALICE review boards and offices with Google-supporting employees in order to rig the U.S. Patent Office to protect Google from being prosecuted for the vast patent thefts that Google engages in. Google has hundreds of patent lawsuits for technology theft and a number of those lawsuits refer to Google's operations as "Racketeering", "Monopolistic Cartel" and "Government Coup-like" behaviors. Thousands of articles and investigations detail the fact that Google, "essentially" ran the Obama White House and provided over 80% of the key White House staff. A conflict-of-interest unlike any in American history. Google's investors personally told Applicant they would "kill him". Google and the Obama Administration were "the same entity". Applicant testified in the review that got Michelle Lee terminated and uncovered a tactical political and social warfare group inside Google who were financed by Federal and State funds.
- Honeytraps and moles were employed by the attackers. In this tactic, people who covertly worked for the attackers were employed to approach the "target" in order to spy on and misdirect the subject.
- Gawker Media, Gizmodo Media, Snopes, SPLC and other hired media assassins will be retained to produce "hatchet job" character assassination articles about you. Then those articles will be faxed, mailed and emailed to your employer and investors with a note saying: "You don't want to have anything to do with this person, do you..?" in order to get you fired from your job and get your loans or financing pulled. The attackers will use their round one attack media, that they authored, to create a round two second wave attack designed to end your life via economic warfare.
- Mortgage and rental applications will have had red flags added to them in databases to prevent the targets from getting homes or apartments.

- Krebs On Security, Wired, Ars Technica, The Wall Street Journal and most major IT publications have reported that hundreds of spy "back-doors" have been found on every Intel, AMD, Apple, Xfinity, Cisco, Microsoft, Juniper Networks motherboard, chip-set and hardware component set. This means that any kid with the "key" code can open any computer, server, router, cloud-network or other network connected device and read every file, photo, video, your calendar and email on your devices at any time from any location on Earth. The key codes have been released to every hacker community in the world for over ten years. There is now no government, corporate or personal data that can't be hacked, even data from decades ago. Every single one of your darkest secrets can be in the hands of your enemy within 60 minutes, or less. Important meetings you had planned with potential investors, employers, clients, dates, suppliers and others will suddenly get cancelled at the last minute. They will get cancelled because your enemies are reading your calendar remotely and covertly sending slander information to those you had hoped to engage with in order to sabotage your life. Nothing you have ever typed on a computer or Smartphone is safe. it WILL be acquired and it WILL be used against you.

- McCarthy-Era "Black-lists" are created and employed against target victims who competed with Obama Administration executives and their campaign financiers to prevent them from getting funding and future employment.

- Obama Administration targets were very carefully placed in a position of not being able to get jobs, unemployment benefits, disability benefits or acquire any possible sources of income. The retribution tactics were audacious, overt..and quite illegal.

- There are thousands of additional Dirty Tricks tactics being used by these Attack Services yet Congress refuses to pass laws out-lawing such attack services. The cost of an attack on a person ranges from \$150,000.00 to over \$50,000,000.00. While a Silicon Valley billionaire can afford to launch counter-measures to these attacks, any regular taxpayer will be utterly destroyed, and incapable of fighting back, against even the smallest version of one of these "kill orders". A number of modern office shootings are the results of these attacks against an individual who has lost everything because of the attack and has no options left.

Federal law enforcement, the United States Congress and the highest level investigators in the U.S., and abroad, have documented (per the "FISA Memo", Congressional Reports and federal employee testimony) and proven the fact that the Obama Administration regularly engaged in the operation of retribution, vendetta and reprisal campaigns known as "hit-jobs" against domestic natural born U.S. citizen domestic taxpayers. The Federal Court, in at least one previous court case,has ruled that Applicants, in this particular matter, were the victims and target of a number of these attacks designed to inflict permanent medical, emotional, character assassination, brand negation, economic and career damage.

!!!! Mueller Hears That Silicon Valley Has Been Manipulating The Entire BREXIT Campaign !!!!!

- Second former employee of controversial data firm to be questioned by special counsel's inquiry into Russia collusion

By Carole Cadwalladr

Brittany Kaiser is said to be cooperating fully with the Mueller inquiry.

A director of the controversial data company Cambridge Analytica, who appeared with Arron Banks at the launch of the Leave.EU campaign, has been subpoenaed by the US investigation into possible collusion between the Trump campaign and the Russian government.

A spokesman for Brittany Kaiser, former business development director for Cambridge Analytica – which collapsed after the Observer revealed details of its misuse of Facebook data – confirmed that she had been subpoenaed by special counsel Robert Mueller, and was cooperating fully with his investigation.

He added that she was assisting other US congressional and legal investigations into the company's activities and had voluntarily turned over documents and data.

Kaiser, who gave evidence to the UK parliament last April in which she claimed Cambridge Analytica had carried out in-depth work for Leave.EU, is the second individual connected to the firm subpoenaed by the special counsel. The Electoral Commission has said its investigation into Leave.EU found no evidence that the campaign “received donations or paid for services from Cambridge Analytica ...beyond initial scoping work”.

Damian Collins, chairman of parliament's inquiry into fake news, said it was “no surprise” that Kaiser was under scrutiny by Mueller because “her work connected her to WikiLeaks, Cambridge Analytica and [its parent company] SCL, the Trump campaign, Leave.EU and Arron Banks”.

He said it was now vital Britain had its own inquiry into foreign interference: “We should not be leaving this to the Americans.”

Tom Watson, the deputy leader of the Labour party, echoed Collins's statement, saying: “This is the first evidence that a significant player in the Leave.EU campaign is of interested to the global Mueller inquiry. People will be bewildered that the British government has no interest in establishing the facts of what happened.”

In August, Sam Patten, a US political consultant who had worked for Cambridge Analytica on campaigns in the US and abroad, struck a plea deal with Mueller after admitting he had failed to register as a foreign agent for a Ukrainian oligarch.

He became a subject of the special counsel's inquiry because of work done with Paul Manafort, Trump's campaign manager, in Ukraine. He had also set up a business with Konstantin Kilimnik, a key figure who Mueller has alleged has ties to Russian intelligence and who is facing charges of obstruction of justice. In a 2017 statement to the Washington Post, Kilimnik denied any connection to intelligence services. Kaiser, however, is the first person connected directly to both the Brexit and Trump campaigns known to have been questioned by Mueller.

The news came to light in a new Netflix documentary, *The Great Hack*, which premiered at the Sundance film festival last month and is expected to be released later this spring. Film-makers followed Kaiser for months after she approached the Guardian, including moments after she received the subpoena. She claims the summons came after the Guardian revealed she had visited WikiLeaks founder Julian Assange while still a Cambridge Analytica employee in February 2017, three months after the US election.

One part of Mueller's investigation focuses on whether the Trump campaign sought to influence the timing of the release of emails by WikiLeaks before the election. Investigators are looking at communications between them. In the film, Kaiser says that she has gone from being a cooperating witness to a subject of investigation because of her contact with Assange.

In October 2017, it was revealed that Alexander Nix, the chief executive of Cambridge Analytica, had contacted Assange in August 2016 to try to obtain emails from Hillary Clinton's presidential campaign – which indictments from Mueller's team say were obtained by Russian military intelligence – to use in Donald Trump's campaign. When Kaiser gave evidence to parliament last year, she was asked about her relationship with Assange and WikiLeaks but failed to reveal that she had met Assange.

In the documentary, Kaiser is shown after receiving an email from the Guardian last June asking about meeting Assange and alleged donations of cryptocurrency to WikiLeaks. Kaiser did not respond to the email at the time, but on camera says: "She knows I met Assange. And she knows I donated money to WikiLeaks in bitcoin."

Her legal representatives later wrote to the paper to say that the allegations, including that she had "channelled" donations to WikiLeaks, were false. Kaiser said she had received a small gift of bitcoin in 2011 – long before she worked at Cambridge Analytica – and, not knowing what else to do with it, gave it to WikiLeaks, because she had benefited from material it had released over the years.

Her lawyer told the Observer that the meeting with Assange came about after a chance encounter in London with an acquaintance who knew him. It lasted 20 minutes and consisted mainly of Assange telling her "about how he saw the world". He said they did not discuss the US election.

Patten and Kaiser were involved in a controversial election campaign in Nigeria in January 2015, which former Cambridge Analytica employees say had "unsettling" parallels to the US presidential election.

The Guardian revealed that the data firm had worked alongside a team of unidentified Israeli intelligence operatives on the campaign. Ex-Cambridge Analytica employees described how the Israelis hacked the now-president of Nigeria's emails and released damaging information about him to the press weeks before the election.

CBS NEWS 60 MINUTES Lara Logan "I'm Being 'Targeted' For Saying the Media is 'Mostly Liberal'"

by Tamar Auber

On Wednesday, former CBS News foreign correspondent Lara Logan spoke with Fox News Sean Hannity about her recent comments slamming the media as "mostly liberal."

Logan told Breitbart podcaster Mike Ritland the remarks made on his show — which drew widespread attention online — amounted to "professional suicide."

Defending her remarks on Hannity's show, Logan said that as the result of her speaking out about how the media is "mostly liberal" she has been targeted because she is an independent voice.

"Any journalists who are not beating the same drum and giving the same talking points," she insisted "pay the price" for not going along with the liberal crowd.

She also called out her targeters by name.

"I know they're going to come after me," she told Hannity. "Michael Calderone who is at the Huffington Post. I can give you the script now. I can tell you who the players are. Joe Hagan. Brian Stelter."

She added: "They smear you personally. They go after your integrity. They go after your reputation as a person and a professional. They will stop at nothing. I am not the only one. And I am just, I am done, right, I am tired of it. And they do not get to write my story anymore. They don't get to speak for me, I want to say loudly and clearly to anybody who is listening, I am not owned. Nobody owns me, right? I'm not owned by the left or the right."

Logan made headlines recently when, during a scorched earth podcast interview with Ritland, she said that there was a lot of "weight" in most news organizations on "one side of the political spectrum."

"The media everywhere is mostly liberal. But in this country, 85 percent of journalists are registered Democrats. So that's just a fact, right?" she told Ritland.

She also trashed reporting based on single, anonymous government sources.

"That's not journalism, that's horseshit," Logan stressed. "Responsibility for fake news begins with us. We bear some responsibility for that, and we're not taking ownership of that and addressing it. We just want to blame it all on somebody else."

Internal documents from a private Israeli intelligence firm called Psy-Group show that, at the time of many incidents, the company, and possibly other private investigators, were targeting U.S. citizens because they spoke up about crimes.

Psy-Group's intelligence and influence operations, which included a failed attempt in the summer of 2017 to sway a local election in central California, were detailed in a New Yorker investigation that I co-wrote earlier this month. Before it went out of business (ie: changed it's name), last year, Psy-Group was part of a new wave of private-intelligence firms that recruited from the ranks of Israel's secret services and described themselves as "private Mossads." Psy-Group initially stood out among its rivals because it didn't just gather intelligence; its operatives used false identities, or avatars, to covertly spread messages in an attempt to influence what people believed and how they behaved. In 2016, Psy-Group held discussions with the Trump campaign and others about conducting covert "influence" operations to benefit the candidate. Psy-Group's founder and C.E.O., Royi Burstien, a veteran Israeli intelligence officer who established the firm in 2014, told me that his talks with the Trump campaign went nowhere. The company's posturing, however, attracted the attention of Robert Mueller, the special counsel, who has been investigating interference in the 2016 Presidential race.'

FED BOMBSHELL: Fusion GPS Bribed Dozens of MSM Journalists With Cash To Run Character Assassinations, While News Companies Paid Firm to Dig Dirt on Trump

High-ranking FBI insiders are pulling back the curtain on Fusion GPS, the firm that commissioned and spread the bogus Trump dossier.

It appears the embattled intelligence firm was quite busy paying off Big Media reporters, according to federal sources who have traced dozens of transactions between TD Bank and media members as well as media organizations, sources confirm.

But stunningly, Big Media organizations have employed Fusion GPS to dig dirt on politicians and D.C.'s elite — namely Donald Trump.

“Fusion GPS was on the payroll of the media and in turn had members of the media on its payroll,” one FBI insider said.

Bombshell revelations.

FBI insiders confirm Fusion GPS employed law firms as well as shell companies to send and receive funds to and from media and reporters. But the embattled firm also used its accounts at TD Bank to directly commission reporters. Likewise, Fusion GPS received funds from media companies into its own accounts at TD Bank, FBI insiders said,

“There are dozens of payments from the media flowing into their (Fusion GPS’) account,” one federal law enforcement official said. “One company wired funds to Fusion (GPS) more than a dozen times.”

Why would media companies commission Fusion GPS? Likely to dig dirt on enemies or secure records that reporters could not legally obtain, one federal law enforcement insider said. One FBI insider said the payments to Fusion GPS coincide with Donald Trump’s run for the White House.

The payments were made between Sept. 2015 and Sept. 2017, records show.

The unthinkable: The mainstream media paying Fusion GPS for dirt on Trump to the same firm the Democratic National Committee paid to fund the bogus Trump dossier. And at the same time Fusion GPS bribing journalists to place stories — likely negative about Trump, as well as spread the bogus Trump dossier around.

Stunning.

Was BuzzFeed — the only company to publish the full bogus dossier — on that list?

And who is on the payroll? We are trying to run that information down.

And why aren’t these people behind bars?

=====

What Is An 'Extinction-Level Interdiction Program' For Corrupt Companies And People?

By The Leesberg Foundation

It only works on corrupt companies that bribe, break the law, abuse employees, rape, tax evade, lie, cheat, steal, run character assassinations, operate anti-trust violating monopolies, spy and are generally dirty pigs.

That is why it works so well on Google, Gawker, Gizmodo, Jalopnik, Univision, Facebook, Tesla, Goldman Sachs and other creepy corps who bribe, break the law, abuse employees, rape, tax evade, lie, cheat, steal, run character assassinations, operate anti-trust violating monopolies, spy and are generally dirty pigs.

'Extinction-level' means that the goal is to put them-out-of-business.

'Interdiction' means that the effort involves interrupting their corruption, crimes, bribes, payola and sex trafficking.

It is a 'Program' because it is a constant, unwavering, long-term effort that the entire public population is continually expanding and adding to the effort of.

The efforts are long and take many years but they always work.

If your company does not bribe, break the law, abuse employees, rape, tax evade, lie, cheat, steal, run character assassinations, operate anti-trust violating monopolies, spy and they are not generally dirty pigs then they have nothing to worry about.

If the truth can't hurt a Facebook, Google or Tesla then they should have no concern about the truth being exposed.

Alas, though, those companies are targeted for extinction and any smart investor should remove their investment funds from those companies. The way that they are taken down includes exposing every time each investor engages in a bribe, breaks the law, abuses employees, rapes, tax evades, lies, cheats, steals, runs character assassinations, operates anti-trust violating monopolies, spies and is generally a dirty pig.

Bill Cosby thought he could not be taken down. He was!

Enron thought they could not be taken down. They were!

Dick Nixon thought he could not be taken down. He was!

Hillary Clinton thought she could not be taken down! She was!

Theranos thought it could not be taken down! It was!

The list is endless. The fact is clear: If you cheat rather than compete you will be destroyed.

It is now easier than ever to kill a corrupt entity!

We have hard-fact FBI and CIA-class evidence that Google, Gawker, Gizmodo, Jalopnik, Univision, Facebook, Tesla, Goldman Sachs and others are breaking the law and exist based on a criminal operation. That is why they are going down! We witnessed them do the crimes. Their ex-employees and federal investigators saw it too. That is why they are helping with the take-downs. Millions of web users who hate corruption are helping too, using crowd sourced forensics.

The deaths of these crooked behemoths will be long, slow and hard..but the crash they make when they finally fall will resound throughout history!

An Extinction-Level Interdiction Program known as an "ELIP" always guarantees that a corrupt attacking corporation will:

- A. Lose a minimum of one billion dollars in stock market and brand valuation from exposure of the truth about them.
- B. Suffer the firings or forced terminations of multiple senior staff.
- C. Have draft FBI 302 forms authored and submitted to the relevant regional FBI offices where those companies are located.
- D. Have private investigators prepare case files on the company, or individual, and submit those to every relevant law enforcement and regulatory agency on every continent.
- E. Have every investor who has placed over \$50,000.00 in the company investigated for tax fraud, expense fraud, drug abuse, spousal abuse, sexual extortion, off-shore accounts, political bribery, kick-backs, payola, under-the-table

payments, real estate fraud, 501 c 3 and 501 c 4 charity fraud, self-dealing, revolving door political payola and other relevant issues.

How To Destroy ANY Corrupt Politician or Dirty Silicon Valley Campaign Financier, 100% Legally!

Organized crime is alive and well in public offices across the nation. This is how you utterly destroy any person who engages in it, using 100% legal tactics and the power of crowd-sourced law enforcement.

FBI and other government officials will even help you do it. The voters will help you do it. Your friends will help you do it. Total strangers will help you do it. The entire internet will help you do it.

You will use CIA-class databases, social media, public watch-dog technologies, FBI-quality monitoring systems and open-source collaborative forensics comparison data to hunt down every: hooker, real estate asset, male prostitute, mistress, secret email account, social media posting, family trust fund, shell corporation, family stock market transaction, off-shore account, covert investment brokerage, email, Uber and Lyft ride, hotel entry and exit, credit card transaction, Paypal account, search engine manipulation, venture capital connection, Stanford University admissions bribe, expense account abuse, taxpayer funds abuse, rape, sextortion, covert tech company stock they own under another name, every party they attended, every tag they appear in on social media, every Cayman Island account, every crooked CPA or law firm they have used, every lobbyist they ever paid....EVERYTHING.. and you will drop the data into a simple database and cross matrix everything even better than the spy agencies can do it..

...AND EXPOSE IT ALL. YOU WILL SUE THEM IN SMALL CLAIMS COURT. YOU WILL LAUNCH CLASS ACTION LAWSUITS. YOU WILL HOLD PRESS CONFERENCES IN FRONT OF THEIR HOMES. YOU WILL CONFRONT THEM WITH FACTS AT EVERY SINGLE TOWN HALL AND PUBLIC APPEARANCE. YOU WILL PUT UP A BOOTH AT EVERY STREET FAIR AND PUBLIC ASSEMBLY AREA AND HAND OUT LITERATURE. YOU WILL CREATE A MASSIVE PUBLIC MEDIA CIRCUS. YOU WILL MAKE DISCLOSURE WEBSITES. YOU WILL NOT LET THEM ESCAPE!

Each person from each political office, lobby firm, law firm or company who engaged in the subversion of the government and the bribery of public officials WILL have EVERY personal email account, text message account, voice-mail hard drive, social media account, dating account or other PERSONAL communications account examined via investigators. Such examinations shall begin from the date of the opening of each account and run up to today. Law enforcement believes that such parties used personal data systems to subvert the laws of public disclosure and engage in criminal financial crimes and democracy subversion efforts.

You will be even more powerful than Ralph Nader, Julian Assange and Edward Snowden COMBINED!

You will ensure that the public servants, who are your EMPLOYEES!!!!, are held accountable and totally, completely devastated for their crimes against the public.

Trump Could Save Taxpayers ‘Billions Of Dollars’ By Straightening Out One Corrupt Energy Department Program, Report Finds

Michael Bastasch | Energy Editor

The Trump administration could save “billions of dollars” if the Energy Department improved its management of radioactive waste cleanups, according to the Government Accountability Office (GAO).

The GAO report, released Tuesday, also reported Congress could save up to \$4.3 billion by eliminating the loan program that gave \$192 million to a failed luxury electric car company.

“The Department of Energy could potentially avoid spending billions of dollars by developing a program-wide strategy to improve decision-making on cleaning up radioactive and hazardous waste,” GAO reported.

The Energy Department is responsible for cleaning up waste from nuclear weapons produced during the Cold War. The department has spent \$170 billion on cleanup since 1989, GAO reported, but lots of radioactive waste remains. (RELATED: The NYT Walks Back Bombshell EPA Report, Doesn't Issue A Correction)

The cost of cleanup is growing. The Energy Department estimates future nuclear waste cleanup could cost \$377 billion at 16 sites across the country. GAO says taxpayers could save billions if they took a programmatic approach rather than each nuclear waste site setting its own priorities.

The 200 Area of the Hanford nuclear site is seen in a 1995 aerial photo. Department of Energy/Handout via REUTERS

For example, Energy Department officials estimated \$18 billion in savings from prioritizing high-risk over low-risk waste at the Hanford site in Washington state. The department has yet to determine what it will do with as much as two-thirds of the low-risk waste at Hanford.

The Hanford site cleanup came under increased scrutiny after a “take cover” order was given in 2017 after a tunnel containing radioactive waste collapsed.

“DOE officials said that they are making progress in implementing a national programmatic approach to the cleanup and will continue to work toward this,” GAO reported. “DOE provided technical comments, which were incorporated as appropriate.”

GAO also highlighted an open recommendation to Congress that could save taxpayers up to \$4.3 billion.

“Unless the Department of Energy can demonstrate demand for new Advanced Technology Vehicles Manufacturing loans and viable applications, Congress may wish to consider rescinding all or part of the remaining credit subsidy appropriations,” GAO reported.

The Obama administration used that loan program to hand out taxpayer funds to electric car companies, including luxury automaker Fisker Automotive, which drew down on \$192 million before having its government credit stripped away.

Fisker's loan was sold off to a Chinese billionaire for \$25 million in 2013, netting taxpayers a \$139 million loss.

ADVANCED TECHNOLOGY VEHICLE MANUFACTURING LOAN

AND LOAN GUARANTEE SLUSH-FUND CORRUPTION

DOE corruption—appointed and elected officials should face prison time

An exhaustive review of 350+ pages of leaked emails regarding the Obama administration’s handling of the various green-energy loan and grant programs makes several things very clear: they lied, engaged in favoritism, and rushed application approvals to suit the political agenda of the White House. At the same time, worthy projects that went through a complete due diligence process were denied or ultimately withdrawn, as the lengthy approval process “taxed investors’ patience”—as was the case with Aptera Motors, which worked closely with the DOE for two years.

Paul Wilbur, President and CEO at Aptera, didn’t think they were treated unfairly. He told me, “At the end of the day, we couldn’t get through the process.” But, he admits, he hasn’t read the emails.

Aptera was trying to build a very efficient electric vehicle with an under \$30K price point. Wilbur met with Secretary Chu who could see the value in the technology. But our research shows that value was not the deciding factor in which projects got funded and which ones didn’t. Wilbur reports that he didn’t donate to any candidate. He wanted to keep the whole process clean and do what was “good for America.”

The report from the House Oversight Committee says Aptera first applied for an ATVM loan in December of 2008 and “shut down on December 2, 2011.” The report implies that Aptera was led on: “After numerous negotiations with DOE, in September 2011, Aptera received a conditional loan commitment of \$150 million if the company was able to raise \$80 million privately.” And: “The loans given to Fisker and Tesla gave Aptera hope that DOE would eventually act on their application. More importantly, since the DOE continued to engage with the company throughout the time period, management was convinced that DOE was interested and willing to provide financing for the company.”

Aptera’s 100% US technology has since been sold to a Chinese company.

Aptera was applying for an Advanced Technology Vehicle Manufacturing loan (ATVM). Only five loans were given out through the program and all have political ramifications. Christine Lakatos, who has worked with me on the green-energy, crony-corruption reports I’ve written, has done thorough research on the topic. She has read each and every one of the 350+ pages of emails released on October 31 and has written a blog post specifically addressing the ATVM program and its hijinks. As she cites, Fisker and Tesla (which Romney referenced in the first debate), got loans in 2010 and then the Vehicle Production Group’s loan was the only ATVM loan closed in 2011; all have ties to Obama bundlers. The other two ATVM loans went to Ford and Nissan—both of which, according to the House report, “were heavily engaged in negotiations with the Administration over fuel economy standards for model years 2012-2016 at the time the DOE was considering their applications. Both companies eventually expressed publicly their support for these standards, which the Administration described as the ‘Historic Agreement.’”

Armed with the sweeping knowledge of the House reports and subsequent hearings, evidence from DOE staffers (many of whom were appointed by Obama), Lakatos’ research, and personal experience, a different ATVM applicant has now taken its case to court citing “corruption and negligence.”

On November 16, 2012, XP Technologies filed a lawsuit against the federal government concerning the DOE’s denial of XP Technology’s loan guarantee application. The complaint alleges: “criminal activities did take place by DOE staff and affiliates.” A November 23 press release announces that XP Technologies is now represented by Cause of Action, “a nonprofit, nonpartisan organization that uses investigative, legal, and communication tools to educate the public on how government accountability and transparency protects taxpayer interests and economic activity.”

According to the document filed on November 16, “Plaintiffs’ backgrounds include extensive issued patents on seminal technologies in use world-wide, White House and Congressional commendations and an engineering team of highly experienced auto-makers. Plaintiff brought a vehicle design, which was proposed as the longest range, safest, lowest cost electric vehicle, to be built in America in order to deliver extensive American jobs nationwide. No other applicant, or award ‘winner’, has succeeded in meeting, or (is) intending to meet, that milestone. XP Technology developed a patented lightweight, low-cost, long-range, electric vehicle using air-expanded foam-skinned material for a portion of the polymer body and received numerous patents, acclaim and superior computer modeling metrics over any competing solution. XP presented a vast set of letters of support to DOE from pending customers. Major auto-industry facilities and engineers had joined forces to bring the vehicle to the defense, commercial and consumer market.”

Over the weekend, we had an exclusive interview, on condition of anonymity, with a senior official at XP Technologies about the lawsuit and the experience.

He reported: “Staff from within the DOE have provided evidence which is quite compelling.” As Aptera’s Wilbur made clear, the individuals within the DOE were very thorough. One of the emails, in the 350+ pages, was from Secretary Chu himself in which he criticized staffers for taking a “principled stand,” which held up the approval process of projects the White House wanted advanced. Another indicated that the pressure to rush was coming from “above the agency.” Overall, the emails show that projects were rushed so that announcements could coincide with visits, speeches, and photo ops—as well as providing talking points for the president.

Our XP source told us “We experienced, and have been provided evidence of, applicant submissions and reviews being modified in order to benefit some and disadvantage others, and the business connections between the different parties associated with the ones that benefited is quite extraordinary.” The leaked emails support this accusation, specifically regarding the “business connections.” In her post, Lakatos calls it “green fraternizing.” The emails show that certain applicants and decision makers went bike riding together, had coffee meetings, sleepovers, beer summits, parties, dinners, and fundraisers.

While he didn’t provide us with a name, the XP official said, “We experienced a senior senator blockading our efforts and then providing favors to a competitor, which then benefited his family financially.” The discovery the lawsuit will provide will expose the “senior senator,” but our previous research shows that Senator Harry Reid’s actions seem to fit the XP official’s comment.

XP Technologies believes that “DOE officials changed the first-come-first-served published rules and standards of the funding in order to take applicants in order of who they favored and who had purchased the most influence instead of the order in which they applied, as required.”

Having extensively studied the DOE’s various loan programs, including the ATVM, Lakatos and I agree with our source’s startling conclusion: “Based on the evidence provided by investigators, and experienced directly by our team, it is hard to imagine that at least one or more elected, or appointed, officials might not be seeing measures ranging from censure or even federal prison time.”

Time, the lawsuit, and subsequent investigation will tell.

While the House Oversight Committee has been digging deeply into the mismanagement and corruption of the green energy loans, the media has paid little attention. Other than our report, the October 31 release of the emails cited here received virtually no news reporting. Even the Fox News Channel ignored the story. The plight of promising companies like Aptera and XP Technologies would have gone unnoticed if not for the lawsuit. The legal complaint attracted attention.

On November 16, the Heritage Foundation broke the XP story: “A lawsuit filed in federal court on Wednesday alleges mass favoritism in the Department of Energy’s decisions to award federal grants to major car companies to develop electric vehicles, according to a legal complaint obtained by Scribe.”

On November 19, Lakatos, whose work is listed as “evidence” in the legal complaint, received a call from Fox News’ Gary Gastelu—who reported on the story on November 20. The next day, Fox News covered the lawsuit on America’s Newsroom. Even the Drudge Report picked up on the story.

XP has a litigation website on which the company states: “The case has nothing to do with complaining about not getting the loans. It has everything to do with HOW the applicants didn't get the loans!” They are communicating with other applicants about participating in the lawsuit.

The XP story and subsequent media coverage offers a lesson for others—especially industries who have been wronged by the Obama Administration’s practices (such as energy). The lawsuit may—or may not—send officials to federal prison, as our XP source suggests, but it could go a long way to winning in the court of public opinion.

THE SILICON VALLEY COLLUSION CARTEL

Trillions of dollars of stock trades and direct payola bribes were exchanged using the White House as a broker and agencies like the United States Department of Energy and the U.S. Patent Office, as a stock market manipulation platform. Politicians turned the government into a cheap garage sale of cronyism! -

--- This case affects who runs the United States Government and who profits from government decisions, a matter of many trillions of dollars.

---- THE EVIDENCE ITEMS ARE AT THE BOTTOM OF THIS PAGE.

---- The following folders provide evidence of the corruption in categories. The illicit acts described therein all involve the same perpetrators. The evidence items specific to this folder category are at the bottom of this page: A.) AFGHANISTAN RARE EARTH CORRUPTION; B.) CASE DIAGRAMS; C.) DEPT OF ENERGY CRONY SLUSH FUNDS; D.) FACEBOOK META CORRUPTION; E.) GOOGLE ALPHABET CORRUPTION; F.) MASS MEDIA MANIPULATION; G.) NETFLIX NEGLIGENCE; H.) PATENT THEFT; I.) REPAIRING SILICON VALLEY; J.) SICKO TECH FRATBOYS; K.) SONY PICTURES CORRUPTION; L.) STANFORD UNIVERSITY INVESTIGATIONS; M.) THE CORRUPT SENATORS; N.) THE ELON MUSK REPORTS; O.) THE HOUSING CRISIS; P.) THE LITHIUM BATTERY LIE; Q.) THE MEDIA ASSASSINS; R.) THE POLITICAL BRIBES; S.) THE SAN FRANCISCO CORRUPTION; T.) USING SOCIAL MEDIA SITES TO SPY ON CITIZENS; V.) THE SILICON VALLEY DEATHWATCH

--- The United States Department Of Energy, Since November 2008, has been almost entirely used as a scam crony payola slush-fund to pay off political campaign financiers of White House insiders. In addition, the Dept of Energy is used as a gate-keeper to sabotage and stall the competitors to those political campaign financiers of White House insiders. It is political racketeering operating in plain sight! The cover-ups by the IG, AJ and DOJ are ENDLESS!

---- At a high level: Trillions of dollars of stock trades and direct payola bribes were exchanged using the White House as a broker and government agencies as a stock market manipulation platform. Politicians turned the government into a cheap garage sale of cronyism! This kind of crime illicitly and illegally manipulates the power over who runs the United States Government and who profits from government decisions which are a matter of many trillions of dollars. The act and veracity of this crime enterprise will be proven to the Jury. ---- Based on that assertion it will then be proven that:

----- 1.) Plaintiff exposed and reported the crime to proper authorities through proper channels.

---- 2.) Some of those authorities used government resources to operate reprisal attacks against Plaintiff, using government resources to operate the attacks, as revenge for reporting the crimes.

---- 3.) The state-sponsored attacks were supported by the political campaign financiers of the government authorities in order to protect their payola conduits and stock market manipulations.

---- 4.) Over 40 harms, each to be detailed and examined in Court, were documented against Plaintiff by the actions of corrupt government authorities.

---- 5.) In a vast number of previous lawsuits, including one won by Plaintiff and his peers, it was proven that government offices infected with corruption regularly attack and harm citizens in reprisal. -

--- 6.) The government, having been caught in these illicit actions, must now pay Plaintiff for his losses, damages, harms, back-pay fees and other compensation.

---- Plaintiff founded and owned a United States government-financed electric vehicle manufacturing company. His technology and metrics surpassed every: A.) price metric, B.) safety metric, C.) driving range metric, D.) national security metric, E.) debt Ratio metric, F.) non-bribery assertion metric, G.) 100% domestic worker hiring proof and EVERY other issue, which burdened Tesla and Fisker. Plaintiff worked as an employee and contractor for the USA. Tesla And Fisker were financed by the family and investors of Presidents Obama and Biden, as proven by Congressional investigators and email leaks. Government officials ordered attacks on Plaintiff, de-funding and reprisal because Plaintiff reported corruption at the White House, Department of Energy, and other government offices, and because Plaintiff's technology could obsolete the technologies that government officials were illicitly receiving bribes from via insider trading. The attacks and harms against Plaintiff used government resources paid for by taxpayers.

---- There are hundreds of millions of people in America. The same 120 of them are all involved in operating the same crimes and corruption including: the Sony Pictures corruption; the Afghanistan rare earth mine scandals operated through The Energy Department political slush fund that involves the lithium battery cover-ups (headed by Elon Musk); the Big Tech Brotopia rape, sex trafficking, bribery, exclusionism, racism and misogyny issues they were taught at Stanford University; The Facebook - Meta - Google - Alphabet - Netflix, et al, coordinated news manipulation and domestic spying that they engage in; the hiring of Fusion GPS - Black Cube - Gizmodo/Gawker assassins; the destruction of the housing market by their mass real estate manipulations; patent theft and industrial espionage; and the bribery of almost every politician all the way up to the Oval Office.

---- That's right! Your public officials use federal agencies as dark-money laundering operations for their friends.

---- If you are a taxpayer: You suffered damages! ---- If you are an American business: You suffered damages! -

--- If you are Democracy: You were broken! ---- If you were a tech mobster: You made out like a bandit!

---- This is how it worked. No public official wants these crimes to end because most of those officials profit from these crimes!

--- Forget about any allegiance you might have to one political party over another. This is not about parties, this is about racketeering crimes! The Solyndra taxpayer, technology, financial and political disasters that began during the corrupt reign of Steven Chu and Jennifer Granholm at the Department of Energy typified the overt, organized crime, corruption and crony malfeasance of the public funds.

---- This trend was created via the back-door deals between 1.) the U.S. Department of Energy and audacious kick-back schemes created by 2.) Silicon Valley campaign financiers and the 3.) White House. This is the story of the racketeering schemes and scams that set out to steal trillions of dollars of taxpayer cash, in plain sight, under the cover of a national "economic" or "health" emergency "stimulus" scam.

---- IF YOU SEE CORRUPTION, REPORT CORRUPTION: Post a public web page with all of the details and evidence of the political corruption. Then invite all of the press, public, Inspector General's, FBI, SEC, FTC and law enforcement to that web page. This will prevent cover-ups and stone-walling and protect you from getting ignored! Never assume that the agencies that are supposed to help you, will help you!

- The perpetrators operate a massive and abusive sex cult. The Sandhill Road Venture Capital offices, located between Highway 280 to Santa Cruz Avenue in Menlo Park, California, house the main perpetrators of this global cartel. Their executives at Google, Facebook, Netflix, LinkedIn, Twitter, and their related holdings, comprise the rest. Their sex cult actions have been widely covered in the news individually in the Joe Lonsdale rape case, The Kleiner Perkins Ellen Pao sex abuse lawsuit, The Eric Schmidt sex penthouse stories, The Jeffrey Epstein case, The Google Forrest Hayes hooker murder case, The Andy Rubin sex slave case, The Sergey Brin 3-way sex romp scandal, The British Hydrant investigation, The Elon Musk Steve Jurvetson billionaire sex parties scandals, The NXIVM sexual slave cases, The Michael Goguen anal sex slave trial, and thousands of other cases and federal divorce court filings. This group of people have proven themselves, over and over, to be sociopath control freaks not fit for participation in public commerce, public policy or media control. The Four Seasons Hotel and Rosewood Hotels in Silicon Valley are estimated to engage in over \$30,000.00 of high-end escort sex trafficking per day, a portion of it managed by Eastern Bloc Mafia operators. At least 10 Ukrainian escorts fly in and out of SFO and SJO airports every week for these Cartel members.

- An inordinate number of the members are closeted homosexuals who seek to use their media monopolies and massive lobbyist ownership's to promote child sex and child sex change consideration. Hence the massive, sudden, promotion of those issues in all of their media since they took power in 2008. The press has widely reported on underage boy sex clubs and the payment to parents for the blood of young boys by these oligarchs. A large number of tech VC's and senior executives are covert gay activists who hire women to act as their "beards". Their elitist Yale and Stanford fraternity house upbringings promoted "bromances", "rape culture" and a don't-worry-daddy-will-fix-it mentality.

- The AngelGate Conspiracy (<https://venturecapitalcorruption.weebly.com/the-angelgate-conspiracy.html>); The Job Collusion Case (https://en.wikipedia.org/wiki/High-Tech_Employee_Antitrust_Litigation) and hundreds of other cases, prove that the perpetrators regularly meet, conspire, collude and racketeer, in full view of law enforcement, without ever getting arrested by the FBI because they bribe public officials in order to avoid prosecution. The perpetrators operate in extreme violation of federal RICO laws yet no DOJ or SEC RICO case has been filed against them by federal officials.

- The perpetrators have used their exclusive monopolized cash flow of taxpayer financed grants, contracts and internet infrastructure to purchase the majority of the political lobby firms and technology law firms in America. This gives them an illegal, illicit and unfair ability to control: 1.) which laws are made or stalled, 2.) who gets government funded or blocked, 3.) Who gets tax breaks, tax credits and tax waivers and who does not, 4.) Who gets state-sponsored reprisal targeting or benefits blockades, 5.) Who gets revolving door payola jobs at their companies, 6.) Who gets PAC money bribes, 7.) and many other effects that are legally defined as "racketeering".

- The perpetrators conspire, coordinate and manually manipulate their digital media mass broadcasts in order to collude in a manner that injects coordinated subliminal messages, that no regular voting citizen can detect, into their

media in order to manipulate co-aligned political and ideological messages that will promote their ideological beliefs and promote public and policy actions which will provide profits to their stock market holdings which they co-own. Many of those stock market holders, (ie: in Tesla, Google, Abound, Solyndra, rare earth metals, Disney, etc) were coordinated between all of the perpetrators by their partners at JP Morgan, Bear Stearns, Goldman Sachs in such a manner as to collude to rig markets via insider trading ownership's that U.S. Senators, and their families, shared.

- The perpetrators have used their subliminal media control technologies to manipulate every national election since 2008.

- The perpetrators use a contrived Scientology-like hiring and HR management system which seeks out the most vulnerable, naive, easily influenced, and damaged people to fill their employee coffers with, in order to do their bidding. Their employees are nothing less than tools, sheep and fodder for their media manipulations, sexual abuses and ego-mania.

- These people are absolutely evil, sick and sociopath-like individuals who operate with impunity because they are never arrested. They thumb their noses at the law and anyone who does not agree with them. They create fake political issues to milk the emotions of the public in order to gain power.

The documents in these files were provided by the witnesses, investigators and crowd-sourced peer-to-peer public law enforcement investigators who uncovered materials that were relevant.

This case documents and reveals the evidence that a Cartel comprised of public officials, many of them elected and located at the highest levels of government, and their Silicon Valley financiers, engaged in crimes against the public (essentially creating a coup against the U.S. Government) in order to steal taxpayer money and resources.

In a key part of the crime, the Obama Administration used the U.S. Department of Energy, under Secretary of Energy Steven Chu, who was protected by USAG Eric Holder, to payoff campaign financiers via crony kickbacks and stock market “pumps”. The same agency staff sabotaged those campaign financier’s competitors by defrauding them of tens of millions of dollars by telling them to invest their funds in order to get loans and grants that DOE executives never intended to issue. Government staff also engaged in stone-walling, character assassination and other “dirty tricks” schemes against applicants and competitors. This portion of the corruption crime was implemented and planned from 2007 through 2016. This was a felony abuse of taxpayer monies. Russian billionaires, Goldman Sachs, and other investment banks, and U.S. Senators illicitly profited off of this scheme.

Law enforcement and Congressional evidence now prove the fact that only those who payed campaign finance bribes received the funding from State and Federal agencies and they received it in amounts equal to the size of the bribes they paid. Every single other applicant (hundreds of them) who did not pay campaign bribes, and who did not give stock market warrants to Senators, was stone-walled, de-funded, sabotaged and lost tens of millions of dollars by being defrauded by Energy Department officials who covertly knew that the funding had been hard-wired for their friends, in advance.

The criminal participants sought to manipulate elections and public opinion in order to place their insiders in government offices. They did this in order to steer government treasury cash, contracts, intelligence resources, government benefits and stock market advantages to their private profiteering accounts, at the expense of the public. Historical records and evidence has proven that they, indeed, did engage in these criminal activities.

They abused the operation of the DOJ, FBI, DOE, CIA, SEC, FCC, FTC, DOT and other agencies, in order to operate their scheme.

Via their leaked communications, non-compromised officials, news coverage and public testimony, their crimes and illicit actions are hereby exposed in order to curtail their corruptions.

These Senators, lobbyists, Silicon Valley billionaire oligarchs and investment-bankers used “party ideology” to seek to whip up a zealot-like frenzy to try to get voters to overlook their sins. In the end, the public has finally begun to realize that the issue is not about party politics. It is simply about organized crime and the abuse of public office for out-right theft and stock market fraud by these politicians.

150 criminally corrupt politicians and their Silicon Valley financiers abused hundreds of millions of American voters and the public policy system in order to line their private bank accounts and fulfill their personal needs for power. They operated Congress like an organized crime syndicate. They did this in violation of the law and in violation of public ethics.

These assertions are proven, via hard facts and evidence, in the files contained in this repository. Additional confirming evidence from law enforcement, Congressional and insider sources is also available upon request.

Why does any of this matter?

Because many of us were lied to by our elected officials who then took our life savings and decades of work and put our money in their own pockets. Because many of us were in the offices of Nancy Pelosi, Debbie Wasserman and Dianne Feinstein and personally saw them engage in crimes to pad their own bank accounts at the expense of their co-workers and the public. Because many of us knew Seth Rich, Gary D. Conley, Rajeev Motwani and the 45+ other people who had intimate knowledge of these crimes and then suddenly and mysteriously turned up dead. Because many of us saw these crimes committed, first-hand, and know these assertions to be fact. Because the rest of us are American voters and citizens who will never tolerate this kind of corruption and will never allow it to disappear from public memory or the history books! Because the arms of the law and public justice are ever lengthening and will eventually bring every criminal involved to justice!

Context Menu Detailing The Relevance Of The Folders In This Set Of Files

AAA - FORWARD - PREAMBLE - READ FIRST = The top level summation.

AAA - THE SILICON VALLEY FELONY RICO CRIMES = The secondary level overview documents.

FOLDER - ATTACKED BY OBAMA AND HIS DNC MOBSTERS = Evidence relative to attacks and “hit jobs” on the public, reporters, whistle-blowers and competitors ordered and/or operated by the Clinton and Obama administrations as retribution, vendetta, revenge tactics.

FOLDER - CRIMINAL POLITICAL SLUSH FUNDS AT DEPT OF ENERGY AND CALIF AGENCIES = Evidence detailing the core crime effort wherein public officials, and their Silicon Valley political financiers, ran crony payola scams to acquire unjust gain at the expense of the public.

FOLDER - FAKE NEWS PROPAGANDA SITES, MEDIA ASSASSINS AND ELECTION RIGGING = Evidence detailing the manipulation of public news, social media public information and election results wherein the suspects sought to control political budgets, government expenditures and ideologies to the benefit of their personal profits and power-hungry narcissisms.

FOLDER - GAWKER AND GIZMODO MEDIA WORK AS HIRED ASSASSINS FOR THE DNC AND OBAMA = Evidence relative to attacks on the public, reporters, whistle-blowers and competitors ordered and/or operated by the Clinton and Obama administrations as retribution, vendetta, revenge tactics as deployed in a very specific set of example instances via the Gawker/Denton/Omidyar Cartel.

FOLDER - HOW YOU CAN FIGHT CORRUPTION = List and examples of proven counter-measures, in use by public-interest groups, to fight this kind of corruption.

FOLDER - INSTRUCTIONS FOR USERS = Instructions for public and agency members contributing to these evidence sets.

FOLDER - LIST OF OFFICIAL BIASES OF MEDIA ENTITIES = Evidence showing which reporters or media outlets will bias or hide this evidence in order to protect their corrupt owners and investors who may have had a hand in benefiting from this corruption. This will indicate who you can trust to help you and who will try to blockade, stone-wall or “media hit job” you.

FOLDER - NEWS VIDEOS PROVING THE CHARGES AND FACTS = News video evidence confirming the charges.

FOLDER - NEW TOPICS = What are the results of the exposure, interdictions and awareness of this corruption? What new technologies, concepts, methods, social trends and efforts have been caused as secondary effects of this case?

FOLDER - POLITICAL HONEY-TRAPS AND FAKE DATES = Evidence showing the abuse of human interaction services to exploit political agendas. No human can resist the need for a date, flirting or sexual potential and political operatives used this fact for spying, database culling of voters and other mass digital public exploitation via “dating services”. How political operatives take advantage of basic human needs and exploit them for election rigging.

FOLDER - SILICON VALLEY CORRUPTION AND ABUSE OF THE PUBLIC = The financiers, technical operators and beneficiaries of these crimes were Silicon Valley oligarchs. What kind of people are they? Why do they all have a similar sociological, fraternity house, sociopath-like profile? What is the social echo-chamber that clones them into these kinds of people? Why are almost every one of them eventually caught in an abuse scandal?

FOLDER - THE ELON MUSK TESLA CORRUPTION CASES = Elon Musk was one of the largest financier, crony corruption beneficiaries of these crimes? Why did he spend hundreds of millions of dollars on self-promotion seeking to make himself an “icon”? How do only a handful of web “trolls” use “bots” and mass social media to hype his image? Which media cover-up his crimes? What are the specific illicit deeds he is charged with in this case?

FOLDER - THE GOOGLE INVESTIGATION = The evidence proving that Google engaged in a digital and White House staff coup in order to control public laws, policy, contracts, state and federal budgets and ideology. The abuse of CIA resources by Google, In-Q-Tel, Crowd Strike, New America Foundation and other rogue spy operations has led to the largest mass public abuse in history. These reports prove those assertions.

FOLDER - THE NEW INTERNET = Because it was Silicon Valley Oligarchs that manifested these crimes, the world has sought to work-around and/or identify their illicit abuses of the individual. These are the latest results of that blow-back.

FOLDER - THE SILICON SEX CULT = Silicon Valley oligarchs and certain major politicians have a “Harvey Weinstein/Anthony Weiner”-like affliction that causes them to have an uncontrollable devotion to deviant sex and the use of sex as a self-affirming abuse tool. They have been caught up in under-age sex scandals and clubs, or networks, devoted to sexual conquest, in a massively escalating series of horrific sex abuses. What is it about their social group that causes the interaction of Hollywood and Silicon Valley “elites” to adopt moral degradations and support politicians who are also drawn to such deviancies?

The Office of the Special Council

The National Archives

This crime has been widely covered in the main stream news, in major TV documentaries (ie: 60 Minutes: THE CLEANTECH CRASH) and hundreds of books, so it is not possible for any law enforcement entity to state that they do now know about it. Each entity has been informed that each other entity has been notified since 2007. These notices have been copied to the press and P2P groups in order to reduce cover-ups and denials and provide historical transparency.

How Elon Musk, Larry Page and Mark Zuckerberg Use Scam Nonprofits to Hide Dark Money

ALL OF THESE CORRUPTION CRIMES ARE ABOUT CRONY KICK-BACK PROFIT PAYOLA

It is of the utmost importance that researchers, investigators and observers understand that these matters have nothing to do with issues of politics or ideologies.

Politics or ideologies were used, by the criminals involved, as mass marketing manipulation tools in a secondary manner in order to manipulate voter trending pressures and increase the crooks government cash windfalls.

The core goal of these corruption crimes was to conduit trillions of government treasury dollars and stock market valuation manipulation profits into the pockets of certain politicians and their crony financiers.

In the ensuing exposure and cover-up, now underway, the criminal elements constantly seek to steer circumspection away from themselves by drawing on emotional political ideology triggers, ie: “..don’t believe that we politicians did any crimes, we are part of your political party. It must be the bad OTHER political party making up stories because they are jealous..”

In fact, for a free scoop into the pig trough full of trillions of taxpayer dollars these criminals have proven that they will lie, murder, extort and operate more like a crime syndicate than a pool of elected representatives. This is not about politics, this is about crime.

Politicians are increasingly using nonprofits capable of accepting unlimited dark money funds to advance their agendas and oligarchs use those non-profits to bribe those politicians.

- Chisun Lee reports:

Since Watergate, it’s been illegal for anyone to secretly donate millions to a federal candidate’s election campaign. Congress decided at the time that capping contributions was a price worth paying to deter corruption. For the same reason, campaign finance law requires candidates to publicly disclose donations above a certain amount. Sunlight, as the Supreme Court likes to say, is the best disinfectant.

But such rules — designed to prevent would-be officeholders from being “bought” by wealthy donors — don’t apply to a burgeoning new mode of self-promotion that politicians are embracing once they actually take office.

Like so-called “buddy PACs” – unlimited spending groups that support a single candidate during campaign season – the new must-have accessory for successful politicians is the officeholder-controlled nonprofit. These entities, launched after the campaigning is over, can raise unlimited amounts in secret donations to spend on promoting officeholders and their agendas. And they are gaining popularity among elected officials at every level of government.

The time has come to enact common-sense regulations to stop these nonprofits from corrupting our politics.

Among the most prominent examples: America First Policies, a 501(c)(4) social welfare nonprofit that President Trump’s top advisors founded a week after his inauguration. Earlier this year, CNBC reported the group has conducted polling worth as much as seven figures — work that typically fuels political ad campaigns. Among other promotions of Trump administration positions, the nonprofit produced a TV ad last fall that featured flattering footage of the president and called on viewers to “stand with President Trump to cut taxes, now.” The donors to America First Policies remain secret.

In a recent report, we at the Brennan Center for Justice found that at least two presidents, seven governors, and several prominent mayors – from both major parties – have established nonprofits that allow them to raise unlimited, anonymous funds for political spending after election day.

Since 2010, these elected officials — including Republicans like embattled Missouri Governor Eric Greitens and progressives like campaign finance warrior Bernie Sanders — have altogether raised as much as \$150 million for nonprofits that they are able to control and use to promote their respective agendas.

Allowing elected officials to take unlimited cash from usually secret donors through these nonprofits opens the door to conflicted loyalties and corruption. Occasional exposés reveal some of these donors have specific business interests before the elected officials whose nonprofits they support – and likely see their donation as a means to win government decisions that will benefit them.

In New York State, for example, gambling companies donated \$2 million to a nonprofit affiliated with Governor Andrew Cuomo just before he declared his support for increasing gambling in his 2012 State of the State address. And in Los Angeles, a pipe manufacturing executive made it clear that his million-dollar pledge to the mayor’s nonprofit was meant to gain influence in a city that forbids campaign contributions by companies seeking government business. He told the Los Angeles Times, “We want to influence the government leaders to make the right decisions so that we can be more competitive.”

Some of these nonprofits have taken steps at self-regulation. President Obama’s Organizing for Action wrote the playbook on turning these types of nonprofits into publicity juggernauts. In the spirit of being “open and transparent,” OFA decided early on to voluntarily disclose its donors. But hoping that officeholder-controlled nonprofits will voluntarily disclose funders is hardly a plan to ensure ethical governance.

Americans deserve to have confidence that decisions about who builds bridges or treats drinking water are based on the most qualified, competitive bid – not who gives the most to an elected official’s nonprofit. For this reason, we recommend a straightforward set of laws to bring transparency to these nonprofits and limit the influence of those with specific business interests before government, and we’re urging legislators across the country to adopt it.

First, we should identify those nonprofits that pose a major risk of corruption – determining whether an elected official or close associates control the group and, if so, whether the group spends substantial amounts on promoting the official. Then, for the small set of entities this test would identify, we propose two key safeguards that are well-established components of anti-corruption law. One is public disclosure of who is giving money, and how much, to

an officeholder-controlled nonprofit. The second is contribution limits for donors who have concrete business interests that the politician has the power to affect.

Some jurisdictions have already started following this model. In New York City, similar legislation kicked in this year following a federal investigation into Mayor Bill de Blasio's nonprofit and allegations of ethical transgressions. And in early 2017, the Missouri legislature considered a measure to require certain nonprofit groups to report donations, though the effort fell short.

To be sure, nonprofits associated with elected officials may do work that serves the public. They may use the officeholder's high profile to attract private funding for education, economic development, antipoverty work, and more. The beauty of a legal solution that focuses on control by the elected official and spending to promote that official is that these public benefits can go on, uninterrupted.

But with officeholders' increasing reliance on private donors even outside of campaign season, requiring transparency and limiting donations by those seeking government business are crucial starting points for protecting government integrity. To ignore this growing problem of money in our politics, where a handful of ultrarich donors already wield grossly outsized influence, would ignore an unacceptable threat to representative democracy.

A few politicians go after political 'dark money' with anti-corruption measure but it is just an act to protect Big Tech!

HR1 is designed to combat the secret political funding illustrated in the John Doe Files, leaked to the Guardian in 2016

Ed Pilkington in New York and Sabrina Siddiqui in Washington

The influence of "dark money" in American politics that allows billionaires to fund political campaigns through third-party groups without disclosing their involvement was put under the spotlight at a congressional hearing on Thursday, as Democrats use their newfound majority to crank up a sweeping new anti-corruption measure.

In the first hearing on the bill, known as HR1, the House administration committee examined how undisclosed donations from some of the country's richest individuals is distorting they way politicians are elected.

"The mechanics of our democracy - access to voting, running for office, holding government accountable - have undergone radical changes in recent years," Congresswoman Zoe Lofgren, the committee's chairwoman, said while commencing the hearing.

She added: "These changes have tended to restrict the rights of eligible voters. It has made the voices of the wealthy and powerful so loud that they can drown out the voices of ordinary people."

The committee heard from a range of election experts, as well as from civil rights activists, who illuminated the impact of such "dark money" on the lives of ordinary people.

A key example of the corrosive influence of secret political funding presented before the committee was the John Doe Files, the vast tranche of documents leaked to the Guardian in 2016 and posted in their entirety on the Guardian website. The 1,500 pages of material exposed how big corporations and some of the wealthiest rightwing donors in the US used their fortunes to prop up prominent politicians, in some cases going on to extract political favors in return.

Peter Earle, one of the panelists, was poised to appear before the committee later in the hearing to detail the revelations of the John Doe Files. A civil rights trial lawyer in Milwaukee, Earle has been suing the historic

manufacturers of lead paint in a long-standing case designed to secure compensation for poisoned children as well as to generate funds needed to remove still existing toxic paint from hundreds of thousands of homes across the US.

“It is indeed a sad day for our democracy when a rich and powerful corporate CEO can deprive innocent victims of lead poisoning their day in court just because he could afford to secretly donate huge amounts of money to greedy and ruthless politicians,” Earle will say, according to a copy of his written testimony.

“The only reason that this story is publicly known is because years after the secret six-figure donation and subsequent sweetheart legislation, a trove of previously secret documents was leaked to the Guardian newspaper by a valiant whistleblower.”

The Guardian’s documents revealed that the late owner of one of the largest historic makers of lead paint, NL Industries, had donated \$750,000 to a third-party group in Wisconsin that was heavily involved in helping the state’s then governor Scott Walker fight a recall election. As the money was passed through a group, the identity of the donor, NL Industries’ owner Harold Simmons, remained secret until the Guardian exposed it.

That meant that nobody was able to join the dots when, soon after Walker won the election, the Republican-controlled legislature in Wisconsin changed state law. Under the rule change, it became much more difficult for victims of lead paint poisoning, most of them children, to sue NL Industries and other former lead paint manufacturers for the damage inflicted on them.

Concern about the pervasive influence of undisclosed political donations by corporations and the super-rich has become a red hot issue, particularly among the new intake of young Democratic Congress members swept in by November’s mid-term elections. The “corruption game” played by Alexandria Ocasio-Cortez before the House Oversight committee in which she denounced campaign finance controls – or the lack of them – this week became the most viewed video of a politician’s speech ever posted on Twitter.

In it she said: “We have a system that is fundamentally broken.”

The Democratic party has chosen to mark its renewed dominance in the House of Representatives following the November elections by putting reform of America’s stricken democracy at the top of its agenda. HR1, known as the For The People Act, includes strong provisions designed to combat corruption by forcing all organizations involved in political activity, including so-called “social welfare” groups, to disclose large donors.

The bill is likely to be put to a House vote next month and is assured of passage through overwhelming Democratic support. It is almost certain to flounder, however, in the Republican-controlled Senate, given the virulent opposition from the party.

Mary Bottari, a researcher with the watchdog on money and politics, the Center for Media and Democracy, said Wisconsin should be seen as a cautionary tale for the nation. “Billionaires give huge amounts to aid politicians but because they gave it to a third-party group the public would never know.”

Many senior figures in the current Republican party and Trump administration appear in the John Doe Files. Trump himself has a walk-on part: the leaked documents disclosed that he made a donation of \$15,000 following a personal visit from Scott Walker to Trump Tower in New York.

Another who makes an appearance in the documents is Nick Ayers, who has just stepped down as chief of staff to the vice president, Mike Pence. He has reportedly left the White House for a senior role in a super Pac that will be channeling money from big donors to Trump’s 2020 re-election campaign.

Also prominent at Thursday’s hearing was the issue of voting rights and efforts to restrict access to the polls that are predominantly aimed at people of color and students.

“The promise of this country is that every person has a voice and every person out to be counted,” Chiraag Bains, the director of legal strategies at the public policy organization Demos, told the panel. “Our history has been one of struggle to make that promise a reality.”

WHO IS THE PALO ALTO MAFIA? - #PaloAltoMafia

- A demand for FBI arrests of these parties

The Palo Alto Mafia is an ad hoc organized crime group that violates RICO racketeering laws by engaging in dark money political corruption.

These mobsters use covert dark money schemes to direct elected officials to take public tax money and put that money in their pockets and the pockets of their campaign financier associates while using government resources to sabotage competitors. They pay the bribes to the political officials with stock market warrants, prostitutes, credit cards, real estate, mortgages, loans, revolving door jobs, contracts and other dark money.

Counter-measures against these criminals are aimed at making sure they are exposed, doxed, shamed and arrested! Private/public databases have been created to track and destroy all of their stock market holdings, Silicon Valley monopolies, off-shore spider holes, covert payola trusts, hidden shell corporations, sex trafficking clubs, emails, credit cards, stock accounts, covert real estate holdings, tax write-off profit fronts and other illicit assets.

They accrued money and power by creating mass hyper-scaled monopolies, mostly in new digital markets, by exploiting exclusive government financed exploitation provided by laws, grants and contracts that the politicians, that they owned, produced exclusively for them while locking out their competitors.

Although often exposed in such cases as the "AngelGate Collusion Case", "The Silicon Valley No Poaching Class Action Lawsuit" and hundreds of other cases, their ownership of the senior executives at FBI, SEC, FTC, FEC, OSC, DOJ and other enforcement agencies has, so far, prevented their formal interdiction.

While using billions of dollars of PR agencies to promote a "crunchy-granola", we-are-saving-the-world, "goodie-two-shoes" image for each of themselves, behind the scenes they conspire, collude, sex traffic, bribe, spy, black-list, payola, media bias control, censor, abuse and use Democracy as their play-thing for their sociopath addictions to power and money.

They bankrupted old-school print media and replaced it with digital media which they control to promote only their profiteering ideology. They control almost all search engines and media servers to rig them to censor public information and mass manipulate social perspectives using the automated tactics exposed in documentaries like: "The Creepy Line" and 60 Minutes segments about "Information brokers".

They pay their bribes to their politicians and operatives using dark money relayed by corrupt law firms, lobbyists, media services and character assassination services like IN-Q-Tel; Gawker Media; Jalopnik; Gizmodo Media; K2 Intelligence WikiStrat; Podesta Group; Fusion GPS; Google; YouTube; Alphabet; Facebook; Twitter; Think Progress; Media Matters; Definers; Black Cube; Roger Stone, Mossad; Correct The Record; Sand Line; Blackwater; Stratfor ; ShareBlue; Wikileaks; Cambridge Analytica; Sid Blumenthal; David Brock; Covington and Burling, Perkins Coie, Wilson Sonsini and hundreds of others...

There are over 150 sudden, unexpected, suspicious deaths associated with person's who were at odds with this organized crime group ranging from "suicides", strange accidents and clear murders.

The tremendous number of sex scandals this group has been involved in are related to their need to control others, a key character trait of the sociopath psychological profile demonstrated by the majority of them.

They instruct the HR staff of the companies they own to only hire naive young employees that will appear to follow their echo-chamber-optimized, highly controlled corporate ideology culture. Any who fall out of proper "group-think" are fired until they have culled a perfect clone army of indoctrinated followers to push their political and profiteering control goals.

A large number of them are homosexual, subscribe to the Jewish cultural social training and are deeply influenced by collegiate fraternity and sorority teachings about social roles and elitism.

They are known by a number of names including:

"The PayPal Mafia"

"The Silicon Valley Oligarchs"

"The Deep State"

"The Billionaire Frat Boy Club"

"The Bohemian Club"

"The KPCB Cosa Nostra"

"The Guardsmen Club"

"The Greylock Greys"

and other AKA's

This mob has so much cash from unjust gains, and hires so many out-of-control lobbyists and defamation services, that they have totally broken the Democratic process. Some of the controlling members, or mob bosses, that pay for and benefit from these corruption activities include:

Amy Pascal; (Sony Pictures Obama funding liaison, traded CIA secrets for Zero Dark Thirty script)

Arnold Schwarzenegger; (CA governor, actor, arranged Russian mob financing and Russian mining deals)

Barack Obama; (Acted as front man for Silicon Valley payola deals through White House)

Bill Daley; (Obama's Chicago mobster staff boss, ran payola ops in White House for Obama)

Bill Lockyer; (California finance boss with a sex scandal that gave taxpayer cash to crooked Solyndra and Tesla)

Brian Goncher; (Deloitte finance Cleantech scammer head, put together Obama Cleantech payola deals)

Daniel Cohen; (Dept of Energy Lawyer who helped fudge the DOE Slush-Fund into place with Steven Chu)

David Axelrod; (Obama White House media hit-man)

David Drummond; (Top Google lawyer who had a few sex scandals at his Quail Road Home in Woodside, CA while running political bribes for Google)

David Plouffe; (Obama White House boss who arranged Silicon Valley payola and revolving door deals)

David E. Shaw; (Known as the Snake Of Silence)

Dianne Feinstein; (Covert owner of Tesla, Solyndra and other conflict-of-interests. called "The Most Corrupt Senator In U.S. History", deeply involved with Chinese spies and financiers)

Elon Musk; (Tech mobster bromance buddy of Larry Page at Google and Tim (crazy eyebrows) Draper, sex party partner with Steve Jurvetson and largest government Mooch in American history)

Eric Holder; (Obama's AG who ran all of the DOJ and FBI cover-ups of corruption for Obama)

Eric Schmidt; (Google boss with an "open marriage", a sex penthouse and a CIA office who loves to mess with governments around the world)

John Zaccarro, Jr.; (At top of GOP watch-list)

Frank Giustra; (Mining scheme financier of Hillary Clinton who suggested Russian deals)

Nick Denton; (Gay sex and media abuser who did nasty tabloids in Britain and USA as hired character assassination pro, ran media attacks as client for Podesta, Obama, DNC, Google and Elon Musk)

Harry Reid; (Dirty Senator who made crooked deals with Musk and Google, got punched in the eye for being a crook)

Haim Saban; (Overseas cash conduit to DNC)

Hillary and Bill Clinton; (Sex, dead bodies, Haitian prostitutes...can the world ever forget The Clinton's?)

Ira Ehrenpreis; (Silicon Valley frat boy bundler and DNC VC insider)

Andy Bechtolsheim; (Silicon Valley frat boy bundler and DNC VC insider)

Jay Carney; (Too many conflicts-of-interest to count, White House press boss, loved Russian tactics)

James Comey; (FBI Director who held off investigations on Obama's crimes)

Jared Cohen; (Google's Israeli agent in-house, playboy/spy/DNC operative; promoted coup attempts)

Jeffrey Katzenberg; (Hollywood Wensteiny DNC financier and pusher of politics into Hollywood films)

John Doerr; (Obama's Kleiner Perkins and Russian Connection VC sued for sex abuse and manipulation)

Harvey Weinstein; (Notorious Obama and Clinton financier and sexual predator)

Yasmin Green; (Google's director of Middle East Incursions, Jared Cohen's favorite hottie, extensive mouth-to-face ratio)

Jonathan Silver; (The Dept of Energy's VC who made sure that only Obama's campaign financiers got funded)

Ken Brody; (Insider for DNC operations)

Lachlan Seward; (The Dept of Energy's payola manager who made sure that only Obama's campaign financiers got funded)

Laurene Powell Jobs; (Steve Job's old squeeze or "beard wife" depending on who you ask, inherited his billions and now funds the DNC)

Judge Stewart M. Bernstein; (NY Southern District Judge who is a Hillary Clinton sponsor protecting DNC corruption)

Larry Page; (Elon Musk's boy buddy at Google. Pages steals technology for Google and spends his billions rigging politics and buying insane frat boy toys and people)

Google, Alphabet, YouTube; (The commercial version of the rogue portions of the CIA)

Facebook; (The commercial version of the German Stazi)

In-Q-Tel; (The actual CIA..but without any of that annoying Congressional oversight. They are a 501 (c) charity yet they had 5 tons of cocaine on their airplanes. They now work for Elon Musk, Google and Facebook)

Amazon; (The Socialist version of the CIA)

Twitter; (A DNC spy and media manipulation tool to do spy stuff in 140 characters, or less)

PayPal; (A DNC run bank that cut's off anti-DNC people)

WordPress.Org; (A DNC operated ISP that cut's off anti-DNC people in violation of freedom-of-speech)

The Law Firm of Perkins Coi; (The Masters of Moving Money Mysteriously)

Mark Zuckerberg; (Goofy Facebook boss that does what Sandburg and Debbie Wasserman tells him to do and wants to be President of the World)

Martin LaGod; (Silicon Valley VC deep into lithium mining corruption)

Matt Rogers; (Silicon Valley McKinsey insider placed into Dept of Energy to run things for Silicon Valley VC's)

Marc Benioff; (DNC financier and party boy)

Michael Birch; (The man with the Magic Box)

Steve Kirsch; (Windfall billionaire with Infoseek sale, funds lithium ion battery mining deals)

Steven Spielberg; (Hollywood extremist DNC financier)

S. Donald Sussman; (A true man who "gets around the circuit")

Pierre Omidyar; (Gawker/Gizmodo hit-job financier, EBAY owner, partners with "Russian Businessmen")

Rahm Emanuel; (The "Godfather" of corruption in the Obama White House and Chicago City Hall. Taught Obama how to Obaminate corruption)

Raj Gupta; (Arrested insider trading expert from crooked McKinsey who taught Silicon Valley how to scheme)

Ray Lane; (Charged with tax evasion on a massive scale, he and Kleiner Perkin's folks brought crime to the Valley)

Tom Perkins; (The VC with the biggest bribes - One of the first Godfathers of the tech mob)

Robert Rubin; (The insider that knows where the girls are)

Rob Friedman; (The insider that works all of the angles and shell corporation options)

Reid Hoffman; (Weight and morality challenged owner of Linked-In who finances dirty DNC deals and dating sites)

Richard Blum; (Dianne Feinstein's husband/boss, ran dirty Chinese deals and owns part of Solyndra and Tesla assets. His "interesting" trips to Mongolia and China still have the FBI scratching their heads)

Robert Gibbs; (Obama's crooked press office boss who quit the day after a certain package showed up on his desk)

Robert Shwartz; (The cash behind the blast)

Roger Altman; (The man who has his fingers in everything)

The Law Firm of Covington and Burling; (Deeply homosexual DNC insider law firm that brought you Obama, Eric Holder and the Immigration crisis)

Sanford Robertson; (The "inventor" of some of the greatest stock market politician perks ever deployed)

Steve Jurvetson; (Elon Musk's sex party buddy and VC who got fired for sex stuff and who has one of the worst reputations around the Valley)

Steve Rattner; (Obama's "Car Czar" who put together the crooked deals with Detroit to exchange fed cash for votes, indicted in NY for securities fraud. Google associate, New America/In-Q-Tel guy)

Steve Westly; (Obama's dirtiest Silicon Valley Political Crony Payola Bundler)

Steven Chu; (Officially known as "The Most Corrupt Secretary Of Energy In American History" who also created the totally screwed up "Iran Nuclear Deal" and the corrupt "Uranium One" deal)

Steve Spinner; (He and his wife structured the stinkiest parts of the Obama Solyndra payola scam)

Susie Tompkins Buell; (DNC financier socialite PR hype-ster for Norcal rich people)

Tracey Turner; ("The FBI cannot comment about an ongoing investigation...")

George Soros; (The world's most overt DNC radical billionaire, the cash behind Netflix and Tesla)

Warren Buffet; (The world's most covert DNC radical billionaire)

Tom Steyer; (The "Master of Cleantech Disaster", 3rd largest financier of Anti-Trump actions, oil guy)

Margie Sullivan; (Tom Steyer's partner and Hillary Clinton's special friend who helped USAID push mining deals to get Afghanistan invaded for Elon Musk and Frank Guistra mining scams)

Tim Draper; (Bromance buddy of Elon Musk with extremist eyebrows and hatred of Californians)

Valarie Jarrett; (Obama's White House overseer of the Obama corruptions office efforts who sought to help Iran)

Vinod Khosla; (The villain of the CBS 60 Minutes episode: The Cleantech Crash, Obama & Clinton financier kick-back artist and "beach stealer")

Michelle Lee; (Google's lawyer who was placed as head of U.S. Patent Office for the purpose of protecting Google and the Silicon Valley Cartel in their IP theft onslaughts)

The law firm of Wilson Sonsini Goodrich and Rosatti; (Known as the most "corrupt law firm in Silicon Valley")

Lawrence "Larry" Summers (Harvard President who aided Zuckerberg's light-speed rise to prominence with unprecedented Harvard Crimson coverage; Obama bailout chief; Clinton Treasury Secretary; World Bank Chief Economist; "Special Advisor" to Marc Andreessen in Instagram; co-creator of the current Russian robber baron economy; close 20-year relationships with protégés Sheryl Sandberg & Yuri Milner; aided in recommendations that created the Russian robber baron economy—and Yuri Milner/DST/Asmanov's money used to purchase Facebook stock)

James W. Breyer; (Accel Partners LLP; Facebook director; client of Fenwick & West LLP since the 1990's; apparently received technology from other Fenwick clients that was shuffled to Zuckerberg, incl. Leader Technologies' inventions. Formed CIA IN-Q-TEL spy and IP theft organization)

David Plouffe; directed Obama's 2008 and 2012 campaigns; a self-described "statistics nerd;" likely directed the activities of the Facebook Club; employed Robert F. Bauer, Perkins Coii LLP in 2000 at the Democratic Congressional Campaign Committee. Facebook and Uber manipulation expert)

Mike Sheehy (Cooley-McBee Strategic principal; former National Security Adviser to House Speaker Nancy Pelosi)

Nancy Pelosi (U.S. Congresswoman; appears to be running political cover in the House for Facebook, McBee Strategic, Cooley Godward, Fenwick & West, Breyers, etc.)

Gilman Louie - (Silicon Valley spy and game-maker who formed In-Q-Tel to steal technologies and political agenda's)

Harry Reid (U.S. Senator; Judge Evan J. Wallach patron, one of the most crooked U.S. Senators with millions in bribes)

Thomas J. Kim (SEC, Chief Counsel & Assoc. Director) approved Facebook's 500-shareholder exemption on Oct. 14, 2007, one day after it was submitted by Fenwick & West LLP; Facebook used this exemption to sell \$3 billion insider stock to the Russians Alisher Asmanov, Yuri Milner, DST, Digital Sky, Mail.ru which pumped Facebook's pre-IPO valuation to \$100 billion; another Harvard grad, Kim worked at Latham & Watkins LLP which was the chief lobbyist for the National Venture Capital Association in 2002-2004 whose Chairman was James W. Beyer, Accel Partners LLP; in other words Breyer and Kim, both Harvard grads, were associated at the time of the Zuckerberg hacking and theft of Leader Technologies' software code)

Ping Li (Accel Partners, Zuckerberg handler)

Jim Swartz (Accel Partners; Zuckerberg handler)

Sheryl K. Sandberg (Facebook, Summers Dominatrix-like protégé; Facebook director - Husband possibly murdered by Russian as an example to tell Zuckerberg to tow-the-line)

Yuri Milner (DST aka Digital Sky, Summers protégé; former Bank Menatep executive; Facebook director)

Alisher Asmanov (DST aka Digital Sky; Goldman Sachs Moscow partner; Russian oligarch; Friend of the Kremlin; Became the Richest Man in Russia after the Facebook IPO)

Marc L. Andreessen (Zuckerberg coach; client of Fenwick & West LLP and Christopher P. King aka Christopher-Charles King aka Christopher King aka Christopher-Charles P. King; Summers' sponsor during Instagram-scam; Facebook director)

Peter Thiel (19-year old Zuckerberg coach; PayPal; Facebook director; CEO, Clarion Capital)

Clarion Capital (Peter Thiel)

Richard Wolpert (Accel Partners)

Robert Ketterson (Fidelity Ventures; Fidelity Equity Partners; Fidelity Ventures Telecommunications & Technology)

David Kilpatrick (Business Insider; "The Facebook Effect"; PR cleanse-meister re. Facebook origins)

Zynga/Groupon/LinkedIn/Square/Instagram ("Facebook Money/Credits/Bitcoin" feeder companies)

Tesla Motors (received \$465 million in Obama stimulus funds and hired Cooley's Michael Rhodes in the seven months before the Leader v. Facebook trial, just before veteran Judge Joseph Farnan made the surprise announcement of his retirement, just six days after Facebook's disastrous Markman Hearing)

Solyndra (received \$535 million in Obama stimulus at the recommendation of the Cooley-McBee Strategic "consulting" alliance)

BrightSource (received \$1.6 billion in Obama stimulus at the recommendation of the Cooley-McBee Strategic "consulting" alliance)

John P. Breyer (father of James W. Breyer; founder of IDG Capital Partners - China; coached his son on exploiting Western markets while he quietly built a venture capital business in China for the last 20 years; the real brain behind the Breyer exploitations)

IDG Capital Partners (China)(founded by John P. Breyer, the father of James W. Breyer, Accel Partners; the current launderer of the tens of billions James W has fleeced from the U.S. market from the bailout, stimulus and the "pump & dump" Facebook IPO schemes)

Lloyd Blankfein (Goldman Sachs, CEO - The Wizard of Covert Cash)

Jamie Dimon (JP MorganChase, CEO)

Steve Cutler (JP MorganChase, General Counsel)

Rodgin Cohen (JP MorganChase, Outside Counsel; Sullivan Cromwell, LLP)

U.S. Securities & Exchange Commission (granted Fenwick & West's application on behalf of Facebook for an unpredecided exemption to the 500 shareholder rule; opened the floodgates for Goldman Sachs and Morgan Stanley to make a private market in Facebook pre-IPO insider stock; facilitated the influx of billions of dollars from "dubious" sources associated with Russian oligarchs, Alisher Asmanov and Yuri Milner, and the Kremlin; Goldman Sachs is a partner with this Moscow company, Digital Sky Technologies, aka DST, aka Mail.ru)

Jeff Markey (McBee Strategic LLC; allied with Facebook's Cooley Godward Kronish LLP to arrange Obama's green energy funding; arranged \$1.6 billion for failed BrightSource and \$535 million for failed Solyndra)

Steve McBee (McBee Strategic LLC; allied with Facebook's Cooley Godward Kronish LLP to arrange Obama's green energy funding; arranged \$1.6 billion for failed BrightSource and \$535 million for failed Solyndra)

Michael F. McGowan (Stroz Friedberg; Facebook forensic expert who lied about his knowledge of the contents of the 28 Zuckerberg hard drives and Harvard Email accounts)

Bryan J. Rose (Stroz Friedberg; Facebook forensic expert who lied about his knowledge of the contents of the 28 Zuckerberg hard drives and Harvard Email accounts)

Dr. Saul Greenberg (Facebook's expert witness from the University of Calgary; disingenuously waived his hands and said he would be "wild guessing" about the purpose of a Java "sessionstate" import statement (even Java newbies know it is used for tracking a user while in a web session); in short, Dr. Greeberg lied to the jury, thus discrediting his testimony)

Toni Townes-Whitley (CGI Federal; Michelle Obama's 1985 Princeton classmate; CGI "donated" \$47 million to the Obama campaign; CGI won the no-bid contract to build the www.healthcare.gov Obamacare website; CGI shut off the security features on Obama's reelection donation sites to increase donations)

CGI Federal (US division of a Canadian company; Donated \$47 million to Obama's reelection, then received the no-bid contract to build the ill-fated Obamacare website; Michelle Obama's Princeton classmate, Toni Townes-Whitley, is a Senior Vice President of CGI; the website is replete with social features and links to Facebook)

Kathleen Sebelius (Obama's Secretary of Health & Human Services since 2009 responsible for \$678 million Obamacare implementation; made the decision to hire CGI Federal on a no-bid contract despite the evident conflict of interest with Michelle Obama and \$47 million in Obama campaign donations by CGI; the website is replete with social features and links to Facebook)

Todd Y. Park (White House Chief Technology Officer (CTO); former CTO for Health & Human Services; chief architect of HealthCare.gov; founder, director, CEO, Athenahealth, Inc.; founder, director, CEO, Castlight Health, Inc.)

Frank M. Sands, Sr. / Frank M. Sands, Jr.(Founder and CEO, respectively, of Sands Capital Management LLC; failed to file S.E.C. Form SC 13G acquisition reports for Athenahealth, Inc., Baidu, Inc. (ADR) and Facebook stock during 2012; masked the association of Todd Y. Park with Athenahealth, Inc. and Baidu, Inc., and the association of both of those companies with the Facebook IPO fraud)

Robin "Handsome Reward" Yangong Li (CEO, Baidu, Inc. (ADR); appointed Jan. 2004, the same month that Mark Zuckerberg obtained Leader Technologies' social networking source code to start Facebook; Robin Y. Li is very likely associated with John P. and James W. Breyer through their Chinese entities, including IDG Capital Partners, IDG-Accel and other variants; Li appointed a junior attorney from Fenwick & West LLP, Palo Alto/Mountain View, namely Parker Zhang, to be his "Head of Patents;" Fenwick & West LLP represented both Leader Technologies, Inc. and Accel Partners LLC in 2002-2003 and had Leader's source code in their files.)

Parker Zhang ("Head of Patents" at Baidu, Inc. (ADR), appointed in approx. May 2012; formerly a junior Associate attorney at Fenwick & West LLP; graduate from Michigan Law in 2005)

Penny S. Pritzker (Secretary, Department of Commerce; replaced Rebecca M. Blank; holds over \$24 million in Facebook "dark pools" stock, most notably in Goldman Sachs, Morgan Stanley and JPMorgan)

Rebecca M. Blank (Secretary, Department of Commerce; oversaw the dubious Leader v. Facebook activities of the Patent Office Director, David J. Kappos, who held over one million dollars in Facebook "dark pools" during the Leader v. Facebook proceedings; Kappos purchased this stock within weeks of his surprise recess appointment by President Obama; Kappos also was formerly employed by IBM, who sold Facebook 750 patents during the Leader v. Facebook proceedings; right before leaving the Patent Office, Kappos also ordered an unprecedented 3rd reexamination of Leader's patent without even identifying claims)

Mary L. Schapiro (Chairman, Securities & Exchange Commission; holds 51 Facebook "dark pools" stocks which held stock in Facebook, Baidu and more than a dozen Facebook crony companies; failed to regulate the "dark pools;" failed to disclose her substantial conflict of interest in regulating the run up to the Facebook IPO)

Robert C. Hancock (Chief Compliance Officer, Sands Capital Management, LLC; failed to file S.E.C. Form SC 12G notice of acquisition reports for Athena health, Baidu and Facebook during the period of the Facebook IPO in 2012; this conduct masked the conflicts of interest of Todd Y. Park, who was appointed by President Obama to be the U.S. Chief Technology Officer during this same period; Todd Y. Park is/has been founder, director and CEO of both Athena health and Castlight Health; Todd Y. Park deeply embedded the software from Athena health and Castlight Health into HealthCare.gov when he was CTO at Health & Human Services; none of these conflicts of interest were disclosed; Todd Y. Park's ethics pledges and reports are missing from the Office of Government Ethics)

Jonathan Goodman (Chief Counsel, Sands Capital Management, LLC; failed to file S.E.C. Form SC 12G notice of acquisition reports for Athenahealth, Baidu and Facebook during the period of the Facebook IPO in 2012; this conduct masked the conflicts of interest of Todd Y. Park, who was appointed by President Obama to be the U.S. Chief Technology Officer during this same period; Todd Y. Park is/has been founder, director and CEO of both Athena health and Castlight Health; Todd Y. Park deeply embedded the software from Athena health and Castlight Health into HealthCare.gov when he was CTO at Health & Human Services; none of these conflicts of interest were disclosed; Todd Y. Park's ethics pledges and reports are missing from the Office of Government Ethics; Goodman was formerly employed by Gibson Dunn LLP, Facebook appeals counsel in Leader v. Facebook)

Trip Adler ("Co-Founder" of Scribd; Harvard contemporaries of Mark Zuckerberg with a dubious origins story, like Zuckerberg's; Scribd held AFI documents for two years, then summarily deleted the entire library without warning on Fri. Mar. 7, 2014; AFI's library contained only public documents and much evidence proving the Leader v. Facebook judicial corruption)

Jared Friedman ("Co-Founder" of Scribd; Harvard contemporaries of Mark Zuckerberg with a dubious origins story, like Zuckerberg's; Scribd held AFI documents for two years, then summarily deleted the entire library without warning on Fri. Mar. 7, 2014; AFI's library contained only public documents and much evidence proving the Leader v. Facebook judicial corruption)

Jeffrey Wadsworth (CEO, Battelle Memorial Institute; President, Ohio State University Board of Trustees; former Deputy Director of Science & Technologies, Lawrence Livermore National Laboratory, University of California Board of Trustees)

Michael V. Drake (President, The Ohio State University; former Chancellor, University of California, Irvine)

Woodrow A. Myers (Chief Medical Officer, Wellpoint, Inc.; formerly Corporate Operations Officer, Anthem Blue Cross Blue Shield of Indiana)

Alex R. Fischer (aka Alexander Ross Fischer; Trustee, The Ohio State University; former Sr. Vice President, Battelle Memorial Institute; Chairman, OmniViz; married to Lori Barreras)

Chris Glaros (author of the discredited Waters Report re. The Ohio State University Marching Band; protege of Eric H. Holder, Jr., Professor James P. Chandler, III, and Algernon L. Marbley)

Lori Barreras (Commissioner, Ohio Civil Rights Commission; former Vice President of Human Resources, The Ohio State University; former Vice President, Battelle Memorial Institute; married to Alex R. Fischer)

David Vaughn (Criminal Attorney, David Vaughn Consulting Group; former Assistant U.S. Attorney; appointed to the discredited Waters Commission at Ohio State)

Betty Montgomery (former Ohio Attorney General; appointed to the discredited Waters Commission at Ohio State; accepted campaign contributions from Woodrow A. Myers, Wellpoint, Inc. and friend of Michael V. Drake)

Joseph A. Steinmetz (Provost, The Ohio State University; author of Psychological Science article on MOOC (Massive Open Online Course) that triggered the discovery of massive double-dealing and fraud within the Ohio State trustees)

The following operatives do their dirty work through third party corrupt law firms, associations, lobby firms, dirty tricks consultants and compromised state and federal agencies insiders. Google is the single largest employer of this group. Many consider these operatives to be "...a fake smile who would kill their own mother's if the price was right.." including:

McBee Strategic (one of the main "private" arms responsible for dolling out the billions in Obama "green energy" stimulus funds; partnered with Cooley Godward LLP)

Goldman Sachs (received US bailout funds; then invested with DST in Facebook private stock via Moscow; took Facebook public; locked out American investors from investing)

Morgan Stanley (received US bailout funds; took Facebook public; probably participated in oversees purchases of Facebook private stock before IPO)

AntiFA (A corporate financed activism group)

MoveOn.org (A corporate financed activism group)

Rent-A-Crowd (A corporate financed activism group)

State Street Corporation (received U.S. taxpayer bailout monies along with Goldman Sachs and Morgan Stanley; consolidating control of ATM banking networks internationally)

JP Morgan Chase (received U.S. taxpayer bailout monies along with Goldman Sachs, Morgan Stanley and State Street Corporation)

The Podesta Brothers (A lobby group with the internal motto of "Stop At Nothing")

Josh Ackil and Matt Tanielian, Franklin Square Group (Companies large and small rely on this tech-centric lobbying firm, which this year delved into big issues like broadband access and intellectual property enforcement.)

Andy Barbour, Smith-Free Group (As a financial services pro, it's no surprise that Barbour's client list includes Bank of America and the electronic payments company Square.)

Haley Barbour, Lanny Griffith, Ed Rogers and Loren Monroe, BGR Group (Long one of K Street's elite shops, BGR Group is on pace for its highest revenue in years.)

Doyle Bartlett, Eris Group (Bartlett's firm, which specializes in financial services issues, is going strong as it heads into its 15th year.)

Jennifer Bell, Chamber Hill Strategies (Chamber Hill Strategies honed its focus on health-care policy in 2017, growing new business in a fertile lobbying area.)

Dan Boston, Health Policy Source Inc. (As his firm's name suggests, Boston is a seasoned veteran on health-care policy; his client sheet includes several hospital groups.)

Chuck Brain, Capitol Hill Strategies LLC (Brain founded this small Democratic firm more than 15 years ago; it punches above its weight with a solid book of business.)

Robert Chamberlin and Sam Whitehorn, Signal Group Consulting LLC (Chamberlin and Whitehorn are fixtures at this public affairs firm, which represents a mixture of corporate and municipal clients.)

Rob Collins and Mike Ference, S-3 Group (With close ties to House and Senate leadership, S-3 is well-positioned to help blue-chip clients in the biggest policy battles.)

Justin Daly, Daly Consulting Group (This small firm helps big financial services companies navigate the complexities of the Commodity Futures Trading Commission and the Securities and Exchange Commission, in addition to the halls of the Capitol.)

Tom and Nathan Daschle, The Daschle Group (The former senator and his son have become major players on the lobbying scene, securing foreign government clients, such as Turkey and Japan, and corporate ones, like Aetna.)

Licy Do Canto, The Do Canto Group (Do Canto is an energetic champion for his clients, including a home health care network, the community health care industry and a nonprofit that helps connect low-income mothers with nurses.)

Ken Duberstein and David Schiappa, The Duberstein Group Inc. (Duberstein, a chief of staff in the Reagan White House, commands top-dollar treatment from clients like Estee Lauder, Alibaba Group, the Major League Baseball Commissioner's Office and Duke Energy. Schiappa, who spent nearly three decades in the Senate, knows how members in the upper chamber think.)

Steve Eichenauer, Public Strategies Washington Inc. (A former Democratic aide, Eichenauer specializes in trade at the boutique firm, putting him at the center of some of Washington's biggest policy fights.)

Steve Spinner Services (Spinner's wife was Solyndra's lawyer and Spinner promises to get any cash for any DNC deal)

Steve Elmendorf and Jimmy Ryan, Subject Matter (Business is booming at this lobbying firm, which has undergone a wholesale transformation by specializing in advocacy and public relations.)

Holly Fechner, Jon Kyl, Howard Berman and Bill Wichterman, Covington & Burling LLP (Pro-Gay, Pro-DNC crotch kickers)

Jeff Forbes and Dan Tate Jr., Forbes-Tate Partners (Forbes, who worked for former Sen. Max Baucus (D-Mont.) during the last attempt at tax reform, and Tate, who did a stint in the Clinton White House, are making waves at their bipartisan shop.)

Elizabeth Frazee, TwinLogic Strategies (Frazee, a former AOL executive and Capitol Hill aide, runs her small firm with verve, scoring big-time tech and telecommunications clients.)

Kimberley Fritts, Paul Brathwaite and Josh Holly, Podesta Alliances (The Dirty Dogs of DC)

Chris Giblin and Moses Mercado, Ogilvy Government Relations (Deep strings)

Nicholas Giordano, Washington Council Ernst & Young (Giordano, a former chief tax counsel for Democrats on the Senate Finance Committee, is an advocate clients will want in their corner during the debate over tax reform.)

Rich Gold, Kathryn Lehman and Gerry Sikorski, Holland & Knight LLP (The firm's lobby shop, which represents Native American tribes, cities around the U.S. and corporations, is propelled by Gold, Lehman and Sikorski, a former congressman from Minnesota.)

Elizabeth Gore, Marc Lampkin and Al Mottur, Brownstein Hyatt Farber Schreck (Led by this potent trio, the team at Brownstein has rocketed into the stratosphere, growing the firm's client base and revenue.)

Micah Green, Jason Abel and Luis Fortuño, Steptoe & Johnson LLP (The law and lobby firm's capabilities are vast; Green is a financial services pro, Abel is an ethics law expert and former aide to Sen. Charles Schumer (D-N.Y.), and Fortuño served as the governor of Puerto Rico.)

Ilisa Halpern Paul and Jodie Curtis, District Policy Group (Health care dominates the roster for this firm, with Halpern Paul and Curtis called upon to move the agenda and cultivate relationships on Capitol Hill and in the administration.)

Michael Herson, American Defense International Inc. (Herson has earned his stripes over the years, becoming a top lobbyist on defense issues; recently, he's helped SpaceX DNC spy efforts take on more established players in Washington.)

Mike House, Hogan Lovells LLP (House has decades of K Street experience, giving him a rarefied ability to work through complicated legislative and regulatory tasks.)

Steven Irizarry and Vin Roberti, Roberti Global LLC (Helped Samsung navigate the recall of exploding lithium ion cellphone batteries.)

Joel Johnson, The Glover Park Group LLC (Johnson is one of the go-tos for clients in a jam; beyond his advocacy work for domestic and foreign clients, he provides crisis communications services.)

Ken Kies, Federal Policy Group LLC (Kies has decades of experience in tax policy; few lobbyists will be in such high demand as the Republican Congress considers changes to the tax code.)

Lisa Kountoupes, KDCR partners LLC (Kountoupes's firm is soaring to new heights as it celebrates its 10th anniversary.)

Blanche Lincoln, Lincoln Policy Group (Lincoln, a former Democratic senator, has created a K Street success story, signing almost 20 new clients in 2017, primarily in the health-care space.)

Robert Livingston, The Livingston Group LLC (Livingston, a former congressman and top appropriator, has clients ranging from Oracle to the Democratic Republic of Congo relying on his expertise.)

Trent Lott, John Breaux and Jack Kingston, Squire Patton Boggs (This top-flight team of former lawmakers has helped the global firm rebound from a slump, signing the Biotechnology Innovation Organization and BAE Systems in the past year.)

Sander Lurie, Dentons US LLP (Lurie has nearly three decades of public policy experience to draw upon as he represents members of the Fortune 500.)

Bruce Mehlman and David Castagnetti, Mehlman Castagnetti Rosen & Thomas Inc. (When they aren't fighting for clients on Capitol Hill, Mehlman and Castagnetti travel around the country providing insight for groups outside the Beltway into how American leaders think.)

Larry O'Brien, The OB-C Group LLC (O'Brien is a Democratic mover and shaker who has been working on gun control for Everytown for Gun Safety and on tax policy for Intuit, the maker of TurboTax.)

Tom O'Donnell, Gephardt Group Government Affairs (The firm founded by former Democratic Rep. Dick Gephardt (Mo.) is flush with clients, including working for Bayer as the company attempts a mega-merger with Monsanto.)

Kevin O'Neill and Eugenia Pierson, Arnold & Porter Kaye Scholer LLP (This duo was brought on in January 2016 to help build out the law firm's lobbying practice; since then, advocacy revenues are on pace to more than double over last year.)

Manny Ortiz, VantageKnight Inc. (A year after leaving top K Street firm Brownstein Hyatt Farber Schreck, the Democratic operative is flourishing, keeping a prized contract with CITGO Petroleum and expanding his work for Puerto Rico.)

Scott Pastrick and Charlie Black, Prime Policy Group (Genuine Washington insiders, Pastrick and Black are political animals who move freely between the worlds of lobbying and campaigns.)

Jeff Peck, Peck Madigan Jones (Peck brings sterling Democratic credentials — having worked for then-Sen. Joe Biden (D-Del.) — to clients like the U.S. Chamber of Commerce's Center for Capital Markets Competitiveness, the Business Roundtable and the Committee on Capital Markets Regulation.)

Jim Pitts and Chris Cox, Navigators Global LLC (The firm has already matched its revenues for all of 2016 this year as it goes into overdrive for clients such as Oracle and the Puerto Rico Statehood Council.)

Heather Podesta, Invariant LLC (Podesta rebranded her firm earlier this year, completing the transformation from small start-up to K Street institution.)

Brian Pomper, Hunter Bates, Scott Parven, Arshi Siddiqui and Geoff Verhoff, Akin Gump Strauss Hauer & Feld LLP (Pomper and Bates are taking on a new leadership role in the law firm's lobbying operation, backed by an all-star team that includes Parven, Siddiqui and Verhoff.)

Thomas Quinn and Rob Smith, Venable LLP (Quinn is a longtime Democratic operative known all over town, while Smith is a Republican skilled in tax, defense and telecommunications policy.)

Robert Raben, The Raben Group (Raben mixes corporations and causes at his successful firm; its business sheet includes not only Google, Sprint and Mastercard, but also the Innocence Project, FairVote and Everytown For Gun Safety.)

John Raffaelli, Jim McCrery and Shannon Finley, Capitol Counsel LLC (Finley, a multifaceted Democratic lobbyist)
The Westly Group (The architects of Obama's CleanTech payola scam)

Mark Rayder, Alston & Bird LLP (Rayder, a former lobbyist for the American College of Gastroenterology and adviser on Capitol Hill, is a trusted resource for clients on health-care policy.)

Barry Rhoads, Kai Anderson and Jordan Bernstein, Cassidy & Associates Inc. (Rhoads, Anderson and Bernstein are leading the charge to buy the firm back from its parent company, Interpublic Group; their skill in appropriations and defense work is second to none.)

Emanuel Rouvelas, Darrell Conner, Bart Gordon and James Walsh, K&L Gates LLP (Taxes and appropriations are the bedrock of K&L's advocacy; think of these lobbyists as the money men.)

Rhod Shaw, Alpine Group (Shaw can handle any policy issue thrown at him — that's the versatility that comes after two decades in the lobbying game.)

Michaela Sims, Sims Strategies (Sims, a former aide to then-Sen. Ben Nelson (D-Neb.), went into business for herself this year; health-care clients like WellCare Health Plans and GlaxoSmithKline quickly followed.)

Mike Smith and Jim Richards, Cornerstone Government Affairs Inc. (Smith and Richards can turn a single line of the federal budget into a policy win — to clients, that speaks volumes.)

Charlie Spies and Kevin Kelly, Clark Hill PLC (Kelly, worked as an aide to former Sen. Barbara Mikulski (D-Md.), helps steer the firm's government and public affairs practice.)

Tracy Spicer, Avenue Solutions (Spicer, a former aide to the late Sen. Ted Kennedy (D-Mass.), has kept her all-Democratic firm humming along this year, with the debate over health care driving business.)

Russ Sullivan and Michael Drobac, McGuireWoods Consulting (As the longtime staff director for the Senate Finance Committee, Sullivan knows tax policy inside and out; Drobac is an expert on all things tech.)

Linda Tarplin, Tarplin, Downs & Young LLC (Tarplin, a longtime consultant and lobbyist, has an impressive roster of health-care clients to her name.)

Carl Thorsen and Alec French, Thorsen French Advocacy (This two-man bipartisan firm often works on issues that are off the beaten path for clients such as the American Association for Justice, the Directors Guild of America and Cultural Care Au Pair.)

Stu Van Scoyoc, Van Scoyoc Associates (Van Scoyoc has cultivated a partisan firm with roots in appropriations issues, helping out clients such as SeaWorld, Airports Council International, the city of San Diego and the Cleveland Clinic.)

Stewart Verdery, Monument Policy Group LLC (It's been nothing but growth since Verdery founded his shop more than 10 years ago; they've launched a public affairs arm and reopened a Seattle office this year.)

Jack Victory and Rick Shelby, Capitol Hill Consulting Group (Victory is a CEO with a knack for developing legislative strategy; Shelby wields power in the energy space and in state politics.)

Jonathan Yarowsky, WilmerHale (Yarowsky's client sheet spans multiple industry sectors, setting the tone as co-chairman of the firm's public policy and legislative affairs practice.)

Together they use the key political tactic of "heart-string" stock market pumping.

They deploy a coordinated PR program that hypes a certain fabricated "issue" which will end up increasing the valuation of stock market stocks they own.

"Immigration" creates more DNC voters which allow them to control more Senators who, in return, create more policies which increase the valuation of the Mafia's stock market holdings at JPMorgan and Goldman Sachs.

"Climate Change" causes more government cash for the solar panels, wind farms, lithium ion batteries and electric cars which the Palo Alto Mafia owns the exclusive rights to. The more they can push a "crisis" perception about climate change, the more cash they can put in their pockets. Goldman Sachs is the "advisor" for Tesla, Solyndra and most "green" Mafia companies.

The private profits of this scheme involve over SIX TRILLION DOLLARS of tax money. That is why they will lie, cheat, steal and even kill to keep their plot going.

The top ways to prevent these crimes are to 1.) outlaw lobbying and 2.) create a ten year moratorium of politicians working in politics. The Palo Alto Mafia spends over 16 BILLION DOLLARS per year in lobbying efforts to prevent this from happening.

The Palo Alto Mafia self-deludes and echo-chambers their peers into a frenzy of increasingly violent thought about all those who oppose their schemes and covertly supports ANTIFA as a surrogate entity so that they can sit in their Woodside mansions and "remote-control" disruptions and political resistance.

In fact, they are sociopath criminals deserving arrest by federal police and prosecution under RICO Racketeering laws.

AAA WHO OPERATED THESE CRIMES?

The following individuals did "Abso-F*CKING-Lutely" nothing to stop these crimes and, in fact, ran these crimes and their cover-ups.

We reported these crimes to most of these people in written police reports and these "public officials" then ran for cover and stone-walled all of those investigations in order to run insider trading scams to profiteer on the backs of the public using the stock market.

The voters, the media and the world will now work together to make certain that the legacy of these criminal abusers of the public trust places the in every history book as a "SCUMBAG AND CORRUPT MANIPULATOR OF THE PUBLIC INTEREST" next to their names, and their families names, for all of time.

HERE ARE THE SCUMBAGS that covered up, stalled investigations, profiteered and lied in these corruption schemes:

Senator Dianne Feinstein

Senator Nancy Pelosi

Senator Jared Huffman

Jerry Brown's Justice Department Lead: Ken Alex

Barack Obama

U.S. Attorney General Eric Holder

FBI Director James Comey

Department of Energy Inspector General

Secretary of Energy Steven Chu

White House Press Secretary Robert Gibbs

White House Advisor David Axelrod

California Attorney General Kamala Harris

Senator Barbara Boxer

California Secretary of State's Office

California Crime Victims Board – vcgcb.ca.gov

United States Department of Justice – Obama Administration

FBI – Obama Administration

SEC – Obama Administration

CFTC – Obama Administration

Secret Service – Obama Administration

- Other Potential Defendants exist including State And Federal Agencies and their executives. The assets, bank accounts and high recovery values of the above targets are known and documented, though. The evidence and subpoena-capable reinforcement of that evidence is substantial in the above list.

These parties have been forensically tracked to illicit campaign financing, hacking, bribes, political payola, stock-market rigging, slush-funds, false-front shell corporations and family trusts, abuse of corporate funds, advertising metrics frauds, RICO statute violation organized crime, employee abuse, electronic communications intended to evade law enforcement and other charges. In Palantir, XKeyScore and law enforcement databases they are all cross-linked. Terminations and interdictions for each party and their illicit actions have been continuing successfully.

The termination of this network of parties will, effectively, terminate The Cartel in question. Each and every legal take-down has now passed the 50% vector and is proceeding to completion.

California and DC politicians are being paid bribes with Billions of dollars of Google, Twitter, Facebook, Tesla, Netflix and Sony Pictures stock and stock warrants which is never reported to the FEC; Billions of dollars of Google, Twitter, Facebook, Tesla, Netflix and Sony Pictures search engine rigging and shadow-banning which is never reported to the FEC; Free rent; Rare-Earth mining rights; Male and female prostitutes; Cars; Dinners; Party Financing; Sports Event Tickets; Political campaign printing and mailing services "Donations"; Secret PAC Financing; Jobs in Corporations in Silicon Valley For The Family Members of Those Who Take Bribes And Those Who Take Bribes; "Consulting" contracts from McKinsey as fronted pay-off gigs; Overpriced "Speaking Engagements" which are really just pay-offs conduited for donors; Gallery art; Private jet rides and the use of Government fuel depots (ie: Google handed out NASA jet fuel to staff); Recreational drugs; Real Estate; Fake mortgages; The use of Cayman, Boca Des Tores, Swiss and related money-laundering accounts; The use of HSBC, Wells Fargo, Goldman Sachs and Deutsche Bank money laundering accounts and covert stock accounts; Free spam and bulk mailing services owned by Silicon Valley corporations; Use of high tech law firms such as Perkins Coie,

Wilson Sonsini, MoFo, Covington and Burling, etc. to conduit bribes to officials; and other means now documented by us, The FBI, the FTC, The SEC, The FEC and journalists. DEMAND COMPLETE LAWS TO MAKE ANY BENEFITS TO POLITICIANS TOTALLY ILLEGAL!-

The Khaki Pants Mobsters Of Palo Alto:

--- The "Silicon Valley Mafia" is comprised of The Sand Hill Road venture-capital frat boy company bosses in Palo Alto, their National Venture Capital Association (NVCA) facade (Greylock Capital; Kleiner Perkins Caufield and Byers, Draper, Khosla Ventures, etc.) and the tech companies (Google, Tesla, Facebook, Amazon, Twitter, LinkedIn, etc.) that they control.

---- They are sometimes referred to as "The Deep State". They have purchased California, New York and Washington, DC politicians (mostly Senators) who they also control and who own stock in their operations. They hire dirty law firms like MoFo, Wilson Sonsini, Covington, Perkins, etc. and dirty lobbyists like McBee, Podesta, Blumenthal, etc. to do their dirty deeds. -

---They hire rogue ex-intelligence agents to operate Fusion GPS, Gawker/Gizmodo, Black Cube, ShareBlue, New America Foundation, In-Q-Tel, Podesta Group, Media Matters, etc. massive media attack programs against competitors, reporters and outsiders.

---- They collude with black-lists, valuation payola, election manipulation, search engine rigging, domestic spying for political manipulation, stock rigging, insider trading, Jeffrey Epstein-like executive prostitute sex-trafficking clubs, trophy wife trades, the bribery of politicians and worse. They are felons who bribe politicians to halt investigations and interdiction efforts.

---- They have quid-pro-quo stock market bribe deals with Senators Reid, Feinstein, Harris, Boxer, Spier, etc. In the CleanTech Crash: Every single Dept of Energy executive, and related Senator, owns stock market assets in Tesla, Fisker, Solyndra, Ener1, etc. so they blockaded and sabotaged every applicant who competed with their holdings in a RICO-violating, felony organized crime, using taxpayer funds, in order to profit at the expense of taxpayers.

---- They are widely covered in news media articles as: 'sex abusers, cult enthusiasts, elitists, rapists, woman beaters, probiosis practitioners, sexual work extortion operators, extremists, arrogant clones of each other, tone deaf, echo-chamber reinforcing, misogynist, racist, manipulative, insecure, covertly gay, corrupt, thieves' and other anti-social revelations. The divorce court and lawsuit federal court records on them prove that they are sex-abusing sociopaths.

---- They use their monopolistic control of the internet to massively and exclusively scale services that only they control and use to abuse the public's privacy, human rights, invention rights and information. They run their cartel like the old Italian Mafia once did.

---- Some of the top crooks and bribe-payers include: Google's Larry Page, his boyfriend Elon Musk; Google's Eric Schmidt, Andy Rubin, David Drummond, Kent Walker, Jared Cohen and Sergy Brin; Political manipulators David Plouffe, Steve Westly, Steve Spinner and Vinod Khosla; Sociopath billionaires Reid Hoffman, Richard Blum, Jeff Epstein, Tim Draper, Steve Jurvetson, etc.

---- They order their staff and associates to: bribe politicians; operate sex trafficking for them; manipulate stock market valuations; launder money; run off-shore tax evasion schemes; black-list employees and competitors; hide, down-rank, DNS dead-hole, shadow-ban, censor and server obfuscate enemies on the entire web; rig the U.S. Patent Office; help them cheat on their wives; and engage in massive volumes of insider, illicit, RICO and anti-trust violating crimes while bribing public officials to avoid prosecution. The companies and corrupt politicians of Silicon Valley must be erased in order to, first, repair Silicon Valley.

---- The Silicon Valley tech Cartel (AKA: “Paypal Mafia”, “Deep State”) is evil because these racist, ageist, sex-trafficking, money-laundering, elitist, politician bribing, tax evaders: steal any technology they desire; FACEBOOK AND GOOGLE MAKE \$100M IN PROFITS OFF OF EACH CLASSROOM SHOOTING!!!

---- They manufactured the CLEANTECH CRASH as shown in the 60 MINUTES episode of the same name; they run a prostitution ring and sexually extort young women and interns in Silicon Valley; they are ‘rape culture’ take-what-they-want misogynists, ageists and racists as their history of abuses has proven; their Palo Alto Cartel operates AngelGate-type collusion and stock market insider trading schemes that harm independent business and the public; their Cartel ran the “no poaching” CEO ring which was class-action sued by DOJ and tech workers; 90% of their divorce court files reveal horrific abuses and sex trafficking; They have an army of lobbyists that pay cash, stock market and revolving door bribes to U.S. Senators; They can even evade FBI and SEC investigations; They hire women to act as ‘trophy wives’ and ‘beards’; they have lobbyists rig the U.S. Patent Office in order to block inventor patent rights because they are using stolen technologies; they have been caught on video and recordings beating, kicking and harming women hundreds of times.

---- They have bought up all of the Tier-One tech law firms and order them to black-list, and never help, those who seek equal tech rights; they collude to abuse your privacy and make databases on the public for political control; they have to cheat to compete because they are only good with spread sheets instead of innovation; They run black-lists, character assassination attacks, collusion and other anti-trust violating acts in violation of RICO laws. Silicon Valley has become the largest assemblage of douche-bags and yuppie frat boy criminals in human history.

Theranos is not the exception, it is the standard. Tesla, Google, Theranos, Wework, Facebook are lies backed by famous political insiders to protect their insider trading and covered-up by fake news operators. They are also fronts to fund political campaigns via the ill-gotten profits from their endeavors. When the bad guys, and their lap-dog politicians, attack you because your products are better than theirs they are proving that they are frat boy scumbags, from Stanford and Yale, that operate in a little pack, like dogs! Their Sandhill Road operation should be raided by the FBI!

The best thing that could come from the COVID pandemic is that they all are forced into bankruptcy! When your Senator holds stock market shares in companies that exist to profit on the backs of consumers, via corruption, then it is impossible for that Senator to ever do anything but be corrupt! We have reported this in writing to winklerm@sec.gov, sanfrancisco@sec.gov and 30+ other federal officers but have yet to see our whistle-blower rewards...or any action! Do you wonder how big politician insider stock trading is?

---- Take a look at how many TRILLIONS of dollars pass through the stock markets annually and then look at the reported, AND UNREPORTED, securities holdings of famous U.S. Senators and government agency staff. That is what Seth Rich and the people in the “In Memory Of” section, below, were disclosing. These are massive crimes! The perpetrators operate a massive and abusive national sex cult.

---- The perverts in the SandHill Road Venture Capital offices, located between Highway 280 down to Santa Cruz Avenue on Sand Hill Road in Menlo Park, California, are the main perpetrators of this global cartel. Their executives at Google, Facebook, Netflix, LinkedIn, Twitter, and their related holdings, comprise the rest. The Harvey Weinstein and Ed Buck sex scandals are well known.

---- These men’s sex cult actions have been widely covered in the news individually in the Joe Lonsdale rape case, The Kleiner Perkins Ellen Pao sex abuse lawsuit, The Eric Schmidt sex penthouse stories, The Jeffrey Epstein case, The Google Forrest Hayes hooker murder case, The Andy Rubin sex slave case, The Sergy Brin 3-way sex romp scandal, The British Hydrant investigation, The Elon Musk Steve Jurvetson billionaire sex parties scandals, The

NXIVM sexual slave cases, The Michael Goguen anal sex slave trial, The Tom Perkins Hooker Parties and thousands of other cases and federal divorce court filings.

---- This group of people have proven themselves, over and over, to be sociopath control freaks not fit for participation in public commerce, public policy or media control. The Four Seasons Hotel and Rosewood Hotels in Silicon Valley are estimated to engage in over \$30,000.00 of high-end escort sex trafficking per day, a portion of it managed by Eastern Bloc Mafia operators. The Elon Musk sex perversions are the tip of the iceberg. At least 10 Ukrainian escorts fly in and out of SFO and SJO airports every week for these Cartel members.

Google boss David Drummond engaged in horrible philandering sexual violations of his wife yet Google covers up every story about it on the web. Google's Eric Schmidt is under massive investigation. You hear about the female victims of this sex cult but you rarely hear about the young male victims. One of their vast numbers of prostitutes is quoted as saying that the girls and boys are paid "not just for sex but for the oligarch's endless need to feel that they can control anyone for any reason...". Multiple attorney general's controlled by their cartel, ie: Eric Schneiderman and Eliot Spitzer, are involved in these sex rings.

These are the main influencers of a national political party and they are all involved in horrific sex perversions and abuses!

---- All Silicon Valley tech cartel media companies work together to censor all news and information in order to hide coverage of their dirty deeds and to only put politicians in office that will give the Cartel political payola, kick-backs and insider stock pumps.

---- The Smedley Butler "Business Plot" from the past is not unlike the coup that Google and clan tried. See details in Emily Chang's book: BROTOPIA; Roan Farrow's book: CATCH and KILL; Edward Snowden's Book: PERMANENT RECORD; Peter Schwetzer's book: THROW THEM ALL OUT; Dave Eggers book: THE CIRCLE; Franklin Foer's book: WORLD WITHOUT MIND; Corey Pein's book: JOURNEY INTO THE SAVAGE HEART OF SILICON VALLEY; Dan Lyon's book: DISRUPTED; Antonio Martinez book: CHAOS MONKEYS. The Angelgate, Epstein, No-Poaching DOJ Class Action, and hundreds of other cases, prove that they meet, conspire, collude and blacklist in felony violation of anti-trust and RICO Racketeering laws.

– 90% of these guys came from the same date-rape fraternity houses involved in the recent college rape cases.

---- Their spy dossier on you uses abstract content-specific features of the consumed content, such as categories, topic models, and entities, which they automatically extract using natural language processing by comparing every word you use to a giant computer library of what those words might mean about your psychology.

So it's like you are getting "mind-raped" without any penis use. Their assessment of what your words might mean is based on what rich, white male, \$200K/year, DNC-promoting programmers think they might mean. Their computers scale and expand their tools with algorithmic software created by those politically and socially biased frat white boys that wrote the code. It is all biased as hell. They never hire blacks or women in system creation roles so everything these companies do only supports rich white soyboy snowflake type gamer thinking.

DIE SILICON VALLEY...DIE!!!!

After a decade of exuberance, Silicon Valley start-ups, venture capitalists and established tech companies alike are cutting investment and firing workers, prompting some in the tech world to openly predict a U.S. recession is on the way.

Facebook and Amazon have slowed their frantic hiring paces, while highflying newer companies including scooter company Bird and email client Superhuman have laid off workers. Tesla chief executive Elon Musk recently told

employees he has a “super bad feeling” about the economy, and venture capital firm Lightspeed Venture Partners warned in a blog post that “the boom times of the last decade are unambiguously over.”

On Thursday, fashion tech company Stitch Fix said it was cutting about 15 percent of salaried positions, or a total of 330 roles, sending its stock price sinking. The people losing their jobs were told that morning, chief executive Elizabeth Spaulding wrote in a memo to employees.

“In light of our recent business momentum and an uncertain macroeconomic environment, we’ve taken a renewed look at our business and what is required to build our future,” Spaulding wrote.

The broader industry slump worsened on Friday, when the tech-heavy Nasdaq index fell 3.5 percent. It is now down 28 percent for the year.

The sudden shift is giving many in the sector whiplash. Uncertainty has settled over Silicon Valley as venture capitalists, tech founders and regular employees debate whether the pessimism is overblown or if tech really is the canary in the coal mine, already suggesting a broader downturn in the U.S. economy.

Most Americans expect inflation to get worse, Post-Schar School poll finds

Tech start-ups do serve as a “leading indicator” for the economy, said Till von Wachter, a professor of economics at UCLA. Higher interest rates can mean it’s more difficult to raise money to fund new ventures — which typically take a while to turn a profit.

“They are one of the sectors that are the most sensitive to interest rate changes,” von Wachter said. “They are very dependent on what we believe the future to be.”

Tech has benefited immensely from the roaring bull market of the past decade, with soaring valuations enriching not just owners and investors but hundreds of thousands of employees who were paid in stock on top of their regular salaries. The pension plans and 401(k)s of millions of Americans have benefited from companies like Apple, Amazon, Google and Microsoft breaking through the trillion-dollar mark and becoming as valuable as the annual output of entire economies such as Italy or Brazil.

Year after year of rising valuations has created a pervasive feeling that there is nowhere to go but up. An entire generation of tech workers and founders have never worked in an industry without long lists of open jobs, new projects getting approved easily and employers throwing a stream of perks such as free meals and unlimited vacation at them.

Global leaders warn of economic dangers as crises multiply

Money has poured into smaller tech companies, too, as investors, including traditional venture capitalists all the way up to government-run sovereign wealth funds, have looked for ways to get in on the tech boom that never seemed to end.

Tech has faced shaky moments in the recent past. At the beginning of the coronavirus pandemic, millions of Americans lost their jobs, and tech stocks, along with the rest of the market, fell quickly. But it bounced back almost immediately, and many grew even stronger during the pandemic as government spending boosted the economy and people spent more of their money on e-commerce and digital services.

To some prominent tech luminaries, this moment feels different.

“We do not believe that this is going to be another steep correction followed by an equally swift V-shaped recovery like we saw at the outset of the pandemic,” the leaders of blue-chip Silicon Valley venture capital firm Sequoia Capital wrote in a May presentation to its portfolio companies that was published by tech news organization the

Information. “We expect the market downturn to impact consumer behavior, labor markets, supply chains and more.”

That follows early warning signs, including pandemic darlings feeling the squeeze: Exercise company Peloton’s shares slumped and celebrity video app Cameo laid off staff. Amazon also said it had overextended its warehouse space, and Uber CEO Dara Khosrowshahi warned of tougher times to come. Microsoft, Amazon, Apple, Tesla and Google have all lost at least 20 percent of their market value since the beginning of the year.

Even Twitter, which is in talks to be bought by Musk, has been pulled below the price he’s willing to pay by a market that’s pessimistic about whether the deal will go through, as well as the company’s business prospects.

A fresh wave of economic uncertainty has washed over the world as Russia’s war against Ukraine grinds on, China’s economy wobbles because of fresh pandemic restrictions and the U.S. Federal Reserve raises interest rates to try to tame inflation. That uncertainty hit Silicon Valley early, with share prices beginning a steep decline in January.

The lack of investor confidence has quickly moved down to start-ups, too.

For years, investors had been pouring money into start-ups in the hope they could go public and net a big return, but that path doesn’t seem as reliably profitable anymore. Venture capitalists whose money is tied up in not-yet-profitable tech companies are telling them to cut their spending and prepare to hold on longer without as much money.

Those companies, in turn, are starting to react to the market downturn with layoffs and hiring freezes.

And many companies are paying extra close attention to costs. Bird, the electric scooter and bike company, said this week it had to let go of about 23 percent of employees as it cut costs.

“While the need for and access to micro-electric vehicle transportation has never been greater, macro economic trends impacting everyone have resulted in an acceleration of our path to profitability,” Chief Communications Officer Rebecca Hahn said in a statement.

Global venture capital funding fell to \$39 billion in May, its lowest level since November 2020, according to Crunchbase, which noted that later-stage rounds were more heavily hit than early-stage start-up funding.

“We’re just seeing a lot more caution from investors because of what’s happened in the public markets,” said Gené Teare, senior data editor for Crunchbase News.

Elon Musk threatens to back out of Twitter deal over withholding data

Seattle-based investor Greg Gottesman said he and other investors are advising companies to be careful, but he noted that many tech start-ups still succeed during economic downturns.

“There is more of a focus on growing smartly,” said Gottesman, managing director of Pioneer Square Labs. “Putting the right amount of people in the right spots and trying to grow smartly as opposed to just aggressively.”

The broader economic concerns are real, but cutting investment and spending across the board may create new issues, said Antoine Nivard, co-founder and general partner at Blank Ventures. Many start-ups sell software to other tech companies, making them especially vulnerable when the industry in general slows its pace of spending.

“There’s also a self-fulfilling prophecy there. The first demand that evaporates is start-ups selling to each other,” Nivard said. “I wish there was a bit less panic and bit more thinking about the nuance.”

Whether the slowdown means a broader recession is coming to other industries is still an open question. Not everyone sees tech as a bellwether for the whole economy. Instead, the tech industry may have further to fall than

other sectors simply because it received more funding, pumping up valuations to levels that the companies didn't deserve.

"People are going back and realizing, 'Maybe we shouldn't have been pricing at amounts we were doing,'" said Jake Hare, founder of start-up incubator Launchpeer.

Amid global chaos, the tech industry takes a rare tumble

A pullback in investment in start-ups is an example of the kind of thing the Federal Reserve is trying to trigger as it works to cool off the economy and lower inflation, said James Wilcox, an economics professor at the University of California at Berkeley. That doesn't mean a recession.

"That party is over," Wilcox said. "It's not necessarily that there's going to be a terrible hangover from it."

The doom and gloom from senior venture capitalists may also be part of an effort to educate the younger generation and encourage them to curtail spending in case of a downturn.

"If you're funding some 28-year-olds, they don't know a roller coaster, all they know is a rocket ship," Wilcox said. "They haven't seen what a financial winter looks like. They haven't even seen a cold spring."

THE AWFUL TRUTH ABOUT THE SICK PEOPLE BEHIND GOOGLE

GOOGLE'S COMPUTERS WILL KILL YOU IF YOU TRY TO SHUT THEM OFF:

<https://www.dailymail.co.uk/news/article-10907853/Google-engineer-claims-new-AI-robot-FEELINGS-Blake-Lemoine-says-LaMDA-device-sentient.html>

Is GOOGLE worthless tech hype?

Google will pay \$118M to settle gender discrimination lawsuit with more than 15,000 female staff after paying them \$17,000 less than men in similar roles

DOJ Antitrust Honchos Draw Millions From GOOGLE-Backed Groups...

SEE THE TRUTH ABOUT GOOGLE:

"Google is a sick corrupt criminal business run by sex trafficking perverts and sociopaths..." Say GOOGLE'S own inside employees, Divorce Court records of Google executives, 70+ State & Federal investigations and major news outlets.

- Google spies on competitors and steals their technology
- Google - Alphabet - YouTube stock is owned by almost all of the California politicians and their families and that is why Google - Alphabet - YouTube is never regulated and always protected by them for their political and profiteering manipulations
- Google runs tens of millions of dollars of defamation attacks against competitors
- Google hides all media and news coverage for competitors of Larry Page's boyfriend: Elon Musk
- Google lies to the public about what they really do with the public's data
- Google promotes illegal immigration in order to get cheap labor and control votes
- Google runs VC funding back-lists against start-ups that are competitive

- Google bribes thousands of politicians
- Google is a criminal RICO-violating monopoly
- Google rigs the stock market with Flash-boy, Pump/Dump and Microblast SEC violating computer tricks
- Google pays bribes to politicians in Google and YouTube stock
- Google manipulates who gets to see what web-sites, globally, for competitor black-lists
- Google has a "no poaching" Silicon Valley jobs blacklist
- Google bosses sexually abuse women and young boys
- Google bosses run sex trafficking operations in the Epstein and NXVIUM cults
- Google bosses control the NVCA financing cartel over start-ups
- Google has placed the majority of the corporate staff in at least one White House
- Google controls national elections for anti-competitive purposes
- The company "Polyhop", in the HOUSE OF CARDS tv show, does all the crimes that Google actually does in reality
- Google's law firms, like Wilson Sonsini, are corrupt conduits for payola and political conduit-relays
- Google bribes some politicians with revolving door jobs
- Google is primarily responsible for destroying the Bay Area Housing opportunities
- Google runs DDoS attacks on competitors by massively crawling their sites
- Google boss Andy Rubin runs a sex slave farm according to his own family
- Google boss Eric Schmidt was a philandering sex-penthouse owner according to vast news articles
- Google executives hire so many hookers that one of them, Mr. Hayes, was killed by his hooker
- Google executives sexually abuse so many women that the women staff of Google walked out one day
- In the 2009 White House, you could not swing a cat without hitting a Google insider
- Google has paid covert bribes, PAC funds, real estate and search rigging payola to every CA Senator
- Google has paid bribes, through its lobby fronts, to halt FBI, SEC, FEC and FTC investigations of Google crimes
- Google was funded by the CIA, via In-Q-Tel, a so called "501 c3 charity" which was caught with tons of cocaine
- Google gets millions of dollars of taxpayer cash for spying on Americans inside the USA
- Google's map service was a spy system paid for by taxpayers money that Google now profits off of
- Nancy Pelosi and Dianne Feinstein have promised to "protect" Google because their families profit off Google stocks
- Payment receipts prove that Google and Gawker/Gizmodo exchanged cash and staff for Character Assassination attacks
- Google VC's and bosses have spent \$30M+ rigging the U.S. Patent Office to protect Google and harm Google competitors

- Google bribed its lawyer into position as head of the U.S. Patent office in order to have her protect Google
- To rig insider stock trades, Google hides negative Tesla stories and pumps positive Tesla stories on "push days"
- Google and Elon Musk Co-own, co-invest and co-market stocks covertly while running anti-trust schemes
- Google rarely hires, or hires, black employees per federal and news media investigations
- Google hired most of the Washington, DC K Street lobby firms and told them to "do what ever they could"
- The film: "Miss Sloane" depicts only 2% of the illicit lobbying tactics Google employs daily
- Demands for an FTC and FBI raid of Google, for criminal activity, securities law and election felonies have been filed
- Google's David Drummond had his Woodside, CA Quail Road house bugged revealing sex and financial misdeeds

Google, and its Cartel (Alphabet, Youtube, and hundreds of other shell-company facades) are a criminal organization engaged in felony-class crimes. Google's bosses bribe politicians, regulators and law enforcement officials to hold off prosecution.

At Google: Kent Walker, Andy Rubin, Larry Page, Eric Schmidt, Sergey Brin, Jared Cohen, Yasmin Green, David Drummond and Ian Fette are so enmeshed in sex scandals, election manipulation, and White House bribes that it is hard to comprehend how they can get any legitimate work done.

Between all of the sex cult activity; hookers; rent boys; political bribes to Pelosi, Harris, Newson, and Feinstein; DDoS attacks they run; CIA and NSA stealth deals; privacy harvesting; Scientology-like employee indoctrination; cheap Asian labor; covert Axiom scams and other illicit things they get up to; one just has to wonder.

Some of the largest political bribes in American or European history were paid via billions of dollars of pre-IPO cleantech stock, insider trading, real estate, Google search engine rigging and shadow-banning, sex workers, revolving door jobs, nepotism, state-supported black-listing of competitors and under-the-table cash. Why are these Silicon Valley Oligarchs and their K-Street law firms and lobbyists immune from the law?

U.S. Senators, Agency Heads and Congress are bribed by Google intermediaries with: Billions of dollars of Google, Twitter, Facebook, Tesla, Netflix and Sony Pictures stock and stock warrants which is never reported to the FEC; Billions of dollars of Google, Twitter, Facebook, Tesla, Netflix and Sony Pictures search engine rigging and shadow-banning which is never reported to the FEC; Free rent; Male and female prostitutes; Cars; Dinners; Party Financing; Sports Event Tickets; Political campaign printing and mailing services "Donations"; Secret PAC Financing; Jobs in Corporations in Silicon Valley For The Family Members of Those Who Take Bribes And Those Who Take Bribes; "Consulting" contracts from McKinsey as fronted pay-off gigs; Overpriced "Speaking Engagements" which are really just pay-offs conduited for donors; Private jet rides and use of Government fuel depots (ie: Google handed out NASA jet fuel to staff); Real Estate; Fake mortgages; The use of Cayman, Boca Des Tores, Swiss and related money-laundering accounts; The use of HSBC, Wells Fargo, Goldman Sachs and Deutsche Bank money laundering accounts and covert stock accounts; Free spam and bulk mailing services owned by Silicons to every CA Senator

- Google has paid bribes, through its lobby fronts, to halt FBI, SEC, FEC and FTC investigations of Google Valley corporations; Use of high tech law firms such as Perkins Coie, Wilson Sonsini, MoFo, Covington & Burling, etc. to conduit bribes to officials; and other means now documented by us, The FBI, the FTC, The SEC, The FEC and journalists.

Google and Youtube are based on technology and business models that Google and YouTube stole from small inventors who had launched other companies that were up and operating before YouTube or Google even existed as business operations.

Google holds the record for the largest number of corporate sex scandals, abuses and sex trafficking charges.

There are only two kinds of people that work at Google: 1.) Cult indoctrinated naive kids with odd sexual quirks and 2.) divisive managers and executives who seek to exploit those eco-chambered employees for nefarious political and stock market manipulation purposes under the Scientology-like guise of "doing good things", when, in fact, they are engaged in horrific crimes against society. a to every CA Senator

- Google has paid bribes, through its lobby fronts, to halt FBI, SEC, FEC and FTC investigations of Google

Google has hired almost every technology law firm in order to "conflict them out" from ever working to sue Google. If Google rapes you, robs your patents or does anything awful, you won't be able to find a lawyer to help you.

Most Google executives in control of Google have been indoctrinated by family dynasties to believe that any crime is justified by a bigger cause. Most of those executives are men. The few women in control of departments are figure-heads.

Google bosses attend the same parties and business meetings in which they collude, co-lobby, rig markets and make anti-trust violating plans together.

Google is a private government with more money and power than most smaller nations. Google has more lobbyists bribing more politicians than any other company in America.

Jared Cohen and fashion show-horse Yasmin Green at Google had the job of over-throwing countries in the Middle East. They openly bragged about it. (<https://truthstreammedia.com/2013/06/02/googles-regime-change-agent-jared-cohen/>)

People that work at Google get paid \$260,000.00+ per year to lie, spy, manipulate politics, bribe politicians and engage in other crimes. For that kind of money, a person will do ANYTHING and rationalize it as "part of the higher cause".

The Project X investigation team is publicly quoted as stating: "...give the same number of lawyers as Google has, with the same level of skills and experience, the same discovery budget, legal expenses budget and expert witness budget, we ABSOLUTELY GUARANTEE that we can put Google staff and investors in federal prison and close Google, in bankruptcy...the Google Cartel has engaged in that much criminal activity..."

"Google is the largest financier of the Obama political campaign and exceeded FEC campaign spending limits by tens of billions of dollars. We can prove this in a jury trial, a Grand Jury hearing and a live Congressional hearing.

Google is the largest staffing source of the Obama Administration. We can prove this in a jury trial, a Grand Jury hearing and a live Congressional hearing.

The largest number of laws and policy decisions, benefiting a single company and its investors, went to: Google. We can prove this in a jury trial, a Grand Jury hearing and a live Congressional hearing.

Google, and its investor's are the single largest beneficiary of the Obama Administration. We can prove this in a jury trial, a Grand Jury hearing and a live Congressional hearing.

The Obama Administration only won the White House because Google and Facebook engaged in the largest digital media and search engine manipulation in human history. We can prove this in a jury trial, a Grand Jury hearing and a live Congressional hearing.

Google, and its investors, during the Obama Administration, had most of their competitors denied funding, grants, contracts and tax waivers while Google's investors GOT funding. We can prove this in a jury trial, a Grand Jury hearing and a live Congressional hearing and prove that Google coordinated anti-trust violations with senior Obama Administration White House staff...."a to every CA Senator

- Google has paid bribes, through its lobby fronts, to halt FBI, SEC, FEC and FTC investigations of Google

Google operates its staffing like a Scientology cult. They control their employees' lives, information, transportation, free time, entertainment and social life. A Google life is a glass-bubble of echo-chamber extremist, hyper-sex-kink, reinforcement.

Google Chrome is Tracking Your Every Move and Storing It, This is How to Stop It (thefreethoughtproject.com)

Google Chrome Has Become Surveillance Software, It's Time to Switch | (archive.fo)

Project Veritas has been lifting back the veil covering big tech companies and their nefarious activities following the 2016 election. They tried to play left-leaning-but-mostly-fair before the 2016 election, believing in their hearts that Hillary Clinton would be President without their concerted meddling. That didn't work out for them, so they are trying to prevent "another Trump situation" in 2020 by unabashedly purging, silencing, and censoring conservatives on platforms like Facebook, Google, Twitter, Pinterest, Instagram, and YouTube.

(Article by Michio Hasai republished from NOQReport.com)

The answers delivered today before Congress in response to questions by Representative Dan Crenshaw weren't the standard denials. They were politically manipulative answers designed to make it known they're doing what we've said they were doing all along, but they feel justified in doing it because "hate speech" must be stopped at all costs. Of course, what constitutes hate speech to the social justice warriors in big tech invariably circles around

conservative thought. There is no form of hate speech short of physical threats that can be attributed to progressives, at least not in the minds of the people who control big tech. If conservatives are aggressive, they're delivering hate speech. If progressives are aggressive, they're just being truthful. That's what big tech thinks.

This is the worst-case scenario for conservatives. Before, we could call them liars and cheats. Now, we have to fight them on an ideological level, and while we have the truth on our side, they have the technology. They have the eyeballs. They control what people see and don't see. And as such, they can no longer be trusted to deliver anything even remotely close to fair and balanced. They're unhinged from reality, but instead of coming back to reality once exposed, they're building a new reality around their ideologies.

Russia may arrest Google employees for running Google as a manipulative service containing hidden political insertions affecting the human subconsciousa to every CA Senator

- Google has paid bribes, through its lobby fronts, to halt FBI, SEC, FEC and FTC investigations of Googl

- Russian government will now arrest those who try to 'control minds' via mass web manipulation
- Google was created to push liberal leftist political messages on the subconscious
- Research exposes Google as insidious mind-control political skill
- No matter your political persuasion, it is unfair and manipulative for Google to control minds ANY political purposes

By Sophie Tanno For Mailonline

A Russian journalist has been accused of 'controlling minds' and 'affecting the human subconscious' after referencing George Orwell's 1984 in an article.

Mikhail Romanov, a reporter for the Yakutsk Vecherniy weekly, was writing a story on the alleged torture of an academic.

Police in Russia's republic of Sakha charged Romanov after they suspected him of trying to tap into the readers' sub-a to every CA Senator

- Google has paid bribes, through its lobby fronts, to halt FBI, SEC, FEC and FTC investigations of Googlconscience, Russian newspaper Kommersant reported.

A Russian journalist has been accused of 'controlling minds' and 'affecting the human subconscious' after referencing George Orwell's 1984 (pictured) in an article

Romanov's editor told the publication: 'This is a story about how anyone can be squashed by the government machine.

'It's also about how Big Brother is watching, reading all comments on online forums.'

This is understood to be the first time a journalist will be tried under Russia's new legislation punishing those who are perceived to have published information 'containing hidden insertions affecting the human subconscious. '

The case has been forwarded to a Yakutsk city court.

<https://www.therichest.com/expensive-lifestyle/entertainment/11-shocking-messages-hidden-in-your-childhood-cartoons/>

11 Shocking Messages Hidden In Your Childhood Cartoons. The creative animators and screenwriters often insert subliminal messages into their work, and the examples can sometimes be more than unusual. Sexism, political messages, conspiracy theories and hidden inappropriate jokes are found in numerous cartoons that we all grew up with.

What Are Subliminal Messages And Do They Work?

<https://allthatsinteresting.com/what-are-subliminal-messages>

Subliminal messages, on the other hand, are likewise real and similar to supraliminal messages except that the signal or stimulus is below our threshold of conscious awareness. In other words, you cannot consciously perceive a subliminal message, even if you search for it.

Google likely ‘thoroughly infiltrated’ by Chinese govt., expert warns

alex stamos, big tech, china, cybersecurity, facebook, google, internet, peter thiel, richard clarke, russia

(LifeSiteNews) – Tech billionaire Peter Thiel recently called on the federal government to investigate Google for potential infiltration by the Chinese government, and now security experts are saying his concerns are well-founded.

Thiel, one of President Donald Trump’s most high-profile gay supporters and an avowed critic of Silicon Valley, made the remarks at last weekend’s National Conservatism Conference, Axios reports. He called on the FBI and CIA to ask Google, “how many foreign intelligence agencies have infiltrated your Manhattan Project for AI”; “does Google’s senior management consider itself to have been thoroughly infiltrated by Chinese intelligence”; and whether this alleged infiltration is why the company works with China’s military but not America’s.

“I’m not sure quite how to put this, I would like them to be asked [these questions] in a not excessively gentle manner,” Thiel added.

Alex Stamos, a researcher with the Stanford Internet Observatory and former chief security officer at Facebook, said Tuesday it was “completely reasonable” to assume that both the Chinese and Russian governments have, in some form or another, already infiltrated not only Google but every top tech company:

Note that “subverted” is very different than planting professional spies in “The Americans” style. Each of the big companies employs thousands of employees with family members under the control of these countries, and a gov request might be simple and seem borderline reasonable.

I expect that there will be a major combined HUMINT/InfoSec attack against a major tech company revealed in the next couple of years, which will trigger the same awakening that Project Aurora did in 2009.

BTW, I don’t blame the foreign-born employees at all. They are just trying to make a good living doing interesting work. If MSS had *my* Mom I would do whatever they asked.

— Alex Stamos (@alexstamos) July 16, 2019a to every CA Senator

- Google has paid bribes, through its lobby fronts, to halt FBI, SEC, FEC and FTC investigations of Googl

Stamos predicted that the “next couple of years” would see the revelation of a “major combined HUMINT/InfoSec [human intelligence/information security] attack against a major tech company.”

He’s not the only one who advises that Thiel’s warnings be taken seriously. Richard Clarke, a former counterterrorism and cybersecurity advisor to both Democrat and Republican presidents, told CNBC Wednesday there was cause for concern.

“Here’s what I think is true: Google refused to work for the Pentagon on artificial intelligence,” Clarke said. “If you turn around and you work on artificial intelligence in China, and you don’t really know what they’re going to do with that, I think there’s an issue.”

The internet giant has denied working with the Chinese military, but opened an artificial intelligence center in Shanghai in 2017 despite the Communist regime’s strict speech and internet controls. On Tuesday, Google executive Karan Bhatia testified to the Senate Judiciary Committee that the company has terminated a controversial censored search engine it had been working on for China.

Clarke added that there was no meaningful distinction between Google working with Chinese companies and the Chinese government, given the level of state control in the country.

The specter of foreign influence on the tech industry further intensifies its ongoing controversies regarding political bias and censorship and violations of user privacy. Responding to Thiel's original comments, President Trump said Tuesday that his administration will "take a look" at the matter.

Google being biased is glaringly obvious even to a retard. Google forcing their employees to support them politically is a human rights violation.

The old railroad barons a hundred years ago were bad people, but nowhere near as abusive as Google is to the employees. The old railroad tycoons had their supporters too who thought strikers and protesters against their tyranny were awful people.

Silicon Valley just indoctrinated their followers and employees by brainwashing them first like any cult does. "Do no evil" was always a smarmy block of shit in pixels, no different than the purple dinosaur singing "I love you, you love me". The purple dinosaur never loved you one little bit. It was a lie, and parents had no business being such gullible suckers and allowing their children to be lied to by an actor in a fuzzy suit.

- link

forcing their employees to support them politically is a human rights violation.

> Civil and political rights are a class of rights that protect individuals' freedom from infringement by governments, social organizations, and private individuals. They ensure one's entitlement to participate in the civil and political life of the society and state without discrimination or repression.

From the first time they censored, shadow-banned people who opposed their way of viewing world, far-left, SJW, a to every CA Senator

- Google has paid bribes, through its lobby fronts, to halt FBI, SEC, FEC and FTC investigations of Google leftards has put cornerstone to civil rights movement 2.0, including people who are at the rock bottom and uppermost stairs of oppression. Clearly, this is infringement of rights by gov and private entities, which has been ignored from by the time it was apparent that such violation is well spread and not a unique case.

Those at silicon valley had no idea that their attempt to have conservative and alike voice removed/deplatformed is somehow resemble how "white" and "colored" segregation works; which is no brainer considering that they did not pay any attention to "obscure" details and only remember famous persons who was oppressed at that time.

So, don't spout only "Hate speech is Free speech". Tell them that when some peers mock center-right personalities by reenacting what happened prior to Civil Rights Act of 1968, throwing liquids to nigger who ignored the sign, isn't a good joke since political affiliation is covered in protected class in District of Columbia, IA, WV state, which put them as the white fellas and anyone who didn't entirely agree with them as the blacks in this reenactment.

If anyone reading this is somehow connected to parliament from local council to state, consider amending the laws to add political affiliation as one of class covered by "(unfounded)hate crimes". We won't need to see bike lock attacker and his copycat got sweetheart deals. Share this to Trump, since who doesn't love for shit and giggles watching leftards kvetching having cognitive dissonance episode explaining why adding another class would hurt other classes that already existed in last statue

Step 1: begin building foundational zeitgeist in pre-K through grade 12.

Step 2: con pupil into taking massive loan in order to obtain degree in advanced doctrine of zeitgeist.

Step 3: place pupil into career path to pay off massive loan.

Step 4: threaten to remove livelihood of career path if pupil questions established zeitgeist.

Regarding Google – Alphabet – Youtube and their Cartel, the issues, that the public and the news media have complained about include: producing child suicides and classroom shootings, racism, misogyny, child mental health threats, domestic spying, data harvesting, sex trafficking, election manipulation, tax evasion, Fusion GPS/Media Matters/ Black Cube hit jobs on competitors, censorship, contrived market monopolization, intellectual property theft, political bribery and many other social crimes!

-- An unusually large number of their staff have been arrested for, or charged with, sex crimes, including under-age trafficking.

---- They seem to be an organized crime entity protected by the politicians that they pay bribes to.

---- “Google is a sick corrupt criminal business run by sex trafficking perverts and sociopaths...” Say GOOGLE’S own inside employees, Divorce Court records of Google executives, 70+ State and Federal investigations and major news outlets.

---- Google spies on competitors and steals their technology.

--- Google – Alphabet – YouTube stock is owned by almost all of the California politicians and their families and that is why Google – Alphabet – YouTube is never regulated and always protected by them for their political and profiteering manipulations -

---- Google is a criminal RICO-violating monopoly – Google rigs the stock market with Flash-boy, Pump/Dump and Microblast SEC violating computer tricks -

---- Google bosses sexually abuse women and young boys ---- Google bosses control the NVCA financing cartel over start-ups -

---- Google boss Andy Rubin runs a sex slave farm according to his own family -

---- Google gets millions of dollars of taxpayer cash for spying on Americans inside the USA -

---- Google bribed it’s lawyer into position as head of the U.S. Patent office in order to have her protect Google – To rig insider stock trades, Google hides negative Tesla stories and pumps positive Tesla stories on “push days” -

----At Google: Kent Walker, Andy Rubin, Larry Page, Eric Schmidt, Sergy Brin, Jared Cohen, Yasmin Green, David Drummond and Ian Fette are so enmeshed in sex scandals, election manipulation, and White House bribes that it is hard to comprehend how they can get any legitimate work done.

---- There are hundreds of millions of people in America. The same 120 of them are all involved in operating the same crimes and corruption including: the Sony Pictures corruption; the Afghanistan rare earth mine scandals operated through The Energy Department political slush fund that involves the lithium battery cover-ups (headed by Elon Musk); the Big Tech Brotopia rape, sex trafficking, bribery, exclusionism, racism and misogyny issues they were taught at Stanford University;

---- The Facebook – Meta – Google – Alphabet – Netflix, et al, coordinated news manipulation and domestic spying that they engage in; the hiring of Fusion GPS – Black Cube – Gizmodo/Gawker assassins; the destruction of the housing market by their mass real estate manipulations; patent theft and industrial espionage; and the bribery of almost every politician all the way up to the Oval Office. ---- So, while the categories covered in this investigation may seem diverse.

They are connected through an enterprise of criminality and illicit, coordinated operations. We list, by name, the 120 most complicit individuals organizing these crimes, in the evidence documents already submitted to the FBI, FINCEN, DOJ, FTC, SEC, FEC, Congress, InterPol and other authorities. Digital financial tracking of those persons and all of their family members should be assumed to have been under way for some time. Wire-taps and device taps of those persons and all of their family members should be assumed to have been under way for some time. -

--- Twitter, Splunk, Google, Facebook, Netflix, YouTube and the Silicon Valley internet Cartel serve you custom manipulated content by automatically creating a covert digital dossier on you reflecting the content consumption preferences they have spied on about you. They continually evolve their dossier on you in order to steer you towards their ideology and their Democrat political party. At these companies, "data mining", "machine learning" and "AI" means computerized propaganda processing for certain political entities. They began hiring off-shore people (because they would work so cheap) but most of those people turned out to be Muslim. This created conflicts with the entire southern part of the United States (which is anti-Muslim) because those workers steered content to pro-Muslim positions.

Their computers scale and expand their tools with algorithmic software created by those politically and socially biased frat white boys that wrote the code. It is all biased as hell. They never hire blacks or women in system creation roles so everything these companies do only supports rich white soyboy snowflake type gamer thinking. ---- Because their Silicon Valley VC's told them to spy on billions of people, even for these web giants, it is impractical to store the entire dynamic history of a user's interaction features. They, thus, out of greed, use algorithms that selectively decay information in order to generalize users and populations. To them, you are just a generalized data point, like cattle on a ranch, to be harvested and fed upon by Silicon Valley.

You can try to sue Google for anti-trust, racketeering and other illicit deeds and Google will hire tens of millions of dollars of lawyers to blockade you from getting to a Jury Trial. The best thing you can do is assist the Federal Government, many State Attorney General's and citizen's groups with their lawsuits against The Google Cartel. a to every CA Senator

- Google has paid bribes, through its lobby fronts, to halt FBI, SEC, FEC and FTC investigations of Googl

Bloomberg, The Wall Street Journal, Stratfor, Wikileaks, FTC and SEC investigators and Kroll Intelligence says that Google runs the largest domestic spying operation in the world; larger than that of even Russia, China, Isreal or Iran. The Google Cartel has set up tho- USA - nds of companies in a spiderweb of surveillance, around the globe, and in space, that knows everything that everyone is thinking, doing or might do; and how to place media and events in front of them to subliminally steer people to do, or think, things that they might not otherwise have thought, done or voted for. Many of these operations were financed by IN-Q-TEL, which is the CIA and the NVCA combined. For example, A Google derivative called 'JigSaw' is run by Pro-Isreal, Anti-Arab operatives and steers data to certain interested parties. Larry Page is on multiple Arab secret police "kill lists", which means they should terminate him if the opportunity arises. Barack Obama had Eric Schmidt in the basement of his campaign HQ on election night, running computers, and has secretly claimed that "Google put him in office". Most of the key White House staff came from Google. Google claims to 'not be political', but it is the most political business Cartel on Earth. Google finances politicians that will do what Google tells them to do. It finances them with billions of dollars of internet manipulation, insider stock favors and by getting every staff member to give max limits to their camapign PACS.

Google and it's facades: Jigsaw; Alphabet; YouTube; Google LLC (core profit maker); XXVI Holdings Inc.; Google Ireland Holdings (Google LLC subsidiary, that realizes most international profits); Alphabet Capital US LLC; Alphabet Inc. - - USA - -Parent holding company since 2015. If you own stocks of Google/Alphabet, you own a piece of this company; Calico Life Sciences LLC - - USA - - Research and development company working on

keeping Eric Schmidt alive; Calico LLC (Calico Group LLC)- - USA - - Holding company of Calico Life Sciences LLC. Company is doing business as Calico Group LLC; Chronicle LLC - - USA - - Cybersecurity company that creates tools for businesses to spy on other companies; Google LLC - USA - - Core Google parent company originally named Google Inc. before Google transformed itself into Alphabet. This is where most of the profits come from; Loon Holdings Inc. - - USA - Holdings company - Loon LLC - - USA - - Company is working on providing Internet spying to rural and remote areas using high-altitude balloons; OB Technologies Inc. - - USA - Holdings company - OB Technology Holdings Inc.- - USA - -Holding company; Waymo Holding Inc.- USA - - Holding company for Waymo; Waymo LLC - USA - - - Company developed autonomous car technology and currently operates “testing” rides in several US states and already launched Waymo One service in Phoenix. Recently it announced that it will not make its own cars but rather focus on autonomous driving technology to spy on consumers; Wing Aviation LLC - US - Company developed drone delivering technology. It became independent from Project X in 2018. It is currently testing in Australia; X Development Holdings Inc.- USA - Holding company - X Development LLC - USA - -Called “Moonshot Factory.” The company says it is working on solving the world’s hardest problems using technology but seems to just be an outlet for Larry Page to steal and copy technologies with. Wing, Loom, and Waymo, which are now separate businesses, started as X projects; XXVI Holdings, Inc- USA - Layer between Alphabet Inc. and individual companies of Alphabet. The system is designed to lower regulatory or disclosure requirements, tax evasion, money laundering and for hiding political payola. The name of the company is referring to the Roman numeral of 26, the number of letters in the alphabet.

Google LLC has over 200 direct and indirect subsidiaries in order to limit where lawsuits and federal actions can go. The Mafia uses this same approach. Almost everything Google owns is involved in acquiring, and analyzing your personal and business data for the Google surveillance computers. It is almost impossible to find a Google group that does not 'feed the data beast'. Larry Page and Eric Schmidt believe that no citizen is intelligent enough to live in the world and that they must covertly 'guide' populations to their own ideology and "Master Plan". The rest of the Google Cartel for global domination includes:

DeepMind Technologies Limited GBR Artificial intelligence/Machine Learning

DoubleClick Holding Corp.- USA - Online advertising company that Google acquired a decade ago. It recently announced that it is rebranding its advertising products, and it will no longer use DoubleClick brand.

Dropcam, Inc.- USA - Home monitoring. Company is known for its Wi-Fi video streaming cameras. Was acquired by Nest soon after Nest was acquired by Google. This acquisition is often given as an example of how an acquisition can go wrong.

Google Asia Pacific Pte. Ltd SGP Singapore company that channels revenues (royalties) from Asia/Pacific region (through the Netherlands) to Ireland Holdings Unlimited. It has a similar purpose to Google Ireland Limited in Europe.

Google Bermuda Limited BMU Hard to say, where in the company hierarchy this sits. Might be the parent company of Google Bermuda Unlimited

Google Dialer Inc.- USA - Not sure exactly but connected to Google Fiber and Google Voice.

Google Fiber Inc.- USA - Internet Access Provider

Google Fiber North America Inc.- USA - Internet Access Provider

Google International LLC - USA - Holdings company for Google’s subsidiaries in individual countries outside the US.

Google Ireland Holdings Unlimited Comp. - IRL - This is a very “famous” Google subsidiary that is incorporated in Ireland but managed and controlled in Bermuda. Google at least up to recently used this subsidiary as part of the “Double Irish” with “Dutch Sandwich” tax optimization scheme that is very common among large international companies. The company serves partially as a holding company for some international businesses but mainly as a holder of Google intellectual property that it further licensed to other Google companies for a fee.

Google Ireland Limited - IRL - Google Services Provider for Europe and Switzerland. It books a lot of revenue, but makes very small profits, since it pays a lot to Google Netherlands BV for Google’s intellectual property. Google Netherlands BV then channels this revenue to Google Ireland Unlimited that is incorporated in Ireland but domiciled in Bermuda.

Google Netherlands Holdings B.V.NLD This company is used as a middle layer between Google Ireland Limited and Google Ireland Holdings. This allows Alphabet to pay very low taxes from its European operations thanks to a tax optimization scheme called “Double Irish” with “Dutch Sandwich.” This loophole was very popular among international technology companies and was already fixed for new arrangements.

Google North America Inc.- USA - Provider of Google FI service (wireless network)

Google Payment Corp.- USA - Google’s companies that handle money transfers and peer-to-peer transactions. In US payments are processed by Google Payment Corp. (GPC), which has the appropriate license for transmitting money and for peer-to-peer transactions in US.

Google Payment Ireland Limited - IRL - Providing Google Payment Services for whole European Union (except UK) as a replacement for

Google Payment UK. UK subsidiary will keep providing services for UK.

Google Voice Inc.- USA - Provider of Google Voice service.

GU Holdings Inc.- USA - Through this company, Google is building subsea cable infrastructure. For example, in 2019, they finished the connection between Los Angeles and Chile.

Nest Labs (Europe) Limited - IRL - “virtual subsidiary” of Nest Labs. Owned by Google Ireland Holdings Unlimited, so not directly under

Nest Labs

Nest Labs Inc.- USA - Company flagship product and company’s first offering before it was acquired by Google was Nest Learning Thermostat. Nest operated independently of Google from 2015 to 2018. However, in 2018, Nest was merged into Google’s home-devices. (Still not sure if it was only organizational merger or also legal merger)

Nest Labs Singapore Pte. Ltd.SGPvirtual “subsidiary” of Nest Labs. Owned by Google Ireland Holdings Unlimited.

Verily Life Sciences LLC - USA - -Research company developing tools that focus on health data and how they can help with timely decision-making and effective interventions. (formerly Google Live Sciences)

Waze Mobile Ltd.ISRGPS navigation software. Waze describes its app as a community-driven GPS navigation app, which is free to download and use. Waze is owned directly by Google LLC.

YouTube, LLC - USA - -Youtube is a very successful video sharing and hosting service that Google acquired in 2006. This acquisition became hugely successful for Google. But not everybody was persuaded that the acquisition made sense at the time.

Alphabet Holding LLC is a holding company that is a direct subsidiary of XXVI Holdings, Inc. It is focused mainly on managing Google/Alphabet investments. Both Alphabet investment managing firms CapitalG and GV are housed under this holding. CapitalG and GV invest in other companies, but since those are usually small stakes below 50%, these companies are not part of Alphabet Group. If you want to know more about what companies do they invest in, both CapitalG and GV have a helpful list of their investments on their webpages.

CapitalG 2013 GP LLC - USA - - - Fund Manager

CapitalG 2013 LP- USA - Fund

CapitalG 2014 GP LLC - USA - - Fund Manager

CapitalG 2014 LP- USA - Fund

CapitalG 2015 GP LLC - USA - - Fund Manager

CapitalG 2015 LP- USA - Fund

CapitalG GP II LLC - USA - - Fund

CapitalG GP LLC - USA - - Fund Manager

CapitalG II LP- USA - Fund

CAPITALG INTERNATIONAL LLC - USA - -

CapitalG LP- USA - Fund

CapitalG Management Company LLC - USA - - CapitalG Core Management Company

CapitalG Rise LLC - USA - -

Google Capital 2016 GP, L.L.C.- USA - Used to be under Google Inc.

GV UK Management Company LimitedGBRSmall UK based branch of “GV Management” (3 employees in 2018)

Sidewalk Labs LLC - USA - -Urban innovation organization whose goal is to improve urban infrastructure through technological solutions and tackle challenges of urban growth such as cost of living, efficient transportation, and energy - USA - ge.

Sidewalk Labs Management Company LLC - USA - -Urban innovation

Before 2015, there was no Alphabet, and Google Inc. was a publicly-traded company that you could directly own by buying its shares. All subsidiaries were subsidiaries to Google Inc. In 2015 Google transformed into Alphabet, where Alphabet Inc became the top parent company that was publicly traded. Google Inc. shareholders became overnight Alphabet Inc shareholders.

In reality, many “Other Bets” businesses still stayed as subsidiaries of Google LLC even after the 2015 transformation, and it was only recently when the whole transformation was finalized. Finally, “Other Bets” companies were moved from outside Google LLC.

The reasons for this complex transformation were described by Google management as an “increase in transparency and oversight,” That would be achieved by putting larger projects at the same level as Google LLC with their separate management, reporting directly to Alphabet Inc management. The proclaimed increase in transparency was only internal for Google management. Transparency for investors did not increase. Another reason behind the transformation was obviously limiting risk. By separating Google into different companies, each one of them is independent of each other. If someone gets arrested in one company, the others would be protected from it.

Double Irish & Dutch Sandwich is a very popular and publicized arrangement through which mostly US companies were optimizing their taxes from European businesses. It involved two Irish and one Dutch company. Wikipedia has a nice article on both Double Irish and Dutch Sandwich, explaining how it works. In Alphabet/Google case. Companies involved in Double Irish with Dutch Sandwich arrangement are assumed to be:

Google Ireland Holding Unlimited (Irish company with Bermuda domicile)

Google Netherlands Holdings B.V. (Dutch “sandwich” company that serves as an intermediary between two Ireland companies)

Google Ireland Limited (Ireland company that is directly booking revenue from European business, and sends most of the revenue to the Netherlands as royalties for leasing Google’s intellectual property.

THE HOUSING CRISIS WAS CREATED BY CORPORATE LOBBYISTS

ONE SOLUTION: <https://www.pressdemocrat.com/article/news/california-legislators-want-to-help-you-buy-a-house-with-down-payment-sha/>

Why the State can't build anything: Four towns and four stories frame housing crunch

Three economists go deer hunting. They travel all day until they find a deer standing in the middle of the prairie. The first shoots wide right, the second shoots wide left and the third exclaims, "I think we finally have it!"

Economics, by definition, seeks to predict how humans behave when faced with limited resources. To achieve these objectives, economists use complicated mathematical models to predict economic outcomes. This concludes that economic forecasts are flawed because their models' methodologies do not account for human individuality and use math to predict future outcomes. This results in faulty forecasts because math relies on deductive reasoning: making a conclusion dependent on their premises.

Prakash Loungani of the International Monetary Fund concluded economists failed to predict 148 out of 150 recessions. According to the Financial Times, the IMF accurately predicted five economic contractions occurring in October for the past 27 years. However, the IMF's predictions were off and failed to forecast 81% of recessions that occurred that month.

Forecasting failure is not quarantined to the IMF. Even Nobel Prize-winning economists are not error-proof. For example, in 1998, Nobel Prize-winning economist Paul Krugman predicted the internet would have no greater impact than the fax machine. This prediction did not happen, and the internet revolutionized the way information is dispersed.

SILICON VALLEY'S TRILLION DOLLAR CULTURE OF BRIBERY; CENSORSHIP; SEX TRAFFICKING; ELECTION MANIPULATION; PAYOLA TO CITY, STATE, COUNTY AND FEDERAL OFFICIALS; LUDICROUS EXCESS AND REVOLVING DOOR PAY-OFFS TO GOVERNMENT INSIDERS HAS DESTROYED HOUSING OPPORTUNITIES FOR THE POOR AND MIDDLE CLASS BY NEGATING HUMAN RIGHTS OVER OLIGARCH LUXURIES!

---- In California, The government refuses to fund the CALHOME fund, the only fund that helps normal people get a home. California politi-bosses give all the money to their big developer friends

---- The Silicon Valley solution to "The Housing Crisis" is all talk, window dressing, dog-and-pony, un-responded to white papers and absolutely no meaningful action.

---- California has the worst housing crisis in HISTORY!

---- California citizens must DEMAND that the STATE fund the CALHOME PROGRAM for at least One Billion Dollars. It is the ONLY program that helps families directly and it has been blockaded by lobbyists!

---- California politicians make lots of WINDOW DRESSING, PR statements about helping individuals but then they only give the government money to developers who financed the politicians campaigns!

---- ONLY BIG DEVELOPMENT COMPANIES THAT PAYOFF GOVERNORS EVER GET ANY FEDERAL FUNDS - CITIZENS GET NOTHING!!!!

---- Nobody can get government support to build a home because in California it would compete with the developers who financed the politicians campaigns!

---- Billions of dollars were sent to California, by the feds, to help individual citizens. The money came from the citizens own pockets via taxes. 99% of that money was given to developers who financed the politicians campaigns and none of it went to citizens to build homes.

---- Investigators traced the federal funds back to the family bank accounts and stock market accounts of the politicians that control California!

---- – Fair Housing Advocates have identified over 200,000 people that already have lifetime mortgage payment funds IN THEIR HANDS but The State Of California blockades these people from building homes...

EVEN THOUGH CALIFORNIA SAYS “THE HOUSING CRISIS IS BECAUSE WE HAVE NOT GOT ENOUGH HOMES!!!” HUD says this is illegal but HUD has yet to sue California to stop the blockades.

---- All of the land on the Stanford Campus could solve all of Silicon Valley’s housing crisis. The State of California should take all the land away from criminally corrupt Stanford University and build housing for average income on it. Corrupt Stanford University (now almost entirely based on bribes by rich oligarchs who engage in human rights abuses) doesn’t “deserve” anything any more.

---- The State politicians will do anything to stop those 200,000 people, with mortgage cash in hand, from building their homes because developers who financed the politicians campaigns will shit their pants if their political quid pro quo payola conduits are cut off.

---- Part of the housing crisis is because California politicians invited half of South America to move in in hopes of rigging the voter rolls. Most of the people that showed up are actually construction labor people, but California won’t let them build homes because they are not in a union and because they compete with developers who financed the politicians campaigns. The irony is mind-boggling! ---- In California the laws, and ‘rules’ have been staged to make it impossible for a single family to build a home. Why are the laws and rules staged that way?: To protect developers who financed the politicians campaigns!

---- REAL ESTATE DEVELOPERS, OLIGARCHS AND REAL ESTATE BANKS PAY BRIBES TO COUNTY OFFICIALS TO KEEP AFFORDABLE HOUSING FROM GETTING BUILT BECAUSE IT COMPETES WITH THEIR SCHEMES!

---- BIG BANKS, BIG BUILDING DEVELOPERS AND TECH BILLIONAIRES ARE BRIBING COUNTY OFFICIALS TO STOP THEM FROM DOING ANYTHING!

----S .F. Chronicle: Broken Homes, By Joaquin Palomino and Trisha Thadani / San Francisco spends millions of dollars to shelter its most vulnerable residents in dilapidated hotels. With little oversight or support, the results are disastrous.

---- San Jose Spotlight: Santa Clara County faces silver tsunami of homelessness, By Tran Nguyen / Brenda Nichols was among 145 homeless seniors who died in Santa Clara County between December 2020 and November 2021—a record high number as the region witnessed 250 homeless deaths over the same period.

---- Is this more smoke-and-mirrors WINDOW DRESSING: Rural Partners Network to Empower Rural Communities to Access Federal Resources, / The Rural Partners Network (RPN) is a new whole-of-government effort led by the USDA to transform the way federal agencies partner with rural places to create economic opportunity.

---- GlobeSt.: The Share of Millennials Owning Homes Is Dwindling, By Paul Bergeron // This generation's homeownership rate doesn't match up with Gen X or Baby Boomers. Big Tech companies should be limited from paying any worker over \$50,000.00 per year.

---- Earth Day: 52 Years of Individual Environmental Action Hasn't Fixed It And Proven That Nothing You Do Will Help, By Melanie Curry // Earth Day was born at a time when teach-ins and radical protests were forcing changes in the status quo...But over time – 52 years being a lot of that – corporate sponsorship and greenwashing shifted the focus of Earth Day to individual responsibility and to volunteerism.

---- BATHROOMS IN CALIFORNIA COST AS MUCH AS A TWO BEDROOM HOUSE COSTS IN THE REST OF AMERICA!

They are connected through an enterprise of criminality and illicit, coordinated operations.

We list, by name, the 120 most complicit individuals organizing these crimes, in the evidence documents already submitted to the FBI, FINCEN, DOJ, FTC, SEC, FEC, Congress, InterPol and other authorities. Digital financial tracking of those persons and all of their family members should be assumed to have been under way for some time. Wire-taps and device taps of those persons and all of their family members should be assumed to have been under way for some time.

Many people don't know that their new home can be more affordable than they might think!

– California has the worst housing crisis in HISTORY! Call Sacramento and insist that the State fund the CALHOME fund and DOUBLE the budget for CALHOME. It is the ONLY program that can directly help individual families! Habitat for Humanity, myself, my peers and the public may have gotten CALHOME restarted. Take a look at this: CalHome-and-Serna-Homeownership-Public-Comment-Notice-Memo

– Many politicians make lots of WINDOW DRESSING, PR statements about helping individuals but then only give the government money to developers who financed their politicians campaigns!

– We contacted EVERY COUNTY in California and got different info from each one. We found there was no single aligned strategy.

– <https://www.calhfa.ca.gov/homeownership/programs/ForgivableLoan.pdf> CAN GET YOU A HOUSE NOW!

– Nobody can get government support to build a home because it would compete with the developers who financed the dirty politicians campaigns!

– Billions of dollars were sent to California, by the feds, to help individual citizens. The money came from the citizens own pockets. 99% of that money was given to developers who financed the politicians campaigns and none of it went to citizens to build homes.

– Investigators traced the federal funds back to the family bank accounts and stock market accounts of the politicians that control California!

– Fair Housing Advocates have identified over 200,000 people that already have lifetime mortgage payment funds HUD housing funds IN THEIR HANDS but The State Of California blockades these people from building homes... EVEN THOUGH CALIFORNIA SAYS “THE HOUSING CRISIS IS BECAUSE WE HAVE NOT GOT ENOUGH HOMES!!!” HUD says this is illegal but HUD has yet to sue California to stop the blockades.

See: HUD S8 HOME OWNERSHIP PROGRAM

– All of the land on the Stanford Campus could solve all of Silicon Valley’s housing crisis. The State of California should take all the land away from criminally corrupt Stanford University and build housing for average income on it. Corrupt Stanford University (now almost entirely based on bribes) doesn’t “deserve” anything any more.

– The State politicians will do anything to stop those 200K people, with mortgage cash, from building their homes because developers who financed the politicians campaigns will poop their pants if their payola conduits are cut off. Are you stuck in this loop? Then take a look at:

Could_your_clients_benefit_from_USDAs_Rehab_Repair_Guaranteed_Loan_Feature

– Part of the housing crisis is because California politicians invited half of South America to move in in hopes of rigging the voter rolls. Most of the people that showed up are actually construction labor people, but California won’t let them build homes because they are not in a union and because they compete with developers who financed the politicians campaigns. The irony is mind-boggling!

– We called EVERY housing counseling agency, every PHA, every county housing agency and California Housing manager and everyone else. They all said that there is “NO WAY” to build a home in California because the laws, and ‘rules’ have been staged to make it impossible. Why are the laws and rules staged that way?: To protect developers who financed the politicians campaigns!

– What happens in California generally spreads across America. If you want it like this in your town. DO NOTHING. If you want this fixed: FIRE YOUR POLITICIANS IN THE NEXT ELECTION!

The \$200,000.00 Home! Want One? HERE IS THE OFFER!

Video Player

00:00

05:22

OPTIONAL LINK TO VIDEO: <https://scottredmond.us/wp-content/uploads/2022/04/HOME4.m4v>

Certain people don’t want you to know that you can build a home in 2022, ANYWHERE in America, for \$200,000.00 (or less). In the Bay Area and New York, they want you to think that a home should cost you three million dollars+.

Here is our Team’s challenge to your county:

We will build a home in your county for \$200,000.00 and post all of the HOW TO instructions online, in your county, and give weekend classes in the DIY. Then your county, or anybody in your county, can copy it, over and over, until the housing crisis in your county is solved!

In California, New York and many other places, counties have recently spent over \$900,000.00, PER UNIT!!!, to build a single studio apartment for their citizens. San Francisco spends over \$70,000.00 per year to spray a white square on the ground per homeless tent. You can rent 3 whole Section 8 apartments in Tracy, California for that much money.

How about a single-family two bedroom home for \$200,000.00? Many people can qualify to receive \$1600.00 per month from HUD to help pay the mortgage on their home! You can receive this money under the national HUD Home Ownership Voucher HCV Homeownership Regulations (24 CFR Part 982, Subpart M) – HCV homeownership regulations are found in Sections 982.625-982.643 per the Statement of Homeowner Obligations. A woman named Marcia Fudge is in charge of getting these funds to every single American that qualifies. She is the head of HUD in Washington, DC. This is her #1 job. Give her a shout. There are many other programs like this, ask her to double-up on the HUD Home Ownership programs... now, more than ever! Counties have HUNDREDS of acres of empty, or unused, land. The housing crisis is in such an emergency state that shocking new approaches must be considered.

With a little ‘sweat equity’ and some creative land use, YOU can get your \$200K house!

Better?

San Francisco County, Alameda County, San Mateo County, Marin County, Westchester County...all counties... let's talk!

We are targeting the California Coast for our next showcase home that anybody can copy... stay tuned as we try to find a County official who will be the San Mateo County evangelist. We will blog the progress as we slog through the process...

Special interest groups and officials on-the-take hate this project because they don't get to skim payola off it, but 330 MILLION American citizens love this project!

If you are the head of a county housing agency give us a shout. If you are a citizen who wants one of these homes, give the head of your county housing agency a shout and have them call us! We have been on national TV and media doing this previously.

Freddie Mae and Freddie Mac recently announced that First-time buyers need as little as 3% down and can use rent payments to qualify for an ADU construction loan.

It just got a lot easier to qualify for a mortgage covering the construction costs of an accessory dwelling unit, commonly called casitas, in-law units and granny flats.

Freddie Mac announced ADU rental income on a single-unit primary residence can be used to qualify for a mortgage. Previously, rental income could be used only by disabled borrowers to qualify for loans to purchase, renovate or refinance ADUs for their caregivers.

Additionally, Freddie expanded its mortgage menu to provide purchase or refinance loans for one ADU on 2- and 3-unit properties. Previously, it was single-unit ADU financing only.

The big opportunity is a combination loan covering the purchase of a home and the construction of an ADU.

Freddie's Choice Renovation Mortgage (cs-272_choicerenovation_fact_sheet_final2) allows “first-time” buyers who haven't owned a home in the past three years to put as little as 3% down and build an ADU. Repeat buyers who have owned a property within three years need to put 5% down.

The down payment is based upon the completed value of the property or the sales price plus the cost of the project, whichever is less.

For example, say the purchase price is \$475,000 and ADU construction costs \$150,000. That's a total cost of \$625,000. If the appraised value of the home and the completed ADU is projected to be \$700,000, the down

payment would be based on the lower value of \$625,000 – or \$18,750 for a first-time buyer or \$31,250 for a repeat buyer.

There are no income restrictions. And being able to consider the ADU rents may mean the difference between a loan denial and qualifying in high-cost California. ADU rents cannot exceed 30% of your total qualifying income.

Choice Renovation can also be used to refinance your existing first mortgage and pay off short-term debt used for ADU construction.

ADU construction costs run about \$200 per square foot in Orange and San Diego counties, compared with \$329 per square foot in the Bay Area, according to Dan Dunmoyer, president and CEO of the California Building Industry Association. The average ADU size is 700-750 square feet, and the average rent is \$2,000 to \$2,800 a month.

Let's say you added a 725 square foot ADU at \$200 per square foot, for a total cost of \$145,000. Assuming you get a 30-year mortgage at 5%, the payment would be about \$925 per month, including taxes and insurance. If the rent totals \$2,400 per month, you just made yourself a handsome \$1,475 per month. Can you say smart investment?

It got a lot easier to add ADUs in California in 2020 after state lawmakers removed lots of red tape and timeline restrictions.

ADUs will help the California rental property shortage.

Figures from state and industry officials show the number of new ADUs jumped from no more than 9,000 in 2018 to more than 19,000 in 2021. Seventy thousand U.S. homes sold in 2019 had an ADU, up from 8,000 in 2000, according to a 2020 Freddie Mac report.

“The growth of accessory dwelling units (ADUs) in the United States has been dramatic, particularly in high-cost areas seeing significant population growth,” the report said. ADU demand is highest in California, Florida, Texas and Georgia.

The devil is in the details.

For example, Freddie financing requires ADUs to have a separate entrance, a kitchen and a bathroom.

The borrower can occupy the ADU and rent out the home. Attached or detached ADUs are acceptable. Even a garage conversion works.

Besides stick-built ADUs, there are manufactured ADUs that are trucked in and hoisted into place with a crane. Even some homebuilders are adding ADUs as an option, Dunmoyer said.

When picking a contractor, be prudent, cautious and careful. Take the time to tour their completed projects. Thoroughly interview references and check licensing. Finding a competent, dependable and reasonably priced professional is key.

Freddie Mac rate news: The 30-year fixed rate averaged 5.23%, 14 basis points higher than last week. The 15-year fixed rate averaged 4.38%, 6 basis points higher than last week. The 5-year ARM averaged 4.12%, 8 basis points higher than last week.

The Mortgage Bankers Association reported a 6.5% decrease in mortgage application volume from the previous week.

Bottom line: Assuming a borrower gets the average 30-year fixed rate on a conforming \$647,200 loan, last year's payment was \$785 less than this week's payment of \$3,510.

What I see: Locally, well-qualified borrowers can get the following fixed-rate mortgages without points: A 30-year FHA at 4.625%, a 15-year conventional at 4.375%, a 30-year conventional at 5.25%, a 15-year conventional high-balance (\$647,201 to \$970,800) at 5.25%, a 30-year conventional high-balance at 5.625% and a 30-year purchase jumbo at 4.75%.

ONWARD AND UPWARD.

The “whiners” like to put out a lot of hot-air about how this is “impossible”. Just to head them off at the pass, here is a very rudimentary overview of one of a hundred ways to validate that \$200K number:

Building a House For Under \$200k:

Per UPGRADED, Home prices in America are rising every year thanks to greed, political payola and profiteering. The median price doesn't seem to show any sign of it slowing down. Just about any homeowner would build a house for under \$200k if the market made it easier. Luckily, you can build a house for under \$200k, so follow along as we detail one of many easy ways to do so. It's a HOUSING CRISIS in America. Now is the time to break the rules and avoid breaking your bank account!

Designing and building your dream home is an exciting prospect. It can seem unattainable and overly expensive to many people, but it does not need to be. Developers and crooked politicians want you to think you can't do it... **BUT YOU CAN!**

You can build your dream home for under \$200k.

The average selling price for houses today is \$300k. If you carefully choose your floor plans, square footage, location, materials, and the property it sits on, you can build a house for under \$200k that will save you money.

If you want to build a house for under \$200k, there are several things that you need to do, such as:

- Minimize the square footage
- Choose cheap materials
- Keep it to one story
- Build simple

More than anything, the biggest expense in building a home is the labor and materials. If you choose a lot that is already developed, that can save you a fortune that goes towards materials and labor.

Let's take a close look at everything that goes into building a house on a budget.

Do You Need to Hire an Architect or a Builder?

Get free, zero-commitment quotes from pro contractors near you.

Where to Begin

What region are you located in? Depending on where you are located, building a home can vary greatly in cost. That comes down to everything from lot costs, local regulations, and the average cost of square foot in the effected region.

The location of the lot that you are trying to build on plays a key role as well. If you want the costs of your new home to be under \$200k once all is said and done, choose a developed lot.

More often than not, developed lots are already in prime condition for a house to be raised. That includes easy plumbing set up, gaslines and ease of access for the workers building the house.

If you are dead set on building your new house on an undeveloped lot, it will be extremely hard to stay on budget due to added cost. That is because you will be paying for labor for a longer period of time. Undeveloped lots require excavation which can cost up \$4,000 for small lots.

Floor Plan Pricing for Your 200K Budget

Building a home will cost at least \$153 per square foot, which means you'll be right under the 200K budget. This means you can expect to build a home that's around 1,200 square feet.

The Design Phase & Cost Per Square Foot

How many square feet do you want your new house to be? The average cost per square foot differs depending on where you are located. On average, the cost per square foot is \$153 when building a home in the United States.

With that number in mind, consider how much of your budget you want to go towards square footage. If you wanted to build a 1,200 square foot at \$153 per foot, for example, it would cost \$183,600. It could be more or less varying state to state.

That would leave you room in your budget to spend money on furnishing and new appliances. However, going with 1,000 square feet instead leaves you with more room to put the remainder of your budget towards settling into your new home.

Going down from 1,200 to 1000 square feet could trim around \$30,000 on building your house.

Square footage also affects the cost of the design. On average, architects' cost \$1.50 per square foot in the design phase. If your new house you are planning is going to be 1,200 square feet, that will cost you at least \$1800.

Building Cost Per Square Foot (By State)

State

\$112.98 (See Why The Californians move here?)

Virginia

\$133.94

Choosing the Right Materials

Considering that labor and materials account for the majority of the costs of building a new house, it is important to choose wisely. There are several cheap materials that are also durable and aesthetically-pleasing, including:

- Reclaimed wood
- Prefabricated materials
- Brick
- Bamboo
- Concrete

Not only are those materials big money-savers, but they also each have a distinct look. More and more, homeowners have been building houses built with concrete. It creates a modern look while also saving money.

Prefabricated materials may just be the biggest way to build a new house for under \$200k. Modular homes are wildly popular today, and it is because of how cost-effective it is.

A modular home is one that is mostly constructed section by section at a different location then brought in and installed onsite. There are many possibilities for style and layout without modular homes and it does not only limit you to one story.

You can even have a modular home built atop a basement if you want to add value to your new house. Besides modular homes, choosing materials like reclaimed wood, classic brick or bamboo can save you as well.

Building a Garage

Do you want your new house to have a garage? Building a garage costs roughly \$49 per square foot but can vary based on materials. A one car garage can cost up to \$14,200.

If you want a two-car garage, however, the least you will spend is likely \$19,600, with \$28,200 or more being the highest. To be cost-effective, you could choose to build a one car garage and if there is room for a driveway or street parking, park the other car or cars there.

Spending up to \$28,200 or more for a two-car garage is more than 10% of your budget and may not be worth it.

Every Choice Counts

If you want to stay on budget, stay simple with all of your design choices. Each decision adds to the cost, whether it be those extra square feet or the roof that you choose. The roof alone will cost you roughly \$7,200 minimum on average, if not more.

Every single choice in building a house adds to the price tag, right down to the foundation. There are only a few options for foundations, but the cheapest one is the classic slab foundation.

Typically, you only spend \$5-\$7 per square foot for a slab foundation. If you want a basement, however, you will need a costly full basement foundation. A basement foundation costs anywhere from \$10 to \$25 per square foot.

Basements add cost besides just the foundation, such as plumbing and electrical work, so you should consider whether or not you need a basement for the budget. Basements can cost up to \$30,000 or more when all the costs are totaled.

Be Frugal With Finishes

Your new house can look great without having to overspend. One of the big costs that comes late in the process of building a house is the finishes.

While marble and granite tops do look great, they are also extremely expensive. Marble alone costs between \$125 and \$200 per square foot and depending on the size of the kitchen, that can get quite pricey.

You would be spending at least \$1,000 and \$10,000 depending on the size of the kitchen with premium materials like marble or granite.

A great alternative to granite that can save you a fortune is tile. Tile costs between \$5 and \$30 and has a classic yet modern look. You are usually not going to spend more than \$3,000 for tile countertops including the cost of labor.

Another great countertop finish option that is inexpensive is laminate. Laminate countertops are a little bit more expensive than tile, coming in at \$25-\$50 per square foot, but they are still a great deal.

The best thing about laminate besides the price is that there are many designs to choose from. Laminate countertops can look just as great as granite or marble countertops.

Installation and materials together won't cost more than \$2,000, on average, and your counters will look gorgeous.

Plumbing Costs

Plumbing is one of the bigger costs in building a house. If you want to build your house for under \$200k, consider the plumbing when choosing your square footage. The bigger the house and the more sinks, bathrooms, and showers it has, the more costly the plumbing will be.

Plumbers and contractors charge you per sink, toilet, water heater, shower, washer/dryer, bathtub, and water line. Typically, you will have to spend between \$600 and \$1,600 per sink, toilet, shower, etc., etc. Keep that in mind when you are deciding on floorplans.

The type of piping that you choose for your house's plumbing affects the total cost. Copper is the most common and popular type of pipes for plumbing. That is because copper is durable and long lasting and can cost up to \$5 per square foot.

When compared to PEX pipes that cost \$1.50 per square foot on the low end, copper is not an ideal plumbing material to stay on budget. The cost of PEX plumbing is rarely more than \$6,000 at the high end.

Copper piping, on the other hand, costs between \$8,000 and \$10,000. PVC is another cheap alternative to copper that costs \$1.25 per square foot on average and can save you up to \$5,000 when compared to copper.

Flooring Costs

Floors, much like countertops, are only as expensive as the materials that you choose. There are several budget floor materials that can keep your building costs under \$200k, such as:

- Vinyl sheets
- Vinyl planks
- Oak wood
- Laminate

Laminate flooring, for example, only costs between \$2 and \$8 per square foot. If the house you are building is 1000 square feet and you wanted laminate floors throughout it all, materials would cost no more than \$8,000 at the most, excluding labor.

One of the cheapest flooring material options available is vinyl sheet flooring. You can spend between .50 cents and \$2.00 per square foot for vinyl sheet flooring. It is a cheaper alternative to vinyl plank flooring which costs roughly \$5.00 per square foot.

Vinyl plank flooring may cost more than vinyl sheet, but it is still much less than the \$10 to \$20 per square foot that marble would cost.

While it may seem expensive because of how great they look, oak wood flooring is a great budget option when building a house. Regular oak wood floors cost \$2 to \$6 per square foot. If you want to go with a different, brighter style, you could go with white oak floors that cost \$5 to \$8 per square foot.

Painting Costs

When your house is finally built, it is time to get it painted. Interior and exterior painting costs are different. If your new house is 1,000 square feet, for example, painting the exterior could cost between \$1,000 and \$3,000.

To paint the interiors of the same 1,000 square foot house could cost between \$1,500 and \$3,000. Prices vary depending on labor, type of paint and how much is being painted. Depending on the materials that you chose, the exterior may not need to be painted.

If you went with classic brick, stone, or prefabricated materials, you probably do not need to paint the outside at all. The interior is more expensive than the exterior because generally there are more surfaces to be painted inside.

Because of that, the painter or painters have to spend much more time priming and preparing the walls for the paint. The paint itself is fairly inexpensive ranging from \$25 to \$70 per gallon roughly. In general, two gallons of paint is considered enough to cover 800 square feet.

If your house is 1,000 square feet, that means you would be between \$50 and \$140 for the necessary paint. That is not as expensive as the labor which makes up for \$1,200-\$2,860 cost of having a 1000 square foot interior painted.

Electric Costs

Electrical work is a huge expense in building a house. Generally, workers will charge you between \$40 and \$100 per hour/100 square feet. That is before the costs of materials, parts, wiring, or individual fixtures, such as lights.

Outlets and lighting fixtures cost up to \$150 to have installed by an electrician. To have a 1000 square foot house wired can cost you between \$2,000 and \$6,000. If the house has a garage, it will be an additional \$1,000 to \$4,000 to get it wired as well.

What Did We Learn?

Building a house for under \$200k is easier than it seems. All that you have to do is carefully consider the square footage and materials.

Cutting back on unnecessary frills like granite or marble and choosing to build on a developed lot can save you a fortune.

You can truly build a beautiful home for \$200k with a little bit of ingenuity and careful planning.

So... you, with the same amount of money, can either build a poop-hole:

OR YOU COULD HAVE A HOME DESIGNED BY AN ARCHITECT LIKE ONE OF THESE:

Do you think this idea is a 'nice option'? It's not just a 'nice option'; it is now an EMERGENCY MUST HAVE. Here is why?

Public officials who are in charge of City, State, County and Federal Budgets generally get paid over \$140,000.00 per year and live in wonderful homes. They never have to worry about any of their own housing issues. These housing issues are distant and unconnected to their own experiences.

The lack of affordable housing for low- and extremely low-income households has become a serious EMERGENCY problem in the U.S. for several decades. The last two years of historic rental growth immigration promotion and soaring home prices have only made matters worse, causing an even wider gap in available affordable housing.

Here are three charts that show just how serious the problem is.

Image source: Getty Images.

1. There aren't enough affordable homes

The National Low Income Housing Coalition (NLIHC), a not-for-profit organization focused on advocating for affordable housing, found in its 2021 GAP report that for every 100 extremely low-income renter households, which are those who earn 30% or less than the median income for the area, there were only 37 available homes for rent in 2019. Those earning 50% or less of the median income had 60 homes for every 100 households.

Image source: National Low Income Housing Coalition.

Today's affordable housing crisis goes a lot further than housing the nation's poorest families. The number of those who can no longer afford to buy or rent without majorly exceeding the recommended income threshold of 30% is rising due to the movement of the markets over the last two years.

2. The number of burdened households is expanding

Rapid rent growth has been spurred by record demand and a shortage of homes across the board. Homes that were once considered affordable as related to the median income for the area have increased pricing to match market rents, further reducing the supply of affordable homes. The cost of rent jumped 10.1% from 2020 to 2021, with some markets seeing rent prices climb in the 20% to 40% range year over year.

As of January 2022, wages grew at a national average of 4.5% from December 2020, clearly not enough to overcome higher costs for housing. When coupled with inflation, which reached 7% by the end of 2021, it's clear the burden on housing costs is only getting more severe.

A recent report from Vio Smart Security shows that close to half of the country has a rent-to-income ratio of 30% or higher. Florida has the highest percentage of residents paying 30% of their median income on rent, with other expensive states following close behind, like California, Oregon, and New York, to name a few.

Image source: Vio Smart Security.

Cities like Tampa, Florida; Phoenix; Fort Worth, Texas; Charlotte, North Carolina; and Las Vegas, which have seen a huge uptick in inward migration over the past two years, are among the leaders in the greatest change in housing affordability year over year. Notoriously expensive markets on the West Coast like San Francisco, Los Angeles, and Seattle, as well as those on the East Coast, including cities like Boston, Washington D.C., and New York City, continue to be among the worst U.S. cities for affordable housing.

These markets aren't alone. In Q4 2021, 77% of the 575 counties surveyed are less affordable than their historical average, and one in five counties require an income of \$75,000 or more to afford the median-priced home.

3. The golden rule is no longer a rule — more like a pipe dream

No state has an adequate supply of affordable housing for its lowest-income earners, but it's no longer just the lowest-income earners who can't afford to rent or buy. The nation is getting alarmingly close to needing half of all residents to pay 30% or more of their income to rent. Spending 30% or less of income, which is considered the target range for the cost of housing, is no longer the gold standard but an idyllic goal that is unattainable for the average American.

When consumers are forced to spend 30% or more on housing costs, they are considered "house burdened," which means they have less money to spend on items like child care, healthcare, food, gas, and other necessities for living. A recent Statista report shows the number of households that are cost burdened due to housing has increased steadily since 2013, except for 2017. Today, there are an estimated 44.01 million rental households considered cost burdened.

The faces of those who are most impacted are diverse, with a mix of reasons for the financial hardships. This issue disproportionately affects people of color, but seniors and people with disabilities make up around 48% of low-income households impacted by the lack of affordable housing. The issue is widespread, and it impacts all of us. When there is a lack of affordable housing, people can be forced into unsafe living conditions or experience homelessness. This situation can also negatively impact quality of life.

Federal policies and local public housing initiatives are one way to combat the issue, but it won't be enough to fill the growing gap. Those in the private real estate investing market will need to take part in creating and preserving affordable housing units to ensure everyone has a home. Using creative structures to help tenants become homeowners for the long term could be a beneficial play for all involved. And exploring alternative housing constructs, including 3D printed houses, prefab homes, and mobile home communities, could help alleviate construction costs and make housing more affordable for investors, developers, and ultimately tenants. The main problems with current American housing are detailed here: [SOLVING AMERICA'S HOUSING CRISIS 2022B](#)

NEWS UPDATES ON THE EFFORT:

Knock L.A.: New \$1 Billion NoHo Development Will Have Segregated Affordable Housing

By Madison Parsley [4-10-22] // The North Hollywood development, dubbed "District NoHo," will replace the park-and-ride lot at the NoHo metro station. Twenty percent of the housing (311 units of 1,527) will be affordable, but they will be separate from the rest of the units.

San Jose Spotlight: Affordable housing in Los Gatos faces uphill battle

By Tran Nguyen [4-9-22] // Andrea Osgood, a senior vice president of Eden Housing, said some of the biggest affordable housing constraints in Los Gatos are land and funding.

L.A. Times: A snapshot of new state government efforts to tackle California's housing crisis

By Hannah Wiley [4-11-22] // Assemblymember Buffy Wicks (D-Oakland), Assembly Committee on Housing and Community Development chair, said lawmakers this year are most worried about California's intense affordability crisis and how it's driving families out of communities.

Urbanize L.A: Micro-unit apartments begin construction in Downtown L.A.

By Steven Sharp [4-12-22] // With a \$29.1-million loan in hand, developer Housing Diversity Corporation (HDC) has broken ground on a micro-unit apartment building in Downtown Los Angeles – one of five projects the Seattle-based firm currently has in the works for the region.

North Bay Business Journal: Investors are buying mobile home parks. Residents are paying a price

By Sophie Kasakove [3-27-22] // Golden, CO: When Sarah Clement and her seven-year-old daughter moved to a mobile home park two years ago, she felt she'd won the lottery. But just six months after she moved in, the plot of land and all of the stability and comfort that came with it seemed suddenly ripped out from under her.

More than half a dozen affordable housing projects in California are costing more than \$1 million per apartment to build, a record-breaking sum that makes it harder to house the growing numbers of low-income Californians who need help paying rent, a Times review of state data found.

The seven subsidized housing developments, all in Northern California, received state funding within the last two years and are under construction or close to breaking ground. When completed, they will provide homes for more than 600 families.

But their exorbitant price tags mean that taxpayers are subsidizing fewer apartments than they otherwise could while waiting lists of renters needing affordable housing continue to grow.

“That is untenable,” said Assemblyman Tim Grayson (D-Concord), who is writing legislation aimed at simplifying state affordable housing financing. “That is not a sustainable model. We have got to do something to reduce the cost.”

A key driver of the increases is labor and material prices, which have soared because of inflation, supply-chain problems and worker shortages during the COVID-19 pandemic. But a Times investigation published in 2020 found numerous factors within the control of state and local governments also to blame for the high cost of building affordable housing in California.

In comparison with private sector development, low-income housing is often saddled with more stringent environmental and labor standards. Affordable housing projects also frequently face high parking requirements, lengthy local approval processes and a byzantine bureaucracy to secure financing.

Despite promises by Gov. Gavin Newsom and other state officials to rein in costs, they haven't made comprehensive changes to address the factors cited by The Times, whose findings are similar to those of auditors and academic researchers in recent years.

“We haven't seen any relief on any of those [cost] drivers,” said Elizabeth Kneebone, research director for UC Berkeley's Turner Center for Housing Innovation, which published one of the reports. “We've only seen more challenges piling on top of each other. There's been nothing to bend the curve. It just rises further upward.”

To support housing for low-income residents, federal, state and local governments provide direct financing and tax credits, which reduce what banks and other large investors owe the Internal Revenue Service and the state treasury if they help pay for housing projects. The funding requires developers to cap what tenants pay in rent.

One of the seven projects at issue, a rehabilitation of an 84-unit public housing complex in San Francisco's Hayes Valley neighborhood, will offer two-, three- and four-bedroom apartments for between \$1,186 and \$2,805 a month.

The amounts are far below market rates in San Francisco, where the median rent for a two-bedroom apartment is \$2,592 a month, according to real estate firm Apartment List. The Hayes Valley apartments are only available to families earning less than 60% of the region's median income.

The project, which is a partnership between the city of San Francisco and St. Louis for-profit developer McCormack Baron Salazar, costs \$91.7 million, which translates to almost \$1.1 million per apartment.

Previously, The Times identified one other — much smaller — proposed affordable housing development in California that eclipsed \$1 million per apartment to build. But that project, which called for the construction of 10 units for low-income families in Solana Beach along the San Diego coast, collapsed in 2020 because it grew too expensive.

The seven projects that now top \$1 million per unit would be the costliest built in California and probably the country. They are in the San Francisco Bay Area, the state's priciest region, with three in San Francisco, two in Oakland and one apiece in San Jose and Concord, a Contra Costa County suburb. The most expensive is a rehabilitation of 69 public housing units in San Francisco at a cost of more than \$1.2 million per apartment.

Developers and supporters of each project emphasize they're sorely needed to provide safe and secure homes for lower-income and homeless residents. A proposed 80-unit complex in San Jose for formerly homeless foster youth and families will serve a neighborhood rife with overcrowding with two or three households frequently sharing a single apartment, said Geoff Morgan, president of First Community Housing, the complex's nonprofit developer.

But Morgan conceded the price tag of just over \$80 million is hard to stomach.

"It's nauseating," Morgan said. "I hate it."

Many of the factors contributing to the high cost of the project, known as Roosevelt Park, were identified by The Times in 2020. The complex has a two-level underground parking garage and the highest level of environmental certification by the U.S. Green Building Council, and developers will pay construction workers union-level wages. San Jose officials also wanted commercial space included in the project, which required more parking and a separate elevator, Morgan said.

The project additionally struggled to get financing through the state's affordable housing system and is relying on six government funding sources to pay for its construction.

The Turner Center study on the cost to build low-income housing found that projects paying union-level wages to construction workers could cost \$50,000 more per apartment and those built to stricter environmental standards cost \$17,000 more per apartment than those that aren't. The study examined developments the state funded between 2008 and 2019.

The Times analysis of a similar set of projects found that for each additional funding source a project needed, the average per-unit cost increased by more than \$6,000.

A significant part of the cost comes from developers paying attorneys and consultants to navigate state and local bureaucracies to secure financing.

Most large states have one agency that hands out affordable housing dollars. California has five — with varying requirements for what gets funded. Those agencies report to different elected officials, leaving no one in charge of overseeing the system as a whole. A 2018 study by the U.S. Government Accountability Office found that 14% of the price tag for California's affordable housing projects was made up of consulting fees and other administrative costs — the highest in the country and more than developers spend on land.

When unveiling his state budget proposal in January 2020, Newsom pledged to lead an effort to streamline how developers get their funding.

“I’ve just had enough with TCAC and CDLAC and OPRs and CalVets and HCDs and CalHFAs,” the governor said, name-dropping the alphabet soup of departments involved in financing housing projects. “Six of you understand what the hell I just said. No one else does. And that’s the point.”

But Newsom and others have not overhauled that process. Instead, they have implemented smaller reforms, such as consolidating funding streams within agencies and modifying regulations for evaluating individual projects to better account for costs.

This year, Grayson’s legislation to centralize state affordable housing funding under the governor failed in a fiscal committee. He’s introduced a new version, Assembly Bill 2305, which passed the Assembly last month and is awaiting a Senate committee hearing.

“We should be looking at where we could save money on the government side so that we can fund these projects and make it pencil out for the developer on the building side,” Grayson said. Doing so, he said, is necessary “so that the people that need it the most are not the ones that suffer the most because the housing’s not built.”

In the meantime, Newsom and state lawmakers have pumped unprecedented sums into affordable housing construction. This year’s budget includes a record \$17 billion for housing and homelessness programs, including \$1.75 billion in federal COVID-19 relief funds to finance proposed low-income developments that had stalled before breaking ground. Five of the 27 developments funded so far through that program are among those that cost more than \$1 million per apartment to build.

The governor’s office declined an interview request. Gustavo Velasquez, a Newsom appointee who heads the California Department of Housing and Community Development, said the \$1.75-billion effort is meeting its goal of accelerating construction of developments that had been stuck.

“It is what it is,” Velasquez said. “Yes, there are some projects that were very expensive, arguably, in the Bay Area, many of them because the cost of housing there is more than in other parts of the state.”

Newsom has not taken a position on Grayson's legislation.

State Treasurer Fiona Ma, whose office is responsible for allocating affordable housing tax credits to developers, also declined an interview request. In response to written questions from The Times, Ma said she opposed Grayson's bill, which would diminish her power over the financing process, calling the effort "overly simplistic."

"Bureaucratic structures are the least of California’s problems," Ma said. "Streamlining local government land-use approvals and federal tax law constraints is the more effective approach."

Ma said that the agencies under her control prioritize cost concerns when handing out funding and that land values and inflation have driven recent increases.

During the pandemic, developers have had to contend with historic surges in material and labor prices. Those costs have gone up nearly 30% since February 2020, according to the state’s California Construction Cost Index. Last year’s 13.4% annual increase was the highest since the index began tracking costs more than a quarter-century ago. This year’s cost escalations are on pace to exceed that amount.

“What really hit people was in the beginning of the year, all of a sudden within a few months, we had a 15% increase,” said Morgan, the developer in San Jose. “That was crazy. I've never seen that in my career, and I've been doing this for over 20 years.”

Others blame high building costs on the historic lack of investment in low-income housing.

The three San Francisco projects costing more than \$1 million per apartment will rebuild 310 units from the city's public housing stock, which has deteriorated over decades. Included in the total are the millions developers must spend to temporarily relocate existing tenants during construction. So is the value of the existing properties, even though, in these cases, they're publicly owned.

But the projects' price tags also encompass layers of city requirements for affordable housing that go beyond the state's, such as some mandates to include public art, increase access for people with disabilities and hire local construction workers, including those from disadvantaged neighborhoods.

"Each of these issues has its own constituency and has its own advocacy and its own social benefit," said Lydia Ely, a top San Francisco housing official. "Each one on its own is worthy, and added up all together, they start to make an impact."

Though the price tag for low-income housing in Greater Los Angeles has not reached \$1 million per apartment, it's also rising. One 79-unit development under construction in Hollywood is costing nearly \$848,000 per apartment to build, the highest on record of state-funded projects in the region.

These cost escalations show no signs of abating. Besides the seven projects already funded at more than \$1 million per apartment, half a dozen other proposed projects identified by The Times across the Bay Area also eclipse that amount.

SILICON VALLEY IS USING SOCIAL MEDIA SITES TO SPY ON CITIZENS

Did you know that your Apple IPAD is constantly sending hundreds of surveillance points about you, every second, to Apple and the government middlemen that scan Apple's servers?

Match.com, OK Cupid and corporate dating sites exist to harvest your data for political campaigns

---- They spy on you to manipulate your politics, ideology and intentions and to report you to bill collectors, tax collectors, investigators and political parties. -

--- When you hear "BIG DATA", "AI", "DATING MINING" ...RUN: They are all processes that rape the public and manipulate elections

----- 89% of Silicon Valley's money comes from data mining you.

---- Google, Netflix, YouTube, Facebook, etc. exist to mass manipulate populations and run stock market scams for their sociopath owners. From INSIDE Google, our team saw Google manipulate the entire internet to hype up Larry Page's "boyfriend": Elon Musk and Tesla, which Google execs owned a portion of, while sabotaging Tesla's competitors.

---- Google illicitly and illegally timed these manipulations with stock market pump-and-dump efforts to exploit insider trading. That is a felony violation of RICO, Antitrust and other laws. Every single thing that Google does is contrived to harm a competitor, a politician, an employee whistle-blower or some other business adversary.

---- Silicon Valley has, AND LEAKS, everybody's abortion records

----- There are no "bugs", "operator errors", "server anomalies" or other media "accidents" at Google. Everything Google does is contrived, at a psychological warfare kind of level, to change a social perception. Google must show its software to FBI, SEC, FTC and our search engine optimisation experts to prove that they did not engage in these crimes. The fact is: We can prove they did the crimes and FBI experts can help us prove it! Google is known as the "Nazi's of the Internet". -

---- In a case unfolding in Britain over whether Google wrongly demoted price comparison rival Foundem from its search results in favour of paid-for adverts, Google must now decide which it values more: the algorithms that rank its search results, or its stance that manually fiddling with those results to promote its own paid-for products over rivals' sites doesn't break competition laws. -

--- The integrity of Google's ranking processes relies upon all webmasters or website owners having the same degree of access to information about Google's ranking... This will no longer be the case if information of this kind is made available to some individuals offering commercial services to assist companies to improve their Search ranking. -

--- Google is a criminal operation. It's executives have been publicly exposed as participants in horrific sex scandals, money laundering, political bribery and racism. It is time for the bought and paid shill politicians to stop protecting them! – Google spies on competitors and steals their technology

– Google runs tens of millions of dollars of defamation attacks against competitors – Google hides all media and news coverage for competitors of Larry Page's boyfriend: Elon Musk – Google lies to the public about what they really do with the public's data

---- Google promotes illegal immigration in order to get cheap labor and control votes – Google runs VC funding back-lists against start-ups that are competitive – Google bribes thousands of politicians – Google is a criminal RICO-violating monopoly – Google rigs the stock market with Flash-boy, Pump/Dump and Microblast SEC violating computer tricks – Google pays bribes to politicians in Google and YouTube stock – Google manipulates who gets to see what web-sites, globally, for competitor black-lists – Google has a “no poaching” Silicon Valley jobs blacklist -

--- Google bosses sexually abuse women and young boys – Google bosses run sex trafficking operations in the Epstein and NXVIUM cults – Google bosses control the NVCA financing cartel over start-ups – Google has placed the majority of the corporate staff in at least one White House – Google controls national elections for anti-competitive purposes – The company “Polyhop”, in the HOUSE OF CARDS tv show, does all the crimes that Google actually does in reality – Google's law firms, like Wilson Sonsini, are corrupt conduits for payola and political conduit-relays ---- Google bribes some politicians with revolving door jobs – Google is primarily responsible for destroying the Bay Area Housing opportunities

– Google runs DDoS attacks on competitors by massively crawling their sites

– Google boss Andy Rubin runs a sex slave farm according to his own family – Google boss Eric Schmidt was a philandering sex-penthouse owner according to vast news articles – Google executives hire so many hookers that one of them, Mr. Hayes, was killed by his hooker

---- Google executives sexually abuse so many women that the women staff of Google walked out one day – In the 2009 White House, you could not swing a cat without hitting a Google insider – Google has paid covert bribes, PAC funds, real estate and search rigging payola to every CA Senator – Google has paid bribes, through its lobby fronts, to halt FBI, SEC, FEC and FTC investigations of Google crimes – Google was funded by the CIA, via In-Q-Tel, a so called “501 c3 charity” which was caught with tons of cocaine

– Google gets millions of dollars of taxpayer cash for spying on Americans inside the USA – Google's map service was a spy system paid for by taxpayers money that Google now profits off of ---- Nancy Pelosi and Dianne Feinstein have promised to “protect” Google because their families profit off Google stocks – Payment receipts prove that Google and Gawker/Gizmodo exchanged cash and staff for Character Assassination attacks – Google VC's and bosses have spent \$30M+ rigging the U.S. Patent Office to protect Google and harm Google competitors -

--- Google bribed it's lawyer into position as head of the U.S. Patent office in order to have her protect Google – To rig insider stock trades, Google hides negative Tesla stories and pumps positive Tesla stories on “push days” – Google and Elon Musk Co-own, co-invest and co-market stocks covertly while running anti-trust schemes – Google rarely likes, or hires, black employees per federal and news media investigations – Google hired most of the Washington, DC K Street lobby firms and told them to “do what ever they could” – The film: “Miss Sloane” depicts only 2% of the illicit lobbying tactics Google employs daily

---- Demands for an FTC and FBI raid of Google, for criminal activity, securities law and election felonies have been filed – Google's David Drummond had his Woodside, CA Quail Road house bugged revealing sex and financial misdeeds –

---- At Google: Kent Walker, Andy Rubin, Larry Page, Eric Schmidt, Sergy Brin, Jared Cohen, Yasmin Green, David Drummond and Ian Fette are so enmeshed in sex scandals, election manipulation, and White House bribes that it is hard to comprehend how they can get any legitimate work done. Google executives came from most of the fraternity houses involved in the college rape scandals. ---- Google sells covert character assassination services to politicians and fellow oligarchs. Youtube/Google/Alphabet/Deep State are all the same entity. They conspire to hide news about their corruption and they control most of the internet.

---- There are hundreds of millions of people in America. The same 120 of them are all involved in operating the same crimes and corruption including: the Sony Pictures corruption; the Afghanistan rare earth mine scandals operated through The Energy Department political slush fund that involves the lithium battery cover-ups (headed by Elon Musk); the Big Tech Brotopia rape, sex trafficking, bribery, exclusionism, racism and misogyny issues they were taught at Stanford University; The Facebook – Meta – Google – Alphabet – Netflix, et al, coordinated news manipulation and domestic spying that they engage in; the hiring of Fusion GPS – Black Cube – Gizmodo/Gawker assassins; the destruction of the housing market by their mass real estate manipulations; patent theft and industrial espionage; and the bribery of almost every politician all the way up to the Oval Office. ---- So, while the categories covered in this investigation may seem diverse.

They are connected through an enterprise of criminality and illicit, coordinated operations. We list, by name, the 120 most complicit individuals organizing these crimes, in the evidence documents already submitted to the FBI, FINCEN, DOJ, FTC, SEC, FEC, Congress, InterPol and other authorities. Digital financial tracking of those persons and all of their family members should be assumed to have been under way for some time. Wire-taps and device taps of those persons and all of their family members should be assumed to have been under way for some time.

---- Twitter, Splunk, Google, Facebook, Netflix, YouTube and the Silicon Valley internet Cartel serve you custom manipulated content by automatically creating a covert digital dossier on you reflecting the content consumption preferences they have spied on about you. They continually evolve their dossier on you in order to steer you towards their ideology and their Democrat political party. At these companies, “data mining”, “machine learning” and “AI” means computerized propaganda processing for certain political entities. They began hiring off-shore people (because they would work so cheap) but most of those people turned out to be Muslim. This created conflicts with the entire southern part of the United States (which is anti-Muslim) because those workers steered content to pro-Muslim positions.

Their assessment of what your words might mean is based on what rich, white male, \$200K/year, DNC-promoting programmers think they might mean. Their computers scale and expand their tools with algorithmic software created by those politically and socially biased frat white boys that wrote the code. It is all biased as hell. They never hire blacks or women in system creation roles so everything these companies do only supports rich white soyboy snowflake type gamer thinking. -

--- Because their Silicon Valley VC's told them to spy on billions of people, even for these web giants, it is impractical to store the entire dynamic history of a user's interaction features. They, thus, out of greed, use algorithms that selectively decay information in order to generalize users and populations. To them, you are just a generalized data point, like cattle on a ranch, to be harvested and fed upon by Silicon Valley.

Facebook Is Abusing Your Sensitive Medical Information from Hospital Websites

Experts say some hospitals' use of an ad tracking tool may violate a federal law protecting health information By Todd Feathers, Simon Fondrie-Teitler, Angie Waller, and Surya Matt

A tracking tool installed on many hospitals' websites has been collecting patients' sensitive health information—including details about their medical conditions, prescriptions, and doctor's appointments—and sending it to Facebook.

The Markup tested the websites of Newsweek's top 100 hospitals in America. On 33 of them we found the tracker, called the Meta Pixel, sending Facebook a packet of data whenever a person clicked a button to schedule a doctor's appointment. The data is connected to an IP address—an identifier that's like a computer's mailing address and can generally be linked to a specific individual or household—creating an intimate receipt of the appointment request for Facebook.

On the website of University Hospitals Cleveland Medical Center, for example, clicking the “Schedule Online” button on a doctor's page prompted the Meta Pixel to send Facebook the text of the button, the doctor's name, and the search term we used to find her: “pregnancy termination.”

Clicking the “Schedule Online Now” button for a doctor on the website of Froedtert Hospital, in Wisconsin, prompted the Meta Pixel to send Facebook the text of the button, the doctor's name, and the condition we selected from a dropdown menu: “Alzheimer's.”

Coming Next in the Pixel Hunt Series

This children's hospital network is giving kids' names to Facebook.

The Markup also found the Meta Pixel installed inside the password-protected patient portals of seven health systems. On five of those systems' pages, we documented the pixel sending Facebook data about real patients who volunteered to participate in the Pixel Hunt project, a collaboration between The Markup and Mozilla Rally. The project is a crowd-sourced undertaking in which anyone can install Mozilla's Rally browser add-on in order to send The Markup data on the Meta Pixel as it appears on sites that they visit. The data sent to hospitals included the names of patients' medications, descriptions of their allergic reactions, and details about their upcoming doctor's appointments.

Former regulators, health data security experts, and privacy advocates who reviewed The Markup's findings said the hospitals in question may have violated the federal Health Insurance Portability and Accountability Act (HIPAA). The law prohibits covered entities like hospitals from sharing personally identifiable health information with third parties like Facebook, except when an individual has expressly consented in advance or under certain contracts.

Neither the hospitals nor Meta said they had such contracts in place, and The Markup found no evidence that the hospitals or Meta were otherwise obtaining patients' express consent.

“I am deeply troubled by what [the hospitals] are doing with the capture of their data and the sharing of it,” said David Holtzman, a health privacy consultant who previously served as a senior privacy adviser in the U.S. Department of Health and Human Services' Office for Civil Rights, which enforces HIPAA. “I cannot say [sharing this data] is for certain a HIPAA violation. It is quite likely a HIPAA violation.”

University Hospitals Cleveland Medical Center spokesperson George Stamatis did not respond to The Markup's questions but said in a brief statement that the hospital "comport[s] with all applicable federal and state laws and regulatory requirements."

After reviewing The Markup's findings, Froedtert Hospital removed the Meta Pixel from its website "out of an abundance of caution," Steve Schooff, a spokesperson for the hospital, wrote in a statement.

This is an extreme example of exactly how far the tentacles of Big Tech reach into what we think of as protected data space.

Nicholas Price, University of Michigan

As of June 15, six other hospitals had also removed pixels from their appointment booking pages and at least five of the seven health systems that had Meta Pixels installed in their patient portals had removed those pixels.

The 33 hospitals The Markup found sending patient appointment details to Facebook collectively reported more than 26 million patient admissions and outpatient visits in 2020, according to the most recent data available from the American Hospital Association. Our investigation was limited to just over 100 hospitals; the data sharing likely affects many more patients and institutions than we identified.

Facebook itself is not subject to HIPAA, but the experts interviewed for this story expressed concerns about how the advertising giant might use the personal health data it's collecting for its own profit.

"This is an extreme example of exactly how far the tentacles of Big Tech reach into what we think of as a protected data space," said Nicholson Price, a University of Michigan law professor who studies big data and health care. "I think this is creepy, problematic, and potentially illegal" from the hospitals' point of view.

The Markup was unable to determine whether Facebook used the data to target advertisements, train its recommendation algorithms, or profit in other ways.

Facebook's parent company, Meta, did not respond to questions. Instead, spokesperson Dale Hogan sent a brief email paraphrasing the company's sensitive health data policy.

"If Meta's signals filtering systems detect that a business is sending potentially sensitive health data from their app or website through their use of Meta Business Tools, which in some cases can happen in error, that potentially sensitive data will be removed before it can be stored in our ads systems," Hogan wrote.

Pixel Hunt

Facebook and Anti-Abortion Clinics Are Collecting Highly Sensitive Info on Would-Be Patients

The social media giant gathers data from crisis pregnancy centers through a tracking tool that works whether or not a person is logged in to their Facebook account

Meta did not respond to follow-up questions, but Hogan appears to be referencing a sensitive health information filtering system that the company launched in July 2020 in response to a Wall Street Journal article and New York Department of Financial Services investigation. Meta told the investigators that the filtering system was "not yet operating with complete accuracy," according to the department's February 2021 final report.

The Markup was unable to confirm whether any of the data referenced in this story was in fact removed before being stored by Meta. However, a recent joint investigation with Reveal found that Meta's sensitive health information filtering system didn't block information about appointments a reporter requested with crisis pregnancy centers.

Internally, Facebook employees have been blunt about how well—or not so well—the company generally protects sensitive data.

“We do not have an adequate level of control and explainability over how our systems use data, and thus we can’t confidently make controlled policy changes or external commitments such as ‘we will not use X data for Y purpose.’” Facebook engineers on the ad and business product team wrote in a 2021 privacy overview that was leaked to Vice.

“Almost Any Patient Would Be Shocked”

The Meta Pixel is a snippet of code that tracks users as they navigate through a website, logging which pages they visit, which buttons they click, and certain information they enter into forms. It’s one of the most prolific tracking tools on the internet—present on more than 30 percent of the most popular sites on the web, according to The Markup’s analysis.

In exchange for installing its pixel, Meta provides website owners analytics about the ads they’ve placed on Facebook and Instagram and tools to target people who’ve visited their website.

Show Your WorkPixel Hunt

How We Built a Meta Pixel Inspector

The first large-scale, crowdsourced study that monitors how Meta tracks people across the internet

The Meta Pixel sends information to Facebook via scripts running in a person’s internet browser, so each data packet comes labeled with an IP address that can be used in combination with other data to identify an individual or household.

HIPAA lists IP addresses as one of the 18 identifiers that, when linked to information about a person’s health conditions, care, or payment, can qualify the data as protected health information. Unlike anonymized or aggregate health data, hospitals can’t share protected health information with third parties except under the strict terms of business associate agreements that restrict how the data can be used.

In addition, if a patient is logged in to Facebook when they visit a hospital’s website where a Meta Pixel is installed, some browsers will attach third-party cookies—another tracking mechanism—that allow Meta to link pixel data to specific Facebook accounts.

And in several cases we found—using both dummy accounts created by our reporters and data from Mozilla Rally volunteers—that the Meta Pixel made it even easier to identify patients.

When The Markup clicked the “Finish Booking” button on a Scripps Memorial Hospital doctor’s page, the pixel sent Facebook not just the name of the doctor and her field of medicine but also the first name, last name, email address, phone number, zip code, and city of residence we entered into the booking form.

The Meta Pixel “hashed” those personal details—obscuring them through a form of cryptography—before sending them to Facebook. But that hashing doesn’t prevent Facebook from using the data. In fact, Meta explicitly uses the hashed information to link pixel data to Facebook profiles.

Using a free online tool, The Markup was also able to reverse most of our hashed test information that the pixel on Scripps Memorial Hospital’s website sent to Facebook.

Scripps Memorial didn’t respond to The Markup’s questions but it did remove the Meta Pixel from the final webpages in the appointment booking process after we shared our findings with the hospital.

On other hospitals' websites, we documented the Meta Pixel collecting similarly intimate information about real patients.

When one real patient who participated in the Pixel Hunt study logged in to the MyChart portal for Piedmont Healthcare, a Georgia health system, the Meta Pixel installed in the portal told Facebook the patient's name, the name of their doctor, and the time of their upcoming appointment, according to data collected by the participant's Mozilla Rally browser extension.

The Meta Pixel collects sensitive health information and shares it with Facebook

The Meta Pixel installed on Piedmont Healthcare's MyChart portal sent Facebook details about a real patient's upcoming doctor's appointment, including date, time, the patient's name, and the name of their doctor

1. Patient name
2. Date and time of appointment

When another Pixel Hunt participant used the MyChart portal for Novant Health, a North Carolina-based health system, the pixel told Facebook the type of allergic reaction the patient had to a specific medication.

The Markup created our own MyChart account through Novant Health to further investigate and found the Meta Pixel collecting a variety of other sensitive information.

Clicking on one button prompted the pixel to tell Facebook the name and dosage of a medication in our health record, as well as any notes we had entered about the prescription. The pixel also told Facebook which button we clicked in response to a question about sexual orientation.

“Our Meta pixel placement is guided by a third party vendor and it has been removed while we continue to look into this matter,” Novant spokesperson Megan Rivers wrote in an email.

Epic Systems, the software company behind MyChart, has “specifically recommended heightened caution around the use of custom analytics scripts,” Stirling Martin, a senior vice president for the company, wrote in an email.

Facebook is able to infer intimate details about people's health conditions using other means—for example, the fact that a person “liked” a Facebook group associated with a particular disease—but the data collected by pixels on hospitals' websites is more direct. And in sharing it with Facebook, experts said, health care providers risk damaging patients' trust in an increasingly digitized health system.

- 2.

The Markup found that filling out a survey through Novant Health shared sensitive information like sexual orientation with Facebook via the Meta Pixel. Source: www.novantmychart.org

“Almost any patient would be shocked to find out that Facebook is being provided an easy way to associate their prescriptions with their name,” said Glenn Cohen, faculty director of Harvard Law School’s Petrie-Flom Center for Health Law Policy, Biotechnology, and Bioethics. “Even if perhaps there’s something in the legal architecture that permits this to be lawful, it’s totally outside the expectations of what patients think the health privacy laws are doing for them.”

Legal Implications

Facebook’s data collection on hospital websites has been the subject of class action lawsuits in several states, with mixed results.

Those cases involve types of data that health law experts said are sensitive but less regulated than the health information The Markup documented the Meta Pixel collecting.

In 2016, a group of plaintiffs sued Facebook and a handful of health systems and organizations, alleging that the organizations had breached their own privacy policies and several state and federal laws—including wiretapping and intrusion on seclusion statutes—by collecting data via tracking technology on the health care providers’ websites.

The U.S. District Court for the Northern District of California dismissed that case in 2017 for a variety of reasons, including that the plaintiffs failed to prove that Facebook had collected “protected health information,” as defined by HIPAA. Rather, the court found, Facebook had tracked plaintiffs on public-facing pages of the websites—such as the homepage or informational pages about diseases—where there was no evidence that the plaintiffs had established a patient relationship with the provider.

In 2019, plaintiffs brought a similar class action lawsuit in Suffolk County Superior Court against Massachusetts-based Partners Healthcare System, which has since changed its name to Mass General Brigham, alleging that the system had violated patients’ privacy and its own policies by installing the Meta Pixel and other tracking tools on its websites.

Report Deeply and Fix Things

Because it turns out moving fast and breaking things broke some super important things.

Give Now

The parties settled the case in January, with Mass General Brigham denying the allegations and admitting no wrongdoing or liability but paying \$18.4 million to the plaintiffs and their attorneys. After the settlement, Mass General Brigham appears to have removed Meta Pixel and other tracking tools from many of its hospitals’ websites—but not all of them.

When The Markup tested the website of Brigham and Women’s Faulkner Hospital, clicking the “Request Appointment” button on a doctor’s page caused the Meta Pixel to send Facebook the text of the button, the doctor’s name, and the doctor’s field of medicine. Mass General did not respond to The Markup’s request for comment.

As with all such data we found the Meta Pixel collecting, it was sent to Facebook along with our computer’s public IP address.

“When an individual has sought out a provider and indicated that they want to make an appointment, at that point, any individually identifiable health information that they’ve provided in this session, in the past, or certainly in the future, is protected under HIPAA and could not be shared with a third party like Facebook,” Holtzman said.

The U.S. Department of Human Services’ Office for Civil Rights “cannot comment on open or potential investigations,” spokesperson Rachel Seeger wrote in an emailed statement.

“Generally, HIPAA covered entities and business associates should not be sharing identifiable information with social media companies unless they have HIPAA authorization [from the individual] and consent under state law,” said Iliana Peters, a privacy lawyer with the firm Polsinelli who previously headed HIPAA enforcement for the Office for Civil Rights.

Patients have the right to file HIPAA complaints with their medical providers, who are required to investigate the complaints, Peters said, adding, “I would hope that institutions would respond quickly to those types of complaints so that they aren’t escalated to a state or federal regulator.”

 link

"Plausible Deniability"

Most of the hospitals The Markup contacted for this story did not respond to our questions or explain why they chose to install Meta Pixel on their websites. But some did defend their use of the tracker.

“The use of this type of code was vetted,” wrote Chris King, a spokesperson for Northwestern Memorial Hospital, in Chicago. King did not respond to follow-up questions about the vetting process.

King said that no protected health information is hosted on or accessible through Northwestern Memorial’s website and that “Facebook automatically recognizes anything that might be close to personal information and does not store this data.”

In fact, Meta explicitly states in its business tools terms of service that the pixel and other trackers do collect personally identifiable information for a variety of purposes.

Houston Methodist Hospital, in Texas, was the only institution to provide detailed responses to The Markup’s questions. The hospital began using the pixel in 2017, spokesperson Stefanie Asin wrote, and is “confident” in Facebook’s safeguards and that the data being shared isn’t protected health information.

When The Markup tested Houston Methodist’s website, clicking the “Schedule Appointment” button on a doctor’s page prompted the Meta Pixel to send Facebook the text of the button, the name of the doctor, and the search term we used to find the doctor: “Home abortion.”

Houston Methodist doesn’t categorize that data as protected health information, Asin wrote, because a person who clicks the “Schedule Appointment” button may not follow through and confirm the appointment, or, they may be booking the appointment for a family member rather than for themselves.

Since our further examination of the topic is ongoing, we elected to remove the pixel for now to be sure we are doing everything we can to protect our patients’ privacy while we are evaluating.

Stefanie Asin, Houston Methodist Hospital spokesperson

“The click doesn’t mean they scheduled,” she wrote. “It’s also worth noting that people often are exploring for a spouse, friend, elderly parent.”

Asin added that Houston Methodist believes Facebook “uses tools to detect and reject any health information, providing a barrier that prevents passage of [protected health information].”

Despite defending its use of the Meta Pixel, Houston Methodist Hospital removed the pixel from its website several days after responding to The Markup’s questions.

“Since our further examination of the topic is ongoing, we elected to remove the pixel for now to be sure we are doing everything we can to protect our patients’ privacy while we are evaluating,” Asin wrote in a follow-up email.

Facebook did not launch its sensitive health data filtering system until July 2020, three years after Houston Methodist began using the pixel, according to the New York Department of Financial Services’ investigation. And as recently as February of last year, the department reported that the system’s accuracy was poor.

That type of Band-Aid fix is a prime example, privacy advocates say, of the online advertising industry’s inability to police itself.

“The evil genius of Facebook’s system is they create this little piece of code that does the snooping for them and then they just put it out into the universe and Facebook can try to claim plausible deniability,” said Alan Butler, executive director of the Electronic Privacy Information Center. “The fact that this is out there in the wild on the websites of hospitals is evidence of how broken the rules are.”

Experts Sound Alarm On ‘Stalkerware,’ Which Can Easily Be Downloaded On Your Phone Without You Knowing

Your Phone Is Killing You And Destroying Your Life

By Donna Lawson

Did you know that the electronics in your phone, AND, 99% of the ‘Apps’ on your phone are tracking you, spying on you, tricking you, and reporting to others when you:

- Get an abortion
- Have sex
- Get pregnant
- Don’t go to work
- Enter, or leave, any building
- Get into, or out of, your car
- Have a sex worker take Uber, Lyft or any taxi or ride service to where you are
- Receive money
- Buy anything
- Are depressed
- Breath heavy
- Are located at any location on Earth
- Move from any location on Earth to another location

- Take anything out of your wallet with a chip in it
- Vote
- Express a political opinion
- Use a dating site (Axciom and Equifax make psych profiles on you from your date data)
- Use any ‘gay’ code words
- Use any ‘political’ code words
- Speak, or listen, to anyone within 20 feet
- And thousands of other invasions of privacy...

It does these things even if you pushed the button to ‘turn it off’. Most phones don’t actually turn off when you think they are off because ‘spies-gotta-spy’.

COVID is doing a great job of killing off all of the idiot people who grab the door-knob, bare-handed, at the post office, the Starbucks and the grocery store. COVID waits on public surfaces to kill the sheep of society.

Silicon Valley is doing a great job of killing off all the lives of the rest of the sheep who are too dumb to take the battery out of their phone. The people that walk around with a phone, or tablet, always powered on are committing digital suicide. If you buy a phone that you can’t take the battery out of, you are just an idiot.

You may not want to face the truth but I can show you thousands of court records, Congressional investigations and university studies proving that every single assertion in this report is true.

Everybody in Congress knows this is all true but they do nothing because Silicon Valley is bribing almost every single one of them to do nothing. Silicon Valley’s largest source of income is your privacy!

NEW YORK (CBSNewYork) — As we recognize October as Domestic Violence Awareness Month, we want to shed light on a type of abuse that many don’t even realize is such a problem.

It’s a tool readily available to any abuser and very difficult for victims to detect.

READ MORE: Ground-Breaking Ceremony Held At Site Of New \$650 Million ‘Hub’ In New Brunswick CBS2’s Jessica Layton has more on the dangers of cyberstalking and how you can protect yourself.

It’s so simple, it’s scary — software that allows a stalker to secretly spy through an unsuspecting person’s cellphone without their consent.

Experts say “Stalkerware” use is rapidly on the rise, increasing 60% from September 2020 to May 2021.

“Unfortunately, it has been on the increase from being a few hundred apps available in the marketplace,” said Tony Anscombe of ESET Internet Security.

The concept may have started with decent intentions — parents installing apps to keep tabs on their kids. But as Anscombe explained, it has turned into an industry where a stalker can track a victim’s every move, without them ever realizing it.

“These apps can key log, so they can see every key stroke on your device. They can extract all the information from your contacts, your messages, your email,” Anscombe said.

The dangerous app disguises itself as something that is an important function of the operating device on the phone, and it only takes minutes to install. So in the time it takes a person to get up and use the bathroom, take a shower or make a snack, their partner may already have them under surveillance.

Experts showed Layton how easy it is to intercept data once the app is on a phone. Groups like Coalition Against Stalkerware also share warning videos, explaining this is seen most often in cases of domestic abuse.

“When someone is controlling all these aspects of your personal information you have to worry about what they have access to. I know that was a concern for me,” domestic violence survivor Heather Glogolich said.

READ MORE: Some New Yorkers Say Hacking Of MTA Shows How Vulnerable The City And Riding Public Are
Glogolich, a police lieutenant in New Jersey, understands in many ways how hijacking a personal devices is just one way an abuser exercises control over a victim.

“I couldn’t leave my phone down without my ex-husband looking through it,” Glogolich said.

“So technology plays a big role in trapping victims and keeping them in that abusive relationship,” survivor Neisha Himes added.

Himes didn’t know the dangers of digital abuse when she was trying to leave a toxic relationship, but she has since dedicated her life to helping other victims. She said she now sees it almost every day.

“If they have a phone that maybe the offender purchased for them, we have to tell them, ‘OK, let’s get you a new phone,’” Himes said.

Glogolich and Himes are supporters of a program developed by Sheri Kurdakul, the CEO of Victim’s Voice. It’s a web-based app that gives power to the victim, allowing him or her to document cases of abuse in real time on their device to present to the courts. They’re taken through a series of guided questions vetted by prosecutors and the answers are encrypted and stored in a secure server.

“It’s a progressive web app, which means there’s nothing to download. You won’t find us in any app store. That also means there’s no dangerous icons on sitting on your phone and there’s no trigger such as a receipt that you downloaded the app,” Kurdakul said. “A lot of victims’ emails and such are being tracked and monitored all the time.”

That kind of awareness and privacy is paramount. That’s why even just knowing there could be Stalkerware on your phone is the first step to protecting yourself.

Low battery life, high data usage and slow performance on your phone may also be red flags, yet sometimes intuition is the best indicator that your personal device isn’t so private.

So if you suspect you’re being stalked through technology, get expert help. Take the phone to a tech company so they can run programs to check it for you. And also, get police involved.

Experts say never try to delete the app yourself. The abuser will get notified and that could put a person in an even more dangerous situation.

CBS2’s Jessica Layton contributed to this report.

Is T-Mobile Liable For “Complicit Homicide” By Allowing Teens To Use Facebook, Google and Instagram, Who Are Facing Lawsuits for Teen Mental Health Crisis, In A MASSIVE Profits-Over-Safety Mobile Services Abuse Charge

Neumann Law Group is now investigating claims against Meta Platforms, Inc., the parent company of Facebook and Instagram for their intentional manipulation of the mental health of young and at-risk users of their products.

In October 2021, a Facebook whistleblower testified to the U.S. Senate how Facebook, Instagram, and Meta used tactics to manipulate young people into using their products for extended periods of time and intentionally created a toxic environment leading to significant psychological harm to America's youth.

GOOGLE IS RUN BY CHILD SEX PERVERTS

Google whistleblower claims tech giant's Developer Studio division has been infiltrated by 'pedophilic religious doomsday cult' Fellowship of Friends that was featured in a Spotify podcast series called 'Revelations' last year

- Kevin Lloyd, 34, was a video producer for Google Developer Studio from 2017 until he was fired in February 2021

- Lloyd in August 2021 filed a lawsuit at California Superior Court alleging that he lost his job because he questioned a 'cult' that many of his colleagues joined

- Earlier this month Lloyd wrote a Medium post about his time at Google, and his concerns about Fellowship of Friends

- Google insist that they are unaware of a person's religious beliefs during hiring; Lloyd says they know about the influence of the cult, but turn a blind eye

By Harriet Alexander

[View comments](#)

An apocalyptic 'cult' led by an eccentric misogynist accused of sexual abuse of young men has taken over a division of Google, a whistleblower has claimed.

Kevin Lloyd, 34, claims that he was fired from his job as a video developer at Google last year because he began questioning the influence of the cult.

In August, Lloyd filed a discrimination case in California Superior Court, alleging he was fired for digging into Fellowship of Friends - a group based in the small Californian town of Oregon House, and whose members made up a large percentage of employees in his division.

'Plaintiff's preliminary research into Oregon House and the Fellowship of Friends described the Fellowship as a destructive cult, with a pedophilic leader who makes false prophecies about the end of the world,' the lawsuit claims.

'Plaintiff became alarmed that Google was involved with and/or financially supporting such an organization.'

Earlier this month, Lloyd wrote a lengthy description of his case on Medium, and spoke to The New York Times - who corroborated many of the lawsuit's claims through interviews with eight current and former employees of the Google business unit.

Kevin Lloyd, 34, claims he lost his job at Google because he raised concerns about how many people within the Google Developer Studio were affiliated with Fellowship of Friends

Google's campus in Mountain View is 180 miles from the small town of Oregon House, population 1,250 - yet half of the people Lloyd met were from Oregon House, he said

Lloyd said he began work at Google in 2017, as part of Google Developer Studio (GDS) - the tech giant's internal production company, making adverts and video content.

He said it slowly dawned on him that many of the people he met at GDS were from the same small Californian town, 180 miles north of Google's Silicon Valley home, in Mountain View.

The town of Oregon House is home to 1,250 people, and yet Lloyd said he realized that half of the 25 people he met at GDS were from the same town.

Lloyd said he noticed that many of the outside vendors, such as caterers and entertainers at corporate events, were also from Oregon House.

In 2018, Lloyd said, he was speaking to a freelancer who was working with them that day, and was from a town near Oregon House.

Lloyd recalls the freelancer telling him: 'Oregon House isn't a town. It's a cult.'

He began investigating the freelancer's claim, and said he was shocked by what he found.

'There are online support groups for former Fellowship of Friends members to help them process the trauma endured during their membership, as well as problems that arise after leaving,' Lloyd's lawsuit states.

Fellowship of Friends, which is based in Oregon House, was founded in 1970 by Robert Earl Burton, a former school teacher in the San Francisco Bay area.

'From its inception the vision of the Fellowship was, and remains, to establish a practical spiritual organization and to make it available to anyone interested in pursuing the spiritual work of awakening,' they state on their website.

Robert Earl Burton, now believed to be around 83, founded Fellowship of Friends in 1970. He has been accused in multiple lawsuits of sexual abuse

Burton is seen with a European artwork purchased with the organization's cash. Members must give 10 percent of their earnings to the group

Burton, believed to be now aged in his early 80s, sought to create a center celebrating the fine arts - with opera, ballet, works of art and literature the focus.

He based his organization in Oregon House, and created a winery where his devotees worked, when not studying the arts.

Google even purchased wine, the lawsuit claims, from the Grant Marie Winery, an allegedly cult-affiliated vineyard run by a Fellowship member in Oregon House.

But critics claimed that he had sexually abused new members of his group - in particular young boys.

In 1984 a former member filed a \$2.75 million lawsuit claiming that young men who joined the organization 'had been forcefully and unlawfully sexually seduced by Burton,' according to documents obtained by The New York Times.

In 1996, another former member accused Burton in a law suit of sexual misconduct with him while he was minor. Both suits were settled out of court.

Some accusers, Lloyd alleged, had been flown to the country under false pretenses and then abused.

Members of Fellowship of Friends are seen with Burton (left, in pale blue suit) holding a meeting

What is Fellowship of Friends?

Founded on January 1, 1970 by San Francisco school teacher Robert Earl Burton, Fellowship of Friends is a non-profit religious organization, headquartered in Oregon House, California.

Burton based his faith system on a philosophy called the Fourth Way, founded by an Armenian philosopher and mystic, George Gurdjieff, who lived from 1866 to 1949.

Burton adopted Gurdjieff's belief that people are in a hypnotic 'waking sleep', and need to work on themselves through studying art, music and literature.

He named his 1,200-acre headquarters Apollo, and his 1,800 followers gave 10 percent of their earnings to the organization - which spent the money on art, fine wine and culture.

Critics have filed lawsuits claiming sexual abuse.

Other critics said that the group was strongly anti-women, and celebrated white European men above all.

In September, investigative journalist Jennings Brown published a six-part podcast produced for Spotify, entitled Revelations.

Brown had spent three years from 2018 digging into the group, and documented allegations of sexual abuse in what he termed a 'doomsday cult'.

Lloyd said he was aghast that GDS was so strongly linked to the Fellowship, with GDS's director, Peter Lubbers, described as a longtime member of the group, who joined shortly after he moved to the U.S. from the Netherlands.

Lubbers introduced a video producer named Gabe Pannell to the Fellowship: Pannell was pictured with Burton in 2015, and described as a 'new student', The New York Times report.

Lloyd's lawsuit states: 'Mr Lubbers gained status and praise relative to the increase of money flowing to the Fellowship through his efforts at Google that put (and kept) other Fellowship members — directly or indirectly — on Google's payroll.'

Lubbers insisted faith had nothing to do with his hiring.

'My personal religious beliefs are a deeply held private matter,' Lubbers told The New York Times.

'In all my years in tech, they have never played a role in hiring. I have always performed my role by bringing in the right talent for the situation — bringing in the right vendors for the jobs.'

Pannell told the paper that those hired were brought in from 'a circle of trusted friends and families with extremely qualified backgrounds'.

Lloyd, in his Medium post - which does not name Lubbers or Pannell - said that anxiety about the Fellowship, and its reputation, sparked a panic attack, for which he was admitted to ER.

He said in his court documents that he worried events he produced 'could somehow be used to funnel money back into the Fellowship of Friends.'

•

Burton is seen in a 1981 photo at Oregon House. In 1984, a former member filed a \$2.75 million lawsuit claiming that young men who joined the organization 'had been forcefully and unlawfully sexually seduced by Burton,' according to documents obtained by The New York Times. The suit was settled out of court

Fired in February 2021, he has retained a lawyer who previously represented a woman at Lubbers' previous company, Kelly Services, and sued in 2008 in a similar case.

Lynn Noyes claimed that Kelly Services had failed to promote her because she was not a member of the Fellowship.

A California court awarded her \$6.5 million in damages.

'Anyone outside of the Fellowship is seen as somehow inferior and at times adversarial,' Lloyd's lawsuit says.

'Those that express serious concerns, criticism or question the group may be eventually perceived as enemies.'

Google told The New York Times that they were barred by law from inquiring about someone's religious practices during the hiring process.

'We have longstanding employee and supplier policies in place to prevent discrimination and conflicts of interest, and we take those seriously,' a Google spokeswoman, Courtenay Mencini, said in a statement.

'It's against the law to ask for the religious affiliations of those who work for us or for our suppliers, but we'll of course thoroughly look into these allegations for any irregularities or improper contracting practices.

'If we find evidence of policy violations, we will take action.'

Fellowship of Friends was approached for comment.

THE CORRUPT SENATORS OWNED BY SILICON VALLEY'S BIG TECH - HARRIS, FEINSTEIN, PELOSI

The Bribes are out of control! ---- Can you say INSIDER TRADING STOCK MARKET PAYOLA BRIBES?

• Internal Capitol Police Review Found Sweeping Intelligence, Security Failures On Pelosi's Watch

---- The corruption is easy to prove with a simple spread-sheet but the corrupt Senators have done everything they can to keep you from seeing that spread-sheet.

---- WITH A COURT ORDER – WE CAN PRESENT DETAILED DOCUMENTS ACCOUNTING FOR EVERY CENT IN EVERY ACCOUNT THAT IS CONNECTED TO NANCY PELOSI, DIANNE FEINSTEIN, EVERY MEMBER OF THEIR FAMILY AND THE KICK-BACKS AND INSIDER TRADING THAT PRODUCED THOSE FUNDS!

---- These Senators have “rules” that delay investigations against themselves, though. Also, as we all saw from the Comey case: Corrupt Senators can even tell the head of the FBI who to NOT investigate! The 2008 and 2021 “Stimulus Funds” were just scams cooked up by politicians for them to skim stock market pump-and-dump profits off of and grab personal payola.

---- In all these corruption cases, these corrupt people took the same steps to conceal their assets. They each took the money in secret ways. The main ways are 1.) via Dark Money stealth political funds; 2.) bribes paid via insider trading (notice that most of these crooks marry an investment banker to run their dirty schemes) and 3.) getting government contracts, loans and grants for their friends that they get kick-backs from. They then had their dirty law firms and CPA's shove the money into their standardized covert financial structure to hide it.

---- They use family members to run the operation. Their dirty family members and lawyer/CPA teams cover up their tracks. They then have intermediaries spend the money to get them islands, yachts, mansions, hookers, Tesla's, etc.

--- The 2008 and 2021 “stimulus funds” are quid pro quo scams to pay off political insiders. We reported these crimes (with FBI-class evidence) to every law enforcement agency in writing (FBI, DOJ, SEC, IG, FTC, OSC, FEC, etc.). apparently, citizens are ignored if the crimes involve politicians and their billionaires.

---- The cover-ups are off-the-charts!

---- these mobsters (Google, Tesla, Facebook, Linkedin, Netflix, In-q-tel, Kleiner Perkins, Greylock, etc; acting in a coordinated, collusion-based, operation) are paying billions of dollars of political bribes (...via cash, real estate, sex trafficking, pacs, search engine rigging, crony jobs, biased censoring, campaign funds, stock market manipulations, ukrainian money laundering, etc.) to delay justice and blockade our, and your, rights! There can be no question

about the fact that Google, Facebook, Netflix, Tesla and the Silicon Valley Cartel control the Obama and Biden White House.

---- For example: Elon Musk ordered the politicians who are his bitches to sabotage his competitors. He gave those political insiders: cash, stock in his cartel, revolving-door jobs, campaign funding, sex workers, off-shore money laundering, and other quid pro quo. Eric Schmidt, Larry Page, Mark Zuckerberg, and the rest of the tech mob, all worked together on these crimes.

---- The hacks and leaks of their documents prove it. Government agency bosses are covering up these crimes to protect their jobs and their corrupt stock market holdings. Musk and Goldman Sachs have gotten over FIFTEEN BILLION DOLLARS of free taxpayer cash and monopolized exclusives to pay for Musk's drugs, sex parties and mansions. This is one of the largest violations of anti-trust laws in history. The politicians and agencies that are supposed to stop him are getting money from him. Musk exists entirely from quid pro quo bribes! Musk's banks, including Deutsche Bank, have had to pay more than \$100 million to settle charges related to violating anti-bribery laws and engaging in money laundering. While the Musk-controlled media bloviate on the god-like image of Musk, he and his buddies are just crooks and mobsters. -

--- It is now almost impossible for the public to reach any media source that is not controlled by the Silicon Valley Cartel via synchronized talking points. Politicians who say that their only motivation is to "save" the helpless billionaire Elon Musk and his unicorns: 1.) sabotage any companies who are not making Tesla's, 2.) have sex with Tesla lobbyists and bankers, 3.) own the stock in Tesla Motors, 4.) are venture capital partners in Kleiner Perkins (ie: Gore) and Greylock capital insiders, 5.) trade revolving door jobs with the Elon Musk cartel, 6.) gave Musk over \$15B of free taxpayer money, 7.) get campaign financing from Musk, 8.) order government agencies to freeze funding for Musk's competitors, 9.) and engage in a vast number of other corruption and anti-trust crimes.

---- U.S. Senators, Agency Heads and Congress are bribed by Google intermediaries with: Billions of dollars of Google, Twitter, Facebook, Tesla, Netflix and Sony Pictures stock and stock warrants which is never reported to the FEC; Billions of dollars of Google, Twitter, Facebook, Tesla, Netflix and Sony Pictures search engine rigging and shadow-banning which is never reported to the FEC; Free rent; Male and female prostitutes; Cars; Dinners; Party Financing; Sports Event Tickets; Political campaign printing and mailing services "Donations"; Secret PAC Financing; Jobs in Corporations in Silicon Valley For The Family Members of Those Who Take Bribes And Those Who Take Bribes; "Consulting" contracts from McKinsey as fronted pay-off gigs; Overpriced "Speaking Engagements" which are really just pay-offs conduited for donors; Private jet rides and use of Government fuel depots (ie: Google handed out NASA jet fuel to staff); Real Estate; Fake mortgages; The use of Cayman, Boca Des Tores, Swiss and related money-laundering accounts; The use of HSBC, Wells Fargo, Goldman Sachs and Deutsche Bank money laundering accounts and covert stock accounts; Free spam and bulk mailing services owned by Silicon Valley corporations; Use of high tech law firms such as Perkins Coie, Wilson Sonsini, MoFo, Covington and Burling, etc. to conduit bribes to officials. This will never end unless the public demands laws to prevent all politicians, and their families, from owning ANY stock market stocks or securities!

----So, while the categories covered in this investigation may seem diverse. They are connected through an enterprise of criminality and illicit, coordinated operations. We list, by name, the 120 most complicit individuals organizing these crimes, in the evidence documents already submitted to the FBI, FINCEN, DOJ, FTC, SEC, FEC, Congress, InterPol and other authorities. Digital financial tracking of those persons and all of their family members should be assumed to have been under way for some time. Wire-taps and device taps of those persons and all of their family members should be assumed to have been under way for some time.

The corruption is easy to prove with a simple spread-sheet but the corrupt Senators have done everything they can to keep you from seeing that spread-sheet. ---- INSIDER TRADING with layered stock market payola is the top bribe method for politicians, these days!

---- If you saw the spread-sheet that shows all of the covert family bank accounts, fake trust funds, shell companies and stock market accounts for Dianne Feinstein, Harry Reid, Nancy Pelosi, etc.; you can easily see how they only get a salary of \$190K per year but put hundreds of millions of dollars in their accounts that all traces back to special interest groups that tell them what laws to make and what laws to stop from moving forward. Forensic accountants at the GAO, FBI or SEC can pop out the latest update on any given day.

---- These Senators have "rules" that delay investigations against themselves, though. Also, as we all saw from the Comey case: Corrupt Senators can even tell the head of the FBI who to NOT investigate! The 2008 and 2021 "Stimulus Funds" were just scams cooked up by politicians for them to skim stock market pump-and-dump profits off of and grab personal payola.---- In all these corruption cases, these corrupt people took the same steps to conceal their assets. They each took the money in secret ways. The main ways are 1.) via Dark Money stealth political funds; 2.) bribes paid via insider trading (notice that most of these crooks marry an investment banker to run their dirty schemes) and 3.) getting government contracts, loans and grants for their friends that they get kick-backs from. They then had their dirty law firms and CPA's shove the money into their standardized covert financial structure to hide it.

---- They use family members to run the operation. Their dirty family members and lawyer/CPA teams cover up their tracks. They then have intermediaries spend the money to get them islands, yachts, mansions, hookers, Tesla's, etc. -

--- The 2008 and 2021 "stimulus funds" are quid pro quo scams to pay off political insiders. We reported these crimes (with FBI-class evidence) to every law enforcement agency in writing (FBI, DOJ, SEC, IG, FTC, OSC, FEC, etc.). apparently, citizens are ignored if the crimes involve politicians and their billionaires. the cover-ups are off-the-charts! these mobsters (Google, Tesla, Facebook, LinkedIn, Netflix, In-q-tel, Kleiner Perkins, Greylock, etc; acting in a coordinated, collusion-based, operation) are paying billions of dollars of political bribes (...via cash, real estate, sex trafficking, pacs, search engine rigging, crony jobs, biased censoring, campaign funds, stock market manipulations, ukrainian money laundering, etc.) to delay justice and blockade our, and your, rights! -

--- There can be no question about the fact that Google, Facebook, Netflix, Tesla and the Silicon Valley Cartel control the Obama and Biden White House. For example: Elon Musk ordered the politicians who are his bitches to sabotage his competitors. He gave those political insiders: cash, stock in his cartel, revolving-door jobs, campaign funding, sex workers, off-shore money laundering, and other quid pro quo. Eric Schmidt, Larry Page, Mark Zuckerberg, and the rest of the tech mob, all worked together on these crimes. The hacks and leaks of their documents prove it. Government agency bosses are covering up these crimes to protect their jobs and their corrupt stock market holdings.

---- Musk and Goldman Sachs have gotten over FIFTEEN BILLION DOLLARS of free taxpayer cash and monopolized exclusives to pay for Musk's drugs, sex parties and mansions. This is one of the largest violations of anti-trust laws in history. The politicians and agencies that are supposed to stop him are getting money from him. Musk exists entirely from quid pro quo bribes! Musk's banks, including Deutsche Bank, have had to pay more than \$100 million to settle charges related to violating anti-bribery laws and engaging in money laundering. While the Musk-controlled media bloviate on the god-like image of Musk, he and his buddies are just crooks and mobsters. It is now almost impossible for the public to reach any media source that is not controlled by the Silicon Valley Cartel via synchronized talking points.

---- Politicians who say that their only motivation is to "save" the helpless billionaire Elon Musk and his unicorns: 1.) sabotage any companies who are not making Tesla's, 2.) have sex with Tesla lobbyists and bankers, 3.) own the stock in Tesla Motors, 4.) are venture capital partners in Kleiner Perkins (ie: Gore) and Greylock capital insiders, 5.) trade revolving door jobs with the Elon Musk cartel, 6.) gave Musk over \$15B of free taxpayer money, 7.) get campaign financing from Musk, 8.) order government agencies to freeze funding for Musk's competitors, 9.) and engage in a vast number of other corruption and anti-trust crimes. -

--- U.S. Senators, Agency Heads and Congress are bribed by Google intermediaries with: Billions of dollars of Google, Twitter, Facebook, Tesla, Netflix and Sony Pictures stock and stock warrants which is never reported to the FEC; Billions of dollars of Google, Twitter, Facebook, Tesla, Netflix and Sony Pictures search engine rigging and shadow-banning which is never reported to the FEC; Free rent; Male and female prostitutes; Cars; Dinners; Party Financing; Sports Event Tickets; Political campaign printing and mailing services "Donations"; Secret PAC Financing; Jobs in Corporations in Silicon Valley For The Family Members of Those Who Take Bribes And Those Who Take Bribes; "Consulting" contracts from McKinsey as fronted pay-off gigs; Overpriced "Speaking Engagements" which are really just pay-offs conduited for donors; Private jet rides and use of Government fuel depots (ie: Google handed out NASA jet fuel to staff); Real Estate; Fake mortgages; The use of Cayman, Boca Des Tores, Swiss and related money-laundering accounts; The use of HSBC, Wells Fargo, Goldman Sachs and Deutsche Bank money laundering accounts and covert stock accounts; Free spam and bulk mailing services owned by Silicon Valley corporations; Use of high tech law firms such as Perkins Coie, Wilson Sonsini, MoFo, Covington and Burling, etc. to conduit bribes to officials. This will never end unless the public demands laws to prevent all politicians, and their families, from owning ANY stock market stocks or securities! -

--- There are hundreds of millions of people in America. The same 120 of them are all involved in operating the same crimes and corruption including: the Sony Pictures corruption; the Afghanistan rare earth mine scandals operated through The Energy Department political slush fund that involves the lithium battery cover-ups (headed by Elon Musk); the Big Tech Brotopia rape, sex trafficking, bribery, exclusionism, racism and misogyny issues they were taught at Stanford University; The Facebook - Meta - Google - Alphabet - Netflix, et al, coordinated news manipulation and domestic spying that they engage in; the hiring of Fusion GPS - Black Cube - Gizmodo/Gawker assassins; the destruction of the housing market by their mass real estate manipulations; patent theft and industrial espionage; and the bribery of almost every politician all the way up to the Oval Office.

The social horror that 'Silicon Valley' became is just a bubble of social abuse waiting to burst. Let's count down the days until it finally implodes.

---- All Of Silicon Valley needs to be "KILLED OFF" without breaking a single law. They can never be fixed. It's easy to do with one simple, 100% legal, weapon: THE TRUTH! -

--- Said one Bay Area developer: "These crooks don't get to buy private jets, sex islands, multiple mansions, throw celebrity parties and buy hookers with MY money! If they are making big bucks off my technology, I get my percentage of what they spied on, copied and theived or they get exposed for what they are. I will bring the FBI, DOJ, CIA, FTC, SEC, FEC, FINCEN, 60 Minutes and Congress, along with my team, to help take them down..."

---- PAYBACK IS A BITCH FOR BIG TECH COMPANIES THAT USED THEIR BUSINESS FRONTS TO OPERATE: BRIBES TO CONGRESS, TAX-EVASION, SEX-TRAFFICKING, PATENT THEFT, ELECTION MANIPULATION, SHADOW-BANS, EMPLOYEE SEXSTORTION, OFF-SHORE MONEY LAUNDERING, STOCK MARKET MANIPULATION, BLACKLISTS, MONOPOLIES AND, WORST OF ALL, HIRED FUSION GPS, BLACK CUBE, IN-Q-TEL AND MEDIA MATTERS TO RUN ILLEGAL HIT-JOBS ON THEIR

COMPETITORS! ISN'T IT INTERESTING THAT EVERY SINGLE ATTACKER HAS LOST BILLIONS OF DOLLARS IN STOCK VALUATION?

---- KARMA? PAY-BACK? HMMMMMM...???: BREAKING NEWS LINK: HA- HA -HA! THE EXACT SAME COMPANIES THAT STOLE SCOTT'S STUFF AND THEN VIOLATED HIS ANTI-TRUST PROTECTIONS ARE GETTING NAILED! KARMA - KARMA- KARMA! TECH VALUES CHOPPED AS PALO ALTO'S CORRUPT MEDIA EMPERORS FOUND TO HAVE NO CLOTHES ---- BREAKING NEWS LINK: How The Sick Pervert Billionaires Boys' Club Came To Dominate The Public Square And Rig Elections

---- STOCKS DEADLY UGLY AS SILICON VALLEY CARTEL TURNS OUT TO BE ALL HYPE AND NOTHING OF REAL VALUE

---- THE SILICON VALLEY MAFIA COORDINATE THEIR CRIMES VIA SAND HILL ROAD INSIDERS AND THAT VIOLATES RICO AND MONOPOLY LAWS!

---- Silicon Valley has had the largest number of Congressional hearings against it, the largest number of consumer complaints in American history BUT the least number of regulations imposed on it. Why? You can look no further than the covert ownership of Silicon Valley by elected officials. Our politicians get paid bribes, by Silicon Valley, to keep the political corruption alive-and-well while they operate, with impunity, as the biggest threats to society ever manifested.

---- Politicians protect Silicon Valley and allow them to keep doing crimes!

---- WHAT CRIMES ARE WE UPSET ABOUT SILICON VALLEY DOING?: Silicon Valley is producing child suicides, racism, misogyny, child mental health threats, domestic spying, data harvesting, sex trafficking, election manipulation, tax evasion, Fusion GPS/Media Matters/ Black Cube hit jobs on competitors, censorship, contrived market monopolization, intellectual property theft, political bribery and many other crimes! Why? Because crime pays...for corrupt U.S. Senators!

---- “EVERY SINGLE ENTITY THAT ATTACKED US HAS LOST A MINIMUM OF A BILLION DOLLARS OF STOCK MARKET VALUATION OR GONE BANKRUPT....” -

--- YOU CAN KILL ANY CORRUPT ENTITY WITH: “THE TRUTH”!

---- In the Age of Transparency, also known as The Great Disruption. Many document leaks have taken place, and more are expected, with particularly shocking data. The public has now become way moree savvy about information tools. This nexus of factors has created a new reality.

---- As billionaires and super-corporations become more prolific, their hubris, tone-deafness, and egotistic excesses seem to increase. -

--- In this new age of equal access to all information, every member of the public now has access to the same investigation resources that the FBI and CIA have. Over 2000 online service providers will track down any crime, at any corporation or in any billionaies portfolio. You can, now, easily, hunt down the hookers, criminal expense accounts, tax evasion shelters, abuse of funds, insider trading, political bribes, mistresses, and other corporate misdeeds of each and every executive at a company.

----The lesson to the wise: If you are a cocky billionaire, or corporation, one week; you can now be an out-of-business corporation, or billionaire, the next week. Be honest, legal and moral and you won't get the axe.

----- BY THE WAY: ATTACKS AND CENSORSHIP BY GOOGLE-ALPHABET-YOUTUBE: We have placed more software sensors on more server networks globally than anyone else has ever announced. When Google-

Alphabet-YouTube Shadow Bans, DNS re-routes, Hides, Demonetizes, Search Manipulates, Server Table Edits, Censors, Election Rigs, SEO limits, etc; our links, we record it, document it technically and report it to every regulatory and publishing group in the world. We also compile the data into evidence for lawsuits against Google and each Google executive. Our insiders work at the deepest levels of their operation. It isn't nice to mess with Mother Nature or Freedom Of Speech. It's worse to run tax evasion, sex trafficking, dark money funds, real estate fraud and other crimes from inside Google! -

--- Our autonomous monitoring applications are on a vast number of co-location servers, shared hosting ISP's, stand-alone servers and sites around the world and have been operating for over ten years. We log: 1.) Google's search results compared to other search engines, 2.) Google's DNS and spoofing activities, 3.) Google's results on 100 key search terms including search terms of assets, candidates and business associates connected to Google (ie: "Obama", "Elon Musk", "Election Results", etc.), 4.) Where Google sends data from users clicking on Google supplied links, 5.) Where fabricated "mole" data that was injected as user data ultimately ended up later, 6.) Google's election manipulation attempts, and other metrics. The results prove that Google abuses the market, the public, privacy rights, politics and human rights.

---- So Google, every time you do it, you are just digging your own grave and giving us all the proof we need to wipe you out, process anti-trust filings and expose your monopolist, sex trafficking, sociopath owners! -

----- The National Venture Capital Association (NVCA) is a white male, mostly jewish, sexist, racist, elitist, dynastic mobster-like mafia venture capitalist Cartel formed by an inner-circle set of fraternity buddies that invest per a coordinated global ideology scheme. They make sure that their competitors never get any money. James Breyer, Gilman Louie and Eric Schmidt love this tech Mafia.

----- Is collusion, market-rigging, technology blockading, good-ole-white-boy privilege clubbing, frat-house bro-biz secret alliance meeting, woman and black discriminating going on in Silicon Valley and Wall Street? You bet it is! If you web-search the "Angel-Gate Collusion Scandal", you will read about how a reporter saw, and documented, a Silicon Valley secret meeting where investors were colluding on who would get funding, who wouldn't and at what rates. The, now famous "Silicon Valley Anti-Poaching Scandal" has overtly proven that these people are classic "Cartel".

----- It turns out, if you didn't go to Stanford, or you are not part of the Indian-Elite sub-mafia, you are not getting funded.

----- With it's deep CIA connections, Goldman Sach's alliances and enough cash to bribe Congress twenty times over, groups like the National Venture Capital Association (NVCA) raise concerns, across the board, about their potentially destructive play in the fall of innovation and the domestic economy in America.

----- This notoriously elitist, yuppie, privileged frat house crowd does not like anything that they can't control. They have, in many cases, agreed among themselves, which energy technology will be "allowed" to hit the market; which electric cars will, or won't, get funded; which video delivery systems get to become dominant on the web; which social networks get all of the media (a large part of said media being owned and controlled by these men); and which other technologies live or die. These are the people involved in the vast number of sex scandals, murders-by-hooker, "sex yacht and sex penthouse" lurid news, rape lawsuits and other twisted perversions on the 6PM news. They are not nice people. One of them: Raj Gupta sits in Prison. Another: White Car Czar Steven Rattner was indicted for Securities Law Rigging. Ray Lane was indicted for massive tax evasion. They are all under investigation for shipping billions of tax dollars to Ireland and other tax hide-away's. Eric Schmidt practically lives at the White House and is under investigation by hundreds of entities.

----- The largest private investigation firm of the Elite's was exposed in WIKI-Leaks calling Peter Thiel: "Fu*cking Nuts". Tim Draper wanted Silicon Valley to be so elite that he tried to make it into it's own state. Joe Lonsdale is under lawsuit for rape. Mr. Hayes and Mr. Kumar were killed by Hookers. John Doerr and Vinohd Khosla are called out in national news stories for sex abuse, California Beach take-overs from the public and hundreds of billions of dollars in "Green Energy" kick-backs from their friend Steven Chu. The list of cringe-worthy news stories about these folks goes on and on. -

---- If you are an outsider, or competitor, they can, and do, sabotage your company in no time flat with moles, hack attacks, DDOS attacks, media character assassination attacks, "Merchants of Doubt" (See the movie) aspersions, civic awards blockades, contract terms exclusions, hire-aways, anti-poaching cartel secret deals and a host of weapons that they use daily. ----- Do the Justice Department, The Securities and Exchange Commission, or other federal forces do anything about this? Not much. These men pay the bribes that keep Washington floating. They have paid hundreds of billions of dollars, in "tribute", to the current Administration. It isn't wise to bite the hand that feeds you.

----- This kinds of things do affect the average person by creating more discrimination that they have to endure, a worse economy, a less favorable impression of their country, deeper misogyny, less equality, more privilege. If it bothers you, and you have ever paid taxes, call the FBI, SEC, GAO and Congressional phone numbers that you see online and ask them what they are doing about it. ---- Most of the women that work wit the NVCA quit due to sexual abuse -

---- The NVCA and the CIA's IN-Q-TEL are business partners in election rigging, anti-trust law violations and tech RICO law violations.

HOW CITIZEN SLEUTHS ARE DESTROYING THE CORRUPT POLITICIANS AND OLIGARCHS

How did we fight back against the most powerful organized crime entity on Earth?

We get that question all the time. Here is the answer.

First, they started it. The bad guys attacked us because our products and services were better than theirs and they could not compete. They decided to cheat rather than compete and they cheated with political bribes, black-lists, collusion and other anti-trust violating acts. When we helped law enforcement investigate them, the bad guys doubled down on their attacks. The bad guys crossed the line when they used our own government officials and taxpayer funds to operate their crimes. They broke felony laws and the basic principles of Democracy.

So who are these mobsters? They are your Senators, White House Staff, insider agency staff and their Silicon Valley Oligarch sociopath political financiers. Some of your public officials set-up, operated and maintained an organized crime scheme for personal profit at the expense of every taxpayer. They went after Five Trillion dollars of your tax money for their personal interests via rigged stock market scams, rigged government contracts, exclusionary policy manipulations and other schemes that harmed American taxpayers.

We are taxpayers...so.. Game On!

We wrote FBI-quality criminal activities reports and filed them with every law enforcement and regulatory agency in every country in the world that we could find, including the FBI, OSC, GAO, EU, Interpol, FSB, UN, etc.

HOW TO DESTROY ANY CORRUPT COMPANY OR PERSON ON EARTH

YOU can fight back and destroy dirty oligarchs!

The tech Cartel is evil because they steal any technology they desire; they run a prostitution ring and sexually extort young women and interns in Silicon Valley; they are misogynists, ageists and racists as their history of abuses has proven; their Palo Alto Cartel operates AngelGate-type collusion and stock market insider trading schemes that harm independent business and the public; Their Cartel ran the "no poaching" CEO ring which was class-action sued by DOJ and tech workers; 90% of their divorce court files reveal horrific abuses and sex trafficking; They have an army of lobbyists that pay cash, stock market and revolving door bribes to U.S. Senators; They can even evade FBI & SEC investigations; They hire women to act as 'trophy wives' and 'beards'; they have lobbyists rig the U.S. Patent Office in order to block inventor patent rights because they are using stolen technologies; they have been caught on video and recordings beating, kicking and harming women hundreds of times; They have bought up all of the Tier-One tech law firms and order them to never help those who seek equal tech rights; they collude to abuse your privacy and make databases on the public for political control; they have to cheat to compete because they are only good with spread sheets instead of innovation; They run black-lists, character assassination attacks, collusion and other anti-trust violating acts in violation of RICO laws.

When the bad guys, and their lap-dog politicians, attack you because your products are better than theirs they are proving that they are frat boy scumbags, from Stanford and Yale, that operate in a little pack, like dogs! Their Sandhill Road operation should be raided by the FBI! The best thing that could come from the COVID pandemic is that they all are forced into bankruptcy!

When your Senator holds stock market shares in companies that exist to profit on the backs of consumers, then it is impossible for that Senator to ever do anything but be corrupt!

The crooks at Google, Facebook, Tesla, Linkedin, Netflix, etc., broke felony laws and the basic principles of Democracy.

They bribed your Senators, White House Staff, insider agency staff and operated a Silicon Valley Oligarch sociopath political Cartel.

As Mother Jones top editor says:

In 18 years of living here, I find zero evidence that the "City Family" is benefiting anybody but its members, developers, old-school socialites, and tech billionaires.

I can't even with how insular and incestuous and corrupt SF is. Mayor @londonbreed acknowledges she had relationship with DPW Nuru two decades ago and that they remained close friends <https://t.co/HEhIlulkyj>

— Clara Jeffery (@ClaraJeffery) February 14, 2020

Your public officials set-up, operated and maintained an organized crime scheme for personal profit at the expense of every taxpayer. They went after Five Trillion treasury dollars of your tax money for their personal interests via rigged stock market scams, rigged government contracts, exclusionary policy manipulations and other schemes that harmed American taxpayers.

YOU OWE IT TO YOURSELF AND THE NATION TO TAKE THEM DOWN!

You must write FBI-quality criminal activities reports and file those reports, by certified mail, with every law enforcement and regulatory agency in every country in the world, including the FBI, OSC, GAO, EU, Interpol, FSB, UN, etc. CC the social media sites with your reports.

You can use basic private investigator websites to track and back-ground every person, organization and company involved in the corruption and trace their RICO law violations. You can provide that data to The U.S. Congress and every agency, with a copy to every social media posting.

You can now use open-source, free, collaborative NSA-class global databases that can track all of the locations, hookers, fake fronts, family trusts, bank accounts, stock market accounts, bribes and other goodies, of any corrupt public official, in minutes! You get that free anti-corruption software from GitHub, CodePen, Torrents, Onion Project, The Guardian, ICIJ and all over the web.

YOU open your own private investigator/citizen sleuth crowd-sourced investigations into the following:

- Every stock market account they or their family owns
- Every Uber or Lyft ride they ever took for any meeting or transport of sex workers
- Every flight manifest they appeared on
- Every bank account they have ever held
- Every lawsuit, divorce record and police record they have ever appeared in
- Every trust fund they or their family holds
- Every shell corporation they, or their family holds
- Every person named in the Epstein Pedo book: <https://www.scribd.com/document/416207833/Jeffrey-Epsteins-Little-Black-Book-Redacted> cross referenced across all of the other databases and then supplied to the FBI and Child Protection Agencies
- Every item in the Swiss Leaks that cross connects to their holdings
- Every item in the Panama Papers Leaks that cross connects to their holdings
- Every item in the WikiLeaks that cross connects to their holdings
- Every item in the Snowden Leaks that cross connects to their holdings
- Every sex trafficking incident that connects to each of them alone, and in groups
- Every financial transaction between any of the parties on the master list and the character assassination and hit job firms of: Google, Univision, Gawker Media, Unimoda, Jalopnik, Gizmodo, Black Cube, Fusion GPS, Media Matters, Think Progress, IN-Q-Tel, K2 Intelligence, WikiStrat, Podesta Group, YouTube, Alphabet, David Drummond, Larry Page, Facebook, Correct The Record, Stratfor, ShareBlue, Sid Blumenthal, David Brock, Eric Schmidt, Sunshine Sachs, Covington and Burling, BuzzFeed, Perkins Coie and Wilson Sonsini or their derivatives with common owners.
- Every item in the Quest Leaks that cross connects to their holdings
- Every tactical deployment, by a campaign financier, of the tactics listed in this manual: <https://www.cia.gov/library/readingroom/docs/CIA-RDP89-01258R000100010002-4.pdf>
- Every sex service that their credit card payments every connect too
- Every real estate transaction that any name or company they, or their family, were involved in, tracks to
..... and hundreds of thousands of other information points about them that prove that they benefit from crimes that they engage in for others who engage in crimes using the America public policy system.

It all goes into shared 100% legal public collaborative databases that work like XKEYSCORE, or MS Access, or Oracle Databases.

The proof of collusion, organized criminal actions and raw covert corruption is indisputable. The actors are all the same people. The beneficiaries are all the same people. The communications between the parties all coordinate the same actions.

Demand their arrests, indictments, exposures and bankruptcies in public ads, letters to the editor, blog posts, bumper stickers, lawsuits, flyers, newsletters, email and every other outreach manner.

Say "Fuck You" to the Silicon Valley Oligarch 'Illuminati' scumbags and the crooked Senators and Governor's they bribed.

Show these oligarch crooks what billions of taxpaying voters with collaborative FBI-class forensics investigation software can do to their corrupt tech Cartel!

What To Do To Write Up The Dossier On Each Person And Each Corrupt Politician:

1. Dig through their trash and buy their trash bags from the garbage man after they pick them up
2. Locate a beneficiary for a probate proceeding
3. Research current and / or historical property holdings
4. Identify mortgage information
5. Identify secured lenders
6. Identify related party property transactions
7. Determine current market value of real property
8. Locate bankruptcy filings
9. Retrieve and analyze bankruptcy records
10. Uncover improper relationships
11. Locate federal civil lawsuits
12. Locate federal criminal records
13. Retrieve and analyze federal civil and criminal records
14. Retrieve mug shots from arrest records
15. Provide independent analysis
16. Locate state and local criminal arrest records
17. Retrieve and analyze review criminal records
18. Provide peace of mind
19. Locate home phone numbers
20. Locate cell phone numbers
21. Identify owner of home or cell phone number
22. Determine owners of corporation
23. Retrieve and analyze corporate records

24. Locate current or former executives
25. Interview current or former executives
26. Find and retrieve judgment and lien filings
27. Research familial history
28. Connect the dots
29. Locate witnesses for a civil or criminal lawsuit
30. Interview witnesses for a civil or criminal lawsuit
31. Find assets
32. Find current or historical boat registrations
33. Find current or historical aircraft registrations
34. Search for hidden assets
35. Conduct business intelligence
36. Discreet intelligence gathering
37. Determine connections between parties
38. Locate bank account information
39. Locate current or former employees of a company
40. Interview current or former employees of a company
41. Locate significant inheritances
42. Show you the big picture
43. Identify a will for an estate
44. Locate probate records
45. Identify foreign assets
46. Locate regulatory records
47. Identify regulatory actions
48. Identify professional licenses
49. Determine prior disciplinary records for professional licenses
50. Analyze state and federal political contributions
51. Analyze state lobbyist records
52. Analyze federal lobbyist records
53. Identify potential whistleblowers
54. Vet expert witnesses

55. Interview industry sources
56. Gather competitive intelligence
57. Identify related party business transactions
58. Retrieve and analyze non-profit financial filings
59. Knock on doors
60. Obtain and analyze Department of Labor Form 5500 Filings
61. Submit FOIA / FOIL requests to government agencies
62. Obtain driving record history (in applicable states)
63. Find current vehicle registrations
64. Find historical vehicle registrations
65. Make you look brilliant
66. Determine current market value of motor vehicles
67. Assist with jury selection
68. Background checks on prospective jurors
69. Analyze documents for potential fraud
70. Identify Risks
71. Identifying corporate relationships
72. Give you a competitive advantage
73. Identify Uniform Commercial Code filings
74. Foreign corporation research
75. Help you manage sensitive situations
76. Overseas litigation research
77. Identify stock ownership
78. Find facts
79. Locate online resume
80. Identify online networking profiles
81. Locate historical video or news footage
82. Conduct historical newspaper research
83. Conduct mobile or stationary surveillance
84. Perform clandestine operations
85. Find undisclosed ties

86. Identify and retrieve U.S. Tax Court cases
87. Locate a missing person
88. Identify and confirm education history
89. Identify and confirm previous employment history
90. Scour the Internet
91. Research presence on social networks or message boards
92. We will tell you what those bastards are up to!
93. Send the IRS information about how Google, Netflix, Alphabet are cheating on their taxes and hiding money in Ireland and the Cayman Islands. Get the IRS to sue the oligarchs in tax court.
94. Enhance the publishing of research articles proving that Silicon Valley tech companies destroy the minds of children with tech addiction and brain manipulation and get parents to sue those companies for harming their children
95. Expose every secret cash conduit that the oligarchs use to bribe politicians
96. Demand new laws in Congress to stop politicians from owning any stock because that is the #1 source of bribes
97. Use lip-reading software to see what they are saying or have an actual deaf-person do it
98. Photograph them with any hotties they are seen with and then face-track the hotties to see if they are hookers or ill-repute escorts
99. Use one of the many free on-line news publishing softwares and make a global online newspaper that constantly exposes their crimes
100. Write every federal agency and demand investigation and prosecution of the perps
101. Assemble the massive number of news reports about their sex scandals and distribute those reports as books, articles, documentaries and news aggregations to prove what a bunch of sick perverts these people are
102. Publish the speaker list from Techonomy, Davos, TED, Burning Man, etc. to show that it is always the same little group of arrogant assholes that self-promote their hype at each of these elitist events
103. Leave notices on the windshield of any of their Tesla's reminding them what douche-bags they are
104. Organize petitions and letter-writing campaigns to have the overtly corrupt ones removed from their jobs
105. Go to their share-holder meetings and hand-out flyers about their corruption
106. Hire Charles Spies (<https://www.dickinson-wright.com/our-people/charles-spies?tab=0>) to sue them
107. Hire Harmeet K. Dhillon (<http://www.dhillonlaw.com>) to sue them
108. Hire COA (<http://www.causeofaction.org>) to sue them
109. Hire law firms from China or Russia to sue them for a very low price
110. Hire Steven S. Biss (<http://www.linkedin.com/in/steven-s-biss-6517037>) to sue them
111. Blog about the corruption of the political targets every day with the day's news each day
112. Read their divorce filings in court records and see who else might help expose their corruption

113. Read their locations over the last 12 months - <https://www.protocol.com/government-buying-location-data>
114. Talk to every neighbor that has filed a complaint about them
115. Hire Pierce Bainbridge Beck Price & Hecht LLP to sue them, especially tech media companies
116. Re-read all of the latest "How To Be A Private Investigator" books and brochures
117. Ask Paul Kangas in San Francisco how he investigates the corrupt
118. Go back to <http://www.pacer.gov> and read each of the lawsuits against them to get more clues about them
119. Put a card table and a pop-up booth outside their office and hand out flyers about them
120. Publish every stock market share they, and their family, owns
121. Produce a dossier on every corrupt partner of every Silicon Valley VC firm
122. Know that there are over 3000 additional forensic tools you can use to expose them 100% legally...

The Big Book Of Revenge: 200 Dirty Tricks for Those Who Are Serious About Getting Even [George Hayduke] on Amazon.com. *FREE* shipping on qualifying offers. Book by Hayduke, George

POLITICAL KILL ORDERS AND STATE-SPONSORED CHARACTER ASSASSINATIONS

THE MEDIA ASSASSINS: POLITICAL KILL ORDERS AND STATE-SPONSORED CHARACTER ASSASSINATIONS

– How A Modern Character Assassination and Political “Kill Order” Is Executed By the Silicon Valley Oligarchs and their total control of propaganda media. Patrick George At Jalopnik attacks outsiders under contract with Elon Musk and the DNC. Silicon Valley campaign finance oligarchs hire him to run hatchet jobs on innocent outsiders and then Gawker-Gizmodo-Jalopnik uses their financial partnership with the DNC’s Google to push the character assassination articles to the top of Google web products and searches.

---- Patrick George, Adrian Covert, John Hermann and Nick Cook are the sexually degenerate cabin boys that report to boy-loving sleaze-tabloid oligarch Nick Denton. They created the Fake News crisis in the media by flooding the internet with defamation posts and reprisal hatchet job articles designed to damage political enemies of the Socialists. They coordinate a large number of the character assassination efforts at Gawker, Gizmodo, Jalopnik, CNN, New York Times and other propaganda outlets. These Millennial boys are “Media Rapists” and should be treated as abusers.

---- It is all part of the modern trend in vendetta, revenge and political payback when a Senator or a tech oligarch issues a “kill order” on an opponent. – The client does not like to get their hands dirty so the actual social hit job is performed by companies such as: IN-Q-Tel – (DNC); Gawker Media – (DNC); Jalopnik – (DNC); Gizmodo Media – (DNC); K2 Intelligence – (DNC); WikiStrat – (DNC); Podesta Group – (DNC); Fusion GPS – (DNC/GOP); Google – (DNC); YouTube – (DNC); Alphabet – (DNC); Facebook – (DNC); Twitter – (DNC); Think Progress – (DNC); Media Matters – (DNC); Black Cube – (DNC); Mossad – (DNC); Correct The Record – (DNC); Sand Line – (DNC/GOP); Blackwater – (DNC/GOP); Undercover Global Ltd (DNC/GOP) Stratfor – (DNC/GOP); ShareBlue – (DNC); Wikileaks (DNC/GOP); Cambridge Analytica – (DNC/GOP); Sid Blumenthal- (DNC); David Brock –

(DNC); PR Firm Sunshine Sachs (DNC); Covington and Burling – (DNC), BuzzFeed – (DNC) Perkins Coie – (DNC); Wilson Sonsini – (DNC) and hundreds of others... These are the people and companies that except cash, revolving door jobs, political appointments, insider trading stock in Silicon Valley tech companies, prostitutes and real estate in exchange for destroying the lives of others.

– These attackers deserve to be punished for the rest of their lives for taking away the lives of others in exchange for cash. Any company who is corrupt enough to hire any of these assassins should be forced out of business.

---- These attack services are responsible for 90% of the “Fake News” problem in the world because they are the authors of most fake news. Congress must act to make these kinds of companies illegal– In the case of reporters getting targeted for attacks, President Donald Trump has been accused by the liberal corporate media of whipping up a hateful frenzy against the press. But while CNN’s Jim Acosta grandstands against Trump, real journalists are still reeling from the draconian extrajudicial measures that Barack Obama and his administration used to target them for exposing truth.

– This secretive targeting occurred while Obama speechwriter and hate-filled ANTIFA supporter Ben Rhodes was running “Operation Echo Chamber,” which reportedly continues, in which he fed information to willing corporate media scribes. “They literally know nothing,” Rhodes said of the twentysomething journalists he easily manipulated.

– Timm writes: “Today, we are revealing—for the first time—the Justice Department’s rules for targeting journalists with secret FISA court orders. The documents were obtained as part of a Freedom of Information Act lawsuit brought by Freedom of the Press Foundation and Knight First Amendment Institute at Columbia University.”

– Larry Schweikart reported for Big League Politics: For months pundits and researchers have been pondering the mystery of the FISA approval that led to the illegal and historically titanic scandals to ever hit the U.S. government.

---- Some have argued that Assistant Attorney General Rod Rosenstein knew the FISA was bogus when he extended it. Others have wondered if Special Counsel Robert Mueller knew about the fraudulent basis of the FISA when he used it, in part, to indict Michael Flynn. Other still, that Mueller was fooled by the FBI. This is what President Trump calls “SPYGATE”. – It may well be that the surveillance that was conducted began with UK intelligence services and then was fed back to the White House of Barack Obama. Here’s the kicker: President Barack Obama did not need a FISA warrant to authorize spying/electronic surveillance on Trump because Obama all along had legal authorization to by-pass the normal court vetting process. According to 50 U.S. Code 1802, the “Electronic Surveillance Authorization” () “Foreign intelligence in relation to a US person (Trump or his associates) is information that’s necessary for the US to protect against attack, hostile acts, sabotage, . . . as well as other clandestine activities by a foreign power . . . OR . . . information relevant to national defense/security of the US, or the conduct of foreign affairs of the U.S.” Such an authorization by Obama required certification by Attorney General Loretta Lynch that must be logged with the FISC court. (“The [AG]+ shall immediately transmit under seal to the court [FISC] a copy of his certification.”)

– In short, the DOJ has this. If we are correct, a copy of that certification is currently under seal at least with the DOJ and the FISC.

– This is what they are hiding. – However, the Act requires the AG to keep the Select Committee on Intelligence and the Senate Committee on Intelligence informed of these authorizations and unmaskings therein. See 1803 (a) (1) (C) If indeed this is what happened, did Lynch report—or only selectively report—to the committees in a way that excluded non-friendlies? Can you see why Adam Schiff, Mark Warner, and their ilk are terrified?

– These are the playbook tactics that Senators and tech oligarchs most often use to destroy the lives of their political and business enemies: – Government agency bosses sometimes solicit the target victims with false promises of future loans, contracts or grants from their agency and cause the target victims to expend millions of dollars and years of their time for projects which those government bosses had covertly promised to their friends. They use the target victims as a “smokescreen” to cover their illegal government slush-funds for the victims competitors and personal enemies.

---- By using this tactic, the attackers can drain the target victims funds and force them into an economic disaster in plain view of everyone without the government bosses fearing any reprisal for their scam.- Every match.com, okcupid.com, Plenty Of Fish, Seeking Arrangements and all other IAC-owned, or similar, dating sites (IAC is managed by Hillary Clinton’s daughter) have had their profiles, texts, and inter-member communications, since those companies were started, hacked or purchased. The attack service providers use Palantir and In-Q-Tel financed data analysis software to analyze every activity in those dating services in order to find honey-trap, blackmail, sextortion and social conflict exploitation opportunities.

If you had a bad date with someone, that someone will be hunted down and convinced to help harm, #metoo or “rape charge” the intended target. All dates involve a search for sex, so the likelihood that a sexual disappointment experience will exist in each persons dating history is high. Searching every past dating email and text of a subject is quite easy with modern software and hacking techniques. A synthetically amplified, PR-agency optimized sex scandal can destroy any target. Your dating experiences from the 70’s or 80’s will come back to haunt you decades later. Most dates involve drinking alcohol and taking drugs. If you were unattractive or had bad sexual skills your bad date will be called “date rape”, “drugging your date for sex” and related twisted narratives that are designed to shame you, the target.

---- If you try to get a date in the future, your potential date will be contacted by a third party who will slander and libel you to make sure your potential first date gets cancelled. Your social life will, essentially, end. Every photo on every dating site is cross checked with every other photo on the internet in order to cull your Facebook, Linkedin, Snapchat and other social media together to create a total psychological manipulation profile data file on you. A single photo on a dating site can be cross searched on every mugshot archive, photo album and corporate database in the worth within minutes using modern super-computers. Your sex life will be on public record in a flash.- Social Security, SSI, SDI, Disability and other earned benefits are stone-walled. Applications of targets are “lost”.

---- Files in the application process “disappeared”. Lois Lerner hard drive “incidents” are operated in order to seek to hide information and run cover-ups.

– Government officials and tech oligarchs contact members of the National Venture Capital association (NVCA) and created national “black-lists” to blockade target victims from ever receiving investor funding. This was also confirmed in a widely published disclosure by Tesla Motors Daryl Siry and in published testimony. If Silicon Valley political campaign finance oligarchs black-list you (see the “AngelGate” Scandal and the “High Tech No Poaching Class Action Lawsuit” cases) you will never get investor funding again.

– FOIA requests are hidden, frozen, stone-walled, delayed, lied about and only partially responded to in order to seek to hide information and run cover-ups.- State and federal employees will play an endless game of Catch-22 by arbitrarily determining that deadlines had passed that they, the government officials, had stonewalled and obfuscated applications for, in order to force these deadlines that they set, to appear to be missed. This can bankrupt a target victim.- Some Victims found themselves strangely poisoned, not unlike the Alexander Litvenko case.

---- Heavy metals and toxic materials were found right after their work with the Department of Energy weapons and energy facilities. Many wonder if these “targets” were intentionally exposed to toxins in retribution for their

testimony. The federal MSDS documents clearly show that a number of these people were exposed to deadly compounds and radiations, via DOE, without being provided with proper HazMat suits which DOE officials knew were required.

– Victims employers are called, and faxed, and ordered to fire target victims from their places of employment, in the middle of the day, with no notice, as a retribution tactic. – On orders from Obama White House officials, DNC-financed Google, YouTube, Gawker Media and Gizmodo Media produce attack articles and defamation videos. Google locks this attack media on the internet on the top line, of the front page of all Google searches for a decade in front of 7.5 billion people, around the world.

---- This attack-type uses over \$40 million dollars in server farms, production costs and internet rigging. The forensic data acquired from tracking some of these attacks proves that Google rigs attacks against individuals on the internet and that all of Google’s “impressions” are manually controlled by Google’s executives who are also the main financiers and policy directors of the Obama Administration. This data was provided to the European Union for it’s ongoing prosecution of Google’s political manipulation of public perceptions. – Victims HR and employment records, on recruiting and hiring databases, are embedded with negative keywords in order to prevent the victim targets from ever gaining future employment. – Gary D. Conley, Seth Rich, Rajeev Motwani and many other whistle-blowers in these matters, turned up dead under strange circumstances. It is very possible that some of these attack services, operated by former CIA operatives, even offer discrete murder-for-sale services using high-tech assassination tools that make murders look like heart attacks and brain failures.

---- Disability and VA complaint hearings and benefits are frozen, delayed, denied or subjected to lost records and “missing hard drives” as in the Lois Lerner case.- Paypal (A DNC-biased operation) and other on-line payments for on-line sales are de-platformed, delayed, hidden, or re-directed in order to terminate income potential for target victims who competed with the attackers interests and holdings.- DNS redirection, “website spoofing” sends target victims websites to dead ends where no sales orders or customer inquiries actually get back to the target. These internet revenue activity manipulations are conducted using Google and Amazon servers. All commercial storefronts and on-line sales attempts by target victims, will have had their sites hidden, or search engine de-linked by a massively resourced facility located in Virginia, Texas or Palo Alto, California in order to terminate revenue potentials for the target victims.

---- Over 50,000 trolls, shills, botnets and synth-blog deployments are deployed to place defamatory statements and disinformation about victims in front of 7.5 billion people around the world on the internet in order to seek to damage their federal testimony credibility by a massively resourced facility.

– Campaign finance dirty tricks contractors are hired by campaign financiers to attack the friends and family members of the target victim in order to create low morale for the target victims psyche and motivation.- Are you getting weird headaches and hearing a “buzzing sound” in your head? The U.S. Government has now acknowledged that the Cuban, Chinese and other embassy “sonic attacks” are from a known microwave beam weapon. Any one of the technical departments of the attack services listed at the top of this article can build such a biological harassment weapon.

---- It can be aimed at the target victims office, bedroom or vehicle and, within a week, have caused biological and emotional damage using a weapon that has no visible track of trajectory. It is designed to make the target victim think they are “going crazy” or “hearing sounds in their head”.

---- In one case covert political partner: Google, transferred large sums of cash to dirty tricks contractors and then manually locked the media portion of the attacks into the top lines of the top pages of all Google searches globally, for years, with hidden embedded codes in the links and web-pages which multiplied the attacks on Victims by many

magnitudes.- Covert Cartel financier: Google, placed Google's lawyer: Michelle Lee, in charge of the U.S. Patent Office and she, in turn, stacked all of the U.S. Patent Office IPR and ALICE review boards and offices with Google-supporting employees in order to rig the U.S. Patent Office to protect Google from being prosecuted for the vast patent thefts that Google engages in.

---- Google has hundreds of patent lawsuits for technology theft and a number of those lawsuits refer to Google's operations as "Racketeering", "Monopolistic Cartel" and "Government Coup-like" behaviors. Thousands of articles and investigations detail the fact that Google, "essentially" ran the Obama White House and provided over 80% of the key White House staff. A conflict-of-interest unlike any in American history. Google's investors personally told Applicant they would "kill him". Google and the Obama Administration were "the same entity". Applicant testified in the review that got Michelle Lee terminated and uncovered a tactical political and social warfare group inside Google who were financed by Federal and State funds.

---- Honeytraps and moles were employed by the attackers. In this tactic, people who covertly worked for the attackers were employed to approach the "target" in order to spy on and misdirect the subject. – Gawker Media, Gizmodo Media, Snopes, SPLC and other hired media assassins will be retained to produce "hatchet job" character assassination articles about you. Then those articles will be faxed, mailed and emailed to your employer and investors with a note saying: "You don't want to have anything to do with this person, do you..?" in order to get you fired from your job and get your loans or financing pulled. The attackers will use their round one attack media, that they authored, to create a round two second wave attack designed to end your life via economic warfare.

---- Mortgage and rental applications will have had red flags added to them in databases to prevent the targets from getting homes or apartments.- Krebs On Security, Wired, Ars Technica, The Wall Street Journal and most major IT publications have reported that hundreds of spy "back-doors" have been found on every Intel, AMD, Apple, Xfinity, Cisco, Microsoft, Juniper Networks motherboard, chip-set and hardware component set.

---- This means that any kid with the "key" code can open any computer, server, router, cloud-network or other network connected device and read every file, photo, video, your calendar and email on your devices at any time from any location on Earth. The key codes have been released to every hacker community in the world for over ten years. There is now no government, corporate or personal data that can't be hacked, even data from decades ago.

Every single one of your darkest secrets can be in the hands of your enemy within 60 minutes, or less. Important meetings you had planned with potential investors, employers, clients, dates, suppliers and others will suddenly get cancelled at the last minute. They will get cancelled because your enemies are reading your calendar remotely and covertly sending slander information to those you had hoped to engage with in order to sabotage your life.

---- Nothing you have ever typed on a computer or Smartphone is safe. it WILL be acquired and it WILL be used against you.

– McCarthy-Era "Black-lists" are created and employed against target victims who competed with Obama Administration executives and their campaign financiers to prevent them from getting funding and future employment.

– Obama Administration targets were very carefully placed in a position of not being able to get jobs, unemployment benefits, disability benefits or acquire any possible sources of income. The retribution tactics were audacious, overt..and quite illegal.

– There are thousands of additional Dirty Tricks tactics being used by these Attack Services yet Congress refuses to pass laws out-lawing such attack services.

---- The cost of an attack on a person ranges from \$150,000.00 to over \$50,000,000.00. While a Silicon Valley billionaire can afford to launch counter-measures to these attacks, any regular taxpayer will be utterly destroyed, and incapable of fighting back, against even the smallest version of one of these “kill orders”.

---- A number of modern office shootings are the results of these attacks against an individual who has lost everything because of the attack and has no options left. – Federal law enforcement, the United States Congress and the highest level investigators in the U.S., and abroad, have documented (per the “FISA Memo”, Congressional Reports and federal employee testimony) and proven the fact that the Obama Administration regularly engaged in the operation of retribution, vendetta and reprisal campaigns known as “hit-jobs” against domestic natural born U.S. citizen domestic taxpayers.

---- The Federal Court, in at least one previous court case, has ruled that Applicants, in this particular matter, were the victims and target of a number of these attacks designed to inflict permanent medical, emotional, character assassination, brand negation, economic and career damage. The FBI has been asked to interview John Cook, Nicholas Guido Denton, Adrian Covert, Patrick George, Ian Fette and John Hermann of Gawker/Gizmodo re: their financing, payola and hit-job attacks on third parties.

SILICON VALLEY'S COORDINATED MASS MEDIA MANIPULATION OF THE PUBLIC

News outlets in our country exhibit the widespread “criminality” and “defamation tactics” of a mostly corrupt news media landscape. The Gawker/Gizmodo/Jalopnik tabloid empire is nothing more than an organized info-crime operation backed up by offshore money-laundering through Russia and the Ukraine.

---- Despite widespread recognition of their deceptive conduct, fools still read these trash publications.

---- There are massive conflicts of interest related to many news media outlets’ conglomerate-ownership as well and industry figures’ financial and familial links to companies, interests, and people they ostensibly report on.

---- ‘Fake news’ isn’t the proper term. It’s the ‘propaganda arm of the Silicon Valley Socialist oligarchs’ In most cases.

---- There are only about 7 men who control all of the news and media in America. That's right! If you trace the media ownership in America, it all comes down to control by a few crazy old white boys -

--- It’s no different than the Chinese Communist Party [and] the propaganda they put out. It’s no different than what the Soviet Union did with the old Pravda media, and, quite frankly, it’s no different than how Putin controls the media today, where 95 percent of his media in Russia is propaganda for the Putin regime. It’s the same thing here with The Washington Post, NY Times, CNN, Hearst publications and all of the media owned by Hollywood and Silicon Valley.

---- Partisan news media should be treated as such. News media outlets such as the CNN, the New York Times, and the Washington Post regularly describe themselves as “politically objective and non-partisan.” In reality they are a propaganda machine for sick Silicon Valley oligarchs.

---- The information institutions are corrupt. For example, Elon Musk is one of the most corrupt men in the world yet the socialist propaganda news media won’t cover any of his crimes and corruptions in their publications because he pays political bribes to keep his dark side hidden in their media.

---- The public should not hurt legitimate news media outlets by engaging with and speaking to corrupt propaganda operations. One should only speak with genuine news media and not reward unethical companies with their time.

---- The following diagrams show what various independent researchers have discovered: The Manipulation Techniques Of Silicon Valley Media Outlets

---- A common tool Google, Facebook and Twitter use to exert control over their victims.

---- We all use manipulation at some point in our lives, whether it be telling a little white lie to get out of a situation, or using flattery to get what we want. For some people, however, using manipulation is a way of life, and their first weapon in an arsenal of techniques to overpower their victims.

---- Who is at risk from the Silicon Valley media predators? Predators use a range of manipulation techniques in order to control their victims, but they often target certain types of personalities. This is because they want to be able to easily manipulate a person, and particular vulnerabilities in a person lend themselves to manipulation. You are more likely to become a victim of a media predator if you have low self-esteem, are naïve, easy to please, lack an assertive nature and have no confidence in yourself.

---- Here are 20 of the most common news pundit manipulation techniques:

---- 1. Lying - Predators are constantly lying about practically everything in their life. They do this to wrong-foot their victim and confuse them. Lying is one of the manipulation techniques psychopaths typically use because they have no qualms about it.

---- 2. Not telling the whole story - This is different to lying as a predator will often keep a key part of the story to themselves in order to put their victim at a disadvantage.

---- 3. Frequent mood swings - Never knowing what mood your partner is going to be in when you get home, whether they'll be happy or angry is a very useful tool to the predator. It keeps their victim off balance and makes them more malleable.

---- 4. Love-bombing and devaluation - Narcissists typically use love bombing as a manipulation tactic, they will go on a charm offensive and get you hooked into thinking this is the best relationship ever, then they'll drop you like a ton of bricks without explanation.

---- 5. Finger Pointing Punishment - This can include anything from constant nagging, shouting, the silent treatment, physical violence and mental abuse. ---- 6. Facts Denial - Often the simplest way a predator will manipulate a person is by denying the thing they are accused of ever happening.

---- 7. Spinning the truth - How many times have politicians twisted the facts to suit themselves? This spinning of the truth is often used to disguise bad behaviour by predators such as sociopaths.

---- 8. Minimising The Urgency - Where a predator will try and play down their actions as not important or damaging and shift the blame onto the victim for overreacting.

---- 9. Plays the victim - The manipulator will themselves take on the role of victim in order to gain sympathy and compassion from those around them. We as humans are naturally drawn to helping people when they are suffering.

---- 10. Targets the victim - When a manipulator accuses the victim of wrongdoing, they are making the victim defend themselves whilst the predator is able to mask their own manipulation techniques. The focus is on the victim, not the accuser.

---- 11. Positive political reinforcement - This includes buying expensive presents, praising them, giving money, constantly apologizing for their behaviour, excessive charm and paying lots of attention.

---- 12. Moves the goal posts - You might think you know where you stand with a person, but if they are constantly moving the goal posts in order to confuse you, then it's likely you're dealing with a predator.

---- 13. Diversion - Diverting the conversation away from the perpetrator's act and moving the conversation onto a different topic is a typical way predators manipulate their victims.

---- 14. Sarcasm - A predator will often be sarcastic about their victim in front of others. They do this to lower the self-esteem of the victim and to show others how powerful they are.

---- 15. Guilt tripping - Someone who manipulates will often guilt trip their victim by saying that they don't care about them, or that they are selfish or their life is easy. It all helps to keep that person confused and anxious.

---- 16. Flattery - Using charm, praise or flattering the victim is one way of gaining that person's trust. The victim is naturally happy to receive such compliments but in doing so lowers their guard.

---- 17. Playing the innocent card - A true manipulator will feign utmost shock and confusion at being accused of any wrongdoing. Their surprise is so convincing that the victim may question their own judgement.

---- 18. Over the top aggression - Manipulators often use rage and aggression to shock their victim into submission. The anger is also a tool to shut down any further conversation on the topic as the victim is scared but focused now on controlling the anger, not the original topic.

---- 19. Isolation - It is far easier to keep a person under control if they are isolated from family members and friends who could shed some light and truth on the situation.

---- 20. Feigns political love and empathy - News Predators such as psychopaths and sociopaths do not know how to love someone other than themselves, and cannot feel empathy, but they can pretend to in order to inveigle others into their lives

.---- If you watch out for the above manipulation techniques, you can keep yourself out of a media predator's clutches.

---- Twitter, Splunk, Google, Facebook, Netflix, YouTube and the Silicon Valley internet Cartel serve you custom manipulated content by automatically creating a covert digital dossier on you reflecting the content consumption preferences they have spied on about you. They continually evolve their dossier on you in order to steer you towards their ideology and their Democrat political party. At these companies, "data mining", "machine learning" and "AI" means computerized propaganda processing for certain political entities. They began hiring off-shore people (because they would work so cheap) but most of those people turned out to be Muslim. This created conflicts with the entire southern part of the United States (which is anti-Muslim) because those workers steered content to pro-Muslim positions.

US State Department Funding Secret 'Disinformation' Crusade To Blacklist Media

BY TYLER DURDEN

The US Department of State has been funding a "disinformation" tracking group through its Global Engagement Center (GEC), which reportedly works at demonetizing sites it accuses of disseminating "disinformation," - which are overwhelmingly conservative news outlets, the Washington Examiner reports.

The Global Disinformation Index, a British organization with two affiliated U.S. nonprofit groups, is feeding blacklists to ad companies with the intent of defunding and shutting down websites peddling alleged "disinformation," the Washington Examiner reported. This same "disinformation" group has received \$330,000 from two State Department-backed entities linked to the highest levels of government, raising concerns from First Amendment lawyers and members of Congress.

GDI through its website maintains a "dynamic exclusion list" of the worst offenders of disinformation online, which it then distributes to ad tech companies - such as Microsoft's Xandr - in order to try and "defund and downrank these worst offenders," and deprive said sites of ad revenue.

According to The American Conservative executive director Emily Doak, "They might consider TAC a 'high-risk' publication because we have consistently taken on the bipartisan establishment's sacred cows, whether it's the war in Iraq, nation-building in Afghanistan, or the harm done by free trade and open borders — and we've been proven right time and time again," adding "They know they can't say we're wrong, only that we're biased and 'high-risk,' so we will wear that designation as a badge of honor."

In 2018, the GEC began funding Disinfo Cloud, a State Department spokesperson told the Washington Examiner. The GEC awarded roughly \$300,000 to an investment group called Park Advisers, which fights "disinformation, terrorism, violent extremism, hate speech" to manage Disinfo Cloud, the spokesperson said.

Park Advisers implemented Disinfo Cloud "to provide the U.S. government and its partners with a database of the tools and technologies available to help push back against foreign propaganda and disinformation," according to its website, which links to Disinfo Cloud's former landing page that has since been pulled off the internet. -Washington Examiner

One State Department-funded group which supports GDI is the nonprofit National Endowment for Democracy, which receives nearly 100% of its funding from congressional appropriations (\$300 million in 2021), which critics have argued is essentially giving money to a government grantmaking body despite its status as a private entity.

In 2020, \$230,000 went from the NED to the AN foundation, a GDI group that also goes by the Disinformation Index Foundation. The grant was to "deepen understanding of the challenges to information integrity in the digital space" in Asia, Africa and other foreign countries, and to "assess disinformation risks of local online media ecosystems."

The Global Engagement Center notably appeared in the Twitter Files reported by @mtaibbi <https://t.co/M3LM3PkrX>

Meanwhile in September 2021, the GEC hosted the US-Paris Tech Challenge - an event which sought to "advance the development of promising and innovative technologies against disinformation and propaganda" in Europe and the UK. The event was a "collaboration with U.S. Embassy Paris, the Atlantic Council's Digital Forensic Research Lab (DFRLab), the Cybersecurity and Infrastructure Security Agency (CISA), the North Atlantic Treaty Organization (NATO)" and several other organizations.

Civil rights experts are appalled.

"Any outfit like that engaged in censorship shouldn't have any contact with the government because they're tainted by association with a group that is doing something fundamentally against American values," said Jeffrey Clark, former acting head of the DOJ's Civil Rights Division in a statement to the Examiner. "The government or any private entity shouldn't be involved with this entity that's engaged in conduct that is either legally questionable or at least morally questionable."

In addition to Park Advisers and Disinfo Cloud, partners for the Paris challenge included the Atlantic Council, a major think tank, the Cybersecurity and Infrastructure Security Agency, the North Atlantic Treaty Organization, and others, according to the State Department.

— Gabe Kaminsky (@gekaminsky) February 10, 2023

Meanwhile, Rep. Michael McCaul (R-TX) said: "Last year, under tremendous bipartisan pressure, I refused to reauthorize the Global Engagement Center because such a step seemed premature," adding "The most recent allegations, if verified, confirm the need for a strict accounting of all U.S. taxpayer funds going to the GEC."

Rep. Jim Banks (R-IN) says that the Biden administration is "knee deep" in left-leaning efforts to "crack down" on speech - telling the Examiner: "House Republicans will be hauling these bad actors before Congress, and I absolutely support legislation to ban federal funding of anti-free speech groups."

THE SAN FRANCISCO CRONY CORRUPTION NIGHTMARE

Straight from the Palladino spy files --- San Francisco is ruled by corruption, cronyism, bribes and favors. SF has become increasingly inhospitable to the average person. The median rent for a one-bedroom is \$2,695. A family of four is considered "low-income" if they make less than \$97,000. The Target and Walgreen's stores have had to operate in "crisis" mode because the crime is so bad in San Francisco that you get robbed in the aisles while shopping at major retail stores in San Francisco. The STD rates are off-the-scale. It is almost certain that your car will be broken into or keyed. This place is tough to exist in long-term. It got like this because San Francisco's corruption culture is so out of control. ---- If you think San Francisco's ills are all due to the technology mobsters, you are mostly correct!

---- San Franciscans now have an obsession with escaping from San Francisco. This comes from a healthy heaping of realistic bitterness — bitterness that you won't be able to stay here, bitterness that you can't buy a house and set down roots and bitterness that others, unplagued by inertia, can recognize these facts and leave.

---- As San Franciscans, we'll always be looking over our shoulders at Austin and Portland and Denver, wondering what life's like in a more hospitable city where City Hall is not entirely controlled By Twitter, Facebook, Google and Netflix corporate bribes.

---- The villains in "The End of the Golden Gate" book are familiar ones. Tech, capitalism, Mayor Ed Lee's tax laws. Every writer seems to agree on one front: San Francisco has changed, and in many ways, for the worse.

--- "The San Francisco I knew and loved has been face-lifted, sleeked, chromed, polished, colonized, homogenized, and marginalized as a cultural innovative force," writes Peter Coyote in "San Francisco, For Sale by New Owners." "The transformation was accomplished in a smooth, seamless manner by money and addiction to power."

---- "San Francisco," he writes earlier in the essay, "is too expensive, too monoculturally wealthy. Tech wealth and privilege have transformed it into a cushy enclave for the heartless."

---- Gary Kamiya's standout essay acknowledges the downsides of this city: "The exorbitant cost of housing, the influx of tech workers, traffic, crime, dirty streets, and an ever-worsening homeless crisis."

---- The Bay Area's Google, Facebook and Netflix, Tesla executives and VC's happen to be the organizing, financing and beneficiary partners in a massive market manipulation scheme.

---- They formed their “Silicon Valley Cartel” to collude, conspire and organize against the government, the public and industry in a manner which the tech oligarchs describe in their own emails as being based on “...the Italian Mafia!”.

---- Indeed, The Silicon Valley Tech oligarchs have formed a collusion-based, law-violating, tax-evading, government-manipulating crime empire protected by famous Bay Area politicians, whom they bribe! No cops seem to be able to stop them.

---- The Bay Area Solyndra/Silicon Valley Cartel case was one of the largest corruption matters in America with roots that ran all the way to the Oval Office. The FBI raid on Solyndra was only the tip of the iceberg. The matter illuminated an organized crime scheme, in violation of RICO, anti-trust and other laws, between major public officials, Silicon Valley tech oligarchs and their operatives.

---- The tech oligarchs beg for you to view them as “Green Advocates” but they lie! They engage in genocide, child labor slavery and rape farms via corrupt overseas rare earth mining schemes owned by California Senators, Department of Energy Executives, White House staff and the Silicon Valley tech Cartel. They are actually only really interested in anything green that has a dollar sign on it.

---- The Silicon Valley Cartel loves to run everything. In their federal “no poaching” lawsuits: Case #'s 11-cv-2509 and 5:2011cv02509 and 1:10-cv-01629 and 1:10-cv-02220; these cases, along with the “Angelgate” scandal, prove that the Silicon Valley Cartel colludes to harm the public, rig the government and monopolize industries. -

--- State-sponsored “hit-jobs” were ordered, operated and financed by San Francisco government officials in order to engage in revenge, reprisal and vendetta, against any who speak out about their crimes.

SILICON VALLEY'S SHAM CULTURE - CALIFORNIA ELITIST POLITICIANS DESTROY CALIFORNIA BY CATERING TO ASSHOLES

V.D. Hanson wrote about "The Selfish Californian" describing how Silicon Valley Californians create inequality by pretending to hate inequality. Their hatred of inequality is just a front. It is a faux, fake, a pretense as a means to power and control. None of the tech elites in their mountain top homes and beach side mansions have any experience of "inequality".

We hear plenty of reasons for the perfect storm that imploded California. One-party, progressive government, of course. Decades of unchecked illegal immigration, without doubt. Years of mass flight out of state of the productive middle classes, certainly.

But perhaps the most important, but overlooked, reason has been the infusion of trillions of dollars of mostly tech capital into the state. Unimaginable sums of market capital warped politics and led to a top-down, feudal society, run by progressive elites who are shielded from the ramifications of their own toxic ideologies.

More specifically, the common denominator was the emergence in California of a selfish, monied, left-wing political class. In concrete terms, it cared little for others but masked that unconcern with abstract leftism, emulating medieval penance and indulgences to assuage guilt over its enjoyment of sheltered and very good lives.

California's recent premier politicians at the local, state, and federal levels—Jerry Brown, Barbara Boxer, Dianne Feinstein, Gavin Newsom, and Nancy Pelosi—all enjoyed wealth and power, whether by inherited money and family brand names, through marriage, or using their positions to leverage lucrative family and personal business with the Chinese.

Their lifestyles before, during, and after office-holding reflected both their privileges and the vast material differences between their own lives and the millions of Californians who suffered enormously from their utopian bromides. Yet a world away from their homes in Grass Valley, Kentfield, Lake Tahoe, Napa, Pacific Heights, or Rancho Mirage, the rest of the state's residents who voted for them currently cannot afford a house, a full tank of gas, a chuck steak, or an air-conditioned afternoon.

At least the Church of the 15th century offered formal contractual indulgences and personal penance manuals for the guilt-ridden elite eager to abort their earned inferno-to-come. In California, however, to enjoy affluence and leisure without guilt or recriminations, left-wing power elites virtue signaled their progressivism, even as it wrecked the lives of distant others.

If it were a question of drilling more oil while transitioning to clean power or shrugging that nobody José Martinez in Sanger would pay \$6.50 a gallon to commute to work, it was a no brainer: Mr. Martinez was simply out of sight, out of mind collateral damage.

So too all of California's poor and lower middle classes who could not afford to flee and now cannot afford shelter, food, fuel, and safety, due to decades of policies that zoned away new home construction, strangled the gas, timber, and mining industries, taxed and regulated gas and diesel to the point of unaffordability, neglected the needs of the state's once rich farming industry, and loved fish far more than people. Apparently, these well-educated and self-declared Socrateses believed that Californians could drink Facebook, eat Google, drive Twitter, and live on Snapchat.

The far-left Atlantic's various contributors for years have been cheerleading most of the policies adopted by the Bay Area elite—defunding the police, decriminalizing an array of crimes, appeasing homelessness, ignoring dangerous drug use and dealing, and urging more redistributive taxation and entitlement.

But now Atlantic essayist Nellie Bowles warns us that San Francisco is a “failed city.” And she is correct in that the city is increasingly medieval. Its downtown is emptying, filthy, toxic, dangerous, and pre-civilizational—perhaps an unfair term since it was rare in pre-Roman Gaul or nomadic North Africa for tribal residents to sleep in the village pathways, fornicate and defecate openly among children, and violently attack random passersby.

In truth, the implosion of San Francisco, Los Angeles, and California more broadly is no accident. Destroying all the bounty that was inherited from far better and far-seeing generations was the logical result of deliberate policies—reflecting the self-interest of a few million rich, educated professionals. They apparently decided that their genius and superior morality had transcended worries over ancient challenges of food, water, shelter, transportation, and received law and custom.

California's anointed enjoyed safe neighborhoods from Malibu to Presidio Heights. They inherited or purchased beautiful coastal corridor homes worth \$1,200 a square foot, from La Jolla to Berkeley. They drew income from the trillions of dollars invested in Silicon Valley and the new globalized and Asia-centric economy that opened markets of multibillions of consumers for entertainment, media, finance, law, academia, corporations and the accompanying credential professional classes.

And so, they grew hubristic and stupid. In their arrogance and ignorance, they began to feel their own bounty and leisure were birthrights. Free from worries about who brought them their water, food, safety, energy, and shelter—or how—they were liberated to institutionalize their own visions of 21st-century-correct living to less fortunate others, albeit from a properly segregated distance.

Freeways were obsolete ideas. The fewer built, and the even fewer maintained, the more likely the clueless could be crowded into cost-effective, clean, and safe mass transit.

So, a \$15 billion high-speed rail disaster arose and remained inert like Stonehenge monoliths. Meanwhile, thousands of the poor on the obsolete Highway 99 continued to die and were maimed in daily accidents on a Road Warrior-esque obstacle course. The nearby Amtrak trains still sat delayed on side-tracks, for want of a simple, 19th-century two-track rail. How strange that bankrupt 21st-century visions came at the cost of easy 20th-century solutions.

Aqueducts, reservoirs, dams? These were likewise relics of previous delusional generations. That the coastal corridor's water came from aqueducts across vast distances was mostly unknown by those who crowded into one of the most naturally unsustainable regions on the North American continent—a coastal strip mostly dry and bereft of an aquifer to sustain its tens of millions.

So, the state stopped building water storage. More often, it released snowmelt and runoff water into the ocean rather than to farms and to replenish aquifers.

Fires? Let forests of evergreens burn as they had in primordial times, better to burn to provide mulch for worms and birds—and scare away the deplorable foothill folk who had no business living in the mountains, anyway.

The elite now dreamed of returning to a half-million person California of the 19th century, reputedly with lush riverbanks from the sea to Sierra, with salmon runs to the mountains. They recoiled at the very idea that a 40 million-person state of mostly poor immigrants—over a quarter of the state's population was not born in the United States—might need water for their towns or for the farms they worked.

How ironic that millions fled Mexico and Central America to enter, often illegally, the once golden California, land of plenty. They were welcomed by the state's business and political elite but not to be housed, fed, and schooled as were the elite. Their directive was to vote correctly for their supposed betters and to supply janitors, landscapers, nannies, cooks, and housekeepers for those who welcomed them in—on the condition that they not dare demand the state's green resources for good homes, affordable gas, or a nice lawn or long shower.

Let them instead eat a solar farm, bike path, or Tesla.

And so it went, each carefully placed brick in the once sturdy long wall of California, laid carefully over the past 150 years—to ensure a naturally fragile state with affordable food, energy, security, housing, transpiration, schools, and education—was ripped out, mocked as obsolete, and written off an embarrassment to the present.

Californians who look at their aging dams, their granite classical civic buildings, and their large municipal parks, are like Dark-Age Greeks who stumbled around the ruins of Mycenaean palaces and walls, wondering who were the demi-gods who built such things that now were impossible to emulate. So, too, we are bewildered at Balboa Park or the California aqueduct, or rather saddened that simply copying them is beyond our moral power or expertise.

The state was once rich and secure in gas and oil, nuclear power, cutting-edge freeways and airports, water storage, law enforcement, a topflight public school system, and an effective higher education triad. All these resources have become either politicized or taboos that are neglected, dismantled, or destroyed by a class that commuted little, was nonchalant about their power bills, put their kids in private schools, and enjoyed neighborhoods whose zip codes and private security patrols bounced away revolving-door felons and homeless far distant to the haunts of the middle class and poor.

Rich leftists quote the Gini coefficient chapter and verse, oblivious that they have created a state of affairs in which California ranks second to the bottom—below even New York—in such calibrations of inequality. The Silicon Valley motto should be, “I create inequality by hating inequality.”

We have not built a major mountain reservoir outside of Los Angeles in over 40 years even as the population has soared. The main north-south laterals of the state—the 101, I-5, and 99—often narrow into four-lane deathtraps.

SFO and LAX are among the more nightmarish airports in the nation. California's test scores rank in the nation's bottom 10 percent of schools.

Over one-fifth of the state lives below the poverty rate. Urban geographer Joel Kotkin recently noted that African Americans and Latinos in California suffer among the lowest real incomes in the nation, 48th and 50th respectively. How could that be true in the land of Mark Zuckerberg, Nancy Pelosi, and Jerry Brown?

One-third of Americans on public assistance live in California. To drive through the rural center of the state is to revisit the 1930s world of the Joads. Ramshackle farmhouses now house 20 or some immigrants. Many of them reside here illegally, in trailers, shacks, and illegal add-ons. A state famous for regulating the life out of the middle classes simply ignores systemic flagrant violations of sewage, water, power, and building codes, in the manner of the exemptions given the homeless: out of sight, out of mind.

California's mid-size cities nudge out other blue-state metropolises to rank among the nation's leaders in property crimes. The nation's highest gas taxes, income taxes, and near highest sales taxes either do not mitigate the above pathologies or perhaps help fuel them.

If our liberal political elites lived in crime-ridden Stockton, San Bernardino, or Modesto, had two children in the Los Angeles City public schools, commuted daily on the 99 from Delano to Visalia, flew weekly commercial out of LAX, tried to buy a California home on their salaries as public officials, rode BART to Oakland each evening home, or depended on a business supplying the state with lumber, gas or oil, food, transportation, or construction—the stuff of life—then they might fathom how assuaging their left-wing guilt in the abstract destroyed the lives of those they never see and never wish to see.

So, in a word, California's debacle was the work of the self-absorbed.

The self-declared most caring, virtuous, and moral in the end proved the most narcissistic, selfish, and self-centered. Yes, the rich left-wing California elites are many things, but utterly selfish explains what they do unto others.

STANFORD UNIVERSITY HAS A CULTURE OF CORRUPTION AND TEACHES THAT WARPED THINKING TO STUDENTS

Stanford University builds corporate criminals, sex traffickers, sociopaths and elitist narcissists. It trains naive children to grow up to become adult stains on society!

---- In California, elite arrogant asshole dynasties send their kids to Stanford University. Stanford puts the kids in asshole frat houses to train them to get away with rape and run monopolies.

---- The problems at Stanford University include:

---- Rape cover-ups by frats from rich families

---- Epic racism

---- Inter-Staff sex scandals that make the whole campus look like A Caligula party

---- Dynastic families control the whole campus

---- Arab, Iranian and Chinese oligarchs pay bribes to get their kids in

---- The CIA is always recruiting everyone and the most notorious spy project: STARGATE, happened at Stanford

---- The Russian, Iranian and Chinese spy agencies have placed a huge number of spies on the campus as 'pretend students' and pretend teachers

---- Elitism is rampant

---- The Silicon Valley venture capitalists, up the hill on Sand Hill Road, get all their interns from Stanford and they date rape the hot ones with Ruffies, Scopalimine, and other amnesia drugs. The interns wake up with sore butts and can't remember why.

---- To afford the fees, the girl students work as hookers at the Rosewood Hotel.

---- The entire school is funded by bribery. ----Arrogance is the attitude of choice at Stanford.

---- 99% of the guys that went to Stanford execute 99% of the corporate corruption crimes in the world. -

---- Girls at Stanford, that can't afford tuition, become Match.com hookers. Everyone in the bay area knows that if a Match.com profile has the words: "STUDENT" and "GENEROUS" anywhere in the text, that the girls are offering sex-for-tuition. Send your hot daughter to Stanford and turn them into hookers. Match.com even has sex agents, on campus, that get a commission for getting girls to join Match.com.

---- Rape is OK at Stanford as long as your daddy is rich or owns part of the Middle East. The Stanford deans and regents say: "Boys Will Be Boys".

---- Stanford provides buses that transport the sorority girls to the frat houses to get date raped and then back to the sorority houses drunk out of their minds or doped up on Ruffies and Scopalimine.

---- There have been a number of strange murders and suicides at Stanford.

---- Stanford students are perscribed the highest number of mental health medications of any campus in America.

---- All of the land on the Stanford Campus could solve all of Silicon Valley's housing crisis. The State of California should take all the land away from criminally corrupt Stanford University and build housing for average income on it. Stanford University doesn't "deserve" anything any more.

---- Chinese girls are sent to Stanford, by Chinese 'Wife Mills' to bag an Anglo husband and then divorce him 1 year after he hits paydirt. They are instructed to have 2 kids so the alimony upside is high. They pay a % of the money back to China.

---- Trophy wives were invented at Stanford

---- The Guardsman, The Key Club and over 50 "Final Clubs" brain-wash students into elitism and tribal exclusion of all but your fellow 'club members' from your ethinc group.

---- Most of the oligarch families paying bribes to Stanford are engaged in the most brutal human rights violations in history. They murder people and have them cut up with a hacksaw. They run prison camps. Only an idiot would think that modern day Stanford has any remaining 'prestige' or 'credibility'. This isn't the 1800's any more. Shut this crap campus down!

---- When they graduate they either go up the hill to Sandhill Road and start a venture capital clone operation or they get their frat friends on Sandhill Road to racketeer-fund their start-up or political campaign using money scammed from your parents pension funds. They only work with their frat buddies and insiders in a tribal 'old boys club' manner.

---- They steal all the technology and markets they want because they control all of the tech lawyers and politicians via bribes and revolving doors.

---- Most of the money in Stanford University bank accounts is from Foreign and Hollywood oligarchs delivered as bribes meant to get their snot-nosed brats into Stanford. Stanford bosses keep all of this covered-up and covertly fund political campaigns to grease the wheels of political corruption.

---- They then sexually extort some Stanford interns in Rosewood Hotel rooms, get the most 'trophy wife' ones pregnant, and start the cycle all over again. Alas, Stanford is the training ground for abuse, corruption and 'Bro-Crime'.

---- The issues, that the public and the news media have complained about include: producing child suicides, racism, misogyny, child mental health threats, domestic spying, data harvesting, sex trafficking, election manipulation, tax evasion, Fusion GPS/Media Matters/ Black Cube hit jobs on competitors, censorship, contrived market monopolization, intellectual property theft, political bribery and many other social crimes! An unusually large number of their staff have been arrested for, or charged with, sex crimes, including under-age trafficking.

---- The Silicon Valley Tech Cartel is one of the largest operators of bribes to public officials. Some of those bribes include billions of dollars of, non-FEC reported, search engine rigging for the political campaigns of the very politicians who are supposed to regulate them.

---- There are hundreds of millions of people in America. The same 120 of them are all involved in operating the same crimes and corruption including: the Sony Pictures corruption; the Afghanistan rare earth mine scandals operated through The Energy Department political slush fund that involves the lithium battery cover-ups (headed by Elon Musk); the Big Tech Brotopia rape, sex trafficking, bribery, exclusionism, racism and misogyny issues they were taught at Stanford University; The Facebook – Meta – Google – Alphabet – Netflix, et al, coordinated news manipulation and domestic spying that they engage in;

--- The hiring of Fusion GPS – Black Cube – Gizmodo/Gawker assassins; the destruction of the housing market by their mass real estate manipulations; patent theft and industrial espionage; and the bribery of almost every politician all the way up to the Oval Office.

Beyond being highly addictive, last year's season highlighted the exclusivity surrounding Greek life, which is heavily rooted in racism, classism and sexism.

The majority of both active and PNMs on Bama Rush TikTok appeared to look practically identical - all white women with blonde locks and fake tans, which is unsurprising considering Alabama only desegregated their sororities nine years ago.

In 2013 Black students complained about the racism and discrimination in Greek life, and University officials ordered the sororities to end segregation after The Crimson White reported on the allegations that Black students were blocked from joining the all-white chapters.

Despite the segregation officially ending in 2013, things don't seem to have gotten much better.

According to the The Crimson White, University of Alabama sororities were about 89 per cent white in 2021, down only five per cent from 2011.

To help fight allegations of racism, the University is now reportedly requiring chapter members to complete diversity training in preparation for rush week.

And although a few need-based scholarships are provided, the organization further shows their classism foundation through steep financial obligations.

In addition to rush week essentials PNMs splurge on, the average cost of fees for new member is \$4,170 per semester, according to University data.

And the outrageous cost of being a sorority member at Bama just gets higher, chapter and meals fees for active members who live in the house total around \$7,465 per semester.

However, the flawed system doesn't stop the world from tuning in to season two and getting hooked on whether or not their favorite 'character' received a bid from their dream home.

Nothing but a \$\$\$\$popularity contest\$\$\$.

The part I hate is that girls who dont make it are crushed. There are so few places at Alabama and so many more girls competing for one. And dont get me started on fraternities. The amount of alcohol allowed at the on campus fraternity houses is endless, massive quantities and the school officials wink and nod and look the other way.

People that pay for friends are pathetic

They look like recycled Barbies

The most asked question is "why does my head whistle when I walk?"

I wanna go to college for the rest of my life Sip bankers club and drink miller lite On thirsty Thursday and Tuesday night ice And I can get pizza a dollar a slice...

Sororities & Fraternities are bad for college students. The hazing, excessive drugs & alcohol that goes on there is terrible. Join clubs or intramural sports if you want to make new friends. Don't put yourself thru that abuse, it's not worth it.

Idiot people who pay thousands to go to college for the "experience" instead of an education.

The men that are in so much trouble in Silicon Valley were taught their ways by Stanford University:

Most American Parents Unaware China, Saudi Arabia, Qatar are Major Donors to Stanford University

According to recent reports (ie: Stanford_University_Teaches_Promotes_And_Protects_Sociopaths_And_Hate) a majority of American parents are unaware that China, Saudi Arabia, and Qatar are among the top financiers of U.S. universities and are worried that foreign cash is influencing what their children are taught in the classroom, according to a recent poll.

Nearly 60 percent of those interviewed in the September poll said they were not aware that the countries are major donors to U.S. universities. The poll was commissioned by the Lawfare Project, a nonprofit advocacy group that tracks campus issues.

Qatar's presence in the U.S. academic system was concerning to parents when they learned about the small Gulf nation's deep ties to Iran and terrorist organizations such as Hamas and the Taliban. Eighty-four percent of those surveyed said American schools should publicly disclose their ties to Qatar and explain how the money could be coloring the in-class agenda, according to the poll, which surveyed 2,009 adults last month and was provided exclusively to the Washington Free Beacon.

While extensive foreign funding of American universities has raised alarms in Congress and among advocacy groups such as the Lawfare Project, ordinary American parents are not aware of the issue. This is partly because American schools do not publicly disclose their funding and in many cases try to hide their ties to adversarial nations like China. Foreign countries see the U.S. academic system as central to their propagand efforts, including anti-Israel initiatives. In the case of countries such as China, they seek to steal cutting-edge research. More than 80

percent of those surveyed said Congress should enact legislation requiring schools to publicly account for every foreign donation.

Around 70 percent of those surveyed said they were concerned that foreign donations influence teaching and research priorities. In Qatar's case, the country has spent billions running propaganda efforts in at least 28 American universities, generating concerns these donations run afoul of U.S. law. With anti-Semitism and anti-Israel attitudes increasing on many American campuses, foreign money has helped foment these movements, including at the University of North Carolina and Duke University—both of which have been embroiled in a long-running controversy over Qatar's funding of programs critics see as anti-Semitic.

“The public wants full transparency on what Qatar is funding in American schools, and Congress must demand it,” Brooke Goldstein, the Lawfare Project's executive director, told the Free Beacon. “Parents have a right to know what foreign governments are teaching our children.”

China's funding for American universities remains the top concern for parents, with 70 percent expressing worry about Beijing's presence at U.S. schools. Around 65 percent expressed similar concerns about Saudi Arabia, followed closely by Qatar with 57 percent of those surveyed.

More broadly, there was a 50-50 split between those who support foreign funding of schools and those who oppose it altogether.

How the Elite Scumbag Bosses At Stanford University Got Busted For Selling Snootiness

Stanford University Elitist Rapists Get Away with..RAPE; All The Time! – SOCIAL MEDIA CRIMES

THE CORRUPTION OF FACEBOOK AKA META

Regarding Facebook AKA META, the issues, that the public and the news media have complained about include: producing child suicides and classroom shootings, racism, misogyny, child mental health threats, domestic spying, data harvesting, sex trafficking, election manipulation, tax evasion, Fusion GPS/Media Matters/ Black Cube hit jobs on competitors, censorship, contrived market monopolization, intellectual property theft, political bribery and many other social crimes! FACEBOOK PROFITS OFF THE CLICKS FROM SCHOOL SHOOTINGS ---- MOST OF THE BIDEN AND OBAMA STAFF OWN PARTS OF FACEBOOK!!!

Scrutinizing Sandberg's Use of Resources Over Years...

---- An unusually large number of their staff have been arrested for, or charged with, sex crimes, including under-age trafficking.

---- This entity is one of the largest operators of bribes to public officials. Some of those bribes include billions of dollars of, non-FEC reported, search engine rigging for the political campaigns of the very politicians who are supposed to regulate them.

---- Facebook-Meta engaged in the bribery of public officials.

---- Facebook-Meta is a front for actions and planning in the Obama and Biden White House.

--- Facebook-Meta is part of a criminal Big Tech Cartel.

---- Facebook-Meta is an illicit monopoly that violates anti-trust laws.

---- Facebook-Meta operates a digital news and information “protection racket”.

- Facebook-Meta attacks competitors who cannot defend themselves.
- Facebook-Meta uses public officials to blockade competitors.
- Facebook-Meta manipulates the stock market illegally and unethically.
- Facebook-Meta operates like a private, unregulated, government.
- Facebook-Meta abuses CIA, NSA and DIA resources for unjust gains.
- Facebook-Meta uses Stazi-like mind and ideology manipulation tricks on it's site to try to get you to agree with Mark Zuckerbergs ideologies.
- Facebook-Meta investors and investment bankers conspire in a Mafia-like manner.
- Facebook-Meta steals patents and technology from others and refuses to pay for it.
- Facebook-Meta's Sandberg pretends to be the goddess of women's rights yet she is screwing the CEO of Activision, the biggest female sexual abusing company in America.
- Facebook-Meta's stock is owned by almost all of the California politicians and their families and that is why Facebook-Meta is never regulated and always protected by them for their political and profiteering manipulations.
- Facebook-Meta is Pro Israel and anti-Arab and anti-Muslim.
- Facebook-Meta's runs tens of millions of dollars of defamation attacks against competitors.
- Facebook-Meta hides all media and news coverage for competitors of Larry Page and Elon Musk.
- Facebook-Meta lies to the public about what they really do with the public's data.
- Facebook-Meta receives millions of dollars of payments from government spy agencies each month.
- Facebook-Meta promotes illegal immigration in order to get cheap labor and control votes.
- Facebook-Meta runs VC funding back-lists against start-ups that are competitive.
- Facebook-Meta bribes thousands of politicians in order to steer policy to their advantage.
- Facebook-Meta is a criminal RICO-violating monopoly.
- Facebook-Meta rigs the stock market with Flash-boy, Pump/Dump and Microblast SEC violating computer tricks.
- Facebook-Meta pays bribes to politicians in Facebook-Meta stock.
- Facebook-Meta manipulates who gets to see what web-sites, globally, for competitor black-lists.
- Facebook-Meta has a "no poaching" Silicon Valley jobs blacklist.
- Facebook-Meta bosses sexually abuse women and young boys.
- Facebook-Meta bosses run sex trafficking operations in the Epstein and NXVIUM cults.
- Facebook-Meta bosses control the NVCA financing cartel over start-ups.
- Facebook-Meta scheme to take over the VR and AR markets is based on spying on the public with VR sensors and cameras.
- Facebook-Meta controls national elections for anti-competitive purposes.

---- Facebook-Meta's law firms are corrupt conduits for payola and political conduit-relays.

---- David Plouffe and the Zuckerberg's were recording in meetings planning a take-over of the United States Government.

---- Facebook-Meta bribes some politicians with revolving door jobs.

---- Facebook-Meta is primarily responsible for destroying the Bay Area Housing opportunities.

---- Facebook-Meta runs DDoS attacks on competitors by massively crawling their sites.

---- Facebook-Meta has paid covert bribes, PAC funds, real estate and search rigging payola to every California Senator.

---- Facebook-Meta has paid bribes, through its lobby fronts, to halt FBI, SEC, FEC and FTC investigations of Facebook-Meta crimes.

---- Facebook-Meta gets millions of dollars of taxpayer cash for spying on Americans inside the USA.

---- Nancy Pelosi and Dianne Feinstein have promised to "protect" Facebook-Meta because their families profit off Facebook-Meta stocks.

---- Facebook-Meta VC's and bosses have spent \$30M+ rigging the U.S. Patent Office to protect Facebook-Meta and harm Facebook-Meta competitors.

---- Facebook-Meta bribed it's lawyer into position on the board of the U.S. Patent office in order to have him protect Facebook-Meta.

---- Facebook-Meta rarely likes, or hires, black employees per federal and news media investigations.

---- Facebook-Meta hired most of the Washington, DC K Street lobby firms and told them to "do what ever they could" to control public policy for Zuckerberg. The film: "Miss Sloane" depicts only 2% of the illicit lobbying tactics Facebook-Meta employs daily.

---- Their spy dossier on you uses abstract content-specific features of the consumed content, such as categories, topic models, and entities, which they automatically extract using natural language processing by comparing every word you use to a giant computer library of what those words might mean about your psychology. So it's like you are getting "mind-raped" without any penis use. Their assessment of what your words might mean is based on what rich, white male, \$200K/year, DNC-promoting programmers think they might mean. Their computers scale and expand their tools with algorithmic software created by those politically and socially biased frat white boys that wrote the code.

It is all biased as hell. They never hire blacks or women in system creation roles so everything these companies do only supports rich white soyboy snowflake type gamer thinking. ---- Because their Silicon Valley VC's told them to spy on billions of people, even for these web giants, it is impractical to store the entire dynamic history of a user's interaction features. They, thus, out of greed, use algorithms that selectively decay information in order to generalize users and populations. To them, you are just a generalized data point, like cattle on a ranch, to be harvested and fed upon by Silicon Valley.

Darkest Secrets Of Facebook AKA Meta

By comparing records and files from FINCEN, FBI, FTC, SEC, Congressional Investigators, ICIJ, FEC, Interpol, CIA, DOJ, ProPublica, and other sources, one can easily see that political officials own Google, Tesla, Facebook, YouTube, Instagram, et al, (AKA “The Tech Cartel” or, in legal terms: “The Enterprise”). This explains why those companies have been exempt from regulation and prosecution. Those public officials and tech company oligarchs have exchanged millions, and millions, of dollars between themselves and their families for profiteering.

They were all either financed by, friends, with, sleeping with, dating the staff of, holding stock market assets in, promised a revolving door job or government service contracts from, partying with, personal friends with, photographed at private events with, exchanging emails with, business associates of or directed by; our business adversaries, or the Senators and politicians that those business adversaries pay campaign finances to, or supply political digital search manipulation services to. Criminal U.S. Senators coordinated and profited in these schemes. Their own family members have now supplied evidence against them. You don’t hear about this, much, in the “main-stream news” because nearly half of Congress, White House staff and government agency bosses own the stock in the news broadcasters and receive billions of dollars of financing from them.

Many witnesses, including us, have now sworn, warranted and certified to federal law enforcement about the details of these crimes. Many of those whistle-blowers were former executives in “The Tech Cartel’.

This is not about politics. It is about felony crimes! Our government representatives are business partners with our biggest enemies and make decisions based on greed, not duty!

THE AFGHANISTAN RARE EARTH MINING CORRUPTION

What Went Wrong With The Electric Car Industry?

Only men seem to start car companies. Most psychologists say that this is because men see cars as dick insecurity emblems.

Elon Musk is known to be a wildly insecure narcissist who feels that he must get every woman, that he can find, pregnant in order to prove his manhood to his abusive father, who got his sister pregnant.

Musk embodies the ultimate expression of 'car-as-dick' thinking because Musk was not only molded by his purse-swinging, kept-woman, mother, abusive father and crooked brother but also by the Silicon Valley frat boy rape-culture.

Silicon Valley is, of course, the Eden of modern misogyny and tech-bro douche-baggery.

Musk dragged all of the biggest assholes from Silicon Valley, The DNC and Goldman Sa14 ptchs into his Tech Cartel. Together they created a temporary monopoly in the electric car industry by exchanging stock market payola with Senators and White House staff who, in exchange, locked off the electric car and space industries just for Musk.

But that scheme was not sustainable. It was amazingly crooked and lucrative but, it could not last. It was Big Tech's Roman Empire and it was doomed to fail spectacularly.

Musk counted on Obama and Biden to stick with his original quid-pro-quo deal to trade government cash for election rigging via his boyfriends at Google and Facebook. Tesla was the money conduit for a bunch of political scammy.

Biden and his cheerleader actress front girl: Jennifer Granholm, bounced into office with a Wizard of Oz promise to give everybody electric cars. They were so wrong about the pitfalls of their plan and they hired so many idiot sex freaks and unicorn fart unaware fools that their scheme blew up...instantly and literally.

Lithium ion batteries: Cause wars, rape and genocide in the Congo, Afghanistan and Bolivia from the corrupt mining deals involved with mining lithium and cobalt; are insider trading-owned by ex-CIA boss Woolsey and DOE Boss Chu; excrete chemicals that mutate fetuses when they burn; destroy your brain, lungs and nervous system when they burn; kill the factory workers who make them; cause Panasonic to be one of the most corrupt companies in the world; poison the Earth when disposed of; can't be extinguished by firemen; poison firemen when they burn; are based on criminally corrupt mining schemes like URANIUM ONE; Have over 61 toxic chemicals in them; come from an industry that spends billions on internet shills and trolls used to nay say all other forms of energy; are insider-trading owned by corrupt U.S. Senators who are running a SAFETY COVER-UP about their dangers. Apple

products with lithium ion batteries have been exploding and setting people on fire; over time the chemical dendrites inside each battery grow worse and increase the chances of explosion as they age.

---- LITHIUM ION BATTERIES BECOME MORE AND MORE LIKELY TO EXPLODE AS TIME GOES ON AND AS THEY AGE; “Bad Guys” have figured out how to make them explode remotely; have their dangers hidden by CNN and MSM because pretty much only the DNC people profit from them; are the heart of Elon Musk’s stock market scam. The Obama Administration promised Silicon Valley oligarchs the market monopoly on lithium ion batteries and the sabotage of fuel cells in exchange for campaign financing and search engine rigging; United States Senators that are supposed to protect us from these deadly products own the stock market assets of them so they protect them and stop the FDA, OSHA, DOT and NHTSA from outlawing them.

---- WRITE YOUR ELECTED REPRESENTATIVE AND DEMAND THAT LITHIUM ION BATTERIES BE MADE ILLEGAL TO SELL! NiCAD and Hundreds of other battery chemistries DO NOT have all of these problems but Lithium Ion batteries get a monopoly because of politician insider trading ownerships. A recent fire on U.S. Highway 101 near Mountain View, CA, burned the driver alive and killed him. In Florida two kids died in a Tesla, burned alive, screaming in agony. A man died in agony in a Tesla crash in Malibu that set Malibu Canyon on fire.

---- A young woman, at the start of life, and her boyfriend were burned alive in their crashed Tesla. There are many more deaths and crashes than you have heard about. The deaths and the cover-ups are endless. Senators Dianne Feinstein, Harry Reid, Nancy Pelosi, Kamala Harris and their associates own the stock in Tesla Motors and/or it’s suppliers and mining companies and they cover-up and halt investigations and laws designed to save the public. They, and their crony’s, spend over \$1B a year to shill and troll hype about lithium ion batteries and cover-up the dangers.

---- Lithium ion EVs are more prone to battery fires. Experts say that their lithium-ion batteries can fuel hotter fires that release toxic fumes and are more difficult to put out. Lithium ion fires keep reigniting which explains why it takes so long and requires copious amounts of water or foam (it is an electric fire, after all) to smother the flames.

---- Tesla employee Bernard Tse and his team warned Elon Musk about these dangers in 2008 and they got fired and/or warned to “say nothing” by Musk. Three top Tesla engineers died in a plane crash next to Tesla offices in San Carlos after two of them agreed to become whistle-blowers. Elon Musk exists because he bribed DNC politicians and Senators Feinstein, Reid, Boxer, Harris, Clinton and Pelosi to give him free taxpayer cash and government resources from the Dept. of Energy and the Calif treasury.

---- DOE has been covering-up organized crime activities at DOE in which DOE funds are being used as a slush-fund to pay off DNC campaign financiers and to pay for CIA/GPS Fusion-Class attacks on Silicon Valley business competitors of those DNC campaign financiers who DOE staff share stock market holdings with. Elon Musk is a criminal, a mobster, an asshole, a bald fake-hair wearing, plastic surgery-addicted, douchebag, woman-abusing, sex addicted, tax evader. -

--- Musk exploits poor people and child slaves in the Congo and Afghanistan to mine his lithium and Cobalt. Musk spends billions per year to hire Russian trolls, fake blogger fan-boys and buy fake news self-aggrandizement articles about himself. Musk thinks he is the ‘Jesus’ of Silicon Valley. Fake News manipulator Google is run by Larry Page and Larry is Musk’s investor and bromance butt buddy.

---- Musk uses massive numbers of shell companies and trust funds to self-deal, evade the law and hide his bribes and stock market insider trading. A huge number of Tesla drivers have been killed; pedestrians and oncoming drivers have also been killed, and Musk covers it up. The DNC and the MSM refuse to allow any articles about Musk’s crimes to be printed because they benefit from Musk’s crimes.

---- Musk has been professionally diagnosed as a ‘psychotic narcissist.’ A ‘Silicon Valley Mafia; cartel of frat boy sociopath venture capitalists like Steve Jurvetson, Tim Draper, Eric Schmidt, et al; threaten those who do not support the cult of Tesla or their political candidates. In EVERY blog that you read that mentions ‘Musk’, at least 1/3 of the comments have been placed their by Musk’s paid skills.

---- Musk holds the record for getting sued for fraud by his investors, wives, former partners, employees, suppliers and co-founders. Elon Musk has gone out of his way to hire hundreds of ex-CIA staff and assign them to “dirty tricks teams” to attack his competitors and elected officials who Musk hates.

---- Musk never founded his companies. Musk’s “Starlink” satellites are domestic spy and political manipulation tools – never get your internet from one. Musk stole Tesla in a hostile ownership take-over from Marty the true inventor of the Tesla.

---- The same kind of EMF radiation proven to cause cancer from cell phones exists in massive amounts in a Tesla. Musk can’t fix a car or build a rocket and has almost no mechanical skills. If you pull a report of every VIN# of every Tesla ever built and cross reference that with insurance, repair and lawsuit records you will find that the “per volume” fire, crash, death and defect rate is THE WORST of any car maker in history!

---- Musk is a lying con artist and partners with Goldman Sachs to rig the stock market. Sachs has a dedicated team of 18 men who rig stocks and valuation bumps for Musk. Over 1000 witnesses can prove every one of those claims in any live televised Congressional hearing! Senators Dianne Feinstein, Harry Reid, Nancy Pelosi, Kamala Harris and their associates own the stock in Tesla Motors and/or it’s suppliers and mining companies.

---- That is why they criminally help cover-up investigations of Tesla! All of this was reported, in writing, to James Comey, Patricia Rich and David Johnson at the FBI. The DNC bosses own the stock in lithium, Solar and EV markets and use kickbacks from those markets (Especially via convoluted campaign finance laundering via Elon Musk) to finance the DNC. The DNC bosses use character assassination as their main political tool against any member of the public who speaks out against their felony stock market scams and PizzaGate-like scandals.

---- The Harvey Weinstein reports by Ronan Farrow show that they have teams of hired goons that they pay to destroy people’s lives. They use Black Cube, Mossad, In-Q-Tel, Stratfor, Gawker Media, Gizmodo Media, Media Matters, David Brock, Sid Blumenthal, NY Times, Google servers, Facebook servers, Podesta Group, Perkins Coie, Covington and Burling and a host of “assassins”.

---- It should be a felony to hire character assassins in the USA. DEMAND A LAW and DEMAND the termination of these attack services. IE: Gawker and Gizmodo Media sets-up the attack stories and, in paid partnership with Google, Google kicks their attack links around the globe, in front of 8 Billion people, forever. Google locks the attack articles of its enemies on the front top search results of Google search results forever, on purpose!

---- That is why Google is being terminated in the largest, most well resourced anti-corruption public service take-down in history! Tesla and Musk are protected by shareholders Harris, Pelosi, Feinstein, Brown and Newsom. Panasonic (indicted for bribery and Musk’s partner) spends billions of dollars annually cover-up lithium battery fires and battery defects.

More is coming, check back...

THE NETFLIX CONSUMER NEGLIGENCE AND IDEOLOGY PROPAGANDA SCHEMES

Shoshana Zuboff’s, The Age of Surveillance Capitalism - Why Twitter, Google, Facebook, Instagram, YouTube, Netflix, Alphabet are the SAME Thing, The SAME SICKO tech elites and the same kinds of social privacy RAPE against citizens!

Netflix wants to charge us money to watch their abortion ads, BLM promos and cut-off-your-dick trans hype!!!!??

WOKEFLIX is what everyone now calls Netflix because Netflix takes our money and pushes weird sex propaganda that Netflix bosses are into!

Per Susan Deen:" Let's face it, Netflix sucks. Netflix spies on you and sends your psychological profile, location and interests off to spies, political parties, marketing services, Google, The Silicon Valley mafia, the IRS, the DEA.. pretty much anybody can see what you are doing on Netflix.NETFLIX is not a movie service.

NETFLIX IS AN ULTRA-WOKE, ANTIFA PROPAGANDA OPERATION THAT SEEKS TO PROMOTE EXTEMIST POLITICAL AND SEXUAL SOCIAL CONCEPTS! If you like to get pandered to and treated like one of the data cattle on the privacy harvesting ranch then Netflix is your Pimp! Netflix pretty much works for Obama and his political gang and pushes woke mass media manipulation and gay sex social programming at you as a result. If you are a guy, Netflix really, really, really wants you to cut your penis off and call yourself a girl!"

---- Whats worse is that with so many studios refusing to license content to Netflix now, streaming services such as Disney plus, Peacock and many more are on the rise. Netflix sucks. Somehow, Netflix subscribers are left feeling like there's nothing to watch on a platform that force feeds an over abundance of content from Indian and Mexican movies to it's viewers.

---- Every Netflix subscriber claims there's nothing above "B-list" movies being served to them on a thirteen dollar per month silver platter (and sixteen for 4k) Not to mention how unfavorable the label "Netflix originals" have become when slapped on a movie or show: "Netflix originals" is building a negative rep on par with Nickelback and Adam Sandler's series of Happy Madison productions movies.

---- Everyone knows that Netflix is bad now and getting worse every day. Netflix makes young adults feel the same way the price of extra guac at Chipotle does... and that is the: "I don't agree with this, but please take my money", feeling. They know they've got your money because it's too hard to say no each month because Millennials are so stupid and sheep-like.

---- Did we mention the increase of the monthly price? Netflix sucks. Netflix only hires Burning Man type extreme hair-dyed hipsters who have an ANTIFA-type attitude, especially if they are from Asia and will work like dogs for McDonald's type pay and conditions. People who use Amazon Prime and then go back to Netflix can really see how much Netflix sucks. They would rather set their genitals on fire than stay with Netflix.

---- Netflix will make you love crippled, fat, black transgendered lesbians. You will get so many of them you won't be able to stand it.

---- A while back Netflix destroyed its own rating system. What we mean by that is... they literally deleted it. Now, at the start of each movie we're forced to either check rotten tomatoes or risk the next 25 minutes to figure out if a show or movie is worthy of our time and attention. Netflix removed their rating system in order to hide the fact that everyone thinks their movies are absolute shit!

---- Netflix stole most of it's streaming media technology from small inventors that it never paid. If any inventor tries to sue Netflix, Netflix just sends millions of dollars of lawyers after them so that the inventors can never get paid. It is best just to put Netflix out of business.

---- Netflix spent zillions of dollars making new content but the content they made turned to be the worst shit ever created. When Obama and his buddies make media to try to program you into being "woke", it ends being heartless propaganda. Seriously, Netflix spent more money making shittier content than anyone in history. It's as if Netflix was just funneling money back to Biden and Obama. Speaking of funneling money, the FBI's Peter D. Cair has been

busting Netflix executives who steal big money through the Netflix stock market system. ---- If you use Netflix you enter a “Netflix pit” you fell into and can’t get out of...

---- There are hundreds of millions of people in America. The same 120 of them are all involved in operating the same crimes and corruption including: the Sony Pictures corruption; the Afghanistan rare earth mine scandals operated through The Energy Department political slush fund that involves the lithium battery cover-ups (headed by Elon Musk); the Big Tech Brotopia rape, sex trafficking, bribery, exclusionism, racism and misogyny issues they were taught at Stanford University; The Facebook – Meta – Google – Alphabet – Netflix, et al, coordinated news manipulation and domestic spying that they engage in; the hiring of Fusion GPS – Black Cube – Gizmodo/Gawker assassins; the destruction of the housing market by their mass real estate manipulations; patent theft and industrial espionage; and the bribery of almost every politician all the way up to the Oval Office.

---- Twitter, Splunk, Google, Facebook, Netflix, YouTube and the Silicon Valley internet Cartel serve you custom manipulated content by automatically creating a covert digital dossier on you reflecting the content consumption preferences they have spied on about you. They continually evolve their dossier on you in order to steer you towards their ideology and their Democrat political party. At these companies, “data mining”, “machine learning” and “AI” means computerized propaganda processing for certain political entities. They began hiring off-shore people (because they would work so cheap) but most of those people turned out to be Muslim. This created conflicts with the entire southern part of the United States (which is anti-Muslim) because those workers steered content to pro-Muslim positions.

---- Their spy dossier on you uses abstract content-specific features of the consumed content, such as categories, topic models, and entities, which they automatically extract using natural language processing by comparing every word you use to a giant computer library of what those words might mean about your psychology. So it’s like you are getting “mind-raped” without any penis use. Their assessment of what your words might mean is based on what rich, white male, \$200K/year, DNC-promoting programmers think they might mean.

Their computers scale and expand their tools with algorithmic software created by those politically and socially biased frat white boys that wrote the code. It is all biased as hell. They never hire blacks or women in system creation roles so everything these companies do only supports rich white soyboy snowflake type gamer thinking.

---- Because their Silicon Valley VC’s told them to spy on billions of people, even for these web giants, it is impractical to store the entire dynamic history of a user’s interaction features. They, thus, out of greed, use algorithms that selectively decay information in order to generalize users and populations. To them, you are just a generalized data point, like cattle on a ranch, to be harvested and fed upon by Silicon Valley.

---- Netflix handed that sex-obsessed fetishist Ryan Murphy (pictured) \$300 million to create flop after flop after flop. Oh, and where’s all the America-is-racist shit? I’ll tell you where all that garbage is: it’s buried in that pile of shit Netflix calls a “content menu,” and as far as eyeballs, it’s all losing to 20-year-old movies everyone’s already seen, like Happy Gilmore. Netflix’s whole plan was to release a new movie every week, which it did. But those movies were all shit — all preachy, insulting, anti-human nature exercises in woketardery.

----So now that The People have spoken and the bottom has begun to fall out of Netflix’s stock price — from \$679 in November to \$192 today — and now that Netflix is losing subscribers and expecting to lose two million more this quarter — the Netflixards need to rethink some things...It makes perfect sense for Netflix to want to attract talent. What makes no sense is standing back and allowing them to produce their insane vanity projects that have no appeal to any normal human being.

THE PATENT THEFTS BY THE BIG TECH OLIGARCHS

LARRY PAGE AND GOOGLE BASE THEIR BUSINESS MODEL ON STEALING YOUR TECHNOLOGY. Larry Page's Obsessions Became Google's Business Model. Larry's Boyfriend Elon Musk Conspires With Larry Page. Page Has Been Caught Skulking Around Tech Parties To Steal Ideas

---- SEE HOW YOUTUBE, NETFLIX, FACEBOOK, GOOGLE, AMAZON AND THE SAND HILL ROAD VC'S STEAL YOUR STUFF UNDER THE GUISE OF "TAKING A LOOK UNDER THE HOOD"

---- Draper Fisher, Kleiner, Andressen, Sony Ventures, et al.. need to go to prison for running a mob-like, RICO-violating, intellectual property theft mill...

---- The contact start-ups, ask them to come in and pitch, reject them, then send their business plans to Google, Netflix, Sony and Facebook (WHO THEY FINANCE) and tell them: "...HERE COPY THIS, JUST CHANGE THE NAMES OF THINGS.." The Sand Hill Road VC's are mobsters and scumbag thieves! Tom Perkins, James Bronkema and many other of their members ratted them out in recorded statements!

---- "...We discovered that the patent lawyers that were supposed to be helping us... That we paid to provide our income; were covertly our competitors and were working as skills, for our enemies. Our patent lawyers were; either, financed by, friends, with, sleeping with, dating the staff of, holding stock market assets in, promised a revolving door job or government service contracts from, partying with, personal friends with, photographed at private events with, exchanging emails with, business associates of or directed by; our business adversaries, or the Senators and politicians that those business adversaries pay campaign finances to, or supply political digital search manipulation services to. Criminal U.S. Senators coordinated and profited in these schemes. Their own family members and ex-staff have now supplied evidence against them..."

When you spend your life on something, only to find that it was being sabotaged by those you depended on, call us: <http://www.usinventor.org> -

--- There are hundreds of millions of people in America. The same 120 of them are all involved in operating the same crimes and corruption including: the Sony Pictures corruption; the Afghanistan rare earth mine scandals operated through The Energy Department political slush fund that involves the lithium battery cover-ups (headed by Elon Musk); the Big Tech Brotopia rape, sex trafficking, bribery, exclusionism, racism and misogyny issues they were taught at Stanford University; The Facebook – Meta – Google – Alphabet – Netflix, et al, coordinated news manipulation and domestic spying that they engage in; the hiring of Fusion GPS – Black Cube – Gizmodo/Gawker assassins; the destruction of the housing market by their mass real estate manipulations; patent theft and industrial espionage; and the bribery of almost every politician all the way up to the Oval Office.

---- So, while the categories covered in this investigation may seem diverse. They are connected through an enterprise of criminality and illicit, coordinated operations. We list, by name, the 120 most complicit individuals organizing these crimes, in the evidence documents already submitted to the FBI, FINCEN, DOJ, FTC, SEC, FEC, Congress, InterPol and other authorities. Digital financial tracking of those persons and all of their family members should be assumed to have been under way for some time. Wire-taps and device taps of those persons and all of their family members should be assumed to have been under way for some time.

---- U.S. SENATORS do not get to own Google, Facebook and YouTube, and their suppliers, while exclusively financing Elon Musk, Larry Page, Eric Schmidt and Mark Zuckerberg with government money (your money) and tax waivers, while sabotaging their competitors and cutting them off from the same government benefits. U.S. Senators and the highest officials in the land are also financed by Elon Musk, Larry Page, Eric Schmidt and Mark Zuckerberg for their political campaigns. The United States Government is supposed to arrest Elon Musk, Larry Page, Eric Schmidt and Mark Zuckerberg for corruption, not help them, and Goldman Sachs, do more crimes! -

--- New and dramatic game-changing evidence has emerged in the last two weeks from a huge volume of document leaks and other Court hearings. Plaintiff presents this case, not only as a claim for damages, but also as an anti-corruption effort public-service. Harms and damages have been accelerated against Plaintiff, as recently as this week, due to the proximity to elections. Plaintiff was told by a senior member of The National Venture Capital Association: “.. We (The NVCA) are not going to let you get any more patents that compete with our operations. We (The NVCA) control the Patent Office and we decide who runs the Patent Office. Facebook is our baby and we will destroy you if you threaten the baby...”. Recent evidence has proven, beyond any doubt, that the Facebook, Google Cartel does, indeed, run the USPTO!

--- The charges are filed against Defendant, THE UNITED STATES PATENT OFFICE, a representative entity which has a 1.) command-and-control, 2.) financing, 3.) legal authority and 4.) management influence over the actions and claims of harm described herein and has been proven, in thousands of past court cases, to use reprisal attacks against A.) whistle-blowers and B.) the competitors to political campaign financiers of high-level government officials. Plaintiff has no knowledge of, or ability to, accurately quote or include any citation to a statute, rule, or order or ‘little lawyer numbers in parentheses’ unless a lawyer is supplied to Plaintiff. Plaintiff maintains that the ongoing blockading of Plaintiff’s representation by a qualified lawyer is a violation of his Constitutional rights to a fair hearing which is caused by Defendants who seek to engage in further cover-ups. ---- When the United States Patent Office, in a federal hearing, said that Plaintiff invented the core technology operating Facebook and Google and then refused to give him his patent paperwork, it seemed like the game might be rigged.

After receiving tips from USINVENTOR.ORG, Wall Street Journal, TECH CRUNCH and Congress; Plaintiff hired ex FBI and CIA agents to check it out... BOY, was it ever rigged. Facebook's own staff and investors work INSIDE the U.S. Patent Office in order to protect Facebook from having to pay for technology they stole. Then they showed Plaintiff that most of the Obama and Biden Administration COVERTLY OWN FACEBOOK. Talk about 'rigging elections' and 'rigging industries'... Facebook executives even sit on USPTO boards!!! -

--- What U.S. judge or regulator is complaining? For example, (as one example of MANY THOUSANDS) who would complain about Sands Capital’s failure to file the S.E.C. Form SC 13G notices of acquisition of Facebook, Baidu and Athenahealth stock?

---- Not S.E.C Chairman Mary L. Schapiro—she held a boatload of “dark pool” Fidelity, Vanguard, AllianceBern, TIAA-CREF and T. Rowe Price funds.

---- Not Commerce Secretary #1 Rebecca M. Blank—she held TIAA-CREF, Vanguard and Fidelity funds.

---- Not Commerce Secretary #2 Penny S. Pritzker—she holds up to \$23.4 million Morgan Stanley, JPMorgan and Goldman Sachs Facebook dark pools.

---- Not Attorney General Eric H. Holder—he held T. Rowe Price and Fidelity funds. In fact, Holder held Fidelity Contrafund, the largest single Facebook mutual fund stock holder, valued at \$413 million.

---- Who in the judiciary would complain?

---- Not Leader v. Facebook Chief Justice John G. Roberts, Jr.—he held Microsoft, T. Rowe Price, Fidelity, Janus, Vanguard and Blackrockfunds, including Fidelity Contrafund.

---- Not Leader v. Facebook Federal Circuit Judges Alan D. Lourie, KimberlyA. Moore and Evan J. Wallach—they held Fidelity, Vanguard and T. Rowe Price funds, including Fidelity Contrafund.

---- Not Leader v. Facebook District Court Judge Leonard P. Stark—he held Vanguard and Fidelity funds.

---- Not Leader v. Facebook Patent Office Director David J. Kappos—he held over a million dollars of Vanguard funds.

---- Investigators uncovered a felony, organized crime-level of QUID PRO QUO media manipulation, RICO violations and anti-trust law violations between government officials and Facebook blockading Plaintiffs patent and business rights. Over 500 high level government officials own Facebook and harm it's competitors to protect their insider trading stocks. Ask FINCEN to show you the complete family account records on EACH of the perps!

---- Plaintiff noticed that nobody every prosecutes these people. It is like they are protected by a crony quid pro quo protection racket running all the way up to the Oval Office! ---- Can you explain that USPTO? It kind of sounds like bribery, cronyism, quid pro quo and racketeering!

The Worst Ones - Rev 2.2 MAIN

- James Bronkema – West Coast Money Man for David Rockefeller and Feinstein financier (Dead)

THEIR CORPORATE STOCK MANIPULATION FRONT FACADES- Tracked via financial records and email leaks to RICO, Anti-trust and Money Laundering violations:

- Netflix - Propaganda Site

BOYCOTT SONY PICTURES FOR THEIR POLITICAL AND EXECUTIVE CORRUPTION

Corrupt political families conspire to give government funds, contracts, tax waivers, buildings, stock market profits and other insider perks to themselves and their friends. They also conspire to blockade, harm, sabotage and blacklist those who compete with them and their friends. These corrupt politicians are never prosecuted for their crimes, and can laugh in the face of those who point out their crimes, because they control the prosecution system. Their Quid Pro Quo criminal corruption is the single largest cause of the taxpayer hatred of Congress.

Shoshana Zuboff's, The Age of Surveillance Capitalism - Why Twitter, Google, Facebook, Instagram, YouTube, Alphabet are the SAME Thing, The SAME SICKO tech elites and the same kinds of social privacy RAPE against citizens!

<https://www.contagious.com/news-and-views/shoshana-zuboff-on-the-age-of-surveillance-capitalism>

Sony's Dirty Hollywood And Game Shenanigans.

---- The hacks and leaks at Sony Pictures Entertainment have exposed the dark side of Hollywood. The new information reveals an insider vision of a company racked with sexism, office politics, high-school-level personality quibbles and a severe mine-is-bigger-than-yours territoriality culture.

---- A number of lawsuits against Sony, from Lady GaGa to Sony's own employees, have revealed even more.

---- An aspect of the revelations involves where Sony gets it's ideas from. A number of revelations reveal that Sony seems to have established a process of "borrowing" technology and story ideas while "forgetting" to properly attribute or pay the sources.

---- Some of the 'dirt' exposed included: – Sony finances Democrat Presidents in exchange for media 'favored nations' status over competitors.

– Sony and Google coordinate political manipulation campaigns together.

– Sony executives trade female entry-level staff like cattle at a 'ranch'.

– Sony executives hire an insane amount of hookers, rent-boys and under-age sex providers.

- Sony executives bribe their kids into colleges.
- The good-old-white-jewish-boy club is alive and well at Sony.
- ZERO DARK THIRTY was a political PR hype movie commissioned by the Obama Campaign using government resources
- Sony steals patents from anybody it wants
- Sony stole its VR technology
- Sony stole its web video technology, especially SONY VUE
- Sex deviancy is the rule at Sony – Sony is a bunch of high-school whine babies who think their shit doesn't stink
- Ira Rubenstein, Sony's Marketing Head, put his name on Sony's patents, as the "inventor", even though his own emails admit that "he does not even know how to work a computer" -
- Sony's web video patents, that were sold to ATandT/Direct TV, admit that Sony copied their patent ideas from TSBN in San Francisco
- Sony spends millions and millions of dollars on political bribes
- The kids at Sony seem to have been very naughty children. They let their IT system go to pot, and got hacked, and outed, as "racist", "misogynist", "campaign rigging", "high school tantrum throwing" kinds of people, per their own emails. Hollywood Reporter, The Verge, Wikileaks, and a variety of tabloids and pundits, have delighted in dissecting the fraternity house, inside antics, of Sony Pictures. -
- Sony says that the hackers "DELETED" Sony's files. THEY DID NOT. The Russians, Koreans, NSA, DOJ and a number of reports have ALL of Sony's files and emails!
- Their boss got fired. They got ridiculed for turning "Zero Dark Thirty" into a, slightly fabricated, political vote-churn tool. Other execs got kicked to the curb. All of their financial, contracting, political cash layout, and tax dynamics were placed under investigation, and even more sketchy bits are shaking loose...
- Sony announced that it sold just 2 million PlayStation 5 units last quarter (Q4), bringing its overall total to 19.3 million. That's down considerably from the same quarter last year when it sold 3.3 million units. The company did manage to boost game sales, though, with 70.5 million PS4/PS5 titles sold compared to 61.4 million a year ago, including 14.5 million first party games compared to 7.9 million in Q3.
- Overall, its Game and Network Services (GNS) division earned 665 billion yen (\$5.1 billion) this quarter, up slightly over last year. Sales for the full 2021 year were flat, up just 2 percent over 2020, and profits also changed little.
- Those numbers mean that the PS5 is falling even further behind the PS4 in sales, having now sold 3.1 million fewer units than the PS4 at the same point in time. Sony warned that this was coming, blaming the lack of sales not on customer demand but its inability to build enough units due to the ongoing chip shortage.
- There are hundreds of millions of people in America. The same 120 of them are all involved in operating the same crimes and corruption including: the Sony Pictures corruption; the Afghanistan rare earth mine scandals operated through The Energy Department political slush fund that involves the lithium battery cover-ups (headed by Elon Musk); the Big Tech Brotopia rape, sex trafficking, bribery, exclusionism, racism and misogyny issues they were taught at Stanford University; The Facebook – Meta – Google – Alphabet – Netflix, et al, coordinated news manipulation and domestic spying that they engage in; the hiring of Fusion GPS – Black Cube – Gizmodo/Gawker

assassins; the destruction of the housing market by their mass real estate manipulations; patent theft and industrial espionage; and the bribery of almost every politician all the way up to the Oval Office. -

--- So, while the categories covered in this investigation may seem diverse. They are connected through an enterprise of criminality and illicit, coordinated operations. THE SILICON VALLEY AND WASHINGTON DC CARTEL MEMBERS

The Worst Ones - Rev 2.2

You would be shocked to learn how many people are killed, every day, for less than \$50.00. ISIS and the Taliban will saw your head off for just an ideology. If people would commit murder over that small an amount of money, imagine what they would do to control the trillions of dollars of money that is always moving through the stock market. These are the people that will stop at nothing for power, mansions, hookers, private jets and greed!

THE BRIBED INSIDER TRADING POLITICIANS - Tracked via financial records and email leaks to quid pro quo:

- Aneesh Chopra - White House Tech Exec
- Arnold Schwarzenegger – Governor (Accused of political bribery and kickbacks; tax evasion, illicit deal organization with Russians and more...)
- Barack Obama – Chicago politician
- Bill Daley – White House strong-arm (Forced to resign)(he is now under investigation)
- Bill Lockyer – Calif State finance head (Under investigation and sex scandal conflicts, charged with corruption by media. Assets and ownerships under investigation)
- Daniel Cohen – DOE Legal counsel who assisted in the Steven Chu scam (Sent packing/fired/forced to resign)
- David Axelrod – White House strategist who helped stage the quid-pro-quo (Sent packing/fired/forced to resign) (he is now under investigation)(accused of political bribery and kickbacks; tax evasion, and more...)
- Hunter Biden
- David Plouffe – White House money packager. Arranged deals between VC campaign Donors (Forced to Resign. Under investigation)
- Debbie Wasserman Schultz
- Denis McDonough – White House adviser
- Dianne Feinstein – California politician
- Eric Holder – Attorney General- DOJ (Forced to resign) (Charged with staff & VC Protections and blockade of FBI and Special Prosecutor deployments in order to run the cover-up)
- Eric Strickland – Head of Auto Safety agency under DOT (Sent packing/fired/forced to resign)(he is now under investigation. Charged with cover-up of Tesla and GM auto dangers he had known about)
- Gabriel Burt
- Harry Reid – Senator- Solar factory guru, Congress lead (Accused of political bribery and kickbacks; tax evasion, and more...Forced out of Congress in shame)
- Hillary Clinton – Dynastic politician
- Jack Lew
- Jay Carney – White House press lead (Forced to resign)
- Jeff Berman - Bryan Cave. Berman, the former delegate counter for President Obama’s 2008 campaign
- Jeff Peck, Peck, Madigan, Jones & Stewart. Aide to then-Sen. Joe Biden (D-Del.) on the Senate Judiciary Committee
- Jeffrey Zients
- Jerry Brown – California politician
- Joe Rhodes – White House shill
- Joe Biden - Politican who created Solyndra funds
- John Podesta – White House adviser

- Jonathan Silver – DOE VC (Sent packing/fired/forced to resign)(he is now under investigation. Shamed in media for epic failures)
- Joshua Wright - FTC
- Kamala Harris– Stock favoritism Insider with her husband
- Katherine Feinstein
- Kathy Zoi
- Ken Alex – Scheme Adviser to Jerry Brown
- Ken Duberstein and Marti Thomas, The Duberstein Group. Duberstein was floated as a candidate for Obama’s chief of staff before the president chose Bill Daley, while Thomas is a Democratic vet who worked in the Clinton Treasury Department.
- Lachlan Seward – Energy Department insider gatekeeper
- Melanie Nutter – Pelosi Top Aide
- Matt Rogers – VC and quid pro quo pass-through conduit
- Megan Smith - U.S. CTO
- Mikey Dickerson
- Nancy Pelosi – California politician
- Robert Gibbs – White press office head
- Steven Chu – Secretary of Energy – The most corrupt in US history
- Todd Park – IT manipulator inside White House
-

THE OLIGARCH FINANCIER/BENEFICIARIES OF THE CRIMES - Tracked via financial records and email leaks to quid pro quo:

THEIR CORPORATE STOCK MANIPULATION FRONT FACADES- Tracked via financial records and email leaks to RICO, Anti-trust and Money Laundering violations:

- Abound Solar - Criminally corrupt crony campaign finance front operation. (Terminated)
- Alphabet - Privacy abuse, spy-on-the-public, Fake News election rigger, Clinton/DNC scheme financier (Under Federal and EU investigation)
- Facebook/Meta - Privacy abuse, spy-on-the-public, Fake News election rigger, Clinton/DNC scheme financier (Failing, rapidly decreasing users and increasing fake ad stats disclosures)
- Fisker - Criminally corrupt crony campaign finance front operation. (Terminated)
- Google, Inc. – Data harvesting company(Ran media attacks, stock market pump and dump PR hype and character assassinations)(accused of political bribery and kickbacks; tax evasion, and more...) (charged by EU, and most nations, with multiple abuses of the public. Has totally lost the trust of the public. Revenue loss increasing geometrically.)
- In-Q-Tel, Inc. – CIA off-shoot associated with Eric Schmidt, Google, Elon Musk and the Cartel leaders. Ran “hit-jobs” on Silicon Valley VC adversaries and reporters (Sued, under investigation, exposed in multiple documentaries, under investigation for Cocaine trafficking. Removal of charity status demanded)
- Ivanpah Solar - Criminally corrupt crony Google campaign finance front operation. (In failure mode)
- LinkedIn - Election manipulation networking site
- Solyndra Solar Company – FBI-raided corrupt Clean Tech company
- SpaceX – Elon Musk company that Obama gave part of NASA to in exchange for campaign conduits
- Tesla Motors – Car Company that conduits money to campaigns

Any issues re: culpability can be easily resolved in meetings with the FBI, FINCEN, The SEC, The IRS, The FTC, ICIJ.ORG and open Congressional hearings! Never was the term: "Follow The Money" more appropriate than for these people! Why are these people not yet arrested for election manipulation, RICO and Anti-trust violations, money laundering, bribery and other illicit deeds? Who is protecting them? Who is telling the police not to act? This list also serves as a demand for investigation and prosecution of these individuals who conspired to engage in these illicit acts. This is not the complete list.

NOTICES

By comparing records and files from FINCEN, FBI, FTC, SEC, Congressional Investigators, ICIJ, FEC, DOJ, ProPublica, and other sources, one can easily see that political officials own Google, Tesla, Facebook, YouTube, Instagram, et al, (AKA “The Tech Cartel” or, in legal terms: “The Enterprise“). This explains why those companies have been exempt from regulation and prosecution. Those public officials and tech company oligarchs have exchanged millions, and millions, of dollars between themselves and their families for profiteering.

They were all either financed by, friends, with, sleeping with, dating the staff of, holding stock market assets in, promised a revolving door job or government service contracts from, partying with, personal friends with, photographed at private events with, exchanging emails with, business associates of or directed by; our business adversaries, or the Senators and politicians that those business adversaries pay campaign finances to, or supply political digital search manipulation services to. Criminal U.S. Senators coordinated and profited in these schemes. Their own family members have now supplied evidence against them. You don't hear about this, much, in the “main-stream news” because nearly half of Congress, White House staff and government agency bosses own the stock in the news broadcasters and receive billions of dollars of financing from them.

Many witnesses have now sworn, warranted and certified to federal law enforcement about the details of these crimes. Many of those whistle-blowers were former executives in “The Tech Cartel”.

This is not about politics. It is about felony crimes! Your government representatives are business partners with the public's biggest enemies and make decisions based on greed, not duty! Call them out! Demand their arrests!

Criminal politicians and their Silicon Valley oligarch financiers organized a felony-class 'enterprise' to exchange stock market shares, jobs, government cash, sex, exclusive public policy switcheroos and other corrupt actions. They put hit jobs on their competitors and whistle-blowers using government resources. Now those crooks need to be sued and have criminal referrals filed against them with the FBI, DOJ, SEC, FTC, GAO, FEC, FINCEN and Congress!

The FBI, and other law enforcement organizations, define a "cartel" as: 'An association of industrialists and business firms organized covertly to establish a national, or international monopoly, by price fixing and ownership of controlling stock, to operate a trust or monopoly to reduce competition between themselves by allocating markets, censoring public knowledge, manipulating governments or controlling the price and production of a product or service.' The 'Stimulus Funds' have been directed to benefit certain Senator's stock market accounts - DON'T LET THEM GET AWAY WITH IT!

This case is about a "cartel" which meets every aspect of the legal definitions of “Cartel”, “Monopoly” and “RICO LAW” violations.

An additional set of over 200 evidence PDF documents, including bibliographies, backing up and detailing the above assertions, are available online and are free upon request.

This book, and all of the associated documents, have been provided, online, for over ten years, and in digital copies to the investigation offices of every government law enforcement agency including the FBI, FTC, GAO, SEC, FEC, DOJ, AG, etc. If you wonder why it seems like none of the culprits mentioned in here are ever apprehended then you should contact each of those offices, in writing to ask them why, under FOIA (Freedom Of Information) questioning rights. Generally, though, history has proven that The White House

and big New York and California politicians order regulatory and law enforcement agencies to leave their buddies alone.
