Let American Farmers Grow Hemp Once Again to Create Jobs and Rebuild the Rural Economy

Created by E.S. on January 20, 2017

BEFORE

Industrial hemp was once a dominant crop on the American landscape. This hardy and renewable resource was refined for various industrial applications, including paper, textiles, and cordage. Unfortunately hemp was conflated with marijuana but hemp canߣt be used as a drug.

Over time, the use of industrial hemp has evolved into an even greater variety of products, including health foods, body care, clothing, auto parts, construction materials, biofuels, plastic composites and more.

Let American Farmers Grow Hemp Once Again to Create Jobs and Rebuild the Rural Economy

1. ANTIFA petition at 4:31PM EST. Unsigned.

WE THE PEOPLE ASK THE FEDERAL GOVERNMENT TO PROPOSE A NEW ADMINISTRATION POLICY.

President Trump: Declare Antifa a Domestic Terror Organization

Created by J.A. on February 02, 2017

Over the last several months, we have seen Antifa- short for "anti-fascist"- agitators commit acts of political violence all across our country.

Masked Antifa members in Washington D.C. attacked and beat several individuals, as well as looting and destroying stores during the presidential inaugural weekend.

Antifa members in Seattle beat several individuals

Antifa members in Berkeley beat people unconscious with flagpoles, assaulted innocent bystanders, and torched UC Berkeley property.

These acts of political violence are growing rampant and clearly meet the definition of terrorism. Antifa poses a threat to innocent men and women across the country.

President Trump, we as Americans who value peaceful discourse ask that you declare Antifa a terrorist organization.

Sign This Petition

Needs **99,999 signatures** by **March 4, 2017** to get a response from the White House

1 SIGNED 100,000 GOAL

WHITE HOUSE PETITIONS UNDER **OBAMA** ARE FOUND TO HAVE BEEN HIDDEN, DNS RIGGED, SIGN-UP DELETED AND OTHERWISE SCREWED WITH

180,000+ people told outside orgs that they signed up but that never showed up on Obama's White House Site:

PETITIONGATE - CODEFAG IS BACK EDITION CODEFAG (ID: h/b+LECU)

02/02/17(Thu)20:19:27 [No.110736335](#)

ITT: Something with the <http://petitions.whitehouse.gov> is not right the petitions that work properly are only leftist.

PREVIOUS THREADS:

[>>110698850](#)

[>>110672378](#)

The petition that led to this discovery is <https://petitions.whitehouse.gov/pe>

When you sign this nothing happens; and before you say "THE 150 PRESIGNS" we are well past that point. As something similar happened to the "George Soros Security Threat" and "Pizzagate" petitions. Which I do not have links for (Someone get those please)

Using the infograph in OP (sorry for the size i didnt make it) you can see that after voting for two different petitions, one of them increased instantly while the other stayed at 1.

After doing my CODEFAG work I found the JSON (<http://www.json.org/>) that holds the stats for the currently loaded petition on the page. There is a few values that not like the rest of the petitions on the website. IsPublic and reachedPublic

The Petition in question: <https://api.whitehouse.gov/v1/petit>

```
"isPublic":false  
"reachedPublic":0
```

and a different random petition: <https://api.whitehouse.gov/v1/petit>

```
"isPublic":true  
"reachedPublic":1484952666
```

After doing some more digging about We The People. I learned that a company named Blue State Deep created it, as well as creating Barrack Obamas Campaign website.

<https://en.wikipedia.org/wiki/Macon>
https://en.wikipedia.org/wiki/We_th

<http://web.archive.org/web/20170202>

In the archive article it is mentioned that George Soros uses Blue State Digital for basically all his web development needs. Which means he probably owns the comapny or has reaches far into.

"Financier-philanthropist George Soros hired Blue State in the fall of 2006 to work on two projects."

Those who used their real emails are potentially fucked.

they signed the petition, google has moles inside that will allow access to gmail accounts.

they will make your life hell.

So, what can we do to save those anons. should they delete those email accounts?

>>

I Try.

NEW INFORMATION

The "We The People" website is open sourced, I didn't look at it earlier today because I was at work.

<https://github.com/WhiteHouse/petit>

There is an Admin part to the site that I am looking into right now. I don't believe they would put anything that would alter anything would be found in a public source. However I am gonna look into it.

For now here is what they store on you, each signature.

```
define('SIGNATURE_SOLR_FIELD_ID', 'entity_id');
define('SIGNATURE_SOLR_FIELD_UID', 'is_uid');
define('SIGNATURE_SOLR_FIELD_PETITI
define('SIGNATURE_SOLR_FIELD_USER_F
define('SIGNATURE_SOLR_FIELD_USER_L
define('SIGNATURE_SOLR_FIELD_LEGACY
define('SIGNATURE_SOLR_FIELD_LEGACY
define('SIGNATURE_SOLR_FIELD_TIMEST
define('SIGNATURE_SOLR_FIELD_USER_A
define('SIGNATURE_SOLR_FIELD_IP_ADD
define('SIGNATURE_SOLR_FIELD_USER_C
define('SIGNATURE_SOLR_FIELD_USER_S
define('SIGNATURE_SOLR_FIELD_USER_Z
define('SIGNATURE_SOLR_FIELD_USER_U
define('SIGNATURE_SOLR_FIELD_USER_C
```

>>

>>[110745452](#)

Thankfully all of my gmail accounts are throwaway tier, they can fuck with those all they like. Just spam dumps.

>>[110745839](#)

Welllll fuck. Open source? That's interesting. I assume they could justify the datamining with "ensuring the accuracy of the signature count".

>>

Anonymous (ID: Odrp92zj) 02/02/17(Thu)21:22:04 [No.110746839](#)

File: [1485919594988.jpg](#) (56 KB, 640x640)

>>[110738834](#)

>until we find out more

We should try to make a brand new petition, totally unrelated and that can gain traction to the biggest audience (i.e. petition to add more sismometers in Yellowstone park, more caldera probes, more efficient EWS... This is literally a hot topic, since quakes are happening more and more often around the world now. Just an example. Make up your own, just avoid topics like blm, antifa, terrorism, immigration, ayylmaos, bogs, pizza etc.)

Use normie account to spread it, people from both sides will dig it.

Now we can see how the System behaves

>"isPublic":false

>"reachedPublic":0

Keep the results strictly monitored, make screenshots, etc...

Step one is always reconaissance. We have to know how it works.

[>>110746843](#)

it's the emails i'd worry about.

[>>110746563](#)

[>>110745839](#)

it's an important question. if they're harvesting your emails they can use connections to get all your info (if you used a real email) and ruin your life.

also names can be fake but your addresses may one day be used by communists to kill you. I'm not exaggerating. If they kill trump or overthrow the country while trump has the army at war somewhere, you're going to see a purge of normal people.

like delete everything that could identify you and then delete your account and get a new one.

to be honest i don't even know if this would help.

google likely has access to everything you've deleted anyway and closed accounts. There are definately people inside google who are part of this political group and would happily leak your personal info.

[>>110760260](#)

this

[>>110760385](#)

It could easily be parsed to tell you if it changes.

I realized what we have to do, we have to test it. Right now people will debate that "The petition hasn't gotten enough signatures." As that is part of the petition system, but I and I think some of you are under the assumption we have probably passed that number by now.

Assuming that we have reached the number, all we would have to do is get 150 signatures to prove this. Also they use your IP to detect multiple votes.

<https://github.com/WhiteHouse/petit>

So to get this many votes we are gonna either A) Meme it hard
or

B) Get some news person to get their audience to.

I don't want to break the rules but I think digits are a good way to determine what we do as a collective.

Trips

This implies it's an automated system. There's no way someone is watching petitions like a hawk and instantly deciding which ones are left wing and which are right wing.

I've furthermore seen some right-wing petitions on the site with quite a few signatures. OP, you're going to need more proof to really make it clear they're fucking with something here. I think they are, but we're missing puzzle pieces.

codecademy python tutorial and some programming books (gen.lib.ru is your friend, use google to find out which books are good) and then study and practice

This all introduces you to programming basics (codecademy especially) and once you've got the basics of coding down, it applies to basically every single language and you're almost literally just changing syntax at that point.

>its literally treason.

No, it's not. Treason requires betraying your country; sabotaging a petition site is not betrayal.

However, you're being stupid - THINK for a minute. Who controls whitehouse.gov? Is it President Hillary Clinton? Is it President Barack Obama? Or is it President Big Hands, The Biggest You Have Ever Seen?

If the pizzagate petition is being suppressed, it is because an INSIDER doesn't want to have to address it. I can think of several possible reasons - the biggest is that Pizzagate is obviously a stupid hoax. If the White House acts like it's real, that will prove to the world that Bannon and Trump are *actually insane* and not just idiots.

If, on the other hand, the White House says 'Pizzagate is fake', the handful of people who really believe it will start digging for connections between the Trump regime and organized sex crime rings. So the question becomes: which Trump Admin figures would be afraid of what will turn up when a bunch of autists start looking for sex crime rings at the highest levels of the God-Emperor's councils, and why?

>>[110769568](#)

The info is being entered and received, they have just made the settings to allow the results/data to be displayed to the public to "0 / off"

See >>[110750069](#)

```
"signatureThreshold":100000,  
"signatureCount":1,  
"signaturesNeeded":99999,  
"url":"https://petitions.whitehouse  
"deadline":1488616337,  
"status":"open",  
"response":[],  
"created":1486024337,  
"isSignable":true,  
"isPublic":false,  
"reachedPublic":0}}
```

>In laymen terms, here is the important bit:

>"isSignable":true,

Allows people to fill out the form, and submit the info to the database on the server\

>"isPublic":false,

These signatures are being recorded, but they are not being made immediately public - They are being marked "Private" by not being marked "Public" - They are watching the signatures grow, without revealing this data in real time

>"reachedPublic":0

They have set the "Reach" / exposure to 0 = off....

>>

Anonymous (ID: byeYgpIn) 02/02/17(Thu)23:57:41 [No.110770133](#)

are you guys this dumb?

the petition was created today

the latest public petition you can view is from the 22nd of last month

They obviously have a filtering process for created petitions

>and it seems politically motivated
the rushmore petition is also not public and it was made only a few days ago
if you guys look you might even find private petitions that are in favor to the left that were created only a few days ago

>>

Not treason. Soros is operating under a secret Executive Order signed by Bill Clinton and has already received immunity from prosecution as a result. Bet me it isn't true and we will see who collects from whom.

>vote a fascist in office

>cry when he doesn't want to hear you

Why you so stupid?

in all seriousness though, this looks fucked up. I won't sign the petition because I don't want Trump to invade my home fore impeding with the american democratic system but if the problem is from the start how did they ban it from the start? You trying to tell me it's a

closed system with a front for people to open own petitions?
k if you can make sense of this writing you might win the nobel peace prize.

I'm noob but isn't value in this case a cache? Keep value and read from it, loop beneath it to calculate value?
