

# AAA GOOGLE AND BIG TECH EXIST TO SPY ON YOU AND RIG POLITICS

Sun, 20 Aug 2023 14:52:59, admin45789, []

## THE AWFUL TRUTH ABOUT THE SICK PEOPLE BEHIND GOOGLE - ALPHABET - YOUTUBE

Corrupt political families conspire to give government funds, contracts, tax waivers, buildings, stock market profits and other insider perks to themselves and their friends. They also conspire to blockade, harm, sabotage and black-list those who compete with them and their friends. These corrupt politicians are never prosecuted for their crimes, and can laugh in the face of those who point out their crimes, because they control the prosecution system. Their Quid Pro Quo criminal corruption is the single largest cause of the taxpayer hatred of Congress.

- In the 2009 White House, you could not swing a cat without hitting a Google insider
- Google has paid covert bribes, PAC funds, real estate and search rigging payola to every CA Senator
- Google has paid bribes, through its lobby fronts, to halt FBI, SEC, FEC and FTC investigations of Google crimes
- Google was funded by the CIA, via In-Q-Tel, a so called "501 c3 charity" which was caught with tons of cocaine
- Google gets millions of dollars of taxpayer cash for spying on Americans inside the USA
- Google's map service was a spy system paid for by taxpayers money that Google now profits off of
- Nancy Pelosi and Dianne Feinstein have promised to "protect" Google because their families profit off Google stocks
- Payment receipts prove that Google and Gawker/Gizmodo exchanged cash and staff for Character Assassination attacks
- Google VC's and bosses have spent \$30M+ rigging the U.S. Patent Office to protect Google and harm Google competitors
- Google bribed it's lawyer into position as head of the U.S. Patent office in order to have her protect Google
- To rig insider stock trades, Google hides negative Tesla stories and pumps positive Tesla stories on "push days"
- Google and Elon Musk Co-own, co-invest and co-market stocks covertly while running anti-trust schemes
- Google rarely likes, or hires, black employees per federal and news media investigations
- Google hired most of the Washington, DC K Street lobby firms and told them to "do what ever they could"
- The film: "[Miss Sloane](#)" depicts only 2% of the illicit lobbying tactics Google employs daily
- Demands for an FTC and FBI raid of Google, for criminal activity, securities law and election felonies have been filed
- Google's David Drummond had his Woodside, CA Quail Road house bugged revealing sex and financial misdeeds

Google, and it's Cartel (Alphabet, Youtube, and hundreds of other shell-company facades) are a criminal organization engaged in felony-class crimes. Google's bosses bribe politicians, regulators and law enforcement officials to hold off prosecution.

At Google: Kent Walker, Andy Rubin, Larry Page, Eric Schmidt, Sergey Brin, Jared Cohen, Yasmin Green, David Drummond and Ian Fette are so enmeshed in sex scandals, election manipulation, and White House bribes that it is hard to comprehend how they can get any legitimate work done.

Between all of the sex cult activity; hookers; rent boys; political bribes to Pelosi, Harris, Newson, and Feinstein; DDoS attacks they run; CIA and NSA stealth deals; privacy harvesting; Scientology-like employee indoctrination; cheap Asian labor; covert Axiom scams and other illicit things they get up to; one just has to wonder.

Some of the largest political bribes in American or European history were paid via billions of dollars of pre-IPO cleantech stock, insider trading, real estate, Google search engine rigging and shadow-banning, sex workers, revolving door jobs, nepotism, state-supported black-listing of competitors and under-the-table cash. Why are these Silicon Valley Oligarchs and their K-Street law firms and lobbyists immune from the law?

U.S. Senators, Agency Heads and Congress are bribed by Google intermediaries with: Billions of dollars of Google, Twitter, Facebook, Tesla, Netflix and Sony Pictures stock and stock warrants which is never reported to the FEC; Billions of dollars of Google, Twitter, Facebook, Tesla, Netflix and Sony Pictures search engine rigging and shadow-banning which is never reported to the FEC; Free rent; Male and female prostitutes; Cars; Dinners; Party Financing; Sports Event Tickets; Political campaign printing and mailing services "Donations"; Secret PAC Financing; Jobs in Corporations in Silicon Valley For The Family Members of Those Who Take Bribes And Those Who Take Bribes; "Consulting" contracts from McKinsey as fronted pay-off gigs; Overpriced "Speaking Engagements" which are really just pay-offs conducted for donors; Private jet rides and use of Government fuel depots (ie: Google handed out

NASA jet fuel to staff); Real Estate; Fake mortgages; The use of Cayman, Boca Des Tores, Swiss and related money-laundering accounts; The use of HSBC, Wells Fargo, Goldman Sachs and Deutsche Bank money laundering accounts and covert stock accounts; Free spam and bulk mailing services owned by Silicon Valley corporations; Use of high tech law firms such as Perkins Coie, Wilson Sonsini, MoFo, Covington & Burling, etc. to conduit bribes to officials; and other means now documented by us, The FBI, the FTC, The SEC, The FEC and journalists.

Google and Youtube are based on technology and business models that Google and YouTube stole from small inventors who had launched other companies that were up and operating before YouTube or Google even existed as business operations.

Google holds the record for the largest number of corporate sex scandals, abuses and sex trafficking charges.

There are only two kinds of people that work at Google: 1.) Cult indoctrinated naive kids with odd sexual quirks and 2.) divisive managers and executives who seek to exploit those echo-chambered employees for nefarious political and stock market manipulation purposes under the Scientology-like guise of "doing good things", when, in fact, they are engaged in horrific crimes against society.

Google has hired almost every technology law firm in order to "conflict them out" from ever working to sue Google. If Google rapes you, robs your patents or does anything awful, you won't be able to find a lawyer to help you.

Most Google executives in control of Google have been indoctrinated by family dynasties to believe that any crime is justified by a bigger cause. Most of those executives are men. The few women in control of departments are figure-heads.

Google bosses attend the same parties and business meetings in which they collude, co-lobby, rig markets and make anti-trust violating plans together.

Google is a private government with more money and power than most smaller nations. Google has more lobbyists bribing more politicians than any other company in America.

Jared Cohen and fashion show-horse Yasmin Green at Google had the job of over-throwing countries in the Middle East. They openly bragged about it. (<https://truthstreammedia.com/2013/06/02/googles-regime-change-agent-jared-cohen/>)

People that work at Google get paid \$260,000.00+ per year to lie, spy, manipulate politics, bribe politicians and engage in other crimes. For that kind of money, a person will do ANYTHING and rationalize it as "part of the higher cause".

The Project X investigation team is publicly quoted as stating: **"...give the same number of lawyers as Google has, with the same level of skills and experience, the same discovery budget, legal expenses budget and expert witness budget, we ABSOLUTELY GUARANTEE that we can put Google staff and investors in federal prison and close Google, in bankruptcy...the Google Cartel has engaged in that much criminal activity..."**

**"Google is the largest financier of the Obama political campaign and exceeded FEC campaign spending limits by tens of billions of dollars. We can prove this in a jury trial, a Grand Jury hearing and a live Congressional hearing.**

**Google is the largest staffing source of the Obama Administration. We can prove this in a jury trial, a Grand Jury hearing and a live Congressional hearing.**

**The largest number of laws and policy decisions, benefiting a single company and its investors, went to: Google. We can prove this in a jury trial, a Grand Jury hearing and a live Congressional hearing.**

**Google, and its investor's are the single largest beneficiary of the Obama Administration. We can prove this in a jury trial, a Grand Jury hearing and a live Congressional hearing.**

**The Obama Administration only won the White House because Google and Facebook engaged in the largest digital media and search engine manipulation in human history. We can prove this in a jury trial, a Grand Jury hearing and a live Congressional hearing.**

**Google, and its investors, during the Obama Administration, had most of their competitors denied funding, grants, contracts and tax waivers while Google's investors GOT funding. We can prove this in a jury trial, a Grand Jury hearing and a live Congressional hearing and prove that Google coordinated anti-trust violations with senior Obama Administration White House staff..."**

Google operates its staffing like a Scientology cult. They control their employees lives, information, transportation, free time, entertainment and social life. A Google life is a glass-bubble of echo-chamber extremist, hyper-sex-kink, reinforcement.

[Project Veritas](#) has been lifting back the veil covering big tech companies and their nefarious activities following the 2016 election. They tried to play left-leaning-but-mostly-fair before the 2016 election, believing in their hearts that Hillary Clinton would be President without their concerted meddling. That didn't work out for them, so they are trying to prevent "another Trump situation" in 2020 by unabashedly [purging, silencing, and censoring conservatives](#) on platforms like Facebook, Google, Twitter, Pinterest, Instagram, and YouTube.

(Article by Michio Hasai republished from [NOQRreport.com](#))

The answers delivered today before Congress in response to questions by [Representative Dan Crenshaw](#) weren't the standard denials. They were politically manipulative answers designed to make it known they're doing what we've said they were doing all along, but they feel justified in doing it because "hate speech" must be stopped at all costs. Of course, what constitutes hate speech to the social justice warriors in big tech invariably circles around conservative thought. There is no form of hate speech short of physical threats that can be attributed to progressives, at least not in the minds of the people who control big tech. If conservatives are aggressive, they're delivering hate speech. If progressives are aggressive,

they're just being truthful. That's what big tech thinks.

This is the worst-case scenario for conservatives. Before, we could call them liars and cheats. Now, we have to fight them on an ideological level, and while we have the truth on our side, they have the technology. They have the eyeballs. They control what people see and don't see. And as such, they can no longer be trusted to deliver anything even remotely close to fair and balanced. They're unhinged from reality, but instead of coming back to reality once exposed, they're building a new reality around their ideologies.

## Russia may arrest Google employees for running Google as a manipulative service containing hidden political insertions affecting the human subconscious

- Russian government will now arrest those who try to 'control minds' via mass web manipulation
- Google was created to push liberal leftist political messages on the subconscious
- Research exposes Google as insidious mind-control political skill
- No matter your political persuasion, it is unfair and manipulative for Google to control minds ANY political purposes

A Russian journalist has been accused of 'controlling minds' and 'affecting the human subconscious' after referencing George Orwell's 1984 in an article.

Mikhail Romanov, a reporter for the Yakutsk Vecherniy weekly, was writing a story on the alleged torture of an academic.

Police in [Russia's](#) republic of Sakha charged Romanov after they suspected him of trying to tap into the readers' sub-consciousness, Russian newspaper [Kommersant](#) reported.

A Russian journalist has been accused of 'controlling minds' and 'affecting the human subconscious' after referencing George Orwell's 1984 (pictured) in an article

Romanov's editor told the publication: 'This is a story about how anyone can be squashed by the government machine.

'It's also about how Big Brother is watching, reading all comments on online forums.'

This is understood to be the first time a journalist will be tried under Russia's new legislation punishing those who are perceived to have published information 'containing hidden insertions affecting the human subconscious.'

The case has been forwarded to a Yakutsk city court.

## Google likely 'thoroughly infiltrated' by Chinese govt., expert warns

[alex stamos](#), [big tech](#), [china](#), [cybersecurity](#), [facebook](#), [google](#), [internet](#), [peter thiel](#), [richard clarke](#), [russia](#)

([LifeSiteNews](#)) – Tech billionaire Peter Thiel recently called on the federal government to investigate Google for potential infiltration by the Chinese government, and now security experts are saying his concerns are well-founded.

Thiel, one of President Donald Trump's most high-profile [gay supporters](#) and an [avowed critic](#) of Silicon Valley, made the remarks at last weekend's National Conservatism Conference, [Axios reports](#). He called on the FBI and CIA to ask Google, "how many foreign intelligence agencies have infiltrated your Manhattan Project for AI"; "does Google's senior management consider itself to have been thoroughly infiltrated by Chinese intelligence"; and whether this alleged infiltration is why the company works with China's military but not America's.

"I'm not sure quite how to put this, I would like them to be asked [these questions] in a not excessively gentle manner," Thiel added.

Alex Stamos, a researcher with the Stanford Internet Observatory and [former chief security officer at Facebook](#), said Tuesday it was "completely reasonable" to assume that both the Chinese and Russian governments have, in some form or another, already infiltrated not only Google but every top tech company.

Note that "subverted" is very different than planting professional spies in "The Americans" style. Each of the big companies employs thousands of employees with family members under the control of these countries, and a gov request might be simple and seem borderline reasonable.

— Alex Stamos (@alexstamos) [July 16, 2019](#)

I expect that there will be a major combined HUMINT/InfoSec attack against a major tech company revealed in the next couple of years, which will trigger the same awakening that Project Aurora did in 2009.

— Alex Stamos (@alexstamos) [July 16, 2019](#)

BTW, I don't blame the foreign-born employees at all. They are just trying to make a good living doing interesting work. If MSS had \*my\* Mom I would do whatever they asked.

— Alex Stamos (@alexstamos) [July 16, 2019](#)

Stamos predicted that the "next couple of years" would see the revelation of a "major combined HUMINT/InfoSec [human intelligence/information security] attack against a major tech company."

He's not the only one who advises that Thiel's warnings be taken seriously. Richard Clarke, a former counterterrorism and cybersecurity advisor to both Democrat and Republican presidents, [told CNBC](#) Wednesday there was cause for concern.

"Here's what I think is true: Google refused to work for the Pentagon on artificial intelligence," Clarke said. "If you turn around and you work on artificial intelligence in China, and you don't really know what they're going to do with that, I think there's an issue."

The internet giant has denied working with the Chinese military, but opened an artificial intelligence center in Shanghai in 2017 despite the Communist regime's strict speech and internet controls. On Tuesday, Google executive Karan Bhatia [testified](#) to the Senate Judiciary Committee that the company has terminated a [controversial](#) censored search engine it had been working on for China.

Clarke added that there was no meaningful distinction between Google working with Chinese companies and the Chinese government, given the level of state control in the country.

The specter of foreign influence on the tech industry further intensifies its ongoing controversies regarding [political bias and censorship](#) and [violations of user privacy](#). Responding to Thiel's original comments, President Trump [said Tuesday](#) that his administration will "take a look" at the matter.

Google being biased is glaringly obvious even to a retard. Google forcing their employees to support them politically is a human rights violation.

Th old railroad barons a hundred years ago were bad people, but no where near as abusive as google is to the employees. The old railroad tycoons had their supporters too who thought strikers and protesters against their tyranny were awful people.

Silicon Valley just indoctrinated their followers and employees by brainwashing them first like any cult does. "Do no evil" was always a smarmy block of shit in pixels, no different than the purple dinosaur singing "I love you, you love me". The purple dinosaur never loved you one little bit. It was a lie, and parents had no business being such gullible suckers and allowing their children to be lied to by an actor in a fuzzy suit.

- [link](#)

forcing their employees to support them politically is a human rights violation.

> Civil and political rights are a class of rights that **protect individuals' freedom** from infringement by governments, social organizations, and private individuals. They ensure one's **entitlement** to participate in the **civil and political** life of the society and state **without discrimination or repression**.

From the first time they censored, shadow-banned people who opposed their way of viewing world, far-left, SJW, leftards has put cornerstone to **civil rights movement 2.0**, including people who are at the rock bottom and uppermost stairs of oppression. Clearly, this is infringement of rights by gov and private entities, which has been ignored from by the time it was apparent that such violation is well spread and not a unique case.

Those at silicon valley had no idea that their attempt to have conservative and alike voice removed/deplatformed is **someway resemble how "white" and "colored" segregation works**; which is no brainer considering that they did not pay any attention to "obscure" details and only remember famous persons who was oppressed at that time.

So, don't spout only "Hate speech is Freee speech". Tell them that when some peers mock center-right personalities by reenacting what happened prior to Civil Rights Act of 1968, throwing liquids to nigger who ignored the sign, isn't a good joke since **political affiliation is covered in protected class** in District of Columbia, IA, WV state, which put them as the white fellas and anyone who didn't entirely agree with them as the blacks in this reenactment.

If anyone reading this is somehow connected to parliament from local council to state, **consider amending the laws to add political affiliation as one of class covered by " (unfounded)hate crimes"**. We won't need to see bike lock attacker and his copycat got sweetheart deals. Share this to Trump, since who doesn't love for shit and giggles watching leftards kvetching having cognitive dissonance episode explaining why adding another class would hurt other classes that already existed in last statue

Regarding Google – Alphabet – Youtube and their Cartel, the issues, that the public and the news media have complained about include: producing child suicides and classroom shootings, racism, misogyny, child mental health threats, domestic spying, data harvesting, sex trafficking, election manipulation, tax evasion, Fusion GPS/Media Matters/ Black Cube hit jobs on competitors, censorship, contrived market monopolization, intellectual property theft, political bribery and many other social crimes!

-- An unusually large number of their staff have been arrested for, or charged with, sex crimes, including under-age trafficking.

---- They seem to be an organized crime entity protected by the politicians that they pay bribes to.

---- This entity is one of the largest operators of bribes to public officials. Some of those bribes include billions of dollars of, non-FEC reported, search engine rigging for the political campaigns of the very politicians who are supposed to regulate them.

--- Twitter, Splunk, Google, Facebook, Netflix, YouTube and the Silicon Valley internet Cartel serve you custom manipulated content by automatically creating a covert digital dossier on you reflecting the content consumption preferences they have spied on about you. They continually evolve their dossier on you in order to steer you towards their ideology and their

Democrat political party. At these companies, "data mining", "machine learning" and "AI" means computerized propaganda processing for certain political entities. They began hiring off-shore people ( because they would work so cheap ) but most of those people turned out to be Muslim. This created conflicts with the entire southern part of the United States (which is anti-Muslim) because those workers steered content to pro-Muslim positions.

--- Their spy dossier on you uses abstract content-specific features of the consumed content, such as categories, topic models, and entities, which they automatically extract using natural language processing by comparing every word you use to a giant computer library of what those words might mean about your psychology. So it's like you are getting "mind-raped" without any penis use. Their assessment of what your words might mean is based on what rich, white male, \$200K/year, DNC-promoting programmers think they might mean.

Their computers scale and expand their tools with algorithmic software created by those politically and socially biased frat white boys that wrote the code. It is all biased as hell. They never hire blacks or women in system creation roles so everything these companies do only supports rich white soyboy snowflake type gamer thinking. --- Because their Silicon Valley VC's told them to spy on billions of people, even for these web giants, it is impractical to store the entire dynamic history of a user's interaction features. They, thus, out of greed, use algorithms that selectively decay information in order to generalize users and populations. To them, you are just a generalized data point, like cattle on a ranch, to be harvested and fed upon by Silicon Valley.

You can try to sue Google for anti-trust, racketeering and other illicit deeds and Google will hire tens of millions of dollars of lawyers to blockade you from getting to a Jury Trial. The best thing you can do is assist the Federal Government, many State Attorney General's and citizen's groups with their lawsuits against The Google Cartel.

Bloomberg, The Wall Street Journal, Stratfor, Wikileaks, FTC and SEC investigators and Kroll Intelligence says that Google runs the largest domestic spying operation in the world; larger than that of even Russia, China, Israel or Iran. The Google Cartel has set up tho- USA - nds of companies in a spiderweb of surveillance, around the globe, and in space, that knows everything that everyone is thinking, doing or might do; and how to place media and events in front of them to subliminally steer people to do, or think, things that they might not otherwise have thought, done or voted for. Many of these operations were financed by IN-Q-TEL, which is the CIA and the NVCA combined. For example, A Google derivative called 'JigSaw' is run by Pro-Israel, Anti-Arab operatives and steers data to certain interested parties. Larry Page is on multiple Arab secret police "kill lists", which means they should terminate him if the opportunity arises. Barack Obama had Eric Schmidt in the basement of his campaign HQ on election night, running computers, and has secretly claimed that "Google put him in office". Most of the key White House staff came from Google. Google claims to 'not be political', but it is the most political business Cartel on Earth. Google finances politicians that will do what Google tells them to do. It finances them with billions of dollars of internet manipulation, insider stock favors and by getting every staff member to give max limits to their campaign PACS.

Google and it's facades: Jigsaw; Alphabet; YouTube; Google LLC (core profit maker); XXVI Holdings Inc.; Google Ireland Holdings (Google LLC subsidiary, that realizes most international profits); Alphabet Capital US LLC; Alphabet Inc.- - USA - -Parent holding company since 2015. If you own stocks of Google/Alphabet, you own a piece of this company; Calico Life Sciences LLC - - USA - - Research and development company working on keeping Eric Schmidt alive; Calico LLC (Calico Group LLC)- - USA - - Holding company of Calico Life Sciences LLC. Company is doing business as Calico Group LLC; Chronicle LLC - - USA - - Cybersecurity company that creates tools for businesses to sy on other companies; Google LLC - USA - - Core Google parent company originally named Google Inc. before Google transformed itself into Alphabet. This is where most of the profits come from; Loon Holdings Inc. - - USA - Holdings company - Loon LLC - - USA - - Company is working on providing Internet spying to rural and remote areas using high-altitude balloons; OB Technologies Inc. - - USA - Holdings company - OB Technology Holdings Inc.- - USA - -Holding company; Waymo Holding Inc.- USA - - Holding company for Waymo; Waymo LLC - USA - - - Company developed autonomous car technology and currently operates "testing" rides in several US states and already launched Waymo One service in Phoenix. Recently it announced that it will not make its own cars but rather focus on autonomous driving technology to spy on consumers; Wing Aviation LLC - US - Company developed drone delivering technology. It became independent from Project X in 2018. It is currently testing in Australia; X Development Holdings Inc.- USA - Holding company - X Development LLC - USA - -Called "Moonshot Factory." The company says it is working on solving the world's hardest problems using technology but seems to just be an outlet for Larry Page to steal and copy technologies with Wing, Loom, and Waymo, which are now separate businesses, started as X projects; XXVI Holdings, Inc- USA - Layer between Alphabet Inc. and individual companies of Alphabet. The system is designd to lower regulatory or disclosure requirements, tax evasion, money laundering and for hiding political payola. The name of the company is referring to the Roman numeral of 26, the number of letters in the alphabet.

Google LLC has over 200 direct and indirect subsidiaries in order to limit where lawsuits and federal actions can go. The Mafia uses this same approach. Almost everything Google owns is involved in acquiring, and analyzing your personal and business data for the Google surveillance computers. It is almost impossible to find a Google group that does not 'feed the data beast'. Larry Page and Eric Schmidt believe that no citizen is intelligent enough to live in the world and that they must covertly 'guide' populations to their own ideology and "Master Plan". The rest of the Google Cartel for global domination includes:

DeepMind Technologies Limited GBR Artificial intelligence/Machine Learning

DoubleClick Holding Corp.- USA - Online advertising company that Google acquired a decade ago. It recently announced that it is rebranding its advertising products, and it will no longer use DoubleClick brand.

Dropcam, Inc.- USA - Home monitoring. Company is known for its Wi-Fi video streaming cameras. Was acquired by Nest soon after Nest was acquired by Google. This acquisition is often given as an example of how an acquisition can go wrong.

Google Asia Pacific Pte. Ltd SGP Singapore company that channels revenues (royalties) from Asia/Pacific region (through the Netherlands) to Ireland Holdings Unlimited. It has a similar purpose to Google Ireland Limited in Europe.

Google Bermuda Limited BMU Hard to say, where in the company hierarchy this sits. Might be the parent company of Google Bermuda Unlimited

Google Dialer Inc.- USA - Not sure exactly but connected to Google Fiber and Google Voice.

Google Fiber Inc.- USA - Internet Access Provider

Google Fiber North America Inc.- USA - Internet Access Provider

Google International LLC - USA - Holdings company for Google's subsidiaries in individual countries outside the US.

Google Ireland Holdings Unlimited Comp. - IRL - This is a very "famous" Google subsidiary that is incorporated in Ireland but managed and controlled in Bermuda. Google at least up to recently used this subsidiary as part of the "Double Irish" with "Dutch Sandwich" tax optimization scheme that is very common among large international companies. The company serves partially as a holding company for some international businesses but mainly as a holder of Google intellectual property that it further licensed to other Google companies for a fee.

Google Ireland Limited - IRL - Google Services Provider for Europe and Switzerland. It books a lot of revenue, but makes very small profits, since it pays a lot to Google Netherlands BV for Google's intellectual property. Google Netherlands BV than channels this revenue to Google Ireland Unlimited that is incorporated in Ireland but domiciled in Bermuda.

Google Netherlands Holdings B.V.NLD This company is used as a middle layer between Google Ireland Limited and Google Ireland Holdings. This allows Alphabet to pay very low taxes from its European operations thanks to a tax optimization scheme called "Double Irish" with "Dutch Sandwich." This loophole was very popular among international technology companies and was already fixed for new arrangements.

Google North America Inc.- USA - Provider of Google FI service (wireless network)

Google Payment Corp.- USA - Google's companies that handle money transfers and peer-to-peer transactions. In US payments are processed by Google Payment Corp. (GPC), which has the appropriate license for transmitting money and for peer-to-peer transactions in US.

Google Payment Ireland Limited - IRL - Providing Google Payment Services for whole European Union (except UK) as a replacement for

Google Payment UK. UK subsidiary will keep providing services for UK.

Google Voice Inc.- USA - Provider of Google Voice service.

GU Holdings Inc.- USA - Through this company, Google is building subsea cable infrastructure. For example, in 2019, they finished the connection between Los Angeles and Chile.

Nest Labs (Europe) Limited - IRL - "virtual subsidiary" of Nest Labs. Owned by Google Ireland Holdings Unlimited, so not directly under

Nest Labs

Nest Labs Inc.- USA - Company flagship product and company's first offering before it was acquired by Google was Nest Learning Thermostat. Nest operated independently of Google from 2015 to 2018. However, in 2018, Nest was merged into Google's home-devices. (Still not sure if it was only organizational merger or also legal merger)

Nest Labs Singapore Pte. Ltd.SGPvirtual "subsidiary" of Nest Labs. Owned by Google Ireland Holdings Unlimited.

Verily Life Sciences LLC - USA - -Research company developing tools that focus on health data and how they can help with timely decision-making and effective interventions. (formerly Google Live Sciences)

Waze Mobile Ltd.ISRGPS navigation software. Waze describes its app as a community-driven GPS navigation app, which is free to download and use. Waze is owned directly by Google LLC.

YouTube, LLC - USA - -Youtube is a very successful video sharing and hosting service that Google acquired in 2006. This acquisition became hugely successful for Google. But not everybody was persuaded that the acquisition made sense at the time.

Alphabet Holding LLC is a holding company that is a direct subsidiary of XXVI Holdings, Inc. It is focused mainly on managing Google/Alphabet investments. Both Alphabet investment managing firms CapitalG and GV are housed under this holding. CapitalG and GV invest in other companies, but since those are usually small stakes below 50%, these companies are not part of Alphabet Group. If you want to know more about what companies do they invest in, both CapitalG and GV have a helpful list of their investments on their webpages.

Sidewalk Labs Management Company LLC - USA - -Urban innovation

Before 2015, there was no Alphabet, and Google Inc. was a publicly-traded company that you could directly own by buying its shares. All subsidiaries were subsidiaries to Google Inc. In 2015 Google transformed into Alphabet, where Alphabet Inc became the top parent company that was publicly traded. Google Inc. shareholders became overnight Alphabet Inc shareholders.

In reality, many "Other Bets" businesses still stayed as subsidiaries of Google LLC even after the 2015 transformation, and it was only recently when the whole transformation was finalized. Finally, "Other Bets" companies were moved from outside Google LLC.

The reasons for this complex transformation were described by Google management as an "increase in transparency and oversight," That would be achieved by putting larger projects at the same level as Google LLC with their separate management, reporting directly to Alphabet Inc management. The proclaimed increase in transparency was only internal for Google management. Transparency for investors did not increase. Another reason behind the transformation was obviously limiting risk. By separating Google into different companies, each one of them is independent of each other. If someone gets arrested in one company, the others would be protected from it.

Double Irish & Dutch Sandwich is a very popular and publicized arrangement through which mostly US companies were optimizing their taxes from European businesses. It involved two Irish and one Dutch company. Wikipedia has a nice article on both Double Irish and Dutch Sandwich, explaining how it works. In Alphabet/Google case. Companies involved in Double Irish with Dutch Sandwich arrangement are assumed to be:

Google Ireland Holding Unlimited (Irish company with Bermuda domicile)

Google Netherlands Holdings B.V. (Dutch "sandwich" company that serves as an intermediary between two Ireland companies)

Google Ireland Limited (Ireland company that is directly booking revenue from European business, and sends most of the revenue to the Netherlands as royalties for leasing Google's intellectual property.

**Corrupt political families conspire to give government funds, contracts, tax waivers, buildings, stock market profits and other insider perks to themselves and their friends. They also conspire to blockade, harm, sabotage and black-list those who compete with them and their friends. These corrupt politicians are never prosecuted for their crimes, and can laugh in the face of those who point out their crimes, because they control the prosecution system. Their Quid Pro Quo criminal corruption is the single largest cause of the taxpayer hatred of Congress.**

**Shoshana Zuboff's, The Age of Surveillance Capitalism** - Why Twitter, Google, Facebook, Instagram, YouTube, Alphabet are the SAME Thing, The SAME SICKO tech elites and the same kinds of social privacy RAPE against citizens!

<https://www.contagious.com/news-and-views/shoshana-zuboff-on-the-age-of-surveillance-capitalism>

News outlets in our country exhibit the widespread "criminality" and "defamation tactics" of a mostly corrupt news media landscape. The Gawker/Gizmodo/Jalopnik tabloid empire is nothing more than an organized info-crime operation backed up by offshore money-laundering through Russia and the Ukraine.

--- Despite widespread recognition of their deceptive conduct, fools still read these trash publications.

--- There are massive conflicts of interest related to many news media outlets' conglomerate-ownership as well and industry figures' financial and familial links to companies, interests, and people they ostensibly report on.

--- 'Fake news' isn't the proper term. It's the 'propaganda arm of the Silicon Valley Socialist oligarchs' In most cases.

--- There are only about 7 men who control all of the news and media in America. That's right! If you trace the media ownership in America, it all comes down to control by a few crazy old white boys -

--- It's no different than the Chinese Communist Party [and] the propaganda they put out. It's no different than what the Soviet Union did with the old Pravda media, and, quite frankly, it's no different than how Putin controls the media today, where 95 percent of his media in Russia is propaganda for the Putin regime. It's the same thing here with The Washington Post, NY Times, CNN, Hearst publications and all of the media owned by Hollywood and Silicon Valley.

--- Partisan news media should be treated as such. News media outlets such as the CNN, the New York Times, and the Washington Post regularly describe themselves as "politically objective and non-partisan." In reality they are a propaganda machine for sick Silicon Valley oligarchs.

--- The information institutions are corrupt. For example, Elon Musk is one of the most corrupt men in the world yet the socialist propaganda news media won't cover any of his crimes and corruptions in their publications because he pays political bribes to keep his dark side hidden in their media.

--- The public should not hurt legitimate news media outlets by engaging with and speaking to corrupt propaganda operations. One should only speak with genuine news media and not reward unethical companies with their time.

--- The following diagrams show what various independent researchers have discovered: The Manipulation Techniques Of Silicon Valley Media Outlets

--- A common tool Google, Facebook and Twitter use to exert control over their victims.

--- We all use manipulation at some point in our lives, whether it be telling a little white lie to get out of a situation, or using flattery to get what we want. For some people, however, using manipulation is a way of life, and their first weapon in an arsenal of techniques to overpower their victims.

--- Who is at risk from the Silicon Valley media predators? Predators use a range of manipulation techniques in order to control their victims, but they often target certain types of personalities. This is because they want to be able to easily manipulate a person, and particular vulnerabilities in a person lend themselves to manipulation. You are more likely to become a victim of a media predator if you have low self-esteem, are naïve, easy to please, lack an assertive nature and have no confidence in yourself.

--- Here are 20 of the most common news pundit manipulation techniques:

---- 1. Lying - Predators are constantly lying about practically everything in their life. They do this to wrong-foot their victim and confuse them. Lying is one of the manipulation techniques psychopaths typically use because they have no qualms about it.

---- 2. Not telling the whole story - This is different to lying as a predator will often keep a key part of the story to themselves in order to put their victim at a disadvantage.

---- 3. Frequent mood swings - Never knowing what mood your partner is going to be in when you get home, whether they'll be happy or angry is a very useful tool to the predator. It keeps their victim off balance and makes them more malleable.

---- 4. Love-bombing and devaluation - Narcissists typically use love bombing as a manipulation tactic, they will go on a charm offensive and get you hooked into thinking this is the best relationship ever, then they'll drop you like a ton of bricks without explanation.

---- 5. Finger Pointing Punishment - This can include anything from constant nagging, shouting, the silent treatment, physical violence and mental abuse. ---- 6. Facts Denial - Often the simplest way a predator will manipulate a person is by denying the thing they are accused of ever happening.

---- 7. Spinning the truth - How many times have politicians twisted the facts to suit themselves? This spinning of the truth is often used to disguise bad behaviour by predators such as sociopaths.

---- 8. Minimising The Urgency - Where a predator will try and play down their actions as not important or damaging and shift the blame onto the victim for overreacting.

---- 9. Plays the victim - The manipulator will themselves take on the role of victim in order to gain sympathy and compassion from those around them. We as humans are naturally drawn to helping people when they are suffering.

---- 10. Targets the victim - When a manipulator accuses the victim of wrongdoing, they are making the victim defend themselves whilst the predator is able to mask their own manipulation techniques. The focus is on the victim, not the accuser.

---- 11. Positive political reinforcement - This includes buying expensive presents, praising them, giving money, constantly apologizing for their behaviour, excessive charm and paying lots of attention.

---- 12. Moves the goal posts - You might think you know where you stand with a person, but if they are constantly moving the goal posts in order to confuse you, then it's likely you're dealing with a predator.

---- 13. Diversion - Diverting the conversation away from the perpetrator's act and moving the conversation onto a different topic is a typical way predators manipulate their victims.

---- 14. Sarcasm - A predator will often be sarcastic about their victim in front of others. They do this to lower the self-esteem of the victim and to show others how powerful they are.

---- 15. Guilt tripping - Someone who manipulates will often guilt trip their victim by saying that they don't care about them, or that they are selfish or their life is easy. It all helps to keep that person confused and anxious.

---- 16. Flattery - Using charm, praise or flattering the victim is one way of gaining that person's trust. The victim is naturally happy to receive such compliments but in doing so lowers their guard.

---- 17. Playing the innocent card - A true manipulator will feign utmost shock and confusion at being accused of any wrongdoing. Their surprise is so convincing that the victim may question their own judgement.

---- 18. Over the top aggression - Manipulators often use rage and aggression to shock their victim into submission. The anger is also a tool to shut down any further conversation on the topic as the victim is scared but focused now on controlling the anger, not the original topic.

---- 19. Isolation - It is far easier to keep a person under control if they are isolated from family members and friends who could shed some light and truth on the situation.

---- 20. Feigns political love and empathy - News Predators such as psychopaths and sociopaths do not know how to love someone other than themselves, and cannot feel empathy, but they can pretend to in order to inveigle others into their lives

---- If you watch out for the above manipulation techniques, you can keep yourself out of a media predator's clutches.

---- There are hundreds of millions of people in America. The same 120 of them are all involved in operating the same crimes and corruption including: the Sony Pictures corruption; the Afghanistan rare earth mine scandals operated through The Energy Department political slush fund that involves the lithium battery cover-ups (headed by Elon Musk); the Big Tech Brotopia rape, sex trafficking, bribery, exclusionism, racism and misogyny issues they were taught at Stanford University; The Facebook – Meta – Google – Alphabet – Netflix, et al, coordinated news manipulation and domestic spying that they engage in; the hiring of Fusion GPS – Black Cube – Gizmodo/Gawker assassins; the destruction of the housing market by their mass real estate manipulations; patent theft and industrial espionage; and the bribery of almost every politician all the way up to the Oval Office.

---- So, while the categories covered in this investigation may seem diverse. They are connected through an enterprise of criminality and illicit, coordinated operations. We list, by name, the 120 most complicit individuals organizing these crimes, in the evidence documents already submitted to the FBI, FINCEN, DOJ, FTC, SEC, FEC, Congress, InterPol and other authorities. Digital financial tracking of those persons and all of their family members should be assumed to have been under way for some time. Wire-taps and device taps of those persons and all of their family members should be assumed to have been under way for some time.

---- Twitter, Splunk, Google, Facebook, Netflix, YouTube and the Silicon Valley internet Cartel serve you custom manipulated content by automatically creating a covert digital dossier on you reflecting the content consumption preferences they have spied on about you. They continually evolve their dossier on you in order to steer you towards their ideology and their Democrat political party. At these companies, "data mining", "machine learning" and "AI" means computerized propaganda processing for certain political entities. They began hiring off-shore people ( because they would work so cheap ) but most of those people turned out to be Muslim. This created conflicts with the entire southern part of the United States (which is anti-Muslim) because those workers steered content to pro-Muslim positions.

---- Their spy dossier on you uses abstract content-specific features of the consumed content, such as categories, topic models, and entities, which they automatically extract using natural language processing by comparing every word you use to a giant computer library of what those words might mean about your psychology. So it's like you are getting "mind-raped" without any penis use.

Their assessment of what your words might mean is based on what rich, white male, \$200K/year, DNC-promoting programmers think they might mean. Their computers scale and expand their tools with algorithmic software created by those politically and socially biased frat white boys that wrote the code. It is all biased as hell. They never hire blacks or women in system creation roles so everything these companies do only supports rich white soyboy snowflake type gamer thinking.

---- Because their Silicon Valley VC's told them to spy on billions of people, even for these web giants, it is impractical to store the entire dynamic history of a user's interaction features. They, thus, out of greed, use algorithms that selectively decay information in order to generalize users and populations. To them, you are just a generalized data point, like cattle on a ranch, to be harvested and fed upon by Silicon Valley.

## **US State Department Funding Secret 'Disinformation' Crusade To Blacklist Media**

BY TYLER DURDEN

The US Department of State has been funding a "disinformation" tracking group through its Global Engagement Center (GEC), which reportedly works at demonetizing sites it accuses of disseminating "disinformation," - which are overwhelmingly conservative news outlets, the Washington Examiner reports.

The Global Disinformation Index, a British organization with two affiliated U.S. nonprofit groups, is feeding blacklists to ad companies with the intent of defunding and shutting down websites peddling alleged "disinformation," the Washington Examiner reported. This same "disinformation" group has received \$330,000 from two State Department-backed entities linked to the highest levels of government, raising concerns from First Amendment lawyers and members of Congress.

GDI through its website maintains a "dynamic exclusion list" of the worst offenders of disinformation online, which it then distributes to ad tech companies - such as Microsoft's Xandr - in order to try and "defund and downrank these worst offenders," and deprive said sites of ad revenue.

According to The American Conservative executive director Emily Doak, "They might consider TAC a 'high-risk' publication because we have consistently taken on the bipartisan establishment's sacred cows, whether it's the war in Iraq, nation-building in Afghanistan, or the harm done by free trade and open borders — and we've been proven right time and time again," adding "They know they can't say we're wrong, only that we're biased and 'high-risk,' so we will wear that designation as a badge of honor."

In 2018, the GEC began funding Disinfo Cloud, a State Department spokesperson told the Washington Examiner. The GEC awarded roughly \$300,000 to an investment group called Park Advisers, which fights "disinformation, terrorism, violent extremism, hate speech" to manage Disinfo Cloud, the spokesperson said.

Park Advisers implemented Disinfo Cloud "to provide the U.S. government and its partners with a database of the tools and technologies available to help push back against foreign propaganda and disinformation," according to its website, which links to Disinfo Cloud's former landing page that has since been pulled off the internet. -Washington Examiner

One State Department-funded group which supports GDI is the nonprofit National Endowment for Democracy, which receives nearly 100% of its funding from congressional appropriations (\$300 million in 2021), which critics have argued is essentially giving money to a government grantmaking body despite its status as a private entity.

In 2020, \$230,000 went from the NED to the AN foundation, a GDI group that also goes by the Disinformation Index Foundation. The grant was to "deepen understanding of the challenges to information integrity in the digital space" in Asia, Africa and other foreign countries, and to "assess disinformation risks of local online media ecosystems."

The Global Engagement Center notably appeared in the Twitter Files reported by @mtaibbi <https://t.co/M3LM3PkkX>

— Gabe Kaminsky (@gekaminsky) February 10, 2023

Meanwhile in September 2021, the GEC hosted the US-Paris Tech Challenge - an event which sought to "advance the development of promising and innovative technologies against disinformation and propaganda" in Europe and the UK. The event was a "collaboration with U.S. Embassy Paris, the Atlantic Council's Digital Forensic Research Lab (DFRLab), the Cybersecurity and Infrastructure Security Agency (CISA), the North Atlantic Treaty Organization (NATO)" and several other organizations.

Civil rights experts are appalled.

"Any outfit like that engaged in censorship shouldn't have any contact with the government because they're tainted by association with a group that is doing something fundamentally against American values," said Jeffrey Clark, former acting head of the DOJ's Civil Rights Division in a statement to the Examiner. "The government or any private entity shouldn't be involved with this entity that's engaged in conduct that is either legally questionable or at least morally questionable."

In addition to Park Advisers and Disinfo Cloud, partners for the Paris challenge included the Atlantic Council, a major think tank, the Cybersecurity and Infrastructure Security Agency, the North Atlantic Treaty Organization, and others, according to the State Department.

Meanwhile, Rep. Michael McCaul (R-TX) said: "Last year, under tremendous bipartisan pressure, I refused to reauthorize the Global Engagement Center because such a step seemed premature," adding "The most recent allegations, if verified, confirm the need for a strict accounting of all U.S. taxpayer funds going to the GEC."

Rep. Jim Banks (R-IN) says that the Biden administration is "knee deep" in left-leaning efforts to "crack down" on speech - telling the Examiner: "House Republicans will be hauling these bad actors before Congress, and I absolutely support legislation to ban federal funding of anti-free speech groups."

Match.com, OK Cupid and corporate dating sites exist to harvest your data for political campaigns

--- They spy on you to manipulate your politics, ideology and intentions and to report you to bill collectors, tax collectors, investigators and political parties. -

--- When you hear "BIG DATA", "AI", "DATING MINING" ...RUN: They are all processes that rape the public and manipulate elections

---- 89% of Silicon Valley's money comes from data mining you.

--- Google, Netflix, YouTube, Facebook, etc. exist to mass manipulate populations and run stock market scams for their sociopath owners. From INSIDE Google, our team saw Google manipulate the entire internet to hype up Larry Page's "boyfriend": Elon Musk and Tesla, which Google execs owned a portion of, while sabotaging Tesla's competitors.

--- Google illicitly and illegally timed these manipulations with stock market pump-and-dump efforts to exploit insider trading. That is a felony violation of RICO, Antitrust and other laws. Every single thing that Google does is contrived to harm a competitor, a politician, an employee whistle-blower or some other business adversary.

--- Silicon Valley has, AND LEAKS, everybody's abortion records

---- There are no "bugs", "operator errors", "server anomalies" or other media "accidents" at Google. Everything Google does is contrived, at a psychological warfare kind of level, to change a social perception. Google must show its software to FBI, SEC, FTC and our search engine optimisation experts to prove that they did not engage in these crimes. The fact is: We can prove they did the crimes and FBI experts can help us prove it! Google is known as the "Nazi's of the Internet". -

--- In a case unfolding in Britain over whether Google wrongly demoted price comparison rival Foundem from its search results in favour of paid-for adverts, Google must now decide which it values more: the algorithms that rank its search results, or its stance that manually fiddling with those results to promote its own paid-for products over rivals' sites doesn't break competition laws. -

--- The integrity of Google's ranking processes relies upon all webmasters or website owners having the same degree of access to information about Google's ranking... This will no longer be the case if information of this kind is made available to some individuals offering commercial services to assist companies to improve their Search ranking. -

--- Google is a criminal operation. It's executives have been publicly exposed as participants in horrific sex scandals, money laundering, political bribery and racism. It is time for the bought and paid shill politicians to stop protecting them! - Google spies on competitors and steals their technology

- Google runs tens of millions of dollars of defamation attacks against competitors - Google hides all media and news coverage for competitors of Larry Page's boyfriend: Elon Musk - Google lies to the public about what they really do with the public's data

--- Google promotes illegal immigration in order to get cheap labor and control votes - Google runs VC funding back-lists against start-ups that are competitive - Google bribes thousands of politicians - Google is a criminal RICO-violating monopoly - Google rigs the stock market with Flash-boy, Pump/Dump and Microblast SEC violating computer tricks - Google pays bribes to politicians in Google and YouTube stock - Google manipulates who gets to see what web-sites, globally, for competitor black-lists - Google has a "no poaching" Silicon Valley jobs blacklist -

--- Google bosses sexually abuse women and young boys - Google bosses run sex trafficking operations in the Epstein and NXIVM cults - Google bosses control the NVCA financing cartel over start-ups - Google has placed the majority of the corporate staff in at least one White House - Google controls national elections for anti-competitive purposes - The company "Polyhop", in the HOUSE OF CARDS tv show, does all the crimes that Google actually does in reality - Google's law firms, like Wilson Sonsini, are corrupt conduits for payola and political conduit-relays - Google bribes some politicians with revolving door jobs - Google is primarily responsible for destroying the Bay Area Housing opportunities

- Google runs DDoS attacks on competitors by massively crawling their sites

- Google boss Andy Rubin runs a sex slave farm according to his own family - Google boss Eric Schmidt was a philandering sex-penthouse owner according to vast news articles - Google executives hire so many hookers that one of them, Mr. Hayes, was killed by his hooker

--- Google executives sexually abuse so many women that the women staff of Google walked out one day - In the 2009 White House, you could not swing a cat without hitting a Google insider - Google has paid covert bribes, PAC funds, real estate and search rigging payola to every CA Senator - Google has paid bribes, through its lobby fronts, to halt FBI, SEC, FEC and FTC investigations of Google crimes - Google was funded by the CIA, via In-Q-Tel, a so called "501 c3 charity" which was caught with tons of cocaine

- Google gets millions of dollars of taxpayer cash for spying on Americans inside the USA - Google's map service was a spy system paid for by taxpayers money that Google now profits off of - Nancy Pelosi and Dianne Feinstein have promised to "protect" Google because their families profit off Google stocks - Payment receipts prove that Google and Gawker/Gizmodo exchanged cash and staff for Character Assassination attacks - Google VC's and bosses have spent \$30M+ rigging the U.S. Patent Office to protect Google and harm Google competitors -

--- Google bribed it's lawyer into position as head of the U.S. Patent office in order to have her protect Google - To rig insider stock trades, Google hides negative Tesla stories and pumps positive Tesla stories on "push days" - Google and Elon Musk Co-own, co-invest and co-market stocks covertly while running anti-trust schemes - Google rarely likes, or hires, black employees per federal and news media investigations - Google hired most of the Washington, DC K Street lobby firms and told them to "do what ever they could" - The film: "Miss Sloane" depicts only 2% of the illicit lobbying tactics Google employs daily

## Facebook Is Abusing Your Sensitive Medical Information from Hospital Websites

Experts say some hospitals' use of an ad tracking tool may violate a federal law protecting health information By [Todd Feathers](#), [Simon Fondrie-Teitler](#), [Angie Waller](#), and [Surya Matt](#)

A tracking tool installed on many hospitals' websites has been collecting patients' sensitive health information—including details about their medical conditions, prescriptions, and doctor's appointments—and sending it to Facebook.

The Markup tested the websites of [Newsweek's](#) top 100 hospitals in America. On 33 of them we found the tracker, called the Meta Pixel, sending Facebook a packet of data whenever a person clicked a button to schedule a doctor's appointment. The data is connected to an IP address—an identifier that's like a computer's mailing address and can generally be linked to a specific individual or household—creating an intimate receipt of the appointment request for Facebook.

On the website of University Hospitals Cleveland Medical Center, for example, clicking the "Schedule Online" button on a doctor's page prompted the Meta Pixel to send Facebook the text of the button, the doctor's name, and the search term we used to find her: "pregnancy termination."

Clicking the "Schedule Online Now" button for a doctor on the website of Froedtert Hospital, in Wisconsin, prompted the Meta Pixel to send Facebook the text of the button, the doctor's name, and the condition we selected from a dropdown menu: "Alzheimer's."

### Coming Next in the Pixel Hunt Series

This children's hospital network is giving kids' names to Facebook.

The Markup also found the Meta Pixel installed inside the password-protected patient portals of seven health systems. On five of those systems' pages, we documented the pixel sending Facebook data about real patients who volunteered to participate in the Pixel Hunt project, a collaboration between The Markup and Mozilla Rally. The project is a [crowd-sourced undertaking](#) in which anyone can install [Mozilla's Rally browser add-on](#) in order to send The Markup data on the Meta Pixel as it appears on sites that they visit. The data sent to hospitals included the names of patients' medications, descriptions of their allergic reactions, and details about their upcoming doctor's appointments.

Former regulators, health data security experts, and privacy advocates who reviewed The Markup's findings said the hospitals in question may have violated the federal Health Insurance Portability and Accountability Act (HIPAA). The law prohibits covered entities like hospitals from sharing personally identifiable health information with [third parties like Facebook](#), except when an individual has expressly consented in advance or under certain contracts.

Neither the hospitals nor Meta said they had such contracts in place, and The Markup found no evidence that the hospitals or Meta were otherwise obtaining patients' express consent.

"I am deeply troubled by what [the hospitals] are doing with the capture of their data and the sharing of it," said David Holtzman, a health privacy consultant who previously served as a senior privacy adviser in the U.S. Department of Health and Human Services' Office for Civil Rights, which enforces HIPAA. "I cannot say [sharing this data] is for certain a HIPAA violation. It is quite likely a HIPAA violation."

University Hospitals Cleveland Medical Center spokesperson George Stamatis did not respond to The Markup's questions but said in a brief statement that the hospital "comport[s] with all applicable federal and state laws and regulatory requirements."

After reviewing The Markup's findings, Froedtert Hospital removed the Meta Pixel from its website "out of an abundance of caution," Steve Schooff, a spokesperson for the hospital, wrote in a statement.

This is an extreme example of exactly how far the tentacles of Big Tech reach into what we think of as protected data space.

*Nicholas Price, University of Michigan*

As of June 15, six other hospitals had also removed pixels from their appointment booking pages and at least five of the seven health systems that had Meta Pixels installed in their patient portals had removed those pixels.

The 33 hospitals The Markup found sending patient appointment details to Facebook collectively reported more than 26 million patient admissions and outpatient visits in 2020, according to the most [recent data available](#) from the American Hospital Association. Our investigation was limited to just over 100 hospitals; the data sharing likely affects many more patients and institutions than we identified.

Facebook itself is not subject to HIPAA, but the experts interviewed for this story expressed concerns about how the advertising giant might use the personal health data it's collecting for its own profit.

"This is an extreme example of exactly how far the tentacles of Big Tech reach into what we think of as a protected data space," said Nicholson Price, a University of Michigan law professor who studies big data and health care. "I think this is creepy, problematic, and potentially illegal" from the hospitals' point of view.

The Markup was unable to determine whether Facebook used the data to target advertisements, train its recommendation algorithms, or profit in other ways.

Facebook's parent company, Meta, did not respond to questions. Instead, spokesperson Dale Hogan sent a brief email paraphrasing the company's [sensitive health data policy](#).

"If Meta's signals filtering systems detect that a business is sending potentially sensitive health data from their app or website through their use of Meta Business Tools, which in some cases can happen in error, that potentially sensitive data will be removed before it can be stored in our ads systems," Hogan wrote.

## Facebook and Anti-Abortion Clinics Are Collecting Highly Sensitive Info on Would-Be Patients

The social media giant gathers data from crisis pregnancy centers through a tracking tool that works whether or not a person is logged in to their Facebook account

June 15, 2022 06:00 ET

Meta did not respond to follow-up questions, but Hogan appears to be referencing a sensitive health information filtering system that the company launched in July 2020 in response to a [Wall Street Journal article](#) and New York Department of Financial Services investigation. Meta told the investigators that the filtering system was "not yet operating with complete accuracy," according to the department's February 2021 [final report](#).

The Markup was unable to confirm whether any of the data referenced in this story was in fact removed before being stored by Meta. However, a recent [joint investigation with Reveal](#) found that Meta's sensitive health information filtering system didn't block information about appointments a reporter requested with crisis pregnancy centers.

Internally, Facebook employees have been blunt about how well—or not so well—the company generally protects sensitive data.

"We do not have an adequate level of control and explainability over how our systems use data, and thus we can't confidently make controlled policy changes or external commitments such as 'we will not use X data for Y purpose.'" Facebook engineers on the ad and business product team wrote in a 2021 privacy overview that was [leaked to Vice](#).

## "Almost Any Patient Would Be Shocked"

The Meta Pixel is a snippet of code that tracks users as they navigate through a website, logging which pages they visit, which buttons they click, and certain information they enter into forms. It's one of the most prolific tracking tools on the internet—present on more than 30 percent of the most popular sites on the web, according to The Markup's [analysis](#).

In exchange for installing its pixel, Meta provides website owners analytics about the ads they've placed on Facebook and Instagram and tools to target people who've visited their website.

## How We Built a Meta Pixel Inspector

The first large-scale, crowdsourced study that monitors how Meta tracks people across the internet

April 28, 2022 08:00 ET

The Meta Pixel sends information to Facebook via scripts running in a person's internet browser, so each data packet comes labeled with an IP address that can be used in combination with other data to [identify an individual or household](#).

HIPAA lists IP addresses as one of the [18 identifiers](#) that, when linked to information about a person's health conditions, care, or payment, can qualify the data as protected health information. Unlike anonymized or aggregate health data, hospitals can't share protected health information with third parties except under the strict terms of business associate agreements that restrict how the data can be used.

In addition, if a patient is logged in to Facebook when they visit a hospital's website where a Meta Pixel is installed, some browsers will attach third-party cookies—another tracking mechanism—that allow Meta to link pixel data to specific Facebook accounts.

And in several cases we found—using both dummy accounts created by our reporters and data from Mozilla Rally volunteers—that the Meta Pixel made it even easier to identify patients.

When The Markup clicked the "Finish Booking" button on a Scripps Memorial Hospital doctor's page, the pixel sent Facebook not just the name of the doctor and her field of medicine but also the first name, last name, email address, phone number, zip code, and city of residence we entered into the booking form.

## Report Deeply and Fix Things

Because it turns out moving fast and breaking things broke some super important things.

[Give Now](#)

The Meta Pixel "hashed" those personal details—obscuring them through a form of cryptography—before sending them to Facebook. But that hashing doesn't prevent Facebook from using the data. In fact, Meta [explicitly uses](#) the hashed information to link pixel data to Facebook profiles.

Using a [free online tool](#), The Markup was also able to reverse most of our hashed test information that the pixel on Scripps Memorial Hospital's website sent to Facebook.

Scripps Memorial didn't respond to The Markup's questions but it did remove the Meta Pixel from the final webpages in the appointment booking process after we shared our findings with the hospital.

On other hospitals' websites, we documented the Meta Pixel collecting similarly intimate information about real patients.

When one real patient who participated in the Pixel Hunt study logged in to the MyChart portal for Piedmont Healthcare, a Georgia health system, the Meta Pixel installed in the portal told Facebook the patient's name, the name of their doctor, and the time of their upcoming appointment, according to data collected by the participant's Mozilla Rally browser extension.

When another Pixel Hunt participant used the MyChart portal for Novant Health, a North Carolina-based health system, the pixel told Facebook the type of allergic reaction the patient had to a specific medication.

The Markup created our own MyChart account through Novant Health to further investigate and found the Meta Pixel collecting a variety of other sensitive information.

Clicking on one button prompted the pixel to tell Facebook the name and dosage of a medication in our health record, as well as any notes we had entered about the prescription. The pixel also told Facebook which button we clicked in response to a question about sexual orientation.

"Our Meta pixel placement is guided by a third party vendor and it has been removed while we continue to look into this matter," Novant spokesperson Megan Rivers wrote in an email.

Epic Systems, the software company behind MyChart, has "specifically recommended heightened caution around the use of custom analytics scripts," Stirling Martin, a senior vice president for the company, wrote in an email.

Facebook is [able to infer intimate details](#) about people's health conditions using other means—for example, the fact that a person "liked" a Facebook group associated with a particular disease—but the data collected by pixels on hospitals' websites is more direct. And in sharing it with Facebook, experts said, health care providers risk damaging patients' trust in an increasingly digitized health system.

The Markup found that filling out a survey through Novant Health shared sensitive information like sexual orientation with Facebook via the Meta Pixel. Source: [www.novantmychart.org](https://www.novantmychart.org)

"Almost any patient would be shocked to find out that Facebook is being provided an easy way to associate their prescriptions with their name," said Glenn Cohen, faculty director of Harvard Law School's Petrie-Flom Center for Health Law Policy, Biotechnology, and Bioethics. "Even if perhaps there's something in the legal architecture that permits this to be lawful, it's totally outside the expectations of what patients think the health privacy laws are doing for them."

[↩ link](#)

## Legal Implications

Facebook's data collection on hospital websites has been the subject of class action lawsuits in several states, with mixed results.

Those cases involve types of data that health law experts said are sensitive but less regulated than the health information The Markup documented the Meta Pixel collecting.

In 2016, a group of plaintiffs [sued Facebook](#) and a handful of health systems and organizations, alleging that the organizations had breached their own privacy policies and several state and federal laws—including wiretapping and intrusion on seclusion statutes—by collecting data via tracking technology on the health care providers' websites.

The U.S. District Court for the Northern District of California [dismissed that case](#) in 2017 for a variety of reasons, including that the plaintiffs failed to prove that Facebook had collected "protected health information," as defined by HIPAA. Rather, the court found, Facebook had tracked plaintiffs on public-facing pages of the websites—such as the homepage or informational pages about diseases—where there was no evidence that the plaintiffs had established a patient relationship with the provider.

In 2019, plaintiffs brought a [similar class action lawsuit](#) in Suffolk County Superior Court against Massachusetts-based Partners Healthcare System, which has since changed its name to Mass General Brigham, alleging that the system had violated patients' privacy and its own policies by installing the Meta Pixel and other tracking tools on its websites.

## Report Deeply and Fix Things

Because it turns out moving fast and breaking things broke some super important things.

[Give Now](#)

The parties [settled the case](#) in January, with Mass General Brigham denying the allegations and admitting no wrongdoing or liability but paying \$18.4 million to the plaintiffs and their attorneys. After the settlement, Mass General Brigham appears to have removed Meta Pixel and other tracking tools from many of its hospitals' websites—but not all of them.

When The Markup tested the website of Brigham and Women's Faulkner Hospital, clicking the "Request Appointment" button on a doctor's page caused the Meta Pixel to send Facebook the text of the button, the doctor's name, and the doctor's field of medicine. Mass General did not respond to The Markup's request for comment.

As with all such data we found the Meta Pixel collecting, it was sent to Facebook along with our computer's public IP address.

"When an individual has sought out a provider and indicated that they want to make an appointment, at that point, any individually identifiable health information that they've provided in this session, in the past, or certainly in the future, is protected under HIPAA and could not be shared with a third party like Facebook," Holtzman said.

The U.S. Department of Human Services' Office for Civil Rights "cannot comment on open or potential investigations," spokesperson Rachel Seeger wrote in an emailed statement.

"Generally, HIPAA covered entities and business associates should not be sharing identifiable information with social media companies unless they have HIPAA authorization [from the individual] and consent under state law," said Iliana Peters, a privacy lawyer with the firm Polsinelli who previously headed HIPAA enforcement for the Office for Civil Rights.

Patients have the right to file HIPAA complaints with their medical providers, who are required to investigate the complaints, Peters said, adding, "I would hope that institutions would respond quickly to those types of complaints so that they aren't escalated to a state or federal regulator."

[↩ link](#)

## "Plausible Deniability"

Most of the hospitals The Markup contacted for this story did not respond to our questions or explain why they chose to install Meta Pixel on their websites. But some did defend their use of the tracker.

"The use of this type of code was vetted," wrote Chris King, a spokesperson for Northwestern Memorial Hospital, in Chicago. King did not respond to follow-up questions about the vetting process.

King said that no protected health information is hosted on or accessible through Northwestern Memorial's website and that "Facebook automatically recognizes anything that might be close to personal information and does not store this data."

In fact, Meta explicitly states in its [business tools terms of service](#) that the pixel and other trackers do collect personally identifiable information for a variety of purposes.

Houston Methodist Hospital, in Texas, was the only institution to provide detailed responses to The Markup's questions. The hospital began using the pixel in 2017, spokesperson Stefanie Asin wrote, and is "confident" in Facebook's safeguards and that the data being shared isn't protected health information.

When The Markup tested Houston Methodist's website, clicking the "Schedule Appointment" button on a doctor's page prompted the Meta Pixel to send Facebook the text of the button, the name of the doctor, and the search term we used to find the doctor: "Home abortion."

Houston Methodist doesn't categorize that data as protected health information, Asin wrote, because a person who clicks the "Schedule Appointment" button may not follow through and confirm the appointment, or, they may be booking the appointment for a family member rather than for themselves.

Since our further examination of the topic is ongoing, we elected to remove the pixel for now to be sure we are doing everything we can to protect our patients' privacy while we are evaluating.

*Stefanie Asin, Houston Methodist Hospital spokesperson*

"The click doesn't mean they scheduled," she wrote. "It's also worth noting that people often are exploring for a spouse, friend, elderly parent."

Asin added that Houston Methodist believes Facebook "uses tools to detect and reject any health information, providing a barrier that prevents passage of [protected health information]."

Despite defending its use of the Meta Pixel, Houston Methodist Hospital removed the pixel from its website several days after responding to The Markup's questions.

"Since our further examination of the topic is ongoing, we elected to remove the pixel for now to be sure we are doing everything we can to protect our patients' privacy while we are evaluating," Asin wrote in a follow-up email.

Facebook did not launch its sensitive health data filtering system until July 2020, three years after Houston Methodist began using the pixel, according to the New York Department of Financial Services' investigation. And as recently as February of last year, the department reported that the system's accuracy was poor.

That type of Band-Aid fix is a prime example, privacy advocates say, of the online advertising industry's inability to police itself.

"The evil genius of Facebook's system is they create this little piece of code that does the snooping for them and then they just put it out into the universe and Facebook can try to claim plausible deniability," said Alan Butler, executive director of the Electronic Privacy Information Center. "The fact that this is out there in the wild on the websites of hospitals is evidence of how broken the rules are."

Your Phone Is Killing You And Destroying Your Life

By Donna Lawson

Did you know that the electronics in your phone, AND, 99% of the 'Apps' on your phone are tracking you, spying on you, tricking you, and reporting to others when you:

- Get an abortion
- Have sex
- Get pregnant
- Don't go to work
- Enter, or leave, any building
- Get into, or out of, your car
- Have a sex worker take Uber, Lyft or any taxi or ride service to where you are
- Receive money
- Buy anything
- Are depressed
- Breath heavy
- Are located at any location on Earth
- Move from any location on Earth to another location
- Take anything out of your wallet with a chip in it
- Vote
- Express a political opinion
- Use a dating site (Axiom and Equifax make psych profiles on you from your date data)
- Use any 'gay' code words
- Use any 'political' code words
- Speak, or listen, to anyone within 20 feet
- And thousands of other invasions of privacy...

It does these things even if you pushed the button to 'turn it off'. Most phones don't actually turn off when you think they are off because 'spies-gotta-spy'.

COVID is doing a great job of killing off all of the idiot people who grab the door-knob, bare-handed, at the post office, the Starbucks and the grocery store. COVID waits on public surfaces to kill the sheep of society.

Silicon Valley is doing a great job of killing off all the lives of the rest of the sheep who are too dumb to take the battery out of their phone. The people that walk around with a phone, or

tablet, always powered on are committing digital suicide. If you buy a phone that you can't take the battery out of, you are just an idiot.

You may not want to face the truth but I can show you thousands of court records, Congressional investigations and university studies proving that every single assertion in this report is true.

Everybody in Congress knows this is all true but they do nothing because Silicon Valley is bribing almost every single one of them to do nothing. Silicon Valley's largest source of income is your privacy!

NEW YORK (CBSNewYork) — As we recognize October as Domestic Violence Awareness Month, we want to shed light on a type of abuse that many don't even realize is such a problem.

It's a tool readily available to any abuser and very difficult for victims to detect.

READ MORE: Ground-Breaking Ceremony Held At Site Of New \$650 Million 'Hub' In New Brunswick CBS2's Jessica Layton has more on the dangers of cyberstalking and how you can protect yourself.

It's so simple, it's scary — software that allows a stalker to secretly spy through an unsuspecting person's cellphone without their consent.

Experts say "Stalkerware" use is rapidly on the rise, increasing 60% from September 2020 to May 2021.

"Unfortunately, it has been on the increase from being a few hundred apps available in the marketplace," said Tony Anscombe of ESET Internet Security.

The concept may have started with decent intentions — parents installing apps to keep tabs on their kids. But as Anscombe explained, it has turned into an industry where a stalker can track a victim's every move, without them ever realizing it.

"These apps can key log, so they can see every key stroke on your device. They can extract all the information from your contacts, your messages, your email," Anscombe said.

The dangerous app disguises itself as something that is an important function of the operating device on the phone, and it only takes minutes to install. So in the time it takes a person to get up and use the bathroom, take a shower or make a snack, their partner may already have them under surveillance.

Experts showed Layton how easy it is to intercept data once the app is on a phone. Groups like Coalition Against Stalkerware also share warning videos, explaining this is seen most often in cases of domestic abuse.

"When someone is controlling all these aspects of your personal information you have to worry about what they have access to. I know that was a concern for me," domestic violence survivor Heather Glogolich said.

READ MORE: Some New Yorkers Say Hacking Of MTA Shows How Vulnerable The City And Riding Public Are Glogolich, a police lieutenant in New Jersey, understands in many ways how hijacking a personal devices is just one way an abuser exercises control over a victim.

"I couldn't leave my phone down without my ex-husband looking through it," Glogolich said.

"So technology plays a big role in trapping victims and keeping them in that abusive relationship," survivor Neisha Himes added.

Himes didn't know the dangers of digital abuse when she was trying to leave a toxic relationship, but she has since dedicated her life to helping other victims. She said she now sees it almost every day.

"If they have a phone that maybe the offender purchased for them, we have to tell them, 'OK, let's get you a new phone,'" Himes said.

Glogolich and Himes are supporters of a program developed by Sheri Kurdakul, the CEO of Victim's Voice. It's a web-based app that gives power to the victim, allowing him or her to document cases of abuse in real time on their device to present to the courts. They're taken through a series of guided questions vetted by prosecutors and the answers are encrypted and stored in a secure server.

"It's a progressive web app, which means there's nothing to download. You won't find us in any app store. That also means there's no dangerous icons on sitting on your phone and there's no trigger such as a receipt that you downloaded the app," Kurdakul said. "A lot of victims' emails and such are being tracked and monitored all the time."

That kind of awareness and privacy is paramount. That's why even just knowing there could be Stalkerware on your phone is the first step to protecting yourself.

Low battery life, high data usage and slow performance on your phone may also be red flags, yet sometimes intuition is the best indicator that your personal device isn't so private.

So if you suspect you're being stalked through technology, get expert help. Take the phone to a tech company so they can run programs to check it for you. And also, get police involved.

Experts say never try to delete the app yourself. The abuser will get notified and that could put a person in an even more dangerous situation.

CBS2's Jessica Layton contributed to this report.

Neumann Law Group is now investigating claims against Meta Platforms, Inc., the parent company of Facebook and Instagram for their intentional manipulation of the mental health of young and at-risk users of their products.

In October 2021, a Facebook whistleblower testified to the U.S. Senate how Facebook, Instagram, and Meta used tactics to manipulate young people into using their products for extended periods of time and intentionally created a toxic environment leading to significant psychological harm to America's youth.

An apocalyptic 'cult' led by an eccentric misogynist accused of sexual abuse of young men has taken over a division of [Google](#), a whistleblower has claimed.

Kevin Lloyd, 34, claims that he was fired from his job as a video developer at Google last year because he began questioning the influence of the cult.

In August, Lloyd filed a discrimination case in [California](#) Superior Court, alleging he was fired for digging into Fellowship of Friends - a group based in the small Californian town of Oregon House, and whose members made up a large percentage of employees in his division.

'Plaintiff's preliminary research into Oregon House and the Fellowship of Friends described the Fellowship as a destructive cult, with a pedophilic leader who makes false prophecies about the end of the world,' the lawsuit claims.

'Plaintiff became alarmed that Google was involved with and/or financially supporting such an organization.'

Earlier this month, Lloyd wrote a lengthy description of his case on [Medium](#), and spoke to [The New York Times](#) - who corroborated many of the lawsuit's claims through interviews with eight current and former employees of the Google business unit.

Google's campus in Mountain View is 180 miles from the small town of Oregon House, population 1,250 - yet half of the people Lloyd met were from Oregon House, he said. Lloyd said he began work at Google in 2017, as part of Google Developer Studio (GDS) - the tech giant's internal production company, making adverts and video content. He said it slowly dawned on him that many of the people he met at GDS were from the same small Californian town, 180 miles north of Google's Silicon Valley home, in Mountain View.

The town of Oregon House is home to 1,250 people, and yet Lloyd said he realized that half of the 25 people he met at GDS were from the same town.

Lloyd said he noticed that many of the outside vendors, such as caterers and entertainers at corporate events, were also from Oregon House.

In 2018, Lloyd said, he was speaking to a freelancer who was working with them that day, and was from a town near Oregon House.

Lloyd recalls the freelancer telling him: 'Oregon House isn't a town. It's a cult.'

He began investigating the freelancer's claim, and said he was shocked by what he found.

'There are online support groups for former Fellowship of Friends members to help them process the trauma endured during their membership, as well as problems that arise after leaving,' Lloyd's lawsuit states.

Fellowship of Friends, which is based in Oregon House, was founded in 1970 by Robert Earl Burton, a former school teacher in the San Francisco Bay area.

'From its inception the vision of the Fellowship was, and remains, to establish a practical spiritual organization and to make it available to anyone interested in pursuing the spiritual work of awakening,' they state on their website.

•

Burton is seen with a European artwork purchased with the organization's cash. Members must give 10 percent of their earnings to the group

Burton, believed to be now aged in his early 80s, sought to create a center celebrating the fine arts - with opera, ballet, works of art and literature the focus.

He based his organization in Oregon House, and created a winery where his devotees worked, when not studying the arts.

Google even purchased wine, the lawsuit claims, from the Grant Marie Winery, an allegedly cult-affiliated vineyard run by a Fellowship member in Oregon House.

But critics claimed that he had sexually abused new members of his group - in particular young boys.

In 1984 a former member filed a \$2.75 million lawsuit claiming that young men who joined the organization 'had been forcefully and unlawfully sexually seduced by Burton,' according to documents obtained by [The New York Times](#).

In 1996, another former member accused Burton in a law suit of sexual misconduct with him while he was minor. Both suits were settled out of court.

Some accusers, Lloyd alleged, had been flown to the country under false pretenses and then abused.

### **What is Fellowship of Friends?**

Founded on January 1, 1970 by San Francisco school teacher Robert Earl Burton, Fellowship of Friends is a non-profit religious organization, headquartered in Oregon House, California.

Burton based his faith system on a philosophy called the Fourth Way, founded by an Armenian philosopher and mystic, George Gurdjieff, who lived from 1866 to 1949.

Burton adopted Gurdjieff's believe that people are in a hypnotic 'waking sleep', and need to work on themselves through studying art, music and literature.

He named his 1,200-acre headquarters Apollo, and his 1,800 followers gave 10 percent of their earnings to the organization - which spent the money on art, fine wine and culture.

Critics have filed lawsuits claiming sexual abuse.

Other critics said that the group was strongly anti-women, and celebrated white European men above all.

In September, investigative journalist Jennings Brown published a six-part podcast produced for Spotify, entitled [Revelations](#).

Brown had spent three years from 2018 digging into the group, and documented allegations of sexual abuse in what he termed a 'doomsday cult'.

Lloyd said he was aghast that GDS was so strongly linked to the Fellowship, with GDS's director, Peter Lubbers, described as a longtime member of the group, who joined shortly after he moved to the U.S. from the Netherlands.

Lubbers introduced a video producer named Gabe Pannell to the Fellowship: Pannell was pictured with Burton in 2015, and described as a 'new student', The New York Times report.

Lloyd's lawsuit states: 'Mr Lubbers gained status and praise relative to the increase of money flowing to the Fellowship through his efforts at Google that put (and kept) other Fellowship members — directly or indirectly — on Google's payroll.'

Lubbers insisted faith had nothing to do with his hiring.

'My personal religious beliefs are a deeply held private matter,' Lubbers told The New York Times.

'In all my years in tech, they have never played a role in hiring. I have always performed my role by bringing in the right talent for the situation — bringing in the right vendors for the jobs.'

Pannell told the paper that those hired were brought in from 'a circle of trusted friends and families with extremely qualified backgrounds'.

Lloyd, in his Medium post - which does not name Lubbers or Pannell - said that anxiety about the Fellowship, and its reputation, sparked a panic attack, for which he was admitted to ER.

He said in his court documents that he worried events he produced 'could somehow be used to funnel money back into the Fellowship of Friends.'

Burton is seen in a 1981 photo at Oregon House. In 1984, a former member filed a \$2.75 million lawsuit claiming that young men who joined the organization 'had been forcefully and unlawfully sexually seduced by Burton,' according to documents obtained by The New York Times. The suit was settled out of court.

Fired in February 2021, he has retained a lawyer who previously represented a woman at Lubbers' previous company, Kelly Services, and sued in 2008 in a similar case.

Lynn Noyes claimed that Kelly Services had failed to promote her because she was not a member of the Fellowship.

A California court awarded her \$6.5 million in damages.

'Anyone outside of the Fellowship is seen as somehow inferior and at times adversarial,' Lloyd's lawsuit says.

'Those that express serious concerns, criticism or question the group may be eventually perceived as enemies.'

Google told The New York Times that they were barred by law from inquiring about someone's religious practices during the hiring process.

'We have longstanding employee and supplier policies in place to prevent discrimination and conflicts of interest, and we take those seriously,' a Google spokeswoman, Courtenay Mencini, said in a statement.

'It's against the law to ask for the religious affiliations of those who work for us or for our suppliers, but we'll of course thoroughly look into these allegations for any irregularities or improper contracting practices.

'If we find evidence of policy violations, we will take action.'

Fellowship of Friends was approached for comment.
