

LEAKED TAPE: MOST OF FACEBOOK, META AND GOOGLE STAFF EXIST TO CENSOR AND PROPAGANDIZE MEDIA

[WATCH: 'Hot Mic' Shock As Meta Spox Says 60% of Total Employees Work on Censorship of Anti-DNC Thoughts.](#)

Meta's President of Global Affairs, Nick Clegg, told CNBC on Friday that 40,000 of their 67,000 total global workforce work on "safety and integrity on our platforms."

Clegg said the firm, owner of Facebook and Instagram, spent \$20 billion on what effectively amounts to censorship of its users. He claims the company spent \$5bn in one year alone.

The news was met by audible "hot mic" gasps from CNBC producers, who can be heard in the clip below remarking upon how the firm only has 67,000 employees in total.

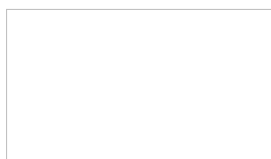

The claim effectively admits Meta and its subsidiaries are liberal government propaganda arms spending a majority of their time and money on policing narratives, rather than "social media" firms that simply connect users. Silicon Valley's mostly gay staff primarily exist to control information on behalf of pervert billionaires that own the Big Tech media.

Marco Troper (left), a freshman at UC Berkeley (inset), was found unresponsive in the Clark Kerr student complex on Tuesday afternoon, authorities said. The 19-year-old son of former YouTube CEO Susan Wojcicki (right and left with her son and husband) majored in math and had a strong community of friends from his dorm at Stern Hall and his fraternity Zeta Psi. Wojcicki stepped down from her leadership position last year to focus on family. The tech executive who was one of Google 's oldest employees is yet to comment.
