usa.streetsblog.org/2021/08/18/federal-investigation-into-tesla-autopilot...

A new federal investigation into Tesla's possibly-defective driver assistance technology could result in the removal of hundreds of thousands of their cars from U.S. roads — and some advocates are wondering whether there might be even more regulation for Elon Musk's brainchild on the horizon, if not the autonomous vehicle industry at large.

[Tesla Model S, 3, X & Y Suspension Issues: Owners Discuss Defective Parts](https://insideevs.com/news/447593/tesla-suspension-issues-owners-true-stories)  
insideevs.com/news/447593/tesla-suspension-issues-owners-true-stories

The correction was to be applied to all Tesla Model S and X units made from January 19, 2016, up to May 25, 2016, if the links failed or if these cars were "scheduled to receive an alignment ...

nytimes.com/2021/02/08/business/tesla-quality-china.html

Last week, Tesla recalled 135,000 vehicles in the United States to deal with a problem with touch screens in its Model S and Model Y cars. The screens had been found to have a high rate of...

### **Tesla's Toxic Pink Pureed-Baby Foam Can Poison Your Family!**

TESLA, AS USUAL, WANTS IT'S LATEST SAFETY DEFECT COVERED UP BUT WE ARE NOT GOING TO LET THEM GET AWAY WITH IT.

Inside the Tesla Battery Pack is a huge gob of pink goo that looks like human babies were poured in a blender. Here is a picture of it:

The foam leaks out of the cracks of the Tesla like this:

A number of car shops and universities have now analyzed the stuff in the Tesla Battery Pack.

It turns out that the Tesla Battery Pack out-gasses toxic gas into the passenger compartment of the car.

It turns out that when the Tesla Battery pack burns, it QUADRUPLES the amount of poison cancer-causing gas that it releases into and around the car. It can poison people in other cars, in a fire, if they have their windows open.

How did others find out about this?

They put Tesla Battery packs and the pink baby foam in scientific sealed chambers and tested the off gassing for weeks. Then they set the packs on fire and tested the off gassing.

Over 6 different chemical analysis devices were used including RedWave's ThreatID which is one of the most powerful portable chemical analyzers on the market today. ThreatID comes standard with more than 22,000 reference spectra including toxic industrial chemicals, [narcotics \(including fentanyl\)](#), pesticides, [explosives](#), weapons of mass destruction (including 4th generation novichok reagents), and common consumer products. (...ThreatID was purpose-built for emergency response as a fully waterproof and ruggedized [chemical analyzer](#). The large, 10" touch screen display facilitates viewing and usability even in level-A protection gear. ThreatID is simple to use, just turn it on and let the on-screen video tutorials and user prompts guide you through sample analysis. The state-of-the-art mixture algorithms combined with an extensive library will help you identify the widest range of substances....)

Tesla seems to have lied by not producing proper federal MSDS documents and not disclosing this in their manuals. Ask Bernard Tse about the tests that were conducted on Tesla's battery pack when he ran Elon Musk's Battery Manufacturing division.

Can your office duplicate these tests and let us know what you come up with? DOT, NHTSA and CLATTRANS are looking into this but are politically pressured to "go slow".

If a family pet or baby eats this attractive bubble-gum looking goo at their eye level on a Tesla, do you know what will happen to them?

i ordered my tesla model y performance sometime february 22 and received my delivery june 8 2022 and 72 hrs later my brand new car is no use to me, tesla

[Every Single Tesla On The Road Has Been Recalled | CarBuzz](https://carbuzz.com/news/every-single-tesla-on-the-road-has-been-recalled)  
carbuzz.com/news/every-single-tesla-on-the-road-has-been-recalled

Tesla has historically had some problems with quality control. Recalls from the brand are very common and pop up with some regularity. To be fair, given Tesla's controversial positioning, they also...

[Tesla recalls more vehicles as US agency increases scrutiny](https://abcnews.go.com/Business/wireStory/tesla-recalls-vehicles-us-agency-increases-scrutiny)  
abcnews.go.com/Business/wireStory/tesla-recalls-vehicles-us-agency-increases...

DETROIT -- Tesla is recalling nearly 579,000 vehicles in the U.S. because a "Boombox" function can play sounds over an external speaker and obscure audible warnings for pedestrians. It is the fourth Tesla recall made public in the last two weeks as U.S. safety regulators increase scrutiny of the nation's largest electric vehicle maker.

[Tesla Models with the Most Recall \(Check Before Buying!\)](https://motorandwheels.com/tesla-models-with-most-recalls)  
motorandwheels.com/tesla-models-with-most-recalls

Tesla recalled its Model S vehicle three times because of its faulty frontal airbags. At first, the automaker only recalled 2012 Model S cars. When the company made the second recall because of this problem in 2018, it was for Model S vehicles released in 2013. The final recall was issued in 2019 for 2014–2018 Model S cars. 3) Steering Racks:
