Airbus to drop lithium-ion batteries for A350 due to regulatory concerns

[Text Size](#) [Print](#) [E-mail](#) [Reprints](#)

By Associated Press, Updated: Thursday, February 14, 6:44 PM

NEW YORK — Airbus is dropping lithium-ion batteries from its new A350 airplane because of uncertainty surrounding the technology that has led to the grounding of Boeing's 787.

The European planemaker said late Thursday that it has decided to revert to nickel-cadmium batteries for the A350. The plane is a wide-body jet rival to the 787 and is expected to make its first flight around the middle of the year.

Gallery

Airbus says it does not expect the battery switch to delay the A350.

Federal officials grounded the 787 last month because of problems with its lithium-ion batteries that caused one fire and forced another plane to make an emergency landing.

Airbus says the A350 uses batteries in a different setup to the 787, making it unlikely that it would face the same problems.

By Laura Mandaro

SAN FRANCISCO (MarketWatch) — Tesla Motors Inc. ([TSLA +3.45%](#)) shares fell 3.2% premarket Monday, to \$98.54, after Barron's featured the company in a cover story. The article noted that one big driver behind the stock's tripling in value this year was a powerful short squeeze. "With the shorts in retreat, Tesla should trade more in line with its fundamentals," notes the article. The author argues there will have to be a break-through in battery technology for sales to take off. ■

not apply directly to DOE but instead work with financial institutions satisfying the qualifications of an eligible lender which may apply directly to DOE to access a loan guarantee. The solicitation invites applications from eligible lenders for partial, risk-sharing loan guarantees from DOE. The guarantee percentage will be no more than 80% of the maximum aggregate principal and interest during a loan term, and the project debt must obtain a credit rating of at least 'BB' or an equivalent with a nationally recognized credit rating agency.

This solicitation marks the eighth round of solicitations issued by the Department's Loan Guarantee Program since its inception.

Read more information on this solicitation and the Department's Loan Guarantee Program at www.lgprogram.energy.gov.

YOU MUST BE SPECIAL

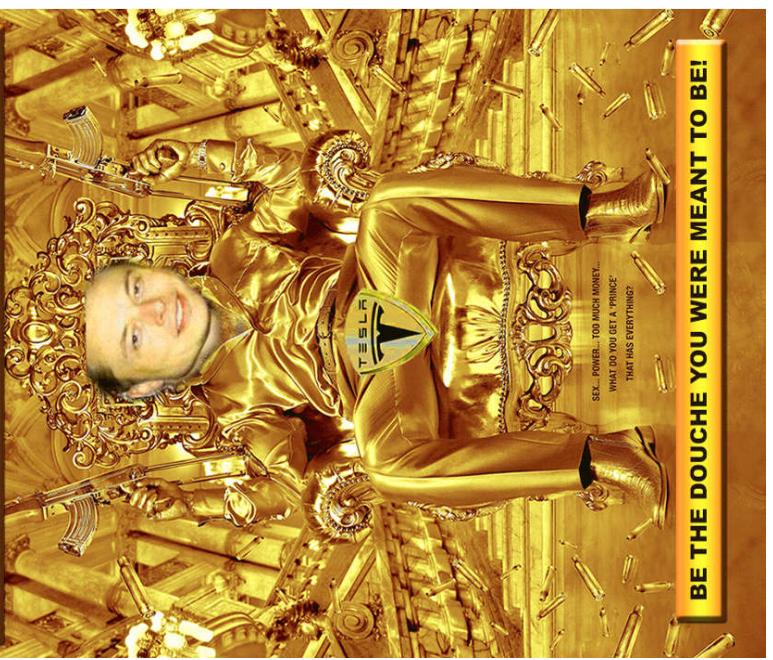

YOU MUST GO ON SO
MANY ADVENTURES

Elon Musk, a billionaire, has now received billions of free taxpayer dollars in out-right cash hand-outs, tax waivers, free or low-cost resources, stock pumps and Federal NASA contracts. Musk's companies would not exist today if not for taxpayer hand-out cash. No other living person has received this much taxpayer money through his companies, investors and partners, like Google. No other living person has had the Obama administration sabotage, terminate or rule against so many of his companies. Federal records demonstrate this to be one of the most overt examples of a political campaign kick-back scheme in this decade. In Musk's extensively orchestrated, self-aggrandizing, media campaigns, all mention of his true financial connections, extensive fraud lawsuits, and employee diatribes is carefully expunged.

Tesla CEO in Digital Witch Hunt

Owen Thomas Filed to LEAKS

3/04/09 9:30am

29,238 ⚡ 2 ★

Enraged by leaks at his troubled Silicon Valley electric carmaker, CEO Elon Musk cooked up a sophisticated electronic scheme to catch the blabbers. It backfired hilariously on the brilliant entrepreneur, who's a bit babby himself.

Tesla Motors is an icon of the new Silicon Valley, which is placing its bets on clean, green technology. Its \$109,000 Tesla Roadster runs wholly on electricity and accelerates from 0 to 60 miles per hour in less than four seconds. But the company is in deep financial trouble, and is betting its future on government loans that may not materialize. Musk, the company's lead investor, took over as CEO last fall. But his reign has been marked by constant and, as Musk himself had admitted, deadly accurate disclosures of Tesla's parlous condition.

A tipster writes:

Life for the employees at Tesla Motors has got more depressing over the last few months. Elon Musk is now spying on everyone.

A TESLA STOCK SHILL FRONT OPERATION

3 Items the Short-sighted Media Doesn't Understand About Tesla Motors Inc. Stock

By Daniel Sparks | More Articles July 12, 2014 | Comments (1)

A number of recent reports on electric-car maker Tesla Motors (NASDAQ: TSLA) serve as excellent examples of key differences between the shortsighted media and the long-term minded buy-and-hold investors. On three particular Tesla topics that often make headlines, the media appears to be somewhat clueless.

Inside the U.S. Antitrust Probe of Google

Key FTC staff wanted to sue internet giant after finding 'real harm' to consumers and to innovation'

By BOBBY MILLIAN, ROSE WINKLER and BRENT KENDALL Updated March 18, 2015 7:38 p.m. ET

WASHINGTON—Officials at the Federal Trade Commission concluded in 2012 that Google Inc. used anticompetitive tactics and abused its monopoly power in ways that harmed internet users and rivals, a far harsher analysis of Google's business than was previously known.

The 160-page critique, which was supposed to remain private but was inadvertently disclosed in open records required, concluded that Google's "conduct has resulted—and will result—in real harm to consumers and to innovation in the online search and advertising markets."

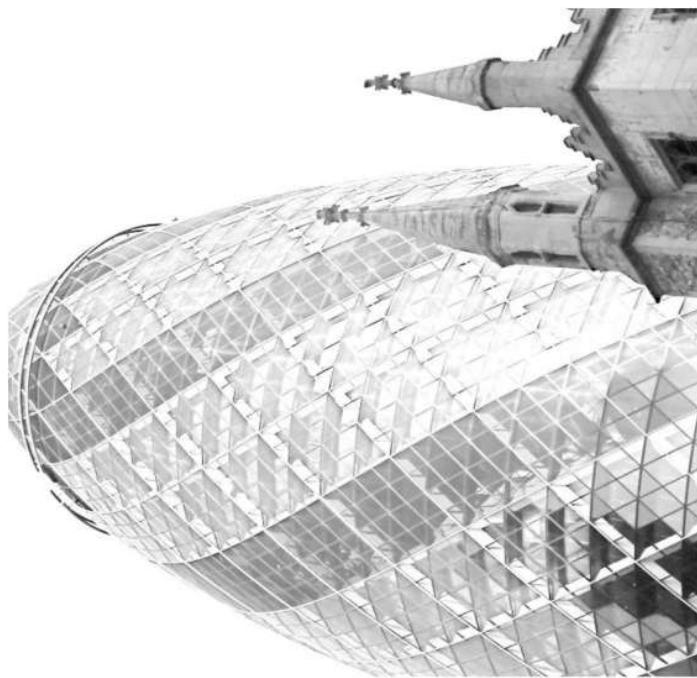

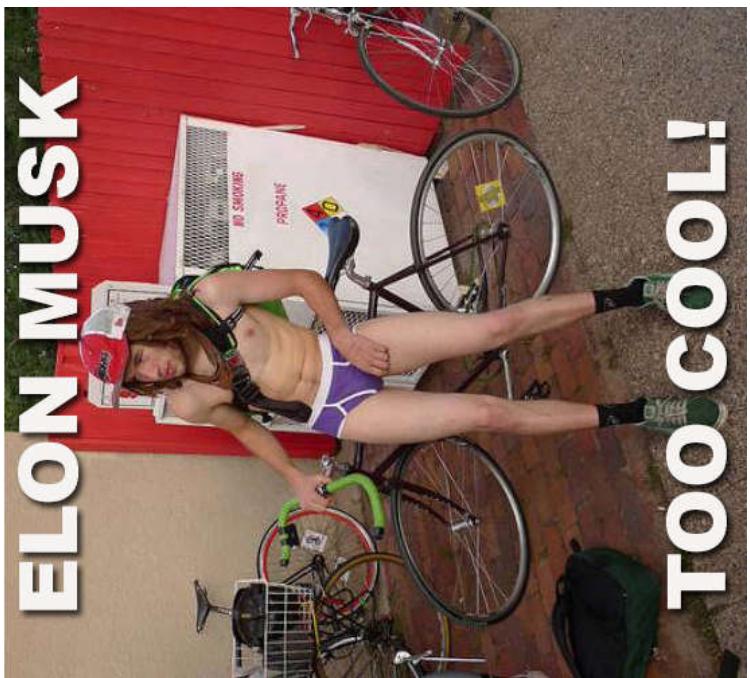

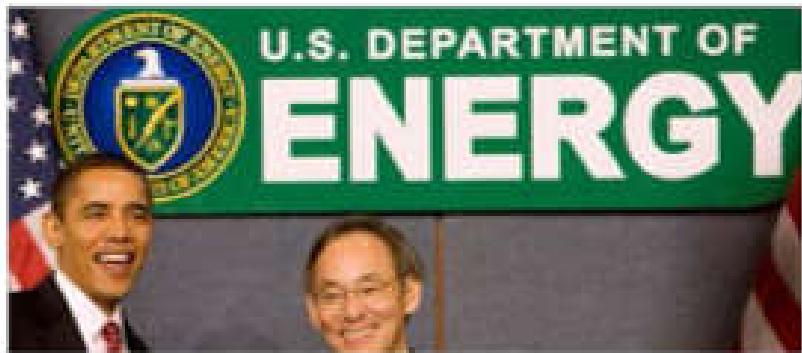

Google's Eric Schmidt testified in a 2012 hearing before the Senate Commerce Committee that Google's "conduct has resulted—and will result—in real harm to consumers and to innovation in the online search and advertising markets."

The DOE Restructured its Loan to Tesla: "Imagine that. Weeks to go before the election and the Department of Energy has restructured a \$465 million loan to the electric-car company to make sure it didn't run out of cash. The New York Times reports: (emphasis mine)

As it ramps up sales of its sleek electric sedan, Tesla doesn't appear to be much of a leader right now. But a closer look at company's cash flow suggests it is hardly out of the woods... The federal government eased terms of its \$465 million loan to Tesla to ensure the company didn't breach key financial hurdles. The company then raised \$193 million in a secondary stock offering, easing cash concerns... Tesla's CEO has said he raised the \$193 million "simply for risk reduction." Yeah. It's called the risk of Obama of Tesla running out of cash right before the election.'

Taxpayers Subsidize Forbes' 'Green' Billionaires' Scheme: Musk, best known as co-founder of the company that became PayPal, is Chairman of SolarCity and CEO of Tesla. According to the Center for Responsible Politics, SolarCity spent \$515,000 in 2009 and 2010 to lobby Congress and the Department of Energy on climate legislation, the Recovery Act, green-energy-trading and development, and provisions in various legislation relevant to solar development... So far, according to DOE reports, SolarCity has received more than \$66 million from that program. The company also won a partial guarantee from DOE of a \$344 million loan that will place up to 160,000 rooftop solar installations on military housing across the country. Similarly, Musk's Tesla Motors spent \$480,000 from 2007 to 2011 to lobby Congress, the White House, EPA and DOE on climate and energy issues, the Advanced Technology Vehicles Manufacturing loan program, the Promoting Electric Vehicles Act, and the Recovery Act. Tesla received \$465 million loan guarantees from DOE's ATVM program. Musk is also a generous political donor, mostly to Democrats, although his investments and giving are equally diverse.

Climate Depot's report [Batterie/Hybrid car industry loans prove in the face of market reality and lack of consumer demand -- Washington Post on Chevy Volt: "The basic theory -- if you build them, customers will come -- was a myth. And an expensive one, at that"](#)

The Greentech VC Influence Over Washington

By [Katie Fehrenbacher](#) Aug. 18, 2010, 8:28am PDT [No Comments](#)

Buzz 0

There've been a couple articles in the past few weeks pointing to President Obama as the "[clean tech investor in chief](#)" and the [presidential VC with bets on clean energy](#). The real trend is that venture capitalists focusing on greentech seem to have had an unprecedented influence on U.S. federal policy and allocations of the stimulus package.

When I attended the Department of Energy's (DOE) first [ARPA-E conference](#) (Advanced Research Projects Agency-Energy) earlier this year in Washington D.C., I was struck by how many venture capitalists were there. I shared a cab back to the airport with some familiar Silicon Valley faces, and was told if your firm didn't have a dedicated person in Washington — in some circles they call them lobbyists — maneuvering grant and loan programs, you weren't able to be competitive.

Just look at the figures from the stimulus package (which I am fully in support of): somewhere between \$50 billion and \$80 billion into clean power and energy efficiency initiatives ([depending on](#)

Who Bricked The Electric Car? You Did!

When Wall Street Makes Crap Loans, It's a Crisis; When DOE's Steven Chu Does It, It's Green Energy.

Nick Gillespie | March 15, 2012

Via Instapaper Linking to The Fiscal Times comes documentation of just what an easy grader Department of Energy (DOE) Secretary Steven Chu really is. As we'll recall, a while back the Nickel battery car entrepreneur was asked by Rep. Paul Broun (R-Ga.) to grade his performance at DOE. Chu's humble response? "There's always room for improvement, maybe an A-."

The GAO looked at the handling of \$30 billion outstanding in loan guarantees and future commitments and discovered that the DOE rarely follows its own written procedures for vetting and certifying applications. In fact, in many cases, the Loan Guarantee Program (LGP) couldn't even find the data managers needed to administer the loans properly...

In almost every case studied investigated by the GAO, important steps got skipped in the documentation so poor that the GAO couldn't figure out what the LGP did... The process had at best an 85 percent failure rate on its process check. Most people would not associate that level of gross incompetence with a *grade of A-minus*...

With \$30 billion in taxpayer money at risk, the DOE under Steven Chu didn't bother to conduct the reviews it claimed it would on applications for loan guarantees, didn't keep records of what reviews they did accomplish, and skipped off on loans with incomplete documentation and inadequate oversight of the risk. The result -- perhaps 96.5 billion immediately at risk, according to GAO, and possibly most of the \$30 billion.

Morrissey drives home the point that when it comes to lending standards and the validation of private financial institutions processing mortgages that were either backed up by government-sponsored enterprises, the Obama admin is firmly in the "do as we say, not as we do" camp.

What makes DOE's sins carelessness and

Tesla Motors might be balking a big battery issue from their customers. Apparently, the company's electric vehicles, including their Roadster and the upcoming Model S, feature a battery pack which if completely discharged might leave a huge financial burden on the unfortunate owner. But is the owner unfortunate, or simply a bit careless?

According to an article by Michael Dugatu user at www.entrepreneur.com, if a Tesla electric car, such as the Roadster is parked unplugged, it will eventually become what the company calls a "brick". The vehicle can no longer be started or even pushed down the road. This is the result of the car's always-on systems which continually feed on the battery.

But don't have a slight feeling that Dugatu's argument is nonsense. That's because it is.

If you are familiar with electric cars or batteries or even smartphones, you might know the first that the battery dies, the owner ends up paying Tesla approximately \$40,000 for replacing the battery pack. Unfortunately, there is no option to recharge via sunlight or a car insurance policy for this particular problem. Apparently, at least five Tesla owners were unfortunate enough to end up with this problem. Dugatu says Tesla is unwilling to let their customers know about the issue, although they know that it is a big one.

A 14-year old girl in Kennebunk, Maine was settling in for another normal school day late last week when she heard a pop emanating from her pocket. Her friends immediately noticed smoke billowing from the girl's pants and realized that her phone had caught fire. When all was said and done the girl, who remains unidentified, was in the hospital. A charred iPhone 5c was on the classroom floor.

According to witnesses as well as emergency responders, it was an iPhone 5c, given to the girl less than two months prior, that ignited in what can be considered a freak occurrence. The most likely culprit was the handset's lithium-ion battery.

CEO, Tesla Motors, SpaceX, Chairman, SolarCity
By BUSINESS INSIDER

Tesla and SpaceX were on the verge of bankruptcy in 2008 and Elon Musk was about to lose all his money, but the founder made sure that his employees would be taken care of, if the companies failed.

Produced by Kameelia Angelova, Alana Kakoyianis and Justin Gmoser

Musk had the generosity to offer severance packages to all of his employees in case the company went bankrupt. He even had the foresight to include a clause in his own severance package that would ensure he would receive the same amount as his employees. This shows that Musk is a true leader and cares about his team.

"Musk's actions speak louder than words. He has shown that he truly cares about his employees and their well-being. By offering such generous severance packages, he has demonstrated that he values his team and wants to ensure they have a safety net in place if things don't work out."

Pension Funds Sue Big Banks Over Manipulation Of \$12.7 Trillion Treasuries Market

This [redacted] [redacted] [redacted]

[redacted] [redacted] [redacted] [redacted] [redacted] [redacted] [redacted]

(Steve Sack) At least two Government pension funds have sued major banks, accusing them of manipulating the \$11.7 trillion market for U.S. Treasury bonds to drive up profits, thereby costing the funds—and taxpayers—millions of dollars.

As with another case earlier this year, in which major banks were found to have manipulated the London Interbank Offered Rate (LIBOR), traders are accused of using electronic chat rooms and instant messaging to drive up the price that secondary customers pay for Treasury bonds, then conspiring to drop the price banks pay the government for the bonds, increasing the spread, or profit, for the banks. This also ends up costing taxpayers more to borrow money.

In the latest complaint, the Oklahoma Firefighters Pension and Retirement System is suing Barclays Capital, Deutsche Bank, Goldman Sachs, HSBC Securities, Merrill Lynch, Morgan Stanley, Citigroup and others, according to Courthouse News Service. Last month State-Benton Retirement System (SRSB) filed a similar complaint against 22 banks, many of which are the same defendants in the Oklahoma suit.

Stock market rigging is no longer a ‘conspiracy theory’

March 25, 2013 | 1:43pm

U.S. stock markets are rigged, says author Michael Lewis

A new book by Michael Lewis will show “Wall Street Bunkering” in New York. October 22, 2012.

The stock market is rigged.

When I started making a book claim years ago — and provided solid evidence — people scoffed. Some called it a conspiracy theory; others just said that sort of stuff makes people just ignore me.

But that's not happening anymore. The dirty secret is out. With stock prices rising far ahead of economic reality over the last six or so years, more experts in the financial markets are coming to the same conclusion — even if they don't fully understand how it's being rigged or the consequences.

Ed Lazear, a longtime Wall Street guru who's one of the icons of this bunch, said flat out last week that the market was being propped up. "These markets are all rigged, and I don't say that critically," he asserted on CNBC.

Why interest rates can't rise yet.

Why interest rates can't rise yet.

Are banks in the mix? Not only

watch them away

Dear John: What's going on in regard

market

Finally,

SEC chief takes aim at predatory traders in 'Market'

SEC chief takes aim at predatory traders in 'Market'

(Reuters) — The U.S. stock market is rigged in favor of high-speed electronic trading firms, which use their advantages to extract billions from investors, according to Michael Lewis, author of a new book on the topic, "Flash Boys: A Wall Street Revolt."

High-Frequency Trading (HFT) is a practice carried out by many banks and proprietary trading firms using sophisticated computer programs to send pools of orders into the market, executing a small portion of them when opportunities arise in capitalizing on price imbalances, or to make markets. HFT makes up more than half of all U.S. trading volume.

The trading methods and technology that make HFT possible are legal, and the stock exchanges HFT firms trade on are legally required. But Lewis said these firms are using their speed advantage to profit at the expense of other market participants to the tune of tens of billions of dollars.

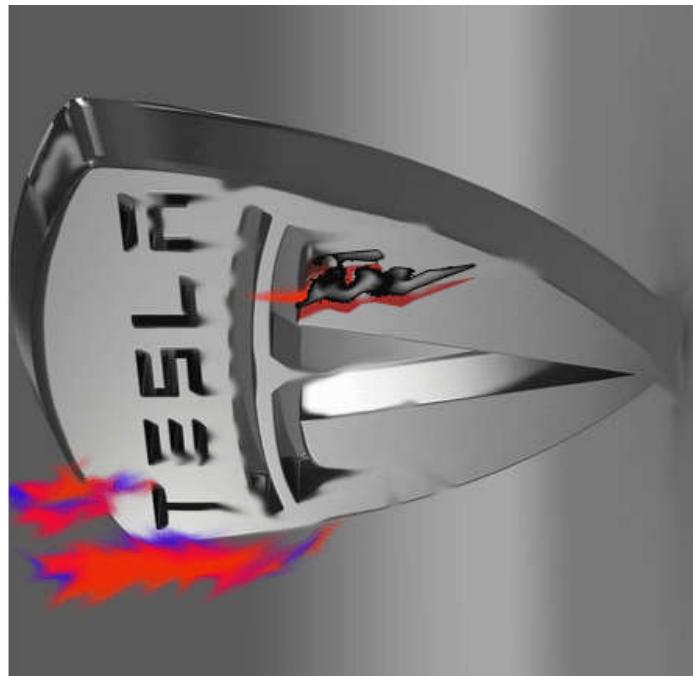

"They are able to identify your desire to buy shares in Microsoft and buy them in front of you and sell them back to you at a higher price," Lewis, whose book is available on Monday, said on the television program "30 Minutes" on Sunday.

"This speed advantage that the faster traders have is milliseconds, some of it is fractions of milliseconds," said Lewis, whose books include "The Big Short" and "Moneyball."

Those milliseconds can be valuable, making it possible to send around 10,000 orders in the blink of an eye.

TESLA ON FIRE. DRIVER & PASSER BY BREATH TOXINS

TESLA TRUTH TICKET:

Do you know what people are thinking of you when they see you driving this Tesla car?
"What an arrogant elitist" - "What a 1%er!" - "How could they be so uninformed?"
"Why would they want to drive this poster car of corruption?" Look it's a Solvayra-mobile"
"Who is that dick?"

Do you want that?

Why would you drive a car that makes everyone sneer at you and think you are a bad person?
Have you not been reading the news?
The lithium ion batteries under the entire floorboard of this car can go up in flames,
for no reason, at any moment. Tesla has published private patent papers saying they
knew this but they did not tell you.

The company is based on nearly free federal money they got by bribing Washington
officials to get your tax dollars to make profits for a billionaire and bankers who did not
need the money.

You can get a Nissan Leaf or many other, non-painted, electric cars that do the same
thing for about \$20,000 without feeling like a loser.

The founders of Tesla were kicked out in a hostile take-over. You are supporting
evil-doers, not innovators, by owning this car.

The company owes more money than it can pay back, nobody is buying the cars
in any amount that counts, they are just using their VC money to keep the company
looking like it is alive to avoid political embarrassment. Relative to the amount of
money invested, they have sold less cars than any car company in history after 10
years of trying to sell a non-innovative thing. They won't be around much longer.
The real numbers (not the ones in their fake accounting) don't lie.

Give the car back, get your money back. Others are cancelling their reservations. Don't
be stuck with an albatross that ruins your personal AND family brand by associating
you with creeps.

All this information is plainly visible in an online search.

Important Safety Recall Notice Regarding Your Universal Mobile Connector NEMA 14-50 Adapter

Dear Model S Owner,

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act.

REASON FOR THIS RECALL

Tesla Motors has decided that a defect which relates to motor vehicle safety exists in your Tesla Model S vehicle. Under increased electrical resistance circumstances, the NEMA 14-50 adapter for the Universal Mobile Connector (UMC) provided with your Model S vehicle, or the electrical wall receptacle, could overheat. An overheated adapter or wall outlet could impact the UMC cord as well and result in an increased risk of burn injury and/or fire.

WHAT TESLA MOTORS WILL DO

First, Tesla Motors has developed a software update that allows the Model S onboard charging system to detect any unexpected fluctuations in the input power or higher resistance connections to the vehicle. If detected, the onboard charging system automatically reduces the charging current by 25%. For example, this reduces a 40 amp charge rate to 30 amps. This dramatically reduces the heat generated in any high resistance connections outside of the vehicle.

Second, Tesla is replacing the NEMA 14-50 adapters with ones of an improved design. Tesla will begin mailing the new adapters in the next two weeks. New adapters can be readily distinguished by the grey connector face as shown in the picture below.

Tesla is an abusive and highly unethical company.

Anonymous Employee (Current Employee)
Folsom, CA
#11

I have been working at Tesla Motors fulltime for more than a year.

Pros: Very public company with great brand recognition.
Bad atmosphere. Many executives who regularly abuse their power and sometimes are in danger of a safety cut or termination.
The use of intimidation and fear tactics is expected.
Tesla's primary make up of engineers and not business oriented professionals.
HR has a blind eye to abuse and will not take action against managers, illegal work practices.
Little to no training.
Extreme environment.

Advice to Senior Management: Hold regular peer reviews, hire real industry professionals and start a management training program to educate managers on proper management techniques and practices.

No, I would not recommend this company to a friend

I worked at Tesla Motors full-time

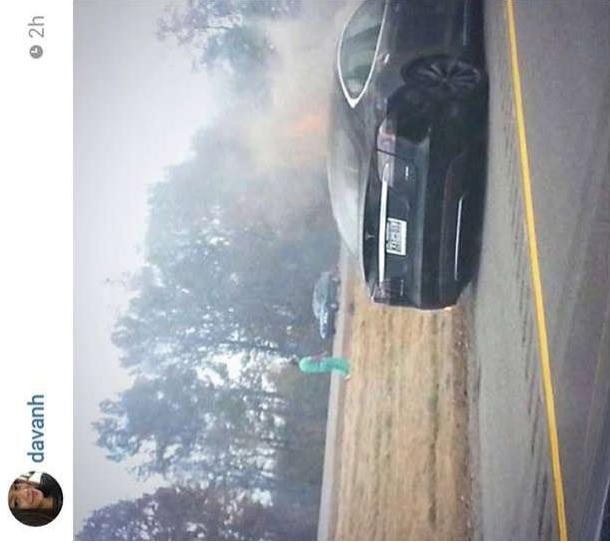

Pros: Safe factory, alert of potentially talented people, excellent benefits, cutting edge opportunity, and free food.

Cons: TERRIBLE TERRIBLE QUALITY CONTROL. vehicles shipped to customer locations incomplete yes MISSING PARTS that should have been installed and the factory fails to inform the customer. I am sick of us being told to do what we are told. ZERO management policies. VERY disorganized throughout the company. ZERO work life balance policy having a day off. I've seen them FIRE employees in an instant and HIDE behind the CA AT WILL ACT so they don't have to deal with management or HR. They don't care about their employees. In fact, they don't even care about their customers. In fact, they don't care about their investors. ZERO customer service. Also, all of these issues with company morale and travel between cities and RECOGNITION OF TALENT IT IS HARD WORKING. "weee system is a joke this is a very frustrating environment.

No, I would not recommend this company to a friend - I'm not optimistic about the outlook for this company

The National “TESLA FLYERS” CONTROVERSY

People In San Francisco Are Leaving Insane Fliers On Tesla Cars, Claiming To Expose The 'Truth' About The Company

MEGAN ROSE DICKEY APR 30, 2014 8:12 PM • \$1

[FACEBOOK](#) [LINKEDIN](#) [TWITTER](#) [GOOGLE+](#)

People are apparently leaving fliers on Tesla cars in San Francisco, warning drivers that owning a Tesla means they are involved in "organized crime."

The flier accuses Tesla of "manipulating Congress" and questions the safety of lithium ion batteries.

"Lithium ion batteries blow up if they get wet or bumped," the flier reads. "They have already burned planes, cars, homes & children. There have been tens of thousands of lithium ion battery fires & explosions. Tesla's (sic) have over 7000 'non-automotive designed' batteries in each car, that means over 7000 chances of having a catastrophic fire."

The flier also speculates that Google is a "silent partner" of Teslas.

"Tesla audio and location tracking can be remotely monitored with two clicks of a mouse," the flier reads. "Google hushes up bad news about Tesla. By driving a Tesla you are supporting spying."

It's not clear who is behind this, but the flier ultimately urges Tesla owners to give the car back. Check it out below.

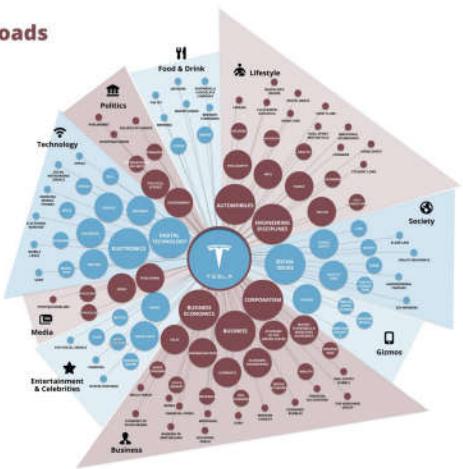

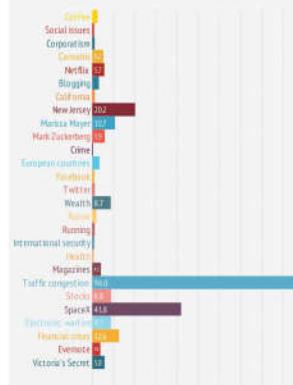

Tesla Fans: Sex, Money & Open Roads

What the Tesla Model S says about you

We all have an Interest Graph...

It's the set of things you care about and how much you care about them. When we all get together as a group, we have one big Interest Graph that describes us too. Let's see what a whole lot of Interest Graphs from folks who are into the Tesla Model S can tell us about them.

Humans with Interest Graphs indicating a meaningful interest in the Model S

(including all business units and persons previously referred to), who are or, in or after 2006, were involved in any way with any of the following related to the alleged defect in the subject vehicles:

- Design, engineering, analysis, modification or production (e.g. quality control);
- Testing, assessment or evaluation;
- Consideration, or recognition of potential or actual defects, reporting, record-keeping and information management, (e.g., complaints, field reports, warranty information, part sales), analysis, claims, or lawsuits; or
- Communication to, from or intended for zone representatives, fleet dealers, or other field locations, including, but not limited to, people who have the capacity to obtain information from dealers.

Alleged defect: Deformation or damage to the subject component from impacts such that the propulsion component or failure of the subject component to withstand an impact such that the propulsion battery or individual cells of the battery are damaged by the impact and/or shut down of the vehicle propulsion system, starting of the vehicle or fire, or other thermal event in the propulsion battery following an impact to the subject component.

- **Document:** "Document(s)" is used in the broadest sense of the word and shall mean all original written, printed, typed, recorded, or graphic matter whatsoever, however produced or reproduced, of every kind, nature, and description, and all non-identical copies of both sides thereof, including, but not limited to, papers, letters, memoranda, correspondence, communications, electronic mail (e-mail) messages existing in hard copy and/or in electronic storage, faxes, mailgrams, telegams, cables, telex messages, notes, annotations, working papers, drafts, minutes, records, audio and video recordings, data, databases, other information bases, summaries, charts, tables, graphics, other visual displays, photographic statements, interviews, opinions, reports, newspaper articles, studies, analyses, evaluations, interpretations, contracts, agreements, judgments, agendae, bulletins, notices, announcements, instructions, blueprints, drawings, as-builts, changes, manuals, publications, work schedules, journals, statistical data, desk, portable and computer calculators, appointment books, travel itineraries, data processing inputs and outputs, computer printouts, data processing program libraries, floppy disks, backup tapes, and microfilms, microfiche, statements for services, resolutions, financial statements, governmental records, business records, personnel records, work orders, pleadings, administrative filings and all mechanical, magnetic, photographic and electronic records or recordings of any kind, including any storage media associated with computers, including, but not limited to, information on hard drives, floppy disks, backup tapes, and zip drives, electronic communications, including but not limited to, the Internet and shall include any drafts or revisions pertaining to any of the foregoing, all other things similar to any of the foregoing, however denominated by Tesla, any other data compilations from which information can be obtained, translated if necessary, into a usable form and any other documents. For purposes of this request, any document which contains any note, comment, addition, deletion, insertion, annotation, or otherwise comprises a non-identical copy of another document shall be treated as a separate document subject to production. In all cases where original and any non-identical copies are not available, "document(s)"

3

- also means any identical copies of the original and all non-identical copies thereof. Any document, record, graph, chart, film or photograph originally produced in color must be provided in color. Furnish all documents whether verified by Tesla or not. If a document is not in the English language, provide both the original document and an English translation of the document.
- Short:** The term "Short" refers to an unintended change in the path of electrical current flow within a circuit, battery, semiconductor, conductor or electro-mechanical device.
- **Other Terms:** To the extent that they are used in these information requests, the terms "claim," "complaint," "defect," "defect report," "field report," "fire," "flact," "good will," "make," "model," "model year," "battery," "property damage," "property damage claim," "holerover," "type," "warranty," "warranty adjustment," and "warranty claim," whether used in singular or in plural form, have the same meaning as found in §794.

In order for my staff to evaluate the alleged defect, certain information is required. Pursuant to 49 U.S.C. § 30166, please provide numbered responses to the following information requests. Insofar as Tesla has previously provided a document to ODI, Tesla may produce it again or identify the document, the document submission to ODI in which it was included and the precise location in that submission where the document is located. When documents are produced, the documents shall be produced in an identified organized manner that corresponds with the organization of this information request letter (including all individual requests and sub-requests). When documents are produced and the documents would not, standing alone, be self-explanatory, the production of documents shall be supplemented and accompanied by explanation.

Please repeat the applicable request verbatim above each response. After Tesla's response to each request, identify the source of the information and indicate the last date the information was gathered.

1. State, by model and model year, the number of subject vehicles Tesla has manufactured for sale or lease in the United States. Separately, for each subject vehicle manufactured to date by Tesla, state the following:
 - Vehicle identification number (VIN);
 - Power rating capacity of the propulsion battery;
 - Date warranty coverage commenced; and,
 - Whether the suspension system (ride height) is actively controlled;

- State in the United States where the vehicle was originally sold or leased.
- The State in the United States where the vehicle was originally sold or leased.
- Provide the table in Microsoft Access 2010, or a compatible format, entitled "PRODUCTION DATA".

2. State the number of each of the following, received by Tesla, or of which Tesla is otherwise aware, which relate to, or may relate to, the alleged defect in the subject vehicle:

- a. Consumer complaints, including those from fleet operators;
- b. Field reports, including dealer field reports;
- c. Reports involving a crash, injury or fatality;
- d. Reports involving a fire;
- e. Reports involving a thermal reaction and/or short, not included in Tesla's response to subpart d above;
- f. Property damage claims;
- g. Third-party arbitration proceedings where Tesla is or was a party to the arbitration; and
- h. Lawsuits, both pending and closed, in which Tesla is or was a defendant or codefendant.

For subparts "a" through "h," state the total number of each item (e.g., consumer complaints, field reports, etc.) separately. Multiple incidents involving the same vehicle are to be counted separately. Multiple reports of the same incident are also to be counted separately (i.e., a consumer complaint and a field report involving the same incident in which a crash occurred are to be counted as a single report, a field report and a consumer complaint).

In addition, for items "c" through "h," provide a summary description of the alleged problem and causal and contributing factors and Tesla's assessment of the problem, with a summary of the significant underlying facts and evidence. For items "g" and "h," identify the parties to the action, as well as the caption, court, docket number, and date on which the complaint or other document initiating the action was filed.

3. Separately, for each item (complaint, report, claim, notice, or matter) within the scope of your response to Request No. 2, state the following information:

- a. Tesla's file number or other identifier used;
- b. The category of the item, as identified in Request No. 2 (i.e., consumer complaint, field report, etc.);
- c. Vehicle owner or fleet name (and fleet contact person), address, and telephone number;
- d. Vehicle's VIN;
- e. Vehicle's make, model and model year;
- f. Vehicle's mileage at time of incident;
- g. Incident date;
- h. Report or claim date;
- i. Whether a crash is alleged;
- j. Whether a fire, thermal reaction and/or short is alleged;
- k. Whether property damage is alleged;
- l. Number of alleged injuries, if any; and
- m. Number of alleged fatalities, if any.

Provide this information in Microsoft Access 2010, or a compatible format, entitled "REQUEST NUMBER TWO DATA."

6. Describe all assessments, analyses, tests, test results, studies, surveys, simulations, investigations, inquiries and/or evaluations (collectively, "actions"), and including actions conducted during subject vehicle design, development, and validation that relate to, or may relate to, the alleged defect in the subject vehicles that have been conducted, are being conducted, are planned, or are being planned by, or for, Tesla. For each such action, provide the following information:

- a. Action title or identifier;
- b. The actual or planned start date;
- c. The actual or expected end date;
- d. Brief summary of the subject and objective of the action;
- e. Engineering group(s)/supplier(s) responsible for designing and for conducting the action;
- f. A brief summary of the findings and/or conclusions resulting from the action.

For each action identified, provide copies of all documents related to the action, regardless of whether the documents are in interim, draft, or final form. Organize the documents chronologically by action.

9. Provide detailed engineering drawings depicting dimensional specifications of the subject component and indicating all subassemblies and mechanical, electrical and battery components. The drawings should contain sufficient detail, such as sectional views of the battery cell modules that show proximity to the enclosure baseplate and/or other conductive materials which would allow OBI to assess the consequences of enclosure baseplate deformation and the likelihood that it could lead to cell damage.

- 10. Describe all modifications or changes made by, or on behalf of, Tesla in the design, material composition, manufacture, quality control, supply, or insulation of the subject component, from the start of production to date, which relate to, or may relate to, the alleged defect in the subject vehicles. For each such modification or change, provide the following information:
 - a. The date or approximate date on which the modification or change was incorporated into vehicle production;
 - b. A detailed description of the modification or change;
 - c. The reason(s) for the modification or change;
 - d. The part number(s) (service and engineering) of the original component;
 - e. The part number(s) (service and engineering) of the modified component;
 - f. Whether the original unmodified component was withdrawn from production and/or sale, and if so, when;
 - g. Whether the modified component was made available as a service component; and
 - h. Whether the modified component can be interchanged with earlier production components.

Also, provide the above information for any modification or change that Tesla is aware of which may be incorporated into vehicle production within the next 120 days.

- 11. Describe all modifications or changes made by, or on behalf of, Tesla in the function and operation of the actively controlled suspension system, from the start of production to date,

- 4. Produce copies of all documents related to each item within the scope of Request No. 2. Organize the documents separately by category (i.e., consumer complaints, field reports, etc.) and describe the method Tesla used for organizing the documents. Describe in detail the search methods and search criteria used by Tesla to identify the items in response to Request No. 2.

- 5. State, by model and model year, a total count for all of the following categories of claims, collectively, that have been paid by Tesla to date that relate to, or may relate to, the alleged defect in the subject vehicles: warranty claims; extended warranty claims; claims for good will services that were provided; field, zone, or similar adjustments and reimbursements; and warranty claims or repairs made in accordance with a procedure specified in a technical service bulletin or customer satisfaction campaign.

Separately, for each such claim, state the following information:

- a. Tesla's claim number;
- b. Vehicle owner or fleet name (and fleet contact person) and telephone number;
- c. VIN;
- d. Repair date;
- e. Vehicle mileage at time of repair;
- f. Repairing dealer or facility's name, telephone number, city and state or ZIP code;
- g. Vehicle operation number;
- h. Problem code;
- i. Replacement part number(s) and description(s);
- j. Concern stated by customer; and
- k. Comment, if any, by dealer/technician relating to claim and/or repair.

Provide this information in Microsoft Access 2010, or a compatible format, entitled "WARRANTY DATA."

- 6. Describe in detail the search methods and search criteria used by Tesla to identify the claims in response to Request No. 5, including the labor operations, problem codes, part numbers and any other pertinent parameters used. Provide a list of all labor operations, labor operation descriptions, problem code and problem code descriptions applicable to the alleged defect in the subject vehicles. State the terms of the new vehicle warranty coverage offered by Tesla on the subject vehicles (i.e., the number of months and mileage for which coverage is provided and the vehicle systems that are covered). Describe any extended warranty coverage (options) that Tesla offered for the subject vehicles and state the number of vehicles that are covered under each such extended warranty.

- 7. Produce copies of all service, warranty, and other documents that relate to, or may relate to, the alleged defect in the subject vehicles, that Tesla has issued to any dealers, regional or zone offices, field offices, fleet purchasers, or other entities. This includes, but is not limited to, bulletins, advisories, informational documents, training documents, or other documents or communications, with the exception of standard shop manuals. Also include the latest draft copy of any communication that Tesla is planning to issue within the next 120 days.

which affects, or may affect the subject vehicle ride height, including, but not limited to, software or other programming modification/revisions. For each such modification, provide the following information:

- a. Detailed description of the modification;
- b. The reason(s) for the modification as it pertains to the alleged defect;
- c. The changes in vehicle ride height due to the modification;
- d. Whether the modification was incorporated into vehicle production, and is so, the date it was incorporated;
- e. Whether the modification was introduced (released) as a service update for consumer owned subject vehicles, and if so:
 - i) The date the modification was released;
 - ii) The number of subject vehicles available for updated (i.e., how many were produced to the original/unmodified condition);
 - iii) The number of consumer owned vehicles that have been modified/upgraded to date; and
- f. Description of how the service update is applied (the procedure or method used to make the modification) to an affected vehicle.

Also, provide the above information for any modification or change that Tesla is aware of which may be incorporated into vehicle production, or as a service update, within the next 120 days. Describe in detail all possible consequences to the subject component that damages the battery. Describe in detail how these possible consequences were addressed in the design of the subject vehicle and the limits of that design to prevent damage to the propulsion battery, stalling and fires.

- 12. Furnish Tesla's assessment of the alleged defect in the subject vehicle, including:

- a. The causal or contributory factor(s);
- b. The failure mechanism(s);
- c. The failure mode(s); and
- d. The risk to motor vehicle safety that it poses.

Legal Authority for This Request

This letter is being sent to Tesla pursuant to 49 U.S.C. § 30166, which authorizes NHTSA to conduct any investigation that may be necessary to enforce Chapter 301 of Title 49 and to request records and the production of things. It constitutes a new request for information.

Civil Penalties

Tesla's failure to respond promptly and fully to this letter could subject Tesla to civil penalties pursuant to 49 U.S.C. § 30165 or lead to an action for injunctive relief pursuant to 49 U.S.C. § 30163. Other remedies, and sanctions are available as well. The Vehicle Safety Act, as amended, 49 U.S.C. § 30156(a)(3), provides for civil penalties of up to \$7,000 per violation per day, with a maximum of \$35,000,000 for a related series of daily violations, for failing or

refusing to perform an act required under 49 U.S.C. § 30166. This includes failing to respond completely, accurately, and in a timely manner to ODI information requests. The maximum civil penalty of \$7,000 per violation per day is established by 49 CFR 575.6(a)(3). The maximum civil penalty of \$55,000,000 for a related series of daily violations of 49 U.S.C. § 30166 is authorized by 49 U.S.C. § 30165(a)(3) as amended by § 51203(a)(1)(B) of the Moving Ahead for Progress in the 21st Century Act, Public Law 112-141.

If Tesla cannot respond to any specific request, or subpart(s) thereof, please state the reason why it is unable to do so. If one has an attorney-client, attorney work product, or other privilege, Tesla does not submit one or more requested documents or items of information in response to this information request. Tesla must provide a privilege log identifying each document or item withheld, and stating the date, subject, the name and position of the person(s) from, and the person(s) to whom it was sent, and the name and position of any other recipient (to include all carbon copies or blind carbon copies), the nature of that information or material, and the basis for the claim of privilege and why that privilege applies.

Confidential Business Information

All business confidential information must be submitted directly to the Office of Chief Counsel as described in the following paragraph and should not be sent to this office. In addition, do not submit any business confidential information to the body of the letter submitted to this office. Please refer to PEI-3-007 in Tesla's response to this letter and in any confidentiality request submitted to the Office of Chief Counsel.

If Tesla claims that any of the information or documents provided in response to this information request constitute confidential commercial material within the meaning of 5 U.S.C. § 552(b)(4), or are protected from disclosure pursuant to 18 U.S.C. § 1905, Tesla must submit supporting information together with the materials that are the subject of the confidentiality request, in accordance with 49 CFR Part 512, as amended, to the Office of Chief Counsel (NCC-111, National Highway Traffic Safety Administration, Room WAI-227, 1200 New Jersey Avenue, S.E., Washington, D.C. 20590). Tesla is required to submit two copies of the documents containing allegedly confidential information (except only one copy of blueprints) and one copy of the documents from which information claimed to be confidential has been deleted. Please remember that the phrase "ENTIRE PAGE CONFIDENTIAL BUSINESS INFORMATION" or "CONTAINS CONFIDENTIAL BUSINESS INFORMATION" (as appropriate) must appear at the top of each page containing information claimed to be confidential, and the information must be clearly identified in accordance with 49 CFR 512.6. If you submit a request for confidentiality for all or part of your response to this IR, that is in an electronic format (e.g., CD-ROM), your request and associated submission must conform to the new requirements in NHTSA's Confidential Business Information Rule regarding submissions in electronic formats. See 49 CFR 512.6(c) (as amended by 72 Fed. Reg. 59434 (October 19, 2007)).

If you have any questions regarding submission of a request for confidential treatment, contact Otto Matzke, Senior Attorney, Office of Chief Counsel at ottomatze@dot.gov or (202) 366-5253.

Due Date

Tesla's response to this letter, in duplicate, together with a copy of any confidentiality request, must be submitted to this office by January 14, 2014. Tesla's response must include all non-confidential attachments and a redacted version of all documents that contain confidential information. If Tesla finds that it is unable to provide all of the information requested within the time allotted, Tesla must request an extension from me at (202) 366-0139 no later than five business days before the response due date. If Tesla is unable to provide all of the information requested by the original deadline, it must submit a partial response by the original deadline with whatever information Tesla then has available, even if an extension has been granted.

Please send email notification to Will Godfrey at will.godfrey@dot.gov and to ODI_Responses@dot.gov when Tesla sends its response to this office and indicate whether there is confidential information as part of Tesla's response.

If you have any technical questions concerning this matter, please call Will Godfrey of my staff at (202) 366-5231.

Sincerely,

D. Scott Yon,
Chief
Vehicle Integrity Division
Office of Defects Investigation

Consumer Reports' Tesla Model S P85D breaks—before testing begins

A broken power door handle is one of the most common Tesla problems

Last Updated: May 13, 2015 (02:15 PM)

One Tesla Model S P85D Breaks—Broken Door Handle

[Find Ratings](#)

Hyundai

Suzuki

Toyota

A new car shouldn't have problems when you've driven it for less than a month. Yet Consumer Reports' brand-new \$37,000 Tesla Model S P85D, with the fancy retractable door handles, refused to let us in, effectively rendering the car unusable. [Read "Why We Bought a Tesla Model S."]

After we'd owned the P85D for a mere 27 days, with just over 2,200 miles on the odometer, the driver-side door handle failed. The door handle was not in retract position and the door did not latch with the state of the car when they're not in use. What's up to the car while they do your driving, and the handle now fails to allow you to get in?

Except this time, the one on the driver's side door of our P85D didn't pop out, leaving no way to open the door from the outside. And significantly, the car wouldn't stay in Drive, perhaps maintaining that the door was open due to the latches on the door handle. We have observed other vehicles from this problem driving with a door open.

While far from the first Tesla owners to experience this problem, our car reliability survey shows that drivers and vehicles are the highest trouble areas with Tesla and that their Model S has far fewer than average rates of such problems.

Driver's side door handle is stuck.

FOR IMMEDIATE RELEASE:
June 23, 2009

Obama Administration Awards First Three Auto Loans for Advanced Technologies to Ford Motor Company, Nissan Motors and Tesla Motors

Washington, DC—Today, the Obama Administration announced \$8 billion in conditional loan terms to three automakers to support the development of advanced technologies.

Tesla Motors will receive \$450 million that will also advance electric vehicles. The first loan will finance a manufacturing facility for the Tesla Model S sedan. This vehicle demonstrates how the emerging electric car is becoming more affordable. The Model S is expected to be roughly \$50,000 cheaper than Tesla's first vehicle, the Roadster. The all-electric sedan consumes no gasoline and runs entirely on electricity from any conventional 120V or 250V outlet. It will get the equivalent of more than 250 miles per gallon, far exceeding the 32.7 mpg minimum efficiency required for large sedans. Production of the Model S will begin in 2011 and ramp up to 20,000 vehicles per year by the end of 2013. This integrated facility expects to create 1,000 jobs in Southern California.

\$\$ AWARDED TO TESLA TO DO NONE OF THE THINGS THEY SAID!!!!???

Tesla Motors will receive \$450 million that will also advance electric vehicles. The first loan will finance a manufacturing facility for the Tesla Model S sedan. This vehicle demonstrates how the emerging electric car is becoming more affordable. The Model S is expected to be roughly \$50,000 cheaper than Tesla's first vehicle, the Roadster. The all-electric sedan consumes no gasoline and runs entirely on electricity from any conventional 120V or 250V outlet. It will get the equivalent of more than 250 miles per gallon, far exceeding the 32.7 mpg minimum efficiency required for large sedans. Production of the Model S will begin in 2011 and ramp up to 20,000 vehicles per year by the end of 2013. This integrated facility expects to create 1,000 jobs in Southern California.

The second part of the loan will support a facility to manufacture battery packs and electric drive trains to be used in Tesla and in vehicles built by other automakers, including the Smart For Two city car by Daimler. This project demonstrates how Tesla's early technology will support electric projects at larger companies. Early pilot battery pack production will begin in 2011, reaching about 10,000 by 2013 and 30,000 packs in 2013. The new facility expects to employ 650 people in the Bay area of Northern California.

Ex-Tesla Execs Win Reinstatement Of Contract Claims

By Leigh Kamping-Carder

Law360, New York (May 06, 2011, 8:05 PM ET) -- A California appeals court on Thursday dismissed the defamation claims of two Tesla Motors Inc. executives fired in a round of layoffs in 2008 but reinstated claims that the electric-car maker breached a stock options agreement.

Statements Tesla made about a group of 26 fired employees were clearly opinion, not fact, and did not name former Director of Communications David Vespremi and former Chief Information Officer Gene Gaudell directly, entitling the company to free speech protections, the appeals court ruled.

Vespremi and Gaudell joined Tesla in...

ADVANCED TECHNOLOGY VEHICLES MANUFACTURING LOAN PROGRAM

The U.S. Department of Energy's Advanced Technology Vehicles Manufacturing Loan Program (ATVMLP) was established under Section 136 of the Energy Independence and Security Act of 2007. Its purpose is to arrange loans from the U.S. Department of Treasury's Federal Financing Bank to eligible manufacturers of advanced technology vehicles (ATVs) and ATV components. This memorandum provides guidance to ATVs.

GUIDANCE FOR APPLICANTS TO

ADVANCED TECHNOLOGY VEHICLES MANUFACTURING LOAN PROGRAM

b) **Financial Viability.** The applicant must be financially viable without the receipt of additional federal funding for the proposed project other than the ATVMLP loan. This requires a determination by the ATVMLP that (i) there is a reasonable prospect that the applicant will be able to pay principal and interest as and when due under the ATVMLP loan and (ii) the applicant has a net present value that is positive, taking all costs, existing and future, into account. 10 CFR 611.100(c) sets forth some of the factors considered by the ATVMLP in determining the applicant's financial viability.

2) **Eligible Project.** The proposed project to be financed with the ATVMLP loan must consist of either (1) the reequipping, expanding or establishing of a manufacturing facility located in the United States which will produce ATVs or ATV components or (2) engineering integration performed in the United States for ATVs or ATV components.

3) **Certifications.** The applicant must make the following certifications:

a) I, [REDACTED] (Name), [REDACTED] (Title), certify that this application does not contain any false statements or representations.

b) I, [REDACTED] (Name), [REDACTED] (Title), certify that the proposed project will not result in any significant environmental impact.

c) I, [REDACTED] (Name), [REDACTED] (Title), certify that the proposed project will not result in any significant economic impact.

d) I, [REDACTED] (Name), [REDACTED] (Title), certify that the proposed project will not result in any significant social impact.

e) I, [REDACTED] (Name), [REDACTED] (Title), certify that the proposed project will not result in any significant cultural impact.

f) I, [REDACTED] (Name), [REDACTED] (Title), certify that the proposed project will not result in any significant political impact.

4) **Eligible Costs.** The ATVMLP loan can only be used to reimburse the applicant for (i) costs that are reasonably related to reequipping, expanding or establishing a manufacturing facility in the United States or (ii) costs of engineering integration performed in the United States. Such costs cannot have been incurred before substantial completion of the application. The ATVMLP loan cannot be used to reimburse the applicant for costs associated with vehicle variants that are not ATVs.

5) **Fees.** At the financial closing date, the applicant must pay a fee equal to 0.1% of the principal amount of the ATVMLP loan. The ATVMLP may also require the applicant to pay certain customary administrative or collateral agency fees.

6) **Letter to an applicant that is an ATV component manufacturer.** The applicant must demonstrate to the satisfaction of the ATVMLP that the ATV component will be installed in an ATV.

CRONY PAYOLA SCHEME

Capitalism 2015: In corporate finance today, the theme is "Go where the money is." For Elon Musk, CEO of Tesla, SolarCity and SpaceX, the place to hunt for cash isn't Wall Street or even Silicon Valley. It's Washington, D.C.

Lattice Energy LLC

Key take-aways

- ✓ In July 2010, Lattice began to issue public warnings about thermal runaway risks with large, scaled-up Lithium-based battery packs; on Slide #54 in an August 6, 2013 Lattice presentation subtitled "A Fool's Paradise" we questioned whether Tesla's engineering had solved problematic runaway issues, or whether they had just been lucky - so far
- ✓ October 1, 2013 fire incident (really a form of battery runaway) with Tesla Model S that occurred near Seattle, WA suggests that they had merely been lucky to date — battery thermal runaway issues have not yet been truly solved by Tesla Motors or anyone else
- ✓ As seen in the progression of news stories quoted from herein, Tesla began the news cycle by trying to assert that the battery pack had nothing to do with the hot fire that consumed the front end of a \$70,000 car. By Wednesday evening they finally admitted that the battery was in fact the culprit, but that the incident had been triggered by the vehicle's impact with "metal debris" that had been lying on the road surface and that consequent mechanical damage to battery cells triggered the thermal runaway fire event; they are emphatically asserting that the battery did not catch fire spontaneously
- ✓ While Tesla's theory of the incident is plausible, it is inconsistent with statements made by the highway patrol officer — trained to be keenly observant — who first investigated the accident scene and found no evidence whatsoever of any claimed "metallic debris"
- ✓ Unless conclusive physical evidence is revealed that proves otherwise, Lattice believes it is more likely that the fire was caused by a spontaneous heat-event inside the battery

Thermal runaway severity varies in Lithium-based batteries

"Garden variety" thermal runaways:

- Temps: ~300° C up to 600° C (Lattice's criteria)
- Reasonably well understood failure events
- Triggered by substantial over-charging or excessively deep discharges of Li batteries
- Triggered by external mechanical damage to battery cells, e.g., crushing, punctures; growth of internal dendrites pierces plastic separators

Field-failure thermal runaways can also include electric arc internal shorting:

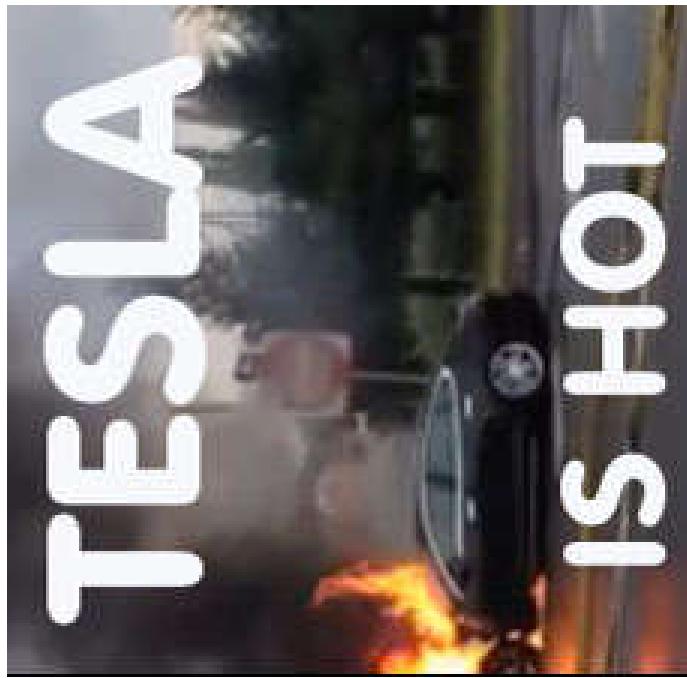

- Temps: > 600° C - can go up to thousands of ° C with arcs
- Much rarer and comparatively poorly understood by industry
- Many believe triggered and/or accompanied by electrical arc discharges (internal shorts); what causes initial micro-arcs?
- Much higher peak temperatures vs. garden variety events
- Lattice suggests: super-hot low energy nuclear reactions (LENRs) could well be initial triggers for some % of them

YET ANOTHER WAY TO SET YOUR TESLA ON FIRE!

YET ANOTHER WAY TO SET YOUR TESLA ON FIRE!

required to meet certain conditions before the loan commitment will require Solyndra to meet an equity commitment as well as other conditions prior to closing. Today's action signals the Department's intent to move forward with Solyndra's application for \$535 million loan guarantee provided the company meets its obligations before offering a conditional commitment. DOE takes significant steps to ensure its role as a proxy mitigated for each project prior to approval for closing of a loan guarantee. The Department performs due diligence on all projects, including a thorough investigation and analysis of each project's financial, technical and legal strengths and weaknesses. In addition to the underwriting and due diligence process, each project is reviewed in consultation with independent consultants.

Secretary Chu announced last night to have the first conditional commitments out by May 12, months into his tenure - but today's announcement signifies that Secretary Chu exceeded the Department's loan team for their work accelerating the process to offer this conditional commitment in less than two months, and the speed at which this Department can operate when barriers to success are removed.

Obama Administration Offers \$535 Million Loan Guarantee to Solyndra, Inc.

Investment Could Lead to Thousands of New Jobs

For Immediate Release
March 20, 2009

Washington, DC – Energy Secretary Steven Chu today offered a \$535 million loan guarantee for Solyndra, Inc. to support the company's construction of a commercial-scale manufacturing plant to produce cylindrical solar photovoltaic panels. The company expects to create thousands of new jobs in the U.S. while deploying its solar panels across the U.S. and around the world.

"This investment is part of President Obama's aggressive strategy to put Americans back to work and reduce our dependence on foreign oil by developing clean, renewable sources of energy," Secretary Chu said. "We can create millions of new, good paying jobs that can't be outsourced. Instead of relying on imports from other countries to meet our energy needs, we'll rely on America's innovation, America's resources, and America's workers."

Secretary Chu is moving aggressively to accelerate important Department of Energy investments that can create jobs and transform the way America uses and produces energy. This allows the Department of Energy to offer its first loan guarantee within the first two months of the Obama Administration. This loan guarantee will be supported through the President's American Recovery and Reinvestment Act, which provides tens of billions of dollars in loan guarantees authority to build a new green energy economy.

Solyndra's photovoltaic systems are designed to provide the lowest installed cost and the highest solar electricity output per commercial industrial and institutional roof type, which are a vast, underutilized resource for the distributed generation of clean electricity. Solyndra's proprietary design transforms glass tubes into high performance photovoltaic panels which are simple and inexpensive to install. By replacing power generated from fossil fuel sources, the electricity produced from the solar panels will reduce emissions of greenhouse gases.

Based in Fremont, CA, Solyndra is currently ramping up production in its initial manufacturing facilities. Once finalized, the DOE loan guarantee will enable the company to build and operate its manufacturing processes at full commercial scale.

Solyndra estimates that:

- The construction of this complex will employ approximately 3,000 people
- The operation of the facility will create over 1,000 jobs in the United States
- The installation of these panels will create hundreds of additional jobs in the United States
- The commercialization of this technology is expected to then be duplicated in multiple other manufacturing facilities.

Secretary Chu is offering the loan guarantee by signing a "conditional commitment" today, following approval this week by the Department of Energy's Credit Review Board. Just as homebuyers who have been approved for a loan are

Re: Tesla model-s-still-loses-power-while-turned-off

What interests me most is that the 23-25 mile loss overnight the writer of the article mentions is in line with what the NY Times mentioned and yet Musk claimed it wasn't so. It's recently been "improved" to a 15 mile loss, but that's still substantial.

Others have pointed out the loss overnight and were pooh-poohed by Silicon Valley types claiming biased reporting. But it seems there is a problem and losing 20 or so miles overnight could be the difference between getting home and getting stranded.

As others have noted, who has not been a secret every Tesla owner loses about this. Since I have never had a car seat and my own experience has been reduced to about 5kW/h and they are not doing anything within the last update that has been reduced to about 5kW/h and they are not doing anything yet.

I think the idea of it being a "secret" comes from the fact that this is a weakness that the general media doesn't cover. Not yet anyway. I think if it were common knowledge that every Tesla born is like plugging in a couple of incandescent light bulbs forever whether you use the car or not, its reputation might be just a little less rosy. Lord knows if it were the Volt with this kind of issue, it would be top headlines on the hour on Fox News.

You may know this author better than I, but I didn't see any evidence that he used an inaccurate methodology. He was very vague about how much was done, and acknowledged that he could use a larger sample size to draw more accurate conclusions. Rather, it seems to me it's your claim that the test results reduce credibility. I'm not sure I could use some evidence. I certainly wouldn't take it from a Tesla fan or a Tesla employee, with a handful atomic commas, common questions about its margin. And this kind figure seems directly in contradiction to the author's findings by a wide margin.

IMO, a lot of time has passed with a known and significant issue (actually a set of related issues it seems), and despite promises and a concerted effort, what seems like it should be an eminently solvable problem hasn't been solved at all. As someone who's worked in IT for 30 years, if I were in charge of R&D there, I'd be feeling like I should maybe offer my resignation. There is a tendency to look at Tesla with rose-colored glasses, something I'm seeing even in this thread, and IMO this issue is potentially more of a problem for Tesla than the recent spate of road-incident fires.

Original Post by McEnergyCar @ How many kWh per day does a plugged in Tesla draw? 27 What amount are we talking about here? Thanks...

McEnergyCar

According to the article, he's seeing an average of 3.5 kWh per day after the latest software update.

I love my 2011 Model S. It's called "moulin mode". Works great for my long distance trips. I personally don't consider Tesla vehicles as green. From 10,000 miles of rear 21 tires to more kWh per mile than other cars to the excess power from the motor and far too large a battery subsystem. Add to that the vampire drain and it just isn't conservative enough for my taste.

Tesla with this. To me the Tesla is less of a green automobile and more of a wasteful alternative fuel sports car.

Tesla model-s-still-loses-power-while-turned-off

The Tesla Model S, for all its technical and design artistry, has a dirty little secret: the [car](#) has a substantial appetite for kilowatt-hours even when turned off and parked. Since the Model S was introduced in 2012, this "vampire" power drain from the [cars](#) sold so far has consumed roughly 15 gigawatt-hours of electric energy, nearly a day's output for a mid-size nuclear power plant. It's enough wasted energy to drive the cars 50 million miles.

After nine months of promises to fix it, Tesla finally sent out a software update a week ago to the Model S fleet that it claims "significantly reduces power usage when (the car is) shut down."

But based on a week's worth of measurements on my 60-kWh Model S, I've concluded that the new software is only mildly effective.

As far as I can tell, the vampire's fangs are still sharp.

Wasted power

Shortly after taking delivery of my Model S last February, I noticed that I would typically lose 10-15 miles of indicated range overnight. On average, I was losing 23 miles of indicated range every 24 hours.
