

The Deadly Danger Of Electric Cars

Senators Dianne Feinstein, Harry Reid, Nancy Pelosi, Kamala Harris and their associates own the stock in Tesla Motors and/or its suppliers and mining companies and they cover-up and halt investigations and laws designed to save the public. They, and their crony's, spend over \$1B a year to shill and troll hype about lithium ion batteries and cover-up the dangers. Lithium ion EVs are more prone to battery fires. Experts say that their lithium-ion batteries can fuel hotter fires that release toxic fumes and are more difficult to put out. Lithium ion fires keep reigniting which explains why it takes so long and requires copious amounts of water or foam (it is an electric fire, after all) to smother the flames. Tesla employee Bernard Tse and his team warned Elon Musk about these dangers in 2008 and they got fired and/or warned to "say nothing" by Musk. Three top Tesla engineers died in a plane crash next to Tesla offices in San Carlos after two of them agreed to become whistle-blowers.

Tesla is the main reason why lithium ion batteries are banned from airplanes. Lithium ion batteries are the most dangerous kind of battery on Earth. You can not have them in your checked or carry-on luggage and they must be shipped via ground only. Lithium ion batteries are so dangerous, that the US Department of Transportation bans them from any passenger plane. The US Federal Aviation Administration (FAA) has issued a ban on lithium ion batteries in all cargo holds and checked bags and they must travel as "regulated articles" (i.e. as cargo) on all passenger aircraft. The FAA says:

"The risk of a lithium-ion battery overheating and starting a fire is a threat to both people and the aircraft. If a battery starts a fire, there are not many options for a crew to put it out, as these fires burn at extremely high temperatures. These temperatures are high enough to trigger the use of fire extinguishing halon gas, which is prohibited in all aircraft because it damages the ozone layer. In addition, lithium-ion batteries also contain flammable electrolyte, making it very difficult to control the fire."

Tesla and its cronies are killing the people who love nature and are trying to save it and all of us. This is not an anti-green car thing, it's an anti-murder thing. The EV is a scam. It is an extension of the oil and coal industry into the future with the goal of destroying our health and the environment and our future and freedom. They are using their profits and power to enslave humanity. They will do anything to kill the opposition. It's not about "global warming", it's about the global murder. They have no morals.

The EV is the worst invention in human history. It is the greatest mistake that has ever been made and it will destroy our future, liberty, and the Earth. The EV will make the internal combustion engine look like a tiny, harmless, polluter by comparison.

Tesla, GM, Ford, Nissan, and their crony's have used their profits and influence and power and bought or bribed almost every government and law enforcement agency and have killed or silenced and discredited the opposition.

You have to have a PhD in physics or materials science engineering and a lot of time to understand the dangers of lithium ion batteries. Most of the experts who warned about the dangers of lithium ion batteries are either dead or discredited or in hiding. Tesla, GM, Ford, Nissan, their shareholders and shills are using the "consensus" fallacy. They are telling you that if a few hundred or thousand so-called experts say the batteries are safe then it must be true. The EV is a lie.

It's time for humanity to wake up. It's time to start fighting back against the global, fascist, murderous, EV scam. The EV will kill millions of people and the Earth. There is only one way to fight back, to save ourselves, and the environment, and that is by fighting the EV with the truth.

We need a mass awakening. We need people everywhere to start fighting back. We need the world to unite against the EV scam.

Tesla's CEO Elon Musk and his shareholders and shills are killing us. They are the biggest terrorists on Earth.

Tesla, GM, Nissan, and Ford have all bought and bribed and killed and silenced and discredited the opposition and the evidence.

We have to expose the truth.

The EV will destroy us and the Earth.

Tesla, and other electric car manufacturers, are using their profits and their cronies, to try and pass laws, and take away our freedoms, and force us to drive, and live, in deathtraps.

These laws and regulations will not only destroy our lives, and freedom, but they will also kill billions of people around the world.

It is time for us to take a stand, it is time to start fighting back.

We have to tell the truth, we have to unite, and we have to stop the EVs.

Tesla, GM, Nissan, and their shareholders and shills, are using their profits and their cronies, to force this upon us, and it will lead to the destruction of humanity.

Tesla is killing the Earth.

The EV will kill everyone.

Elon Musk is a psychopath.

GM, Ford, and their cronies, are all psychopaths.

EVs will be the death of the human race.

It is time for all of us to wake up.

We have to stand together, we have to fight back, and we have to stop the EV scourge.

We have to unite, we have to tell the truth, and we have to save the Earth and the future.

Tesla's CEO, and the rest of the criminals, are killing us.

If you know someone who owns or drives a Tesla, please warn them, please try to save their life.

Tesla's cars are dangerous, they will kill the owner and everyone around them.

Tesla, GM, Nissan, their shareholders and shills, have lied and bribed and silenced and discredited the opposition.

EVs will kill everyone, they will kill the Earth, and they will kill our future.

We have to tell the truth, we have to fight back, we have to unite, and we have to stop this insanity.

Tesla's cars are the most dangerous car on the road, and the most dangerous invention in history.

GM, Nissan, and their shareholders and shills, will kill you.

GM, Ford, and their shareholders and shills, will kill you.

We have to tell the truth, we have to take a stand, we have to unite, and we have to stop the EV madness.

We have to tell the whole world the truth, and we have to stop the EV's.

EVs are killing the world, they will kill everyone, and they will kill the Earth.

The EV is a lie, it will not save the planet, it will kill everyone.

If you have a Tesla or are thinking about buying one, please be aware that you are putting your life and the lives of everyone around you at risk.

Do not buy a Tesla, the EV will kill you and your family.

If you own or drive a Tesla, you are putting everyone's lives at risk, including yours.

Please get rid of your Tesla, do not drive it, and do not allow anyone else to drive it.

Please take action now, before it is too late.

If you know someone who is planning to buy or already owns a Tesla, please warn them, and please urge them to get rid of their car immediately.

Please spread the word, and help to raise awareness, and let's work together to stop the EV madness.

Thank you.
