EVERYONE IS USING DIGITAL AND SURGICAL FACE MANIPULATION ON DATING SITES. YOU WILL NEVER MEET THE PERSON THAT YOU SEE IN THE DATING SITE PHOTOS

Why does social engineering work so well? Because it involves humans and emotions. Match.com used social engineering to convert unsuspecting users into paying members. The social costs and damage to Match's reputation will likely be long-lasting. In fact, in a 2018 survey, 81% of respondents stated they would lose trust in a brand if the product or service didn't live up to the company's promise and 78% due to a poor customer service experience[1]. Consumer trust is sacred. Maintaining this trust includes always practicing high-quality.

Internet dating sites abuse their users in the most horrific ways. They now all share their 'ai' software and databases and that means that they share all of the scammers, AI bots, sex solicitors, players, cheaters poly, and tons of green card scamming 3rd world country profiles that EVERY SINGLE ONE OF THEM IS NOW INFESTED WITH!

EVERY, internet dating site is now a fake profile-based, privacy harvesting, political spying, computerized scam service operating off of your emotional vulnerability in order to profit off of your basic needs.

Online dating companies are fraud companies. They purchased a AI, and that is for manipulating you and getting you to go through the rat maze as they want you:

<https://ir.mtch.com/news-and-events/press-releases/press-release-details/2021/Match-Group-Closes-Acquisition-of-Hyperconnect/default.aspx>

All the naive people on hinge think its people from outside creating these "model" profiles. Its match group themselves:

<https://finance.yahoo.com/news/hinge-user-questions-whether-weird-211426431.html>

Instead of using their advanced algorithms to keep the platforms friendly and clean, they purposely do this.

<https://posting.cc/PLR8bsWx>

In the modern world, there is no way to meet singles without the internet and corporate exploiters like IAC, Inc., Match Group and other 'corporate vagina vultures' knowing that they can openly sucker you, in plain sight, and get away with it. In America, the FTC, and other agencies, never punish them because they pay politicians big bribes. President's family members and staff own stock in these companies.

[AI can steal your passwords by listening to you type!](#)

People that work at dating site companies are either out-sourced data entry contractors from Asian regions and/or college age kids with no comprehension of how life really works. They are usually bored at work so they read all of your emails and text messages. If you mention something political that goes against their zealotry then you get your sexier potential dates replaced with fat people or you get your profile shadow-banned. In fact, if you mention anything that one of these influencer-beholden, naive, worker bees does not agree with, you get shit-listed. Just remember this: if you typed it on a dating site, it is archived and searched on all the dating sites shared databases FOREVER!

Corporate Dating Sites Exist To Data Harvest You.(caption)

Many people find that Match.com and big corporate dating sites are a stain on humanity and a cancer on the internet. Match.com and big corporate dating sites are sometimes digital sex traffickers, exploiters of emotions and a data rapists. The Match.Com bosses are known to bribe politicians and lobby the FTC to keep from getting shut down.

Match.com and it's affiliates are the worst of the bunch. They need to be put out of business forever. They needs to be sued by each member of the public that used the site. The company also needs to be sued by the FTC, The FEC, The DOJ, The FCC and various class action citizen groups. Match.com sends your most intimate and private data to political fronts, marketing companies and government spy agencies.

Match.com, and it's corporate clone sites, are corporate political honey-traps designed to harvest your data, emotions, psychological and political profiles at your expense. You are being raped when you use Match.com.

This book details the 100% legal spy agency tactics and legal tools to put evil Match.com out of business. If you care about doing good, then you want to undertake these efforts to exterminate Match.Com.

Match.com does not care about you, your social life or your personal needs. They care about spying on you for their political and corporate bosses. They know you are addicted to sex and social connection. They exploit those universal emotional needs for profit and social manipulation.

This book goes beyond "who pays for the meal", and delves into the sinister political and social crime base that Match.com covertly exploits around the globe. You have to really want to know why U.S. Senators are involved in sex sites:

Sorority Girls Are Viewed As "Baby Ovens" By Stanford University Chads.(caption)

Every word, every text message, every mouse click, every mouse direction, all of your audio and video...everything...is being harvested to harm you on Match.com. Every image you post on Match.com is harvested by many parties and cross checked across the internet to find all of your other social media sites, bank records, medical records, traffic camera shots and other things you don't want the world to see.

Match.com's dating corporation knows that you are trapped. Those corporations have no souls. They see you as data cows to be harvested for government agencies, political parties, competitor research and marketing manipulation. Any picture you upload on Match is instantly cross checked across face scan databases globally, using the same software that the FBI, CIA, DEA, IRS and NSA use. By joining Match, you just said "Here I Am" to every investigator, hacker, collection agency, marketing service and enemy you could ever want to avoid.

Today, a single one of your images on Match.com is being scanned by software called "ClearView ai", "Yandex image tracker", "Google Image Bot" and the Chinese secret police. Within 10 minutes of capturing your image off of that dating site, their computers assemble every bank record, medical record, lawsuit, property ownership record, complaint about you and every other dirty detail about you that you never wanted made public.

It is not just big spy-guys that scan your Match.com profile; Any 14 year old with a notebook computer can do this. In this book, you will see details of thousands of such technologies, in use today, that can end your life and social standing tomorrow.

This is the information they never told you in main stream news. This is how to protect yourself from Match.com.

[caption id="attachment_245918" align="center" width="194"]

GOLD DIGGERS ARE EVERYWHERE ON DATING SITES(caption)

As proven by scientific statistics, a majority of the "people" you will encounter on Match.com dating sites are: 1.) Russian scammers, 2.) Guys pretending to be girls, 3.) Robotic software seeking to scam you, 4.) Narcissists, who will never meet you in-person, seeking self-validation, 5.) Sex workers, 6.) Gold diggers, 7.) Free dinner seekers, 8.) Recently broken-up people who are addicted to their past partner and will, eventually, go back to them, 9.) Oxytocin brain chemical junkies, 10.) Single parents looking for a new person to pay the mortgage, 11.) Trans-sexuals trying out their look to see if they can fool you, 12.) Marathon daters going out with a different person every night to see which one can buy them the best dinners and show tickets and other non-qualified subjects.

This collaboratively edited book was created by the public to educate the rest of the public. It will horrify you, shock you, amaze you, enlighten you and clearly illuminate the fact that Match.com is truly breaking all of the rules of morality.

[video width="320" height="180" mp4="https://topinfo.us/wp-content/uploads/2023/08/Beware-of-Fake-Dating-Profiles_low.mp4"]

Most people that sign up for Match.com, or it's clone online dating sites, cancel it within a few weeks because of the trauma of trying to wade through the terrible things that happen to users of the system.

Every Match.com online dater is looking for: marriage, sex, free food, money, social revenge, distraction, entertainment, narcissistic validation, arm-candy, friends, a baby-daddy or related goals. The corporation, though, behind Match.com, is only looking for one thing: Your digital and political data.

Let's take a deeper look at Match.com as our writers go deep under-cover inside Match (including working undercover in their offices) ...

Who is Match.Com?

Match calls itself an "online dating service", but it is really a spy operation, with web sites serving over 50 countries in twelve languages.[citation needed] Its headquarters are in Dallas, Texas. The company has offices in Dallas, West Hollywood, San Francisco, Tokyo, Rio de . The Match consortium sells it's data to the CIA, FBI, NSA, IRS, DEA and DNC via Axiom and other data brokers. The USPS social media surveillance service uses it to hunt political party members who oppose the Obama Administration.

While you may know that Chelsea Clinton is part of it, the whole tale is much more sordid.

In 1993, Match.com was founded by Gary Kremen and Peng T. Ong in San Francisco.[2][3][4] At the beginning, Match.com was the name of the website, while the company that operated it was formally named Electric Classifieds Inc.[2] Early on, Kremen was assisted by Ong and Steve Klopff, who helped in the design of the initial system, and Simon Glinsky, who co-wrote its business plan, developed product designs including matching criteria, services to LGBT communities, created business models and rollout marketing strategies and made early hires.[5] Fran Maier later joined the company as its director of marketing.[5] According to a retrospective from The Atlantic, Maier helped to implement Match.com's business strategy, which included a subscription model and the inclusion of diverse communities, including women, technology professionals, and the lesbian, gay, bisexual, and transgender communities.[5] Match.com went live as a free beta in early 1995, and was first profiled in Wired magazine that same year.[4][2]

Gary Kremen and Steve Klopff are shown in California public records as 2544 Re, LP which is a California Domestic Limited Partnership filed On April 13, 2007. The company's filing status is listed as Active and its File Number is 200710300012.

The Registered Agent on file for this company is Steve Klopff (Later with the highly sexually driven IDEO design group, where staff members sleep with each other) and is located at 23 Jules Avenue, San Francisco, CA 94112. The company's mailing address is 23 Jules Avenue, San Francisco, CA 94112.

The company has 2 principals on record. The principals are Gary Kremen from San Diego CA and Steve Klopff from San Francisco CA. Gary Kremen was marketing SEX.COM.

From it's very roots, perversion and dirty money fueled the fires.

David Lawlor published a report about how the sick story of early Match.com as Sex.com reads like a bad Hollywood movie script.

The California public records record:

"Kremen, Father & Partners, LLC is a California Domestic Limited-Liability Company filed On May 13, 1999. The company's filing status is listed as Canceled and its File Number is 199913710035. The Registered Agent on file for this company is Philip Father and is located at 50 California St, Ste 2000, San Francisco, CA 94111. The company's principal address is 50 California St, Ste 2000, San Francisco, CA 94111...."

The company has 2 principals on record. The principals are Gary Kremen from San Francisco CA and Philip Father from San Francisco CA." Philip Father And Gary Kremen had a Victorian building on 3rd Street in the Portrero Hill neighborhood in San Francisco, not far from Nancy Pelosi's "Goat Hill Pizza". All of their files got leaked. So the story goes...

Boy gets domain name, boy loses domain name, boy gets domain name back. Add in millions of dollars flying about, a possible run-in with Mexican authorities and, naturally, a climactic courtroom finale.

But real life is always stranger than fiction, and the case of Gary Kremen versus Stephen Michael Cohen et alia is no different. No movie could fully reveal the oddities and quirks of the case of the disputed Sex.com domain name. A trial in a San Francisco court Thursday will bring the two men together, both hoping for very different endings to the tale.

The story begins in 1994 when Gary Kremen registered the name Sex.com with domain name registrar Network Solutions (NSOL), for free and without any official contract -- the way things were often done in the early days of the Web. At the time, the Internet was in its infancy -- Amazon.com (AMZN: Research, Estimates) was still a year away. After successfully launching the online dating service Match.com, Kremen turned his entrepreneurial attention to Sex.com. He hadn't developed a Web site to accompany the Sex.com nomenclature immediately after registering it. The domain name had sat empty.

While Kremen was busy developing his online dating service and registering Sex.com, Stephen Michael Cohen sat in federal prison serving a 42-month sentence for bankruptcy fraud. The prior felon had orchestrated a number of impersonation and deception schemes in the past. Cohen finished his bankruptcy fraud term in February 1995, and left federal prison.

Then the tale's first plot twist began. In October 1995, Network Solutions received a letter from a company called Online Classifieds Inc. stating that control of the Sex.com domain name was to be turned over to Cohen. The writer of the letter is listed as Sharyn Dimmick.

Dimmick, who was Kremen's roommate until April 1995, did not know Cohen, says Kremen's lawyer Pamela Urueta of San Francisco-based Kerr & Wagstaffe LLP.

Network Solutions obliged and transferred control of the domain name to Cohen.

Following the transfer, Online Classifieds Inc. informed Network Solutions that all correspondence would have to take place via mail or telephone -- because Online Classifieds Inc. did not have Internet access, Urueta says. Online company, no Internet access.

Following the transfer, Cohen developed the Sex.com Website and turned it in to a multimillion dollar venture. How many millions? It's hard to tell, because Cohen has refused to supply the court with accounting information for the Web site.

But the online pornography sector averaged \$2.7 million per day in earnings in 1999, according to a U.S. House of Representatives report. The Internet pornography industry also represents the most consistently successful e-commerce product on the Web.

However, despite the huge amount of cash the Web site was generating, something was rotten in the land of online titillation. Kremen learned from a friend that Sex.com was operating as a pornographic Web site, he says. Attorneys were called, a lawsuit was filed, and the most bizarre domain name battle in the Internet's short history began.

The first item in question was the letter written to Network Solutions with Dimmick listed as the author. Urueta believes Cohen saw the Internet was becoming a global phenomenon after his release from prison and decided Sex.com could be a lucrative domain name on which to base a business. After finding the name was already taken, Urueta says, Cohen decided to deceptively gain control of the Web property.

She contends that Cohen forged the letter after learning who Dimmick was, as the first step in his plot to take over the domain name. Cohen's lawyer, Robert Dorband of the law firm DuBoff Dorband Cushing and King in Portland, Ore., says Cohen did not forge the letter.

In the end it didn't matter who authored the transfer memo, because in November 2000, the U.S. District Court in San Jose found the letter was fraudulent and therefore the transfer of Sex.com from Kremen to Cohen was void. Sex.com was Kremen's again.

But Cohen argued that the letter and the court's view was irrelevant. He now claimed Sex.com was his before Network Solutions received the letter from Dimmick. In fact, Cohen said he had been using the Sex.com name as long ago as 1979.

Before heading to federal prison, Cohen had run a bulletin board for swingers and operated it from 1979 into the 1980s. One of the areas on the bulletin board used the three-letter file extension ".com" and was preceded by the word "sex," Dorband says.

Trademark law does not require one to register a name to own it, but simply to use the name for a period of time. Citing that law, Cohen claimed that since he had used the term Sex.com since 1979, the moniker was his. The judge didn't buy it.

For Kremen, the only matter remaining now was the amount of money he should be rewarded from the Web site's earnings while under Cohen's leadership. At the November 2000 hearing, Judge James Ware ordered Cohen, along with two other corporate defendants, to place \$25 million in the court's control, pending final judgment and assessment of damages. The judge also ordered Cohen not to transfer any assets.

It's a very strange case. Kremen was big with the Jerry Brown and Gavin Newsom crew and set about pitching himself as a "Green Energy Guru" for Sacramento. Steve Klopf got a job at IDEO Design after that gig, where his bosses have asked staff not to mention the SEX.COM thing.

In defiance of those two orders, Cohen did not place \$25 million in the court's bank and did transfer money to accounts outside of the United States, says Urueta. She adds that Cohen has been sending money to banks in Luxembourg and other such countries for some time in order to avoid seizure of his assets. Cohen's lawyer confirms that the \$25 million was not placed, and that money was transferred after the court order.

Cohen was held in contempt on March 5 for violating the court's orders and for failing to appear in court on another date. The judge's decision stemming from those violations will disallow Cohen to present evidence at the trial scheduled Thursday. The judge also issued a warrant for Cohen's arrest for failing to comply with court orders. Cohen could not be reached for comment. Network Solutions declined requests for an interview.

Gary Kremen "It's a very strange case," says Dorband. "It has some unusual characters, who really are more alike than they are different. I think if they [Kremen and Cohen] had met each other in some different forum they would actually be friends."

Since Kremen has regained control of Sex.com, he says he has toned down the nature of the content and may eventually shift the Web site's focus away from pornography and make it an educational property.

"I still need to figure out exactly what's going on with it [the Web site]," Kremen says. "But I don't really want it to be a porno site."

Dorband says the case sets no real precedent for future domain name battles.

"This whole case is really an anomaly," Dorband says. "Everything happened when, for a brief time, Network Solutions had no written agreement with its customers. Now, with contracts, you also have property rights to your domain name. If that would have been the case to start with, then who knows what might have happened in this situation."

Founder Kremen left the company in March 1996, after disagreements with venture capitalists.[6] In 1997, Match.com was purchased by Cendant, who then sold it to IAC in 1999.[7]

In September 2001, Match.com partnered with AOL and MSN, with the idea that Love@AOL and MSN Dating and Personals would allow a more diverse audience to gain access to Match.com.[8]

In 2002 and early 2003, Match.com's then CEO, Tim Sullivan, expanded Match.com into local dating with a service called MatchLive, where daters would meet in a public location for social activities and a form of speed dating.[9][10] In September 2004, Jim Salka replaced Sullivan as CEO.[11] Salka was replaced as CEO by Thomas Eraght-Mooney in 2007.[12][better source needed]

[caption id="attachment_245927" align="center" width="1024"]

Handsome woman complains that men don't like her masculine look[caption]

On November 10, 2005, a class action was filed by Matthew Evans against Match.com in federal court in Los Angeles alleging that Match.com employed fake members to send emails and go on dates with paying members. The suit was repudiated by IAC as baseless, and was later dismissed by the United States District Court for the Central District of California on April 25, 2007.[13] Similar suits were filed in June 2009 and December 2010, with the judges ruling that Match.com did not break user agreements.[14][15]

Do you see the trend here, yet? Match.com was forged in creepiness and built on slime-ball people with sinister motivations.

In January 2006, Match.com hired Dr. Phil McGraw as a celebrity spokesman.[16]

In February 2021, Match Group acquired Hyperconnect, a technology company based in Seoul, Korea, for \$1.73 billion.[17]

In February 2009, IAC incorporated Match Group as a conglomerate of Match.com and other dating sites it owned.[18] Also in February, it was announced that Match.com's European operations would be sold to Meetic for 5 million Euros and a reported twenty-seven percent interest in the company.[19] At the same time that this sale was announced, the current CEO Thomas Enrigh-Moony stepped down, while IAC's (Match.com's parent company) Executive VP and General Counsel, Greg Blatt, took his place.[20]

In July 2009, Match.com acquired People Media, which powered AOL Personals and operated BlackPeopleMeet.com and OurTime.com, from American Capital for \$80 million.[21] The following year, Match.com acquired SinglesNet, another dating site.[22] In December 2010, Match.com's CEO Greg Blatt was made CEO of parent company IAC.[20]

In 2012, Match.com bought OkCupid, and Sam Yagan, OkCupid's co-founder and CEO, became CEO of Match Group.[23] That same year, Match.com announced Stir, an events service that was to offer local events each month for Match.com members to attend.[24]

In April 2014, Match.com launched an updated mobile app with a feature called "Stream" which used location to match people based upon photographs, using similar algorithms as the mobile dating app Tinder.[25] The platform's membership auto-billing method has been criticized by customers for the lack of transparency.[26]

In 2017, Yagan was replaced by Mandy Ginsberg as the CEO of Match.com's parent company, Match Group.[27]

A woman claiming she was raped by another person she met on Match.com sued the site in 2011.[28] The woman and her lawyer wanted Match.com to start doing background checks on their users in order to prevent registered sex offenders from using the site. Match.com has responded that it would create many problems trying to get background information from all their users.[29] Days after the lawsuit was filed, Match.com announced that the site would begin screening new members.[30]

From 2011 to 2014, a man described by British police as a "sexual predator" contacted thousands of women through the website. He raped five of them. In March 2016 Derby Crown Court heard that four of the victims complained about the man to Match.com; one of the women was told that administrators could not do anything because he had not sent abusive messages through the site.[31][32]

IAC is an American holding company that owns brands across 100 countries, mostly in media and Internet.[2] The company is headquartered in New York City[3] and incorporated in Delaware.[4] Joey Levin, who previously led the company's search & applications segment,[5] has served as Chief Executive Officer since June 2015.[6]

IAC's largest shareholder, Liberty Media, exited the company in 2010, following a protracted dispute over the 2008 spinoffs.[54][55] Liberty traded its IAC stock for \$220 million in cash, plus ownership of Evite and Gifts.com.[54] On the same day, Diller stepped down as CEO, though he remained as chairman and Match.com CEO Greg Blatt was appointed to succeed him.[54] That same year, IAC acquired dating site Singlesnet[56] and fitness site DailyBurn.[57]

In January 2013, IAC acquired online tutoring firm Tutor.com.[58] On August 3, 2013, IAC sold Newsweek to the International Business Times on undisclosed terms.[59] On December 22, 2013, IAC fired their Director of Corporate Communications, Justine Sacco after an AIDS joke she posted to Twitter went viral,[60] being re-tweeted and scorned around the world.[61] The incident became a byword for the need for people to be cautious about what they post on social media.[62]

In 2014, IAC acquired ASKfm for an undisclosed sum.[63]

November 2015, IAC and Match Group announced the closing of Match Group's previously announced initial public offering.[64]

In May 2017, HomeAdvisor combined with Angie's List, forming the new publicly traded company ANGI Homeservices Inc. The company made its stock market debut in October 2017. In October 2018, the ANGI made its first acquisition of on-demand platform Handy.[65]

In July 2019, IAC made its largest investment ever in the world's largest peer-to-peer car sharing marketplace, Turo. Later that year, IAC acquired Care.com.[66] In December 2019, IAC and Match Group entered into an agreement providing for the full separation of Match Group from the remaining businesses of IAC.[67]

In January 2020, IAC withdrew its financial backing for CollegeHumor and its sister websites and sold the websites to Chief Creative Officer Sam Reich. As a result of the restructuring, more than 100 employees of CollegeHumor were laid off.[68] In February, IAC completed its \$500 million acquisition of Care.com.[69]

The Clinton Family own an interest in this operation. Anytime you are trying to date on Match.Com think about Chelsea Clinton and her Friend Ghislaine Maxwell ready your emails and texts on the Match.com servers. The people that work in the lower staff ranks at Match are generally high-strung leftists woke rights activists who are not old enough to have fully developed brains. They party in clusters in sports bar and loud music club scenes and reinforce a party culture. They are mostly female and embrace "influencers", "Instagram postings" and casual dating. They have a higher tatoo volume than the average corporation.

In July 2020, IAC and Match Group announced the successful completion of the separation of Match Group from the remaining businesses of IAC. As a result of the separation, Match Group's dual class voting structure was eliminated and the interest in Match Group formerly held by IAC is now held directly by IAC's shareholders. As of the separation, "new" IAC trades under the symbol "IAC" and "new" Match Group under the symbol "MTCH." [70]
In August 2020, IAC announced [71] it had invested a 12% stake in MGM Resorts International.

Match Group, Inc. is an American internet and technology company headquartered in Dallas, Texas. [2] It owns and operates the largest global portfolio of popular online dating services including Tinder, Match.com, Meetic, OkCupid, Hinge, PlentyOfFish, Ship, and OurTime totalling over 45 global dating companies. [3] The company was owned by parent company IAC and in 2019, the company had 9.283 million subscribers, of which 4.554 million were in North America. [1] In July 2020, Match Group became a separate, public company.

Match.Com and Attack service: Gawker Media/Gizmodo Media trade Staffer Ian Fette back and forth to share mass computerized political attack and political defamation tools developed at both outfits.

In February 2009, IAC incorporated Match Group as a conglomerate of Match.com and other dating sites it owned.[1][4] In July 2009, Match Group's Match.com acquired People Media from American Capital for \$80 million in cash. People Media operated dating sites BlackPeopleMeet.com and OurTime, which became part of Match Group's portfolio, and powered AOL Personals.[5]

In February 2010, Match.com acquired dating site Singlesnet.[6] In February 2011, Match Group acquired OkCupid for \$50 million. OkCupid was the first free, advertising-based product added to the Match Group portfolio.[7] In 2012, online dating application Tinder was founded within Hatch Labs, a startup incubator run by parent company IAC.[8] The application allowed users to anonymously swipe to like or dislike other profiles based on their photos, common interests and a small bio.[9] On November 19, 2015, the company became a public company via an initial public offering.[10]

In 2017, Match Group launched Tinder Gold, which established Tinder as the highest grossing non-gaming app globally.[8] In the summer of 2017, the company offered to acquire Bumble for \$450 million.[11] In January 2018, Mandy Ginsberg, formerly the CEO of Match North America, replaced Greg Blatt as CEO of the company.[12]

In June 2018, Match Group acquired 51% ownership in dating app Hinge.[13] The acquisition was intended to help diversify Match's portfolio and appeal to a wider array of singles. In February 2019, Match Group fully bought out the company.[14][15]

In July 2018, Match Group launched a Safety Advisory Council comprising a group of experts focused on preventing sexual assault across its portfolio of products. The council included #MeToo movement founder Tarana Burke and worked with organizations like the Rape, Abuse & Incest National Network (RAINN) and the National Sexual Violence Resource Center.[16]

In August 2018, Tinder co-founder Sean Rad filed a \$2 billion lawsuit against Match Group, claiming that Match Group and its parent company IAC purposely undervalued Tinder to avoid paying out stock options to the company's original team.[17] Rad and his co-plaintiffs also accused the former Tinder CEO, Greg Blatt, of sexual harassment.[18] The company said that the allegations are "meritless".[19] In October 2019, Blatt filed a defamation lawsuit against Rad and Tinder founding member Rosette Pambakian seeking at least \$50 million in damages.[20][21] In January 2019, Match Group partnered with media brand Betches to launch a dating app, called Ship, that allowed users to help their friends pick out potential dates.[22]

In August 2019, the company acquired Harmonica, an Egyptian online dating service.[23][24][25][26] In January 2020, Match Group announced an investment and partnership with safety platform Noonlight. The partnership incorporated new safety tools in Match Group's products, including emergency assistance, location tracking and photo verification.

In January 2020, Mandy Ginsberg stepped down as chief executive officer due to personal reasons.[27][28][29] Shar Dubey, then President of Match Group, became the CEO of the company effective March 1, 2020.[30][31] In March 2020, Match Group became the first tech company to support the Earn It Act of 2020, a bipartisan bill to combat online child sexual exploitation.[32]

In July 2020, the company completed the separation from IAC. The separation was the largest ever for IAC, as Match Group then had a market capitalization of \$30 billion.[33] After the separation, four new members joins Match Group's board of directors: Stephen Baily, Melissa Brenner, Ryan Reynolds and Wendi Murdoch.[34][35][36]

In August 2020, amidst the Covid-19 pandemic, Match Group reported growing profit and revenue and surpassed 10 million subscribers across its portfolio.[37]

In September 2020, Match Group joined others companies like Spotify and Epic Games to form the Coalition for App Fairness. The purpose is to combat Apple over its app store policies.[38][39]

In February 2021, Match Group announced that it would be acquiring Seoul, Korea-based social network company Hyperconnect for \$1.73 billion in both cash and stock.[40] This deal is reportedly Match Group's largest acquisition to date.

Also in February 2021, Match Group took legal action against dating app Muzmatch, the online Muslim dating app, calling the app a "Tinder Clone". [41]

In 2019, the company was sued by the U.S. Federal Trade Commission (FTC) for allegations of unfair and deceptive trade practices. According to the FTC's civil complaint, the company used fake love interest ads to encourage free users to pay for premium subscription services on Match.com. Accounts that were flagged as suspicious or potentially fraudulent by the site were prevented from messaging paid subscribers but were allowed to continue messaging free users who were tricked into believing that the suspicious accounts were real users encouraging them to subscribe and connect with them. The company denied the allegations. The FTC further alleged that the company offered false promises of guarantees, failed to provide support to customers who unsuccessfully disputed charges, and made it overly difficult for users to cancel their subscriptions, which Match Group disputed as cherry-picked and misrepresenting internal emails.[42][43][44][45][46] In September 2020, it was reported that the Department of Justice had closed its investigation into the FTC complaint.[47]

THE DATA-ABUSIVE DATING SITES YOU MUST AVOID AT ALL COSTS, AND SEEK TO BANKRUPT, ARE:

- Ablo

- Amoureux
- Black People Meet
- BLK
- Chispa
- Disons Demain
- Hawaya (formerly Harmonica)
- Hinge
- Lexa.nl
- Love Scout 24
- Match.com
- Meetic
- neu.de
- OkCupid
- OurTime
- Pairs
- ParPerfeito
- Plenty of Fish
- Ship
- Tinder
- Twoo

• And any other facades that these digital manipulators pop up with.
 You see, in reality, most internet dating sites are owned by the same crooked corporations and they should be PUT OUT OF BUSINESS. If not the exact same corporation, they are the same kinds of heartless corporate human manipulation machines. Do yourself and your friends a favor and file complaints about each of these dating sites at: <http://www.ftc.gov/complaint>

Here Is A Sampling Of What The World Says About Match.Com On The Internet

** When you post anything on Match.com, you activate over 100 companies around the globe that scan every single dating and social media site, every few minutes, for new profiles and harvest the posted photos. Your photos are instantly compared, via AI software and massive computer arrays, with every social media site (ie: Facebook, LinkedIn, Google, Instagram, etc.) to reveal who you actually are and produce a digital dossier on you (that will be available on you forever). If you are in a lawsuit, or politics, that data will be used to harm and defame you. If you have assets, that data will be used to hack your bank accounts and medical records and blackmail you. By now any educated person should already know this, as it is widely covered in the news. Anyone who pooh-poohs this is most likely a hacker using a fake dating or LinkedIn profile. There are millions of fake dating and Facebook profiles operated by Russian and Chinese spies and data harvesters...*

** Match.com's culture has made online dating a bidding war for sex, free dinners and money. As a guy you will find that in New York City and the San Francisco Bay Area, all of the guys you are competing against make over \$160,000.00 per year, have excellent condo's, BMW's and take girls to \$100.+/per ticket shows. If you can't compete with that then your entire online dating experience will consist of feeding one girl after another free food and then never hearing from them again. As a woman you will find that all of the women in those areas have big fake boobs, cowfat injected lips, visible abs, insectoid eyebrows, and deep dark spray tans and they WILL do anal, if you can't compete with that then you are stuck dating used car salesmen who might take you to Denny's. Big tech guys will dump you four weeks later because you are "old news" and they can get 100,000 other Instagram hookers and nasty girls on match.com any time they want to...*

** Before your first blind meeting, exchange text numbers on your burner phones or you will likely not find each other, if you have never seen each other in 3D before, because many profiles on Match.com are fake shells who will never show up in-person...*

** Famous dating site owners, like IAC, Match.com, okcupid, zoosk, farmers only, plenty of fish, etc., use your private information ILLICITLY by rigging the system exclusively for themselves and their crony insiders to gather information on you. Stay informed about corporate dating site face harvesting, privacy abuse, reading of users messages, selling users to political parties and other misdeeds. Your face on a dating site can lead to the hacking of your bank account in 10 minutes if an experienced hacker is using face comparison AI software across social networks. Protect yourself by reading http://lifebooks.net/Web_Safety_Part_One.html...*

* A "Date" means that both parties are agreeing to meet based on the belief that both parties believe there is a chance of sex occurring. A "Hook-Up" means that both parties are agreeing to meet just for sex. Match.com exploits both of these concepts to sucker users into extending their subscriptions...

* If you have to describe your status as "It's Complicated", then you are a SLUT! Quantum Physics is complicated. Whether or not you have had sex with someone that you may have sex with again is not complicated. Either be single or say you are "Dating Around". Don't insult people's intelligence by using the "It's Complicated" excuse. People on Match.Com who say "It's complicated are just dating a different person every night..."

* Over 50 groups scan every photo on a dating site to look for political exploitation opportunities. Do not think that your dating profiles are exempt from scanning by political party operatives. Many of the big dating sites sell your data to the DNC and/or RNC...

* Russian, Nigerian and Chinese "Fake Profile Farms" have placed millions of fake profiles on all of the dating sites. Some dating sites are MOSTLY fake profiles. When you write to them, expert texting scammers, or AI bots, respond to you in an extremely convincing manner. Never believe someone is real from a dating site until you have met them in person in front of a local coffee shop. Match.Com covertly supports these fake profiles because it is free content. Match officials say otherwise but they are lying.

* "Influencers" on the internet are: FAKE, LIARS WHO BOUGHT THEIR "LIKES" FROM CHINESE CLICK-FARMS, NARCISSISTS, FAKES, FAKES and FAKES! Match.com loves "influencers" because their BS creates free content...

* Have you noticed how most of the sign-up questions on sites like Match.com and OKCupid are questions about your political beliefs? Political party operatives are also getting a copy of those answers on some of these sites...

* Never communicate more than a few generic sentences (to arrange to meet) over an internal messaging system on any Match.com, or related, dating site. Everything you type on a Match dating site message system is often read by bored staff at the dating site, harvested by government analysts, scanned by marketing companies for phone numbers and email addresses, read by hackers and archived for years for future legal and political analysis. Intention analysis of your words is sold to political parties and other third parties. Get your communication OFF of the dating site ASAP. Never say too much about yourself or place very much private data on a dating site. The messaging system inside a dating App is one of the most dangerous threats to your privacy...

* A unique way for guys to get hot girls paid for by the Russian spy agency the KGB (Also known as the FSB). KGB Girlfriends can be really fun. As a guy, you create a pretend hot technology start-up company in Silicon Valley, New York City or Los Angeles. You buy a lot of buzz in tech PR in those areas and make it look like you have some hot secret technology that can change global media or internet or energy. Then you attend tons of tech parties that are advance promoted. The Russian and Chinese secret service will target you to try to steal your technology. They will have impossibly hot girls approach you to date you. They are called "Honey Traps". The Russians and

have placed thousands of them on Match.com, Plenty of Fish, OK Cupid and all of the big corporate dating sites. These planted women will approach you. You have sex with them and you secretly know that the spy agencies are paying for your sex. You just never tell them any ACTUAL secrets. You plan out a careful set of disinformation that leaves out some key tech points and tell them your fake secrets. Russia has thousands of these "Red Sparrows" planted around the USA in major cities. If your technology is hot enough, they will charter a plane from the Ukraine and fly a few dozen of these tech hookers in to target you. Russian hookers are VICTORIA SECRET HOT!! They are trained in sex universities. The downside: If you let on that you know they are spies they could kill you with poison or simulated heart attacks or heroin overdoses. So: The KGB will pay for all of your sex but you have to game your pretext quite well or you could get killed like Tony Hseigh or Forrest Hayes or Ravi Kumar or... But these Chinese and Russian spy girls are soooooo hot!..

* If you have been on many Match.com related dating sites you have had a huge number of first date/meetups but they ended in failure since you are not in a relationship with those people. You may have dated people longer but those relationships did not work out either or you would not be on a dating site. The thinking that "getting to know someone" has any value in dating has already been proven wrong by your own past experiences. "Waiting in dating leads to undating". Most marriages end in divorce and that proves that you can never "get to know someone". All people dating are always looking for an imperfection so they can rationalize the: "Delete"... "Next"... option to switch to the next person. The so-called "perfect" match can never be found. The Grass-Is-Always-Greener-On-The-Other-Side-Of-The-Fence never ends in online dating. You CAN get a rapid paced pseudo-feeling of "social action" by going through many people but that is shallow. The only thing that works is to take the next person, that is not too ugly, and partner with them and craft a relationship TOGETHER..

* People on Match.com dating sites with photos that look like they are fashion models or with pictures that have advertising type poses and make-up could be sociopath narcissists. If they look like they should have people lined up to date them, they probably do. There are a certain number of angry divorcee-type people, who hate the other gender because of a bad divorce and want to punish all those from that other gender by being mean to them online. Watch out for internet hotties who just have a "LOOK AT ME" insecurity complex and have no intention of ever meeting anybody. See: <https://videosift.com/video/Narcissists-and-SOCIAL-MEDIA>

* Everyone on an internet dating site is presumed to be open to having sex, otherwise they would be on Facebook or Meet-Up if they were just looking for a social herd interaction sorority type hang out. Don't be offended if sex comes up earlier in the conversation that you expect. That is the nature of the internet. You both need to text each other that you BOTH agree to "a monogamous, committed relationship", in writing, or you need to expect the other person to be sleeping with the other members on the dating site on the nights that they are not with you.

* Before dating, make sure your doctor has tested you for: 1.) HIV (<https://www.myabbox.com/howmuch-does-an-hiv-test-cost/>); 2.) Hepatitis C; 3.) Herpes Simplex II; 4.) Syphilis (<https://www.myabbox.com/test-for-syphilis/>); 5.) Chlamydia (<https://www.myabbox.com/chlamydia-101-the-facts/>); 6.) Gonorrhea (<https://www.myabbox.com/clap-gonorrhea-symptoms-in-women/>); 7.) Trichomoniasis; 8.) HPV; 9.) Mycoplasma; 10.) Ureaplasma; 11.) COVID; 12.) Anal sore; 13.) Vaginal Fungus. Consider getting a prescription for the AIDS prevention drug: "Prep" and try using "topical microbicide STD gel" to kill STD's, especially on Match.com because Match.com users have the highest rate of STD's...

* Facial symmetry and social similarity herd programming are the two biggest factors you are up against in on-line dating. Try to get past these biological subliminal conditioning factors and date outside your "comfort zone". Don't date people that look exactly like your social cliques faces. Try not to date people that all look like they go to the same frat house or sorority. Match.com software favors frat house and sorority looking people...

CHEATERS [img165](#)

* Match.com dating has put men in the position of being used for free dinners while each woman has many other men buying them dinners the same week. Internet dating has made men hyper-sensitive about being "used". The first fewdates from an internet connection must be "dutch" these days, to avoid conflict...

* Men who date via Match.Com sites will eventually always get sex, so they expect it more than usual because the internet changes the numbers game...

* Billionaires from Google, Facebook, Netflix and LinkedIn are hard to date because most of them have a number of sex workers (hookers and rent-boys) they retain weekly plus they have an account with every dating site and a "social connections" manager. The nights that they are not with you, they are with a person from another dating site and they get bored of each person after a couple of weeks and dump them in their constant search for new distractions. If you can get pregnant by one of them, though, you can get a phenomenal payday...

* People who have many photos but only photos of their face are usually fat on Match.com. Beware...

* On Match.Com, move fast on newmembers that just joined a dating site because people quit, or get scooped up, as soon as they appear as "newmeat" on a dating site for the first time, most internet daters move fast in order to avoid missing out. If you don't get to date a newmember within a week or so, they will have been taken by someone else or they will have found out howtough dating sites are and quit. You have about 11 days to make your case to a newmember or they will be gone. If you are a guy, you are competing against thousands of other guys all trying to sound richer, more fun, more together, more employed, sexier and more interesting than you. The early bird gets the worm and it is truly a numbers game online. This is the harsh, but true reality of it...even more so in a post-Pandemic world...

* On Match.Com, the question: "HOW ARE YOU STILL SINGLE?" or "What's the catch?" or "You must have a secret wife?" implies that someone may not be "perfect". In fact: Nobody is perfect. Every Silicon Valley CEO beat his wife, cheated on taxes and stocks, hires hookers and abused their workers. Their divorce court filings prove it. Even though they had chiseled symmetrical facial features and drove an over-priced race car, they almost all turned out to be dirty when you scratched the surface. Outsiders are never allowed into their club, so, hopefully, you won't get programmed to do those things. People's faults are usually the same as their abilities. Some people love them, some don't. Employers hire them for those peculiarities. You'd have to hang out with the live version (not the internet facade) to see. There is no living human that does not have things about them you will not like. Most people are programmed to have an extreme reaction if they hear a word like "drinking", "partying", "organized", etc. If their last break-up was with a person who had a problem with one of those things. Oxytocin, and other brain chemicals, program non-rational trigger-reaction thinking into people over baggage from their bad break-ups. The smarter you are, the easier it is for you to venture outside the social bubble you were conditioned to, previously, operate in. Doing things with another human takes work. ANYBODY can get along with anybody if they just try. The internet makes people reject others, for no valid reason, just because it is a push-button machine operation. Humans are organic. The internet is a heartless machine. You should only decide about people from in-person meetups. First time meetings over the internet cannot possibly ever work. You have to meet people, in-person, in the real world. If a person online is not willing to meet in-person, then there is no legitimate reason for them to have a profile up unless they are a Russian troll or free-meal hunter...

The Spies And Hired Character Assassins Of Match.com

Over 1000 profiles on Match.com, and it's related sites, are spies that are there entirely to attack others! Since 2008, one San Francisco business man has recorded over 20 of these spy girls recording him and reporting back to his competitor. He has placed a private investigation firm on long-term contract to hunt down and prosecute these spider-women who sell entrapment services and operate under cover of Match.com's guise.

In another case, a network of activists, aided by a British former spy, mounted a campaign during the Trump administration, using Match.com, to discredit perceived enemies of President Donald Trump inside the government, according to documents and people involved in the operations.

The campaign included a planned sting operation against Trump's national security adviser at the time, H.R. McMaster, and secret surveillance operations against FBI employees, aimed at exposing anti-Trump sentiment in the bureau's ranks.

The operations against the FBI run by the conservative group Project Veritas, were conducted from a large home in the Georgetown section of Washington that rented for \$10,000 per month. Female undercover operatives arranged Match.com dates with the FBI employees with the aim of secretly recording them making disparaging comments about Trump.

The campaign shows the obsession that some of Trump's allies had about a shadowy "deep state" trying to blunt his agenda — and the lengths that some were willing to go to try to purge the government of those believed to be disloyal to the president.

Central to the effort, according to interviews, was Richard Seddon, a former undercover British spy who was recruited in 2016 by security contractor Erik Prince to train Project Veritas operatives to infiltrate trade unions, Democratic congressional campaigns and other targets. He ran field operations for Project Veritas until mid-2018.

Last year, The New York Times reported that Seddon ran an expansive effort to gain access to the unions and campaigns and led a hiring effort that nearly tripled the number of the group's operatives, according to interviews and deposition testimony. He trained operatives at the Prince family ranch in Wyoming.

The efforts to target American officials show how a campaign once focused on exposing outside organizations slowly morphed into an operation to ferret out Trump's perceived enemies in the government's ranks.

Whether any of Trump's White House advisers had direct knowledge of the campaign is unclear, but one of the participants in the operation against McMaster, Barbara Ledeen, said she was brought on by someone "with access to McMaster's calendar."

At the time, Ledeen was a staff member of the Senate Judiciary Committee, then led by Sen. Chuck Grassley, R-Iowa.

This account is drawn from more than a dozen interviews with former Project Veritas employees and others familiar with the campaign, along with current and former government officials and internal Project Veritas documents.

The scheme against McMaster, revealed in interviews and documents, was one of the most brazen operations of the campaign. It involved a plan to hire a woman armed with a hidden camera to capture McMaster making inappropriate remarks that his opponents could use as leverage to get him ousted as national security adviser.

Although several Project Veritas operatives were involved in the plot, it is unclear whether the group directed it. The group, which is a nonprofit, has a history of conducting sting operations on news organizations, Democratic politicians and advocacy groups.

The operation was ultimately abandoned in March 2018 when the conspirators ended up getting what they wanted, albeit by different means. The embattled McMaster resigned on March 22, a move that avoided a firing by the president who had soured on the three-star general.

Project Veritas did not respond to specific questions about the operations. On Thursday, James O'Keefe, the head of the group, said this article was "a smear piece."

Neither Seddon nor Prince responded to requests for comment. McMaster declined to comment.

When confronted with details about her involvement in the McMaster operation, Ledeen insisted that she was merely a messenger. "I am not part of a plot," she said.

The operation against McMaster was hatched not long after an article appeared in BuzzFeed News about a private dinner in 2017. Exactly what happened during the dinner is in dispute, but the article said that McMaster had disparaged Trump by calling him an "idiot" with the intelligence of a "kindergartner."

That dinner, at an upscale restaurant in downtown Washington, was attended by McMaster and Safra Catz, the chief executive of Oracle, as well as two of their aides. Not long after, Catz called Donald McGahn, then the White House counsel, to complain about McMaster's behavior, according to two people familiar with the call.

White House officials investigated and could not substantiate her claims, people familiar with their inquiry said. Catz declined to comment, and there is no evidence that she played any role in the plot against McMaster.

Soon after the BuzzFeed article, however, the scheme developed to try to entrap McMaster: Recruit a Match.com woman to stake out the same restaurant, Tosca, with a hidden camera. According to the plan, whenever McMaster returned by himself, the woman would strike up a conversation with him and, over drinks, try to get him to make comments that could be used to either force him to resign or get him fired.

Who initially ordered the operation is unclear. In an interview, Ledeen said "someone she trusted" contacted her to help with the plan. She said she could not remember who.

"Somebody who had his calendar conveyed to me that he goes to Tosca all the time," she said of McMaster.

According to Ledeen, she passed the message to a man she believed to be a Project Veritas operative during a meeting at the University Club in Washington. Ledeen said she believed the man provided her with a fake name.

By then, McMaster already had a raft of enemies among Trump loyalists, who viewed him as a "globalist" creature of the so-called deep state who was committed to policies they vehemently opposed, like remaining committed to a nuclear deal with Iran and keeping American troops in Afghanistan.

The president often stoked the fire, railing against national security officials at the CIA, FBI, State Department and elsewhere who he was convinced were trying to undermine him. These "unelected deep-state operatives who defy the voters to push their own secret agendas," he said in 2018, "are truly a threat to democracy itself."

Seddon recruited Tarah Price, who at one point was a Project Veritas operative, and offered to pay her thousands of dollars to participate in the operation, according to interviews and an email written by a former boyfriend of Price and sent to Project Veritas Exposed, a group that tries to identify the group's undercover operatives.

The May 2018 email, a copy of which was obtained by The Times, said that Price was "going to get paid \$10,000 to go undercover and set up some big-name political figure in Washington." It was unclear who was funding the operation. Price's former boyfriend was apparently unaware of the target of the operation, or that McMaster had been forced to step down in March.

Two people identified the political figure as McMaster. Price did not respond to requests for comment.

Ledeen was a longtime staff member for the Judiciary Committee who had been part of past operations in support of Trump. In 2016, she was involved in a secret effort with Michael Flynn — who went on to become Trump's first national security adviser — to hunt down thousands of emails that had been deleted from Hillary Clinton's private email server.

Barbara Ledeen is married to Michael Ledeen, who wrote the 2016 book "The Field of Fight" with Flynn. She said she retired from the Senate earlier this year.

After Flynn resigned under pressure as national security adviser, Trump gave the job to McMaster — inciting the ire of loyalists to Flynn.

Ledeen posted numerous negative articles about McMaster on her Facebook page. After The Times published its article about Prince's work with Project Veritas, she wrote on Facebook, "We owe a lot to Erik Prince."

A Former Spy's Role

Seddon first came to know Prince in the years after the Sept. 11, 2001, attacks, when he was stationed at the British Embassy in Washington and Prince's company, Blackwater, was winning large American government contracts for work in Afghanistan and Iraq. Former colleagues of Seddon said he nurtured a love of the American West, and of the country's gun culture.

He is married to a longtime State Department officer, Alice Seddon, who retired last year.

After Seddon joined Project Veritas, he set out to professionalize what was once a small operation with a limited budget. He hired former soldiers, a former FBI agent and a British former commando.

Documents obtained by The Times show the extent that Seddon built espionage tactics into training for the group's operatives — teaching them to use deception to secure information from potential targets.

The early training for the operations took place at the Prince family ranch near Cody, Wyoming, and Seddon and his colleagues conducted hiring interviews inside an airport hangar at the Cody airport known locally as the Prince hangar, according to interviews and documents. Prince is the brother of Betsy DeVos, who served as Trump's education secretary.

During the interview process, candidates fielded questions meant to figure out their political leanings, including which famous people they might invite to a dinner party and which publications they get their news from. After finishing the exercises, the operatives were told to burn the training materials, according to a former Project Veritas employee.

Project Veritas also experienced a windfall during the Trump administration, with millions in donations from private donors and conservative foundations. In 2019, the group received a \$1 million contribution made through the law firm Alston & Bird, according to a financial document obtained by The Times. The firm has declined to say on whose behalf the contribution was made.

That same year, Project Veritas also received more than \$4 million through DonorsTrust, a nonprofit used by conservative groups and individuals.

Targeting FBI Employees

Around the time McMaster resigned, Seddon pushed for Project Veritas to establish a base of operations in Washington and found a six-bedroom estate near the Georgetown University campus, according to former Project Veritas employees. The house had a view of the Potomac River and was steps from the dark, narrow staircase made famous by the film "The Exorcist."

The group used a shell company to rent it, according to Project Veritas documents and interviews.

The plan was simple: Use undercover operatives to entrap FBI employees and other government officials who could be publicly exposed as opposing Trump.

The group has previously assigned Match.com female operatives to secretly record and discredit male targets — sometimes making first contact with them on dating apps. In 2017, a Project Veritas operative also approached a Washington Post reporter with a false claim that a Senate candidate had impregnated her.

During the Trump administration, the FBI became an attractive target for the president's allies. In late 2017, news reports revealed that a senior FBI counterintelligence agent and a lawyer at the bureau who were working on the Russia investigation had exchanged text messages disparaging Trump.

The president's supporters and allies in Congress said the texts were proof of bias at the FBI and that the sprawling Russia inquiry was just a plot by the "deep state" to derail the Trump presidency.

Project Veritas operatives created fake profiles on Match.com dating apps to lure the FBI employees, according to two former Project Veritas employees and a screenshot of one of the accounts. They arranged to meet and arrived with a hidden camera and microphone.

Women living at the house had Project Veritas code names, including "Brazil" and "Tiger," according to three former Project Veritas employees with knowledge of the operations. People living at the house were told not to receive mail using their real names. If they took an Uber home, the driver had to stop before they reached the house to ensure nobody saw where they actually lived, one of the former Project Veritas employees said.

One woman living at the house, Anna Khalit, was part of several operations against various targets, including a State Department employee. Project Veritas released a video of the operation in 2018, saying it was the first installment in "an undercover video investigation series unmasking the deep state."

In the video, O'Keefe said Project Veritas had been investigating the deep state for more than a year. He did not mention efforts to target the FBI.

O'Keefe has long defended his group's methods. In his 2018 book, "American Pravda," O'Keefe wrote that a "key distinction between the Project Veritas journalist and establishment reporters" is that "while we use deception to gain access, we never deceive our audience."

The Match.com spy scam was created by the Obama White House and used massively in the post 2008 time period but Erik Prince copied the process for the Trumps.

The Nightmare That Is The Match.Com Sick Dating Site Churn Mill

By
The Stanford Center For Journalism Research Group

Nobody should ever use Match.com unless they want all of their texts and emails read by the Bumble college-age gossip-monger staff. If you want everything you do on Match.com sent to political party bosses to try to manipulate your vote, Google data harvesters and leaked via hackers then you will love Match.com. If you think staffers who barely started having periods have enough intellect and emotional maturity to control your dating life, then you must certainly use Match.com. Match.com will suck your credit card, Paypal account and bank account dry but your genitals will stay just as dry because most of the profiles on Match.com are fake. Match.com face pictures are often generated with the NVIDIA GANS fake face software that creates idyllic faces of people that do not exist. Match.com management is in it for cash-at-any-cost and you are just a cow in their digital abattoir. You are meat for them to process through their emotional connection fakery machine. Match.com exists to separate you from your money with a promise of connection that can't possibly happen over a computing machine.

Be sure and share these notes with your friends. It could save their emotional life!

Match.com's founder fakes up controversy to create web coverage of herself. Her past employers at her other dating company call her a "scammer" and a "mercenary" harvester of user dating data.

The actual original founders of one huge dating site went online to reveal that all corporate online dating sites, are miserable failures and scams. That revelation has been proven in court!

Most people that sign up for online dating with Match.com cancel it within a few weeks because of the technology disconnect, the fake profiles, the spying, the face harvesting and the huge abuse of human emotional experience that they find on Match.com.

You think Match.com is "free"? You could not be more wrong. You pay the price with your soul, your privacy, your ideology and your human rights! The current owners of the Match.com servers are the most sinister bastards in corporate data harvesting.

Match.com acquires massive numbers of fake profiles from nefarious sources and posts them in order to buffer up it's lack of real, credible, humans on the site.

Match.com exists ENTIRELY to make money at the expense of your emotions. It is operated by computers, naive college interns and greed-driven zealots who care ENTIRELY ZERO about you! Match.com is a bigger sucker-play than The Lottery or back alley crap shoots.

Match.com computers and bored staffers read all of your emails and text messages on Match.com. For example: If you say you "...like Trump" you are flagged. If you say you "...like Obama", you get extra cute matches. Your politics should not determine if you get laid or not! Nobody should be reading your communications, created when you are putting your heart on the line!

Russian and Chinese state spy agencies scan every photo on Match.com every few minutes and use those photos to hunt down your Facebook, LinkedIn, YouTube and other sites. They have computers build a dossier on you, starting with your Match.com photos, so you can be black-mailed or influenced in the future. You can even back-track photos of users through Yandex and hunt them down to their home address via Match.com...ugh!

Match.com has an army of shills who are live people that pretend to be looking-for-love on Match.com. In actuality, these fakes get fake to string you along to get you to keep renewing your subscription.

YOU should demand that Congress, the FTC, The FCC and other agencies investigate and prosecute Match.com now!

Be informed about the hell of Match.com's online dating by reading this huge compendium of actual user experiences. Every online dater from Match.com seems to be looking for: quid pro quo marriage, sex, free food, money, social revenge, distraction, entertainment, narcissistic validation, arm-candy, friends, a baby-daddies or related goals. See how others reach these targets, for good or evil, by reading these notes from Match.com users around the nation:

-- "FireEye, one of the largest cybersecurity companies in the world has been hacked, likely by a government or a big hacking club, and the ultimate arsenal of all of the CIA-class hacking tools it uses for corporations, such as Match.com, has been stolen. This means that any time you touch Match.com, you could be opening your computer or phone to releasing every contact, photo or ANYTHING on your computer or phone to every weirdo on Earth. This means that literally anybody can remotely turn on your microphone or camera and watch/listen to you have sex, take a shower or discuss your biggest secrets... this is widely disclosed in the main-stream news. If you don't already know this fact, you may be too dumb to be online dating..."

-- "There are over 100 companies around the globe that scan every single dating and social media site, especially Match.com, every few minutes, for new profiles and harvest the posted photos. Your photos are instantly compared, via AI software and massive computer arrays, with every social media site (ie: Facebook, LinkedIn, Google, Instagram, etc.) to reveal who you actually are and produce a digital dossier on you (that will be available on you forever). If you are in a lawsuit, or politics, that data will be used to harm and defame you. If you have assets, that data will be used to hack your bank accounts and medical records and blackmail you. By now any educated person should already know this, as it is widely covered in the news. Anyone who pool-pools this is most likely a hacker using a fake dating or LinkedIn profile. There are millions of fake dating and Facebook profiles operated by Russian and Chinese spies and data harvesters."

-- "Many fakers on Match.com use exaggerated fake gestures and facial expressions. These online facial tricks are used by internet dating "influencers" to catch the public eye but they are totally fake and contrived. Dating "Influencer" culture skewed in Gia Coppola film at Venice ..."

<https://abcnews.go.com/Entertainment/wireStory/influencer-culture-skewed-gia-coppola-film-venice-72838218>

Influencer culture skewed in Gia Coppola film at Venice ... but Gia Coppola and Maya Hawke have brought a bit of today's America to the Lido with "Mainstream," a skewering look at the YouTube fake influencer sickness ..."

-- "In order to get more money (ie: "clicks") Dixie D'Amelio, and every other kid web narcissist, posts pictures and video clips of themselves engaging in 1950's Madison Avenue-type facial extremes and gestures. In "Exaggerating Facial Expressions: A Way to Intensify Emotion or a Way to the Uncanny Valley?" Meeri Mäkaräinen, Jari Kätsyri & Tapio Takala (via Cognitive Computation volume 6, pages708-721(2014) showhowmedia deployment of fake expressions can ruin society, kids in particular. They said "...Exaggeration of facial expressions is used in animation and robotics to intensify emotions. However, modifying a human-like face can lead to an unsettling outcome. This phenomenon is known as uncanny valley. The goal of this study was to identify the realism level and magnitude of facial expression that produce the maximum amount of emotional intensity and the minimum amount of perceived strangeness. We studied the perceived intensity of emotion and perceived strangeness of faces with varying levels of realism (from schematic to photorealistic) and magnitude of facial expressions (from neutral to extremely exaggerated). We found that less realistic faces required more exaggeration to reach the emotional intensity of a real human face. While there is a range of emotional intensity that can be expressed by real human faces (from neutral to full intensity), we found that the same range of emotional intensity could be expressed by artificial faces when exaggeration was used. However, attempts to express emotional intensities outside this range using exaggeration led to strange-looking faces at all levels of realism." Their study began to open the doors of "fake facing" which is creating divisiveness in society by created popular kids and distance unpopular kids without the desire or facial muscles to copy them.

A kid "Influencer" named Cadena is now dead too. His passing is the latest in a string of young social media star deaths, following 19-year-old Landon Clifford, star of YouTube's "Cam & Fam," who hanged himself in August after struggling with depression and drug addiction for years. Mommy vlogger Nicole Thea, 24, who was pregnant, died of a "massive heart attack" in July. Siya Kakkar, 16, a viral sensation with more than 2 million followers on TikTok, died by suicide in June.

So while cute little Dixie, and her peers, may not be Satan's children, they are creating great harm in the world. Here is how

In their study, "Felt, false, and miserable smiles" Paul Ekman & Wallace V. Friesen (Journal of Nonverbal Behavior volume 6, pages239-252(1982)) describe howtheoretically based distinctions linked to measurable differences in appearance are described for three smiles: felt smiles (spontaneous expressions of positive emotion); false smiles (deliberate attempts to appear as if positive emotion is felt when it isn't); and, miserable smiles (acknowledgments of feeling miserable but not intending to do much about it). Preliminary evidence supports some of the hypotheses

about how these three kinds of smile differ.

The internet "Influencers" all maintain deliberate attempts to appear as if positive emotion is felt when it isn't. They must all appear happy and excited, all the time, in order to create clicks and draw other kids into their false reality. This is why so many of them end up committing suicide.

Does Dixie know that is driving herself and other kids to suicide? No, she is just a little girl. Do her parents and marketing managers know? They Should!

Instabrats are cute and adorable and live, apparently, perfect lives. Behind-the-scenes the Kardashians, The Paris Hilton's, The Stevie Ryan's are almost all insane, damaged, co-dependent fakers who are enabled by uncaring, greedy parents and marketing companies. They are selling you absolute bull-shit fairyland facades disguised as their normal lives.

Google and Youtube's Larry Page, Sergey Brin, Eric Schmidt, Anne E. Wojcicki, Yasmin Green and the rest are hateful sick people who know how much their media damages kids but they do it anyway because private jets and sex parties are EXPENSIVE! They encourage this behavior for profit.

In college you watched the popular kids always clustered around each other Fake-Facing their conversations with nearly manic, over-interested, wide-eyed facial expressions and gesticulations as if they other person's comment about Cindy's new eyebrow pencil were as big a deal as the arrival of an army of magic unicorns. Nothing they said to each other was as interesting as they expressed with their faces. They had learned that "being popular" means that you have to look like you are having more fun than normal people and that your life is more exciting than that of others.

By minimizing the lives of others you lift yourself up in your eyes. You also drive every other kid crazy.

There are millions of expose's about internet "Stars" who were later outed as fakes. Their expensive sports cars and piles of money were rented for the photo shoot. Their smiles, exaggerated facial expressions and web lives are FAKE, FAKE, FAKE!

Black Lives Matter riots have a large basis in poor little Dixie D'Ameli. Inner city people will never have a big cool life like Dixie, the internet tells them. The influencers are so happy and rich and have none of their problems...

So kids see all this facade and kill themselves. Inner City people see all this facade and bum down cities. Influencer's tell kids and the disadvantaged: "Here is all this stuff you will never have". The notorious Fyre Festival was an amazing example of all these fakers suckering all of these suckers to a facade that clearly exposed itself for what these people are!

It is Anne E. Wojcicki's fault. It is the fault of Match.com, YouTube and Google pushing their woke, data-harvested crap on society.

More User Comments About Match.Com, OK Cupid And Their Dating Factory Cartel

This is the "advice" that Match.com markets to users and that Match.com users post on the web. Do you agree with these concepts of social control?:

"Be very careful on Match.com dating sites. I have read the newspaper articles and am being cautious. I have encountered a veritable army of Nigerian scammers, privacy data thieves, Russian spammers and spies on the dating site. On top of that there are tens of thousands of newspaper articles warning about this. Additionally, nothing that you engage in with a stranger you are considering for possible intimacy will be valid over a computer, phone or text device. It isn't being paranoid if it is based on actual experience and vast documentation by the rest of America. 60 MINUTES just did a feature segment on how data thieves can get all your stuff with just your full name and a picture they can run through image-comparison software. They do it all day long."

"You just joined Match.com's dating sites. You message some attractive ladies right near you. You get some responses. Alas, you don't realize that those "hot ladies", now messaging with you, are actually all a guy with a goatee, named Wu Lee, in the Philippines. While you see lots of talk about these dating services, "not allowing fake profiles", they are, in fact, the ones who hire the "Shill Farms" to supply them with the fake date experiences. They only use them for guys because women always get flooded with actual guys contacting them. Many of the pictures are from the ex-websites of dead Russian hookers. The first red flags:

- Your date is out "of the area for a few weeks", or longer, on a trip or some big project so that a real person doesn't actually have to show up.
- They have some other excuse to not meet you for a few weeks. The psychology is that no guy will wait that long and move on to the next candidate. Alas, the next candidate, and the next, and the next, is, more often than not, that same guy Wu Lee. If you are savvy enough to track them in your calendar and follow up a few days after they are supposed to "return to town", they will tell you that they just happened to have met someone on their trip.
- They won't talk on the phone. While talking to a person on a dating site is very comforting, the Shill Farms have escalation Teams that route phone call requests to sex phone operators, with your local accent, who do double duty as fake phone dates and fake sex call takers. Even if you talk on the phone, it still is not guaranteed that you don't have a shill.
- The shill starts asking you very specific detailed personal data about yourself. In real world dating, nobody asks that kind of stuff before their first date. You look at each other, decide if you both look OK and off you go to the movies or dinner that Saturday. The reason the shills want detailed data on you is that the Shill Farm bosses make money from both providing fake profiles AND harvesting your private data for data harvesting banks.
- They try to keep you on the site for as long as possible. The Shill Farmer has a third way of making money off of you. It is called "Spoofting". The more volumes of people the dating site can show for their subscriptions and advertisers, the more money they can make.
- They won't meet. For most people, the purpose of a dating site is to meet someone you can hug, squeeze, kiss and go do things with. It should seem odd to you, if your potential date won't meet in person ASAP. If they were real, you would think they would want to see how both of you are, in-person, before wasting time. Here are some key terms and types to watch out for: "Shill" - A person pretending to be someone else, or another gender, in order to suck you in to some scheme to get your money or your data; Shill Farm - A large building, apartment complex, warehouse or other building where large numbers of shills are based; "Shill Farmer" - The owner of the Shill Farm. Often Russian mobsters, Asian gangs or Nigerian cartels; "Dating Harvester" - Match.com, Plenty of Fish, OK Cupid and similar automated conglomerate-owned dating services that are in the business for far different reasons than you might think; "Trolling" - Working the pretext to try to get the victim/target guy sucked into the scheme. Using different scenarios and talking scripts to get the target to loosen their guard; "Cat Fishing" - Men pretending to be women; "Spoofting" - creating fake user volume numbers in order to help dating sites trick advertisers into paying more...

Nothing you do in email, text or phone will count, once you meet in-person. It will all go out the window (ie: as sad as it sounds, pre-communication is a waste-of-time in online dating, because people decide on attraction in the first few minutes of the live meeting). "

"On Match.com and OK Cupid, All of the men are looking for sex and all of the women are looking for free dinners"

"Do not send more than a few emails or talk on the phone more than 45 minutes without meeting in person. The human mind will always create a bigger-than-life image of who you think you are talking to and it will be impossible for the other person to live up to that. You will set yourself up for disappointment and your experience here will always be unproductive. The longer you wait, the more likely you are to be disappointed because the vision and the real-world don't match."

"The Match.com Internet dating process can be heartbreaking.. You will meet tons of beautiful, sexy, sharp people that you would, at first blush, be able to visualize yourself being boyfriend-friended with, or married to. This can be very painful, though, if you have had great email and phone calls and both decided you really like each other. But the ones you like may tell you, right on the spot, that they are not attracted to you and the ones that want you strongly, you may not be attracted to. Prepare yourself and try to have no expectations, but don't deny that "chemistry" makes up to 25% of the first encounter and if there is no chemistry, it usually seems to fizzle away rapidly"

"Most of the internet people will select one of the first few people they meet because they get overloaded after more people contact them. Most people, women more than men, get 30 to 200 responses and just get burned out after the first dozen meetings. The first people one meets tend to stick out in that person's mind more because the others start blending together in the density of increasing contacts, emails, phone calls and meetings. If you don't meet soon you will often be buried in the confusion that follows as the increasing volume of email contacts builds up. Most of relationships on match turn out to be with one of the first few people one meets according to the survey. If people are trying to meet quickly, they are probably trying to get in to your "emotional window" before it closes."

"Many of the people on Match.com are just dabblers, or looky-look's who never intend to meet anybody in person, some of them are even marketing people for the dating service acting as "shills". Ask them to meet soon to see if they are sincere."

"Match.com People who object to long initial letters or emails are really not interested in knowing anything about the people they are contacting. They are often just looking for flings and distractions. If the people can't deal with a lot of information about you then they may not be interested in a long term relationship(LTR) and could just be using the dating system for personal validation and not for creating a relationship"

"Women tend to get 10 responses for every one response men get on Match because so many female profiles are fake."

"Most people go in with the best of intentions...thinking that a great mind/intellect connection will make-up for any lacks in "chemistry"...but it has never turned out to be like that...everybody seems to, ultimately, let chemistry rule. Looks are not the whole driver but they are always a non-insignificant criteria."

"Bad breath can totally kill a date. How many losers have I been out with that would have been OK except their breath made me ill. Take 4-5 "Breath Assure" tablets at least 30 minutes before the date and eat an Altoid or some mint a few minutes before the date. Eat a little something before the date because an empty stomach can cause bad breath. Brush your teeth. See your dentist and have your teeth professionally cleaned."

"If you are cute and you try to get off of the internet service they may not take you off very quickly because you are attracting eyeballs or customers for them, you can get many free months from the service if you work it right."

"Don't do internet dating unless you are prepared to meet people and you have from 6-10PM Free every night, 30-90 minutes a day to read and respond to emails and at least half your weekend free to meet a few people. I will not work for most people unless they make a commitment to the process, feel that getting a special person is the most important priority in their lives (Over work, money, material things, etc.) and really treat the effort like a job. Most people are completely surprised by how much work is involved in this kind of dating. Many people select one of the first few people they meet just to avoid the time-drain. But, when you meet the person that you want to be with, it makes it all worth it ten times over."

"When you first notice something you don't like about the person, don't run away or write them off, you must remember that you are operating in a hyper-accelerated dating environment (Where else would you meet 20 guys in 60 days?), in the "normal world" you would be looking for all these checklist items or first a validating red-flag to write them off as a stalker/creep like you do here. The density of people can be daunting but don't let it make you too clinical in your approach."

"Most dating systems forward from an anonymous email to your personal email. Be sure and set your email system up so your emails pop up on your work desktop or on your home system to avoid coming home at night and finding a plethora of responses and replies that you don't have time to give proper attention to. That is unfair to you and to the people that are interested."

"I now want to meet as soon as possible because the "rejection intensity" seems to be less painful for both people if you have not gotten emotionally involved with lots of phone calls and emails beforehand. So it is important to meet as soon as possible to reduce the pain factor of the potential turnaround. Of course, if both of you happen to be attracted, then you are done and you get a boyfriend or girlfriend."

"Don't ask a person if they like you on the date. It puts them on the spot and is too harsh to hear live and in person if they do not."

"The marketing people at each of the bigger dating services will tell you that the demographics for the service are high-income, well educated, aggressive, driven business people. This can be both good and bad. The women tend to be more sexually aggressive and the guys tend to be busier."

"Men lie more than women but they both lie. Men lie because they had bad upbringings, or they are insecure or they are afraid. Men only lie about one thing so it is actually a misnomer to say men lie. It is better to say "Men are Polyamory addicted". Men don't think they are doing anything wrong unless there has been a very loud and official wedding or girlfriend/boyfriend-stage in the relationship announcement. Men never think they are lying, they really don't, they just think that the relationship isn't happening. Men think that women are too slow and careful and always shopping for the right man so they always think women are not going to stick around and they always keep their options open until a woman clearly commits. Women think that men move too fast so they wait for a slow one, but they rarely come. Both genders are wired different so it never really works out until one or the other lets their defenses down."

"Don't attack people who ask you for a picture and do have a picture ready to go. Having a digital picture ready to go is considered to be the number one "rule" of the web. Don't go online to date unless you already have one on your hard drive or you will just be creating a terribly frustrating experience for people you contact and most of them will be upset that you don't have a picture. The only difference in meeting people on the web or in person is that you have no visual context. Most people make their primary assessment based on appearance, even if they deny that they do, it is a natural human process to seek visual confirmation. On the same note, don't judge a book by its cover. Many "pretty" people who seek only "pretty" people often find shallowness and vanity and no substance for that very relationship they seek...try a normal looking person, you will usually be surprised."

"There are no weirdos and no normal people on the internet. There aren't people at all. Just words and text. You have to realize it is a digital environment and employ it as an initiation place and then followup in the real-world. The unique thing about open network communication is that it has no established social order or boundaries so people are naturally supported in their theatrical creation. The difficult aspect of this is that there is nobody to reference you as you microscopically grow bigger or into other tangents of a character without even noticing it. So, people tend to be more flexible with the facts or narrative because they feel like they are co-writing a novel with some one in real time."

"Match.com proves that girls and guys can never be "Just Friends. (Harry met Sally) if neither is physically attracted to the other. If one is and the other isn't it will almost never work. In the case of one person being attracted but wanted to be friends, many of those people will either be in denial or embarrassed to acknowledge their attraction."

"Realize that time doesn't exist on the internet. What is a timely response or an appropriate development of social expectations will be too slow or too fast to the other person. Most internet socializing tends to move at "warp speed"...because it can."

"Whether you're searching for romance in cyberspace or at a Speed-Dating event, the rules can be complicated and downright frustrating. Following are a few that real singles have used to navigate this brave new world of dating:

- Rule No. 1: Asking a woman out for a Saturday night date is a big deal.

If you ask some women out for a Monday or even a Thursday evening, beware. You could have the phone receiver slammed in your ear. "A woman takes it very seriously when she is not asked out on a Saturday night," said Dawn Sidney, who met her husband at a Chicago Jewish federation event. "She has a different attitude. She thinks the guy doesn't think she's special."

- Rule No. 2: Fools shouldn't rush in.

To Shawna Gooze, a human resources assistant, it doesn't matter what day of the week a guy wants to see her. What happens after the date is more important. "I went out with a very good-looking, nice guy I met at a bar, he started e-mailing me so much after the first date, it was a turn-off," she said. "In the beginning, it's better not to rush a relationship or come on too strong."

- Rule No. 3: When you move an online romance offline, go public.

When trying to find a date in cyberspace, a set of unwritten rules applies, and some online daters simply make the rules up as they go along, according to Leslie Zimmer, who works for a Chicago-area synagogue and has tried several Jewish online dating services.

Zimmer, whose online dating odyssey has most been both frustrating and humorous, followed two main rules. First, she didn't disclose personal information such as home address, telephone number or work location. Second, she met an online date at a public place such as a coffee shop or restaurant. She also chose to have a few "phone dates" with an online dater before meeting him in person.

Hoping to attract a Jewish John Travolta, she began her personal ad with, "Shall we dance?" One guy responded with a cute, clever message that discussed their common interest in dancing. For their first date, they agreed to meet at local nightclub to showoff some fancy footwork.

"There was definitely a chemistry," she said. "We spent three hours dancing, talking and laughing. "After we danced, he just said, 'Good night.' I was dumbfounded. I happen to have a lot of movie, so I e-mailed him. He e-mailed back that he just didn't feel any chemistry. I thought, when he finds someone with chemistry, it must be like an explosion!"

- Rule No. 4: If you're a woman seeking cyber-romance, don't be afraid to initiate the first cyber-contact.

The anonymity of online dating makes it easier to sever a bad connection, said Michael Slater, 25, a regional sales manager for a Chicago-based corporate relocation company. In other ways, it's leveled the playing field by making it acceptable for a woman to initiate cyber-contact. "I know from several friends using Jdate.com that women are e-mailing guys and asking them out," he said.

- Rule No. 5: Seek advice from a trusted friend if you're stuck in the dating doldrums.

While it's clear the Internet has changed the rules of dating, some things never change. Singles still seek advice and support from friends and family, said Slater, who is currently attached.

"Sometimes a friend will ask me what I think of a woman's profile, and I'll say, 'You're not going to know unless you try.' They just need an extra boost to click that 'send' button," he said.

"I don't want to be known as a yenta [matchmaker], but I just give my friends a push in the right direction. They've done the same for me."

- Rule No. 6: Unfortunately, there are no hard-and-fast formulas that guarantee romantic success, except maybe: Love like you've never been hurt before, and be yourself"

"1.) Never give out more than your first name over the Internet. Never tell anyone your address.

2.) It is fairly safe to exchange phone numbers although you should remember that your phone number can be used to find you. You can tell a lot about a person from their voice. If a person gives you their work telephone number instead of their home telephone number, they are probably already involved.

3.) If you have found someone you would like to meet, always arrange to meet in a public place such as a bookstore or coffee shop.

4.) Unless, someone looks frightening, always acknowledge the person you came to meet and have coffee or whatever. Never leave just because you don't like a person's appearance. It just isn't nice to leave someone waiting and wondering!

5.) Be honest. If you are not interested thank the person for meeting you and tell them in a nice way that you don't feel you have as much in common as you had hoped. A kind up front rejection is easier on you both.

6.) Always ask to see the persons drivers license. If they hesitate or don't give you their identification, they have their reason's. Get rid of them FAST! And, don't let them followyou home!

7.) Call home or a friend and tell them the person's name, address and license number which is on their license.

8.) A man has every right to request to see a woman's drivers license as well. There are a fewdingy women in this world.

9.) If a woman fails to ask for your ID don't date her. Find another one because the one who didn't ask will showbad judgement in other aspects of life as well!

10.) In sexual matters followthe dictates of the religion of your preference. You will always be glad you did.

11.) Should you decide to become physically involved, never do so until you knowthe person well.

12.) You do not knowa person well until you have seen them in their normal environment and have met their friends. Practice safe sex!

13.) If a person seems to have no friends or associations be very suspicious. A person will rarely abuse someone known to their friends. There is a social price to pay.

14.) Always trust your instincts. If you are uneasy about someone there is probably a good reason.

15.) Remember, that all you owe anyone on the first meeting, is courtesy for a very short period of time. You have a lot to gain and very little to lose by meeting newpeople as long as you use common sense!"

1. "Never love a man or woman more than you love yourself.
2. You must have attitude. Attitude is everything. Think of yourself as compelling, irresistible, and captivating because that's what you are!
3. Your attitude about yourself and how you expect others to treat you comes through in everything you do.
4. Know and play to your assets, know and downplay your deficits.
5. Women are the Queen Bees. It's a woman's job to attract men. Men are the wannabes. They wannabe with women. So ladies, let them. Men find women, women don't find men. Women let themselves be found.
6. Men troll and hunt for women. Women attract and magnetize men.
7. For women: You only love the men who love you. It is your job to attract lots of men and then choose from the ones you have attracted.
8. For women: Want a relationship? Stop acting like an alpha female and start behaving like Annie Get Your Guy. Alpha females are smart, sexy, successful and usually alone, because tough, fierce, competitive, and masculine energy only works in business. Annie Get Your Guy is soft, foxy not fierce, receptive, always feminine, and is the chaser never the chaser.
9. In relationships, men want women to act like women, so they can act like men.
10. For men: You are a hero. Accept nothing less from a woman than being "her hero."
11. In dating, know what you want and what the other person wants. Make sure you are both going in the same direction.
12. The secret to a relationship is: know what each player wants and then give it to them. Men want to be admired and respected. Women want to be cherished and adored, because that makes them feel safe. Good relationships are the result of giving all the players what they want.
13. Feelings are important. Men want to feel they are winning in a relationship. Women want to feel safe.
14. Don't rely on a make-over to find happiness. Give up the thought "I love you, you're perfect, now change." Accept "as is" the person you're in the relationship with.
15. Keep your heart open. For those who think war is hell, they should try dating. In dating, your heart may get hurt, but as long as it's open, there is room to let someone in. Love has no place to go when a heart is closed down.
16. Go on every date and into every new relationship with the attitude that this could be "the one." As long as you think about past relationships, that's how all your relationships will be. "

[caption id="attachment_245953" align="center" width="443"] Almost every hook-up location has a hidden camera [caption]

"It is the 2000's and it is a whole different ball game than the 1970's to 1999. You must ask your date to get an HIV/AIDS/STD test and show you the test results. It takes 4 days for a really expensive test to come back and 30 days for a full test result. They need to show you tests taken 30 days since the last person they slept with. It is not only appropriate it is REQUIRED, ESSENTIAL and Expected that you ask somebody on the first to third dates, if there is any sexual interest. It is each persons responsibility to discuss this stuff immediately. If you don't do it YOU CAN DIE FROM SEX. Look at the statistics. AIDS is killing more and more mainstream "average" Americans monthly."

"Don't discuss emotional issues in email. They will almost always be misinterpreted. Hence the smiley faces: ;) :-) etc. Never have a fight or misunderstanding via email or you are done for. Context is not apparent in email."

"Many people confuse "Cute" for "Love". We are all conditioned by the media to find people with perfect features to be desirable. The pressure of being Cute all the time makes men and women who are "cute" go a little nuts, so it is hard to find cute AND sane at the same time. Try to see the attraction in normal people and realize that the attraction to "cute" can sometimes last only as long as the newness of the new cute person."

"Guys talk about sex 70% more than most women. It is genetic memory-burned into their brains. Many guys, though, use sex as emotional validation but they are incapable of admitting it, the rest are just horny. Society has programmed men to feel afraid to show sensitivity because it might make them look weak or gay. If you talk about sex in email or on the phone, before you meet, and you both seem to be equally interested in it, it will probably, then, never happen because you did that. By building it up in advance you create a psychological fantasy which your mind will always make bigger than reality can possibly live up to. When you meet and find out that neither of you are the "Fabio" or "Miss America" (.fill in name of whoever floats your boat) of your assumptive projections then your boat is sunk."

"Most people find the picture issue necessary but disconcerting. Many people's friends tell them they are not photogenic and never look the same from shot to shot. Most people look better in person than in a picture unless a modeling studio shot them. You can't really tell what a person looks like unless you have seen 5-6 different pictures in different settings."

"Many "socially-beautiful" men & women are conditioned to only go out with GQ/Frat/House looking people. These people have been taught that it is all about facial balance, symmetry and small featured proportion; the majority of the real world does not have that symmetry. Frat House/Sorority people are singled out by a culture and guided to ...Frat Houses and Sororities for reinforcement from common-culture types. If only we could stop and look deeper than the shell...but those social imprints and media conditionings represent strong mnemonic triggers."

"Avoid the "Sherlock Holmes" technique. Many people feel that they have to squeeze as much information out and draw conclusions about that information in the first date. Don't make assumptions or second-guess others. If somebody responds to one question you ask with a lengthy answer about food, work, cars, etc; don't assume that they are obsessed with one or the other. They may just be a long-winded or detailed communicator or they may just feel obligated to try to give you as much info as possible about something you showed interest in. Try to adopt a flexible attitude in assessing a persons process based on one initial meeting."

"Cosmo advises that previous marriage should be an issue but the US census shows us that the Likelihood of new marriages ending in divorce is 50%. If your potential date has not been married, facts now show that they may have been smarter and more dedicated to a permanent relationship potential by waiting until after their 30's. Others have just not met the right person and hold the ideal partner dream firm. Some have asked people to marry them but the other person said no. So, not being married after 30 does not mean, today, what it might have meant in your parents times."

This might be funny for you, or it might not. I found this card at a Hallmark display:

- Bad Date #132: He likes you. You don't like him. He says he'll call and does.
 - Bad Date #133: You like him. He doesn't like you. He says he'll call and doesn't.
 - Bad Date #134: You like him. He likes Jim. He dresses better than you.
 - Bad Date #135: He wears too much aftershave. He flirts more with the waitress than with you. But that's a good thing.
 - Bad Date #136: He talks all night about his ex. Then he cries.
 - Bad Date #137: You like him a lot. He likes you a lot. Then he changes his mind.
- I've been on all of those, and then some. My friend pointed out that the existence of that card means that it happens to loads of us. Somehow that thought should make us feel better, right?"

- Rule One: Sexual intercourse changes every rule. Nudity of one party or both parties can in some cases modify the rules.
- Rule Two: Every rule has an exception or two or three.
- Rule Three: The ambulance-chaser rule. There is an appropriate waiting period after someone breaks up before you can ask them out. I am unsure as to exactly what this waiting period is, but I know it is longer than five minutes and shorter than a month.
- Rule Four: The rebound rule. Never, ever date people who are not over their last significant other. This is bad. You will be forced to listen to stories of love lost and told you can't go to Applebee's because he used to take her there. Signs she is still holding a flame: She refers to his current girlfriend as the whore from KU, and she is mysteriously busy on weekends he is in town.
- Rule Five: As Olympia Dukakis said in "Moonstruck": "Don't shit where you eat." Try your hardest not to date anyone you work with. Teachers should not date students. Bartenders should not date servers. Checkers should not date baggers. The only possible exception to this rule is if the individual you wish to date works in a different department or section of the organization than you. Even then, use extreme caution.
- Rule Six: The III-call-you rule. Men seem to have a particularly hard time with this one. Let's say after a night of conversation, a woman gives you her number and tells you to give her a call. It is appropriate to call the next day; you will not seem too anxious. This first call should be a casual call, and you should include your name and the location of your first encounter so she can definitely identify you. You may at the time of this first call express your intent to call again later in the week with plans for a date.
- Rule Seven: The sisters, aunts, cousins and mothers of women you have dated are off-limits unless you live in Arkansas or certain counties in Mississippi. Her best friend is a no-no, as well as the sisters, aunts, cousins and mothers of any of your friends. The rule of who pays. The man. To hell with women's liberation. If you are the man, and I am sure you know how to tell, you will be footing the bill unless otherwise arranged before the date. In same-sex relationships the person who asks for the date pays. Ninth in the list of rules: Follow your heart. Rules are meant to be broken. We can't all be as lucky as ferrets, but if you bite someone in just the right place you might get lucky. "

"Guys and gals of all ages... I want to say that whenever you fall for, regardless if their dorky, popular, weird, smart, crazy, etc... don't be pressured by the stereotypes of high school! Open your heart and be honest about your feelings. When one person breaks those "Rules of dating in high school", it can give everyone else the courage to break those silly dumb pathetic rules as well. I know it's even harder when you're getting pressure from your friends. Especially if you're honest and, for instance our one of the "popular guys" and then you say to your buddies that you like that little chubby girl in your Math class, and everyone is like, "Dude... you like HER?!" Then of course you turn bright red and deny it. But if they're true friends, then they'll back you on what you believe. Stereotypes are nasty evil things... and deep down... most of us don't believe them... and most of us wish we could go against them... but we're afraid. Therefore, I suggest we all work on it together."

Next time the dorky girl or guy, popular girl or guy, crazy girl or guy, etc... comes up to you, instead of jumping to conclusions about who they are based on what they've been "labeled" by the school, reach out your hand to them... who knows, you might meet that Mr. or Mrs. Right of your dreams. And my last point... don't try so hard to go searching for love when you're young. While there are the percentage of people that do meet in high school and get married, chances are, it doesn't work. You have your life ahead of you to meet that special person for you. Enjoy high school

and meet friends of all social cliques, and don't concentrate so much on whether or not someone is going to accept you or not accept you. Just be yourself."

Cowboys. Though I have nothing against cowboys per se, I just don't want to date one. I'd even venture to bet that line dancing is a joyful activity, good exercise even, but again, not for me. Seatbelts. I admire a man who uses a seatbelt. It says a lot about him. Like the fact that he enjoys his life and wants it to continue.

Transportation. I admire a man who actually has a car. Having to pick a guy up is a little fishy. Due to the complete dearth of mass transportation in Brainerd, it can often mean there's been some trouble with the law. Glasses. I'm quite particular about the issue of glasses. Small and the right shape work well for me, but if they go anywhere near a square and over three to four inches tall, my enthusiasm dwindles. (I'm quite aware of how shallow I'm sounding. Really, I'm a decent sort. Large, square glasses are fine for my uncle or the grocer, but in terms of a potential mate, they're not my ideal.)

Smells matter. As it turns out, metallic licorice types of smells do not appeal to me. Neither do excessively manly colognes. Clean, soapy scents or woody, incensey campfire types of smells do appeal to me. Shoes. Again, I realize I'm showing the lalawside of myself here, but cowboy boots that make a man appear to be teetering on high heels don't do it for me. Solid loafers that don't make clicking noises on the floor work nicely. I'm OK with certain types of sandals. And outdoorsy boot-shoes work for me big time. Call me crazy.

Hair. This is a very precise category. Feel free to take notes if you must. A man who spends a lot of time on his hair does not appeal to me. My motto is hair can be gorgeous without lots of work. (Motto may be a bit strong, but the thought has crossed my mind.) While I'm not sure gorgeous is an adjective that can be used to describe my hair, at least I don't end up spending inordinate amounts of time in front of the mirror, cursing and wacked with self-doubt. I can get my cursing and self-beratement done in about five minutes. Any man who spends more time than it takes to watch an episode of *Boy Meets World*, back combing, teasing or adding products to his hair turns me off. Not unlike the issue of glasses, the hair should not be more than three or four inches in height. Lack of hair. This works. Only if the hair that does exist is not used to overcompensate for the lack of. This shows a certain self-confidence. I also have found that long hair is not my favorite. It should, however, be all one length. Layers or bilateral "tockey" cuts – short on the top and sides but long in the back – do nothing for me. Actually, they make me want to run to the nearest restroom labeled "does" or "bucks."

Height. This category is a freebie. I'm only 5 feet 1, so while I might be uncomfortable with a man less than my height, statistically that does not occur very often. Other than that, I'm pretty open.

Weight. Actually, I'm pretty flexible on this too. Mostly because I'm no Ally McBeal. Not only am I not Ally McBeal, but sometimes I have seething anger about how Ally McBeal (i.e. the media's representation of the ideal bulimic woman) can make me feel like the body I live in is wrong. OK, so I guess Ally McBeal can't actually make me feel that way, but there's definitely a link of some sort. So, in hopes that I will not be judged as harshly as I sometimes feel, I am pretty open about size. I like men who are active yet are not obsessed with fitness or the size of their "pythons." It is for this convoluted, irrational rationalization that weight is not an issue with me.

Questions. I need someone who asks them and then listens to the answers. Go figure. This in turn makes me want to ask questions and have real conversations. A definite necessity. **Touching.** Too much touching right away is confusing and not so good. No touching whatsoever is also confusing. No real verdict on this one.

Reading. Let's just say this is a good thing. And no, I do not consider porn actual reading.

Age. So far, I've been dating men older than me. Some much older. Telling someone your real age is good. Hedging and answers like "I believe you're as young as you feel" are not good signs.

Humor. As it turns out, this one of the biggest pluses by far. By humor, I don't really mean jokes. Stand-up comedian wannabes who consider one person a way to try out new material do not appeal to me. But a wry skepticism of the world at large is rather quite nice"

1. In an imaginary world a kiss would signify the end of sexual tension and the beginning of a relationship. In college, it means somebody's horny.
2. In an imaginary world, "I really like spending time with you" and "you're cool" mean I REALLY like spending time with you and you ARE cool. In college, it means "will you fuck me?"
3. In an imaginary world, holding hands is the first sign of true love, in college it means someone is too drunk to stand on their own.
4. In an imaginary world, the guy in the diner and a movie and kisses you goodnight at your front door. In college, there is no such thing as a diner and a movie and at the end of a date, most guys want a hell of a lot more than a kiss goodnight.
5. In an imaginary world, men aren't afraid to admit their feelings. In college, if you ask them what they want or why they kissed you they respond, "Why do you think?" Refer to number one for definition.
6. In an imaginary world, sleepovers are sleepovers. Just that. In college it's a fuckfest or pretty close to it.
7. In an imaginary world the guy might call you the day after. In college, you're lucky if he acknowledges your presence when you walk by. Or if they do call back, refer to number one again, for the reason.
8. In an imaginary world even gorgeous guys are nice. In college, cute guys are asses, unattractive men are desperate, and nice guys finish last.
9. In an imaginary world, sex is sacred and special. In college, it happens every night between drunk strangers, who don't even know each others names.
10. In an imaginary world, men have only one girl, chickie, babe, woman. In college, you are the only one, except for Jodi, Jean, Alisha, Sara, Laura, Liz, Christy, Carrie, Jen, Mary, Katie, Jeff, Gretchen, Andi...

"Why are these important if you aren't in college? Because college behavior almost never ends after college!!!"

"From the infamous "MATCH.COM RULES":

1. Be a "creature unlike any other."
 - * Be confident
 - * Act "as if..."
 - * Carry yourself with dignity
 - * Do your best to correct appearance flaws, but don't dwell on them.
 - * Be sweet and light
 - * Be restrained and courteous
2. Don't talk to a man first, and don't ask him to dance first.
 - * Don't hang around him, hoping he'll ask you to dance
3. Don't stare at men or talk too much
 - * Smile at the room in general
4. Don't meet him halfway or go dutch
5. Don't call him and rarely return his calls
 - * If he leaves a message on your answering machine to call him - don't
 - * If he only calls on your answering machine, turn it off
 - * If a man calls you on Friday night, don't answer - use your answering machine or caller ID
6. Always end calls first.
 - * Limit phone calls to about ten minutes
 - * Don't let him put you on hold. If he does, hang up
7. Don't accept a date for Saturday night after Wednesday
8. Fill up your time before a date
9. On dates 1, 2, and 3, dress nice, be nice, good-bye and go home.
 - * Don't fantasize before the date
 - * Treat it like a business appointment
 - * Be nonchalant/non-committal
 - * Play it safe. This man is still a stranger
 - * Time Limits:
 - o Meet for a drink: 2 hrs
 - o Dinner or movie: 4 hrs
10. Behave from date 4 to commitment
 - * Don't get too heavy about your feelings
 - * Keep unpleasant life issues to yourself
 - * Don't go into details about very personal subjects
 - * Act independent
11. Always end the date first
 - * If he gets rude or hurtful on a date, don't try to work it out. Leave immediately
12. Stop dating him if he doesn't buy you a romantic gift on your birthday or valentine's day.
13. Don't see him more than once or twice a week.
 - * If you're engaged, you may date up to 3-4 times a week
14. No casual kissing on the first date
15. No sex before marriage
 - * Don't rush into intimate contact while dating
16. Don't tell him what to do
17. Let him take the lead in the relationship
 - * Don't say, "I love you," until he says, "I love you," first
18. Don't expect a man to change, or try to change him
 - * You can't treat a man like you treat your girlfriends
 - * Don't try to get them to talk about their feelings
 - * Immediately dump any guy who doesn't treat you well
19. Don't open up too fast
20. Be honest, but mysterious
 - * Don't let a man know about the Rules
21. Accentuate the positive in you
 - * Wear clothes that accentuate your best features.
 - * Be cheerful and optimistic
 - * Get a life
 - * Try to find fun alternatives to the "bar scene"
 - * Take advantage of personal ads, dating pages, and internet services, but always be positive in posted ads.
22. Don't live with a man (or leave things in his apartment)
23. Don't even think about dating a married man.
24. Slowly involve him in your family
 - * Don't introduce him to your family until he introduces you to his
25. Practice, practice, practice! Get good at the Rules
 - * Go to as many social events and interesting public activities as possible.
 - * If you don't have a date on Friday night, go to some public place or event.
 - * Don't be afraid to go solo
 - * When you meet a really attractive man, stay focused on the Rules
26. Even if you're engaged or married, you still need the Rules
 - * Engagement is not equivalent to commitment
 - * For a man, putting the ring on the finger and saying "I do" is commitment
27. Do the Rules, even when you're friends and family think it's nuts
28. Be Smart, and use the Rules while dating in High School
 - * If you have acne, do whatever it takes to get rid of it.
 - * If you have extra money, spend it on quality makeup and nice clothes.
 - * If you have a crush on a boy, dress feminine and let him make the first move. Don't be loud or try to get his attention.
 - * Get in the habit of attending social events, but don't act bored or nervous.
 - * Don't have sex with boys.
 - * Don't smoke, drink alcohol, or take drugs.
 - * Stay active in sports.
 - * If a boy doesn't ask you to the Prom, don't ask him. Go with someone who asks you or go with a group.
29. Take care of yourself, and use the Rules for dating in College
 - * Don't hang around, fruitlessly hoping some guy will notice you.
 - * Play it safe. Just because they're college guys doesn't mean they'll behave

That's a little better, but not much. Think of all the times you've exchanged phone numbers in the past. How many times did you actually get to see the other person again. Probably less than 50%. People always are puzzled about this. The women all ask, "Howcome I meet this guy, we have a great conversation, he asks for my number, I give it to him, and then he never calls? What's wrong with men?" Many women are quite bitter about this. They feel betrayed. Often they rush home from work the next three nights expecting him to call. The silence is deafening. What's going on here? There are many reasons why a man doesn't call after asking for your phone number:

1. He lost it.
 2. He forgot who you were. This is common in situations where a great deal of drinking has gone on.
 3. He remembered who you were, but forgot what a great time he had with you.
 4. He fantasized that you might reject him and therefore chickened out.
 5. He called a few times, nobody answered, so he gave up.
- "But wait a second, I have an answering machine. Why didn't the jerk leave a message?"
Many people hate or fear answering machines. Just count the number of times people call and fail to leave a message. In a stressful situation like calling someone for a date, is it that surprising that he might hang up?
Of course the guys have their version of the story. "Howcome I run into women all the time who give me their number and then come up with a song and dance about how busy they are each time I call to ask them out?"
There are many reasons why a woman might not respond positively to your telephone call:

1. She forgot who you were.
 2. She lost interest once she sobered up.
 3. She is genuinely very busy.
 4. She's afraid of dating.
 5. She never intended to go out with you in the first place.
- The last reason is the hardest for men to deal with. "If she didn't want to go out with me then why did she give me her damn number?" The best way to answer that question is to pretend you're an attractive woman. All your life men have come on to you and asked you out or for your telephone number. It's hard to say to someone, "I find you unattractive" or "I don't want to go out with you" or "No, you can't have my telephone number". So what do you do? You give up your telephone number, hoping he'll never call. If he does call, you lie. You say that you're busy Saturday night or you have a boyfriend.
It would be great if we lived in a world where people were honest and didn't play these games. Unfortunately, such is not the case. The price you pay for flirting with women and asking them out on dates is that a certain percentage will lie and pretend to want to go out with you. If you were a woman you'd probably do the same thing.
One piece of advice that is critical for both men and women is to always confirm a date ahead of time. Occasionally you will find that the phone number that was given to you is a phony or that the person has no intention of meeting with you. You can avoid the pain, frustration, and anger of being stood up by taking this simple precaution.

RULE #10: DON'T FALL IN LOVE WITH THE WRONG PERSON

The great American fantasy is to fall in love and live happily ever after. Unfortunately your heart is a poor judge of character. Many single people fall in love with the wrong person and live miserably ever after. Following your feelings can be a recipe for disaster unless they are based on sound information about this person. How do you get the facts about a potential spouse? The answer is you ask. Unfortunately most singles are afraid of getting personal for fear of scaring off a potential loving partner. So they "play it cool" at the beginning of a relationship. They especially avoid "heavy" subjects like sex.

That's fine as long as your feelings towards each other are casual. But what happens when you fall in love? All of a sudden you panic and realize that you know very little about this special person. So now you start with the personal questions. Then disaster strikes. You discover a fatal flaw. For example, you want to have children and they don't. You want marriage and they don't. They want to move to Denver and you love the Bay Area.

Now you're on the horns of a terrible dilemma. You can drop the person and go through the agony of a broken relationship. Or you can do what most people do: marry them and hope to change them. Fat chance! You'll probably end up being married to someone inappropriate and resent them for not changing. The worst relationship is to get personal early in a relationship.
"Hold it a minute. Get personal with a stranger? That's too risky. They're going to think I'm nosy if I ask intimate questions. There's no doubt that it's risky to get personal. Some people can't handle intimacy. They are closed and feel uncomfortable being around someone who wants to share secrets and intimate feelings. But don't you want to find that out as soon as possible? Or would you rather date a guy for 6 months before discovering that he's an emotional cripple?"

Of course there's nothing wrong with playing it cool for a while. At some point, however, you're going to have to bite the bullet. You're going to have to do two things: pry and reveal. When you pry you ask personal questions. When you reveal you let the other person learn personal things about you. That's all there is to it.

If you want to play it safe, pry and reveal simultaneously. For example, suppose you're talking to someone who mentions that they were recently living with someone but moved out. Here's your chance to get personal and raise your superficial conversation to an intimate level. You could ask, "Were you dumped or did you do the dumping?" That's getting personal, but there's a good chance you're going to offend the other person with such a heavy-handed question. An alternative is to say, "I was in a relationship until three months ago, but it broke up very painfully for me. How did yours end?"
"How soon should I get personal?"

That depends on how long you're willing to wait before falling in love. If you want to chitchat for six months before getting serious about someone, that's o.k. Just remember that you are not allowed to fall in love unless you have the answers to your critical questions. I call them killer questions. If any of them are answered incorrectly the relationship is dead. You drop the person immediately.

Another Version of the Questions and Tips From Another Date:

1. Are you single? Pretty obvious, isn't it? You'd be surprised how many people assume that someone by themselves at a party or a dance is single. Always ask. In addition, it makes particular sense for women to ask a man for his home telephone number. If he hands you a business card ask him to write his home number down as well. And be sure to call that number to make sure he isn't married or living with a woman. Be careful with people who answer that they are separated. "Have you moved out?" and "Have you filed for divorce?" are indispensable killer questions. If they are still living with their spouse or haven't yet filed for divorce, it's best you pass and move on to greener pastures.
2. Are you involved with someone romantically? Here's where you avoid someone who already loves someone else.
3. Why didn't your other romantic relationships last? Find out as much as you can about their marriage(s) or past relationships. Hopefully you'll find out their negative qualities. Then you can decide whether you can live with that flavor should move on to someone different. You can also find out if they are incompatible with a certain kind of person. For example, maybe they can't stand being with someone who is possessive and is always checking up on them. If you are that kind of person, you can move on to someone compatible with your flaws.
4. How do you deal with conflict and problems in relationships? If their preference is to sweep problems under the rug or to fall into a rage, they are not good relationship material.
5. Do you have children? How many? Do you want children? How many? How soon do you want to have children? I have dated two women in the past who wanted to have children. By terrible coincidence both wound up falling in love with men who had had vasectomies. Talk about falling in love with the wrong person! Ask questions first, fall in love later.
6. What are your long term goals? Do you want to get married? Do you want to change careers? Do you plan to go back to school? Are you happy in this area or would you prefer moving elsewhere?
7. What do you like to do sexually? What are your sexual fantasies? Most singles are squeamish when it comes to asking these questions. The result is marriages that are unfulfilling sexually for one or both partners. Another potential result is your partner fulfilling their fantasies with others rather than you. Sexual questions are particularly important if you don't believe in pre-marital sex. In that case there's only one way to find out their sexual preferences—ask.
8. Do you have any contagious diseases? Have you engaged in high risk behavior (intravenous drugs or sex with bisexual or homosexual males)? These are literally killer questions. Falling in love with the wrong person can kill you.
9. How much do you drink? Which drugs do you do, and how often?

Here's a homework assignment. Develop your own list of killer questions. The way to do it is to analyze your previous love relationships. What character trait or behavior pattern of a romantic partner destroyed the relationship? Formulate a question to find out whether a prospect has this trait. "How do I know that my prospective romantic partner is answering my killer questions honestly?"

Unfortunately you can't always trust people. They're going to be tempted to tell you what you want to hear rather than the truth. One way of getting around this is to quiz their parents, relatives, and friends. The ideal person to ask, of course, is their ex-spouse. Find out the "dirt" about a prospective romantic partner before you fall in love. This advice is decidedly unromantic, but it sure beats finding out disastrous information after you fall in love.

1. I would like to see a process which goes: 1. Meet casual friends in normal life. This doesn't work easily for people who have non-perpetuating social contact circles, or who have restrictions on dating people at work or don't attend social functions where there is a substantial population of single people of a reasonable age group. Thus match.com, which is not normal life, but will have to do in a pinch.
2. Develop a devoted friendship, where you can get comfortable with someone without wondering whether each time is the last time you'll ever see them. 3. Become lovers. Do a great romantic weekend somewhere to start this off. 4. Get married. Or some derivation of this until both of you are ready.
5. Have a family. Optional according to taste. One can stop anywhere along the above continuum with great happiness, if you haven't skipped steps. If you've skipped any steps, you'll hate each other and yourself (you can demonstrate this by trying steps 5 through 1 in reverse)."

"I never met so many goldiggers and gals with superficial checklists in my life...yikes... you've got to be careful."

"The bottom line is make genuine contact at all costs. If you connect on a genuine level, you have the ball. Shake it up and have fun. Everyone is bored and sick of the bullshit. An honest moment of connection is refreshing"

"There's plenty to go around. If you hog the ball, the team loses. Your friends are not your adversaries. Work together and everyone wins. Petty competition makes everyone look bad. Worst of all, you look desperate or bitter, everyone likes fun. Keep it fun. It's fun to share."

"People like to fill in the blanks. People also want things to be perfect. Keep your mouth shut and they'll fill in the blanks perfectly. Don't try to guess what they're looking for. It's not about what you say, it's how you listen."

"Women are smart. Take this into consideration. They're good at reading the vibe and are in tune with what's really going down. They know what's happening. Don't manipulate, deny, and condescend. It's insulting."

"Women like attention. It's flattering as long as you're respectful and honest."

"Be honest with yourself and with them. If you want intimacy, then own up to it. Don't come at them like you're interested in their nail polish if that you really want is intimacy. It's insulting. You're a man, she's a woman. Deal with it. The more you pretend that it's not about sexual attraction, the harder it will be to redefine the parameters. Honesty works like magic if you're free from guilt. The truth shall set you free."

"Lying is bad. Forget the ethical issue, it's bad business. It demonstrates a lack of self-confidence. Even if you get away with it, you're going down the wrong road. But if a friend gets in trouble, sometimes a simple lie can be a perfect parachute."

"You're a man, so present yourself as one. Confidence and being comfortable with one's self is very attractive. So if you're attracted to a beautiful baby, be both confident and comfortable with that. Don't apologize or qualify how you're feeling. She'll respect you for it."

"There's nothing like a good entrance. You wouldn't want to sit at a table that wasn't set. If you're there too early, you look desperate. Show up late like you're "just stopping by," and you come off like the man about town."

"Everyone wants a mystery. Staring deadpan at a beautiful baby cheats her out of the suspense and courtship she deserves. Keep it intriguing and give her the gift of a challenge."

"The strongest will survive. Don't waste your time filling your head with self-doubt. The competition's fierce, so always give yourself the edge. A sense of self-respect makes all the difference in the world. You can be the king of the Jungle or just another hyena covering at the water hole. It's all up to you."

"Don't hide the fact that you like sex. That doesn't mean act like the fourteen year old on the back of the bus who's constantly pulling on himself and making obscene noises. It just means own your sexuality and don't apologize for it."

"Be a man with a slowhand. The ladies love foreplay, and that's exactly why you wait a few days before you call. No reason to rush it. Let her savor the wait. She'll thank you later."

"Our generation is the first to be presented with the challenge of the answering machine. A good message can put you on the fast track to paradise, a bad one can lead to public ridicule and endless playbacks to the delight of family and friends. The stakes are high. This is no joke. Become a born again virgin. Avoid conversations that are sexual in nature. Using the "someday" technique may put you in the present moment faster than you think. If you cannot stand someone's children, don't marry that person. You will resent the children later and the relationship will fail. Practice makes perfect. Continue practicing friendship. You will need this later in your relationship."

"Sometimes it just happens. Let it. Don't let stupid rules from a book get in the way. If you're lucky enough to have things unfold organically, don't ruin it. You're money."

"You're always better off trusting yourself and playing your game. You wouldn't ask Stockton to bang the boards for rebounds and you wouldn't want Shaq trying to drain threes. Sick with what feels right. That way, even if you fail, you've learned something. Trust your instincts and think for yourself."

"The first date is always in a public place, you take your car, they take their car, both of you leave in your cars and go back to your own homes. The second date is exactly as the first. Exactly as the second. The fourth date can be in one car, mutually agreeable that each of you will return to their respective homes alone. There is to be no touching as far as long kisses, arms around each other, longer than a few seconds hugging. At no time are the two of you to be alone together. Any vehicle causes a chance for being alone. When you arrive home, get out of the car and go inside. There is nothing wrong with being walked to your door. However, talking outside is fine, you enter your home alone. It is my suggestion that you date for the minimum of one year. If there are children from previous marriages or relationships, they are not to meet your date for the first year. This causes damage to the children; as they will see people going in and out of their lives that they become attached to. Remember, being without their father or mother is already traumatic enough."

Sex before marriage is absolutely out. Many times I have heard people talk about their "friends." I ask them if they are sleeping with them, and they say yes. I tell them they are no longer friends. Remember, you don't sleep with your friends! Any time alone together is dangerous. Inappropriate kissing, fondling, etc. will only lead to hormone adjustments and crossing the line is much easier to do in the heat of the moment. Don't set yourself up to fail. If you are a single parent with children, just because you had sex at least once in your life, doesn't mean it is all right to have it again. Become a born again virgin. Avoid conversations that are sexual in nature. Using the "someday" technique may put you in the present moment faster than you think. If you cannot stand someone's children, don't marry that person. You will resent the children later and the relationship will fail. Practice makes perfect. Continue practicing friendship. You will need this later in your relationship."

My Friends Rules:

"Rule #1
HOW WELL YOU ENJOY THIS GAME = HOW WELL YOU MASTER THE RULES.
It is up to you to learn the rules. Ignorance of the rules will not protect you from the consequences of breaking them.

RULE #2:
HOW WELL YOU ENJOY THIS GAME IS BASED ON THE PURPOSE YOU GIVE IT.

For example, if your purpose is to have fun, to learn about yourself and others, and to develop your social skills, then you can enjoy any given date. (Dating is a great opportunity for learning about you and others, if you so choose). On the other hand, if your purpose is to meet your "soul-mate" (whatever that is)-who will magically and instantly turn your unhappy life into a happy one-then it is virtually certain you will not enjoy any given date, nor the game itself.

RULE #3:
GET A LIFE! (if you don't have one already...)

This means: define and pursue your own interests-and consider building non-romantic relationships with a variety of people, including couples. Dating requires that you invite another person into your life. If you don't have one, you are unlikely to attract someone you would want as a mate, since we tend to attract people who are at a similar "level" as we are. By the way, there is a "rule of life" at work here, which some people don't like: YOU alone are responsible for your happiness; no one else can "make" you happy. So make your life full and happy!

RULE #4:
MAKE AN ABSOLUTE COMMITMENT TO LOVE YOURSELF-EVEN IF YOU THINK YOU CAN'T OR DON'T KNOW HOW.

A successful relationship is built on three consistencies: communication, caring, and commitment. And there are two you can give these to another if you withhold them from yourself. Consider using this affirmation daily: "I AM MY OWN BEST FRIEND AND STRONGEST SUPPORTER; I LOVE AND APPRECIATE WHO I AM!" A powerful "stand," such as this, will support you in practicing Rule #5. Also, being more loving to others will increase your self-love. Plus you'll be much more attractive as a person. **

RULE #5:
GET A HANDLE ON YOUR SELF-TALK!

Straight? Are you romantic? Are you shy about your body? Are you sleeping with anyone now? Are you thinking about moving in the next few years? Are you willing to sign a non-disclosure agreement for work purposes? Can you go play during the day? At night? Midweek? Weekends? Can you have a monogamous relationship today? How often do you change your sheets and towels? Describe your childhood? Describe your sense of humor? Describe your work? Do you believe in the supernatural? Do you wash your hands before eating? Do you brush your teeth after eating? Do you believe that one person can have a productive impact on world change? Do you drink alcohol? Do you enjoy your work? Do you go out to eat a lot? Do you have a pet? What kind? Do you have call waiting? If someone calls do you get rid of the person you were talking to? Do you have children? Do they live with you? Ages? Do you have insomnia? Do you like to be held while sleeping? Is your monthly cycle likely to interact with a date or trip we have planned? Do you have sex during that time of the month? Do you like to cook or bake? Do you live in a house, condo, apartment, etc? Do you like soft touch? Do you own a car? What kind? Do you own a computer? How does stress affect your lovemaking ability? Do you own a FAX and what is the number? Do you practice any particular diets or eating habits? Do you sleep-in on Sundays? Do you smoke?, if so will you quit? Do you snore? Do you take a shower at night or in the morning on a regular basis? Would you switch from morning to night or vice versa? Do you understand and distinguish between the five states of intimacy (E: Being sensual, being erotic, having sex, making love, F***ing)? Do you want a relationship? Do you wear pajamas? Do you wiggle or kick in your sleep? Favorite food? Have you ever been to an analyst, psychiatrist or psychologist? Why? Have you ever made love outside? Have you ever slept with someone on the first date? Have you had a recent STD test since you were with someone? Are you willing to provide a doctors certificate of HIV/AIDS testing from the last 30 days if your partner also does? Have you recently broken up with someone? How do you feel if you have to go to work earlier than your mate and they get to stay in bed and sleep longer? How do you feel right now? How do you prefer the weather? How does answering these questions make you feel? How does fast make you feel? How long has it been since your last significant relationship? How long have you lived where you live? How many dates have you ever had? How many different people have you ever been with sexually? How many parties do you go to in an average month? How much do you earn per year? How much time do you spend on the phone each day? How should who-pays-for-what be allocated when going out? How would you describe your personality? Is religion a part of your life? Is spirituality a part of your life? What 3 magazines do you read most? What are the medical tests and requirements for you to safely have barrier-free sex? What are you allergic to? What are your erotic "kinks"? What are your expenses per year? What are your favorite clothes to relax in? What are your favorite TV shows? What are your feelings about having children? What are your feelings about marriage? What do you think of you and me in a relationship, so far as you can tell, all other things being equal, based on projection? What do your friends say is your worst habit? What is your longest you have worked at one job? What is your favorite place in the whole world? What is your astrology sign? What is your favorite body of water? Use an adjective to describe how thinking about it makes you feel? What is your favorite season? What is your favorite surface or texture? What is your idea of a great weekend escape? What is your political viewpoint? What is your bodytype? What are your sexual needs related to specific actions or techniques? If your mate was sick or stressed, how long go you put up with them being like that before looking elsewhere? Can you handle intensity? What kind of birth control do you use? What kind of intimacy have you been used to on a first date? What kind of music do you like? What percent of your ex-mates do you still talk to? What style of clothes do you wear? What time do you generally get up? What time do you generally go to bed? What time do you usually go out at night? How late do you usually stay out? What was the reason you were terminated from all of the jobs that terminated you? Who are your heroes? What are you the most frustrated about in your life? Would you understand if your mate couldn't sleep if they held you all night? Your drinking habits? Your position on recreational drugs? Do you smoke at all? What is your position on who should pay for what? What is your position on how much money you should be provided with by your boyfriend of husband each day, week or month?

* Most of the gals will cancel a few hours before the day or the same day as the date. They get so many offers that they will take the best one for that day or they will get cold feet at meeting a real person and bail. Plan on a large percentage of last minute cancellations and plan a back-up plan!

DEFINITIONS: PARTY: 1. (verb, transitive) To engage in markedly heterosexual activities (e.g., "She's dressed like she wants to party.") 2. (adj.) Exemplifying a proclivity for heterosexual activity (e.g., "I hear she's a party girl.") 3. (noun) A social gathering.

DATE: Function, verb
Inflected Forms: datB7ed, datB7ing

Date: 15th century
transitive senses

1 : to determine the date of ~date an antique~

2 : to record the date of : mark with the date

3 a : to mark with characteristics typical of a particular period b : to show up plainly the age of

4 : to make or have a date with

intransitive senses

5 : to reckon chronologically

6: ORIGINATE -> friendship dating from college days>

7 : to become dated

8 : to go out on usually romantic dates

9 : to go to a public event with another human

10 : To engage in an activity which is planned and which one person or the other pays for

11: To ask and receive acceptance by another single individual with whom you do not have an ongoing significant relationship, to engage in an entertainment event for the purpose of engaging in sexual activities after a series of interpersonal rituals within the date or event.

12: To engage in rituals designed to produce sexual activities with a person whom you recently met

13: To engage in a review process to determine if you and another individual wish to marry or become boyfriend and girlfriend

14: To arrange to go out for a fun activity with friends of any gender or intention

15: Any activity where both parties think there is a chance that sex will happen

RESOURCES: At last count, if you go to <http://www.amazon.com>, and enter the word "dating", in the Search window, for Books, you will find over 351 books on dating;Your friends; Newsgroups, ie. alt.rec.dating; "NOT" advice columnists;Workshops in the alternative newspapers in your city; Classes in things you are interested in. The number one dating class in 2000: Yoga, followed by Photography, followed by Cooking;Best place to meet people: Your Cities largest grocery stores in the best neighborhoods between 4:30PM and 7PM (The San Francisco Marina Safeway being the founder of this tradition). Art gallery openings. Supply stores, ie: Sports, Cooking, Photo, pets, etc: Clubs. Community service groups. Political groups.

Safe Sex Dating Safety And Crucial Medical Info For All Singles

Boys and girls sex sex. We all know that. But do we all know how to have it safely.

Get Tested:

Buy one of these HIV home test kits at: <http://www.homeaccess.com/02/02/>

or call the Private HIV test line at 1-800-584-8183

Or just ask your doctor to test you for:

- HIV (<https://www.mylabbox.com/how-much-does-an-hiv-test-cost/>)

- Hepatitis C

- Herpes Simplex II

- Syphilis (<https://www.mylabbox.com/test-for-syphilis/>)

- Chlamydia (<https://www.mylabbox.com/chlamydia-101-the-facts/>)

- Gonorrhea (<https://www.mylabbox.com/clap-gonorrhea-symptoms-in-women/>)

- Trichomoniasis

- HPV

- Mycoplasma

- Ureaplasma

YOU SHOULD NOT BE DATING UNLESS YOU HAVE HAD THESE TESTS!

Condoms are made of latex or similar materials, and have thousands of natural, microscopic, holes in them. That is the nature of latex. HIV is much smaller than the holes so condoms only decrease the odds, THEY DO NOT PREVENT HIV/AIDS 100%! Get tested.

Testing isn't a quick turn-around, it can take 1 week to 3 weeks to get reasonable results back. If you like somebody, plan ahead, get tested now.

Use soap and water before and right after sex. Yes, soap really kills alot of bad things.

Other at home STD kits only test for the a limited selection of the most common sexually transmitted diseases. The myLAB Box Total Box (<https://www.mylabbox.com>) has been designed to test for all 10 of the top STD risks in the United States, as recorded by the Centers for Disease Control and Prevention. This 10 panel STD test kit screens for:

HIV (<https://www.mylabbox.com/how-much-does-an-hiv-test-cost/>)

Hepatitis C

Herpes Simplex II

Syphilis (<https://www.mylabbox.com/test-for-syphilis/>)

Chlamydia (<https://www.mylabbox.com/chlamydia-101-the-facts/>)

Gonorrhea (<https://www.mylabbox.com/clap-gonorrhea-symptoms-in-women/>)

Trichomoniasis

HPV

Mycoplasma

Ureaplasma

The Total Box allows our customers to get the answers they need without ever stepping outside their home! The results you receive from any myLAB Box test are just as accurate as the ones you would receive from getting testing at a clinic.

Our 10 panel STD test kit is exactly what you need to stay healthy and free from the most common sexually transmitted infections. You can complete each test quickly and conveniently any time, any place!

What is Inside the Total Box?

myLAB Box's Total Box is shipped discreetly to your door. Customers will find the following in each kit:

A urine (for men) or vaginal (for women) sample collection kit

An at-home "finger prick" blood drop collection kit (don't worry – it requires no more than a dime-sized sample!)

Easy-to-follow instructions to make testing simple and quick

Self-addressed stamped envelope to return your sample to the lab

No Embarrassment. All Convenience.

One major benefit of myLAB Box's at-home testing service is that it's an easier, less embarrassing, and far more convenient way to test for STDs (<https://www.mylabbox.com/6-ways-avoid-getting-std-new-year/>).

Many men and women avoid being tested in the first place. This may be due to embarrassment, a busy schedule or general anxiety of visiting the doctor. Reduce your stress, as well as your risk, by screening for sexually transmitted infections with just one set of samples. Performing these tests on your samples complies with all state and federal regulations regarding laboratory testing. Shipping for all myLAB Box's tests is completely free, both to your home and back to our lab. You'll never need to worry about paying for postage.

Telemedicine Puts You In Control

From testing to treatment, myLAB Box is a fully integrated service. Stay confident about your health with accurate and timely lab-certified results.

In the event that your results are positive for any infections, our test packages also offer another incredible feature: telemedicine. These are free consultations with certified STD counselors and physicians for anyone who tests positive using myLAB Box's service. If you live in one of the many states that supports telemedicine – and most do – you can even receive a prescription for treatment right over the phone. Throughout the entire testing process, professionally trained counselors are available to provide assistance and to answer your questions.

<https://www.mylabbox.com/10-panel-std-test/>

Lora Ivanova, Co-Founder and CMO of myLAB Box, adds:

"From affordable screening to complimentary physician consultations for positives, every aspect of the myLAB Box service is designed to be something a user can easily handle out-of-pocket and without complications. The recent shake-up of our healthcare system further deepens our resolve to grow our offerings and develop a new hassle-free lab-testing model. We believe that this is not just great business, but a much-needed resource that can curb a widespread epidemic in the U.S. today."

myLAB Box's Total Box is the easiest and most convenient way to test for the most common sexually transmitted infections. In the midst of today's spreading STD epidemic, regular testing is a must for anyone who engages in intimate sexual activities. This 10 panel STD test (<https://www.mylabbox.com/product/total-box-10-panel-std-test/>) kit lets you test yourself for all major infections within 5 minutes from the comfort of home. myLAB Box provides better access to treatment options. The service aims to curb costs and infections much faster than conventional testing methods. Don't stress, just test!

In Contempt of Match.Com Courtship

By Elizabeth Austin, Washington Monthly

Monica Lewinsky has a new job: doling out her sage dating advice as host of a new Fox TV "reality" show, "Mr. Personality." In the show, a babelicious young stockbroker named Hayley is asked to choose a lover from a group of 20 masked suitors. The masks, we're told, are used to conceal the mer's looks and force Hayley to base her decision on personality alone - a concept that assumes a lady never glances below her date's chin. Unlike Ms. Lewinsky (described in the show's promotional materials only as a psych major-turned-handbag designer who "currently lives in New York City and is considering a future career in law") Fox exes limited their pool of eligible suitors to unmarried men who do not live on Pennsylvania Avenue.

As host, Ms. Lewinsky functions as Hayley's on-site girlfriend, giggling with her at hidden-camera footage that shows the suitors misbehaving at a party and helping her to make the undoubtedly difficult decision to dump the guy who slipped off into a bathroom to share a few intimate moments with a hula dancer. The show has spawned plenty of off-camera controversy: the spurned suitor later claimed that the sound of a zipper opening, heard through the bathroom door, was a sound-effect added in post-production - but primetime audiences' enthusiastic reaction to it has skipped over one huge question: What does it say about our society that we now consider Monica Lewinsky qualified to help anyone find her soulmate?

This document shows you, according to the U.S. Congress, how far things can go.

A program called ACXX hunts down all of your records from your corner pharmacy, your taxi rides, your concert tickets, your grocery purchases, what time you use energy at your home, your doctor records...and all kinds of little bits of info about you and puts that a file about you. That file about you keeps growing for the rest of your life. That file comes in other files from other data harvesting sites like Facebook and Google: FOREVER. The information in that file is used to try to control your politics and ideology.

In recent science studies cell phones were proven to exceed radiation safety limits by as high as 11 times the 2-decade old allowable U.S. radiation limits when phones touch the body. This is one of thousands of good reasons to always remove the battery from your cell phone when you are not talking on it. A phone without a battery in it can't spy on you and send your data to your enemies.

If you are reading this notice, the following data applies to you:

1. EVERY network is known to contain Intel, Cisco, Juniper Networks, AMD, Qualcomm and other hardware which has been proven to contain back-door hard-coded access to outside parties. This is a proven, inarguable fact based on court records, FISA data, IT evidence, national news broadcasts, Congressional presented evidence and inventory records, ie: Krebs On Security, FireEye, ICU, Wikileaks Vault 9, EU, Global IT services, FBI.
2. Chinese, Russian FSB, Iranian and other state-sponsored hacking services as well as 14 year old domestic jobs are able to easily enter your networks, emails and digital files because of this. They can enter your network at any time, with less than 4 mouse clicks, using software available to anyone. This is a proven, inarguable fact based on court records, FISA data, IT evidence and inventory records, ie: Krebs On Security, FireEye, ICU, Wikileaks Vault 9, EU, Global IT services, FBI.
3. Your financial offices are aware of these facts and has chosen not to replace all of the at-risk equipment, nor sue the manufacturers who sold your organization this at risk equipment. They believe that the hassle and cost of replacement and litigation is more effort than the finance department is willing to undertake. This is a proven, inarguable fact based on court records, FISA data, IT evidence, national news broadcasts, Congressional presented evidence and inventory records, ie: Krebs On Security, FireEye, ICU, Wikileaks Vault 9, EU, Global IT services, FBI.
4. In addition to the existing tools that were on the internet, in recent years, foreign hackers have released all of the key hacking software that the CIA, DIA and NSA built to hack into any device. These software tools have already been used hundreds of times. Now the entire world has access to these tools which are freely and openly posted across the web. This is a proven, inarguable fact based on court records, FISA data, IT evidence, national news broadcasts, Congressional presented evidence and inventory records, ie: Krebs On Security, FireEye, ICU, Wikileaks Vault 9, EU, Global IT services, FBI.
5. The computers, servers, routers, cell phones, IP cameras, IP microphones, Smart Meters, Tesla's, "Smart Devices," etc. and other devices openly broadcast their IP data and availability on the internet. In other words, many of your device broadcast a "HERE I AM" signal that can be pinged, scanned, spidered, swept or, otherwise, seen, like a signal-in-the-dark from anywhere on Earth and from satellites overhead. Your devices announce that they are available to be hacked, to hackers. This is a proven, inarguable fact based on court records, FISA data, IT evidence, national news broadcasts, Congressional presented evidence and inventory records, ie: Krebs On Security, FireEye, ICU, Wikileaks Vault 9, EU, Global IT services, FBI.
6. It is bad policy for your organization, or any organization, to think they are immune or have IT departments that can stop these hacks. NASA, The CIA, The White House, EQUIFAX, The Department of Energy, Target, Walmart, American Express, etc. have been hacked hundreds of times. This is a proven, inarguable fact based on court records, FISA data, IT evidence, national news broadcasts, Congressional presented evidence and inventory records, ie: Krebs On Security, FireEye, ICU, Wikileaks Vault 9, EU, Global IT services, FBI.
7. The thinking, "Well, nobody would want to hack us," or "We are not important enough to get hacked" is the most erroneous and negligent thinking one could have in the world today. Chinese, Russian and Iranian spy agencies have a global "Facebook for blackmail" and have been sucking up the data of every entity on Earth for over a decade. If the network was open, they have the data and are always looking for more. The same applies to Google and Facebook who have based their entire business around domestic spying and data re-sale. This is a proven, inarguable fact based on court records, FISA data, IT evidence, national news broadcasts, Congressional presented evidence and inventory records, ie: Krebs On Security, FireEye, ICU, Wikileaks Vault 9, EU, Global IT services, FBI.
8. You are a "Stepping Stone" doorway to other networks and data for targeted individuals and other entities. Your networks provide routes into other people's networks. The largest political industry today is called "Doxing" and "Character Assassination". Billions of dollars are expended by companies such as Ryo-Tel - (DNC); Gawker Media - (DNC); Jatroph - (DNC); Gszmodo Media - (DNC); K2 Intelligence - (DNC); WikiStrat - (DNC); Podesta Group - (DNC); Fusion GPS - (DNC/GOP); Google - (DNC); YouTube - (DNC); Alphabet - (DNC); Facebook - (DNC); Twitter - (DNC); Think Progress - (DNC); Media Matters - (DNC); Black Cube - (DNC); Mossad - (DNC); Correct The Record - (DNC); Sand Line - (DNC/GOP); Blackwater - (DNC/GOP); Stratfor - (DNC/GOP); ShareBlue - (DNC); Wikileaks (DNC/GOP); Cambridge Analytica - (DNC/GOP); Sid Blumenthal - (DNC); David Brock - (DNC); PR Firm Sunshine Sachs (DNC); Covington and Burling - (DNC); Buzzfeed - (DNC) Perkins Cole - (DNC); Wilson Sonsini - (DNC) and hundreds of others to harm others that they perceive as political, personal or competitive threats. Do not underestimate your unintended role in helping to harm others. This is a proven, inarguable fact based on court records, FISA data, IT evidence, national news broadcasts, Congressional presented evidence and inventory records, ie: Krebs On Security, FireEye, ICU, Wikileaks Vault 9, EU, Global IT services, FBI.
9. NEVER believe that you are too small to be noticed by hackers. Parties who believe that are the hackers favorite targets. This is a proven, inarguable fact based on court records, FISA data, IT evidence, national news broadcasts, Congressional presented evidence and inventory records, ie: Krebs On Security, FireEye, ICU, Wikileaks Vault 9, EU, Global IT services, FBI.
10. NEVER believe that because the word "DELL" or "IBM" or "CISCO" is imprinted on the plastic cover of some equipment that you are safe. Big brands are targeted by every spy agency on Earth and are the MOST compromised types of equipment. This is a proven, inarguable fact based on court records, FISA data, IT evidence, national news broadcasts, Congressional presented evidence and inventory records, ie: Krebs On Security, FireEye, ICU, Wikileaks Vault 9, EU, Global IT services, FBI.
11. YOU may not personally care about getting exposed but the person, or agency, you allow to get exposed will be affected for the rest of their lives and they will care very much and could sue you for destroying them via negligence. Be considerate of others in your "internet behavior". Do not put anything that could hurt another on any network, ever. This is a proven, inarguable fact based on court records, FISA data, IT evidence, national news broadcasts, Congressional presented evidence and inventory records, ie: Krebs On Security, FireEye, ICU, Wikileaks Vault 9, EU, Global IT services, FBI.
12. Never post your real photograph online, or on a dating site social media or on any network. There are thousands of groups who scan every photo on the web and cross check those photos in their massive databases to reveal your personal information via every other location your photo is posted. These "image harvesters" can find out where you, who your friends and enemies are and where your kids are in minutes using comparative image data that they have automated and operating around the clock. This is a proven, inarguable fact based on court records, FISA data, IT evidence, national news broadcasts, Congressional presented evidence and inventory records, ie: Krebs On Security, FireEye, ICU, Wikileaks Vault 9, EU, Global IT services, FBI.
13. If you think using web security measures like this makes you "paranoid", then think again. Cautious and intelligent people use these security measures because these dangers are proven in the news headlines daily. Uninformed, naive and low IQ people are the types of people who do not use good web hygiene and who suffer because they are not cautious and are not willing to consider the consequences of their failure to read the news and stay informed.

"Gotham" software written by Palantir shows how government agencies, or anybody, can use very little information to obtain quick access to anyone's personal minutiae.

VICE NEWS Motherboard via public records request has revealed shocking details of capabilities of California law enforcement involved in Fusion Centers, once deemed to be a conspiracy theory like the National Security Agency (NSA) which was founded in 1952, and its existence hidden until the mid-1960s. Even more secretive is the National Reconnaissance Office (NRO), which was founded in 1960 but remained completely secret for 30 years.

Some of the documents instructing California law enforcement (Northern California Regional Intelligence Center) "Fusion Center" are now online, and they show just how much information the government can quickly access with little or no knowledge of a person of interest.

"The guide doesn't just show how Gotham works. It also shows how police are instructed to use the software," writes Caroline Haskins.

"This guide seems to be specifically made by Palantir for the California law enforcement because it includes examples specific to California."

According to DHS, "Fusion centers operate as state and major urban area focal points for the receipt, analysis, gathering, and sharing of threat-related information between federal, state, local, tribal, territorial (SLTT), and private sector partners" like Palantir. Further, Fusion Centers are locally owned and operated, arms of the "intelligence community," i.e. the 17 intelligence agencies coordinated by the National Counterterrorism Center (NCTC). However, sometimes the buildings are staffed by trained NSA personnel like what happened in Mexico City, according to a 2010 Defense Department (DOD) memorandum.

Palantir is a private intelligence data management company mapping relationships between individuals and organizations alike founded by Peter Thiel and CEO Alex Karp and accused rapist Joe Lonsdale. You may remember Palantir from journalist Barrett Brown. Anonymous' hack of HBGary, or accusations that the company provided the technology that enables NSA's mass surveillance PRISM. Founded with early investment from the CIA and heavily used by the military, Palantir is a subcontracting company in its own right. The company has even been featured in the Senate's grilling of Facebook, when Washington State Senator Maria Cantwell asked CEO Mark Zuckerberg, "Do you know who Palantir is?" due to Peter Thiel sitting on Facebook's board.

In 2011, Anonymous' breach exposed HBGary's plan, conceived along with data intelligence firm Palantir, and Berico Technologies, to retaliate against Wikileaks with cyber attacks and threaten the journalism institutions supporters. Following the hack and exposure of the joint plot, Palantir attempted to distance itself from HBGary, which it blamed for the plot.

Bank of America/Palantir/HBGary combined Wikileaks attack plan. You can find more here: <https://t.co/85yECxMzU> pic.twitter.com/hNtUp8gl

—Wikileaks (@wikileaks) November 29, 2016

This was in part because Palantir had in 2011 scored \$250 million in deals ; its customers included the CIA, FBI, US Special Operations Command, Army, Marines, Air Force, LAPD and even the NYPD. So the shady contractor had its reputation to lose at the time being involved in arguably criminal activity against Wikileaks and its supporters.

Palantir describes itself as follows based on its website:

Palantir Law Enforcement supports existing case management systems, evidence management systems, arrest records, warrant data, subpoenaed data, RMS or other crime-reporting data, Computer Aided Dispatch (CAD) data, federal repositories, gang intelligence, suspicious activity reports, Automated License Plate Reader (ALPR) data, and unstructured data such as document repositories and emails.

Palantir's software, Bloomberg reports

combs through disparate data sources—financial documents, airline reservations, cellphone records, social media postings—and searches for connections that human analysts might miss. It then presents the linkages in colorful, easy-to-interpret graphics that look like spider webs.

Motherboard shows how Fusion Center police can now utilize similar technology to track citizens beyond social media and online web accounts with people record searches, vehicle record searches, a Histogram tool, a Map tool, and an Object Explorer tool. (For more information on each and the applicable uses see the Vice News article here.)

Police can then click on an individual in the chart within Gotham and see every personal detail about a target and those around them, from all accounts with people record searches, vehicle record searches, a Histogram tool, a Map tool, and an Object Explorer tool. (For more information on each and the applicable uses see the Vice News article here.)

Palantir's software in many ways is similar to the Prosecutor's Management Information System (PROMIS) stolen software Main Core and may be the next evolution in that code, which allegedly predated PRISM. In 2008, Salon.com published details about a top-secret government database that might have been at the heart of the Bush administration's domestic spying operations. The database known as "Main Core" reportedly collected and stored vast amounts of personal and financial data about millions of Americans in event of an emergency like Martial Law.

The only difference is, again, this technology is being allowed to be deployed by Fusion Center designated police and not just the National Security Agency. Therefore, this expands the power that Fusion Center police — consisting of local law enforcement, other local government employees, as well as Department of Homeland Security personnel — have over individual American citizens.

This is a huge leap from allowing NSA agents to access PRISM database search software or being paid by the government to mine social media for "terrorists."

Fusion Centers have become a long-standing target of civil liberties groups like the EFF, ACLU, and others because they collect and aggregate data from so many different public and private sources.

On a deeper level, when you combine the capabilities of Palantir's Gotham software, the abuse of the Department of Motor Vehicles (DMV) database for Federal Bureau of Investigation/Immigration and Customs Enforcement, and facial recognition technology, you have the formula for a nightmarish surveillance state. Ironically, or perhaps not, that nightmare is the reality of undocumented immigrants as Palantir is one of several companies helping sift through data for the raids planned by ICE, according to journalist Barrett Brown.

YOU HAVE BEEN WARNED:

According to the world's top internet security experts: "...Welcome to the new digital world. Nobody can ever type anything on the internet without getting scanned, hacked, privacy abused, data harvested for some political campaign, spied on by the NSA and Russian hackers and sold to marketing companies. You can't find a corporate or email server that has not already been hacked. For \$5000.00, on the Dark Web, you can now buy a copy of any person's entire dating files from match.com, their social security records and their federal back-ground checks. These holes can never be patched because they exist right in the hardware of 90% of the internet hardware on Earth. Any hacker only needs to find one hole in a network in order to steal everything in your medical records, your Macy's account, your credit records and your dating data. Be aware, these days, Mr. & Ms. Consumer, Facebook, Google, Twitter and Amazon have turned out to be not-what-they-seem. They manipulate you and your personal information in quite illicit manners and for corrupt purposes. Avoid communicating with anybody on the internet because you will never know who you are really talking to. Only communication with people live and in-person..."

THE PROMIS BACKDOOR

Beyond embedded journalists, news blackouts, false flag events, blacklisted and disappeared Internet domains the pipeline of America's "free press" there are now ISP-filtering programs subject to Homeland Security guidelines that sift through emails and texts some into a black hole. Insiders and the NSA-approved, however, can get around such protections of networks by means of the various hybrids of the PROMIS IS backdoor. The 1980s thea of the Prosecutor's Management Information System (PROMIS) software handed over the golden key that would grant most of the world to a handful of criminals. In fact, this one crime may have been the final deal with the devil that consigned the United States to its present shameful descent into moral turpitude. PROMIS began as a COBOL-based program designed to track multiple offenders through multiple databases like those of the DOJ, CIA, U.S. Attorney, IRS, etc. Its creator was a former NSA analyst named William Hamilton. About the time that the October Surprise Iranian hostage drama was stealing the election for former California governor Ronald Reagan and former CIA director George H.W. Bush in 1980, Hamilton was moving his Inslaw Inc. from non-profit to for-profit status.

His intention was to keep the upgraded version of PROMIS that Inslaw had paid for and earmark a public domain version funded by a Law Enforcement Assistance Administration (LEAA) grant for the government. With 570,000 lines of code, PROMIS was able to integrate innumerable databases without any reprogramming and thus turn mere data into information.

With Reagan in the White House, his California cronies at the DOJ offered Inslaw a \$9.6 million contract to install public-domain PROMIS in prosecutors' offices, though it was really the enhanced PROMIS that the good-old-boy network had set its sights on. In February 1983, the chief of Israeli cyberterrorism intelligence was sent to Inslaw under an alias to see for himself the DEC VAX enhanced version. He recognized immediately that this software would revolutionize Israeli intelligence and crush the Palestine intifada. Enhanced PROMIS could extrapolate nuclear submarine routes and destinations, track assets, trustees, and judges. Not only that, but the conspirators had a CIA genius named Michael Riconosciuto who could enhance the enhanced version one step further, once it was in their possession. To install public domain PROMIS in ninety-four U.S. Attorney offices as per contract, Inslaw had to utilize its enhanced PROMIS.

The DOJ made its move, demanding temporary possession of enhanced PROMIS as collateral to ensure that all installations were completed and that only Inslaw money had gone into the enhancements. Naïvely, Hamilton agreed. The rest is history: the DOJ delayed payments on the \$9.6 million and drove Inslaw into bankruptcy. With Edwin Meese III as Attorney General, the bankruptcy system was little more than a political patronage system, anyway. The enhanced PROMIS was then passed to the brilliant multivalent computer and chemical genius Riconosciuto, son of CIA Agent Marshall Riconosciuto. S flourished at sixteen, Michael had studied with Nobel Prize-winning physicist and co-inventor of the laser Arthur Schallo. Michael was moved from Inslaw to Silver Springs to Miami as he worked to insert a chip that would broadcast the contents of whatever database was present to collection satellites and monitoring vans like the Google Street View van, using a digital spread spectrum to make the signal look like computer noise. This Trojan horse would grant key-club access to the backdoor of any person or institution that purchased PROMIS software as long as the backdoor could be kept secret. Meanwhile, the drama between Hamilton and the conspirators at DOJ continued. A quiet offer to buy out Inslaw was proffered by the investment banking firm Allen & Co., British publisher (Daily Mirror) Robert Maxwell, the Arkansas corporation Systematics, and Arkansas lawyer (and Clinton family friend) Webb Hubbell.

Hamilton refused and filed a \$50 million lawsuit in bankruptcy court against the DOJ on June 9, 1986. Bankruptcy Judge George F. Bason, Jr. ruled that the DOJ had indeed stolen PROMIS through trickery, fraud, and deceit, and awarded Inslaw \$6.8 million. He was unable to bring perjury charges against government officials but recommended to the House Judiciary Committee that it conduct a full investigation of the DOJ. The DOJ's appeal failed, but the Washington, D.C. Circuit Court of Appeals reversed everything on a technicality. Under then-President George H.W. Bush (1989 — 1993), Inslaw's petition to the Supreme Court in October 1991 was scotched. When the IRS lawyer requested that Inslaw be liquidated in such a way that the U.S. Trustee program (AG Meese's feeding trough between the DOJ and IRS) could name the trustee who would convert the assets, oversee the auction, and retain the appraisers, Judge Bason refused.

Under then-President William Jefferson Clinton (1993 — 2001), the Court of Federal Claims whitewashed the DOJ's destruction of Inslaw and thea of PROMIS on July 31, 1997. Judge Christine Miller sent a 186-page advisory opinion to Congress claiming that Inslaw's complaint had no merit a somber message to software developers seeking to do business with Attorney Generals and their DOJ. For his integrity, Judge Bason lost his bench seat to the IRS lawyer. T

Throughout three administrations, the mainstream Mockingbird media obediently covered up the Inslaw affair, enhanced PROMIS being a master tool of inference extraction able to track and eavesdrop like nothing else. Once enhanced PROMIS was being sold domestically and abroad so as to steal data from individuals, government agencies, banks, and corporations everywhere, intelligence-connected Barry Kurnick - turned PROMIS into an artificial intelligence (AI) tool called SMART (Special Management Artificial Reasoning Tool) that revolutionized surveillance. The DOJ promised Kurnick \$25 million, then forced him into bankruptcy as it had Hamilton. (Unlike Hamilton, Kurnick settled for a high security clearance and work at military contractors Systematics and Nortrop.) Five Eyes / Echelon and the FBI's Carnivore / Data Collection System 1000 were promptly armed with SMART, as was closed circuit satellite highdefinition (HD) television. With SMART, Five Eyes / Echelon intercepts for UKUSA agencies became breathtaking.

The next modification to Hamilton's PROMIS was Brainstorm, a behavioral recognition software, followed by the facial recognition software Flexible Research System (FRS); then Semantic Web, which looks not just for link words and embedded code but for what it means that this particular person is following this particular thread. Then came quantum modification. The Department of Defense paid Simulix, Inc. to develop Sentient World Simulation (SWS), a synthetic mirror of the real world with automated continuous calibration with respect to current real-world information. The SEAS (Synthetic Environment for Analysis and Simulations) software platform drives SWS to devour as many as five million nodes of breaking news census data, SHAing economic indicators, real world weather patterns, and social media data, then feeds it proprietary military intelligence and fictitious events to gauge their destabilizing impact. Research into how to maintain public cognitive dissonance and learned helplessness (psychologist Martin Seligman) help SEAS deduce human behavior.

There are legitimate reasons (<http://www.learnliberty.org/videos/edward-snowden-surveillance-is-about-power/>) to want to avoid being tracked and spied-on while you're online. But aside from that, doesn't it feel creepy knowing you're probably being watched every moment that you're online and that information about where you go and what you do could potentially be sold to anyone at any time—to advertisers, your health insurance company, a future employer, the government, even a snoopy neighbor? Wouldn't you feel better not having to worry about that on top of everything else you have to worry about every day?

You can test to what extent your browser is transmitting unique information using these sites: panopticonclick.com, Shieldsup.com, and ip-check.info.

<https://panopticonclick.eff.org/>

<https://www.grc.com/shieldsup>

<https://cheapskatesguide.org/articles/ip-check.info?lang=en>

These sites confirm that browsers transmit a lot of data that can be used for fingerprinting. From playing around with these sites, I have noticed that turning off javascript in my browser does help some. Also the TOR browser seems to transmit less data than most, but even it is not completely effective. The added benefit that you get from the TOR browser and especially the TAILS operating system is that they block your IP address from the websites you visit. You want to try several browsers to see which one transmits the least information. Perhaps you will be lucky enough to find a browser that transmits less information than the TOR browser.

The next thing to be aware of is that corporations have methods other than tracking to spy on you. There is a saying that if a corporation is offering you their product for free, you are their product. This means that corporations that offer you free services are selling the data they collect from you in order to be able to provide you with these services. So, chances are that companies that provide you with free email are reading your email. We know that, in addition to tracking you, Facebook reads your posts and knows who your friends are, and that is just the beginning of Facebook's spying methods. Free online surveys are just ways of collecting more data from you. Companies also monitor your credit card transactions and sell your online dating profiles. If you have a Samsung TV that is connected to the internet, it's probably recording what you watch and may even be listening to your private conversations in your home. In fact, anything that you have in your home that is connected to the internet may be spying on you, right down to your internet-connected light bulb. With a few exceptions, online search engines monitor and log your searches. One of the exceptions is the Ixquick.com search engine, which is headquartered in Europe. The steps to counter the nearly ubiquitous activities of free service providers would be to pay for services you receive online, read website privacy agreements, and not buy products that are known to be spying on you. However, the only way to be really secure from corporations using the internet to spy on you is to never connect to the internet or buy any internet-connected appliances. Welcome back to the 1980's.

Protecting yourself from government spying while you are on the internet is the hardest and requires the most knowledge. The biggest problem is that unless a whistle-blower like Edward Snowden tells us, we have no way of knowing how governments may potentially be spying on us. That means that we have no way of protecting ourselves 100% of the time from government spying. Some things whistle-blowers have revealed (<https://secureswissdata.com/9-ways-government-spying-on-internet-activity/>) are that the US government logs the meta data from all phone calls (who calls who and when), security forces internet service providers and providers of other services to allow it to "listen in on" and record all traffic going through their servers, reads nearly all email sent from everywhere in the world, and tracks the locations of all cell phones (even when they're turned off). And, although I am not aware of any specific whistle-blower revelations on this, there is every reason to believe that the US government (and perhaps others, including China's) has backdoors built into all computer hardware and operating system software for monitoring everything we do on our cell phones, tablets, laptops, desktop computers, and routers. (<https://www.etecknix.com/nsa-may-backdoors-built-intel-and-processors/>) See also this. Because Lenovo computers are manufactured in China, the US government has issued warnings to all US government agencies and subcontractors to strongly discourage them from using Lenovo computers. And the US government probably has backdoors (<https://www.atlasobscura.com/articles/a-brief-history-of-the-rsa-attempting-to-insert-backdoors-into-encrypted-data>) into all commercially-available encryption software, with the possible exception of Truecrypt version 7.1a. I hope you are understanding now the magnitude of the lengths that governments are going to (using your tax money) to spy on you. In truth, we are now approaching the level of government spying that George Orwell warned about in his book, 1984

So what can we practically do to protect ourselves from government spying? Seriously, there isn't much, if we want to use cell phones, credit cards, and the internet. About all we can do, if we absolutely need to have a private conversation, is to have a face-to-face meeting without any electronics within microphone range. That includes cell phones, Samsung TVs, video cameras, computers, or land-line telephones. And don't travel to the meeting place using long-distance commercial transportation. Sending a letter through the US mail is the next best, although it is known that the sides of all mail sent through the US mail are photographed, and the pictures are stored. So, don't put your return address on the envelope. (http://www.abajournal.com/news/articles/new_york_times_post_office_photocopies_envelopes_of_all_mail_sent_in_the_us/) As far as surfing the internet is concerned, begin with all the precautions that I outlined above to protect yourself from corporate spying (except HTTPS and VPNs). Then, add the TAILS operating system on a USB stick. As I said, TAILS will prevent you from being identified and tracked via the fingerprinting method. And who can be sure whether the government has a backdoor in TAILS? As far as I know, the super paranoid, hoodly and sunglasses method I outlined above is the next step.

Experts warn of 'epidemic' of bugging devices used by stalkers - By James Hockaday

Stalkers are using cheap bugging devices hidden in everyday household items

More funding and legal powers are needed for police to stop a surge of stalkers using eavesdropping devices to spy on victims, experts have warned.

Firms paid to detect the bugs say they're finding more and more of the devices which are readily available on online marketplaces like Amazon and eBay.

Jack Lazzereschi, Technical Director of bug sweeping company Shapestones, says cases of stalking and victims being blackmailed with intimate footage shot in secret has doubled in the past two years.

He told Metro.co.uk: 'The police want to do something about it, they try to, but usually they don't have the legal power or the resources to investigate.'

'For us it's a problem. We try to protect the client, we want to assure that somebody has been protected.'
Advert for a hidden camera device planted inside a freismoke alarm sold on Amazon

People are paying as little as £15 for listening devices and spy cameras hidden inside desk lamps, wall sockets, phone charger cables, USB sticks and picture frames.

Users insert a sim card into a hidden slot and call a number to listen in on their unwitting targets.

People using hidden cameras can watch what's happening using an apps on their phones.

Jack says the devices are so effective, cheap and hard to trace to their users, law enforcement prefer using them over expensive old-school devices.

Although every case is different, in situations where homeowners plant devices in their own properties, Jack says there's usually a legal 'grey area' to avoid prosecution.

The devices themselves aren't illegal and they are usually marketed for legitimate purposes like protection, making it difficult for cops to investigate.

There is no suggestion online marketplaces like eBay and Amazon are breaking the law by selling them.

But in some instances, images of women in their underwear have been used in listings - implying more sinister uses for the devices.
Even in cases when people are more clearly breaking the law, Jack says it's unlikely perpetrators will be brought to justice as overstretched police will prioritise resources to stop violent crimes.

Jack's says around 60 per cent of his firm's non-corporate cases cases involve stalking or blackmail.

He says it's become an 'epidemic' over the past couple of years with the gadgets more readily available than ever before.

Jack Lazzereschi says he's seen stalking cases double in a few years

Victims are often filmed naked or having sex and threatened with the threat of footage being put online and in the worst cases children are also recorded.

Jack says UK law is woefully unprepared to deal with these devices compared to countries in the Asian-Pacific region.

In South Korea authorities have cracked down on a surge of perverts planting cameras in public toilets.

James Williams, director of bug sweepers QCC Global says snooping devices used to be the preserve of people with deep pockets and technological know-how.

He said: 'It's gone from that to really being at a place where anybody can just buy a device from the internet.'

'Anything you can possibly think of you can buy with a bug built into it. I would say they're getting used increasingly across the board.'

Suky Bhaker, Acting CEO of the Suzy Lamplugh Trust, which runs the National Stalking Helpline, warned using these gadgets could be a prelude to physical violence.

She said: 'We know that stalking and coercive control are extremely dangerous and can cause huge harm to the victim, both in terms of their psychological wellbeing and the potential for escalation to physical violence or even murder.'

'The use of surveillance devices or spyware apps by stalkers, must be seen in the context of a pattern of obsessive, fixated behaviour which aims at controlling and monitoring the victim.
She added: 'There should be clarity for police forces that the use of surveillance equipment by stalkers to monitor their victim's location or communications is a sign that serious and dangerous abuse may be present or imminent.'

'All cases of stalking or coercive control should be taken seriously and investigated when reported to police.'

The charity is calling for all police forces across the country to train staff in this area.

Earlier this month a policeman known only by his surname Mills was barred from the profession for life for repeatedly dismissing pleas for help from 19-year-old Shana Grice who was eventually murdered by her stalker ex-boyfriend Michel Lane.

A spokesman for eBay said: 'The listing of mini cameras on eBay is permitted for legitimate items like baby monitors or doorbell cameras.'

'However, items intended to be used as spying devices are banned from eBay's UK platform in accordance with the law and our policy.'

'We have filters in place to block prohibited items, and all the items flagged by Metro have now been removed.'

Face-tracking harvesters grab one picture of you and then use it to find every other digital picture of you on Earth and open every social media post, resume, news clipping, dating account etc. and sell the full dossier on you to Axiom, the NSA, Political manipulators etc. and hack your bank accounts and credit cards. Never put an unsecured photo of yourself online.

=====

Who's Watching Your WebEx? Webex has many back-door spy paths built in
KrebsOnSecurity spent a good part of the past week working with Cisco to alert more than four dozen companies — many of them household names — about regular corporate WebEx conference meetings that lack passwords and are thus open to anyone who wants to listen in.

Department of Energy's WebEx meetings.

At issue are recurring video- and audio conference-based meetings that companies make available to their employees via WebEx, a set of online conferencing tools run by Cisco. These services allow customers to password-protect meetings, but it was trivial to find dozens of major companies that

do not follow this basic best practice and allow virtually anyone to join daily meetings about apparently internal discussions and planning sessions.
Many of the meetings that can be found by a cursory search within an organization's "Events Center" listing on WebEx.com seem to be intended for public viewing, such as product demonstrations and presentations for prospective customers and clients. However, from there it is often easy to discover a host of other, more proprietary WebEx meetings simply by clicking through the daily and weekly meetings listed in each organization's "Meeting Center" section on the WebEx.com site.
Some of the more interesting, non-password-protected recurring meetings I found include those from Charles Schwab, CSC, CBS, CVS, The U.S. Department of Energy, Fannie Mae, Jones Day, Orbiz, Paychex Services, and Union Pacific. Some entities even also allowed access to archived event recordings.

Cisco began reaching out to each of these companies about a week ago, and today released an all-customer alert (PDF) pointing customers to a consolidated best-practices document written for Cisco WebEx site administrators and users.
In the first week of October, we were contacted by a leading security researcher, Cisco wrote, "He showed us that some of our WebEx customer sites were publicly displaying meeting information online, including meeting Time, Topic, Host, and Duration. Some sites also included a 'join meeting' link."

Quest Diagnostics Says All 12 Million Patients May Have Had Financial, Medical, Personal Information Breached. It includes credit card numbers and bank account information, according to a filing... HOW MANY TIMES DO YOU NEED TO BE TOLD: "NEVER, EVER, GIVE TRUE INFORMATION TO ANY COMPANY THAT USES A NETWORK OR MAKES YOU SIGN-IN TO ANYTHING ONLINE!"

Google still keeps a list of everything you ever bought using Gmail, even if you delete all your emails, and provides that data to political parties, the NSA and marketing companies so they can manipulate you

Todd Haselton@robotodd

Key Points

- Google Gmail keeps a log of everything you buy.
- Google says this is so you can ask Google Assistant about the status of an order or reorder something.
- It also says you can delete this log by deleting the email, but three weeks after we deleted all email, the list is still there.

Google and other tech companies have been under fire recently for a variety of issues, including failing to protect user data, failing to disclose how data is collected and used and failing to police the content posted to their services.
Companies such as Google have embedded themselves in our lives with useful services including Gmail, Google Maps and Google Search, as well as smart products such as the Google Assistant which can answer our questions on a whim. The benefits of these tools come at the cost of our privacy, however, because while Google says that privacy should not be a "luxury good," it's still going to great lengths to collect as much detail as possible about its users and making it more difficult than necessary for users to track what's collected about them and delete it.

Here's the latest case in point.

In May, I wrote up something weird I spotted on Google's account management page. I noticed that Google uses Gmail to store a list of everything you've purchased, if you used Gmail or your Gmail address in any part of the transaction.
If you have a confirmation for a prescription you picked up at a pharmacy that went into your Gmail account, Google logs it. If you have a receipt from Macy's, Google keeps it. If you bought food for delivery and the receipt went to your Gmail, Google stores that, too.
You get the idea, and you can see your own purchase history by going to Google's Purchases page.
Google says it does this so you can use Google Assistant to track packages or reorder things, even if that's not an option for some purchases that aren't mailed or wouldn't be reordered, like something you bought a store.

At the time of my original story, Google said users can delete everything by tapping into a purchase and removing the Gmail. It seemed to work if you did this for each purchase, one by one. This isn't easy — for years worth of purchases, this would take hours or even days of time.
So, since Google doesn't let you bulk-delete this purchases list, I decided to delete everything in my Gmail inbox. That meant removing every last message I've sent or received since I opened my Gmail account more than a decade ago.

Like a horror movie villain that just won't die

On Friday, three weeks after I deleted every Gmail, I checked my purchases list.

I still see receipts for things I bought, books, food deliveries, books I bought on Amazon, music I purchased from iTunes, a subscription to Xbox Live I bought from Microsoft — it's all there.

Most Of The Owners Of Big Dating Sites Turn Out To Be Crooks And Political Manipulators

- Beware of who you trust with your sex life
- Big dating site owners found to be engaged in tax evasion, sex trafficking, political bribery, privacy abuse, selling access to hackers, domestic spying, human rights violations, political Honey Traps and other crimes
- "Don't worry, Trust Us" the site owners say but the world always later finds out they are leaking your data to all kinds of awful outsiders
- Never, Ever, trust a dating site to protect your privacy
- Every major dating site reads all of your text messages and stores archives of all of your dating site messages forever
- Every photo, or personal data point, that you put on a data site can instantly be reverse tracked back to all of your other work, employment, medical and personal data on the internet
- A low level admin or operators blogger in the offices of match.com, OKCUPID, Plenty of Fish, Tinder or other sites might tell you that "they don't do any of those bad things" but they are either lying or naive. Big dating sites exist for only two reasons: Profiteering and Political Spying
- Chelsea Clinton's OK Cupid, Match.com and Plenty of Fish DNC Facial Recognition Political Spy Tech Is Growing Stronger By Stealing Your Face

Chelsea Clinton's OK Cupid, Match.com and Plenty of Fish DNC Facial Recognition Political Spy Tech Is Growing Stronger By Stealing Your Face

- They use sex to trap you into revealing how to manipulate you.
- All of the JOIN UP questions at OK Cupid are essentially the DNC's political agenda questions
- They use emotional vulnerabilities to trick you into being spied on for political purposes
- Mass user class-action lawsuits being formed to sue Chelsea Clinton's iAC (The ACTUAL owner of these websites) into oblivion for abusing users
- I asked Tinder for my data. It sent me 800 pages of my...

<https://www.theguardian.com/technology/2017/sep/26/tinder-personal-data-dating-app-messages-hacked-sold> I asked Tinder for my data. It sent me 800 pages of my deepest, darkest secrets The dating app knows me better than I do, but these reams of intimate information are just the tip of the iceberg.

THE CLINTON DATING SITE SEX CULT CONNECTION

FACTS:

1. Chelsea Clinton went to Stanford University and helped get Stanford's Brainwash project going
2. The Brainwash project, and 12 others, harvest data from Match.com, OKCUPID and Plenty of Fish users
3. Chelsea Clinton runs iAC which owns Match.com, OKCUPID and Plenty of Fish
4. Jeffrey Epstein finances the Clinton Family and is an arrested pedophile sex cult operator
5. Jeffrey Epstein handled sex trafficking and his buddies from Match.com, OKCUPID and Plenty of Fish
6. Ghislaine Noelle Maxwell was one of the heads of Jeffrey Epstein's procurement efforts of young girls
7. Ghislaine Noelle Maxwell was a guest of honor at Chelsea Clinton's wedding
8. Match.com, OKCUPID and Plenty of Fish sell their user data to the DNC and Democrat political operatives and all of the initial site questions on OKCUPID are from the DNC election platform!

SEX CULT BOSS Ghislaine Noelle Maxwell At The Clinton Wedding as Guest Of Honor

By Cade Metz

Companies gather massive databases of people's images, for facial recognition spy tools, from Match.com And OkCupid
Cade Metz

© Open Data Commons Public Domain Dedication and License/Megapixels via The New York Times In an undated handout image from the website Megapixels, a sample image from the Brainwash database, created by Stanford University researchers, which contains more than 10,000 images and nearly 82,000...

SAN FRANCISCO — Dozens of databases of people's faces are being compiled without their knowledge by companies and researchers, with many of the images then being shared around the world, in what has become a vast ecosystem fueling the spread of facial recognition technology. The databases are pulled together with images from social networks, photo websites, dating services like OkCupid, and cameras placed in restaurants and on college quads. Although there is no precise count of the datasets, privacy activists have pinpointed repositories that were built by Microsoft, Stanford University, and others, with one holding more than 10 million images while another had more than 2 million.

The facial compilation is being driven by the race to create leading-edge facial recognition systems. This technology learns how to identify people by analyzing as many digital pictures as possible using "neural networks," which are complex mathematical systems that require vast amounts of data to build pattern recognition.

Tech giants Facebook and Google have most likely amassed the largest face data sets, which they do not distribute, according to research papers. But other companies and universities have widely shared their image troves with researchers, governments, and private enterprises in Australia, China, India, Singapore, and Switzerland for training artificial intelligence, according to academics, activists, and public papers.

Companies and labs have gathered facial images for more than a decade, and the databases are merely one layer to building facial recognition technology. But people often have no idea that their faces ended up in them. And while names are typically not attached to the photos, individuals can be recognized because of their unique face to a person.

Questions about the datasets are rising because the technologies that they have enabled are being used in potentially invasive ways. Documents released last Sunday revealed that Immigration and Customs Enforcement officials employed facial recognition technology to scan motorists' photos to identify unauthorized immigrants. The FBI also spent more than a decade using such systems to compare driver's license and visa photos against the faces of suspected criminals, according to a Government Accountability Office report last month. On Wednesday, a congressional hearing tackled the government's use of the technology.

There is no oversight of the datasets. Activists and others said they were angered by the possibility that people's likenesses had been used to build ethically questionable technology and that the images could be misused. At least one facial database created in the United States was shared with a company in China that has been linked to ethnic profiling of the country's minority Uighur Muslims.

Over the past several weeks, some companies and universities, including Microsoft and Stanford, removed their facial datasets from the internet because of privacy concerns. But given that the images were already so well distributed, they are most likely still being used in the United States and elsewhere, researchers and activists said.

"You come to see that these practices are intrusive, and you realize that these companies are not respectful of privacy," said Liz O'Sullivan, who oversaw one of these databases at the artificial intelligence startup Clarifai. She said she left the New York-based company in January to protest such practices.

"The more ubiquitous facial recognition becomes, the more exposed we all are to being part of the process," she said.

Google, Facebook, and Microsoft declined to comment.

One database, which dates to 2014, was put together by researchers at Stanford. It was called Brainwash, after a San Francisco cafe of the same name, where the researchers tapped into a camera. Over three days, the camera took more than 10,000 images, which went into the database, the researchers wrote in a 2015 paper. The paper did not address whether cafe patrons knew their images were being taken and used for research. (The cafe has closed.)

The Stanford researchers then shared Brainwash. According to research papers, it was used in China by academics associated with the National University of Defense Technology and Megvii, an artificial intelligence company that The New York Times previously reported has provided surveillance technology for monitoring Uighurs.

The Brainwash dataset was removed from its original website last month after Adam Harvey, an activist in Germany who tracks the use of these repositories through a website called MegaPixels, drew attention to it. Links between Brainwash and papers describing work to build AI systems at the National University of Defense Technology in China have also been deleted, according to documentation from Harvey.

Stanford researchers who oversaw Brainwash did not respond to requests for comment. "As part of the research process, Stanford routinely makes research documentation and supporting materials available publicly," a university official said. "Once research materials are made public, the university does not track their use nor did university officials."

At Microsoft, researchers have claimed on the company's website to have created one of the biggest facial datasets. The collection, called MS Celeb, spanned over 10 million images of more than 100,000 people.

MS Celeb was ostensibly a database of celebrities, whose images are considered fair game because they are public figures. But MS Celeb also brought in photos of privacy and security activists, academics, and others, such as Shoshana Zuboff, the author of the book "The Age of Surveillance Capitalism," according to documentation from Harvey of the MegaPixels project. MS Celeb was distributed internationally before being removed this spring after Harvey and others flagged it.

Matt Zeiler, founder and chief executive of Clarifai, the AI startup, said his company had built a facial database with images from OkCupid, a dating site. He said Clarifai had access to OkCupid's photos because some of the dating site's founders invested in his company.

He added that he had signed a deal with a large social media company — he declined to disclose which — to use its images in training facial recognition models. The social network's terms of service allow for this kind of sharing, he said.

"There has to be some level of trust with tech companies like Clarifai to put powerful technology to good use and get comfortable with that," he said.

An OkCupid spokeswoman said that Clarifai contacted the company in 2014 "about collaborating to determine if they could build unbiased AI and facial recognition technology" and that the dating site "did not enter into any commercial agreement then and have no relationship with them now." She did not address whether Clarifai had gained access to OkCupid's photos without its consent.

Clarifai used the images from OkCupid to build a service that could identify the age, sex, and race of detected faces, Zeiler said. The startup also began working on a tool to collect images from a website called Insecam — short for "insecure camera" — which taps into surveillance cameras in city centers and private spaces without authorization. Clarifai's project was shut down last year after some employees protested and before any images were gathered, he said.

Zeiler said Clarifai would sell its facial recognition technology to foreign governments, military operations, and police departments provided the circumstances were right. It did not make sense to place blanket restrictions on the sale of technology to entire countries, he added.

O'Sullivan, the former Clarifai technologist, has joined a civil rights and privacy group called the Surveillance Technology Oversight Project. She is now part of a team of researchers building a tool that will let people check whether their image is part of the openly shared facial databases.

"You are part of what made the system what it is," she said.

Dating website founder: Love doesn't exist (Opinion) - CNN.com
<https://www.cnn.com/2014/09/25/opinion/seeking-arrangement-ceo-on-love/index.html>
Seeking Arrangement is a dating site, which means most of the men here are eventually hoping to have sex. Isn't that the point of dating? But this is not prostitution.

Avoid The Sex Infections Match.com Dating Causes By Using These New Technologies

- You can rub a jelly on the male penis that prevents STD's
Microbicides are sexually transmitted diseases are pharmacologic agents and chemical substances that are capable of killing or destroying certain microorganisms that commonly cause human infection (for example, the human immunodeficiency virus). Microbicides are a diverse group of chemical compounds that exert their activity by a variety of different mechanisms of action. Multiple compounds are being developed and tested for their microbicidal activity in clinical trials. Microbicides can be formulated in various delivery systems including gels, creams, lotions, aerosol sprays, tablets or films (which must be used near the time of sexual intercourse) and sponges and vaginal rings (or other devices that release the active ingredient(s) over a longer period). Some of these agents are being developed for vaginal application, and for rectal use by those engaging in anal sex.
- The Oraquick mouth-swab is at every major pharmacy and can detect HIV in minutes with high accuracy
With OraQuick®, you have the comfort of getting your test results in the privacy of your own home. It's the only at-home oral HIV test approved by the FDA.
<http://www.oraquick.com/What-is-OraQuick/OraQuick-In-Home-HIV-Test>
- Home tests can now detect the top STD's
You must be tested for the following STD's before you start dating:
- CHLAMYDIA (genital, throat, rectal)
- GONORRHEA (genital, throat, rectal)
- HEPATITIS C
- HIV I & II
- HERPES SIMPLEX 2
- SYPHILIS
- TRICHOMONIASIS
- MYCOPLASMA GENITALIUM
- HPV
If you do not test for these STD's on a regular basis, in the modern world, you will probably get one of them
<https://www.athomestdtests.com/>
<https://www.mylabbox.com/>
<https://www.privateidna.com/>
<https://www.cvs.com/shop/home-health-care/home-tests/std-test>
<https://www.everywell.com/products/std-test-male/>
plus your own doctor and any community clinic...

- You can take pills to prevent HIV
Per: <https://www.cdc.gov/hiv/risk/prep/index.html>
...you can take Prep Pills to prevent HIV but you can't usually get the prescription unless you tell the doctor you are ass-fucking gay men all of a sudden. ... It works on non-gay people but they don't like to give it to straight people for odd political reasons.

- Get a home lab
The equipment to test for STD's used to cost millions of dollars but now you can buy forensics portable testing equipment for less than \$30,000.00 to test yourself and any new partner quickly. If you avoiding getting AIDS, \$30,000.00 is worth the investment. The prices are always dropping. As a backup plan, you can use ORAQUICK and a combination of these tests: <https://www.amazon.com/hiv-test-kits?k=hiv+test+kit>

How To Never Have Another Boring Match.com Date

Many first dates and new couples find it hard to think of things to do. Here is a small sample of the things you can do in just one area, ie: around the San Francisco Bay Area:

- Walk around Angel Island
- Ask a stranger for directions to the nearest park
- Attend a performance at Zellerbach Hall at the University of California in Berkeley
- Attend an Animation Film Festival
- Back the car up to a cliff-side view of the ocean and have a picnic in the back over-looking the entire Pacific ocean
- Bake Cookies
- Go to the student film festival at one of the universities
- Find a beach you have never visited yet
- Bed & Breakfast Inns
- Borrow a dog and take them for a run on the beach

- Build a roadside library box and fill it with your old bookstore-
- Buy a book at City Lights bookstore in San Francisco's North Beach
- Buy a pumpkin for Halloween in Half Moon Bay at Bob's Pumpkin Patch
- Call into radio shows and see how much airtime you can get
- Camp, hike, bike ride, fish or whatever you like in Lake Tahoe (Several hours from the Bay Area)
- Check Out Art Galleries
- Climb a tree
- Collect stuff at the beach
- Crash a wedding reception at a Golf Club
- Dance to Salsa music in the Mission District of San Francisco
- Do an exotic jigsaw puzzle
- Do the "step-over" in a cross-walk
- Drive along Highway between San José and Santa Cruz See beautiful mountains, homes, redwoods and much more
- Drive Big Sur and stop at Nepenthe or the Post Ranch Inn
- Drive down every road in Napa and explore
- Drive scenic Highway from San Francisco to Santa Barbara
- Drive to the top of Mount Hamilton and see the Lick Observatory in San José
- Drop someone off at Alcatraz Island
- Eat Dessert
- Eat Good food
- Enjoy a beautiful summer day anywhere in the Bay Area
- Enjoy a California or Stanford basketball game
- Enjoy a performance or an exhibition at the Mission Cultural Arts Center in San Francisco
- Enjoy a sunset at any beach
- Enjoy camping on a beach south of Carmel Camping is available on beaches all the way to the Mexican border
- Enjoy international food and listen to music all weekend long during Tapestry and Talent in downtown San José
- Enjoy the beautiful homes and breathtaking coastline while driving from Pacific Grove through Del Monte ending in Carmel
- Enjoy the San José Jazz Festival at Cesar Chavez Plaza
- Enjoy the Santa Clara County Fair in San José
- Feed a homeless person
- Feed a squirrel
- Fish, drink a soda and eat calamari at the Santa Cruz Pier
- Flip some coins into a fountain
- Fly a glider over the farms of Monterey
- Fly acrobatic dual line kits
- Fly gliders
- Fly kites
- Flying Kites
- Foot Tickling
- Get a lifetime National Park pass and use it every month
- Get/Give a massage
- Go bike riding or just enjoy the flowers at Golden Gate Park in San Francisco
- Go boating in the San Francisco Bay
- Go Dancing
- Go dancing at the Top of the Mark in San Francisco
- Go dining with friends
- Go fishing off the Capitola Pier and enjoy the live jazz music on some weekends
- Go fishing off the Pacifica Wharf
- Go Furniture Hunting
- Go Hiking at Pescadero
- Go horseback riding near Uvas Meadows in San José
- Go People Watching in North Beach
- Go Roller Skating
- Go Sailing as 'rail meat'
- Go sailing on the San Francisco Bay as a party filler guest
- Go shopping in downtown San Francisco There are too many shops to list Buy everything from fly-fishing gear to high-end fashions
- Go swimming
- Go swing on the Alta Plaza Swings on top of the hill
- Go to a bed and breakfast inn and pretend it is the 1800's
- Go to a bonfire at the beach
- Go to a City Hall hearing and raise hell about an issue
- Go to a holiday buffet at the Cliff House
- Go to A Music Festival
- Go to A Restaurant
- Go to an Aquarium
- Go to annual Greek festival in San José
- Go to annual Italian Carnival at San José's Holy Cross Church
- Go to Art Openings
- Go to brunch at the Awahnee/Majestic in Yosemite
- Go to Carnival in San Francisco
- Go to downtown Los Gatos (Los Altos, Palo Alto, Burlingame, Sausalito, etc) and observe yuppies as they down \$\$\$\$ cappuccinos
- Go to Flea Markets
- Go to Japan town in San Francisco
- Go to MACLA in San José and see a Chicano art exhibit or performance
- Go to Matinees
- Go to Mitchell's ice cream in San Francisco and get a hand-made ice cream
- Go to Museums
- Go to National Parks
- Go to Nordstrom's in downtown San Francisco and get your shoes shined
- Go to San Juan Bautista and visit the Mission and shop for antiques in a rural setting
- Go To The Beach
- Go to the Castro Theater in San Francisco and see a movie and an organ performance during intermission
- Go to the Century theaters and see an IMAX movie in San José
- Go to the DeSassalt Photography Gallery at Santa Clara University
- Go to the Driving Range
- Go to the Rosicrucian Egyptian Museum in San José
- Go to the San José Museum of Art
- Go to the Santa Cruz Beach and Boardwalk
- Go to The Secret Beach
- Go to the Stanford University Chapel for a performance of classical music
- Go to the traditional Thanksgiving Big Bone Game between Lincoln and San José High
- Go to the University of California at Santa Cruz to see the beautiful campus and redwoods
- Go to the world's largest flea market in San José
- Go water or snow skiing (gambling too) in Lake Tahoe (Several hours away)
- Go water skiing at Calero reservoir or at other great area reservoirs or lakes
- Go water skiing in the San Joaquin Delta
- Grab a cup of coffee at Java Beach and stroll the beach in San Francisco
- Haggle at Garage Sales
- Hang out at one of the many Silicon Valley watering holes in San Mateo to San José
- Hang out with the tourists at San Francisco's Fisherman's Wharf and Pier
- Have A Barbecue
- Have a BBQ at San José's Alum Rock Park
- Have a deadly caramel ice cream sundae at Fenton's
- Have a doughnut at Rollo's in San José
- Have a night entirely lit by candles
- Have A Picnic
- Have a picnic at Stinson Beach
- Have a sandwich or coffee at Robert's of Woodside Woodside is just off Highway and is an affluent 'barb' nestled in the forest. Maybe locals Joan Baez, Michelle Pfeiffer or Neil Young will say hi
- Have a slice of pizza at Frida's Pizza in San Francisco's Mission District
- Have a steak at Original Joes in downtown San José
- Have a Taco at Taco Bell (on the beach) in Pacifica
- Have a tasty hamburger or a crepe at the Crepevine in San Francisco's Sunset District
- Have an ice cream at Ben and Jerry's on the corner of Haight and Ashbury in San Francisco
- Have breakfast at the Pork Store in the Haight Ashbury in San Francisco
- Have coffee at Mr Toots (by the beach) in Capitola
- Have lunch in downtown Mendocino Watch but out for the pot brownies!
- Have lunch in the quaint Saratoga Village near Big Basin Way or Congress Springs Road
- Have some corn on the cob or sushi at the San José Nihonmachi festival in Japan Town in San José
- Have some Japanese food in San José's Japantown
- Have some of the best pizza on earth at North Beach Pizza of San Francisco
- Have some of the best Vietnamese food in the Bay Area at Tu Lan on (sleazy)Street near Market Park yourself next to the cooks (my favorite spot) and watch the cooks perform
- Have Sunday brunch in downtown Carmel
- Hike in the magnificent Mur Woods
- Hike or picnic at Alum Rock Park in San José
- Horse Riding
- Hot Tubs
- House Tours
- Hugging
- Indulge in a holiday buffet at The Top of The Mark (Especially Christmas and Thanksgiving)
- Inspect the archives at the Chicano Center at San José State
- Inspect the studios of emerging artists during open studios in San José or San Francisco
- Jet Skiing
- Just look in the newspaper your bound to find a festival, performance or exhibit that is just right for you in the beautiful San Francisco Bay Area Keep an eye out for whales near Davenport
- Kick back (really kick back) and enjoy some coffee in Santa Cruz at Cafe Pergolesi
- Lay in the sun
- Listen to Los Lobos or other performers at Santa Cruz's Catalyst
- Listen to music or dance in a club in San Francisco
- Look at photo exhibits
- Look at the stars
- Look on Goldstar dot com for fun deals
- Make a gift for a donation box
- Make a leaf pile and jump in it
- Make Dinner Together
- Make faces at strangers to make them laugh
- Night Picnics
- North Beach
- Open Studios
- Pick a quiet spot in San Francisco's Golden Gate Park and have a picnic or toss the Frisbee
- Picnic along the secluded San Mateo Coast
- Picnic or play basketball at the San Francisco Art Institute You will enjoy a great view of Fisherman's Wharf from the roof top basketball court and cafe
- Plant a tree for a school
- Play cards
- Play Frisbee
- Play With Dogs
- Play with people's dogs at the beach and hide dog kibble in your socks
- Practice Kissing
- Punch in 'Parks' on your GPS and see where it takes yourself
- Refresh furniture together
- Relax and enjoy the cool ocean breeze at any beach during the summer
- Rent a houseboat on Shasta Lake Get a tan or go fishing

- Rent A Movie
- Ride your bike in affluent Woodside, Atherton or Hillsborough
- Say hi to ex-Mayor's Ron Gonzales of San José, Willie Brown of San Francisco or Jerry Brown of Oakland What are they up to this year?
- See a painting by Frida Kahlo at the San Francisco Museum of Modern Art
- See a special performance or contemporary art at Villa Montalvo in Monte Sereno
- See a Stanford or California football game
- See art or picnic at the Yerba Buena Center in San Francisco
- See Chicano Art at Galeria de La Raza in San Francisco
- See lowriders, Banda dancers, and much more, at the enormous San José Cinco de Mayo
- See motorcycle or auto races at Laguna Seca
- See Teatro Campesino perform La Posada in San Juan Bautista
- See the Cleveland and San José Ballet perform Take in a symphony, opera or ballet in San Francisco, San José or Oakland
- See the fish at San Francisco's Steinhart Aquarium
- See the Forty-niners play football in SF
- See the giant redwoods and amp at Big Basin State Park
- See the giant redwoods in Big Basin Park near San José
- See the San José Sharks (NHL)
- See the sea lions at the Pier in San Francisco
- See the sea otters and sea lions play at Cannery Row in Monterey
- Shoot pool
- Shop and play in Capitola
- Shop at Bloomingdale's near Stanford University and observe the yuppies
- Shop at San Francisco's Goodwill or Sak's Fifth Avenue stores
- Shop at Santana Row and make up stories about couples
- Shop in the Castro, Haight Ashbury, Mission, Noe Valley, Pacific Heights, Marina or any of the unique districts of San Francisco and watch the posers
- Shop or eat in San Francisco's Chinatown
- Sit in a sidewalk cafe and pretend to be a hipster or beatnik
- Sneak into Google and Facebook and eat all the free food
- Snuggle
- Soak in the bathtub
- Stop by the tranquil Hakone Japanese Gardens near Saratoga
- Stroll along secluded Agate beach in Bolinas
- Swing on each of the swing-sets on top of every hill in SF (This is one on each – Find them)
- Take a cable car ride in San Francisco
- Take a charter boat-fishing trip out of Santa Cruz, San Francisco, Monterey, Half Moon Bay or Berkeley
- Take a dip and enjoy a massage at one of the many hot tubs in Santa Cruz like the Well Within
- Take a Red and White boat tour of the San Francisco Bay
- Take a short walk to the Haight Ashbury District near Golden Gate Park
- Take a train to the Train Museum in Sacramento and back again
- Take an extension class at one of the many colleges in the Bay Area
- Take CalTrain from San José to San Francisco and back
- Take in Japanese Culture at the San José Obon festival Bring a fan and kimono and join the dance and procession
- Take photos in secluded Bodega Bay
- Take the Ferry to Sausalito
- Take time for a leisurely coffee or lunch in Santa Cruz's Pacific Garden Mall
- Test Drive Exotic Cars
- Tour the wine country and have some beer
- Try an open mic night
- Try Harmonica Playing
- Try Massage with Feathers
- Try the Paddleboats in Golden Gate Park
- Visit Alaska
- Visit Angel Island in San Francisco Bay
- Visit Antique Stores
- Visit California's most beautiful Mission in Carmel
- Visit Dee Harley and play with the Baby goats at Harley Farms
- Visit Golden Gate Park
- Visit Point Reyes
- Visit Sanborn Park
- Visit the dramatic shoreline of Carmel
- Visit the Green Gulch Zen Center near Mill Valley Walk from there to the gardens to the beach where Alan Watts lived
- Visit the KPFA (lefty) studios in Berkeley
- Visit the San José Rose Garden (Before San José evolved to become the heart of Silicon Valley it was called the Garden City)
- Visit upscale galleries in downtown Carmel or San Francisco
- Volunteer to walk pets at the SPCA
- Walk by the Boats in Sausalito and see Carla Fiorini's chrome boat crane on her boat
- Walk down the Nagler Lane steps
- Watch for Bobby the Bobcat on Mt Tam and the glider point
- Watch out for firecrackers at San Francisco's Chinese New Years Parade
- Watch the Giants play baseball at the new Pac Bell Park in San Francisco
- Watch the Oakland Raiders play football at the Oakland Coliseum
- Wear formal wear to an informal event or just walk around Union Square in a tux like you are going to some big deal event
- While in San Francisco, get to the corner of Cole and Carl by taking the "N" Judah trolley from downtown

...and that was with just a few friends discussing ideas. You can come up with a list this big for your town...just use your imagination.

This Guide To Marriage Will Get You Off Nasty Match.Com Forever

Of all the decisions you make in your life, few are as important as who you choose to marry or live with. Make a bad choice and you can spend your days and nights mired in unhappiness or consumed by anxiety or depression, conditions that not only rob your mental health but undermine your physical health as well.

So, do yourself a big favor and make sure you choose a mate wisely. Yes, you need some basic relationship skills like communication, problem solving and conflict resolution. But, you also need a partner who's willing to engage in all of them with you and create what most of us want more than anything – a sense of closeness to someone else.

As you grow to know someone you determine what you can and can't trust. You also rely on him/her to meet certain needs. As time goes by, you develop some level of commitment. And finally, in a romantic relationship, there is sexual chemistry, which prompts touch.

These are the five bonding factors that form the glue of your relationship, he stresses. And, here's the catch – they must grow together in a balanced way. You must keep your heart and your head in harmony. So you never let one of the five forces too far ahead of your progress in any of the others. Of all the decisions you make in your life, few are as important as who you choose to marry or live with. Make a bad choice and you can spend your days and nights mired in unhappiness or consumed by anxiety or depression, conditions that not only rob your mental health but undermine your physical health as well.

You might be consigned to economic instability or subjected to physical or verbal abuse. Or you might find yourself struggling as a single parent. The consequences of a poor choice, and of marital dissatisfaction or even disruption, are far-reaching, extending even to the next generation. There is, ladies and gentlemen, a science of mate selection, as it's known in the psych biz. Relationships are not mysterious entities that enter your life through a magical flash of lightning sometimes called "chemistry." That, folks, has nothing to do with the ability to form an enduring bond.

Love isn't blind at all. The science of mate selection is accumulating inside one or both partners. A relationship begins with knowing someone, and the state of what you know controls the other dynamics. Your knowledge of someone grows with mutual self-disclosure and diverse experiences together, shared together over time. It's important to see the way your partner functions in a variety of settings – with friends, with family, with bosses and coworkers, with strangers, with children.

There are five crucial areas to deeply explore and come to know during the dating process:

- Family background and childhood dynamics.
- Attitudes and actions of the conscience and maturity.
- The scope of your compatibility potential.
- The examples of other relationship patterns.
- Strength of relationship skills. These are the areas that best predict what a person will be like as a spouse and parent. Using this approach, Van Epp insists, you can follow your heart without losing your mind.

Conflicts in the Relationships

Have you ever had a disagreement or misunderstanding with your spouse? If you're truthful, the answer will most certainly be "Yes!". Conflict in relationships is inevitable. Even the best relationships experience conflict from time to time. The key to success in relationships is how couples handle their conflicts and differences.

About half of all relationships in the United States end in divorce. It is obvious that many people do not get married and live "happily ever after." However, relationships continue to be an important goal for most Americans. In fact, over 90 percent of adults will get married at least once in their lifetime. Most spouses start out full of hopes and dreams and are truly committed to making their relationships work. Yet as the reality of living with a less than perfect spouse sets in and the pressures of life build, many individuals feel less romantic and do not find as much satisfaction in their relationships. All relationships change over time. But with hard work and dedication, people can keep their relationships strong and enjoyable. How is it done? What does it take to create a long-lasting, satisfying relationship?

A volume of research indicates that most successful relationships share some key characteristics. This guide will explore these in detail. It will also focus on marital conflict and the skills needed to handle it effectively. Finally, the guide will discuss ways that spouses can strengthen their relationships.

Characteristics of happy and satisfying relationships

Consider the positive aspects of love: love, trust, commitment, intimacy and attachment. These are some of the characteristics that researchers have found to be common in successful relationships. Let's look at each of these factors.

Positivity
John Gottman, one of the nation's leading experts on marital relationships, has found that the main difference between stable and unstable relationships is the amount of positive thoughts and actions spouses engage in toward each other. Through careful observation of hundreds of couples, he has come to the conclusion that successful spouses have far more positive than negative interactions. If there is too much negativity—criticizing, demanding, name-calling, holding grudges, etc.—the relationship will suffer. However, if there is never any negativity, it probably means that frustrations and grievances are not getting at all, and unresolved tension is accumulating inside one or both partners. The key is balance between the two extremes. There are many ways to foster positivity in a relationship. Being affectionate, truly listening to each other, taking joy in each other's achievements and being playful are just a few examples of positive interactions that help make relationships successful.

Empathy
Another characteristic of happy relationships is empathy. Empathy means understanding a person's perspective by putting oneself in his or her shoes. Many researchers have shown that empathy is important for relationship satisfaction. People are more likely to feel good about their relationships and spouse if their partner expresses empathy towards them. Husbands and wives are more content in their relationships when they perceive that their spouses truly understand their thoughts and feelings.

Commitment
Successful relationships involve both spouses' commitment to the relationship. When two people are truly dedicated to making their relationships work, despite the unavoidable challenges and obstacles that come, they are much more likely to have a relationship that lasts. In most Western cultures, individualism is highly valued. Individualism focuses on the needs and fulfillment of the self. Being attentive to one's own needs is important, but if it is not balanced by a concern for the needs of others, it can easily lead to selfishness in relationships. Husbands and wives who only focus on themselves and their own desires are not as likely to find joy and satisfaction in their relationships. However, when spouses are committed to investing in their relationships and are willing to sacrifice some of their own preferences for the good of the relationship, they usually have high-quality relationships.

Acceptance
One of the most basic needs in a relationship is acceptance. Everyone wants to feel valued and respected. When people feel that their spouses truly accept them for who they are, they are usually more secure and confident in their relationships. Often, there is conflict in relationships because partners cannot accept the individual preferences of their spouses and try to demand change from one another. When one person tries to force change from another, he or she is usually met with resistance. However, research has shown that change is much more likely to occur when spouses respect differences and accept each other unconditionally. Basic acceptance is vital to a happy relationship.

Mutual love and respect

Perhaps the most important components of successful relationships are love and respect for each other. This may seem very obvious – why would two people get married who did not love and respect each other? The fact is, as time passes and life becomes increasingly complicated, the relationships often suffers as a result. It is all too easy for spouses to lose touch with each other and neglect the love and romance that once came so easily. It is vital that husbands and wives continue to cultivate love and respect for each other throughout their lives. If they do, it is highly likely that their relationships will remain happy and satisfying.

Managing conflict

Have you ever experienced a disagreement, difference of opinion, or misunderstanding with your spouse? If you answer truthfully, the answer will almost certainly be, "Yes, of course." Conflict in relationships is inescapable. All marital relationships—even the best ones—will experience at least some conflict from time to time. However, not all people are successful in their relationships, despite the conflicts that arise. The key to their success is how they handle their conflicts and disagreements. This section will explore many issues related to conflict, such as common areas of contention in relationships, gender differences in communication styles, and the importance of proper management of conflict. It will also discuss skills for handling conflict and how to solve problems in relationships.

More on common areas of conflict

Although all relationships are different, spouses frequently experience several common areas of conflict. Here are brief descriptions of some typical issues that spark conflict in relationships.

Money
Regardless of the amount of money a couple has, it is often the biggest source of marital conflict. Husbands and wives often have very diverse ideas about how money should be handled because they have experienced different family values and goals regarding money. Potential disagreements about money include how to spend it, how much to save and who should be responsible for paying the bills. It is important for spouses to discuss their values and feelings about money so each partner can try to understand the other. Constructing a budget and financial planning often require negotiation and compromise, but they are important tasks and aid spouses in identifying their priorities and goals for the future.

In-laws
Conflicts over in-laws are usually most problematic in the first years of relationships. A common issue that arises is one partner feeling that his or her in-laws are too critical or intrusive. Husbands and wives may disagree about the length and frequency of their parents' visits. Some people may also feel that their spouse is too dependent upon his or her parents. All of these in-law issues can trigger conflict within the family. Spouses can deal with in-law problems by sharing their feelings and discussing what kind of relationship they would like with their in-laws. It is important to avoid being accusatory and speaking critically of one's in-laws, especially during such talks. Expressing negativity towards in-laws tends to worsen the situation because it alienates spouses from each other and promotes defensiveness.

Sex
Sex is an emotion-filled issue and many spouses are afraid of getting hurt or rejected by their partners in this area. Thus, people frequently avoid discussing their feelings and expectations about sex. Even when partners do talk about sexuality issues, they are often embarrassed and speak indirectly about their feelings. These patterns can lead to conflict in the marital relationship. Difficulties with sex often reflect problems in other areas of the relationships as well. In order for couples to resolve conflicts about sexual matters, it is crucial that they communicate directly and specifically about their needs and desires. Many people feel very vulnerable in this area, so it is important that the discussion be done in a gentle, loving manner.

Children
Child rearing is a time-consuming task that requires huge amounts of energy. It's easy for spouses to become frustrated with each other over this issue. Husbands and wives often have conflicting views about how to parent because they were raised differently. Agreement about the best way to raise children may not always be possible, so it is necessary that spouses learn to compromise and negotiate in this area. Whatever decisions and rules parents make, it is important that they be united in front of their children. Otherwise, the children will learn to play one parent off the other, further contributing to marital disharmony.

Gender differences in conflict
Due to a combination of social and biological factors, men and women have different styles of interacting and handling conflict. Women raise concerns and problems far more often than men do. Men are more likely to avoid conflict and downplay the strong emotions that they feel inside. When men close down and suppress their feelings, women often become more insistent that they discuss the issues that have been raised. At this point, however, men only want to withdraw further. These different ways of interacting can lead to frustration and misunderstandings.

In order to overcome frustration with communication styles, it is essential that both husbands and wives improve their methods of dealing with conflict. Wives need to make sure that they bring up issues gently and in a positive, non-confrontational manner. A soft, gentle approach in introducing a topic for discussion usually leads to a satisfactory solution for both partners. Husbands need to respond to their wives' concerns and complaints in a respectful manner. They can learn to recognize when their wives need to talk and take a more active role in resolving issues instead of withdrawing. It is each partner's responsibility to respect and honor his or her spouse and make an effort to communicate as effectively as possible.

The importance of managing conflict well

Although some conflict is unavoidable, it is crucial that spouses manage their differences in constructive ways. There are several reasons for this. First, if husbands and wives do not handle conflict effectively, it is likely that negativity will increasingly become part of their relationship. As unresolved conflict and negativity grow in a relationship, the good aspects of the relationship often diminish and partners become disenchanted with each other. Second, research has shown that, when spouses are unhappy in their relationships, they tend to experience more physical and emotional problems than do happily married couples. People who are satisfied with their relationships even tend to live longer than those who are unhappy in their relationships. This finding leads to a third reason why it is important for spouses to manage their conflict well. A strong and satisfying relationship establishes a firm foundation from which spouses can function. When the quality of relationships is positive and supportive, partners can better attend to their personal responsibilities and obligations. A strong relationship also provides people with a greater opportunity to develop their personalities and talents than does an unhappy union. Although relationships require a considerable amount of time and effort, it is crucial that partners care for their own needs and development as well. They can best do this when the relationship is warm and encouraging and they know how to handle marital conflict effectively. Finally, it is essential that spouses practice good conflict management skills for the sake of their children. Conflict and hostility are extremely harmful to children's well-being. Many studies have shown that marital conflict leads to poor outcomes in children, such as decreased self-esteem, greater stress and anxiety, low achievement at school and behavioral problems. Conversely, spouses who support each other and have peaceful relationships are more likely to have well-adjusted, competent children. However, an unhappy relationship should not be preserved solely for the children's sake. Children in two-parent families marked by a lot of conflict often fare worse than those in families that have undergone a peaceful divorce. Whatever the situation, it is important that spouses learn to manage their disagreements effectively and control the amount of conflict in their relationship. This will help foster the well-being of themselves and their children.

Skills for handling conflict

Because managing conflict is so important, it is essential that you practice certain skills that will enable you to handle conflict well. The following sections highlight some of the skills needed for dealing with differences and disagreements effectively.

Open communication

Good communication can be difficult at times — especially during conflict. People often hear a different message than what the speaker intended. There are several possible reasons for this. First, spouses are often preoccupied with their own concerns or are preparing a rebuttal and do not really listen to what their partners are saying. Second, spouses may perceive their partners' messages negatively if they are tired or in a bad mood. Finally, different styles of communicating can also result in misunderstandings. Partners can learn to communicate better by developing more effective ways of speaking and listening. It is important to take turns in a conversation so each can have the opportunity to express his or her thoughts and ideas. The person talking should focus on his own feelings and not attempt to read the partner's mind. He should also be positive and avoid making accusations or criticizing his spouse. The person listening needs to be aware of her body language. Eye rolling, negative facial expressions and crossing one's arms may signal disapproval to the person who is speaking. Even if the listener does not agree with what her partner is saying, she needs to make an attempt to understand his viewpoint and be respectful. Showing genuine interest in someone's feelings and refraining from giving unsolicited advice go a long way in creating an atmosphere that is conducive to positive communication.

Ideas for effective marital communication

- When your spouse talks to you, try to understand what he or she is feeling.
- Give your partner both verbal and nonverbal feedback so he or she will know that you have understood what he or she meant.
- Be aware of the nonverbal messages you send when someone is talking to you, such as facial expressions or body posture. These can be very powerful!
- Refrain from voicing judgmental comments and jumping to conclusions before your partner is done speaking.
- Show respect for your spouse's perspective, even if you do not agree with it.
- Take the time to really listen when your spouse needs to talk. Doing this will help him or her feel that you value his or her opinions and ideas.
- When you need to have an important discussion, remove distractions as much as possible so you can talk with each other more easily. For example, take a walk outside in order to get away from the telephone or talk in your bedroom where the children will not interrupt.
- Communicate clearly and directly so your partner will have a greater opportunity to understand you.
- When you are speaking, focus on expressing your own feelings, not trying to guess what your partner is thinking.

Controlling negative thoughts

The way a person treats others usually reflects the kinds of thoughts he or she has about them. This pattern holds true for spouses, especially during times of conflict. When partners focus on each other's shortcomings and weaknesses, they often fall prey to having negative thoughts about each other. The negative thinking makes it more likely that they will treat each other unkindly.

Suppose a wife complains about her husband's behavior. Her husband is in the kitchen making dinner and calls out, "How was your day?" Instead of responding to his question, the wife snaps at him for having left his coat and briefcase on the kitchen table. How might the husband react? If he is in the habit of thinking positively about his wife and giving her the benefit of the doubt, he may think, "She must have had a really hard day." He might stop what he is doing and give his wife his full attention so he could try to find out what is really bothering her. However, if the husband takes offense at his wife's complaint and thinks, "Here I am, cooking dinner, and all she can do is criticize me," he will be more likely to respond negatively to his wife's complaint and further escalate the conflict.

Research supports these ideas about the power of one's thoughts. Relationships researchers have determined that stable relationships have more positive than negative interactions, while the opposite is true for unstable unions. Because negative interactions are often fueled by one's thoughts, negative thinking can have a significant impact upon a relationship. Therefore, because the substance of a person's thoughts is often a powerful determinant of his actions, it is very important for spouses to control the way they think about each other. Husbands and wives can do this during times of conflict by focusing on the troublesome issue instead of their partner's flaws. By keeping their feelings about the issue and their spouse separate, it is more likely that they will manage conflict better and have a healthier relationship.

Forgiveness

Because there will be hurt feelings and conflict from time to time in every relationship, it is very important that spouses forgive each other when arguments and disagreements occur. Forgiveness enables partners to stay emotionally connected and keep their relationships positive. If people want their relationships to grow and become stronger, they must be willing to forgive their spouses whenever necessary. When spouses do not forgive each other, remain bitter and hold grudges, they often experience physical and emotional problems. Thus, forgiveness is important to the individual health of each partner as well as to the health of the relationship!

Problem solving

All couples will encounter problems in their relationships that will require problem solving skills. At these times, it is very important that the spouses work together as a team, instead of insisting on their point of view and working against each other. It is crucial to understand problems before attempting to solve them. Problem solving is a much smoother process when spouses have discussed the issue thoroughly and each partner feels understood. Surprisingly, research has shown that after a good discussion about a troublesome issue, most people are so satisfied that there is no need to come up with a solution to the problem. Usually, people just want the opportunity to express themselves and feel as if they have really been understood.

Of course, many problems still need to be resolved, even after open, productive discussion. Markman, Stanley and Blumberg, a team of prominent relationships researchers, have identified an effective process for solving problems.

- It helps to set a specific time to work on the problem so that partners can mentally and emotionally prepare. During the meeting, spouses should think of as many solutions to the problem as possible, ruling out nothing until all possible solutions have been presented.
- The next step is to choose the solution, or combination of solutions, that will best solve the problem. It is likely that negotiation and compromise will be necessary at this step of the problem solving process.
- After testing the chosen solution for an agreed upon length of time, it is important for spouses to discuss the solution and whether the problem is being solved adequately. If not, adjustments should be made.

Not every issue that arises will require such an extensive problem solving process, but these steps can help couples solve their problems in a calm, controlled manner.

Changing oneself first

It is common for husbands and wives to overlook their own weaknesses and focus instead on the faults of their spouse. In some relationships, one person feels that his or her partner is the cause of their marital problems and the only one who really needs to change in order for the relationship to improve. This may occasionally be true. However, in the vast majority of relationships, both partners make a contribution to the conflict and problems that arise.

It is crucial that spouses realize that the only person's behavior they can control is their own. In relationships, it is typical for partners to become annoyed or irritated with what they perceive to be their spouses' personal shortcomings, unusual habits and weaknesses. For example, a wife may feel upset because her husband arrives home from work late on a regular basis. Or, the husband may resent how his wife cuts him off in the middle of conversations. Frustration over shortcomings such as these often builds over time, motivating people to change their partners change. However, people usually end up discovering that their demands are not granted and their efforts to change their partners have failed. Instead of trying to compel each other to change, it is more effective for partners to honestly assess themselves and think about what they can do to make the relationship better. Considering the contributions they make to disagreements and trying to overcome their own weaknesses will accomplish far more than dwelling on their spouse's faults. When husbands and wives stop trying to change each other and instead shift their attention to improving their own behavior, they will likely be more content, even if their partner continues to do the things that they do not like.

When spouses choose to make changes in themselves first, regardless of what their partner does, they are often surprised to find that the overall quality of their relationship improves dramatically. In an ideal situation, of course, both spouses continually strive to improve themselves and overcome their weaknesses. However, one spouse is often more committed to self-improvement than the other, at least for a while. Nevertheless, even if the other person does not feel a need to change himself or herself, the relationships will likely improve through the efforts of the one trying to change.

Strengthening the marital relationship

Although it is important for spouses to learn how to resolve differences, having a good relationship requires more than just being able to manage conflict effectively. What else is needed to create a strong and satisfying relationship? Recent research has shown that the most satisfied spouses have relationships based on good friendship. Nurturing the positive aspects of the marital relationship on a regular basis is also important. This final section will highlight ways in which husbands and wives can strengthen their relationships, including being good friends, performing daily acts of kindness, sharing enjoyable times and creating family traditions.

Remain good friends

Many people say that having a friendship with their spouse is an important goal of their relationships. Life usually becomes more complicated as relationships progress. If a marital relationship is not built upon a solid foundation of friendship, it may become more difficult for partners to stay connected over time. It is also easy for spouses to become less polite and respectful to each other as time passes because they feel more comfortable with each other. However, spouses who remain good friends throughout life usually find much more enjoyment and satisfaction in their relationship. There are many things spouses can do to keep their friendship alive.

- Set aside a specific time each day to talk and reconnect. In some relationships, spouses stop confiding in each other and stop having stimulating discussions, only to later discover that they do not know each other very well anymore. All people change over time, and partners need to continue to learn about each other as they grow and change.
- Another way to maintain friendship in relationships is to have weekly "dates." Dates allow spouses to spend time along together, which can be especially important if they have children. Partners can also build friendship by trying to avoid conflict during "couple times," making the time spent together more enjoyable and memorable.

How to be best friends

- Talk.
- Hold hands.
- Go for walks.
- Dance.
- Play games.
- Work on a mutual project together.
- Plan little surprises for each other.
- Laugh together.
- Compliment each other often.
- Create memories together.
- Leave unexpected notes of praise.
- Develop signals that say "I love you."
- Go on a date.
- Say "thank you" for little kindnesses.
- Talk about your dreams.
- Listen to music.
- Say "I love you."
- Remember birthdays and anniversaries.
- Have a candlelight dinner.
- Go for an evening or afternoon drive.

Perform daily acts of kindness

Another way for couples to strengthen their relationships is to express fondness and concern for each other on a daily basis. Showing kindness in little ways is important for several reasons. First, it enables spouses to increase their love for each other and become better friends. It also keeps little annoyances from being blown out of proportion, which helps the relationship stay strong. Daily acts of kindness can also promote the growth of romance in the relationships, they envision going away for a weekend to celebrate their anniversary or receiving a dozen roses. Instances such as these are certainly romantic. However, John Gottman has found that true romance is best preserved when partners frequently respect and care for each other in ordinary ways.

There is an endless variety of little things spouses can do to show thoughtfulness to each other on a daily basis. A few examples include writing love notes or sending special e-mail messages, helping each other with a project and preparing a favorite breakfast. It is important that spouses do not take for granted the power of such actions. Performing small, simple acts of kindness regularly can have a dramatic impact upon the quality of one's relationships.

Share enjoyable times

Most relationships start out with a lot of emphasis on dating and having fun together. After they get married, many spouses become busier and stop making special times a priority. However, it is very important for partners to take the time to enjoy their relationship. Research has shown that the amount of fun time spouses spend together is a major factor in the happiness of their relationships. Sharing enjoyable times prevents people from getting bored with their relationships and helps rejuvenate them when they are very busy and preoccupied with other cares and concerns.

In order for spouses to increase the amount of enjoyment in their relationship, it is likely that they will have to deliberately plan leisure time into their schedules. Planning and scheduling goes a long way in ensuring that the activity will actually happen and not be shoved aside by a more pressing matter. Spouses can have fun together in simple ways, such as going on picnics, taking walks, laughing together and having long talks. They can also plan more extensive times for pleasure, such as all-day outings or vacations. It does not matter what the activity is, as long as it allows both partners to relax and enjoy each other's company.

Create family traditions

Observing family traditions and rituals is another way spouses can strengthen their relationships. Traditions and rituals serve many important functions in families. First, they enable husbands and wives to figure out what is important to them and their relationship. They also give meaning and predictability to relationships and families. Rituals help couples recharge themselves from the stresses of everyday life and increase the amount of intimacy in their relationships. A relationship that is marked by many traditions and rituals is often richer and more purposeful than those that are not. There are many ways to incorporate traditions and rituals into the marital relationship.

- Having a private conversation at the end of each day is one common ritual observed by many spouses.
- Going on a weekly date is another typical relationship ritual. However, traditions and rituals can be less formal than these examples. In fact, many relationships include traditions and rituals of which the spouses may be unaware.
- Kissing each other goodnight each morning, talking on the phone during lunch and taking walks on a regular basis are all examples of less obvious rituals.
- Many spouses also have rituals connected to special days, such as Valentine's Day and wedding anniversaries.

These traditions enable them to reaffirm their love and devotion to one another. Whether traditions and rituals in relationships are simple or elaborate, they are important and give the relationship shared meaning and significance.

Equal Opportunity

Our Relationships prohibits discrimination against any individual on the basis of race, color, religion, sex, age, national origin, physical or mental disability, sexual orientation, or because of marital, parental, or veteran status. This policy extends to all rights, privileges, programs and activities, including housing, employment, admissions, financial assistance, and educational and athletic programs. Our Relationships recognizes that non-discrimination does not ensure that equal opportunity is a reality for all friends, applicants for employment, and acquaintances. Because of this, the Relationship will continue to take affirmative action to ensure that friends and acquaintances alike are treated equally during their employment and/or matriculation.

Our Relationships strongly encourages minority group members, veterans, disabled individuals, and women to apply for positions for which they are qualified and that are of interest to them.

Boundary Issues:

Using Boundary Intelligence To Get the Intimacy You Want and the Independence You Need in Life, Love, And Work, by Jane Adams, PhD:

- Define To Ourselves and Articulate To the Other What Our Own Boundary Style Is:
- Identify How That Affects Ours and the other person's perceptions of priorities made and boundaries drawn in context of the relationship.
- 1. Awareness: Why? Have boundaries: why have defined or NOT defined them?
- 2. Insight: understand what are our own and others' impulses, desires, and decisions are and utilize knowledge to relieve internal and external conflict between us.
- 3. Intention: Why blurring of boundaries, lack of definition, how does the intention or lack of intention affect our relationship? Develop strategy to resolve conflict. Need to compromise to share losses and future gains together for health of relationship
- 4. Action: Implement Course of Action

- Man would identify by agreed on period if he is serious
- Based on that, he would cease dating activities or anything else that might give impression that she is not important.
- Activities Include:
- Man would see women on an as-needed business basis in any setting that is prudent and does not violate the relationships.
- In event that business requires one-on-one meetings to be held in traditional office during normal business hours.

How this policy applies to meeting strangers in public or service providers: financial planners, real estate, friends? Employees that you would inevitably hire and inadvertently develop a crush on you

- Being civil and friendly is the norm.
- Differentiate business prospects from flirtations: if you like public flirtations, you're not ready for a truly serious relationship in my opinion.
- If they ask you personal questions, inquire about their boyfriend or husband, tell them you have a serious girlfriend and are happy, even if I made you miserable that day.
- Steer conversation away from personal chatter.

How Does This Policy Apply To Women He Already Knows?

- Communications With women, if he is serious would be business related only.
- Sexual suggestively or flirtatious communications, phone calls, conversations, jokes, or e-mail are out of bounds to either receive or to send.
- If he has been the object of this behavior by an acquaintance and they have no significant business production, he would not them out of his social circle.
- He should not be in proximity of a woman whereas she would be able and close enough to touch him in a suggestive manner. (Physical Boundary)
- He should not be in any conversation either in the phone or in person to a point that he can be propositioned (or boundaries have not been set either with the person or in the conversation).

Pre-Nuptial Terms

If the idea of bringing up a prenup seems uncomfortable...you are not alone. Many people carry preconceived notions (and baggage) about prenups (prenuptial agreements also known as premarital agreements). However, more and more couples are using the prenup process to stimulate important conversations about how they define and safeguard their marital union (lifestyle, roles, financial responsibility). While prenups have received a lot of public and media attention lately, many people still don't understand their value. Not convinced yet? Read on.

Why?

Bringing up the subject of a prenuptial agreement can be a great way to learn more about your expectations, dreams and hopes. By starting down this communication path now, you are well on your way to creating a mutually fulfilling partnership. Whether you have high assets or are just starting out, have children or don't, there are reasons a prenup is beneficial to you and your spouse. Here are just a few:

- To determine how you and your spouse define equality in your partnership
- To establish the value of non-monetary contributions to a relationship, such as being a stay at home spouse and career sacrifices

- To cover your pre-relationships nest egg (such as your home, pension plan, stock portfolio, or property with emotional value)
- To protect gifts and inheritances you receive
- To ensure that in the event of death or divorce, you will avoid difficult disputes over property (such as family businesses, stock options, professional degrees, licenses and practices, pension plans, and copyrights)
- To ensure that children from a prior relationships receive their intended inheritance
- To allocate any pre-relationships ownership/partnership in a business
- To protect yourself from your partners' pre-relationships debt, ie credit card debt or prior loans

When?
Sliding a prenup across the dinner table a week before the wedding is not the appropriate time to bring up this important conversation! Conversations about concerns, expectations, and responsibilities are best had early in the relationship. As your relationship gets more serious, your conversations should get more detailed and specific.

Where?
Where do you normally discuss topics important to your partnership, such as life goals, finances or family? Find or create a calm, neutral spot where you will both feel open, at ease and unpressured. Whether it's your living room sofa, an afternoon walk or a quiet dinner, you'll want to create an environment where both of you are most comfortable- mentally and physically.

How?
"You've gone through the why, when, and where, now here's the "how". Even when couples understand the reasons for these relationships contracts, many aren't sure just how to initiate the discussion. Take a look at these suggestions to get you started on the "HOW".

- Openly, honestly
- State your specific concerns
- Present an idea to be implemented by the two of you over time
- Invite discussion about any underlying issues that arise
- Work out your issues collaboratively

Conversation starters:

"I believe that relationships is a fifty-fifty proposition, and I'm concerned about giving up my job to become a full-time stay at home spouse. Can we establish a principle of 50-50 sharing at the outset?"
"Let's talk about our future, what we both want, our lifestyles, our present and future finances. I want to make sure all our money issues are addressed and resolved in an agreement. Then we won't have them hanging over us when we get married."
"One thing I have to consider before I get married is my parents' business. I need to be confident that the business will remain in the family in the event the unthinkable occurs."

There's HELP!

Need more help bringing the topic of a prenup up and having the conversation? This guide will help anyone who is looking to effectively build a strong and honest long-term relationship.

Prenup No-no's

- Springing a prenup upon your intended
- Presenting the idea of a prenup as a fait accompli
- Suggesting a prenup late in the relationship
- Being overbearing or heavy handed

REMEMBER: Don't let a prenup fall to the bottom of your "To Do" list. The discussions you are revolving around the prenup are conversations you WILL have once you are married. Getting to know your partner's position on these important aspects early can help head-off more difficult discussions during the relationships. If you can't talk about touchy issues, it doesn't bode well for the relationships.

We agree to sign a prenuptial agreement

The terms will be:

Notice: This free prenuptial agreement form is provided for general informational purposes. Before you utilize any legal form you find on the Internet, you should have it reviewed by a lawyer in your jurisdiction to be sure that it meets your legal needs, and will be held valid by a court in the jurisdiction where you reside. For best results, both parties to a prenuptial agreement should be represented by counsel of their choice, the agreement should be custom-drafted to their specific circumstances and the law of the jurisdiction in which they reside, and the prenuptial agreement should be executed at least a month before the wedding date.

Prenuptial Agreement

This pre-marital agreement is made on this _____ day of _____, 200____, between _____ and _____.

Whereas the parties intend to marry under the laws of the State of _____, and wish to set forth in advance of their relationships the rights and privileges that each will have in the property of the other in the event of death, divorce, or other circumstance which results in the termination of their relationships;

Whereas the parties have made to each other a full and complete disclosure of their assets, as set forth in Exhibits 1 and 2 to this agreement;

Whereas both parties have been represented by independent counsel of their own choosing, and whereas both parties have received a full and complete explanation of their legal rights, the consequences of entering into this pre-marital agreement, and the rights they would possess were it not for their voluntary entry into this agreement; and

Whereas both parties acknowledge that they have read and understand this agreement, have not been subjected to any form of coercion, duress, or pressure, and believe this agreement to be fair and to represent their intentions with regard to their assets and to any estate that shall result from their relationships;

The parties hereby agree as follows:

1. Each party shall separately retain all of his or her rights in his or her separate property, as enumerated in Exhibits 1 and 2 to this agreement, free and clear of any claim of the other party, without regard to any time or effort invested during the course of the relationships in the maintenance, management, or improvement of that separate property.
2. At all times, the parties shall enjoy the full right and authority with regard to their separate property as each would have had if not married, including but not limited to the right and authority to use, sell, enjoy, manage, gift and convey the separate property. Both parties agree to execute any documentation necessary to permit the other to exercise these rights, provided the act of executing the documentation does not impose upon them any legal or financial responsibility for the separate property of the other.
3. The parties agree that each shall be responsible for any tax obligations associated with their separate property.
4. The parties agree that neither shall contest the validity or provisions of any will, account, trust agreement, or other instrument executed by the other which disposes of his or her separate property or which creates any interest therein in another. To the extent that such an action would create any right or interest in the separate property of the other, both parties hereby waive any right in the property of the other, whether created by statute or common law, including but not limited to any right to elect against the will of the other, or to take an intestate share of the other's property. The wife hereby waives any dower interest in the husband's separate property, and the husband hereby waives any curtesy interest in the wife's separate property.
5. In the event of separation or divorce, the parties shall have no right against each other for division of property existing of this date.
6. Both parties acknowledge that they possess sufficient education and job skills to adequately provide for their own support, and hereby waive any claim to spousal support (alimony) except in the event that:
 - i. One of the parties suffers medical disability and the other remains both employed and physically able, in which case the disabled party may receive reasonable spousal support consistent with state law until such time as the disability is resolved, or the other spouse retires or becomes disabled from working, either by agreement or by judicial determination;
 - ii. The parties mutually agree that one of the parties shall reduce his or her work hours, or shall refrain from working, in order to care for any children born during the course of the relationships, in which case, if the parent's employability is affected by this full or partial withdrawal from employment, that parent may receive reasonable remedial spousal support consistent with state law for a period of not more than two years, either by agreement or judicial determination.
7. In the event of divorce, marital property acquired after relationships shall remain subject to division, either by agreement or by judicial determination.
8. This agreement shall be binding and inure to the benefit of the parties, their successors, assigns, and legal representatives.
9. Without regard to the location of any property affected by this agreement, this agreement shall be interpreted and enforced under the laws of the state of _____. In the event that any portion of this agreement shall be held invalid or unenforceable, it is the intent of the parties that all provisions of this agreement be regarded as separable, and that all remaining provisions remain in full force and effect. It is further the desire of the parties that all provisions of this agreement be considered as evidence of their intentions by any court, arbitrator, mediator, or other authority which seeks to divide their estate, and that their intentions be respected whatever the legal status of this agreement or any of its terms.
10. This Agreement and the exhibits attached hereto contain the entire agreement of the parties. This Agreement may only be amended by a written document duly executed by both parties.

Relationships are a challenging endeavor that requires hard work, determination and discipline. However, as this guide has shown, it also has the potential to be very rewarding and satisfying. Spouses who seek to incorporate positivity, empathy, commitment, acceptance, and mutual love and respect into their relationship are more likely to have a fulfilling relationships. Husbands and wives also benefit when they understand the nature of conflict and know how to manage it successfully. Finally, when people base their relationships on friendship, thoughtfulness, fun and traditions, they usually find joy and happiness in their relationship. Creating a strong and satisfying relationships is possible, and it is definitely worth the effort!

The Key Questions To Ask Your Date To Get To Know Them Fully

When you know the answer to every question on here, about each other, THEN you can probably get married.

These are to be answered live and in-person by both people:

- Are you a creature of habit?
- Are you a good listener?
- Are you adventurous?
- Are you afraid to get close?
- Are you ambitious?
- Are you ambitious?
- Are you an "indoors" person?
- Are you an artist?
- Are you and "outdoors" person?
- Are you assertive?
- Are you comfortable continuing this relationship if there are things in my past that I am not willing to share with you?
- Are you competitive?
- Are you content to stay home and cook?
- Are you creative sexually?
- Are you creative?
- Are you curious?
- Are you dating now?
- Are you easy to get to know?
- Are you emotionally available?
- Are you emotionally available?
- Are you extravagant?
- Are you Gay? Bi? Straight?
- Are you gentle?
- Are you good in social situations?
- Are you handy?
- Are you happy staying home-snuggling-eating popcorn and watching a movie?
- Are you jealous?
- Are you looking for a boyfriend/girlfriend, lover or husband/wife?
- Are you more concerned about being loved or loving?
- Are you neat? When do you usually shower?
- Are you open minded?
- Are you open to meeting and getting to know them?
- Are you polite?
- Are you predictable?
- Are you reliable?
- Are you romantic?
- Are you romantic?
- Are you selfish
- Are you self-reliant?
- Are you sensitive?
- Are you set in your ways -- if so are you willing to be flexible or make changes?
- Are you shy about your body?
- Are you sincere?
- Are you sleeping with anyone now?
- Are you sleeping with anyone now?
- Are you spontaneous?
- Are you spontaneous?
- Are you still in touch with any of your childhood friends?
- Are you supportive?
- Are you thinking about moving in the next few years?
- Are you thoughtful, loyal, patient?
- Are you thrifty?
- Are you touchy feely?

Are you willing and wanting to grow together?
Are you willing to sign a non-disclosure agreement for work purposes?
As a couple, how do you socialize at parties
Can you adapt?
Can you admit when you're wrong?
Can you be alone?
Can you be decadent?
Can you be laid back and put work away for awhile?

Have you ever paid for sex?
Have you ever seen a double rainbow?
Have you ever slept with someone on the first date?
Have you ever spent all day in bed?
Have you had a recent STD test since you were with someone? Are you willing to provide a doctors certificate of HIV/AIDS testing from the last 30 days if your partner also does?
Have you recently broken up with someone?
Have you seen a green flash at sunset?
How are you at compromising?
How do you feel about a woman having male friends?
How do you feel about being touched?
How do you feel about house cleaners
How do you feel about public affection?
How do you feel about someone that already has children?
How do you feel if views are different?
How do you feel if you have to go to work earlier than your mate and they get to stay in bed and sleep longer?
How do you feel right now?
How do you look at each new day?
How do you prefer the weather?
How does answering these questions make you feel?
How does fast make you feel?
How does stress affect your lovemaking ability?
How important is it to you that everyone likes you?
How is trust earned?
How late do you usually stay out?
How long has it been since your last significant relationship?
How long have you lived where you live?
How many dates have you ever had?
How many different people have you ever been with sexually?
How many friends do you have in your social circle?
How many parties do you go to in an average month?
How much do you earn per year?
How much is too much to drink?
How much time do you spend on the phone each day?
How much time do you want to spend together – what is too much, what kind of time together– working, volunteering, socializing, just hanging out, all of it or some of it.
How often do you change your sheets and towels?
How often do you talk about yourself?
How should who-pays-for-what be allocated when going out?
How would you describe your personality?
I like gentle and sometimes not so gentle-how do you feel about that?
If we eliminated physical attraction from our relationship, what would be left?
If you could live anywhere in the world where would that be?
If your mate was sick or stressed, how long go you put up with them being like that before looking elsewhere?
In what ways?
Is family important to you?
Is religion a part of your life?

Is spiritually a part of your life?
Is there anything sexually you would not do?
Is there anything we have not discussed that concerns you about our relationship?
Is trust automatic until something occurs that takes it away, or does evolve over time?
Is your monthly cycle likely to interact with a date or trip we have planned? Do you have sex during that time of the month?
Jealous?

List three things that really push your buttons?
Name a place you would like to go?
our position on recreational drugs?
Possessive?
Use an adjective to describe how thinking about it makes you feel?
What 3 magazines do you read most?
What angers you?
What are the medical tests and requirements for you to safely have barrier-free sex?
What are you allergic to?
What are you in the birth order?
What are you most grateful for?
What are you the most frustrated about in your life?
What are your erotic "kinks"?
What are your expenses per year?
What are your favorite clothes to relax in?
What are your favorite TV shows?
What are your feelings about having children?
What are your feelings about relationships?
What are your hobbies and interests?
What are your sexual needs relative to specific actions or techniques?
What areas do you feel you need to work on?
What can't you tolerate?
What did you like most about me when we first met?
What do you dislike about being single?
What do you expect on a first date?
What do you fear in relationships?
What do you look forward to?
What do you not like about me?
What do you say it is?
What do you think of you and me in a relationship, so far as you can tell, all other things being equal, based on projection?
What do you value
What do you want-friend-lover-wife-or all of the above?
What do you wear to bed?
What do your friends say is your worst habit?
What does being "In Love" mean to you?
What gives you goosebumps?
What happens to us when we die?
What I really want to know is what is your favorite flavor of ice-cream???
What is and what is not cheating?
What is desire?
What is the best way for me to show that I care for you?
What is the best way to turn you on?
What is the longest you have worked at one job?
What is the most exciting aspect of your life?
What is the most positive, and negative, relationship experience you have had?
What is the purpose of your life?
What is your favorite place ion the whole world?
What is you stand on religion and politics?
What is your astrology sign?
What is your bodytype?
What is your ethnicity?
What is your favorite animal?
What is your favorite body of water?
What is your favorite color?
What is your favorite drink?
What is your favorite form of exercise?
What is your favorite pastime?
What is your favorite season?
What is your favorite sport?
What is your favorite surface or texture?
What is your favorite time of day?
What is your favorite way to relax?
What is your idea of a great weekend escape?
What is your personal policy re: homeless people?
What is your political viewpoint?
What is your position on how much money you should be provided with by your boyfriend of husband each day, week or month?
What is your position on who should pay for what?
What kind of birth control do you use?
What kind of books?
What kind of education did you have?
What kind of intimacy have you been used to on a first date?
What kind of movies do you like?
What kind of music do you like?
What kind of music do you like?
What makes him/her so?
What makes you feel good about being with me?
What makes you feel important?
What makes you feel lonely?
What percent of your ex-mates do you still talk to?
What side of the bed do you sleep on
What sign are you?
What style of clothes do you wear?
What time do you generally get up?
What time do you generally go to bed?
What time do you usually go out at night?
What turns you off sexually?
What was the reason you were terminated from all of the jobs that terminated you?
What would your friends say is your best quality?
What's your favorite childhood memory?
Where is the most favorite place you've ever been?
Where is your favorite place to get away?
Which do you like best, the beach or mountains?
Who are your heroes?
Would someone's past hurt you or do you think you could let it go?
Would you dance with me in the rain?
Would you go to the gym with me?
Would you go with me to do some volunteering?
Would you like me to dress interestingly for you?
Would you still respect me in the morning if I did something totally naughty in bed the night before?
Would you switch from morning to night or vice versa?
Would you tell me if I did something you didn't like?
Would you understand if your mate couldn't sleep if they held you all night?
Your drinking habits?

Every Dating Site Gets Hacked And Leaked

Whatever Happened to Ashley Madison? Affairs in the Time of Coronavirus (venturebeat.com) 46
• Posted by EditorDavid from the making-another-run-dept.

• An anonymous reader quotes VentureBeat: Ashley Madison's tagline has taken on a new ring amid the COVID-19 pandemic — "Life's short. Have an affair." And the "married dating" site, used to conduct clandestine affairs, has found itself in the midst of a boom. Despite the fact that it's harder than ever to physically meet up with a fellow cheater, Ashley Madison is seeing a surge in users. Some are just looking to chat with someone other than a spouse, some are seeking emotional validation or the fantasy of pursuing a secret sex life...

The company became a household name in July 2015, when hackers stole data on 32 million cheating spouses. The leak of sensitive data led to spouses discovering that their significant others were cheating. Divorces, breakups, and suicides ensued. The hackers also exposed that Ashley Madison used bots posing as attractive young women to lure men into engaging more with the site. The company says it has since beefed up its security and rid itself of the bots. And now it's more than double the size it was at the time of the hack, with over 65 million members last year. During 2019, the company added 15,500 new members a day. More recently, in the midst of the COVID-19 pandemic, it has been adding 17,000 new members a day. Its chief strategy officer tells them that after their massive data breach "we were signing up more than 100,000 people a day... [W]e also saw revenues jump during that small time frame." (And the site also acquired "a whole new security team...")

Interestingly, he also says Facebook won't allow them to buy ads, which seems especially anticompetitive since Facebook runs its own dating site. "They block us but let other dating platforms advertise... We have had multiple conversations with them, and, no, it's a fruitless conversation, unfortunately... This is part of the problem with Facebook, in general, in that they get to pick and choose which companies are going to advertise on the second-largest, if not the largest, digital advertising platform in the world. We question the validity of that."

Ashley Madison Blackmail Letter Revealed
Remote City Council Meeting Interrupted By Pomographic Videos

• Whatever Happened to Ashley Madison? Affairs in the Time of Coronavirus

• Most of the female profiles on Ashley-Madison are fake. You can't get an STD from an avatar.

• Probably not the best time to screw randos (Score:1)
• Not unless you're trying to get infected and get immunity as quickly as possible.

• I thought that shut down long ago (Score:4, Interesting)
By Dallas May (4891515) on Sunday March 29, 2020 @ 11:43AM (#59884874)
• I thought that site shut down a long time ago when it was basically outted as a scam.
Holes are still going to the site?

• Re:
• I don't know what's a scam about it. It does function as a dating site, with the quirk that "married" in your relationship status isn't synonymous with "unavailable".

• Re: I thought that shut down long ago

• All dating sites are a scam.
The vast majority of profiles are fake.
They advertise that so many people fall in love there, but don't say that they fall in love "unhappily".
All those sites exist for, is to make you pay as much money as possible under the delusion of a perfect love that is lie.
Men end up spamming coppypasta because you have no "chance" otherwise, women end up flooded with so much crap that it is impossible to not overlook the right one.
And the entire system is heavily biased against men anyway.

• Re:
• It's killed off the bots after the database leak. The bot stats were in the database dump, and it was shown that the bots were only contacting men. They stopped using the bots after that. You can cancel your account pretty easily on Ashley Madison. There are no recurring fees either, and credits can

sit in your account for years with apparently no expiry date.

Facial Symmetry Is Your Biggest Enemy On Match.com

Online dating requires a front-on 2D image but our brains are trained to reject most faces. Here is the problem:

All of these people have stereotypical "yuppie" kinds of "upscale" faces sought by sorority and fraternity houses at elite colleges. These kinds of faces are thought, by some, to "keep the line pure". Other people think that sort of thinking is nonsense:

So how do you get a date when your subconscious brain is fighting against you? First, you need to understand the biology of the challenge.

As you see in the report at: <http://www.facesearch.org/students/notes/symmetry.pdf>

Why Are Symmetrical Faces So Attractive?

There is a surprising reason we are drawn toward symmetry, especially in faces. You are addicted to staring at certain movie star's faces because of their "addictive facial symmetry".

- "Love-At-First-Sight" is almost entirely about your attraction to a person's facial symmetry and their practiced use of facially exaggerated expressions and social face muscle exaggerations.

- Political candidates, movie stars and business executives get their jobs almost entirely because of their facial symmetry

What constitutes beauty as seen on the internet?

Among cultures and through history, standards of beauty have changed considerably. At certain times, stoutness was a symbol of wealth and influence and thus was considered attractive. At other times, hardy physical fitness was the gold-standard. Different variations of skin tone, facial hair (men), breast size (women), eye color, hair texture, color, and style have all experienced wide swings in their perceived attractiveness at different points in history and in different places.

When it comes to physical attraction, cultural forces far outweigh biological ones, but there are a couple of features that seem to cut through the cultural conditioning and are seen as universally attractive. (Read about how our brain computes attraction.)

For example, across cultures and times, height is reliably rated as desirable in men. For women, a low waist-hip ratio is seen as attractive globally. Of course, these two features are each just one aspect within a full suite of qualities for a specific person and do not overpower everything else.

However, there is indeed something special about them simply because they are so universal while most other "attractive features" are not.

There is another feature that drives perceptions of attractiveness and does so almost equally among men and women: facial symmetry. Across many clever experimental designs, researchers have confirmed that we rate faces that are more symmetrical as more attractive than those with less symmetry. Like height in males and waist-hip ratio in females, symmetrical faces are more attractive to people across cultures and historical times. But where does this biological attraction to facial symmetry come from? First, we must consider how symmetry develops.

Source: CFF/Wikicommons

Like all vertebrates, humans have bilateral symmetry about the sagittal plane. For the most part, our right side develops as a mirror image of our left side. Beginning during embryonic development and continuing through growth and maturity, the same developmental genes should be activated in the same cells, at the same time, and with the same dosage. In the ideal situation, all of that unfolds identically in the left and right sides of our faces, leading to perfect symmetry between the two halves.

Of course, in the real world, the tiniest fluctuations in gene expression and cellular activity lead to small differences between the two halves of our face. Look closely at your face in the mirror (or a friend's face). You can usually see that one eye is slightly larger than the other. The larger eye is also usually higher. The nostrils usually show asymmetry in their size and shape as well, and the height and size of the ears can be surprisingly asymmetric also.

All of this asymmetry adds up to a symmetry score for each human face and these symmetry scores strongly influence how attractively we rate faces. Using CGI, researchers can transform an image of a face that most people rate as highly attractive into one that rates poorly simply by tweaking the symmetry.

But why do we find symmetrical faces more attractive? The dominant scientific explanation for the attractiveness of facial symmetry is sometimes called "Evolutionary Advantage Theory." If the grand choreography of developmental gene expression is perfectly executed, the result is perfect symmetry. Therefore, anything less than perfect symmetry indicates some kind of dysfunction, however small. If, on one side of the face, a gene gets expressed too much or too little, in slightly the wrong place, or a bit early or late, the tissue will take shape in a slightly different pattern than on the other side. Most of these small fluctuations result in what is called micro-asymmetry, which we can't detect with the naked eye (but which we may be subconsciously aware of).

However, larger differences in symmetry may indicate issues that have occurred (or are ongoing) with the growth and development of the individual. Some factors that are known to affect facial symmetry are infections, inflammation, allergic reactions, injuries, mutations, chronic stress, malnutrition, DNA damage, parasites, and genetic and metabolic diseases. Each of these is a potential handicap to the success of the individual and possibly his or her offspring. While the resulting facial asymmetry is probably the least of the person's worries, the rest of us respond negatively to it because it could indicate reduced fitness. Since mating strategies invariably involve the pursuit of the highest quality mate possible, facial asymmetry knocks someone down a few pegs in terms of their attractiveness. This is the currently dominant thinking about why humans strongly prefer symmetry in each other's faces.

The preference for symmetrical faces is not limited to sexual attraction and mate selection. Facial symmetry appears to influence how we pursue friends and allies as well. Of course, we all want a "high quality" mate and co-parent of our children, but we also want friends that are high quality and, dare I say it, high status. It's an awful thing about us, but everyone wants to be friends with the rich, powerful, and popular. This reality has become crystal clear in today's society where people can be "famous for being famous," having produced essentially nothing of value to anyone and possessing no identifiable skills, talents, or accomplishments and still somehow be known as an important "influencer." I digress.

It's not altogether surprising that we, as a species, would read so much into faces. We speak face-to-face and we spend a lot of time looking at each other's faces even when we're not in conversation. We also have an exceptional degree of diversity in our faces and this probably comes from the face-centric nature of our social interactions.

In sum, facial symmetry is universally associated with beauty and attractiveness in both sexes and in sexual and non-sexual contexts. The most well-supported theory for this is that our species has evolved to recognize symmetry, if unconsciously, as a proxy for good genes and physical health. This gives us a tentative answer to the question: What's in a face?

While many studies have shown that symmetric faces (e.g. left image above) are preferred to relatively asymmetric faces (e.g. right image above), the reason why symmetric faces are preferred is controversial. The Evolutionary Advantage view proposes that symmetric faces are preferred because symmetric individuals are particularly healthy. The Perceptual Bias view, however, proposes that symmetric faces are preferred because symmetric stimuli of any kind are more easily processed by the visual system than their asymmetric counterparts.

Which version of this guy is more attractive to you?:

A "Super Hot" yuppie girl is never going to pick a guy without a symmetrical yuppie face because society has spent decades of social programming her to reject any guy without a yuppie symmetry. Modern dating site prep software, though, can adjust your photos in order to make your face symmetrical.

Symmetry is one aspect of faces that has been extensively studied by many researchers in relation to attractiveness. The most common method used to investigate the effect symmetry has on the attractiveness of faces involves manipulating the symmetry of face images using sophisticated computer graphic methods and assessing the effect that this manipulation has on perceptions of the attractiveness of the faces. Typically, perfectly symmetric versions of a set of face images are manufactured and presented to subjects along with the original (i.e. relatively asymmetric versions). Participants are then asked to indicate which face is more attractive, choosing between a perfectly symmetric version of a given face and the original version. Because the faces used in these tests differ in symmetry but not in other facial characteristics, these findings demonstrate that symmetry is a visual cue for attractiveness judgements of faces. Although studies have generally shown that people prefer symmetric versions of faces to the original (i.e. relatively asymmetric) versions, there has been considerable debate about why people prefer symmetric faces.

Two different explanations have been put forward by researchers to explain attraction to symmetric faces: the Evolutionary Advantage view (which proposes that symmetric individuals are attractive because they are particularly healthy) and the Perceptual Bias view (which proposes that symmetric individuals are attractive because the human visual system can process symmetric stimuli of any kind more easily than it can process asymmetric stimuli).

The Evolutionary Advantage view proposes that symmetric faces are attractive because symmetry indicates how healthy an individual is: while our genes are such that we are designed to develop symmetrically, disease and infections during physical development cause small imperfections (i.e. asymmetries). Thus, only individuals who are able to withstand infections (i.e. those with strong immune systems) are successful in developing symmetric physical traits. Indeed, some (but not all) findings from studies of health in humans and many animal species have observed such a relationship between symmetry and indicators of health, with healthier individuals being more symmetric. For example, swallows and peacocks with symmetric tail feathers are particularly healthy and preferred by potential mates. Under the Evolutionary Advantage view of symmetry preferences, symmetric individuals are considered attractive because we have evolved to prefer healthy potential mates.

While the Evolutionary Advantage view suggests that attraction to symmetric individuals reflects attraction to healthy individuals who would be good mates (i.e. will have healthy offspring), the Perceptual Bias view of symmetry preferences makes a very different claim. Our visual system may be "hard wired" in such a way that it is easier to process symmetric stimuli than it is to process asymmetric stimuli. Because of this greater ease of processing symmetric stimuli, symmetric stimuli of any kind might be preferred to relatively asymmetric stimuli. Under the perceptual bias view, preferences for symmetric faces are not carried out to preferences for symmetric objects of any kind. Indeed, it has been shown that people prefer symmetric pieces of abstract art and sculpture to relatively asymmetric versions.

Little and Jones (2003) carried out a study that investigated why people prefer symmetric faces to asymmetric faces, testing predictors derived from both the Evolutionary Advantage view and the Perceptual Bias view of symmetry preferences. Previous studies have found that symmetry had a bigger effect on the attractiveness of opposite-sex faces than own-sex faces and have suggested this is because opposite-sex faces are an example of "mate choice relevant stimuli" (i.e. they are the faces of potential mates and own-sex faces are not).

Little and Jones noted that it is well established that inverting face images (i.e. turning them upside down) reduces the ease with which they can be processed and are perceived as being people. While people find it easy to process faces that are the right way up, face processing is disrupted by inversion to a far greater extent than processing of other types of visual stimuli is. Furthermore, inverted faces are processed more like other objects when inverted than when they are upright. Inverting faces, however, will obviously not alter how symmetric the faces are. So while opposite-sex upright faces are "mate choice relevant stimuli" (i.e. are easily perceived as potential mates) inverted faces will be perceived more like objects, even though both inverted and upright faces will be equally symmetric. While the evolutionary advantage view suggests that preferences for symmetric faces will be weaker when the faces are inverted (because they will be perceived as less mate choice relevant), the perceptual bias view suggests that inversion will have no effect on symmetry preferences because symmetry is attractive in any type of stimulus. With this in mind, Little and Jones tested if inverting the faces used to assess preferences for symmetric faces weakened the strength of symmetry preferences (which would support an Evolutionary Advantage account of symmetry preferences) or if symmetry is equally attractive in upright and inverted faces (which would support a Perceptual Bias account of symmetry preferences).

Little and Jones found that symmetric faces were judged more attractive than asymmetric faces when faces were shown the right way up, but not when the faces presented were inverted. Because this suggests that symmetry is more attractive in mate choice relevant stimuli than in other types of stimuli, Little and Jones' findings support an evolutionary advantage account of why symmetric faces are attractive and present difficulties for the Perceptual Bias account (which proposes that symmetry will be preferred in stimuli of any kind).

Gold-Diggers And Foodie Call Vampire Dates Are Looking For Your Cash And Free Food On Match.com

A large percentage of people use dates for free food with no intention of ever engaging with the other person. Here are some discussions of this issue:

In the current recession, many people date for expense offset. One must be clear, up front, if this is their agenda. If your dating partner has visions of a traditional relationship and later finds out your plan is to use them for income, the results will never be good.

The best program is to state this up front in a clear manner. Do NOT be suggestive, the other person will almost always interpret the implied comment as the more traditional implication and sadness will result.

There is a current standard structure in most major cities: \$300/per hour with a volume commitment discount, \$3000/per month. If the person is unusually hot, has super defined abs and super model facial structure the "donation can go up to \$10,000/month. A once a week, twice a week or "anytime" get-together frequency rate is arranged between the two people.

It is a highly competitive market. There are hundreds of thousands of people doing it in each major city and super hot ones are coming here from overseas, every week, to do it. 90% of the arrangements are cancelled after the first month because the other person realizes that competitive market rates are lower than they first thought.

Wealthy men in technology cities and industrial cities consider it a business status factor to brag about their mistress to other businessmen.

The code words in ads and profiles are:

- *"Arrangement"
- *"Discrete"
- *"Gentleman"
- *"Generous"
- *"Studying in college"
- *"Completes my degree"
- *"Single mother"

Is being a mistress or gigolo OK? Check with your local laws, therapist and personal compass and tell the other person, in the very FIRST conversation, about this being your agenda. Silicon Valley, New York City and Los Angeles have the largest number of Dating-For-Cash people on their dating sites.

10 Signs you are Dating a Gold-Digger. The second date involved a reservation at the most expensive restaurant in the city and a black Dior dress with a pair of sky high Jimmy Choo's. Fast forward to two months later, I had spent thousands of dollars on this girl and her sweet personality had mostly vanished.

Are Chinese Dating Sites Full of Gold Diggers? - Chinese ...

<https://www.chinesedatingsitesguide.com/articles/chinese-dating/gold-diggers/>

Some men end up spending a lot of money chatting to girls on pay per contact sites. Other men fall prey to scammers, and end up wiring off their life savings via Western Union. Top on the list of worries is the issue of gold diggers. So are Chinese dating sites full of gold diggers, and how should you avoid them?

Gold Diggers Dating Site

Each corrupt politician and operative made a profit from their corrupt actions and those benefits can always be traced with modern forensic accounting and tracking AI. The recent leaks from CPA, VC, law firm and lobbyist records make it even easier. The hack-and-disclose foreign actor campaigns (ie: Supernova, Spectre, Solarwinds, etc.) have even added to those disclosures.

WE DEVELOPED AN INVESTIGATIVE THEORY:

- Theory gives direction to the investigation, but we stay flexible as new facts are leaked or exposed
- We make an initial assessment of whether the alleged corrupt conduct appears to be criminal, or whether it is civil or administrative in nature
- We then identify the elements needed to prove the crimes
- We then try to anticipate possible factual and legal issues and defenses and build our case to rebut or avoid them
- We then identify corrupt officials in jurisdictional law enforcement and regulatory agencies who may be stopping investigations in order to protect a Senator or tech oligarch that pays them or promises them a career advance

MAIN TYPES OF OUR INVESTIGATIONS:

- Historical cases - based on document analysis and witness interviews
- Proactive/undercover cases - running gamut from one day and one deal to elaborate and long-running multi-transaction and multi-target operations

CHOOSING THE BEST INVESTIGATIVE TECHNIQUES:

- We determined which investigative tools to use depending on a variety of factors, including the nature of the alleged violations, the type of investigation our members are conducting, and the resources we had available
- We used the normal progression from simple to complex, with information from initial steps leading to more advanced steps, such as search warrants and federally assisted wiretaps
- We mix and match our methods as appropriate
- Due to the hybrid public/private/citizen investigative team, an "insurance policy" encrypted file set is pre-distributed to journalists, lawyers and Congressional insiders to protect citizen team members

NOTES ON SOME OF THE INVESTIGATIVE TECHNIQUES WE USE:

- Public Source Information
- Internet and media sources
- Court filings, including criminal histories, divorces and other lawsuits, bankruptcy filings, and administrative proceedings before agencies such as the SEC, FTC, and insurance and banking regulators
- Leaks and hacks
- Choicepoint, Autotrack, property records
- Financial disclosure forms; Campaign contribution records; Lobbyist registrations and disclosures
- Information from Parallel Proceedings
- Corruption cases are often set in backdrop of contract disputes and fraud cases. There may be ongoing civil litigation or administrative proceedings generating valuable information, and you should obtain relevant depositions, pleadings, transcripts and court orders.
- Despite common interests, do not work in tandem or actively use the civil litigant to further your investigation, such as by giving them questions to ask at depositions or having them seek documents for you.
- Mail Covers
- Very useful in identifying target's banks, investment firms, et al
- Trash Pulls - "Dumpster Diving"
- Can be very useful if target has recently become aware that they are under suspicion - panic can cause carelessness in disposing of valuable records
- Grand Jury Subpoenas - Documents
- Used to gather foundational materials. Consider whether the entity being served can be relied on to not disclose the subpoena, or whether the records sought are worth the risk
- Issue as early as possible - document production can be slow, particularly with voluminous requests, older records, and/or smaller producing institutions

Subpoenas - Documents to Obtain:

- Bank, brokerage, and other investment account records
- Credit reports & credit card records
- Loan and mortgage records
- Telephone records
- Corporate records
- Do quick initial review to determine subpoena compliance. Do not assume full compliance since many institutions see subpoena compliance as a nuisance and distraction from their "real" business.
- Documents must reviewed and cataloged for use during the investigation and for discovery and trial evidence purposes.
- Document review is time and labor intensive, but is usually the heart of any meaningful historical corruption case.
- Witness Interviews
- Essential investigative steps which require serious thought, planning, and preparation. When possible, conduct interviews after you have obtained and reviewed the documents related to the witness.
- General rule - your way up the chain of involvement and culpability
- Remember to consider interviewing the current and former confidants

Subpoenas - Testimony:

- General rule - do not use the grand jury as your interviewing forum. Usually far better to get voluntary interviews first.
- Two main situations to use grand jury testimony as an investigative tool
- Witnesses who may have useful information but will not agree to a voluntary interview
- Possible defense witnesses - find out what they will say and lock them into that story.
- Immunity
- A double-edged sword. Gets you needed testimony but can cast doubt since people tend to dislike and distrust immunized witnesses.
- Weigh the costs and benefits carefully. Jurors will understand immunizing lower-level witnesses to build a case against the main targets.
- Attempt to secure testimony through cooperation plea agreements. Jurors are more likely to believe a witness who has accepted responsibility for their actions by pleading guilty than one who has received a "free pass."

Evidence - Laboratory Analysis:

- Handwriting and fingerprint analysis can be very useful in cases with key documents and knowledge, intent, and/or participation questions. Fingerprints can often be found on documents even after an extended period of time.
- Before requesting handwriting analysis, speak to your examiner to find out if the questioned documents can be analyzed with any degree of certainty. If there is little chance of success, you may not want to do the analysis, particularly if fact witnesses can identify the handwriting or signature.
- Make the analysis request as early as possible
- Tax Return Disclosure Requests - 26 USC Section 6103
- Very useful since targets often understate income on tax returns and overstate it on loan applications, corporate filings, and financial statements.
- Disclosure requests take a significant showing and a court order, and normally come after the investigation has substantiated some level of wrongdoing.
- After tax information is obtained under a disclosure order, there are important restrictions on their use and handling.
- E-Mail Account Information from Internet Service Providers ("ISP")
- Two main types of information you will want: identification of the account holder; and, the stored content of the e-mails maintained on the system.
- Can be very valuable since people use e-mail freely and do not realize or care that hitting erase or delete does not remove the content from the system.
- Court orders and search warrants are needed to get this information.

Since ISPs frequently delete content from their systems, use preservation letters asking ISPs to save the content while you obtain the necessary court orders and search warrants for disclosure.

Search Warrants

- One of the most powerful investigative tools in corruption cases. Obtains evidence on a surprise basis, before it can be redacted, destroyed, or withheld even when production is required by a grand jury subpoena.
- Provides an opportunity to identify and interview those present at search site.
- Serve contemporaneous grand jury subpoena for the same documents

Search Warrants On Senators And Tech Oligarchs:

- Timing is Key Issue

- Need to be far enough along in investigation to develop probable cause and to know what you are actually looking for.
- The search exposes the investigation, so it generally should not be done until you have exhausted any covert opportunities.
- But, if you wait too long and your target becomes suspicious or aware of the investigation, valuable evidence may be destroyed or moved.
- Search Warrants - They are Not Cost Free
- First and foremost, must commit to promptly and thoroughly review everything seized. This can be an extremely time and labor intensive. If you are not ready, willing, and able to do this review, don't do the search.
- Second, be aware of the public impact of a search on a high-profile target or location. It may bring attention to your investigation, increase public scrutiny on you and the target, and raise expectations that charges are imminent.

- Third, need to plan to best execute the warrant while limiting disruption of important functions when searching a government office. public building

Search Warrants - Computers and Computerized Data:

- Any business or office search warrant is going to include computers and computerized data, and you must be able to seize and use this information.
- Have computer specialists involved in planning and executing the search so that computers and system data can be copied on the scene. It is not desirable or feasible to take away the computers and deal with it later.
- Before searching, try to determine if review the seized data will require specialized assistance and equipment, and how you will make this information available for discovery and later trial use

Physical Surveillance:

- Surveillance is valuable to corroborate information which has been received, to link targets, and identify people associated with the known targets
- Trackers ("Bumper Bleepers")
- A slap-on tracker put on in a public place does not require a court order. An order is required to hard-wire a longer-lasting tracker onto a vehicle.
- Beware that under federal law, you are now required to disclose a tracker warrant to the person whose vehicle was tracked at the conclusion of its use. Delays of this notification are at the discretion of the court.
- Pen Register and Trap and Trace Orders
- Allows real-time capture of the incoming and outgoing phone numbers for a particular phone number, and can also order phone company to provide subscriber information for each captured number.
- Requires a court order which can be based on a showing that the information sought is likely to be relevant to the criminal investigation.
- Consensual Recordings
- Audio or video recordings where one party to the call or meeting (normally an undercover agent or cooperating witness) has agreed to record the conversation. These are authorized without any court order so long as the consenting party is on the line or in the room.
- Consensual recordings are the "bread and butter" of proactive investigations.
- Title III Wiretaps and Recording Devices
- Extremely effective tools to investigate ongoing criminal activity, since they allow recording of phone calls and conversations without the presence or participation of an undercover agent or cooperating witness.
- Requires court order based on probable cause and satisfaction of other requirements, including exhaustion of other investigative options. The internal review process for a federal Title III is very demanding.
- Title IIIs are labor intensive, requiring real-time monitoring and minimization, and regular progress reports to the authorizing judge

Undercover Operations – put a plant inside the Senator's office or the Google, Netflix, Tesla, Youtube or Facebook executives personal office or home office staff.

- Development and Planning Stage Is Key

- First step is determining what you are trying to achieve (i.e. proving a completed crime, infiltrating ongoing criminal activity, developing new cases on suspected corrupt officials, identifying criminals).
- Second step is creating and implementing a scenario designed to effectively and efficiently achieve those goals. Scenario must be realistic in light of targets, resources, and objectives
- Undercover Operations - Avoiding the Usual Defenses
- Any undercover scenario needs to squarely present the criminal opportunity to the targets. Do not give the target a lack of knowledge or intent defense.
- Plan to avoid entrapment claims. Don't push too hard, offer too much money, or make it too easy, and offer opportunities for the target to back out.
- Undercover Operations - Time, Labor, and Resource Intensive
- Must be patient - will take time to develop trust and opportunities
- Money will have to be spent for payoffs and to set up an undercover business, create appearances, wine and dine targets, etc
- Manpower will be needed - UCAs, case agents, surveillance, et al
- Undercover Operations - Undercover Agents are Crucial
- Should make every effort to introduce a UCA into the scenario.
- UCA is essentially unimpeachable in contrast to either a cooperating defendant who is attempting to avoid charges or get a sentence reduction, or a paid informant, both of whom may have motives to lie
- Undercover Operations - Lights, Camera, Action!
- With or without UCA, to the extent possible, you should have consensual or Title III recordings of every meeting and call.
- Tapes are unimpeachable and jurors expect them.
- Predication
- A reasonable basis to suspect the target is or has engaged in criminal activity. Much lower than probable cause standard.
- Criminal investigations should not be fishing expeditions or integrity testing operations, and predication helps prevent overreaching
- Predication helps overcome entrapment defense, claims of selective or vindictive prosecution, and Hyde Amendment (attorney's fees) claims
- Handling the Cooperating Witness ("CW")
- Give specific directions to the CW and make sure that the CW is told that no "freelancing" is permitted. Enforce this from the beginning, and do not let the CW seize control, even if he or she appears to be producing results.
- Corroborate the CW as much as possible, even on small points, and make sure all contacts between the CW and the targets are recorded. Jurors tend to disbelieve the uncorroborated, unrecorded word of a paid witness.
- Plan for impact of CW's plea agreement, immunity, or payments on the jury.

Flipping a Corrupt Senator or tech Insider:

- The tactical "Silver Bullet"

- Leaving a flipped insider in place can be an extremely effective tool in an ongoing public corruption case because of the knowledge and access they can bring to the investigation.
- Can be used to strengthen or build cases against existing targets and to identify, predicate, investigate, and prosecute other targets.
- In setting with institutional or high-level corruption, a flipped target in place may be the key to gaining entry to a "closed-shop" of corruption.
- Flipping a Corrupt Insider - Inherent Risks
- Beware of being double-crossed by a flipped insider who warns other targets and/or helps them generate exculpatory recordings; inadvertent leaks; the insider committing other crimes or wrongdoing while "on our side."
- Must also make sure that you keep the insider safe.
- The Flip Attempt
- Determine the right target to pitch. Normally neither the top nor the bottom target. Assess which target may be most effective as a continuing cooperator
- Use the element of surprise and make strongest presentation possible.
- If target wants to cooperate, start by getting a confession.
- If target wants to consult an attorney, they need to do it on the spot.

SPECIAL CONSIDERATIONS IN THESE PUBLIC CORRUPTION INVESTIGATIONS:

- Impact of charges is enormous on elected officials or high-level appointees. Mere existence of an investigation can destroy a career or a life.
- Proceed carefully - you do not want to be used by someone looking to settle a political score or strike back at a business rival.
- Conduct the investigation and prosecution "by the book." Expect the defense to attack not only the charges, but also the conduct of the investigation.
- Be prepared for heightened public and press scrutiny. Remember that in any big corruption case, the "world is watching."

Who We are Taking Down – The Targets:

- See the related list of publicly known targets who have already been disclosed in the press. Other targets are not identified yet

For example, let's look at a corrupt political "crime family" known as the "Paypal Mafia". They are also known as "The Deep State", "The Silicon Valley Cartel" and other quaint names. They promote their criminal boys club with mobster-emulating pictures of themselves like this:

They have based their lives and culture around the Godfather movies and openly refer to themselves as a "cartel". They have gotten away with it, so far, because they have more money than most law enforcement agencies have. They have thousands of law firms, lobbyists and dirty tricks operatives who spend all day denying, deferring and delaying the justice that is coming for them.

The indisputable facts about them are the assertions that the Silicon Valley oligarchs:

1. Control business and politics like a crime Cartel
2. Are a white male fraternity who attack outsiders in organized manners
3. Come from dynastic families that systematically ran them through Stanford, Harvard and Yale men's clubs
4. Were socially trained and programmed to operate in a closed, tribal, exclusionary manner
5. Operated the "Angelgate" collusion scandal
6. Operated the "Silicon Valley High Tech Employee Collusion" for which they were sued in a famous class-action case
7. Controlled the Obama Administration and the Obama White House and traded most key staff with that Administration
8. Have been sued, indicted and charged in divorce proceedings with an unusually massive amount of sex trafficking matters
9. Use the same 10 law firms who have been charged with public policy manipulation
10. Control internet news, media and information
11. "Own" certain U.S. Senators by virtue of direct bribe payments and securities/stock payola payments
12. Use a variety of tools like GUST, Private Google Docs sites, covert Facebook pages and similar, to secret conspire and plan collusion and organized monopolistic practices
13. Have their venture capitalists spy on entrepreneurs and copy their technology to be deployed by Google, or Facebook under a new name
14. Are a Mafia-like criminal organization
15. Have "command and control and exclusive beneficiary positions in ongoing, coordinated, criminal and anti-trust activities involving government and stock market funds...".

As a case-in-point relative to how hard it is to arrest these kinds of mobsters: the sex crime victims of Cartel member Jeffrey Epstein reported him to the DOJ a decade ago, yet nothing was done.

Our peers reported this Cartel to federal agencies in 2008, STILL, nothing has been done!

These people run Ponzi schemes with State and Federal funds in "stimulus" after "stimulus"! They use free government money (your money), stock valuation pump-and-dump and black-lists to make certain that no competitor can ever operate against them in any market. The public has had enough of them. In addition to filing many formal federal requests for FBI, SEC and FTC investigation, you as a member of the public, can do much more
YOU can fight back and destroy these kinds of dirty oligarchs!

The tech Cartel is evil because they steal any technology they desire; they run a prostitution ring and sexually extort young women and interns in Silicon Valley; they are misogynists, ageists and racists as their history of abuses has proven; their Palo Alto Cartel operates AngelGate-type collusion and stock market insider trading schemes that harm independent business and the public; Their Cartel ran the "no poaching" CEO ring which was class-action sued by DOJ and tech workers; 90% of their divorce court files reveal horrific abuses and sex trafficking; They have an army of lobbyists that pay cash, stock market and revolving door bribes to U.S. Senators; They can even evade FBI & SEC investigations; They hire women to act as "trophy wives" and "beards"; they have lobbyists rig the U.S. Patent Office in order to block inventor patent rights because they are using stolen technologies; they have been caught on video and recordings beating, kicking and harming women hundreds of times; They have bought up all of the Tier-One tech law firms and order them to never help those who seek equal tech rights; they collude to abuse your privacy and make databases on the public for political control; they have to cheat to compete because they are only good with spread sheets instead of innovation; They run black-lists, character assassination attacks, collusion and other anti-trust violating acts in violation of RICO laws.

When the bad guys, and you, whistleblowers, attack you because your products are better than theirs they are proving that they are fat boy scumbags, from Stanford and Yale, that operate in a little pack, like dogs! Their Sandhill Road VC operation should be raided by the FBI!

Indeed, the best thing that could come from the COVID pandemic is that they all are forced into bankruptcy!

When your Senator holds stock market shares in companies that exist to profit on the backs of consumers, then it is impossible for that Senator to ever do anything but be corrupt!

The crooks at Google, Facebook, Tesla, LinkedIn, Netflix, etc., broke felony laws and the basic principles of Democracy.

They bribed your Senator, White House insider agency staff and operated a Silicon Valley Oligarch sociopath political Cartel.

As Mother Jones top editor says: "In 18 years of living here, I find zero evidence that the "City Family" is benefiting anybody but its members, developers, old-school socialites, and tech billionaires..."

— Clara Jeffery (@ClaraJeffery) February 14, 2020

"I can't even with how insular and incestuous and corrupt SF is. Mayor @londonbreed acknowledges she had relationship with DPW Nuru two decades ago and that they remained close friends <https://t.co/HEHlulky>"

— Clara Jeffery (@ClaraJeffery) February 14, 2020

Your public officials set-up, operated and maintained an organized crime scheme for personal profit at the expense of every taxpayer. They went after Five Trillion treasury dollars of your tax money for their personal interests via rigged stock market scams, rigged government contracts, exclusionary policy manipulations and other schemes that harmed American taxpayers.

You Owe It To Yourself And The World To Take Them Down!

You can wipe them out, all by yourself, in 100% legal ways.

You can wipe them out even faster with crowd-sourced forensics and anti-corruption ai software! join the rest of the public in an epic anti-corruption effort!

You will learn to write FBI-quality criminal activities reports and file those reports, by certified mail, with every law enforcement and regulatory agency in every country in the world, including the FBI, OSC, GAO, EU, Interpol, FSB, UN, etc. CC the social media sites with your reports.

You will use basic private investigator websites to track and back-ground every person, organization and company involved in the corruption and trace their RICO law violations. You can provide that data to the U.S. Congress and every agency, with a copy to every social media posting.

You will use open-source, free, collaborative NSA-class global databases that can track all of the locations, hookers, fake fronts, family trusts, bank accounts, stock market accounts, bribes and other goodies, of any corrupt public official, in minutes! You get that free anti-corruption software from

GitHub, CodePen, Torrens, Onion Project, The Guardian, ICLU and all over the web.

YOU will run your own private investigator/citizen sleuth crowd-sourced investigations into the following:

- Every stock market account they or their family owns
- Every Uber or Lyft ride they ever took for any meeting or transport of sex workers
- Every flight manifest they appeared on
- Every bank account they have ever held
- Every lawsuit, divorce record and police record they have ever appeared in
- Every trust fund they or their family holds
- Every shell corporation they, or their family holds
- Every person named in their Federal Credit Payments every correct too
- Every item in the Swiss Leaks that cross connects to their holdings
- Every item in the Panama Papers Leaks that cross connects to their holdings
- Every item in the WikiLeaks that cross connects to their holdings
- Every item in the Snowden Leaks that cross connects to their holdings
- Every sex trafficking incident that connects to each of them alone, and in groups
- Every financial transaction between any of the parties on the master list and the character assassination and hit job firms of: Google, Univision, Gawker Media, Unimoda, Jalopnik, Gizmodo,Black Cube, Fusion GPS, Media Matters, Think Progress, In-Q-Tel, K2 Intelligence, WikiStrat, Podesta Group, YouTube, Alphabet, David Drummond, Larry Page, Facebook, Correct The Record, Stratfor, ShareBlue, Sid Blumenthal, David Brock, Eric Schmidt, Sunshine Sachs, Covington and Burling, Buzzfeed, Perkins Coie and Wilson Sonsini or their derivatives with common owners.
- Every item in the Quest Leaks that cross connects to their holdings
- Every tactical deployment, by a campaign financier, of the tactics listed in this manual: <https://www.cia.gov/library/readingroom/docs/CIA-RDP89-01258R000100010002-4.pdf>
- Every sex service that their Federal Credit Payments every correct too
- Every real estate transaction that any name or company they, or their family, were involved in, tracks to

..... and hundreds of thousands of other information points about them that prove that they benefit from crimes that they engage in for others who engage in crimes using the America public policy system.

It all goes into shared 100% legal public collaborative databases that work like XKKEYSCORE, or MS Access, or Oracle Databases.

The proof of collusion, conspiracy and raw covert corruption is indisputable. The actors are all the same people. The beneficiaries are all the same people. The communications between the parties all coordinate the same actions.

Demand their arrests, indictments, exposures and bankruptcies in public ads, letters to the editor, blog posts, bumper stickers, lawsuits, flyers, newsletters, email and every other outreach manner.

Say "Fuck You" to the Silicon Valley Oligarch "Illuminat" scumbags and the crooked Senators and Governor's they bribed.

Show these oligarch crooks what billions of taxpaying voters with collaborative FBI-class forensics investigation software can do to their corrupt tech Cartel!

You can show up at the front door of their home, office, hotel room or vacation cabin and legally arrest them with a citizen's arrest execution. More on that later.

How To Write Up A Public "Shame Dossier" On Each Crook That Works At, Or Invests In, Match.Com

YOU will hunt down each corrupt politician, oligarch and their operatives

First, send them a note, anonymously, to tell them that you, and the rest of the public, are coming for them.

Include a copy of this manual so that they know what is headed their way. Let them know that none of their New Zealand bolt holes, Cayman and Virgin Island hide-aways, private islands or Ukrainian dachas will protect them and that the public is EVERYWHERE that they are.

If they have nothing to hide, as they say, then they should not care. They should only be afraid of the truth if the truth is as disgusting as everyone says. If they are not buying hookers and rent-boys, laundering money, bribing politicians, manipulating elections, supporting sex cuts, abusing interns,

violating anti-trust laws and doing the other bad things they are charged with, it should not matter to them.

You undertake the investigative tasks using your personal computer and your free time completing tasks like the following:

1. Dig through their trash and buy their trash bags from the garbage man after they pick them up or pay the local homeless guy to do it for you

2. Locate a beneficiary for a probate proceeding with the name of their family on it

3. Research current and / or historical property holdings of every family member of the crooks

4. Identify mortgage information for each family member of the crooks

5. Identify secured lenders each family member of the crook has used

6. Identify related-party property transactions for money laundering

7. Determine current market value of real property that the crook or family members owns

8. Locate bankruptcy filings for any of their family members or companies

9. Retrieve and analyze bankruptcy records for any of their family members or companies

10. Uncover improper relationships with prostitutes, rent boys, sex cuts, BDSM groups, One Taste, Nexium, Inner Circle and other sex abuse operations

11. Locate federal civil lawsuits against them on Pacer.gov

12. Locate federal criminal records against them on Pacer.gov and the 120+ private investigator websites

13. Retrieve and analyze federal civil and criminal records on each of their names

14. Retrieve mug shots from arrest records

15. Provide independent analysis from other investigators

16. Locate state and local criminal arrest records

17. Retrieve and analyze review criminal records

18. Acquire pictures of them entering or leaving restaurants, hotels, offices and other locations and identify who they are with

19. Locate home phone numbers

20. Locate cell phone numbers

21. Identify the owner of related home or cell phone numbers

22. Determine owners of corporations they were involved with

23. Retrieve and analyze corporate records

24. Locate current or former executives

25. Interview current or former executives

26. Find and retrieve judgment and lien filings

27. Research familial history

28. Connect the dots via AI software analysis tools

29. Locate witnesses for a civil or criminal lawsuit

30. Interview witnesses for a civil or criminal lawsuit

31. Find all of their assets hidden under family trusts and facade corporations

32. Find current or historical boat registrations

33. Find current or historical aircraft registrations

34. Search for hidden assets

35. Conduct business intelligence

36. Conduct discreet intelligence gathering

37. Determine connections between parties

38. Locate bank account information

39. Locate current or former employees of a company

40. Interview current or former employees of a company

41. Locate significant inheritances

42. Show you routes of all of the tail numbers of their aircraft

43. Identify a will for an estate they or a family member might own

44. Locate probate records

45. Identify foreign assets

46. Locate regulatory records

47. Identify regulatory actions

48. Identify professional licenses

49. Determine prior disciplinary records for professional licenses

50. Analyze state and federal political contributions

51. Analyze state lobbyist records

52. Analyze federal lobbyist records

53. Identify potential whistle-blowers from their ex employees and contractors

54. Vet expert witnesses

55. Interview industry sources

56. Gather competitive intelligence

57. Identify related party business transactions

58. Retrieve and analyze non-profit financial filings

59. Knock on doors or surveys about them

60. Obtain and analyze Department of Labor Form 5500 Filings

61. Submit FOIA / FOL requests to government agencies

62. Obtain driving record history (in applicable states)

63. Find current vehicle registrations

64. Find historical vehicle registrations

65. They use Google, Facebook and LinkedIn to spy on you. Get the information that Google, Facebook and LinkedIn sells to Axiom, Equifax and hundreds of other spy databases and run searches on THEM!

66. Determine current market value of motor vehicles

67. Assist with jury selection

68. Background checks on prospective jurors

69. Analyze documents for potential fraud

70. Identify Risks

71. Identifying corporate relationships

72. Find all of their ex lovers and aides on LinkedIn

73. Identify Uniform Commercial Code filings

74. Foreign corporation research

75. Help you manage sensitive situations

76. Overseas litigation research

77. Identify stock ownership

78. Find facts

79. Locate online resume

80. Identify online networking profiles

81. Locate historical video or news footage

82. Conduct historical newspaper research

83. Conduct mobile or stationary surveillance

84. Perform clandestine operations

85. Find undisclosed ties

86. Identify and retrieve U.S. Tax Court cases

87. Locate a missing person

88. Identify and confirm education history

89. Identify and confirm previous employment history

90. Scour the Internet

91. Research presence on social networks or message boards

92. We will tell you what those bastards are up to

93. Send the IRS information about how Google, Netflix, Alphabet are cheating on their taxes and hiding money in Ireland and the Cayman Islands. Get the IRS to sue the oligarchs in tax court.

94. Enhance the publishing of research articles proving that Silicon Valley tech companies destroy the minds of children with tech addiction and brain manipulation and get parents to sue those companies for harming their children

95. Expose every secret cash conduit that the oligarchs use to bribe politicians

96. Demand new laws in Congress to stop politicians from owning any stock because that is the #1 source of bribes

97. Use lip-reading software to read what they are saying or have an actual deaf-person do it

98. Photograph them with any hotties they are seen with and then face-track the hotties to see if they are hookers or ill-repute escorts

99. Use one of the many free on-line news publishing softwares and make a global online newspaper that constantly exposes their crimes

This week, we celebrate what many consider the 50th birthday of the Internet. The underpinnings of the World Wide Web originated in an American communications network built for national defense and the pursuit of knowledge: ARPANET. Funded by the Defense Department's Advanced Research Projects Agency, the network was designed so that scientists could share computer hardware, software and data. It worked. In the ensuing decades, the ARPANET, and after the 1980s, the National Science Foundation Network (NSFNET), did indeed allow scientists to collaboratively build knowledge around networked tools and information. But expanding access to the Internet, combined with looser government regulations, ultimately produced a situation no one foresaw or intended. On today's Internet, conspiracy theories run rampant, identities can be faked and our real-life elections are vulnerable to manipulation. A network designed for spreading truth became a profit-driven industry, a public sphere that threatens to undermine the public good.

The original ARPANET was designed for a relatively small community of people united by a technical challenge. At the time, computers from different manufacturers ran incompatible software, and long-distance data communications links were costly and unreliable. Networks connected only a few identical computers within a small region. But ARPANET had an audacious proposal: It would span the continental United States to connect 15 research sites encompassing a diverse array of computers. "Almost every conceivable item of computer hardware and software will be in the network," project leader Larry Roberts pointed out. "This is the greatest challenge of the system, as well as its greatest ultimate value." As a leading funder of computer science research, ARPA was able to mobilize a talented group of faculty and graduate students to design, build and debug the network, sending the first message on Oct. 29, 1969. Like many academic environments, the ARPANET community was open and informal, and security was lax; in the early 1970s, students were rumored to have used the network to conduct transcontinental drug deals alongside their official research. But the relatively closed world of networked computing was opened up with the introduction of personal computers in the 1970s. The Defense Department soon found "unauthorized penetrations" of the ARPANET by hackers, complaining that "the availability of inexpensive computers and modems have made the network fair game for countless computer hobbyists."

By 1983, security concerns were so acute that Defense split off military users into their own network, ceding the rest of the ARPANET to academic researchers. In 1990, the ARPANET was absorbed into a new network built by the National Science Foundation that consisted of several regional networks connected to a high-speed backbone. As a nationwide civilian network, NSFNET rapidly increased the size and visibility of the Internet. Politicians and businesses wanted to capitalize on the potential of a national network to connect citizens and consumers. In the early 1980s, the general public, though not yet allowed on the Internet, had begun using commercial dial-up services such as CompuServe and AOL to access servers offering chat rooms, games and email. In 1986, Congress, prompted by Sen. Al Gore, began debating whether the nation needed an "information superhighway" to connect K-12 schools and libraries for all citizens. Congress included funding for a National Research and Education Network (NREN) in its High-Performance Computing Act of 1991. Had this plan come to fruition, the Internet would have remained under federal control until the late 1990s, potentially allowing time to upgrade security or create regulations to protect users. But before the NREN could get underway, the industry contractors providing the NSFNET infrastructure rushed ahead with plans to offer commercial network services, ultimately causing Congress to abandon the NREN. The result was the de facto privatization of the Internet. The nonprofit organizations that had operated the NSFNET's backbone and regional networks reinvented themselves as the first commercial Internet service providers, serving both the NSF and private customers. The NSF now had the option to outsource its networking needs to these commercial providers, which it did as it retired the old NSFNET in 1995. While this removed an administrative burden from the NSF, the hasty transition left little time to consider the policy implications. So a commercialized network developed without public oversight of the Internet's operation.

Privatization opened the floodgates for new services: social media, gaming, e-commerce, and millions of personal websites and blogs. Industry advocates insisted that the Internet should not be regulated, lest innovation be stifled. Regulatory models that had been developed for common carriers, publishers and broadcast media did not fit a new medium that combined aspects of all these media and whose services and business models were in constant flux. Online businesses were free to experiment with ways to make money, eventually landing on the advertising-based business model that led to escalating surveillance and collection of user data to better target ads. None of this has prevented scientists - the Internet's original users - from continuing to build reliable knowledge based on networked data and computational tools. The scientific community has time-tested processes to validate and protect the information it shares. But the general public is in a more precarious position. Anyone can be a publisher online, and the obvious clues to legitimacy that came with print and broadcast media - the investment in reporting and fact-checking, obligations to paying customers, an identifiable organization that could be held liable for false content - can be absent or faked online. The same type of user profiling that stimulates business also enables bad actors to target inflammatory social issues and widen political divides. We have inadvertently created a culture where misinformation can be spread without accountability. Long-term trends of increasingly open access and diminishing government oversight have fueled the Internet's growth and unleashed the creativity of millions. They have also left a vacuum where the public interest should be. Can we work together to build a better Internet for the next 50 years? Follow all of our Techtopus coverage here.

"http://pando.com/2013/03/court-does-google-hired-wages-to-combat-hot-young-facebook-after-sheryl-sandberg-refused-to-join-hiring-cartel/ The NY Times reported: "Ms. Feinstein and her husband sold \$1.5 million to \$6 million worth of stock in Allogene Therapeutics, a California-based biotech company, in transactions that took place on Jan. 31 and Feb. 18." She did claim that she has "no involvement in her husband's financial decisions" to avoid criticism. Do you really think that she has no idea about multi-million dollar deals that her husband is involved in?

The Laws You Need To Force Congress To Make To Put The Choke-Hold On Match.com Bosses And Their Bribery

- These are the steps that the public must demand to strengthen public integrity by eliminating corrupt financial conflicts between Match.com investors and executives and politicians. Congress must be ordered to eliminate both the appearance and the potential for financial conflicts of interest. Americans must be confident that actions taken by public officials are intended to serve the public, and not those officials. These actions counter-act the actions taken by Match.com officials in illicit coordination with U.S. Senators. The public has experienced all of the damages from each of the abuse-of-power issues listed below. These are the actions needed to resolve those issues:
- Ban individual stock ownership by Members of Congress, Cabinet Secretaries, senior congressional staff, federal judges, White House staff and other senior agency officials while in office. Prohibit all government officials from holding or trading stock where its value might be influenced by their agency, department, or actions.
 - Apply conflict of interest laws to the President and Vice President through the Presidential Conflicts of Interest Act, which would require the President and the Vice President to place conflicted assets, including businesses, into a blind trust to be sold off.
 - Require senior Department of Energy government officials, employees, contractors and White House staff to divest from privately-owned assets that could present conflicts, including large companies like Tesla, Google, Facebook, Sony, Netflix, etc., and commercial real estate.
 - Make it a felony to not respond to a filing by a citizen within 48 hours. Former White House and Energy Department staff use "stone-walling" to intentionally delay responses for a decade, or more.
 - Apply ethics rules to all government employees, including unpaid White House staff and advisors.
 - Require most executive branch employees to recuse from all issues that might financially benefit themselves or a previous employer or client from the preceding 4 years
 - Create conflict-free investment opportunities for federal officials with new investment accounts managed by the Federal Retirement Thrift Investment Board and conflict-free mutual funds.
 - Close and lock the Revolving Door between industry and government and stop tech companies from buying influence in the government or profiting off of the public service of any official.
 - Lifetime ban on lobbying by Presidents, Vice Presidents, Members of Congress, federal judges, and Cabinet Secretaries; and, multi-year bans on all other federal employees from lobbying their former office, department, House of Congress, or agency after they leave government service until the end of the Administration, but at least for 2 years (and at least 6 years for corporate lobbyists)
 - Limit the ability of companies to buy influence through former government officials
 - Require income disclosures from former senior officials 4 years after federal employment.
 - Prohibit companies from immediately hiring or paying any senior government official from an agency, department, or Congressional office recently lobbied by that company
 - Prohibit the world's largest companies, banks, and monopolies (measured by annual revenue or market capitalization) from hiring or paying any former senior government official for 4 years after they leave government service.
 - Limit the ability of companies to buy influence through current government employees
 - Prohibit current lobbyists from taking government jobs for 2 years after lobbying; 6 years for corporate lobbyists. Public, written waivers where such hiring is in the national interest are allowed for non-corporate lobbyists only.
 - Prohibit corporate outlaws like Google, Tesla, Facebook, LinkedIn, Netflix, Sony, etc., from working in government by banning the hiring of top corporate leaders whose companies were caught breaking federal law in the last 6 years
 - Prohibit contractor corruption by blocking federal contractor and licensee employees from working at the agency awarding the contract or license for 4 years
 - Ban "Golden Parachutes" that provide corporate bonuses to executives for federal service.
 - Publicly expose all influence-peddling in Washington.
 - Strengthen and expand the federal definition of a "lobbyist" to include all individuals paid to influence government.
 - Create a new "corporate lobbyist" definition to identify individuals paid to influence government on behalf of for-profit entities and their front-groups.
 - Radically expand disclosure of lobbyist activities and influence campaigns by requiring all lobbyists to disclose any specific bills, policies, and government actions they attempt to influence; any meetings with public officials; and any documents they provide to those officials
 - End Influence-Peddling by Foreign Actors such as that which occurred in the ENER1, Severstal, Solyndra and related scandals
 - Combat foreign influence in Washington by banning all foreign lobbying.
 - End foreign lobbying by Americans by banning American lobbyists from accepting money from foreign governments, foreign individuals, and foreign companies to influence United States public policy.
 - Prohibit current lobbyists from taking government jobs for 2 years after lobbying; 6 years for corporate lobbyists. Public, written waivers where such hiring is in the national interest are allowed for non-corporate lobbyists only.
 - End Legalized Lobbyist Bribery and stop lobbyists from trading money for government favors.
 - Ban direct political donations from lobbyists to candidates or Members of Congress.
 - End lobbyist contingency fees that allow lobbyists to be paid for a guaranteed policy outcome.
 - End lobbyist gifts to the executive and legislative branch officials they lobby
 - Strengthen Congressional independence from lobbyists and end Washington's dependence on lobbyists for "expertise" and information.
 - Make congressional service sustainable by transitioning Congressional staff to competitive salaries that track other federal employees
 - Reinstate the nonpartisan Congressional Office of Technology Assessment to provide critical scientific and technological support to Members of Congress.
 - Level the playing field between corporate lobbyists and government by taxing excessive lobbying beginning at \$500,000 in annual lobbying expenditures, and use the proceeds to help finance Congressional mandated rule-making, fund the National Public Advocate, and finance Congressional support agencies
 - De-politicize the rulemaking process and increase transparency of industry efforts to influence federal agencies.
 - Require individuals and corporations to disclose funding or editorial conflicts of interest in research submitted to agencies that is not publicly available in peer-reviewed publications.
 - Prevent McKinsey-type sham research from undermining the public interest by requiring that studies that present conflicts of interest to undergo independent peer review to be considered in the rule-making process
 - Require agencies to justify withdrawn public interest rules via public, written explanations.
 - Close loopholes exploited by powerful corporations like Google, Facebook, Tesla, Netflix, Sony, etc., to block public interest actions.
 - Eliminate loopholes that allow corporations, like Tesla and Google, to tilt the rules in their favor and against the public interest.
 - Restrict negotiated rule-making to stop industry from delaying or dominating the rule-making process by ending the practice of inviting industry to negotiate rules they have to follow.
 - Restrict inter-agency review as a tool for corporate abuse by banning informal review, establishing a maximum 45-day review period, and blocking closed-door industry lobbying at the White House's Office of Information and Regulatory Affairs
 - Limit abusive injunctions from rogue judges, like Jackson, et al, by ensuring that only Appeals Courts, not individual District Court judges, can temporarily block agencies from implementing final rules.
 - Prevent hostile agencies from sham delays of implementation and enforcement by using the presence of litigation to postpone the implementation of final rules.
 - Empower the public to police agencies for corporate capture.
 - Increase the ability of the public to make sure their interests are considered when agencies act
 - Create a new Office of the Public Advocate empowered to assist the public in meaningfully engaging in the rule-making process across the federal government

- Encourage enforcement by allowing private lawsuits from members of the public to hold agencies accountable for failing to complete rules or enforce the law, and to hold corporations accountable for breaking the rules
- Inoculate government agencies against corporate capture such as Google undertook against the White House
- Provide agencies with the tools and resources to implement strong rules that reflect the will of Congress and protect the public.
- Boost agency resources to level the playing field between corporate lobbyists and federal agencies by using the proceeds of the tax on excessive lobbying and the anti-corruption penalty fees to help finance Congress-mandated rule-making and facilitate decisions by agencies that are buried in an avalanche of lobbyist activity
- Reform judicial review to prevent corporations from gaming the courts by requiring courts to presumptively defer to agency interpretations of laws and prohibiting courts from considering sham McKinsey studies and research excluded by agencies from the rule-making process
- Reverse the Congressional Review Act provision banning related rules that prevent agencies from implementing the will of Congress based on Congress' prior disapproval of a different, narrow rule on a similar topic
- Improve judicial integrity and defend access to justice for all Americans.
- Strengthen Judicial Ethics Requirements
- Enhance the integrity of the judicial branch by strengthening rules that prevent conflicts of interest.
- Ban individual stock ownership by federal judges.
- Expand rules prohibiting judges from accepting gifts or payments to attend private seminars from private individuals and corporations
- Require ethical behavior by the Supreme Court by directing the Court to follow the Code of Conduct that binds all other federal judges
- Boost the transparency of Federal Courts
- Enhance public insight into the judicial process by increasing information about the process and reducing barriers to accessing information.
- Increase disclosure of non-judicial activity by federal judges by requiring the Judicial Conference to publicly post judges' financial reports, recusal decisions, and speeches.
- Enhance public access to court activity by mandating that federal appellate courts live-stream, on the web, audio of their proceedings, making case information easily-accessible to the public free of charge, and requiring federal courts to share case assignment data in bulk.
- Eliminate barriers that restrict access to justice to all but the wealthiest individuals and companies.
- Reduce barriers that prevent individuals from having their case heard in court by restoring pleading standards that make it easier for individuals and businesses that have been harmed to make their case before a judge.
- Encourage diversity on the Federal Bench
- Strengthen the integrity of the judicial branch by increasing the focus on personal and professional diversity of the federal bench.
- Create a single, new, and independent agency dedicated to enforcing federal ethics and anti-corruption laws
- Support stronger ethics and public integrity laws with stronger enforcement.
- Establish the new, independent U.S. Office of Public Integrity, which will strengthen federal ethics enforcement with new investigative and disciplinary powers
- Investigate potential violations by any individual or entity, including individuals and companies with new subpoena authority
- Enforce the nation's ethics laws by ordering corrective action, levying civil and administrative penalties, and referring egregious violations to the Justice Department for criminal arrest and enforcement.
- Receive and investigate ethics complaints from members of the public.
- Absorb the U.S. Office of Government Ethics as a new Government Ethics Division tasked with providing confidential advice to federal employees seeking ethics guidance.
- Consolidate anti-corruption and public integrity oversight over federal officials, including oversight of all agency Inspectors General, all ethics matters for White House staff and agency heads, and all waivers and recusals by senior government officials.
- Remain independent and protected from partisan politics through a single Director operating under strict selection, appointment, and removal criteria.
- Provide easy online access to key government ethics and transparency documents, including financial disclosures; lobbyist registrations; lobbyist disclosures of meetings and materials; and all ethics records, recusals, and waivers.
- Maintain a new government-wide Office of the Public Advocate, which would advocate for the public interest in executive branch rule-making.
- Enforce federal open records and FOIA requirements by maintaining the central FOIA website and working with the National Archives to require agencies to comply with FOIA.
- Strengthen legislative branch enforcement.
- Expand an independent and empowered ethics office insulated from congressional politics.
- Expand and empower the U.S. Office of Congressional Ethics, which will enforce the nation's ethics laws in the Congress and the entire Legislative Branch, including the U.S. Senate.
- Conduct investigations of potential violations of ethics laws and rules by Members of Congress and staff with new subpoena power
- Refer criminal and civil violations to the Justice Department, the Office of Public Integrity, or other relevant state or federal law enforcement.
- Recommend disciplinary and corrective action to the House and Senate Ethics Committees.
- Boost transparency in government and in the Federal Open Records laws, public official and candidate tax disclosure.
- Disclose basic tax return information for candidates for federal elected office and current elected officials.
- Require the IRS to release tax returns for Presidential and Vice-Presidential candidates from the previous 8 years and during each year in federal elected office.
- Require the IRS to release tax returns for Congressional candidates from the previous 2 years and during each year in federal elected office.
- Require the IRS to release tax returns and other financial information of businesses owned by senior federal officials and candidates for federal office
- Require the IRS to release tax filings for nonprofit organizations run by candidates for federal office
- Disclose the Cash behind Washington Advocacy and Lobbying.
- Prevent special interests from using secret donations from corporations and billionaires to influence public policy without disclosure
- Require nonprofit organizations to list donors who bankrolled the production of any specific rule-making comment, congressional testimony, or lobbying material, and to reveal whether the donors reviewed or edited the document.
- Require individuals and corporations to disclose funding or editorial conflicts of interest in research submitted to agencies that is not publicly available in peer-reviewed publications.
- Prevent sham research, like that from DNC shell McKinsey Consulting, from undermining the public interest by requiring that studies that present conflicts of interest to independent peer review to be considered in the rule-making process.
- Improve the Freedom of Information Act (FOIA)
- Close the loopholes in our open records laws that allow federal officials to hide tech industry and Silicon Valley oligarch industry influence
- Codify the default presumption of disclosure and affirmatively disclose records of public interest, including meeting agendas; government contracts; salaries; staff diversity; and reports to Congress.
- Require all agencies to use a central FOIA website that is searchable and has downloadable open records databases with all open FOIA requests and all records disclosed through FOIA.
- Strengthen FOIA enforcement by limiting FOIA exemptions and loopholes, and by giving the National Archives the authority to overrule agency FOIA decisions and to compel disclosure.
- Extend FOIA to private-sector federal contractors, including private federal prisons and immigration detention centers, and require large federal contractors to disclose political spending
- Make Congress more transparent by ending the corporate lobbyists leg up in the legislative process. The public deserves to know what Congress is up to and how lobbyists influence legislation.
- Require all congressional committees to immediately post online more information, including hearings and markup schedules, bill or amendments text, testimonies, documents entered into the hearing record, hearing transcripts, written witness answers, and hearing audio and video recordings.
- Require Members of Congress to post a link to their searchable voting record on their official websites
- Require lobbyists to disclose when they lobby a specific congressional office; specific topics of visit; the official action being requested; and all documents provided to the office during the visit. Do these seem like common-sense rules that should have already been in place? They are! These anti-corruption rules have been blocked by your own elected officials because they work for themselves and not you! You need to PUNISH any public official who does not put these changes into effect!

How To Conduct A Citizens Arrest Of A Corrupt Match.Com Executive Or Investor

First of all, before you conduct a citizens arrest, look up the address of your regional FBI office and walk in and inform them that you plan to make the arrest. Show them that you have all of the paperwork in order and see if they have any opinion to talk you out of doing it or to partner with your effort.

You can arrest them at their home, office, parking lot, massage parlor, restaurant or any public venue.
 A citizen's arrest is an arrest made by a private citizen. That is, a person who is not acting as a sworn law-enforcement official.[1] In common law jurisdictions, the practice dates back to medieval England and the English common law, in which sheriffs encouraged ordinary citizens to help apprehend law breakers.[2] Anyone who makes a citizen's arrest can find themselves facing possible lawsuits or criminal charges – such as charges of false imprisonment, unlawful restraint, kidnapping, or wrongful arrest – if the wrong person is apprehended or a suspect's civil rights are violated.[4] This is especially true when police forces are attempting to determine who an aggressor is. Private citizens do not enjoy the same immunity from civil liability when making arrests on other private citizens as do police officers.

The level of responsibility that a person performing a citizen's arrest may bear depends on the jurisdiction. For instance, in France and Germany, a person stopping a criminal from committing a crime, including crimes against belongings, is not criminally responsible as long as the means employed are in proportion to the threat. Note, however, that in both countries, this results from a different legal norm, "aid to others in immediate danger", which is concerned with prevention, not prosecution, of crimes.
 In the United States a private person may arrest another without a warrant, for a crime occurring in their presence. However, the crimes for which this is permitted may vary by state.[78]

Common law
 Most states have codified the common law rule that a warrantless arrest may be made by a private person for a felony, misdemeanor or "breach of peace".[79] "Breach of peace" covers a multitude of violations in which the Supreme Court has even included a misdemeanor seatbelt violation punishable only by a fine. The term historically included theft, "nightwalking", prostitution, and playing card and dice games.[80] Texas courts have defined and interpreted the term "breach of the peace" to mean an act that disturbs or threatens to disturb the tranquility enjoyed by the citizens.[81][82]

State statutes
 Consider, for an example of this codification, California Penal Code section 837:
 837. A private person may arrest another:
 1. For a public offense committed or attempted in his/her presence.
 2. When the person arrested has committed a felony, although not in his/her presence.

3. When a felony has been in fact committed, and he or she has reasonable cause for believing the person arrested to have committed it.
 "Public offense" is read similarly as breach of peace in this case and includes felonies, misdemeanors and infractions.[83][84] Note that there is generally no provision for an investigative detention by a private person under the law. With certain exceptions (see below) an arrest must be made.
 "Holding them until the police get there", is simply a form of arrest. The officer is accepting the arrest and processing the prisoner on behalf of the private person.[85]

In the case of felonies, a private person may make an arrest for a felony occurring outside their presence but the rule is that a felony must have, in fact, been committed. For example, consider a suspect that has been seen on surveillance video vandalizing a building to the extent that the arrestor believes it rises to the damage. If they find the suspect and make the arrest but it later turns out that it was misdemeanor damage, the arrestor is liable for false arrest because a felony had not, in fact, been committed.[citation needed]
 Because most states have codified their arrest laws, there are many variations. For example, in Pennsylvania, the courts have been clear that a non-law enforcement officer cannot make an arrest for a "summary offense" [86] In North Carolina, there is no de jure "citizens' arrest". Although it is essentially the same, North Carolina law refers to it as a "detention".[87]

Other states seem to allow only arrests in cases of felonies but court decisions have ruled more broadly. For example, in Virginia, the statute appears to only permit warrantless arrests by officers listed in the Code.[88] However Virginia courts have upheld warrantless arrests by non-law enforcement personnel for breach of the peace misdemeanors [89] Other non-police persons are granted arrest authority by statute, in the case of those who are state certified armed security officers: "A registered armed security officer of a private security services business while at a location which the business is contracted to protect shall have the power to effect an arrest for an offense occurring (i) in his presence on such premises or (ii) in the presence of a merchant, agent, or employee of the merchant the private security business has contracted to protect" and "For the purposes of § 19.2-74, a registered armed security officer of a private security services business shall be considered an arresting officer."
 Use of force

In general, a private person is justified in using non-deadly force upon another if they reasonably believe that: (1) such other person is committing a felony, or a misdemeanor amounting to a breach of the peace; and (2) the force used is necessary to prevent further commission of the offense and to apprehend the offender. The force must be reasonable under the circumstances to restrain the individual arrested. This includes the nature of the offense and the amount of force required to overcome resistance.[90][91] In at least one state, a civilian may use reasonable force, including deadly force if reasonable, to prevent an escape from a lawful citizen's arrest.[92][93]

Shopkeeper's (merchant's) privilege
 In some states of the United States, the courts recognize a common law shopkeeper's privilege, under which a shopkeeper is allowed to detain a suspected shoplifter on store property for a reasonable period of time, so long as the shopkeeper has cause to believe that the person detained in fact committed, or attempted to commit, theft of store property. The purpose of this detention is to recover the property and make an arrest if the merchant desires.[94]

Differing liability from police
 Private persons are occasionally granted immunity from civil or criminal liability, like the police are, when arresting others.[95] While the powers to arrest are similar, police are entitled to mistake of fact in most cases, while civilians can be held to a stricter liability depending on the individual state. Police can also detain anyone upon reasonable suspicion.[96] However, ordinary citizens cannot claim "qualified immunity" to attempt to defend against a civil complaint for false arrest.[97]

To be clear, in the United States, a private person can stop or "arrest" an individual engaged in a serious crime. You can also use reasonable force to hold them until law enforcement arrives on the scene.[1] This is known as a "citizen's arrest." The rules on when and how an individual may conduct a "citizen's arrest" varies from state to state. It's important to understand the laws in your region, especially since you can be prosecuted for improperly conducting a citizen's arrest. Decide if you should make a citizen's arrest, make the arrest, and avoid prosecution.
FIRST- PREPARE YOUR ARREST DOCUMENT TO HAND TO THE SUSPECT. You must write up the private citizen equivalent of an "arrest warrant" to give to the person you are arresting. This needs to be a substantial, 200+ page write up of the forensic proof you have uncovered, proving that the person has committed a crime.

Witness the corruption crime taking place via your FBI-quality investigations. It's not a good idea to make a citizen's arrest unless you've actually seen proof the crime happening. When the police arrive, you will have to provide "probable cause" for making the arrest. This means you'll have to show that you had a reasonable belief that the person you arrested committed a crime.[2] Your document of your investigation proof is crucial to this end.

• For example, if you see a person use a knife to stab another person, you've seen a crime and can detain the perpetrator. Determine whether the crime is a felony. In most states, it's legal to make a citizen's arrest when you see or have reasonable cause to believe that a person committed a felony, even if the felony was not committed in your presence.[3] Citizen's arrests are not usually legal when the crime committed is only a misdemeanor.[4] Since the definition of a felony varies slightly from state to state, it's a good idea to read up on your state's individual laws. [5] :

• Find out the law in your location. In some other states, you must always see the offense take place regardless of whether the offense is a felony or misdemeanor breach of the peace. In these states the citizen's arrest statute does not allow a citizen's arrest based upon "probable cause". [6] [7] Decide if the crime was a "breach of peace." In some cases, you may make a citizen's arrest for misdemeanors if the misdemeanor can also be considered a breach of peace. [8] Misdemeanors that are considered breaches of peace in some states include public brawling or public intoxication. [9] • If you arrest someone for committing a crime that falls into this category, you must have seen the crime firsthand. Decide if you can safely make a citizen's arrest. Be sure you can physically restrain the person you want to arrest before you try to. Misunderstanding your physical capabilities may put you or others in harm's way. If you make a citizen's arrest, the situation could easily escalate beyond your control. • Remember to think hard before making a citizen's arrest, especially if the perpetrator is armed. • Be prepared to assist the person in their arrest. Be sure you fully understand the circumstances in which you can make a citizen's arrest. You may want to research the rules specific to your state. If so, contact a lawyer through your State Bar Association or local law enforcement office. • If it turns out you didn't have grounds to make the arrest, you could be sued for false imprisonment, assault and battery and other torts. [10] You may also face criminal charges. Don't make a citizen's arrest unless you're willing to face these risks. Tell the person you're making a citizen's arrest. There are no specific words you must say, but you must make it completely clear that you are making a citizen's arrest. The person you're arresting must fully understand what's happening. Explain to the potential criminal why you are making a citizen's arrest. If you cannot provide him or her with this information, then you shouldn't be making the arrest. • In some states you must communicate to the individual the specific criminal offense for which the individual is being arrested for. • Leave it to the police to rest the person on their right. For now, you only need to say that you're making an arrest. • Most people say something like: "Eric Schmidt, you are under arrest for violation of felony compulsion laws and we are remanding you to the FBI. Do not resist or we will be forced to use reasonable means to detain you. Here is the arrest document. Please stand there until transporting officers arrive." • Detain the person using reasonable force. You can only use the amount of force required to detain the person until the police arrive. Using a greater amount of force exposes you to legal trouble. Be careful not to harm the perpetrator unless it's absolutely necessary.[11]

Call and deliver the suspect to law enforcement. Call law enforcement right after the person is detained. Some states in states like California and Minnesota require that a person take the arrested individual before a judge or peace officer "without unnecessary delay." [12] • But, if you try to transport a suspect on your own and you conducted an improper citizen's arrest, you may be subjected to a lawsuit for false imprisonment. • Your intent is usually to remand the subject to the FBI. In other words: hand him over to the FBI. You should assume that the local police or sheriff will arrive on-scene before the FBI do. Have the phone number for the local FBI on you. Ask someone to stay with you. If you can't deliver the suspect or your state doesn't need you to, ask a third party to stay with you. Wait for law enforcement to arrive. If possible, avoid watching the person you've arrested alone. Having a third party help you detain the person is best for everyone's safety. • The third party may be helpful in making sure the encounter doesn't get violent and might be able to serve as a witness. • Explain in full detail what you uncovered via verbal notes and another copy of the arrest document that you must have with you. When law enforcement arrives, explain what you saw in full detail. Law enforcement will probably ask you to give a statement. Make sure to include everything that you saw. Explain your actions during the criminal act and the citizen's arrest. Be clear about any force you had to use to arrest the suspect. • Depending on your state, transporting an individual away from the scene of the crime may constitute kidnapping or criminal confinement, regardless of whether you have lawful grounds for citizen's arrest. Don't make an arrest if you didn't see proof of the crime in your investigations. While you may think you have all the evidence you need to believe someone has committed a crime, your understanding of the events may be wrong. Don't make a citizen's arrest if you overhear someone talking about robbing a bank. If you're wrong, you could be sued. Call the police instead. [13] Always remember, an improper citizen's arrest can result in prosecution for crimes like kidnapping. [14] • For example, just because you see a crowd of people chasing a suspect or a victim asking for help, doesn't necessarily mean you have grounds to arrest someone. Don't arrest someone you believe is about to commit a crime. The crime must have already happened in order for you to legally make an arrest. Don't arrest someone if the crime hasn't yet been committed. Call the police instead. [15]

Don't use excessive force. Even the police are not allowed to use excessive force when taking a suspect into custody, so you, as a private citizen, should be especially careful to do this. Otherwise, you may be charged with battery, even if the suspect you apprehend is guilty of a crime. The use of deadly force is usually not allowed unless the suspect is attacking you or someone else. [16] • Don't use a weapon against the perpetrator when you can use your own strength. [17] For example, you can tackle someone to the ground rather than hitting him or her. For example, Eric Schmidt is kind of a pussy and he will whine like a bitch even if he just breaks a fingernail. Don't use a chokehold to the state of a black-out or he could die and cause you massive amounts of extra paperwork. Don't make a citizen's arrest if the FBI tells you not to after you meet with them. [18] As a private citizen, it's not your job to make arrests. If it is at all possible, you should always leave policing to those who have a legal authority to do so—the police. Otherwise, your actions might put you, the alleged perpetrator and the general public, at risk. • Your actions may be viewed as vigilantism, which is not legally protected action if you step beyond the authority explicitly granted to citizens by the law. • If a crooked U.S. Senator or a corrupt White House executive has pressured the FBI to not arrest an Elon Musk or a Larry Page or a Mark Zuckerberg because they pay bribes then it is your duty to arrest the crook. Keep the detained suspect safe. Once you have detained someone, you are responsible for what happens to the person while he or she is under your control. Make sure they are not in the road, where they could be hit by a car, and make sure they are protected from onlookers who might try to attack them. Yes, you can arrest a police officer but only if you see them commit a crime. Most officers that are arrested are arrested for police brutality. If the police officer then resists, arrests you, or tries to detain you, let them know that they are breaking the law, and say this loud and clearly. If you are arrested, do not resist. If you do not resist you have the chance to press a law suit against the officer, which will result in the police officer being charged for the original crime, resisting arrest, using excessive force and illegal detainment. Be confident. Do not resist the suspect that you don't know what you're doing will make them more likely to leave the scene of the crime. • When dealing with potential criminals, it's better to be on the side of caution and leave the crime control to trained professionals. • Be calm. Careful. Assertive. Professional. Respectful & Thorough. • Safety is the priority. Ask other bystanders to help if you feel the suspect will try to harm someone. • Have, at least, two people filming the entire arrest for your records. • The arresting document you give to the suspect, at the time of the arrest, should intimately detail their crime and be ready to stand as evidence in federal court. The good arresting document has, at least, 200 pages of forensic details and has been reviewed by your lawyer.

<https://www.americansocietyforinvestigation.com/blog/2019/11/why-its-wrong-to-investigate-democratic-corruption.html>
According to Schiff, it doesn't matter if Joe Biden was bribed through his son to ensure that the investigation into Burisma's corruption by the Ukraine government was shut down.

Political corruption - Wikipedia
https://en.wikipedia.org/wiki/Political_corruption
Political corruption or Malpolitics is the use of powers by government officials or their network contacts for illegitimate private gain. Forms of corruption vary, but can include bribery, extortion, cronyism, nepotism, parochialism, patronage, influence peddling, graft, and embezzlement. Corruption may facilitate criminal enterprises such as drug trafficking, money laundering, money laundering, and human ...

Understanding Bribery vs. Lobbying - Investopedia
<https://www.investopedia.com/financial-edge/09/12/the-differences-between-bribery-and-lobbying.aspx>
Bribery is defined by Black's Law Dictionary as the offering, giving, receiving, or soliciting of any item of value to influence the actions of an official, or other person, in charge of a public or legal duty. With regard to governmental operations, essentially, bribery is "Corrupt solicitation, acceptance, or transfer of value in exchange for official action."
Bribes may seem like small amounts compared to lobbying contributions, but therein lies the problem: They often cannot be accounted for. Bribery is the first step of subversion of the economic system.

The rich take bribes, too, and ethics rules don't deter ...
<https://www.marketwatch.com/story/the-rich-take-bribes-too-and-ethics-rules-dont-deter-them-experts-say-2017-01-05>
While politicians take bribes as often as their less well-off peers, even if some supporters of President-elect Trump believe the rich are better able to resist temptation.

Theranos CEO Elizabeth Holmes and former president Ramesh "Sunny" Balwari were charged with an "elaborate, years-long fraud."

The indisputable facts are the assertions that the tech oligarchs:

1. Control business and politics like a crime Cartel
2. Are a white male fraternity who attack outsiders in organized manners

3. Come from dynastic families that systematically ran them through Stanford, Harvard and Yale sociopath-in-training men's clubs
4. Were socially trained and programmed to operate in a closed, tribal, exclusionary manner
5. Operated the "Angelgate" collusion scandal and most every other financial crime in America.
6. Operated the "Silicon Valley High Tech Employee Collusion" for which they were sued in a famous class-action case
7. Controlled the White House and traded most of the key staff with the Administration.
8. Have been sued, indicted and charged in divorce proceedings with an unusually massive amount of sex trafficking matters
9. Use the same 10 law-firms who have been charged with public policy manipulation
10. Control internet news, media and information
11. "Own" certain U.S. Senators by virtue of direct bribe payments and securities/stock payola payments
12. Use a variety of tools like GUST, Private Google Docs sites, covert Facebook pages and similar, to secret conspire and plan collusion and organized monopolistic practices
13. Have their venture capitalists spy on entrepreneurs and copy their technology to be deployed by Google, or Facebook under a new name
14. Are a Mafia-like criminal organization.

<https://www.schronicle.com/crime/article/City-Hall-corruption-case-What-s-next-for-15767978.php>

San Francisco City Commissioner Naomi Kelly officiates the wedding of Heather Lee and Andrew Lindgren of San Francisco while on the Mayor's Balcony in San Francisco City Hall in San Francisco ...

The solipsistic self-aggrandizing corrupt pigs in San Francisco's City Hall and Pacific Heights are being hunted down (100% legally) and eviscerated by the FBI, public task forces like ours, the news media, private citizens and the biggest email leaks in history. Hundreds of people will be taken down. The few arrests you have read about in the media are only the beginning. We are all starting at the bottom of the cesspool and working our way up, all the way through Elon Musk, Eric Schmidt, Larry Page, et al, and up to the White House. They will not escape, even in death. Roger Boas, Jeffrey Epstein, et al, may not still be lurking around but the truth about them will live on FOREVER!

The Insiders That Finance, Exploit, Use For Spying And/Ox Sex Traffic With Match.Com

These are the people known as "The Deep State", "The Silicon Valley Cartel", "The Tech Mafia", et al:

"To date, every single one of the targets that attacked us: 1.) have been sued; 2.) investigated by the government and our private investigators; 3.) had case files opened on them by the IRS, DOJ, GAO, FBI, FEC, SEC, FTC and others; 4.) placed under surveillance; 5.) had whistle-blowers and ex-staff expose them; 6.) been tracked across every social media post that has ever been made about them; 7.) had all of their illicit campaign funding and covert PAC cash exposed; 8.) had all of their family trust and shell corporation hiding places tracked and exposed by AI forensic software that works around-the-clock and 9.) placed on law enforcement watch-lists. Even the "untouchables" like Musk, Tesla, Google, Facebook, et al, now have nut-crunching law-suits filed against them, with more coming. There is no place to hide! You tried to kill us and we killed you back you criminal scumbags!"

The following Parties participated in the scam, thought they were "untouchable" and found out that the arm of the law is very long, the hatred of the public for corruption is profound and that hundreds of public service groups have identified, tracked and assisted in their termination. This is the current list of the primary political mobster-scammers in this corruption who are all connected by financial, email and forensic FBI, SEC, FTC and CIA-class evidence. It is well known that every significant hacking and surveillance tool from the CIA, NSA, Fire-Eye and the FSB has been leaked on the internet. Every teenage hacker is now exposing the last 20 years of these crooks crimes. They are all under deep investigation, surveillance and targeted for 100% legal termination using all the info found freely on the web and whistle-blower tips:

The Mob Bosses That Colluded, Organized and Planned These Stock Market Schemes Together:

- Google/Alphabet/YouTube – Hiring under the guise of "AlphaBet"; Charged with manipulation by multiple nations and national organizations; charged with crimes; charged with privacy harvesting frauds against the public; raided for tax fraud; loss of public trust; charged with campaign rigging by TV shows, presidential candidates, federal investigators and news media; under investigation for stock market pumping;
- Steven Chu – Secretary of Energy (Sent packing/fired/forced to resign. Sued for corruption, publicly shamed by news media and Congress. Under ongoing investigation and surveillance)
- The NVCA, AKA National Venture Capital Association, is the lobbyist and Cartel organizer behind much of the misdeeds of this group, they bribe politicians, organize anti-patent campaigns and promote a RICO-violating anti-trust law violating set of tactics to protect their members and to harm competitors, most of the women and blacks that have worked at the NVCA have said they experienced abuse. The NVCA has set-up a tactical program to put a global funding blockade on any group, CEO or inventor who competes with their existing companies.
- SpaceX and their StarLink satellites are a domestic spying operation. They send all of the data that goes over their links to privacy abusers, data harvesters, and political spying operations. Friends don't let friends use StarLink. Any 14 year old hacker can hack into Star Links web streams. Star Link is a danger to global privacy on an epic scale.
- Lachlan Seward – Manager to Steven Chu (Sent packing/fired/forced to resign. Sued for corruption, publicly shamed by news media and Congress. Under ongoing investigation and surveillance))
- Rahm Emanuel – White House strong-arm (Sent packing/fired/forced to resign and his Chicago finance head was indicted for Corruption)(Under ongoing investigation and surveillance)
- Robert Gibbs – White House press secretary (Sent packing/fired/forced to resign)(Under ongoing investigation and surveillance)(accused of political bribery and kickbacks; tax evasion, and more...)
- David Axelrod – White House strategist (Sent packing/fired/forced to resign)(Under ongoing investigation and surveillance)(accused of political bribery and kickbacks; tax evasion, and more...)
- Barack Obama – White House leader (Under investigation. Universally disdained in the press, shunned by his own party)
- Larry Summers – White House finance head (Fired)(Under ongoing investigation and surveillance)(accused of political bribery and kickbacks; tax evasion, and more...)
- Bill Daley – White House strong-arm (Sent packing/fired/forced to resign)(Under ongoing investigation and surveillance))
- Steve Ratiner- White House Car Deals Director working in the West Wing and then with In-Q-Tel (Fired- Indicted in NY State for SEC Fraud/Corruption)(Under ongoing investigation and surveillance))
- Eric Holder – Attorney General, DOJ, Eric Holder was nominated and appointed by the very individuals who ran the scam, created the marching orders, got the insider cash and ordered the hit jobs on their competitors. He ran the cover-up and halted any investigations into the crimes in order to protect his corrupt backers and business partners. He has been financially connected to every person, group and business who is charged with organizing and operating the scam. (Forced to resign) (Charged with staff & VC Protections and blockade of FBI and Special Prosecutor deployments in order to run the cover-up)(Under ongoing investigation and surveillance)
- Larry Page – Owner- Google (Under ongoing investigation and surveillance)(accused of political bribery and kickbacks; tax evasion, and more...)
- Eric Schmidt – Owner- Google (Under ongoing investigation and surveillance)(accused of political bribery and kickbacks; tax evasion, and more, a national coalition is actively exposing his sexual perversions, sex penthouses, etc...)
- John Doerr – Owner – Kleiner Perkins – "Godfather" – Silicon Valley Cartel (Under ongoing investigation and surveillance)(accused of political bribery and kickbacks; tax evasion, and more...)(All of his personal assets, investments and portfolio holdings are under investigation and targeted for extinction)
- Steve Westly – Campaign Bundler (Under ongoing investigation and surveillance)(accused of political bribery and kickbacks; tax evasion, and more...)(All of his personal assets, investments and portfolio holdings are under investigation and targeted for extinction)
- Richard Blum – Senator Feinstein's Husband (He is now under investigation. Has had contracts interdicted by Congressional action)(accused of political bribery and kickbacks; tax evasion, and more...)
- Ray Lane – VC (Charged with Federal Tax Fraud)(Under ongoing investigation and surveillance)(accused of political bribery and kickbacks; tax evasion, and more...)
- Elon Musk – CEO – Tesla (Under ongoing investigation and surveillance.) & in multiple lawsuits for fraud(Now uncovered as largest individual recipient of government payola in history)(accused of political bribery and kickbacks; tax evasion, and more...) (All of his personal assets, investments and portfolio holdings are under investigation and targeted for extinction) He cuts up and tortures animals for his Neuralink, spies on citizens with his SpaceX and runs an EV monopoly and causes genocide with his cobalt and lithium mines with his corrupt Tesla cars. His life is devoted to weird sex, drugs, political bribes and stock market manipulations.
- Andy Bechtolsheim – VC- Insider campaign backer (He is now under investigation)(accused of political bribery and kickbacks; tax evasion, and more...)
- Vinod Khosla – VC Campaign backer (Under ongoing investigation and surveillance)(in multiple lawsuits)(accused of political bribery and kickbacks; tax evasion, and more... Exposed in 60 Minutes and CNN news coverage)
- Martin LaGod – VC Campaign backer from Firelake (Under ongoing investigation and surveillance)(assets, investments and stock portfolio tracked and targeted)(All of his personal assets, investments and portfolio holdings are under investigation and targeted for extinction)
- Latham and Watkins - Extremist law firm known for rigging public policy decisions, running attacks on candidates and manipulating the law to the advantage of Silicon Valley oligarchs
- Ira Ehrenpreis – VC Campaign backer (He is now under investigation)(accused of political bribery and kickbacks; tax evasion, and more...)(All of his personal assets, investments and portfolio holdings are under investigation and targeted for extinction)
- Eric Strickland – Head of Auto Safety agency (Sent packing/fired/forced to resign)(he is now under investigation. Charged with cover-up of Tesla and GM auto dangers he had known about)
- Tom Perkins – VC Campaign backer (He is now under investigation, slammed by public and media)(accused of political bribery and kickbacks; tax evasion, and more...)
- In-Q-Tel, Inc. – CIA off-shoot associated with Eric Schmidt, Google, Elon Musk and the Cartel leaders. Ran "hit jobs" on Silicon Valley VC adversaries and reporters (Sued, under investigation, exposed in multiple documentaries, under investigation for Cocaine trafficking) They claim to be a "charity" but they are a dirty tricks spy operation.
- Tim Draper – VC Campaign backer (Under ongoing investigation and surveillance)(accused of political bribery and kickbacks; tax evasion, and more...)(All of his personal assets, investments and portfolio holdings are under investigation and targeted for extinction)
- Lloyd Craig Bierlein – Head of Goldman Sachs and liaison in almost every single CleanTech company scam (Under ongoing investigation and surveillance)(accused of political bribery and kickbacks; tax evasion, and more...) (All of his personal assets, investments and portfolio holdings are under investigation and targeted for extinction)
- Raj Gupta – McKinsey Fixer (Indicted, Jailed)(he is now under investigation)
- Jacque Littlefield - Ran a private army out of Woodside, California (Dead)
- Roger Boas – Ran San Francisco Child sex ring brothels, for SF City Hall officials, with crooked San Francisco Cops and embezzled money from San Francisco City Hall
- Brian Concher – Delta VC intermediary (Under ongoing investigation and surveillance)(accused of political bribery and kickbacks; tax evasion, and more...)
- John Molnar – Old school San Francisco North Beach Mobster. Ran for Mayor, Lied about district, Daughter removed from him due to abuse
- Goldman Sachs – Financial packager (Suspected of staging most of the TARP/DOE funds for personal gain & insider payouts)(Under ongoing investigation and surveillance), Elon Musk's Go-To Book Cookers and stock manipulators
- Kleiner Perkins – Campaign funding VC who (Received massive windfalls from Russian mining & tech start-up rigging. Sued. Under ongoing investigation and surveillance)(Offices broken into by federal investigators) All assets being tracked and terminated.)
- Draper Fisher – VC firm (Campaign funding who received massive windfalls from Russian mining & tech start-up rigging) (Under ongoing investigation and surveillance)
- McKinsey Consulting – Government services contractor (Supplied DOE manipulation staff, manipulated white-papers to Congress and lobbying manipulation for the scam)(Under ongoing investigation and surveillance)
- John Derinstein – Kleiner Perkins stock market manipulation boss
- Dianne Feinstein – Senator (He is now under investigation) Wife of Silicon Valley Cartel Member Richard Blum(accused of political bribery and kickbacks; tax evasion, and more...)(Under ongoing investigation and surveillance)
- Harry Reid – Senator- Solar factory guru, Congress lead (Accused of political bribery and kickbacks; tax evasion, and more, ran scams with Elon Musk... Forced out of Congress in shame) (Under ongoing investigation and surveillance)
- Senator Calderone – Senator (Indicted & charged with corruption)
- Leland Ye – Senator (Indicted & charged with corruption)
- Lois Lerner – IRS head charged with running political hit-jobs (Sent packing/fired/forced to resign)(She is now under investigation. Shamed in news media)(Under ongoing investigation and surveillance)
- James Brown Jr – Obama HHS Programming lead in California (Arrested for corruption)

- Daniel Cohen – DOE Legal counsel (Sent packing/fired/forced to resign)(Under ongoing investigation and surveillance)
- Perkins Coi – Law firm who sold lobby manipulation services (Under federal investigation)
- Jonathan Silver – DOE VC (Sent packing/fired/forced to resign)(Under ongoing investigation and surveillance)(Shamed in media for epic failures)
- Bill Lockyer – Calif State finance head ((Under ongoing investigation and surveillance) and charged with corruption by media. Assets and ownerships under investigation)
- Steve Jurevickson – VC who manipulated Senate staff for Tesla cash (Under ongoing investigation and surveillance) All assets being tracked and terminated.)
- Matt Rogers – McKinsey corruption operator reporting to Steven Chu (Under ongoing investigation and surveillance)(All assets being tracked and terminated.)
- Steve Spinner and Allison Spinner- McKinsey corruption operator reporting to Steven Chu with secret connection inside Solyndra (Under ongoing investigation and surveillance) All assets being tracked and terminated.) Their Assassin Operatives That Run The Hit Jobs And Attacks For Them:
- Gawker Media (Jezebel, Gizmodo, Jalopnik, Gawker) – Sued; Bankrupt; under investigation for tax fraud and campaign finance disclosure evasion

- Nicholas Guido Denton – Defamation-for hire boss of tabloid empire also charged with abuse of young boys
- Adrian Covert - Nicholas Guido Denton's character assassin
- Patrick George - Nicholas Guido Denton's character assassin
- Gabrielle Darbyshire - Nicholas Guido Denton's character assassin

• Investigations have also revealed that the White House and California Senators hired the character assassination and defamation attack services: Cardinal & Pine; Pacronym; Acronym; The Americano; Investing in US; Shadow Inc; Courier Newroom; N-O-Tel; Gawker Media; Jalopnik; Gizmodo Media; K2 Intelligence; WikiStrat; Podesta Group; Fusion GPS; Google; YouTube; Alphabet; Facebook; Twitter; Think Progress; Media Matters); Black Cube; Correct The Record; Orbis Business Intelligence, Undercover Global Ltd; Stratfor; Jigsaw; ShareBlue/Acronym; Versa LLC; American Ledger; Supermajority News; New Venture Fund; Sixteen Thirty Fund; Cambridge Analytica; Sid Blumenthal; States Newroom; Hopewell Fund; Open Society; David Brock; AmpliFire News; American Bridge; Plouffe Consulting; Pantsuit Nation; MotiveAI; American Bridge 21st Century Foundation; Priorities USA; PR Firm Sunshine Sachs; The American Independent Foundation; Covington and Burling; Buzzfeed; The American Independent; Perkins Cole; Secondary Infection; Wilson Sorsini and thousands more to run hit-jobs, character assassinations, dirty tricks and economic reprisal attacks on any applicants who reported the crimes. Each of those companies are now under federal and civil investigation. Most of these businesses offer the service of manipulating elections and news coverage in order to steer stock market profits into the pockets of billionaire clients at the expense of the taxpayer and Democracy. They hide their transactions via money-laundering. All of these services, when focused on individual citizens, are lethal.

• THE PEOPLE LISTED HERE ARE USING THE MATCH.COM CARTEL FOR, EITHER:

- Sex Trafficking
- Political Bribe Paying
- Sextortion
- Domestic Spying
- Political Intelligence Manipulation
- Or other illicit deeds....

Please report your complaints about Match.com, OK Cupid, Netflix, Facebook, Kleiner Perkins, Sony Pictures (and the other tech cartel members) for the active investigations and federal lawsuits now in progress. By filing a complaint and telling your story, you can help identify trends and patterns of questionable business practices that will contribute to law enforcement and consumer protection efforts. You can be certain that these particular cases will get driven hard and pushed before Congress. The more reports we can get filed on these bad guys, the bigger the cases we can get processed. File your complaint at <http://www.ftc.gov/complaint>

Are you wondering why you don't see any of the true facts on the "mainstream" internet or "news" sites. The tech Taliban of the internet have colluded to become an information and ideological control empire. If they can make you think, act and vote like they want then they can put their candidates in office who will give them trillions of dollars of government contracts. It has already worked. They all: sleep with each other; go to each other's parties; hire the same lobbyists, lawyers, Goldman Sachs fund managers; marry and date only people from the same frat houses and sororities; have the same homosexual agenda; finance the same PAC's; hide their money in the same off-shore bolt holes; instruct their HR departments to only hire young, naive, easily brainwashed, radical dyed-hair hippie-types; have bank accounts that have received CIA or In-Q-Tel cash; control the National Venture Capital Association so that nobody who competes with them can get funded; practice exclusionary culture, ie: while screaming about women's rights and BLM they never hire women or blacks; buy off the U.S. Patent Office to keep from having to pay for stealing most of their technology; own the servers and control equipment that operates 90% of the internet; etc. The Tech Taliban are: Netflix, Google, Alphabet, Youtube, LinkedIn, Amazon, AWS, CNN, Facebook, Tesla, SpaceX, Survey Monkey, etc.

They do what they do to get profits from politicians they put in office.

TAKING THEM DOWN:

The greatest success in shutting down their efforts has come from two tactics:

- 1.) Forcing government agencies to sue them with RICO and Anti-trust lawsuits and by gathering groups of people to sue them with Class Action lawsuits. Lawyers will do Class Actions at no cost to you if you get enough people together.
- 2.) Using a CKB Procedure on each one. How the "Corruption Kill Box" (CKB) works: A CKB Procedure combines federal police investigations created by formal filed criminal referrals (which any member of the public can submit) and Form 302 overview drafts, public class-action lawsuits, massive news media disclosure blasts, formal regulatory agency complaint filings, individual lawsuits against political and agency executives, documentary film production and distribution, crash the crooks stocks, the promotion and organization of Congressional hearings, crowd-sourced social media public forensics and open-source AI financial crimes tracking software. The procedure is an extinction-level event with a 100% success rate against corrupt entities. CKB's only work on the corrupt, so non corrupt parties are safe from it's effects.

ANY member of the public can engage in these totally legal anti-corruption actions. Don't sit around and complain about these criminals. They own parts of the government.

YOU have to do something!

(Pass this along to others who might partner up and take action)
Every public figure we file a complaint with that does nothing or that runs a cover-up is listed on a

and in a dossier that they will have to answer for later!
